Defn: A salt of silicic acid.

Note: In mineralogical chemistry the silicates include; the unisilicates or orthosilicates, salts of orthosilicic acid; the bisilicates or metasilicates, salts of metasilicic acid; the polysilicates or acid silicates, salts of the polysilicic acids; the basic silicates or subsilicates, in which the equivalent of base is greater than would be required to neutralize the acid; and the hydrous silicates, including the zeolites and many hydrated decomposition products.

SILICATED
Sil"i*ca`ted, a. (Chem.)

Defn: Combined or impregnated with silicon or silica; as, silicated hydrogen; silicated rocks. Silicated soap, a hard soap containing silicate of soda.

SILICATIZATION
Sil`i*ca*ti*za"tion, n.

Defn: Silicification.

SILICEA
Si*lic"e*a, n. pl. Etym: [NL.] (Zoöl.)

Defn: Same as Silicoidea.

SILICEOUS

Si*li"ceous, a. Etym: [L. siliceus, fr. silex, silicis, a flint.]

Defn: Of or pertaining to silica; containing silica, or partaking of its nature. [Written also silisious.]

SILICIC
Si*lic"ic, a. Etym: [L. silex, silicis, a flint: cf. F. silicique.] (Chem.)

Defn: Pertaining to, derived from, or resembling, silica; specifically, designating compounds of silicon; as, silicic acid. Silicic acid (Chem.), an amorphous gelatinous substance, Si(HO)4, very unstable and easily dried to silica, but forming many stable salts; -- called also orthosilicic, or normal silicic, acid.

SILICICALCAREOUS
Si*lic`i*cal*ca"re*ous, a.

Defn: Consisting of silica and calcareous matter.

SILICIDE
Sil"i*cide, n. (Chem.)

Defn: A binary compound of silicon, or one regarded as binary. [R.] Hydrogen silicide (Chem.), a colorless, spontaneously inflammable gas, SiH4, produced artifically from silicon, and analogous to methane; -- called also silico-methane, silicon hydride, and formerly siliciureted hydrogen.

SILICIFEROUS

Sil`i*cif"er*ous, a. Etym: [L. silex, silicis, a flint + -ferous.]

Defn: Producing silica; united with silica.

SILICIFICATION
Si*lic`i*fi*ca"tion, n. Etym: [See Silicify.] (Chem.)

Defn: Thae act or process of combining or impregnating with silicon or silica; the state of being so combined or impregnated; as, the silicification of wood.

SILICIFIED
Si*lic"i*fied, a. (Chem.)

Defn: Combined or impregnated with silicon or silica, especially the latter; as, silicified wood.

SILICIFY
Si*lic"i*fy, v. t. [imp. & p. p. Silicified; p. pr. & vb. n. Silicifying.] Etym: [L. silex, silicis, a flint + -fy: cf. F. silicifier.] (Chem.)

Defn: To convert into, or to impregnate with, silica, or with the compounds of silicon.
The specimens found . . . are completely silicified. Say.

Note: The silica may take the form of agate, chalcedony, flint, hornstone, or crystalline quartz.

SILICIFY

Si*lic"i*fy, v. i.

Defn: To become converted into silica, or to be impregnated with silica.

SILICIOIDEA
Sil`i*ci*oi"de*a, n. pl. (Zoöl.)

Defn: Same as Silicoidea.

SILICIOUS
Si*li"cious, a.

Defn: See Siliceous.

SILICISPONGIAE
Sil`i*ci*spon"gi*æ, n. pl. Etym: [NL. See Silex, and Sponge.] (Zoöl.)

Defn: Same as Silicoidea.

SILICITED
Si*lic"it*ed, a.

Defn: Silicified. [Obs.]

SILICIUM
Si*lic"i*um, n.

Defn: See Silicon.

SILICIURETED
Si*lic"i*u*ret`ed, a. [Written also siliciuretted.] (Old. Chem.)

Defn: Combined or impregnated with silicon. [Obsoles.] Siliciureted hydrogen. (Chem.) Hydrogen silicide. [Obs.]

SILICLE
Sil"i*cle, n. Etym: [L. silicula, dim. of siliqua a pod or husk: cf. F. silicule.] (Bot.)

Defn: A seed vessel resembling a silique, but about as broad as it is long. See Silique.

SILICO-
Sil"i*co-. (Chem.)

Defn: A combining form (also used adjectively) denoting the presence of silicon or its compounds; as, silicobenzoic, silicofluoride, etc.

SILICOFLUORIC
Sil`i*co*flu*or"ic, a. (Chem.)

Defn: Containing, or composed of, silicon and fluorine; especially, denoting the compounds called silicofluorides. Silicofluoric acid (Chem.), a compound of hydrofluoric acid and silicon fluoride, known only in watery solution. It is produced by the action of silicon fluoride on water, and is regarded as an acid, H2SiF6, and the type and origin of the silicofluorides.

SILICOFLUORIDE

Sil`i*co*flu"or*ide, n. (Chem.)

Defn: A fluosilicate; a salt of silicofluoric acid.

SILICOIDEA
Sil`i*coi"de*a, n. pl. Etym: [NL. See Silex, and -oid.] (Zoöl.)

Defn: An extensive order of Porifera, which includes those that have the skeleton composed mainly of siliceous fibers or spicules.

SILICON
Sil"i*con, n. Etym: [See Silica.] (Chem.)

Defn: A nonmetalic element analogous to carbon. It always occurs combined in nature, and is artificially obtained in the free state, usually as a dark brown amorphous powder, or as a dark crystalline substance with a meetallic luster. Its oxide is silica, or common quartz, and in this form, or as silicates, it is, next to oxygen, the most abundant element of the earth's crust. Silicon is characteristically the element of the mineral kingdom, as carbon is of the organic world. Symbol Si. Atomic weight 28. Called also silicium.

SILICOTUNGSTIC
Sil`i*co*tung"stic, a. (Chem.)

Defn: Of, pertaining to, or designating, any one of a series of double acids of silicon and tungsten, known in the free state, and also in their salts (called silicotungstates).

SILICULA
Si*lic"u*la, n. Etym: [L.] (Bot.)

Defn: A silicle.

SILICULE
Sil"i*cule, n. (Bot.)

Defn: A silicle.

SILICULOSE
Si*lic"u*lose`, a. Etym: [NL. siliculosus, fr. L. silicula: cf. F. siliculeux. See Silicle.]

1. (Bot.)

Defn: Bearing silicles; pertaining to, or resembling, silicles.

2. Full of, or consisting of, husks; husky. [Obs.]

SILIGINOSE
Si*lig"i*nose`, a.Etym: [L. siligineus, fr. siligo, -inis, fine and very white wheat.]

Defn: Made of fine wheat. [Obs.] Bailey.

SILING
Sil"ing, a. & n.

Defn: from Sile to strain. [Obs. or Prov.Eng.] Siling dish, a

colander. [Obs. or Prov. Eng.]

SILIQUA
Sil"i*qua, n.; pl. Siliquæ. Etym: [L. See Silique.]

1. (Bot.)

Defn: Same as Silique.

2. A weight of four grains; a carat; -- a term used by jewelers, and refiners of gold.

SILIQUE
Sil"ique, n. Etym: [L. siliqua a pod or husk, a very small weight or measure: cf. F. silique.] (Bot.)

Defn: An oblong or elongated seed vessel, consisting of two valves with a dissepiment between, and opening by sutures at either margin. The seeds are attached to both edges of the dissepiment, alternately upon each side of it.

SILIQUIFORM
Sil"i*qui*form, a. Etym: [Silique + -form: cf. F. siliquiforme.] (Bot.)

Defn: Having the form of a silique.

SILIQUOSA
Sil`i*quo"sa, n. pl. Etym: [NL. See Siliquose.] (Bot.)

Defn: A Linnæan order of plants including those which bear siliques.

SILIQUOSE; SILIQUOUS
Sil"i*quose`, Sil"i*quous, a. Etym: [NL. siliquosus: cf. F. siliqueux.] (Bot.)

Defn: Bearing siliques; as, siliquose plants; pertaining to, or resembling, siliques; as, siliquose capsules.

SILK
Silk, n. Etym: [OE. silk, selk, AS. seolc, seoloc; akin to Icel. silki, SW. & Dan. silke; prob. through Slavic from an Oriental source; cf. Lith. szilkai, Russ. shelk', and also L. sericum Seric stuff, silk. Cf. Sericeous. Serge a woolen stuff.]

1. The fine, soft thread produced by various species of caterpillars in forming the cocoons within which the worm is inclosed during the pupa state, especially that produced by the larvæ of Bombyx mori.

2. Hence, thread spun, or cloth woven, from the above-named material.

3. That which resembles silk, as the filiform styles of the female flower of maize. Raw silk, silk as it is wound off from the cocoons, and before it is manufactured.
-- Silk cotton, a cottony substance enveloping the seeds of the silk-cotton tree.
-- Silk-cotton tree (Bot.), a name for several tropical trees of the genera Bombax and Eriodendron, and belonging to the order Bombaceæ. The trees grow to an immense size, and have their seeds enveloped in a cottony substance, which is used for stuffing cushions, but can not

be spun.
-- Silk flower. (Bot.) (a) The silk tree. (b) A similar tree (Calliandra trinervia) of Peru.
-- Silk fowl (Zoöl.), a breed of domestic fowls having silky plumage.
-- Silk gland (Zoöl.), a gland which secretes the material of silk, as in spider or a silkworm; a sericterium.
-- Silk gown, the distinctive robe of a barrister who has been appointed king's or queen's counsel; hence, the counsel himself. Such a one has precedence over mere barristers, who wear stuff gowns. [Eng.] -- Silk grass (Bot.), a kind of grass (Stipa comata) of the Western United States, which has very long silky awns. The name is also sometimes given to various species of the genera Aqave and Yucca.
-- Silk moth (Zoöl.), the adult moth of any silkworm. See Silkworm.
-- Silk shag, a coarse, rough-woven silk, like plush, but with a stiffer nap.
-- Silk spider (Zoöl.), a large spider (Nephila plumipes), native of the Southern United States, remarkable for the large quantity of strong silk it produces and for the great disparity in the sizes of the sexes.
-- Silk thrower, Silk throwster, one who twists or spins silk, and prepares it for weaving. Brande & C.
-- Silk tree (Bot.), an Asiatic leguminous tree (Albizzia Julibrissin) with finely bipinnate leaves, and large flat pods; -- so called because of the abundant long silky stamens of its blossoms. Also called silk flower.
-- Silk vessel. (Zoöl.) Same as Silk gland, above.
-- Virginia silk (Bot.), a climbing plant (Periploca Græca) of the Milkweed family, having a silky tuft on the seeds. It is native in

Southern Europe.

SILKEN
Silk"en, a. Etym: [AS. seolcen, seolocen.]

1. Of or pertaining to silk; made of, or resembling, silk; as, silken cloth; a silken veil.

2. Fig.: Soft; delicate; tender; smooth; as, silken language. "Silken terms precise." Shak.

3. Dressed in silk. "A . . . silken wanton." Shak.

SILKEN
Silk"en, v. t.

Defn: To render silken or silklike. Dyer.

SILKINESS
Silk"i*ness, n.

1. The quality or state of being silky or silken; softness and smoothness.

2. Fig.: Effeminacy; weakness. [R.] B. Jonson.

SILKMAN
Silk"man, n.; pl. Silkmen (.

Defn: A dealer in silks; a silk mercer. Shak.

SILKNESS
Silk"ness, n.

Defn: Silkiness. [Obs.] B. Jonson.

SILK-STOCKING
Silk"-stock`ing, a.

Defn: Wearing silk stockings (which among men were formerly worn chiefly by the luxurious or aristocratic); hence, elegantly dressed; aristocratic; luxurious; -- chiefly applied to men, often by way of reproach.

[They] will find their levees crowded with silk-stocking gentry, but no yeomanry; an army of officers without soldiers.
Jefferson.

SILKWEED
Silk"weed`, n. (Bot.)

Defn: Any plant of the genera Asclepias and Acerates whose seed vessels contain a long, silky down; milkweed.

SILKWORM
Silk"worm`, n. Etym: [AS. seolcwyrm.] (Zoöl.)

Defn: The larva of any one of numerous species of bombycid moths, which spins a large amount of strong silk in constructing its cocoon before changing to a pupa.

Note: The common species (Bombyx mori) feeds onm the leaves of the white mulberry tree. It is native of China, but has long been introduced into other countries of Asia and Europe, and is reared on a large scale. In America it is reared only to small extent. The Ailanthus silkworm (Philosamia cynthia) is a much larger species, of considerable importance, which has been introduced into Europe and America from China. The most useful American species is the Polyphemus. See Polyphemus. Pernyi silkworm, the larva of the Pernyi moth. See Pernyi moth.
-- Silkworm gut, a substance prepared from the contents of the silk glands of silkworms and used in making lines for angling. See Gut.
-- Silkworm rot, a disease of silkworms; muscardine.

SILKY
Silk"y, a. [Compar. Silkier; superl. Silkiest.]

1. Of or pertaining to silk; made of, or resembling, silk; silken; silklike; as, a silky luster.

2. Hence, soft and smooth; as, silky wine.

3. Covered with soft hairs pressed close to the surface, as a leaf; sericeous. Silky oak (Bot.), a lofty Australian tree (Grevillea robusta) with silky tomentose lobed or incised leaves. It furnishes a valuable timber.

SILL
Sill, n. Etym: [OE. sille, sylle, AS. syl, syll; akin to G. schwelle, OHG. swelli, Icel. syll, svill, Sw. syll, Dan. syld, Goth. gasuljan

to lay a foundation, to found.]

Defn: The basis or foundation of a thing; especially, a horizontal piece, as a timber, which forms the lower member of a frame, or supports a structure; as, the sills of a house, of a bridge, of a loom, and the like. Hence:

SILL
Sill, n. Etym: [Cf. Thill.]

Defn: The shaft or thill of a carriage. [Prov. Eng.]

SILL
Sill, n. Etym: [Cf. 4th Sile.]

Defn: A young herring. [Eng.]

SILLABUB
Sil"la*bub, n. Etym: [Cf. sile to strain, and bub liquor, also Prov. E. sillibauk.]

Defn: A dish made by mixing wine or cider with milk, and thus forming

a soft curd; also, sweetened cream, flavored with wine and beaten to a stiff froth. [Written also syllabub.]

SILLER
Sil"ler, n.

Defn: Silver. [Scot.]

SILLILY
Sil"li*ly, adv. Etym: [From Silly.]

Defn: In a silly manner; foolishly. Dryden.

SILLIMANITE
Sil"li*man*ite, n. Etym: [After Benjamin Siliman, an American meneralogist.] (Min.)

Defn: Same as Fibrolite.

SILLINESS
Sil"li*ness, n.

Defn: The quality or state of being silly.

SILLOCK
Sil"lock, n. (Zoöl.)

Defn: The pollock, or coalfish.

SILLON

Sil"lon, n. Etym: [F., a furrow.] (Fort.)

Defn: A work raised in the middle of a wide ditch, to defend it.
Crabb.

SILLY
Sil"ly, a. [Compar. Sillier; superl. Silliest.] Etym: [OE. seely, sely, AS. s, ges, happy, good, fr. s, s, good, happy, s good fortune, happines; akin to OS. salig, a, good, happy, D. zalig blessed, G. selig, OHG. salig, Icel. s, Sw. säll, Dan. salig, Goth. s good, kind, and perh. also to L. sollus whole, entire, Gr. sarva. Cf. Seel, n.]

Defn: Mud or fine earth deposited from running or standing water.

SILT

Silt, v. t. [imp. & p. p. Silted; p. pr. & vb. n. Silting.]

Defn: To choke, fill, or obstruct with silt or mud.

SILT
Silt, v. i.

Defn: To flow through crevices; to percolate.

SILTY
Silt"y, a.

Defn: Full of silt; resembling silt.

SILUNDUM
Si*lun"dum, n. [Trade name]

Defn: A form of silicon carbide, produced in the electric furnace, possessing great hardness, and high electrical resistance, and not subject to oxidation below 2880º F., or 1600º C.

SILURE
Si*lure", n. Etym: [L. silurus a sort of river fish, Gr. silure.] (Zoöl.)

Defn: A fish of the genus Silurus, as the sheatfish; a siluroid.

SILURIAN
Si*lu"ri*an, a. Etym: [From L. Silures, a people who anciently inhabited a part of England and Wales.] (Geol.)

Defn: Of or pertaining to the country of the ancient Silures; -- a term applied to the earliest of the Paleozoic eras, and also to the strata of the era, because most plainly developed in that country.

Note: The Silurian formation, so named by Murchison, is divided into the Upper Silurian and Lower Silurian. The lower part of the Lower Silurian, with some underlying beds, is now separated under the name Cambrian, first given by Sedwick. Recently the term Ordovician has been proposed for the Lower Silurian, leawing the original word to apply only to the Upper Silurian.

SILURIAN
Si*lu"ri*an, n.

Defn: The Silurian age.

SILURIDAN
Si*lu"ri*dan, n. (Zoöl.)

Defn: Any fish of the family Silurid or of the order Siluroidei.

SILUROID
Si*lu"roid, n. Etym: [Silurus + -oid.] (Zoöl.)

Defn: Belonging to the Siluroidei, or Nematognathi, an order of fishes including numerous species, among which are the American catfishes and numerous allied fresh-water species of the Old World, as the sheatfish (Silurus glanis) of Europe.
-- n.

Defn: A siluroid fish.

SILUROIDEI
Sil`u*roi"de*i, n. pl. Etym: [NL.] (zoöl.)

Defn: An order of fishes, the Nematognathi.

SILURUS
Si*lu"rus, n. Etym: [L. See Silure.] (Zoöl.)

Defn: A genus of large malacopterygious fishes of the order Siluroidei. They inhabit the inland waters of Europe and Asia.

SILVA
Sil"va, n.; pl. E. Silvas, L. Silvae (. Etym: [L., properly, a wood, forest.] [Written also sylva.] (Bot.)
(a) The forest trees of a region or country, considered collectively.
(b) A description or history of the forest trees of a country.

SILVAN
Sil"van, a. Etym: [L. silva, less correctly sylva, a wood or grove, perh. akin to Gr. "y`lh; cf. L. Silvanus Silvanus the god of woods: cf. F. sylvain silvan. Cf. Savage.]

Defn: Of or pertaining to woods; composed of woods or groves; woody. [Written also sylvan.]
Betwixt two rows of rocks, a silvan scene Appears above, and groves forever green. Dryden.

SILVAN
Sil"van, n. (Old Chem.)

Defn: See Sylvanium. [Obs.]

SILVANITE
Sil"van*ite, n. (Min.)

Defn: See Sylvanite.

SILVAS; SELVAS
Sil"vas or Sel"vas, n. pl. Etym: [L. silva a forest, Sp. selva.]

Defn: Vast woodland plains of South America.

SILVATE
Sil"vate, n. (Chem.)

Defn: Same as Sylvate.

SILVER
Sil"ver, n. Etym: [OE. silver, selver, seolver, AS. seolfor, siolfur, siolufr, silofr, sylofr; akin to OS. silubar, OFries. selover, D. zilver, LG. sulver, OHG. silabar, silbar, G. silber, Icel. silfr, Sw. silfver, Dan. sölv, Goth. silubr, Russ. serebro, Lith. sidabras; of unknown origin.]

1. (Chem.)

Defn: A soft white metallic element, sonorous, ductile, very

malleable, and capable of a high degree of polish. It is found native, and also combined with sulphur, arsenic, antimony, chlorine, etc., in the minerals argentite, proustite, pyrargyrite, ceragyrite, etc. Silver is one of the "noble" metals, so-called, not being easily oxidized, and is used for coin, jewelry, plate, and a great variety of articles. Symbol Ag (Argentum). Atomic weight 107.7. Specific gravity 10.5.

Note: Silver was known under the name of luna to the ancients and also to the alchemists. Some of its compounds, as the halogen salts, are remarkable for the effect of light upon them, and are used in photography.

2. Coin made of silver; silver money.

3. Anything having the luster or appearance of silver.

4. The color of silver.

Note: Silver is used in the formation of many compounds of obvious meaning; as, silver-armed, silver-bright, silver-buskined, silver-coated, silver-footed, silver-haired, silver-headed, silver-mantled, silver-plated, silver-slippered, silver-sounding, silver-studded, silver-tongued, silver-white. See Silver, a. Black silver (Min.), stephanite; -- called also brittle silver ore, or brittle silver glance.
 -- Fulminating silver. (Chem.) (a) A black crystalline substance, $Ag_2O.(NH_3)_2$, obtained by dissolving silver oxide in aqua ammonia. When dry it explodes violently on the slightest percussion. (b) Silver fulminate, a white crystalline substance, $Ag_2C_2N_2O_2$, obtained

by adding alcohol to a solution of silver nitrate. When dry it is violently explosive.
-- German silver. (Chem.) See under German.
-- Gray silver. (Min.) See Freieslebenite.
-- Horn silver. (Min.) See Cerargyrite.
-- King's silver. (O. Eng. Law) See Postfine.
-- Red silver, or Ruby silver. (Min.) See Proustite, and Pyrargyrite.
-- Silver beater, one who beats silver into silver leaf or silver foil.
-- Silver glance, or Vitreous silver. (Min.) See Argentine.

SILVER
Sil"ver, a.

1. Of or pertaining to silver; made of silver; as, silver leaf; a silver cup.

2. Resembling silver. Specifically:
(a) Bright; resplendent; white. "Silver hair." Shak.
Others, on silver lakes and rivers, bathed Their downy breast. Milton.

(b) Precious; costly.
(c) Giving a clear, ringing sound soft and clear. "Silver voices." Spenser.
(d) Sweet; gentle; peaceful. "Silver slumber." Spenser. American silver fir (Bot.), the balsam fir. See under Balsam.
-- Silver age (Roman Lit.), the latter part (a. d. 14-180) of the classical period of Latinity, -- the time of writers of inferior

purity of language, as compared with those of the previous golden age, so-called.
-- Silver-bell tree (Bot.), an American shrub or small tree (Halesia tetraptera) with white bell-shaped flowers in clusters or racemes; the snowdrop tree.
-- Silver bush (Bot.), a shrubby leguminous plant (Anthyllis Barba-Jovis) of Southern Europe, having silvery foliage.
-- Silver chub (Zoöl.), the fallfish.
-- Silver eel. (Zoöl.) (a) The cutlass fish. (b) A pale variety of the common eel.
-- Silver fir (Bot.), a coniferous tree (Abies pectinata) found in mountainous districts in the middle and south of Europe, where it often grows to the height of 100 or 150 feet. It yields Burgundy pitch and Strasburg turpentine.
-- Silver foil, foil made of silver.
-- Silver fox (Zoöl.), a variety of the common fox (Vulpes vulpes, variety argenteus) found in the northern parts of Asia, Europe, and America. Its fur is nearly black, with silvery tips, and is highly valued. Called also black fox, and silver-gray fox.
-- Silver gar. (Zoöl.) See Billfish (a) -- Silver grain (Bot.), the lines or narrow plates of cellular tissue which pass from the pith to the bark of an exogenous stem; the medullary rays. In the wood of the oak they are much larger than in that of the beech, maple, pine, cherry, etc.
-- Silver grebe (Zoöl.), the red-throated diver. See Illust. under Diver.
-- Silver hake (Zoöl.), the American whiting.
-- Silver leaf, leaves or sheets made of silver beaten very thin.
-- Silver lunge (Zoöl.), the namaycush.
-- Silver moonfish.(Zoöl.) See Moonfish (b).

-- Silver moth (Zoöl.), a lepisma.
-- Silver owl (Zoöl.), the barn owl.
-- Silver perch (Zoöl.), the mademoiselle, 2.
-- Silver pheasant (Zoöl.), any one of several species of beautiful crested and long-tailed Asiatic pheasants, of the genus Euplocamus. They have the tail and more or less of the upper parts silvery white. The most common species (E. nychtemerus) is native of China.
-- Silver plate, domestic utensils made of silver.
-- Silver plover (Zoöl.), the knot.
-- Silver salmon (Zoöl.), a salmon (Oncorhynchus kisutch) native of both coasts of the North Pacific. It ascends all the American rivers as far south as the Sacramento. Called also kisutch, whitefish, and white salmon.
-- Silver shell (Zoöl.), a marine bivalve of the genus Anomia. See Anomia.
-- Silver steel, an alloy of steel with a very small proportion of silver.
-- Silver stick, a title given to the title field officer of the Life Guards when on duty at the palace. [Eng.] Thackeray.
-- Silver tree (Bot.), a South African tree (Leucadendron argenteum) with long, silvery, silky leaves.
-- Silver trout, (Zoöl.) See Trout.
-- Silver wedding. See under Wedding.
-- Silver whiting (Zoöl.), a marine sciænoid food fish (Menticirrus littoralis) native of the Southern United States; -- called also surf whiting.
-- Silver witch (Zoöl.), A lepisma.

SILVER
Sil"ver, v. t. [imp. & p. p. Silvered; p. pr. & vb. n. Silvering.]

1. To cover with silver; to give a silvery appearance to by applying a metal of a silvery color; as, to silver a pin; to silver a glass mirror plate with an amalgam of tin and mercury.

2. To polish like silver; to impart a brightness to, like that of silver.
And smiling calmness silvered o'er the deep. Pope.

3. To make hoary, or white, like silver.
His head was silvered o'er with age. Gay.

SILVER
Sil"ver, v. i.

Defn: To acquire a silvery color. [R.]
The eastern sky began to silver and shine. L. Wallace.

SILVERBACK
Sil"ver*back`, n. (Zoöl.)

Defn: The knot.

SILVERBERRY
Sil"ver*ber`ry, n. (Bot.)

Defn: A tree or shrub (Elæagnus argentea) with silvery foliage and fruit. Gray.

SILVERBILL

Sil"ver*bill`, n. (Zoöl.)

Defn: An Old World finch of the genus Minia, as the M. Malabarica of India, and M. cantans of Africa.

SILVERBOOM
Sil"ver*boom`, n. Etym: [D. zilver silver + boom tree.] (Bot.)

Defn: See Leucadendron.

SILVER CERTIFICATE

SKEPTIC
Skep"tic, n. Etym: [Gr. skeptiko`s thoughtful, reflective, fr. ske`ptesqai to look carefully or about, to view, consider: cf. L.

scepticus, F. sceptique. See Scope.] [Written also sceptic.]

1. One who is yet undecided as to what is true; one who is looking or inquiring for what is true; an inquirer after facts or reasons.

2. (Metaph.)

Defn: A doubter as to whether any fact or truth can be certainly known; a universal doubter; a Pyrrhonist; hence, in modern usage, occasionally, a person who questions whether any truth or fact can be established on philosophical grounds; sometimes, a critical inquirer, in opposition to a dogmatist.
All this criticism [of Hume] proceeds upon the erroneous hypothesis that he was a dogmatist. He was a skeptic; that is, he accepted the principles asserted by the prevailing dogmatism: and only showed that such and such conclusions were, on these principles, inevitable. Sir W. Hamilton.

3. (Theol.)

Defn: A person who doubts the existence and perfections of God, or the truth of revelation; one who disbelieves the divine origin of the Christian religion.
Suffer not your faith to be shaken by the sophistries of skeptics. S. Clarke.

Note: This word and its derivatives are often written with c instead of k in the first syllable, -- sceptic, sceptical, scepticism, etc.
Dr. Johnson, struck with the extraordinary irregularity of giving c its hard sound before e, altered the spelling, and his example has

been followed by most of the lexicographers who have succeeded him; yet the prevalent practice among English writers and printers is in favor of the other mode. In the United States this practice is reversed, a large and increasing majority of educated persons preferring the orthography which is most in accordance with etymology and analogy.

Syn.
-- Infidel; unbeliever; doubter.
-- See Infidel.

SKETCH
Sketch, n. Etym: [D. schets, fr. It. schizzo a sketch, a splash (whence also F. esquisse; cf. Esquisse.); cf. It. schizzare to splash, to sketch.]

Defn: An outline or general delineation of anything; a first rough or incomplete draught or plan of any design; especially, in the fine arts, such a representation of an object or scene as serves the artist's purpose by recording its chief features; also, a preliminary study for an original work.

Syn.
-- Outline; delineation; draught; plan; design.
-- Sketch, Outline, Delineation. An outline gives only the bounding lines of some scene or picture. A sketch fills up the outline in part, giving broad touches, by which an imperfect idea may be conveyed. A delineation goes further, carrying out the more striking features of the picture, and going so much into detail as to furnish a clear conception of the whole. Figuratively, we may speak of the outlines of a plan, of a work, of a project, etc., which serve as a basis on which the subordinate parts are formed, or of sketches of countries, characters, manners, etc., which give us a general idea of the things described. Crabb.

SKETCH
Sketch, v. t. [imp. & p. p. Sketched; p. pr. & vb. n. Sketching.]

Etym: [Cf D. schetsen, It. schizzare. See Sketch, n.]

SKILL
Skill, n. Etym: [Icel. skil a distinction, discernment; akin to skilja to separate, divide, distinguish, Sw. skilja,. skille to separate, skiel reason, right, justice, Sw. skäl reason, Lith. skelli to cleave. Cf. Shell, Shoal, a multitude.]

1. Discrimination; judgment; propriety; reason; cause. [Obs.] Shak.
"As it was skill and right." Chaucer.
For great skill is, he prove that he wrought. Chaucer.
[For with good reason he should test what he created.]

2. Knowledge; understanding. [Obsoles.]
That by his fellowship he color mightskill of any wight. Spenser.
Nor want we skill or art. Milton.

3. The familiar knowledge of any art or science, united with readiness and dexterity in execution or performance, or in the application of the art or science to practical purposes; power to discern and execute; ability to perceive and perform; expertness; aptitude; as, the skill of a mathematician, physician, surgeon, mechanic, etc.

Syn.
-- Dexterity; adroitness; expertness; art; aptitude; ability.
-- Skill, Dexterity, Adroitness. Skill is more intelligent, denoting

familiar knowledge united to readiness of performance. Dexterity, when applied to the body, is more mechanical, and refers to habitual ease of execution. Adroitness involves the same image with dexterity, and differs from it as implaying a general facility of movement (especially in avoidance of danger or in escaping from a difficalty). The same distinctions apply to the figurative sense of the words. A man is skillful in any employment when he understands both its theory and its practice. He is dexterous when he maneuvers with great lightness. He is adroit in the use od quick, sudden, and well-directed movements of the body or the mind, so as to effect the object he has in view.

Defn: A substance which dissolves in water, thus forming a lather, and is used as a cleansing agent. Soap is produced by combining fats or oils with alkalies or alkaline earths, usually by boiling, and consists of salts of sodium, potassium, etc., with the fatty acids (oleic, stearic, palmitic, etc.). See the Note below, and cf. Saponification. By extension, any compound of similar composition or properties, whether used as a cleaning agent or not.

Note: In general, soaps are of two classes, hard and soft. Calcium, magnesium, lead, etc., form soaps, but they are insoluble and

useless.
The purifying action of soap depends upon the fact that it is decomposed by a large quantity of water into free alkali and an insoluble acid salt. The first of these takes away the fatty dirt on washing, and the latter forms the soap lather which envelops the greasy matter and thus tends to remove it. Roscoe & Schorlemmer.

Defn: Disposed to solicit; eager to obtain something desirable, or to avoid anything evil; concerned; anxious; careful. "Solicitous of my reputation." Dryden. "He was solicitous for his advice." Calerendon. Enjoy the present, whatsoever it be, and be not solicitous about the future. Jer. Taylor.
The colonel had been intent upon other things, and not enough solicitous to finish the fortifications. Clarendon.
-- So*lic"it*ous*ly, adv.
-- So*lic"it*ous*ness, n.

SOLICITRESS
So*lic"it*ress, n.

Defn: A woman who solicits.

SOLICITUDE
So*lic"i*tude, n. Etym: [F. sollicitude,r L. sollicitudo.]

Defn: The state of being solicitous; uneasiness of mind occasioned by fear of evil or desire good; anxiety.

The many cares and great labors of worldly men, their solicitude and outward shows. Sir W. Raleigh.
The mother looked at her with fond solicitude. G. W. Cable.

Syn.
-- Carefulness; concern; anxiety. See Care.

SOLID
Sol"id, a. Etym: [L. solidus, probably akin to sollus whole, entire, Gr. solide. Cf. Consolidate,Soda, Solder, Soldier, Solemn.]

1. Having the constituent parts so compact, or so firmly adhering, as to resist the impression or penetration of other bodies; having a fixed form; hard; firm; compact; -- opposed to fluid and liquid or to plastic, like clay, or to incompact, like sand.

2. Not hollow; full of matter; as, a solid globe or cone, as distinguished from a Ant: hollow one; not spongy; dense; hence, sometimes, heavy.

3. (Arith.)

Defn: Having all the geometrical dimensions; cubic; as, a solid foot contains 1,728 solid inches.

Note: In this sense, cubics now generally used.

4. Firm; compact; strong; stable; unyielding; as, a solid pier; a solid pile; a solid wall.

5. Applied to a compound word whose parts are closely united and form an unbroken word; -- opposed to hyphened.

6. Fig.: Worthy of credit, trust, or esteem; substantial, as opposed to frivolous or fallacious; weighty; firm; strong; valid; just; genuine.
The solid purpose of a sincere and virtuous answer. Milton.
These, wanting wit, affect gravity, and go by the name of solid men. Dryden.
The genius of the Italians wrought by solid toil what the myth-making imagination of the Germans had projected in a poem. J. A. Symonds.

7. Sound; not weakly; as, a solid constitution of body. I. Watts.

8. (Bot.)

Defn: Of a fleshy, uniform, undivided substance, as a bulb or root; not spongy or hollow within, as a stem.

9. (Metaph.)

Defn: Impenetrable; resisting or excluding any other material particle or atom from any given portion of space; -- applied to the supposed ultimate particles of matter.

10. (Print.)

Defn: Not having the lines separated by leads; not open.

11. United; without division; unanimous; as, the delegation is solid

for a candidate. [Polit. Cant. U.S.] Solid angle. (Geom.) See under Angle.
-- Solid color, an even color; one not shaded or variegated.
-- Solid green. See Emerald green (a), under Green.
-- Solid measure (Arith.), a measure for volumes, in which the units are each a cube of fixed linear magnitude, as a cubic foot, yard, or the like; thus, a foot, in solid measure, or a solid foot, contains 1,728 solid inches.
-- Solid newel (Arch.), a newel into which the ends of winding stairs are built, in distinction from a hollow newel. See under Hollow, a.
-- Solid problem (Geom.), a problem which can be construed geometrically, only by the intersection of a circle and a conic section or of two conic sections. Hutton.
-- Solid square (Mil.), a square body or troops in which the ranks and files are equal.

Syn.
-- Hard; firm; compact; strong; substantial; stable; sound; real; valid; true; just; weighty; profound; grave; important.
-- Solid, Hard. These words both relate to the internal constitution of bodies; but hardnotes a more impenetrable nature or a firmer adherence of the component parts than solid. Hard is opposed to soft, and solid to fluid, liquid, open, or hollow. Wood is usually solid; but some kinds of wood are hard, and others are soft.
Repose you there; while I [return] to this hard house, More harder than the stones whereof 't is raised. Shak.
I hear his thundering voice resound, And trampling feet than shake the solid ground. Dryden.

SOLID
Sol"id, n.

1. A substance that is held in a fixed form by cohesion among its particles; a substance not fluid.

2. (Geom.)

Defn: A magnitude which has length, breadth, and thickness; a part of space bounded on all sides. Solid of revolution. (Geom.) See Revolution, n., 5.

SOLIDAGO
Sol`i*da"go, n. Etym: [NL., fr. L. solidare to strengthen, unite; -- so called in allusion to its reputed healing qualities.] (Bot.)

Defn: A genus of yellow-flowered composite perennial herbs; golden-rod.

SOLIDARE
Sol"i*dare, n. Etym: [LL. solidus. Cf. Sou.]

Defn: A small piece of money. [Obs.] Shak.

SOLIDARITY
Sol`i*dar"i*ty, n. Etym: [F. solidarité, fr. solide. See Solid.]

Defn: An entire union or consolidation of interests and responsibilities; fellowship; community.
Solidarity [a word which we owe to the French Communists], signifies

a fellowship in gain and loss, in honor and dishonor, in victory and defeat, a being, so to speak, all in the same boat. Trench.
The solidarity . . . of Breton and Welsh poetry. M. Arnold.

SOLIDARY
Sol"i*da*ry, a.

Defn: Having community of interests and responsibilities.
Men are solidary, or copartners; and not isolated. M. Arnold.

SOLIDATE
Sol"i*date, v. t. Etym: [L. solidatus, p. p. of solidare. See Solder.]

Defn: To make solid or firm. [Obs.] Cowley.

SOLID-DRAWN
Sol"id-drawn`, a.

Defn: Drawn out from a heated solid bar, as by a process of spiral rolling which first hollows the bar and then expands the cavity by forcing the bar over a pointed mandrel fixed in front of the rolls; -- said of a weldless tube.

SOLIDIFIABLE
So*lid"i*fi`a*ble, a.

Defn: Capable of being solidified.

SOLIDIFICATION

So*lid`i*fi*ca"tion, n. Etym: [Cf. F. solidification.]

Defn: Act of solidifying, or state of being solidified.

SOLIDIFY
So*lid"i*fy, v. t. [imp. & p. p. Solidified; p. pr. & vb. n. Solidifying.] Etym: [Solid + -fy: cf. F. solidifier.]

Defn: To make solid or compact.
Every machine is a solidified mechanical theorem. H. Spencer.

SOLIDIFY
So*lid"i*fy, v. i.

Defn: To become solid; to harden.

SOLIDISM
Sol"id*ism, n. (Med.)

Defn: The doctrine that refers all diseases to morbid changes of the solid parts of the body. It rests on the view that the solids alone are endowed with vital properties, and can receive the impression of agents tending to produce disease.

SOLIDIST
Sol"id*ist, n. (Med.)

Defn: An advocate of, or believer in, solidism. Dunglison.

SOLIDITY

So*lid"i*ty, n. Etym: [L. soliditas: cf. F. solidité.]

1. The state or quality of being solid; density; consistency, -- opposed to fluidity; compactness; fullness of matter, -- opposed to openness or hollowness; strength; soundness, -- opposed to weakness or instability; the primary quality or affection of matter by which its particles exclude or resist all others; hardness; massiveness. That which hinders the approach of two bodies when they are moving one toward another, I call solidity. Locke.

2. Moral firmness; soundness; strength; validity; truth; certainty; -- as opposed to weakness or fallaciousness; as, the solidity of arguments or reasoning; the solidity of principles, triuths, or opinions.

3. (Geom.)

Defn: The solid contents of a body; volume; amount of inclosed space.

Syn.
 -- Firmness; solidness; hardness; density; compactness; strength; soundness; validity; certainty.

SOLIDLY
Sol"id*ly, adv.

Defn: In a solid manner; densely; compactly; firmly; truly.

SOLIDNESS
Sol"id*ness, n.

1. State or quality of being solid; firmness; compactness; solidity, as of material bodies.

2. Soundness; strength; truth; validity, as of arguments, reasons, principles, and the like.

SOLIDUNGULA
Sol`id*un"gu*la, n. pl. Etym: [NL., from L. solidus solid + ungula a hoof.] (Zoöl.)

Defn: A tribe of ungulates which includes the horse, ass, and related species, constituting the family Equidæ.

SOLIDUNGULAR
Sol`id*un"gu*lar, a. (Zoöl.)

Defn: Solipedous.

SOLIDUNGULATE
Sol`id*un"gu*late, n. Etym: [Solid + ungulate.] (Zool.)

Defn: Same as Soliped.

SOLIDUNGULOUS
Sol`id*un"gu*lous, a. (Zoöl.)

Defn: Solipedous.

SOLIFIDIAN

Sol`i*fid"i*an, n. Etym: [L. solus alone + fides faith.] (Eccl.)

Defn: One who maintains that faith alone, without works, is sufficient for justification; -- opposed to nullifidian. Hammond.

SOLIFIDIAN
Sol`i*fid"i*an, a.

Defn: Holding the tenets of Solifidians; of or pertaining to the solifidians.

SOLIFIDIANISM
Sol`i*fid"i*an*ism, n.

Defn: The state of Solifidians.

SOLIFORM
Sol"i*form, a. Etym: [L. sol sun + -form.]

Defn: Like the sun in form, appearance, or nature; resembling the sun. [R.] "Soliform things." Cudworth.

SOLIFUGAE
So*lif"u*gæ, n. pl. Etym: [NL., from L. solifuga (better solipuga), a kind of venomous ant, or spider.] (Zoöl.)

Defn: A division of arachnids having large, powerful fangs and a segmented abdomen; -- called also Solpugidea, and Solpugides.

SOLILOQUIZE

So*lil"o*quize, v. i. [imp. & p. p. Soliloquized; p. pr. & vb. n. Soliloquizing.]

Defn: To utter a soliloquy; to talk to one's self.

SOLILOQUY
So*lil"o*quy, n.; pl. Soliloquies. Etym: [L. soliloquium; solus alone + loqui to speak. See Sole ly, and Loquacious.]

1. The act of talking to one's self; a discourse made by one in solitude to one's self; monologue.
Lovers are always allowed the comfort of soliloquy. Spectator.

2. A written composition, reciting what it is supposed a person says to himself.
The whole poem is a soliloquy. Prior.

SOLIPED
Sol"i*ped, n. Etym: [Cf. F. solipède, It. solipede, Sp. solipedo; apparently fr. L. solus alone + pes, pedis, a foot; but probably fr. L. solidipes solid-footed, whole-hoofed. See Solid, and Pedal.] (Zoöl.)

Defn: A mammal having a single hoof on each foot, as the horses and asses; a solidungulate. [Written also solipede.]
The solipeds, or firm-hoofed animals, as horses, asses, and mules, etc., -- they are, also, in mighty number. Sir T. Browne.

SOLIPEDOUS
So*lip"e*dous, a.

Defn: Having single hoofs.

SOLIPSISM
So*lip"sism, n. Etym: [L. solus alone + ipse self.]

1. (Ethics)

Defn: Egotism. Krauth-Fleming.

2. (Metaph.)

Defn: Egoism. Krauth-Fleming.

SOLISEQUIOUS
Sol`i*se"qui*ous, a. Etym: [L. sol sun + sequi to follow.]

Defn: Following the course of the sun; as, solisequious plants. [R.]
Sir T. Browne.

SOLITAIRE
Sol`i*taire", n. Etym: [F. See Solitary.]

1. A person who lives in solitude; a recluse; a hermit. Pope.

2. A single diamond in a setting; also, sometimes, a precious stone of any kind set alone.
Diamond solitaires blazing on his breast and wrists. Mrs. R. H. Davis.

3. A game which one person can play alone; -- applied to many games of cards, etc.; also, to a game played on a board with pegs or balls, in which the object is, beginning with all the places filled except one, to remove all but one of the pieces by "jumping," as in draughts.

4. (Zoöl.)
(a) A large extinct bird (Pezophaps solitaria) which formerly inhabited the islands of Mauritius and Rodrigeuz. It was larger and taller than the wild turkey. Its wings were too small for flight. Called also solitary.
(b) Any species of American thrushlike birds of the genus Myadestes. They are noted their sweet songs and retiring habits. Called also fly-catching thrush. A West Indian species (Myadestes sibilans) is called the invisible bird.

SOLITARIAN
Sol`i*ta"ri*an, n. Etym: [See Solitary.]

Defn: A hermit; a solitary. [Obs.] Sir R. Twisden.

SOLITARIETY
Sol`i*ta*ri"e*ty, n.

Defn: The state of being solitary; solitariness. [Obs.] Cudworth.

SOLITARILY
Sol"i*ta*ri*ly, adv.

Defn: In a solitary manner; in solitude; alone. Mic. vii. 14.

SOLITARINESS
Sol"i*ta*ri*ness, n.

Defn: Condition of being solitary.

SOLITARY
Sol"i*ta*ry, a. Etym: [L. solitarius, fr. solus alone: cf. F. solitaire. See Sole, a., and cf. Solitaire.]

1. Living or being by one's self; having no companion present; being without associates; single; alone; lonely.
Those rare and solitary, these in flocks. Milton.
Hie home unto my chamber, Where thou shalt find me, sad and solitary. Shak.

2. Performed, passed, or endured alone; as, a solitary journey; a solitary life.
Satan . . . explores his solitary flight. Milton.

3. ot much visited or frequented remote from society; retired; lonely; as, a solitary residence or place.

4. Not inhabited or occupied; without signs of inhabitants or occupation; desolate; deserted; silent; still; hence, gloomy; dismal; as, the solitary desert.
How doth the city sit solitary, that was full of people. Lam. i. 1.
Let that night be solitary; let no joyful voice come therein. Job iii. 7.

5. Single; individual; sole; as, a solitary instance of vengeance; a solitary example.

6. (Bot.)

Defn: Not associated with others of the same kind. Solitary ant (Zoöl.), any solitary hymenopterous insect of the family Mutillidæ. The female of these insects is destitute of wings and has a powerful sting. The male is winged and resembles a wasp. Called also spider ant.
-- Solitary bee (Zoöl.), any species of bee which does not form communities.
-- Solitary sandpiper (Zoöl.), an American tattler (Totanus solitarius).
-- Solitary snipe (Zoöl.), the great snipe. [Prov. Eng.] -- Solitary thrush (Zoöl.) the starling. [Prov. Eng.]

SOLITARY
Sol"i*ta*ry, n.

Defn: One who lives alone, or in solitude; an anchoret; a hermit; a recluse.

SOLITUDE
Sol"i*tude, n. Etym: [F., from L. solitudo, solus alone. See Sole, a.]

1. state of being alone, or withdrawn from society; a lonely life; loneliness.
Whosoever is delighted with solitude is either a wild beast or a god.

Bacon.
O Solitude! where are the charms That sages have seen in thy face
Cowper.

2. Remoteness from society; destitution of company; seclusion; --
said of places; as, the solitude of a wood.
The solitude of his little parish is become matter of great comfort
to him. Law.

3. solitary or lonely place; a desert or wilderness.
In these deep solitudes and awful cells Where heavenly pensive
contemplation dwells. Pope.

Syn. Loneliness; soitariness; loneness; retiredness; recluseness.
-- Solitude, Retirement, Seclusion, Loneliness. Retirement is a
withdrawal from general society, implying that a person has been
engaged in its scenes. Solitude describes the fact that a person is
alone; seclusion, that he is shut out from others, usually by his own
choice; loneliness, that he feels the pain and oppression of being
alone. Hence, retirement is opposed to a gay, active, or public life;
solitude, to society; seclusion, to freedom of access on the part of
others; and loneliness, enjoyment of that society which the heart
demands.
O blest retirement, friend to life's decline. Goldsmith.
Such only can enjoy the country who are capable of thinking when they
are there; then they are prepared for solitude; and in that [the
country] solitude is prepared for them. Dryden.
It is a place of seclusion from the external world. Bp. Horsley.
These evils . . . seem likely to reduce it [a city] ere long to the
loneliness and the insignificance of a village. Eustace.

SOLIVAGANT
So*liv"a*gant, a. Etym: [L. solus alone + vagans wandering.]

Defn: Wandering alone. [R.] T. Grander.

SOLIVAGOUS
So*liv"a*gous, a. Etym: [L. solivagus.]

Defn: Solivagant.

SOLLAR
Sol"lar, n.

1. See Solar, n. [Obs.]

2. (Mining)

Defn: A platform in a shaft, especially one of those between the series of ladders in a shaft.

SOLLAR
Sol"lar, v. t.

Defn: To cover, or provide with, a sollar.

SOLLEIN
Sol"lein, a.

Defn: Sullen; sad. [Obs.] Spenser.

SOLLERET
Sol*ler*et", n. Etym: [F. soleretim. fr. OF. soler shoe.]

Defn: A flexible steel shoe (or one of the plates forming such a shoe), worn with mediæval armor.

SOLMIZATION
Sol`mi*za"tion, n. Etym: [F. solmisation, fr. solmiser to sol-fa; -- called from the musical notes sol, mi. See Sol-fa.] (Mus.)

Defn: The act of sol-faing. [Written also solmisation.]

Note: This art was practiced by the Greeks; but six of the seven syllables now in use are generally attributed to Guido d' Arezzo, an Italian monk of the eleventh century, who is said to have taken them from the first syllables of the first six lines of the following stanza of a monkish hymn to St. John the Baptist. --
Ut queant laxis Resonare fibris Mira gestorum Famuli tuorum Solve polluti Labii reatum, Sancte Joannes. Professor Skeat says the name of the seventh note, si, was also formed by him [Guido] from the initials of the two words of the last line; but this is disputed, Littré attributing the first use of it to Anselm of Flanders long afterwards. The syllable do is often substituted for ut.

SOLO
So"lo, n.; pl. E. Solos, It. Soli. Etym: [It., from L. solus alone. See Sole, a.] (Mus.)

Defn: A tune, air, strain, or a whole piece, played by a single

person on an instrument, or sung by a single voice.

SOLOIST
So"lo*ist, n. (Mus.)

Defn: One who sings or plays a solo.

SOLOMON
Sol"o*mon, n.

Defn: One of the kings of Israel, noted for his superior wisdom and magnificent reign; hence, a very wise man.
-- Sol`o*mon"ic, a. Solomon's seal (Bot.), a perennial liliaceous plant of the genus Polygonatum, having simple erect or curving stems rising from thick and knotted rootstocks, and with white or greenish nodding flowers. The commonest European species is Polygonatum multiflorum. P. biflorum and P. giganteum are common in the Eastern United States. See Illust. of Rootstock. False Solomon's seal (Bot.), any plant of the liliaceous genus Smilacina having small whitish flowers in terminal racemes or panicles.

SOLOMON'S SEAL
Sol"o*mon's seal.

Defn: A mystic symbol consisting of two interlaced triangles forming a star with six points, often with one triangle dark and one light, symbolic of the union of soul and body.

SOLON
So"lon, n.

Defn: A celebrated Athenian lawmaker, born about 638 b. c.; hence, a legislator; a publicist; -- often used ironically.

SOLO WHIST
Solo whist.

Defn: A card game played with the full pack ranking as at whist, each player declaring for which of seven different points he proposes to play.

SOLPUGID
Sol*pu"gid, a. (Zoöl.)

Defn: Of or pertaining to the Solifugæ.
-- n.

Defn: One of the Solifugæ.

SOLPUGIDEA
Sol`pu*gid"e*a, n. pl. Etym: [NL. See Solifugæ.] (Zoöl.)

Defn: Same as Solifugæ.

SOLSTICE
Sol"stice, n.Etym: [L. solstitium; sol the sun + sistere to cause to stand, akin to stare to stand: cf. F. solstice. See Solar, a., Stand, v. i.]

1. A stopping or standing still of the sun. [Obs.] Sir T. Browne.

2. (Astron.)
(a) The point in the ecliptic at which the sun is farthest from the equator, north or south, namely, the first point of the sign Cancer and the first point of the sign Capricorn, the former being the summer solstice, latter the winter solstice, in northern latitudes; -- so called because the sun then apparently stands still in its northward or southward motion.
(b) The time of the sun's passing the solstices, or solstitial points, namely, about June 21 and December 21. See Illust. in Appendix.

SOLSTITIAL
Sol*sti"tial, a. Etym: [L. solstitialis: cf. F. solsticial.]

1. Of or pertaining to a solstice.

2. Happening at a solstice; esp. (with reference to the northern hemisphere), happening at the summer solstice, or midsummer. "Solstitial summer's heat." Milton.

SOLUBILITY
Sol`u*bil"i*ty, n. Etym: [Cf. F. solubilité.]

1. The quality, condition, or degree of being soluble or solvable; as, the solubility of a salt; the solubility of a problem or intricate difficulty.

2. (Bot.)

Defn: The tendency to separate readily into parts by spurious articulations, as the pods of tick trefoil.

SOLUBLE
Sol"u*ble, a. Etym: [L. solubilis, fr. solvere, solutum, to loosen, to dissolve: cf. F. soluble. See Solve, and cf. Solvable.]

1. Susceptible of being dissolved in a fluid; capable of solution; as, some substances are soluble in alcohol which are not soluble in water.
Sugar is . . . soluble in water and fusible in fire. Arbuthnot.

2. Susceptible of being solved; as, a soluble algebraic problem; susceptible of being disentangled, unraveled, or explained; as, the mystery is perhaps soluble. "More soluble is this knot." Tennyson.

3. Relaxed; open or readily opened. [R.] "The bowels must be kept soluble." Dunglison. Soluble glass. (Chem.) See under Glass.

SOLUBLENESS
Sol"u*ble*ness, n.

Defn: Quality or state of being soluble.

SOLUS; SOLA
So"lus, masc. a., So"la, fem. a. Etym: [L.]

Defn: Alone; -- chiefly used in stage directions, and the like.

SOLUTE

So*lute", a. Etym: [L. solutus, p.p. of solvere to loosen. See Solve.]

1. Loose; free; liberal; as, a solute interpretation. [Obs.] Bacon.

2. Relaxed; hence; merry; cheerful. [R.]
A brow solute, and ever-laughing eye. Young.

3. Soluble; as, a solute salt. [Obs.]

4. (Bot.)

Defn: Not adhering; loose; -- opposed to adnate; as, a solute stipule.

SOLUTE
So*lute", v. t.

1. To dissolve; to resolve. [Obs.]

2. To absolve; as, to solute sin. [Obs.] Bale.

SOLUTION
So*lu"tion, n. Etym: [OE. solucion, OF. solucion, F. solution, fr. L. solutio, fr. solvere, solutum, to loosen, dissolve. See Solve.]

1. The act of separating the parts of any body, or the condition of undergoing a separation of parts; disruption; breach.
In all bodies there is an appetite of union and evitation of solution of continuity. Bacon.

2. The act of solving, or the state of being solved; the disentanglement of any intricate problem or difficult question; explanation; clearing up; -- used especially in mathematics, either of the process of solving an equation or problem, or the result of the process.

3. The state of being dissolved or disintegrated; resolution; disintegration.
It is unquestionably an enterprise of more promise to assail the nations in their hour of faintness and solution, than at a time when magnificent and seductive systems of worship were at their height of energy and splendor. I. Taylor.

4. (Chem.Phys.)

Defn: The act or process by which a body (whether solid, liquid, or gaseous) is absorbed into a liquid, and, remaining or becoming fluid, is diffused throughout the solvent; also, the product reulting from such absorption.

Note: When a solvent will not take in any more of a substance the solution is said to be saturated. Solution is two kinds; viz.: (a) Mechanical solution, in which no marked chemical change takes place, and in which, in the case of solids, teh dissolved body can be regained by evaporation, as in the solution of salt or sugar in water. (b) Chemical solution, in which there is involved a decided chemical change, as when limestone or zinc undergoes solution in hydrochloric acid. Mechanical solution is regarded as a form of molecular or atomic attraction, and is probably occasioned by the

formation of certain very weak and unstable compounds which are easily dissociated and pass into new and similar compounds.

Note: This word is not used in chemistry or mineralogy for fusion, or the melting of bodies by the heat of fire.

5. release; deliverance; disharge. [Obs.] Barrow.

6. (Med.)
(a) The termination of a disease; resolution.
(b) A crisis.
(c) A liquid medicine or preparation (usually aqueous) in which the solid ingredients are wholly soluble. U. S. Disp. Fehling's solution (Chem.), a standardized solution of cupric hydrate in sodium potassium tartrate, used as a means of determining the reducing power of certain sugars and sirups by the amount of red cuprous oxide thrown down.
-- Heavy solution (Min.), a liquid of high density, as a solution of mercuric iodide in potassium iodide (called the Sonstadt or Thoulet solution) having a maximum specific gravity of 3.2, or of borotungstate of cadium (Klein solution, specific gravity 3.6), and the like. Such solutions are much used in determining the specific gravities of minerals, and in separating them when mechanically mixed as in a pulverized rock.
-- Nessler's solution. See Nesslerize.
-- Solution of continuity, the separation of connection, or of connected substances or parts; -- applied, in surgery, to a facture, laceration, or the like. "As in the natural body a wound, or solution of continuity, is worse than a corrupt humor, so in the spiritual." Bacon.

-- Standardized solution (Chem.), a solution which is used as a reagent, and is of a known and standard strength; specifically, a normal solution, containing in each cubic centimeter as many milligrams of the element in question as the number representing its atomic weight; thus, a normal solution of silver nitrate would contain 107.7 mgr. of silver nitrate in each cubic centimeter.

SOLUTIVE
Sol"u*tive, a. Etym: [Cf. F. solutif.]

Defn: Tending to dissolve; loosening; laxative. Bacon.

SOLVABILITY
Solv`a*bil"i*ty, n. Etym: [F. solvabilité.]

1. The quality or state of being solvable; as, the solvability of a difficulty; the solvability of a problem.

2. The condition of being solvent; ability to pay all just debts; solvency; as, the solvability of a merchant.

SOLVABLE
Solv"a*ble, a. Etym: [F. solvable. See Solve, and cf. Soluble, Solvible.]

1. Susceptible of being solved, resolved, or explained; admitting of solution.

2. Capable of being paid and discharged; as, solvable obligations. Tooke.

3. Able to pay one's debts; solvent. [Obs.] Fuller.

SOLVABLENESS
Solv"a*ble*ness, n.

Defn: Quality of being solvable.

SOLVE

1. Something preternaturally visible; an apparition; a ghost; a phantom.
The ghosts of traitors from the bridge descend, With bold fanatic specters to rejoice. Dryden.

2. (Zoöl.)
(a) The tarsius.
(b) A stick insect. Specter bat (Zoöl.), any phyllostome bat.
-- Specter candle (Zoöl.), a belemnite.
-- Specter shrimp (Zoöl.), a skeleton shrimp. See under Skeleton.

SPECTIONEER
Spec`tion*eer", n.

Defn: Same as Specsioneer.

SPECTRAL
Spec"tral, a.

1. Of or pertaining to a specter; ghosty.
He that feels timid at the spectral form of evil is not the man to spread light. F. W. Robertson.

2. (Opt.)

Defn: Of or pertaining to the spectrum; made by the spectrum; as, spectral colors; spectral analysis. Spectral lemur. (Zoöl.) See Tarsius.

SPECTRALLY
Spec"tral*ly, adv.

Defn: In the form or manner of a specter.

SPECTRE
Spec"tre, n.

Defn: See Specter.

SPECTROBOLOMETER

Spec`tro*bo*lom"e*ter, n. (Physics)

Defn: A combination of spectroscope and bolometer for determining the distribution of energy in a spectrum. --Spec`tro*bo`lo*met"ric (#), a.

SPECTROELECTRIC
Spec`tro*e*lec"tric, a.

Defn: Pert. to or designating any form of spark tube the electric discharge within which is used in spectroscopic observations.

SPECTROGRAM
Spec"tro*gram, n. [Spectrum + -gram.] (Physics)

Defn: A photograph, map, or diagram of a spectrum.

SPECTROGRAPH
Spec"tro*graph, n. [Spectrum + graph.] (Physics)
(a) An apparatus for photographing or mapping a spectrum.
(b) A photograph or picture of a spectrum. -- Spec`tro*graph"ic (#), a. --Spec`tro*graph"ic*al*ly (#), adv. --Spec*trog"ra*phy (#), n.

SPECTROHELIOGRAM
Spec`tro*he"li*o*gram`, n. [Spectrum + heloi- + -gram.] (Astrophysics)

Defn: A photograph of the sun made by monochromatic light, usually of the calcium line (k), and showing the sun's faculæ and prominences.

SPECTROHELIOGRAPH
Spec`tro*he"li*o*graph, n. (Astrophysics)

Defn: An apparatus for making spectroheliograms, consisting of a spectroscopic camera used in combination with a telescope, and provided with clockwork for moving the sun's image across the slit.
-- Spec`tro*he`li*o*graph"ic (#), a.

SPECTROLOGICAL
Spec`tro*log"ic*al, a.

Defn: Of or pertaining to spectrology; as, spectrological studies or experiments.
-- Spec`tro*log"ic*al*ly, adv.

SPECTROLOGY
Spec*trol"o*gy, n. Etym: [Spectrum + -logy.] (Chem.Phys.)

Defn: The science of spectrum analysis in any or all of its relations and applications.

SPECTROMETER
Spec*trom"e*ter, n. Etym: [Spectrum + -meter.] (Physics)

Defn: A spectroscope fitted for measurements of the luminious spectra observed with it.

SPECTROMETRY
Spec*trom"e*try, n. (Physics)

Defn: Art or process of using the spectrometer, or of measuring wave lengths of rays of a spectrum. -- Spec`tro*met"ric (#), a.

SPECTROPHONE
Spec"tro*phone, n. [Spectrum + Gr. sound.]

Defn: An instrument constructed on the principle of the photophone and used in spectrum analysis as an adjunct to the spectroscope. -- Spec`tro*phon"ic (#), a.

SPECTROPHOTOMETER
Spec`tro*pho*tom"e*ter, n. Etym: [Spectrum + photometer.] (Opt.)

Defn: An instrument for measuring or comparing the intensites of the colors of the spectrum.

SPECTROPHOTOMETRY
Spec`tro*pho*tom"e*try, n.

Defn: The art of comparing, photometrically, the brightness of two spectra, wave length by wave length; the use of the spectrophotometer. --Spec`tro*pho`to*met"ric (#), a.

SPECTROSCOPE
Spec"tro*scope, n. Etym: [Spectrum + -scope.] (Physics)

Defn: An optical instrument for forming and examining spectra (as that of solar light, or those produced by flames in which different substances are volatilized), so as to determine, from the position of the spectral lines, the composition of the substance.

SPECTROSCOPIC; SPECTROSCOPICAL
Spec`tro*scop"ic, Spec`tro*scop"ic*al, a.

Defn: Of or pertaining to a spectroscope, or spectroscopy.
-- Spec`tro*scop"ic*al*ly, adv.

SPECTROSCOPIST
Spec*tros"co*pist (or), n.

Defn: One who investigates by means of a spectroscope; one skilled in the use of the spectroscope.

SPECTROSCOPY
Spec*tros"co*py, n.

Defn: The use of the spectroscope; investigations made with the spectroscope.

SPECTRUM
Spec"trum, n.; pl. Spectra. Etym: [L. See Specter.]

1. An apparition; a specter. [Obs.]

2. (Opt.)
(a) The several colored and other rays of which light is composed, separated by the refraction of a prism or other means, and observed or studied either as spread out on a screen, by direct vision, by photography, or otherwise. See Illust. of Light, and Spectroscope.
(b) A luminous appearance, or an image seen after the eye has been

exposed to an intense light or a strongly illuminated object. When the object is colored, the image appears of the complementary color, as a green image seen after viewing a red wafer lying on white paper. Called also ocular spectrum. Absorption spectrum, the spectrum of light which has passed through a medium capable of absorbing a portion of the rays. It is characterized by dark spaces, bands, or lines.
-- Chemical spectrum, a spectrum of rays considered solely with reference to their chemical effects, as in photography. These, in the usual photogrophic methods, have their maximum influence at and beyond the violet rays, but are not limited to this region.
-- Chromatic spectrum, the visible colored rays of the solar spectrum, exhibiting the seven principal colors in their order, and covering the central and larger portion of the space of the whole spectrum.
-- Continous spectrum, a spectrum not broken by bands or lines, but having the colors shaded into each other continously, as that from an incandescent solid or liquid, or a gas under high pressure.
-- Diffraction spectrum, a spectrum produced by diffraction, as by a grating.
-- Gaseous spectrum, the spectrum of an incandesoent gas or vapor, under moderate, or especially under very low, pressure. It is characterized by bright bands or lines.
-- Normal spectrum, a representation of a spectrum arranged upon conventional plan adopted as standard, especially a spectrum in which the colors are spaced proportionally to their wave lengths, as when formed by a diffraction grating.
-- Ocular spectrum. See Spectrum, 2 (b), above.
-- Prismatic spectrum, a spectrum produced by means of a prism.
-- Solar spectrum, the spectrum of solar light, especially as thrown

upon a screen in a darkened room. It is characterized by numerous dark lines called Fraunhofer lines.
-- Spectrum analysis, chemical analysis effected by comparison of the different relative positions and qualities of the fixed lines of spectra produced by flames in which different substances are burned or evaporated, each substance having its own characteristic system of lines.
-- Thermal spectrum, a spectrum of rays considered solely with reference to their heating effect, especially of those rays which produce no luminous phenomena.

SPECULAR
Spec"u*lar, a. Etym: [L. specularis (cf., from the same root, specula a lookout, watchtower): cf. F. spéculaire. See Speculum.]

1. Having the qualities of a speculum, or mirror; having a smooth, reflecting surface; as, a specular metal; a specular surface.

2. (Med.)

Defn: Of or pertaining to a speculum; conducted with the aid of a speculum; as, a specular examination.

3. Assisting sight, as a lens or the like. [Obs.]
Thy specular orb Apply to well-dissected kernels; lo! In each observe the slender threads Of first-beginning trees. J. Philips.

land, etc., with the expectation of deriving profit from fluctuations
in price.

SPECULATORIAL
Spec`u*la*to"ri*al, a.

Defn: Speculatory; speculative. [Obs.]

SPECULATORY
Spec"u*la*to*ry, a. Etym: [L. speculatorius belonging to spies or scouts.]

1. Intended or adapted for viewing or espying; having oversight. T. Warton.

2. Exercising speculation; speculative. T. Carew.

SPECULIST
Spec"u*list, n.

Defn: One who observes or considers; an observer. [R.] Goldsmith.

SPECULUM
Spec"u*lum, n.; pl. L. Specula, E. Speculum. Etym: [L., fr. specere to look, behold. See Spy.]

1. A mirror, or looking-glass; especially, a metal mirror, as in Greek and Roman archæology.

2. A reflector of polished metal, especially one used in reflecting telescopes. See Speculum metal, below.

3. (Surg.)

Defn: An instrument for dilating certain passages of the body, and throwing light within them, thus facilitating examination or surgical operations.

4. (Zoöl.)

Defn: A bright and lustrous patch of color found on the wings of ducks and some other birds. It is usually situated on the distal portions of the secondary quills, and is much more brilliant in the adult male than in the female. Speculum metal, a hard, brittle alloy used for making the reflectors of telescopes and other instruments, usually consisting of copper and tin in various proportions, one of the best being that in which there are 126.4 parts of copper to 58.9 parts of tin, with sometimes a small proportion of arsenic, antimony, or zinc added to improve the whiteness.

SPED
Sped,

Defn: imp. & p. p. of Speed.

SPEECE
Speece, n.

Defn: Species; sort. [Obs.]

SPEECH
Speech, n. Etym: [OE. speche, AS. sp, spr, fr. specan, sprecan, to speak; akin to D. spraak speech, OHG. sprahha, G. sprache, Sw. spr, Dan. sprog. See Speak.]

1. The faculty of uttering articulate sounds or words; the faculty of expressing thoughts by words or articulate sounds; the power of

SPEED
Speed, n. Etym: [AS. sp success, swiftness, from sp to succeed; akin to D. spoedd, OHG. spuot success, spuot to succees, Skr. spha to increase, grow fat. sq. root170b.]

1. Prosperity in an undertaking; favorable issue; success. "For common speed." Chaucer.
O Lord God of my master Abraham, I pray thee, send me good speed this day. Gen. xxiv. 12.

2. The act or state of moving swiftly; swiftness; velocity; rapidly; rate of motion; dispatch; as, the speed a horse or a vessel.
Speed, to describe whose swiftness number fails. Milton.

Note: In kinematics, speedis sometimes used to denote the amount of velocity without regard to direction of motion, while velocity is not regarded as known unless both the direction and the amount are known.

3. One who, or that which, causes or promotes speed or success. [Obs.] "Hercules be thy speed!" Shak. God speed, Good speed; prosperity. See Godspeed.
-- Speed gauge, Speed indicator, and Speed recorder (Mach.), devices for indicating or recording the rate of a body's motion, as the number of revolutions of a shaft in a given time.
-- Speed lathe (Mach.), a power lathe with a rapidly revolving spindle, for turning small objects, for polishing, etc.; a hand lathe.
-- Speed pulley, a cone pulley with steps.

Syn.
-- Haste; swiftness; celerity; quickness; dispatch; expedition; hurry; acceleration. See Haste.

SPEED
Speed, v. i. [imp. & p. p. Sped, Speeded; p. pr. & vb. n. Speeding.]
Etym: [AS. sp, fr. sp, n.; akin to D. spoeden, G. sich sputen. See Speed, n.]

1. To go; to fare. [Obs.]
To warn him now he is too farre sped. Remedy of Love.

2. To experience in going; to have any condition, good or ill; to fare. Shak.

Defn: Affected with gangrene; mortified.

SPHACELATION
Sphac`e*la"tion, n. (Med.)

Defn: The process of becoming or making gangrenous; mortification.

SPHACELUS
Sphac"e*lus, n. Etym: [NL., fr. Gr. (Med.)

Defn: Gangrenous part; gangrene; slough.

SPHAERENCHYMA
Sphæ*ren"chy*ma, n. Etym: [NL., fr. Gr. -enchyma as in parenchima.] (Bot.)

Defn: Vegetable tissue composed of thin-walled rounded cells, -- a modification of parenchyma.

SPHAERIDIUM
Sphæ*rid"i*um, n.; pl. Sphæridia. Etym: [NL., fr. Gr. (Zoöl.)

Defn: A peculiar sense organ found upon the exterior of most kinds of sea urchins, and consisting of an oval or sherical head surmounting a short pedicel. It is generally supposed to be an olfactory organ.

SPHAEROSPORE

Sphæ"ro*spore, n. Etym: [Gr. spore.] (Bot.)

Defn: One of the nonsexual spores found in red algæ; a tetraspore.

SPHAERULITE
Sphær"u*lite, n. (Min.)

Defn: Same as Spherulite.

SPHAGNICOLOUS
Sphag*nic"o*lous, a. Etym: [Sphagnum + L. colere to inhabit.] (Bot.)

Defn: Growing in moss of the genus Sphagnum.

SPHAGNOUS
Sphag"nous, a. (Bot.)

Defn: Pertaining to moss of the genus Sphagnum, or bog moss; abounding in peat or bog moss.

SPHAGNUM
Sphag"num, n. Etym: [NL., fr/ Gr. (Bot.)

Defn: A genus of mosses having white leaves slightly tinged with red or green and found growing in marshy places; bog moss; peat moss.

SPHALERITE
Sphal"er*ite, n. Etym: [Gr. Blende.] (Min.)

Defn: Zinc sulphide; -- called also blende, black-jack, false galena,

etc. See Blende (a).

SPHENE
Sphene, n. Etym: [F. sphène, fr. Gr. (Min.)

Defn: A mineral found usually in thin, wedge-shaped crystals of a yellow or green to black color. It is a silicate of titanium and calcium; titanite.

SPHENETHMOID
Sphe*neth"moid, a. Etym: [Sphenoid + ethmoid.] (Anat.)

Defn: Of or pertaining to both the sphenoidal and the ethmoidal regions of the skull, or the sphenethmoid bone; sphenethmoidal. Sphenethmoid bone (Anat.), a bone of the skull which surrounds the anterior end of the brain in many amphibia; the girdle bone.

SPHENETHMOID
Sphe*neth"moid, n. (Anat.)

Defn: The sphenethmoid bone.

SPHENETHMOIDAL
Sphe`neth*moid"al, a. (Anat.)

Defn: Relating to the sphenoethmoid bone; sphenoethmoid.

SPHENISCAN
Sphe*nis"can, n. (Zoöl.)

Defn: Any species of penguin.

SPHENO-
Sphe"no-.

Defn: A combining form used in anatomy to indicate connection with, or relation to, the sphenoid bone; as in sphenomaxillary, sphenopalatine.

SPHENODON
Sphe"no*don, n. Etym: [Gr. (Zoöl.)

Defn: Same as Hatteria.

SPHENOETHMOIDAL
Sphe"no*eth*moid`al, a. (Anat.)

Defn: Sphenethmoid.

SPHENOGRAM
Sphe"no*gram, n. Etym: [Gr. -gram.]

Defn: A cuneiform, or arrow-headed, character.

SPHENOGRAPHER
Sphe*nog"ra*pher, n.

Defn: One skilled in sphenography; a sphenographist.

SPHENOGRAPHIC

Sphe`no*graph"ic, a.

Defn: Of or pertaining to sphenography.

SPHENOGRAPHIST
Sphe*nog"ra*phist, n.

Defn: A sphenographer.

SPHENOGRAPHY
Sphe*nog"ra*phy, n. Etym: [Gr. -graphy.]

Defn: The art of writing in cuneiform characters, or of deciphering inscriptions made in such characters.

SPHENOID
Sphe"noid, a. Etym: [Gr. sphénoïde.]

1. Wedge-shaped; as, a sphenoid crystal.

2. (Anat.)

Defn: Of or pertaining to the sphenoid bone. Sphenoid bone (Anat.), an irregularly shaped bone in front of the occipital in the base of the skull of the higher vertebrates. It is composed of several fetal bones which become united the adult. See Alisphenoid, Basisphenoid, Orbitosphenoid, Presphenoid.

SPHENOID
Sphe"noid, n.

1. (Crystallog.)

Defn: A wedge-shaped crystal bounded by four equal isosceles triangles. It is the hemihedral form of a square pyramid.

2. (Anat.)

Defn: The sphenoid bone.

SPHENOIDAL
Sphe*noid"al, a.

1. Sphenoid.

2. (Crystalloq.)

Defn: Pertaining to, or resembling, a sphenoid.

SPHENOTIC
Sphe*not"ic, a. Etym: [Spheno- + (Anat.)

Defn: Of, pertaining to, or designating, the sphenotic bone. Sphenotic bone (Anat.), a bone on the anterior side of the auditory capsule of many fishes, and connected with, or adjoining, the sphenoid bone.

SPHENOTIC
Sphe*not"ic, n. (Anat.)

Defn: The sphenotic bone.

SPHERAL
Spher"al, a.

1. Of or pertaining to a sphere or the spheres.

2. Rounded like a sphere; sphere-shaped; hence, symmetrical; complete; perfect.

SPHERE
Sphere, n. Etym: [OE. spere, OF. espere, F. sphère, L. sphaera,. Gr.

1. (Geom.)

Defn: A body or space contained under a single surface, which in every part is equally distant from a point within called its center.

2. Hence, any globe or globular body, especially a celestial one, as the sun, a planet, or the earth.
Of celestial bodies, first the sun, A mighty sphere, he framed.
Milton.

3. (Astron.)
(a) The apparent surface of the heavens, which is assumed to be spherical and everywhere equally distant, in which the heavenly bodies appear to have their places, and on which the various astronomical circles, as of right ascension and declination, the equator, ecliptic, etc., are conceived to be drawn; an ideal geometrical sphere, with the astronomical and geographical circles in

their proper positions on it.
(b) In ancient astronomy, one of the concentric and eccentric revolving spherical transparent shells in which the stars, sun, planets, and moon were supposed to be set, and by which they were carried, in such a manner as to produce their apparent motions.

4. (Logic)

Defn: The extension of a general conception, or the totality of the individuals or species to which it may be applied.

5. Circuit or range of action, knowledge, or influence; compass; province; employment; place of existence.
To be called into a huge sphere, and not to be seen to move in 't. Shak.
Taking her out of the ordinary relations with humanity, and inclosing her in a sphere by herself. Hawthorne.
Each in his hidden sphere of joy or woe Our hermit spirits dwell. Keble.

6. Rank; order of society; social positions.

7. An orbit, as of a star; a socket. [R.] Shak. Armillary sphere, Crystalline sphere, Oblique sphere,. See under Armillary, Crystalline,.
-- Doctrine of the sphere, applications of the principles of spherical trigonometry to the properties and relations of the circles of the sphere, and the problems connected with them, in astronomy and geography, as to the latitudes and longitudes, distance and bearing, of places on the earth, and the right ascension and declination,

altitude and azimuth, rising and setting, etc., of the heavenly bodies; spherical geometry.
-- Music of the spheres. See under Music.

Syn.
-- Globe; orb; circle. See Globe.

SPHERE
Sphere, v. t. [imp. & p. p. Sphered; p. pr. & vb. n. Sphering.]

1. To place in a sphere, or among the spheres; to insphere.
The glorious planet Sol In noble eminence enthroned and sphered
Amidst the other. Shak.

2. To form into roundness; to make spherical, or spheral; to perfect.
Tennyson.

SPHERICAL; SPHERIC
Spher"ic*al, Spher"ic, a. Etym: [L. sphaericus, Gr. sphérique.]

1. Having the form of a sphere; like a sphere; globular; orbicular; as, a spherical body.

2. Of or pertaining to a sphere.

3. Of or pertaining to the heavenly orbs, or to the sphere or spheres in which, according to ancient astronomy and astrology, they were set.
Knaves, thieves, and treachers by spherical predominance. Shak.
Though the stars were suns, and overburned Their spheric limitations.

Mrs. Browning.
Spherical angle, Spherical coördinate, Spherical excess, etc. See under Angle, Coordinate, etc.
-- Spherical geometry, that branch of geometry which treats of spherical magnitudes; the doctrine of the sphere, especially of the circles described on its surface.
-- Spherical harmonic analysis. See under Harmonic, a.
-- Spherical lune,portion of the surface of a sphere included between two great semicircles having a common diameter.
-- Spherical opening, the magnitude of a solid angle. It is measured by the portion within the solid angle of the surface of any sphere whose center is the angular point.
-- Spherical polygon,portion of the surface of a sphere bounded by the arcs of three or more great circles.
-- Spherical projection, the projection of the circles of the sphere upon a plane. See Projection.
-- Spherical sector. See under Sector.
-- Spherical segment, the segment of a sphere. See under Segment.
-- Spherical triangle,re on the surface of a sphere, bounded by the arcs of three great circles which intersect each other.
-- Spherical trigonometry. See Trigonometry.
-- Spher"ic*al*ly, adv.
-- Spher"ic*al*ness, n.

SPHERICITY
Sphe*ric"i*ty, n. Etym: [Cf. F. sphéricité.]

Defn: The quality or state of being spherial; roundness; as, the sphericity of the planets, or of a drop of water.

SPHERICLE
Spher"i*cle, n.

Defn: A small sphere.

SPHERICS
Spher"ics, n. (Math.)

Defn: The doctrine of the sphere; the science of the properties and relations of the circles, figures, and other magnitudes of a sphere, produced by planes intersecting it; spherical geometry and trigonometry.

SPHEROBACTERIA
Sphe`ro*bac*te"ri*a, n. pl.; sing. Spherobacterium (. Etym: [NL. See Sphere, and Bacterium.] (Biol.)

Defn: See the Note under Microbacteria.

SPHEROCONIC
Sphe`ro*con"ic, n. (Geom.)

Defn: A nonplane curve formed by the intersection of the surface of an oblique cone with the surface of a sphere whose center is at the vertex of the cone.

SPHEROGRAPH
Spher"o*graph, n. Etym: [Sphere + -graph.]

Defn: An instrument for facilitating the practical use of spherics in

navigation and astronomy, being constructed of two cardboards containing various circles, and turning upon each other in such a manner that any possible spherical triangle may be readily found, and the measures of the parts read off by inspection.

SPHEROID
Sphe"roid, n. Etym: [L. spheroides ball-like, spherical, Gr. sphéroïde.]

Defn: A body or figure approaching to a sphere, but not perfectly spherical; esp., a solid generated by the revolution of an ellipse about one of its axes. Oblate spheroid, Prolate spheroid. See Oblate, Prolate, and Ellipsoid.

SPHEROIDAL
Sphe*roid"al, a. Etym: [Cf. F. sphéroïdal.]

Defn: Having the form of a spheroid.
-- Sphe*roid"al*ly, adv. Spheroidal state (Physics.), the state of a liquid, as water, when, on being thrown on a surface of highly heated metal, it rolls about in spheroidal drops or masses, at a temperature several degrees below ebullition, and without actual contact with the heated surface, -- a phenomenon due to the repulsive force of heat, the intervention of a cushion of nonconducting vapor, and the cooling effect of evaporation.

SPHEROIDIC; SPHEROIDICAL
Sphe*roid"ic, Sphe*roid"ic*al, a.

Defn: See Spheroidal. Cheyne.

SPHEROIDICITY; SPHEROIDITY
Sphe`roi*dic"i*ty, Sphe*roid"i*ty, n.

Defn: The quality or state of being spheroidal.

SPHEROMERE
Sphe"ro*mere, n. Etym: [Sphere + -mere.] (Zoöl.)

Defn: Any one of the several symmetrical segments arranged around the central axis and composing the body of a radiate anmal.

SPHEROMETER
Sphe*rom"e*ter, n. Etym: [Sphere + -meter: cf. F. sphéromètre.] (Physics)

Defn: An instrument for measuring the curvature of spherical surface, as of lenses for telescope, etc.

SPHEROSIDERITE
Spher`o*sid"er*ite, n. Etym: [Sphere + siderite.] (Min.)

Defn: Siderite occuring in spheroidal masses.

SPHEROSOME
Sphe"ro*some, n. Etym: [Sphere + -some body.] (Zoöl.)

Defn: The body wall of any radiate animal.

SPHERULATE

Spher"u*late, a.

Defn: Covered or set with spherules; having one or more rows of spherules, or minute tubercles.

SPHERULE
Spher"ule, n. Etym: [L. spherula: cf. F. sphérule.]

Defn: A little sphere or spherical body; as, quicksilver, when poured upon a plane, divides itself into a great number of minute spherules.

SPHERULITE
Spher"u*lite, n. Etym: [Cf. F. sphérulite.] (Min.)

Defn: A minute spherical crystalline body having a radiated structure, observed in some vitreous volcanic rocks, as obsidian and pearlstone.

SPHERULITIC
Spher`u*lit"ic, a.

Defn: Of or pertaining to a spherulite; characterized by the presence of spherulites.

SPHERY
Spher"y, a.

1. Round; spherical; starlike. [R.] "Hermia's sphery eyne." Shak.

2. Of or pertaining to the spheres. [R.]

She can teach ye how to climb Higher than the sphery chime. Milton.

SPHEX
Sphex, n.Etym: [NL., fr. Gr. (Zoöl.)

Defn: Any one of numerous species of sand wasps of the genus Sphex and allied genera. These wasps have the abdomen attached to the thorax by a slender pedicel. See Illust. of Sand wasp, under Sand. Sphex fly (Zoöl.), any one of numerous species of small dipterous flies of the genus Conops and allied genera. The form of the body is similar to that of a sphex.

SPHIGMOMETER
Sphig*mom"e*ter, n.

Defn: See Sphygmometer.

SPHINCTER
Sphinc"ter, n. Etym: [NL., fr. (Anat.)

Defn: A muscle which surrounds, and by its contraction tends to close, a natural opening; as, the sphincter of the bladder.

SPHINCTER
Sphinc"ter, a. (Anat.)

Defn: Of, pertaining to, or designating, a sphincter; as, a sphincter muscle.

STARCH

Starch, n. Etym: [From starch stiff, cf. G. stärke, fr. stark strong.]

1. (Chem.)

Defn: A widely diffused vegetable substance found especially in seeds, bulbs, and tubers, and extracted (as from potatoes, corn, rice, etc.) as a white, glistening, granular or powdery substance, without taste or smell, and giving a very peculiar creaking sound when rubbed between the fingers. It is used as a food, in the production of commercial grape sugar, for stiffening linen in laundries, in making paste, etc.

Note: Starch is a carbohydrate, being the typical amylose, C6H10O5, and is detected by the fine blue color given to it by free iodine. It is not fermentable as such, but is changed by diastase into dextrin and maltose, and by heating with dilute acids into dextrose. Cf. Sugar, Inulin, and Lichenin.

2. Fig.: A stiff, formal manner; formality. Addison. Starch hyacinth (Bot.), the grape hyacinth; -- so called because the flowers have the smell of boiled starch. See under Grape.

STEADFAST
Stead"fast, a. Etym: [Stead + fast, that is, fast in place.] Etym: [Written also stedfast.]

1. Firmly fixed or established; fast fixed; firm. "This steadfast globe of earth." Spenser.

2. Not fickle or wavering; constant; firm; resolute; unswerving; steady. "Steadfast eye." Shak.
Abide steadfast unto him [thy neighbor] in the time of his trouble. Ecclus. xxii. 23.
Whom resist steadfast in the faith. 1 Pet. v. 9.

STEADFASTLY
Stead"fast*ly, adv.

Defn: In a steadfast manner; firmly.
Steadfast believe that whatever God has revealed is infallibly true. Wake.

STEADFASTNESS
Stead"fast*ness, n.

Defn: The quality or state of being steadfast; firmness; fixedness; constancy. "The steadfastness of your faith." Col. ii. 5.
To prove her wifehood and her steadfastness. Chaucer.

STEADILY
Stead"i*ly, adv.

Defn: In a steady manner.

STEADINESS
Stead"i*ness, n.

Defn: The quality or state of being steady.
Steadiness is a point of prudence as well as of courage. L'Estrange.

Syn.
-- Constancy; resolution; unchangeableness.

STEADING
Stead"ing, n.

Defn: The brans, stables, cattle-yards, etc., of a farm; -- called also onstead, farmstead, farm offices, or farmery. [Prov. Eng. & Scot.]

STEADY

Defn: By stealing, or as by stealing, furtively, or by an invisible motion. Sir P. Sidney.

STEALTH
Stealth, n. Etym: [OE. staple. See Steal, v. t.]

1. The act of stealing; theft. [Obs.]

The owner proveth the stealth to have been committed upon him by such an outlaw. Spenser.

2. The thing stolen; stolen property. [Obs.] "Sluttish dens . . . serving to cover stealths." Sir W. Raleigh.

3. The bringing to pass anything in a secret or concealed manner; a secret procedure; a clandestine practice or action; -- in either a good or a bad sense.
Do good by stealth, and blush to find it fame. Pope.
The monarch, blinded with desire of wealth, With steel invades the brother's life by stealth. Dryden.
I told him of your stealth unto this wood. Shak.

STEALTHFUL
Stealth"ful, a.

Defn: Given to stealth; stealthy. [Obs.] -- Stealth"ful*ly, adv. [Obs.] -- Stealth"ful*ness, n. [Obs.]

STEALTHILY
Stealth"i*ly, adv.

Defn: In a stealthy manner.

STEALTHINESS
Stealth"i*ness, n.

Defn: The state, quality, or character of being stealthy; stealth.

STEALTHLIKE
Stealth"like`, a.

Defn: Stealthy; sly. Wordsworth.

STEALTHY
Stealth"y, a. [Compar. Stealthier; superl. Stealthiest.]

Defn: Done by stealth; accomplished clandestinely; unperceived; secret; furtive; sly.
[Withered murder] with his stealthy pace, . . . Moves like a ghost. Shak.

STEAM
Steam, n. Etym: [OE. stem, steem, vapor, flame, AS. steám vapor, smoke, odor; akin to D. stoom steam, perhaps originally, a pillar, or something rising like a pillar; cf. Gr. stand.]

1. The elastic, aëriform fluid into which water is converted when heated to the boiling points; water in the state of vapor.

2. The mist formed by condensed vapor; visible vapor; -- so called in popular usage.

3. Any exhalation. "A steam og rich, distilled perfumes." Milton. Dry steam, steam which does not contain water held in suspension mechanically; -- sometimes applied to superheated steam.
-- Exhaust steam. See under Exhaust.
-- High steam, or High-pressure steam, steam of which the pressure greatly exceeds that of the atmosphere.

-- Low steam, or Low-pressure steam, steam of which the pressure is less than, equal to, or not greatly above, that of the atmosphere.
-- Saturated steam, steam at the temperature of the boiling point which corresponds to its pressure; -- sometimes also applied to wet steam.
-- Superheated steam, steam heated to a temperature higher than the boiling point corresponding to its pressure. It can not exist in contact with water, nor contain water, and resembles a perfect gas; -- called also surcharged steam, anhydrous steam, and steam gas.
-- Wet steam, steam which contains water held in suspension mechanically; -- called also misty steam.

Note: Steam is often used adjectively, and in combination, to denote, produced by heat, or operated by power, derived from steam, in distinction from other sources of power; as in steam boiler or steam-boiler, steam dredger or steam-dredger, steam engine or steam-engine, steam heat, steam plow or steam-plow, etc. Steam blower. (a) A blower for producing a draught consisting of a jet or jets of steam in a chimney or under a fire. (b) A fan blower driven directly by a steam engine.
-- Steam boiler, a boiler for producing steam. See Boiler, 3, and Note. In the illustration, the shell a of the boiler is partly in section, showing the tubes, or flues, which the hot gases, from the fire beneath the boiler, enter, after traversing the outside of the shell, and through which the gases are led to the smoke pipe d, which delivers them to the chimney; b is the manhole; c the dome; e the steam pipe; f the feed and blow-off pipe; g the safety value; hthe water gauge.
-- Steam car, a car driven by steam power, or drawn by a locomotive.
-- Steam carriage, a carriage upon wheels moved on common roads by

steam.
-- Steam casing. See Steam jacket, under Jacket.
-- Steam chest, the box or chamber from which steam is distributed to the cylinder of a steam engine, steam pump, etc., and which usually contains one or more values; -- called also valve chest, and valve box. See Illust. of Slide valve, under Slide.
-- Steam chimney, an annular chamber around the chimney of a boiler furnace, for drying steam.
-- Steam coil, a coil of pipe, or collection of connected pipes, for containing steam; -- used for heating, drying, etc.
-- Steam colors (Calico Printing), colors in which the chemical reaction fixed the coloring matter in the fiber is produced by steam.
-- Steam cylinder, the cylinder of a steam engine, which contains the piston. See Illust. of Slide valve, under Slide.
-- Steam dome (Steam Boilers), a chamber upon the top of the boiler, from which steam is conduced to the engine. See Illust. of Steam boiler, above.
-- Steam fire engine, a fire engine consisting of a steam boiler and engine, and pump which is driven by the engine, combined and mounted on wheels. It is usually drawn by horses, but is sometimes made self-propelling.
-- Steam fitter, a fitter of steam pipes.
-- Steam fitting, the act or the occupation of a steam fitter; also, a pipe fitting for steam pipes.
-- Steam gas. See Superheated steam, above.
-- Steam gauge, an instrument for indicating the pressure of the steam in a boiler. The mercurial steam gauge is a bent tube partially filled with mercury, one end of which is connected with the boiler while the other is open to the air, so that the steam by its pressure raises the mercury in the long limb of the tume to a height

proportioned to that pressure. A more common form, especially for high pressures, consists of a spring pressed upon by the steam, and connected with the pointer of a dial. The spring may be a flattened, bent tube, closed at one end, which the entering steam tends to straighten, or it may be a diaphragm of elastic metal, or a mass of confined air, etc.

-- Steam gun, a machine or contrivance from which projectiles may be thrown by the elastic force of steam.

-- Steam hammer, a hammer for forging, which is worked directly by steam; especially, a hammer which is guided vertically and operated by a vertical steam cylinder located directly over an anvil. In the variety known as Nasmyth's, the cylinder is fixed, and the hammer is attached to the piston rod. In that known as Condie's, the piston is fixed, and the hammer attached to the lower end of the cylinder.

-- Steam heater. (a) A radiator heated by steam. (b) An apparatus consisting of a steam boiler, radiator, piping, and fixures for warming a house by steam.

-- Steam jacket. See under Jacket.

-- Steam packet, a packet or vessel propelled by steam, and running periodically between certain ports.

-- Steam pipe, any pipe for conveying steam; specifically, a pipe through which steam is supplied to an engine.

-- Steam plow or plough, a plow, or gang of plows, moved by a steam engine.

-- Steam port, an opening for steam to pass through, as from the steam chest into the cylinder.

-- Steam power, the force or energy of steam applied to produce results; power derived from a steam engine.

-- Steam propeller. See Propeller.

-- Steam pump, a small pumping engine operated by steam. It is

usually direct-acting.
-- Steam room (Steam Boilers), the space in the boiler above the water level, and in the dome, which contains steam.
-- Steam table, a table on which are dishes heated by steam for keeping food warm in the carving room of a hotel, restaurant, etc.
-- Steam trap, a self-acting device by means of which water that accumulates in a pipe or vessel containing steam will be discharged without permitting steam to escape.
-- Steam tug, a steam vessel used in towing or propelling ships.
-- Steam vessel, a vessel propelled by steam; a steamboat or steamship; -- a steamer.
-- Steam whistle, an apparatus attached to a steam boiler, as of a locomotive, through which steam is rapidly discharged, producing a loud whistle which serves as a warning signal. The steam issues from a narrow annular orifice around the upper edge of the lower cup or hemisphere, striking the thin edge of the bell above it, and producing sound in the manner of an organ pipe or a common whistle.

STEAM
Steam, v. i. [imp. & p. p. Steamed; p. pr. & vb. n. Steaming.]

1. To emit steam or vapor.
My brother's ghost hangs hovering there, O'er his warm blood, that steams into the air. Dryden.
Let the crude humors dance In heated brass, steaming with fire intence. J. Philips.

2. To rise in vapor; to issue, or pass off, as vapor.
The dissolved amber . . . steamed away into the air. Boyle.

3. To move or travel by the agency of steam.
The vessel steamed out of port. N. P. Willis.

4. To generate steam; as, the boiler steams well.

STEAM
Steam, v. t.

1. To exhale. [Obs.] Spenser.

2. To expose to the action of steam; to apply steam to for softening, dressing, or preparing; as, to steam wood; to steamcloth; to steam food, etc.

STEAMBOAT
Steam"boat`, n.

Defn: A boat or vessel propelled by steam power; -- generally used of river or coasting craft, as distinguished from ocean steamers.

STEAMBOATING
Steam"boat`ing, n.

1. The occupation or business of running a steamboat, or of transporting merchandise, passengers, etc., by steamboats.

2. (Bookbinding)

Defn: The shearing of a pile of books which are as yet uncovered, or out of boards. Knight.

STEAM ENGINE
Steam" en"gine.

Defn: An engine moved by steam.

Note: In its most common forms its essential parts are a piston, a cylinder, and a valve gear. The piston works in the cylinder, to which steam is admitted by the action of the valve gear, and communicates motion to the machinery to be actuated. Steam engines are thus classified: 1. According to the wat the steam is used or applied, as condencing, noncondencing, compound, double-acting, single-acting, triple-expansion, etc. 2. According to the motion of the piston, as reciprocating, rotary, etc. 3. According to the motion imparted by the engine, as rotative and nonrotative. 4. According to the arrangement of the engine, as stationary, portable, and semiportable engines, beam engine, oscillating engine, direct-acting and back-acting engines, etc. 5. According to their uses, as portable, marine, locomotive, pumping, blowing, winding, and stationary engines. Locomotive and portable engines are usually high-pressure, noncondencing, rotative, and direct-acting. Marine engines are high or low pressure, rotative, and generally condencing, double-acting, and compound. Paddle engines are generally beam, sideScrew engines are generally direct-acting, back-acting, or oscillating. Stationary engines belong to various classes, but are generally rotative. A horizontal or inclined stationary steam engine is called a left-hand or a right-hand engine when the crank shaft and driving pulley are on the left-hand side, or the right-hand side, respectively, or the engine, to a person looking at them from the cylinder, and is said to run forward or backward when the crank

traverses the upward half, or lower half, respectively, of its path, while the piston rod makes its stroke outward from the cylinder. A marine engine, or the engine of a locomotive, is said to run forward when its motion is such as would propel the vessel or the locomotive forward. Steam engines are further classified as double-cylinder, disk, semicylinder, trunk engines, etc. Machines, such as cranes, hammers, etc., of which the steam engine forms a part, are called steam cranes, steam hammers, etc. See Illustration in Appendix. Back-acting, or Back-action, steam engine, a steam engine in which the motion is transmitted backward from the crosshead to a crank which is between the crosshead and the cylinder, or beyond the cylinder.
-- Portable steam engine, a steam engine combined with, and attached to, a boiler which is mounted on wheels so as to admit of easy transportation; -- used for driving machinery in the field, as trashing machines, draining pumps, etc.
-- Semiportable steam engine, a steam engine combined with, and attached to, a steam boiler, but not mounted on wheels.

STEAMER
Steam"er, n.

1. A vessel propelled by steam; a steamship or steamboat.

2. A steam fire engine. See under Steam.

3. A road locomotive for use on common roads, as in agricultural operations.

4. A vessel in which articles are subjected to the action of steam, as in washing, in cookery, and in various processes of manufacture.

5. (Zoöl.)

Defn: The steamer duck. Steamer duck (Zoöl.), a sea duck (Tachyeres cinereus), native of Patagonia and Terra del Fuego, which swims and dives with great agility, but which, when full grown, is incapable of flight, owing to its very small wings. Called also loggerhead, race horse, and side wheel duck.

STEAMINESS
Steam"i*ness, n.

Defn: The quality or condition of being steamy; vaporousness; mistness.

STEAMSHIP
Steam"ship`, n.

Defn: A ship or seagoing vessel propelled by the power of steam; a steamer.

STEAMY
Steam"y, a.

Defn: Consisting of, or resembling, steam; full of steam; vaporous; misty. Cowper.

STEAN
Stean, n. & v.

Defn: See Steen. Spenser.

STEANINGP
Stean"ingp, n.

Defn: See Steening.

STEAPSIN
Ste*ap"sin, n. (Physiol Chem.)

Defn: An unorganized ferment or enzyme present in pancreatic juice. It decomposes neutral fats into glycerin and fatty acids.

STEARATE
Ste"a*rate, n. (Chem.)

Defn: A salt of stearic acid; as, ordinary soap consists largely of sodium or potassium stearates.

STEARIC
Ste*ar"ic, a. Etym: [Cf. F. stéarique.] (Physiol. Chem.)

Defn: Pertaining to, or obtained from, stearin or tallow; resembling tallow. Stearic acid (Chem.), a monobasic fatty acid, obtained in the form of white crystalline scales, soluble in alcohol and ether. It melts to an oily liquid at 69°C.C18H36O2, CH3.(CH2)16.COOH; sodium stearate, with sodium palmitate, is the main component of ordinary bar soaps (Such as Ivory soap).

STEARIN

Ste"a*rin, n. Etym: [Gr. stéarine.] (Physiol. Chem.)

Defn: One of the constituents of animal fats and also of some vegetable fats, as the butter of cacao. It is especially characterized by its solidity, so that when present in considerable quantity it materially increases the hardness, or raises the melting point, of the fat, as in mutton tallow. Chemically, it is a compound of glyceryl with three molecules of stearic acid, and hence is technically called tristearin, or glyceryl tristearate.

STEAROLIC
Ste`a*rol"ic, a. Etym: [Stearic + oleic + -ic.] (Chem.)

Defn: Of, pertaining to, or designating, an acid of the acetylene series, isologous with stearis acid, and obtained, as a white crystalline substance, from oleïc acid.

STEARONE
Ste"a*rone, n. (Chem.)

Defn: The ketone of stearic acid, obtained as a white crystalline substance, (C17H35)2.CO, by the distillation of calcium stearate.

STEAROPTENE
Ste`a*rop"tene, n. Etym: [Stearic + -optene as in elæoptene.] (Chem.)

Defn: The more solid ingredient of certain volatile oils; -- contrasted with elæoptene.

STEARRHEA

Ste`ar*rhe"a, n. Etym: [NL., from Gr. (Med.)

Defn: seborrhea.

STEARYL
Ste"a*ryl, n. Etym: [Stearic + -yl.] (Chem.)

Defn: The hypothetical radical characteristic of stearic acid.

STEATITE
Ste"a*tite, n. Etym: [Gr. stéatite.] (Min.)

Defn: A massive variety of talc, of a grayish green or brown color. It forms extensive beds, and is quarried for fireplaces and for coarse utensils. Called also potstone, lard stone, and soapstone.

STEATITIC
Ste`a*tit"ic, n. (Min.)

Defn: Pertaining to, or of the nature of, steatite; containing or resembling steatite.

STEATOMA
Ste`a*to"ma, n. Etym: [L., fr. Gr. (Med.)

Defn: A cyst containing matter like suet.

STEATOMATOUS
Ste`a*tom"a*tous, a. (Med.)

Defn: Of the nature of steatoma.

STEATOPYGA
Ste`a*top"y*ga, n. Etym: [NL., fr. Gr.

Defn: A remarkable accretion of fat upon the buttocks of Africans of certain tribes, especially of Hottentot women.

STEATOPYGOUS
Ste`a*top"y*gous, a.

Defn: Having fat buttocks.
Specimens of the steatopygous Abyssinian breed. Burton.

STED; STEDFAST; STEDFASTLY
Sted, n., Sted"fast, a., Sted"fast*ly, adv., etc.

Defn: See Stead, Steadfast, etc.

STEE
Stee, n. Etym: [Cf. G. stiege. *164. See Stair.]

Defn: A ladder. [Obs. or Prov. Eng.] [Written also stey.]

STEED
Steed, n. Etym: [OE. stede, AS. steda a stud-horse, war horse, fr. stod a stud of breeding steeds; akin to G. stute a mare, Icel. stedda, sto, a stud. *163. See Stud of horses.]

Defn: A horse, especially a spirited horse for state of war; -- used

chiefly in poetry or stately prose. "A knight upon a steed." Chaucer. Mounted upon a hot and fiery steed. Shak.

STEEDLESS
Steed"less, a.

Defn: Having no steed; without a horse.

STEEK; STEIK
Steek, Steik, v. t. Etym: [Cf. Stick, v. t.]

Defn: To pierce with a sharp instrument; hence, to stitch; to sew; also, to fix; to fasten. [Scot.]

STEEL
Steel, n. Etym: [AS. stel, styl, style; akin to D. staal, G. stahl, OHG. stahal, Icel. stal, Dan. staal, Sw. stål, Old Prussian stakla.]

1. (Metal)

Defn: A variety of iron intermediate in composition and properties between wrought iron and cast iron (containing between one half of one per cent and one and a half per cent of carbon), and consisting of an alloy of iron with an iron carbide. Steel, unlike wrought iron, can be tempered, and retains magnetism. Its malleability decreases, and fusibility increases, with an increase in carbon.

2. An instrument or implement made of steel; as: --
(a) A weapon, as a sword, dagger, etc. "Brave Macbeth . . . with his brandished steel." Shak.

While doubting thus he stood, Received the steel bathed in his brother's blood. Dryden.

STERE
Stere, n.

Defn: A rudder. See 5th Steer. [Obs.] Chaucer.

STERE
Stere, n.

Defn: Helmsman. See 6th Steer. [Obs.] Chaucer.

STERELMINTHA
Ster`el*min"tha, n. pl. Etym: [NL., fr. Gr. stereo`s solid + (Zoöl.)

Defn: Same as Platyelminthes.

STEREO-
Ste"re*o-. Etym: [Gr. stereo`s solid. See Stare to gaze.]

Defn: A combining form meaning solid, hard, firm, as in stereo-chemistry, stereography.

STEREOBATE
Ste"re*o*bate, n. Etym: [Gr. stereo`s solid + stéréobate.] (Arch.)

Defn: The lower part or basement of a building or pedestal; -- used loosely for several different forms of basement.

STEREO-CHEMIC; STEREO-CHEMICAL
Ste`re*o-chem"ic, Ste`re*o-chem"ic*al, a. (Chem.)

Defn: Pertaining to, or illustrating, the hypothetical space relations of atoms in the molecule; as, a stereo-chemic formula.

STEREO-CHEMISTRY
Ste`re*o-chem"is*try, n. Etym: [Stereo- + chemistry.] (Chem.)

Defn: Chemistry considered with reference to the space relations of atoms.

STEREOCHROME
Ste"re*o*chrome, n.

Defn: Stereochromic picture.

STEREOCHROMIC
Ste`re*o*chro"mic, a.

Defn: Pertaining to the art of stereochromy; produced by stereochromy.
 -- Ste`re*o*chro"mic*al*ly, adv.

STEREOCHROMY
Ste`re*och"ro*my, n. Etym: [Stereo- + Gr. chrw^ma color.]

Defn: A style of painting on plastered walls or stone, in which the colors are rendered permanent by sprinklings of water, in which is mixed a proportion of soluble glass (a silicate of soda).

STEREOELECTRIC
Ste`re*o*e*lec"tric, a. Etym: [Stereo- + electric.] (Physics)

Defn: Of or pertaining to the generation of electricity by means of solid bodies alone; as, a stereoelectric current is one obtained by means of solids, without any liquid.

STEREOGRAM
Ste"re*o*gram, n. Etym: [Stereo- + -gram.]

Defn: A diagram or picture which represents objects in such a way as to give the impression of relief or solidity; also, a stereograph.

STEREOGRAPH
Ste"re*o*graph, n. Etym: [Stereo- + -graph.]

Defn: Any picture, or pair of pictures, prepared for exhibition in the stereoscope. Stereographs are now commonly made by means of photography.

STEREOGRAPHIC; STEREOGRAPHICAL
Ste`re*o*graph"ic, Ste`re*o*graph"ic*al, a. Etym: [Cf. F. stéréographique.]

Defn: Made or done according to the rules of stereography; delineated on a plane; as, a stereographic chart of the earth. Stereographic projection (Geom.), a method of representing the sphere in which the center of projection is taken in the surface of the sphere, and the plane upon which the projection is made is at right andles to the diameter passing through the center of projection.

STEREOGRAPHICALLY

Ste`re*o*graph"ic*al*ly, adv.

Defn: In a stereographical manner; by delineation on a plane.

STEREOGRAPHY
Ste`re*og"ra*phy, n. Etym: [Stereo- + graphy: cf. F. stéréographie.]

Defn: The art of delineating the forms of solid bodies on a plane; a branch of solid geometry which shows the construction of all solids which are regularly defined.

Note: By cutting pieces of cardboard, or other suitable material, in the forms represented in the cut, folding them along the lines indicated, and joining their edges, the five regular solids may be formed.

STEREOMETER
Ste`re*om"e*ter, n. Etym: [Stereo- + meter.] (Physics)

1. An instrument for measuring the solid contents of a body, or the capacity of a vessel; a volumenometer.

2. An instrument for determining the specific gravity of liquid bodies, porous bodies, and powders, as well as solids.

STEREOMETRIC; STEREOMETRICAL
Ste`re*o*met"ric, Ste`re*o*met"ric*al, a. Etym: [Cf. F. stéréométrique.]

Defn: Of or pertaining to stereometry; performed or obtained by

stereometry.
-- Ste`re*o*met"ric*al*ly, adv.

STEREOMETRY
Ste`re*om"e*try, n. Etym: [Stereo- + -metry: cf. F. stéréométrie.]

Defn: The art of measuring and computing the cubical contents of bodies and figures; -- distinguished from planimetry.

STEREOMONOSCOPE
Ste`re*o*mon"o*scope, n. Etym: [Stereo- + mono- + -scope.]

Defn: An instrument with two lenses, by which an image of a single picture projected upon a screen of ground glass is made to present an appearance of relief, and may be viewed by several persons at once.

STEREOPLASM
Ste"re*o*plasm, n. Etym: [Stereo- + Gr. (Biol.)

Defn: The solid or insoluble portion of the cell protoplasm. See Hygroplasm.

STEREOPTICON
Ste`re*op"ti*con, n. Etym: [NL. See Stereo-, and Optic.]

Defn: An instrument, consisting essentially of a magic lantern in which photographic pictures are used, by which the image of a landscape, or any object, may be thrown upon a screen in such a manner as to seem to stand out in relief, so as to form a striking and accurate representation of the object itself; also, a pair of

magic lanterns for producing the effect of dissolving views.

STEREOSCOPE
Ste"re*o*scope, n. Etym: [Stereo- + -scope.]

Defn: An optical instrument for giving to pictures the appearance of solid forms, as seen in nature. It combines in one, through a bending of the rays of light, two pictures, taken for the purpose from points of view a little way apart. It is furnished with two eyeglasses, and by refraction or reflection the pictures are superimposed, so as to appear as one to the observer.

Note: In the reflecting stereoscope, the rays from the two pictures are turned into the proper direction for stereoscopic vision by two plane mirrors set at an angle with each other, and between the pictures. In the lenticular stereoscope, the form in general use, the eyeglasses are semilenses, or marginal portions of the same convex lenses, set with their edges toward each other, so that they deflect the rays coming from the picture so as to strike the eyes as if coming direct from an intermediate point, where the two pictures are seen apparently as one.

STEREOSCOPIC; STEREOSCOPICAL
Ste`re*o*scop"ic, Ste`re*o*scop"ic*al, a.

Defn: Of or pertaining to the stereoscope; characteristic of, or adapted to, the stereoscope; as, a stereoscopic effect; the stereoscopic function of the eyeglasses; stereoscopic views.
-- Ste`re*o*scop"ic*al*ly, adv.

STEREOSCOPIST
Ste`re*os"co*pist, n.

Defn: One skilled in the use or construction of stereoscopes.

STEREOSCOPY
Ste`re*os"co*py, n.

Defn: The art or science of using the stereoscope, or of constructing the instrument or the views used with it.

STEREOSTATIC
Ste`re*o*stat"ic, a. Etym: [Stereo- + static.] (Civil. Engin.)

Defn: Geostatic.

STEREOTOMIC; STEREOTOMICAL
Ste`re*o*tom"ic, Ste`re*o*tom"ic*al, a.

Defn: Of or pertaining to stereotomy; performed by stereotomy.

STEREOTOMY
Ste`re*ot"o*my, n. Etym: [Stereo- + Gr. stéréotomie.]

Defn: The science or art of cutting solids into certain figures or sections, as arches, and the like; especially, the art of stonecutting.

STEREOTYPE
Ste"re*o*type, n. Etym: [Stereo- + -type: cf. F. stéréotype.]

1. A plate forming an exact faximile of a page of type or of an engraving, used in printing books, etc.; specifically, a plate with type-metal face, used for printing.

Note: A stereotype, or stereotypr plate, is made by setting movable type as for ordinary printing; from these a cast is taken in plaster of Paris, paper pulp, or the like, and upon this cast melted type metal is poured, which, when hardened, makes a solid page or column, from which the impression is taken as from type.

2. The art or process of making such plates, or of executing work by means of them. Stereotype block, a block, usually of wood, to which a stereotype plate is attached while being used in printing.

STEREOTYPE
Ste"re*o*type, v. t. [imp. & p. p. Stereotyped; p. pr. & vb. n. Stereotyping.] Etym: [Cf. F. stéréotyper.]

1. To prepare for printing in stereotype; to make the stereotype plates of; as, to stereotype the Bible.

2. Fig.: To make firm or permanent; to fix.
Powerful causes tending to stereotype and aggravate the poverty of old conditions. Duke of Argyll (1887).

STEREOTYPED
Ste"re*o*typed, a.

1. Formed into, or printed from, stereotype plates.

2. Fig.: Formed in a fixed, unchangeable manner; as, stereotyped opinions.
Our civilization, with its stereotyped ways and smooth conventionalities. J. C. Shairp.

STEREOTYPER
Ste"re*o*ty`per, n.

Defn: One who stereotypes; one who makes stereotype plates, or works in a stereotype foundry.

STEREOTYPERY
Ste"re*o*ty`per*y, n.

1. The art, process, or employment of making stereotype plates.

2. A place where stereotype plates are made; a stereotype foundry.

STEREOTYPIC
Ste`re*o*typ"ic, a.

Defn: Of or pertaining to stereotype, or stereotype plates.

STEREOTYPIST
Ste"re*o*ty`pist, n.

Defn: A stereotyper.

STEREOTYPOGRAPHER

Ste`re*o*ty*pog"ra*pher, n.

Defn: A stereotype printer.

STEREOTYPOGRAPHY
Ste`re*o*ty*pog"ra*phy, n. Etym: [Stereo- + typography.]

Defn: The act or art of printing from stereotype plates.

STEREOTYPY
Ste"re*o*ty`py, n. Etym: [Cf. F. stéréotypie.]

Defn: The art or process of making stereotype plates.

STERHYDRAULIC
Ster`hy*drau"lic, a. Etym: [Stereo- + hydraulic.]

Defn: Pertaining to, or designating, a kind of hydraulic press; resembling such a press in action or principle. 7. (Chron.)

Defn: A mode of reckoning time, with regard to the Julian and Gregorian calendars.

Note: Style is Old or New. The Old Style follows the Julian manner of computing the months and days, or the calendar as established by Julius Cæsar, in which every fourth year consists of 366 days, and the other years of 365 days. This is about 11 minutes in a year too much. Pope Georgy XIII. reformed the calendar by retrenching 10 days in October, 1582, in order to bring back the vernal equinox to the same day as at the time of the Council of Nice, A.D. 325. This reformation was adopted by act of the British Parliament in 1751, by which act 11 days in September, 1752, were retrenched, and the third day was reckoned the fourteenth. This mode of reckoning is called New Style, according to which every year divisible by 4, unless it is divisible by 100 without being divisible by 400, has 366 days, and any other year 365 days. Style of court, the practice or manner observed by a court in its proceedings. Ayliffe.

SUBLIMITY
Sub*lim"i*ty, n.; pl. Sublimities. Etym: [L. sublimitas: cf. F. sublimité.]

1. The quality or state of being sublime (in any sense of the

adjective).

2. That which is sublime; as, the sublimities of nature.

Syn.
 -- Grandeur; magnificence.
 -- Sublimity, Grandeur. The mental state indicated by these two words is the same, namely, a mingled emotion of astonishment and awe. In speaking of the quality which produces this emotion, we call it grandeur when it springs from what is vast in space, power, etc.; we call it sublimity when it springs from what is elevated far above the ordinary incidents of humanity. An immense plain is grand. The heavens are not only grand, but sublime (as the predominating emotion), from their immense height. Exalted intellect, and especially exalted virtue under severe trials, give us the sense of moral sublimity, as in the case of our Savior in his prayer for his murderers. We do not speak of Satan, when standing by the fiery gulf, with his "unconquerable will and study of revenge," as a sublime object; but there is a melancholy grandeur thrown around him, as of an "archangel ruined."

SUGAR
Sug"ar, n. Etym: [OE. sugre, F. sucre (cf. It. zucchero, Sp. azúcar), fr. Ar. sukkar, assukkar, fr. Skr. çarkara sugar, gravel; cf. Per. shakar. Cf. Saccharine, Sucrose.]

1. A sweet white (or brownish yellow) crystalline substance, of a sandy or granular consistency, obtained by crystallizing the evaporated juice of certain plants, as the sugar cane, sorghum, beet root, sugar maple, etc. It is used for seasoning and preserving many kinds of food and drink. Ordinary sugar is essentially sucrose. See the Note below.

Note: The term sugar includes several commercial grades, as the white or refined, granulated, loaf or lump, and the raw brown or muscovado. In a more general sense, it includes several distinct chemical compounds, as the glucoses, or grape sugars (including glucose proper, dextrose, and levulose), and the sucroses, or true sugars (as cane sugar). All sugars are carbohydrates. See Carbohydrate. The glucoses, or grape sugars, are ketone alcohols of the formula $C_6H_{12}O_6$, and they turn the plane of polarization to the right or the left. They are produced from the amyloses and sucroses, as by the action of heat and acids of ferments, and are themselves decomposed by fermentation into alcohol and carbon dioxide. The only sugar (called acrose) as yet produced artificially belongs to this class. The sucroses, or cane sugars, are doubled glucose anhydrides of the formula $C_{12}H_{22}O_{11}$. They are usually not fermentable as such (cf. Sucrose), and they act on polarized light.

2. By extension, anything resembling sugar in taste or appearance; as, sugar of lead (lead acetate), a poisonous white crystalline substance having a sweet taste.

3. Compliment or flattery used to disguise or render acceptable something obnoxious; honeyed or soothing words. [Colloq.] Acorn

Sul"cate, Sul"ca*ted, a. Etym: [L. sulcatus, p.p. of sulcare to furrow, fr. sulcus a furrow.]

Defn: Scored with deep and regular furrows; furrowed or grooved; as, a sulcated stem.

SULCATION
Sul*ca"tion, n.

Defn: A channel or furrow.

SULCIFORM
Sul"ci*form, a.

Defn: Having the form of a sulcus; as, sulciform markings.

SULCUS
Sul"cus, n.; pl. Sulci. Etym: [L., a furrow.]

Defn: A furrow; a groove; a fissure.

SULEAH FISH
Su"le*ah fish`. (Zoöl.)

Defn: A coarse fish of India, used in making a breakfast relish called burtah.

SULK
Sulk, n. Etym: [L. sulcus.]

Defn: A furrow. [Obs.]

SULK
Sulk, v. i. Etym: [See Sulkiness.]

Defn: To be silently sullen; to be morose or obstinate. T. Hook.

SULKER
Sulk"er, n.

Defn: One who sulks.

SULKILY
Sulk"i*ly, adv.

Defn: In a sulky manner.

SULKINESS
Sulk"i*ness, n. Etym: [For sulkenness, fr. AS. solcen slothful, remiss, in asolcen, besolcen, properly p.p. of sealcan in asealcan to be weak or slothful; of uncertain origin.]

Defn: The quality or state of being sulky; sullenness; moroseness; as, sulkiness of disposition.

SULKS
Sulks, n. pl.

Defn: The condition of being sulky; a sulky mood or humor; as, to be in the sulks.

SULKY
Sulk"y, a. [Compar. Sulkier; superl. Sulkiest.] Etym: [See Sulkiness, and cf. Sulky, n.]

Defn: Moodly silent; sullen; sour; obstinate; morose; splenetic.

Syn.
-- See Sullen.

SULKY
Sulk"y, n.; pl. Sulkies. Etym: [From Sulky, a.; -- so called from the owner's desire of riding alone.]

Defn: A light two-wheeled carriage for a single person.

Note: Sulky is used adjectively in the names of several agricultural machines drawn by horses to denote that the machine is provided with wheels and a seat for the driver; as, sulky plow; sulky harrow; sulky rake, etc.

SULL
Sull, n. Etym: [AS. suluh, sulh, a plow; cf. OHG. suohili a little plow.]

Defn: A plow. [Obs.] Ainsworth.

SULLAGE
Sul"lage, n. Etym: [Cf. Suillage, Sulliage.]

1. Drainage of filth; filth collected from the street or highway; sewage. [Obs.]
The streets were exceedingly large, well paved, having many vaults and conveyances under them for sullage. Evelyn.

2. That which sullies or defiles. [Obs.]
It is the privilege of the celestial luminaries to receive no tincture, sullage, or difilement from the most noisome sinks and dunghills here below. South.

3. (Founding)

Defn: The scoria on the surface of molten metal in the ladle.

4. (Hydraul. Engin.)

Defn: Silt; mud deposited by water. Sullage piece (Founding), the sprue of a casting. See Sprue, n., 1 (b).

SULLEN
Sul"len, a. Etym: [OE. solein, solain, lonely, sullen; through Old French fr. (assumed) LL. solanus solitary, fr. L. solus alone. See Sole, a.]

1. Lonely; solitary; desolate. [Obs.] Wyclif (Job iii. 14).

2. Gloomy; dismal; foreboding. Milton.

Solemn hymns so sullen dirges change. Shak.

3. Mischievous; malignant; unpropitious.
Such sullen planets at my birth did shine. Dryden.

4. Gloomily angry and silent; cross; sour; affected with ill humor; morose.
And sullen I forsook the imperfect feast. Prior.

5. Obstinate; intractable.
Things are as sullen as we are. Tillotson.

6. Heavy; dull; sluggish. "The larger stream was placid, and even sullen, in its course." Sir W. Scott.

Syn.
-- Sulky; sour; cross; ill-natured; morose; peevish; fretful; ill-humored; petulant; gloomy; malign; intractable.
-- Sullen, Sulky. Both sullen and sulky show themselves in the demeanor. Sullenness seems to be an habitual sulkiness, and sulkiness a temporary sullenness. The former may be an innate disposition; the latter, a disposition occasioned by recent injury. Thus we are in a sullen mood, and in a sulky fit.
No cheerful breeze this sullen region knows; The dreaded east is all the wind that blows. Pope.
-- Sul"len*ly, adv.
-- Sul"len*ness, n.

SULLEN
Sul"len, n.

1. One who is solitary, or lives alone; a hermit. [Obs.] Piers Plowman.

2. pl.

Defn: Sullen feelings or manners; sulks; moroseness; as, to have the sullens. [Obs.] Shak.

SULLEN
Sul"len, v. t.

Defn: To make sullen or sluggish. [Obs.]
Sullens the whole body with . . . laziness. Feltham.

SULLEVATE
Sul"le*vate, v. t. Etym: [L. sublevare to raise up. Cf. Sublevation.]

Defn: To rouse; to excite. [Obs.] Daniel.

SULLIAGE
Sul"li*age, n. Etym: [Cf. Sullage, Suillage, or Sully, v. t.]

Defn: Foulness; filth. [Obs.]
Though we wipe away with never so much care the dirt thrown at us, there will be left some sulliage behind. Gov. of Tongue.

SULLY
Sul"ly, v. t. [imp. & p. p. Sullied; p. pr. & vb. n. Sullying.] Etym: [OE. sulien, AS. sylian, fr. sol mire; akin to G. suhle mire, sich,

sühlen to wallow, Sw. söla to bemire, Dan. söle, Goth. bisaulijan to defile.]

Defn: To soil; to dirty; to spot; to tarnish; to stain; to darken; -- used literally and figuratively; as, to sully a sword; to sully a person's reputation.
Statues sullied yet with sacrilegious smoke. Roscommon.
No spots to sully the brightness of this solemnity. Atterbury.

SULLY
Sul"ly, v. i.

Defn: To become soiled or tarnished.
Silvering will sully and canker more than gilding. Bacon.

SULLY
Sul"ly, n.; pl. Sullies (.

Defn: Soil; tarnish; stain.
A noble and triumphant merit breaks through little spots and sullies in his reputation. Spectator.

SULPHACID
Sulph*ac"id, n. Etym: [Sulpho- + acid.] (Chem.)

Defn: An acid in which, to a greater or less extent, sulphur plays a part analogous to that of oxygen in an oxyacid; thus, thiosulphuric and sulpharsenic acids are sulphacids; -- called also sulphoacid. See the Note under Acid, n., 2.

SULPHAMATE
Sulph*am"ate, n. (Chem.)

Defn: A salt of sulphamic acid.

SULPHAMIC
Sulph*am"ic, a. (Chem.)

Defn: Of or pertaining to a sulphamide; derived from, or related to, a sulphamide; specifically, designating an amido acid derivative, NH2.SO2.OH, of sulphuric acid (analogous to sulphonic acid) which is not known in the free state, but is known in its salts.

SULPHAMIDE
Sulph*am"ide, n. (Chem.)

Defn: Any one of a series of amido compounds obtained by treating sulphuryl chloride with various amines.

SULPHANILIC
Sulph`a*nil"ic, a. Etym: [From sulphuric + anilene.] (Chem.)

Defn: Of, pertaining to, or designating, an anilene sulphonic acid which is obtained as a white crystalline substance.

SULPHANTIMONATE
Sulph*an`ti*mo"nate, n. (Chem.)

Defn: A salt of sulphantimonic acid.

SULPHANTIMONIC
Sulph*an`ti*mon"ic, a. Etym: [Sulpho- + antimonic.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of antimony (called also thioantimonic acid) analogous to sulpharsenic acid.

SULPHANTIMONIOUS
Sulph*an`ti*mo"ni*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of antimony (called also thioantimonious acid) analogous to sulpharsenious acid.

SULPHANTIMONITE
Sulph*an"ti*mo*nite`, n. (Chem.)

Defn: A salt of sulphantimonious acid.

SULPHARSENATE
Sulph*ar"se*nate, n. (Chem.)

Defn: A salt of sulpharsenic acid.

SULPHARSENIC
Sulph`ar*sen"ic, a. Etym: [Sulpho- + arsenic.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid (called also thioarsenic acid) analogous to arsenic acid, and known only in its salts.

SULPHARSENIOUS
Sulph`ar*se"ni*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid (called also thioarsenious acid) analogous to arsenious acid, and known only in its salts.

SULPHARSENITE
Sulph*ar"se*nite, n. (Chem.)

Defn: A salt of sulpharsenious acid.

SULPHATE
Sul"phate, n. Etym: [NL. sulphas, sulphatis, fr. L. sulphur, sulfur, brimstone, sulphur: cf. F. sulfate.] (Chem.)

Defn: A salt of sulphuric acid.

SULPHATIC
Sul*phat"ic, a. (Chem.)

Defn: Of, pertaining to, resembling, or containing, a sulphate or sulphates.

SULPHATO-
Sul"pha*to-. (Chem.)

Defn: A combining form (also used adjectively) denoting a sulphate as an ingredient in certain double salts; as, sulphato-carbonate. [R.]

SULPHAURATE
Sulph*au"rate, n. (Chem.)

Defn: A salt of sulphauric acid.

SULPHAURIC
Sulph*au"ric, a. Etym: [Sulpho- + aurum.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of gold (aurum), known only in its salts.

SULPHIDE
Sul"phide, n. (Chem.)

Defn: A binary compound of sulphur, or one so regarded; -- formerly called sulphuret. Double sulphide (Chem.), a compound of two sulphides.
-- Hydrogen sulphide. (Chem.) See under Hydrogen.
-- Metallic sulphide, a binary compound of sulphur with a metal.

SULPHINATE
Sul"phi*nate, n. (Chem.)

Defn: A salt of a sulphinic acid.

SULPHINDIGOTIC
Sulph*in`di*got"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphonic acid obtained,

as a blue solution, by dissolving indigo in sulphuric acid; -- formerly called also cerulic sulphuric acid, but properly called indigo-disulphonic acid.

SULPHINE
Sul"phine, n. (Chem.)

Defn: Any one of a series of basic compounds which consist essentially of sulphur united with hydrocarbon radicals. In general they are oily or crystalline deliquescent substances having a peculiar odor; as, trimethyl sulphine, (CH3)3S.OH. Cf. Sulphonium.

SULPHINIC
Sul*phin"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, any one of a series of acids regarded as acid ethereal salts of hyposulphurous acid; as, methyl sulphinic acid, CH3.SO.OH, a thick unstable liquid.

SULPHINIDE
Sul"phi*nide, n. Etym: [Sulpho- + amine + anhydride.] (Chem.)

Defn: A white or yellowish crystalline substance, C6H4.(SO2.CO).NH, produced artificially by the oxidation of a sulphamic derivative of toluene. It is the sweetest substance known, having over two hundred times the sweetening power of sugar, and is known in commerce under the name of saccharine. It has acid properties and forms salts (which are inaccurately called saccharinates). I. Remsen.

SULPHION

Sul"phi*on, n. Etym: [Sulpho- + ion.] (Chem.)

Defn: A hypothetical radical, SO4, regarded as forming the acid or negative constituent of sulphuric acid and the sulphates in electrolytic decomposition; -- so called in accordance with the binary theory of salts. [Written also sulphione.]

SULPHIONIDE
Sulph*i"on*ide, n. (Chem.)

Defn: A binary compound of sulphion, or one so regarded; thus, sulphuric acid, Hsulphionide.

SULPHITE
Sul"phite, n. Etym: [Cf. F. sulfite. See Sulphur.] (Chem.)

Defn: A salt of sulphurous acid.

SULPHO-
Sul"pho-. (Chem.)

Defn: A prefix (also used adjectively) designating sulphur as an ingredient in certain compounds. Cf. Thio-.

SULPHOARSENIC
Sul`pho*ar*sen"ic, a. (Chem.)

Defn: Of, pertaining to, or containing, sulphur and arsenic; -- said of an acid which is the same as arsenic acid with the substitution of sulphur for oxygen.

SULPHOCARBONATE
Sul`pho*car"bon*ate, n. (Chem.)

Defn: A salt of sulphocarbonic acid; a thiocarbonate.

SULPHOCARBONIC
Sul`pho*car*bon"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphacid, H2CSO2 (called also thiocarbonic acid), or an acid, H2CS3, analogous to carbonic acid, obtained as a yellow oily liquid of a pungent odor, and forming salts.

SULPHOCYANATE
Sul`pho*cy"a*nate, n. (Chem.)

Defn: A salt of sulphocyanic acid; -- also called thiocyanate, and formerly inaccurately sulphocyanide. Ferric sulphocyanate (Chem.), a dark red crystalline substance usually obtained in a blood-red solution, and recognized as a test for ferric iron.

SULPHOCYANIC
Sul`pho*cy*an"ic, a. Etym: [See Sulphur, Cyanic.] (Chem.)

Defn: Of, pertaining to, derived from, or designating, a sulphacid, HSCN, analogous to cyanic acid, and obtained as a colorless deliquescent crystalline substance, having a bitter saline taste, and not poisonous.

SULPHOCYANIDE
Sul`pho*cy"a*nide, n. (Chem.)

Defn: See Sulphocyanate.

SULPHOCYANOGEN
Sul`pho*cy*an"o*gen, n. (Chem.)

Defn: See Persulphocyanogen. [Obs.]

SULPHONAL
Sul"pho*nal, n. (Med.)

Defn: A substance employed as a hypnotic, produced by the union of mercaptan and acetone.

SULPHONATE
Sul"pho*nate, n. (Chem.)

Defn: A salt of sulphonic acid.

SULPHONE
Sul"phone, n. (Chem.)

Defn: Any one of a series of compounds analogous to the ketones, and consisting of the sulphuryl group united with two hydrocarbon radicals; as, dimethyl sulphone, (CH.SO

SULPHONIC
Sul*phon"ic, a. (Chem.)

Defn: Pertaining to, or derived from, a sulphone; -- used specifically to designate any one of a series of acids (regarded as acid ethereal salts of sulphurous acid) obtained by the oxidation of the mercaptans, or by treating sulphuric acid with certain aromatic bases (as benzene); as, phenyl sulphonic acid, C6H5.SO2.OH, a stable colorless crystalline substance. Sulphonic group (Chem.), the hypothetical radical, SO2.OH, the characteristic residue of sulphonic acids.

SULPHONIUM
Sul*pho"ni*um, n. Etym: [Sulphur + ammonium.] (Chem.)

Defn: A hypothetical radical, SH3, regarded as the type and nucleus of the sulphines.

SULPHOPHOSPHATE
Sul`pho*phos"phate, n. (Chem.)

Defn: A salt of sulphophosphoric acid.

SULPHOPHOSPHITE
Sul`pho*phos"phite, n. (Chem.)

Defn: A salt of sulphophosphorous acid.

SULPHOPHOSPHORIC
Sul`pho*phos*phor"ic, a.

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of

phosphorus, analogous to phosphoric acid, and known in its salts.

SULPHOPHOSPHOROUS
Sul`pho*phos"phor*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical acid of phosphorus, analogous to phosphorous acid, and known in its salts.

SULPHOSALT
Sul"pho*salt`, n. (Chem.)

Defn: A salt of a sulphacid.

SULPHOSTANNATE
Sul`pho*stan"nate, n. (Chem.)

Defn: A salt of sulphostannic acid.

SULPHOSTANNIC
Sul`pho*stan"nic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphacid of tin (more exactly called metasulphostannic acid), which is obtained as a dark brown amorphous substance, H

SULPHOTUNGSTATE
Sul`pho*tung"state, n. (Chem.)

Defn: A salt of sulphotungstic acid.

SULPHOTUNGSTIC
Sul`pho*tung"stic, a. (Chem.)

Defn: Of, pertaining to, or designating, hypothetical sulphacid of tungsten (called also sulphowolframic acid), analogous to sulphuric acid, and known in its salts.

SULPHOVINIC
Sul`pho*vin"ic, a. Etym: [Sulpho- + vinum wine: cf. F. sulfovinique.] (Chem.)

Defn: Of, pertaining to, and formerly designating, ethylsulphuric acid.

SULPHUR
Sul"phur, n. Etym: [L., better sulfur: cf. F. soufre.]

1. (Chem.)

Defn: A nonmetallic element occurring naturally in large quantities, either combined as in the sulphides (as pyrites) and sulphates (as gypsum), or native in volcanic regions, in vast beds mixed with gypsum and various earthy materials, from which it is melted out. Symbol S. Atomic weight 32. The specific gravity of ordinary octohedral sulphur is 2.05; of prismatic sulphur, 1.96.

Note: It is purified by distillation, and is obtained as a lemon-yellow powder (by sublimation), called flour, or flowers, of sulphur, or in cast sticks called roll sulphur, or brimstone. It burns with a blue flame and a peculiar suffocating odor. It is an ingredient of

gunpowder, is used on friction matches, and in medicine (as a laxative and insecticide), but its chief use is in the manufacture of sulphuric acid. Sulphur can be obtained in two crystalline modifications, in orthorhombic octahedra, or in monoclinic prisms, the former of which is the more stable at ordinary temperatures. Sulphur is the type, in its chemical relations, of a group of elements, including selenium and tellurium, called collectively the sulphur group, or family. In many respects sulphur resembles oxygen.

2. (Zoöl.)

Defn: Any one of numerous species of yellow or orange butterflies of the subfamily Pierinæ; as, the clouded sulphur (Eurymus, or Colias, philodice), which is the common yellow butterfly of the Eastern United States. Amorphous sulphur (Chem.), an elastic variety of sulphur of a resinous appearance, obtained by pouring melted sulphur into water. On standing, it passes back into a brittle crystalline modification.
-- Liver of sulphur. (Old Chem.) See Hepar.
-- Sulphur acid. (Chem.) See Sulphacid.
-- Sulphur alcohol. (Chem.) See Mercaptan.
-- Sulphur auratum Etym: [L.] (Old Chem.), a golden yellow powder, consisting of antimonic sulphide, Sb2S5, -- formerly a famous nostrum.
-- Sulphur base (Chem.), an alkaline sulphide capable of acting as a base in the formation of sulphur salts according to the old dual theory of salts. [Archaic] -- Sulphur dioxide (Chem.), a colorless gas, SO2, of a pungent, suffocating odor, produced by the burning of sulphur. It is employed chiefly in the production of sulphuric acid, and as a reagent in bleaching; -- called also sulphurous anhydride,

and formerly sulphurous acid.
-- Sulphur ether (Chem.), a sulphide of hydrocarbon radicals, formed like the ordinary ethers, which are oxides, but with sulphur in the place of oxygen.
-- Sulphur salt (Chem.), a salt of a sulphacid; a sulphosalt.
-- Sulphur showers, showers of yellow pollen, resembling sulphur in appearance, often carried from pine forests by the wind to a great distance.
-- Sulphur trioxide (Chem.), a white crystalline solid, SO3, obtained by oxidation of sulphur dioxide. It dissolves in water with a hissing noise and the production of heat, forming sulphuric acid, and is employed as a dehydrating agent. Called also sulphuric anhydride, and formerly sulphuric acid.
-- Sulphur whale. (Zoöl.) See Sulphur-bottom.
-- Vegetable sulphur (Bot.), lycopodium powder. See under Lycopodium.

SULPHURATE
Sul"phu*rate, a. Etym: [L. sulphuratus, sulfuratus.]

Defn: Sulphureous. [Poetic & R.] Dr. H. More.

SULPHURATE
Sul"phu*rate, v. t. [imp. & p. p. Sulphurated; p. pr. & vb. n. Sulphurating.] (Chem.)

Defn: To sulphurize. [Archaic]

SULPHURATION
Sul`phu*ra"tion, n. Etym: [Cf. F. sulfuration, L. sulphuratio,

sulfuratio, a vein of sulphur.]

Defn: The act or process of combining or impregnating with sulphur or its compounds; also, the state of being so combined or impregnated.

SULPHURATOR
Sul"phu*ra`tor, n.

Defn: An apparatus for impregnating with, or exposing to the action of, sulphur; especially, an apparatus for fumigating or bleaching by means of the fumes of burning sulphur.

SULPHUR-BOTTOM
Sul`phur-bot"tom, n. (Zoöl.)

Defn: A very large whalebone whale of the genus Sibbaldius, having a yellowish belly; especially, S. sulfureus of the North Pacific, and S. borealis of the North Atlantic; -- called also sulphur whale.

SULPHUREITY
Sul`phu*re"i*ty, n.

Defn: The quality or state of being sulphureous. [Obs.] B. Jonson.

SULPHUREOUS
Sul*phu"re*ous, a. Etym: [L. sulphureus, sulfureus.]

Defn: Consisting of sulphur; having the qualities of sulphur, or brimstone; impregnated with sulphur.
Her snakes united, sulphureous waters drink. Pope.

-- Sul*phu"re*ous*ly, adv.
-- Sul*phu"re*ous*ness, n.

SULPHURET
Sul"phu*ret, n. (Chem.)

Defn: A sulphide; as, a sulphuret of potassium. [Obsoles.]

SULPHURETED
Sul"phu*ret`ed, a. (Chem.)

Defn: Combined or impregnated with sulphur; sulphurized. [Written also sulphuretted.] Sulphureted hydrogen. (Chem.) See Hydrogen sulphide, under Hydrogen.

SULPHURIC
Sul*phu"ric, a. Etym: [Cf. F. sulfurique.]

1. Of or pertaining to sulphur; as, a sulphuric smell.

2. (Chem.)

Defn: Derived from, or containing, sulphur; specifically, designating those compounds in which the element has a higher valence as contrasted with the sulphurous compounds; as, sulphuric acid. Sulphuric acid. (a) Sulphur trioxide (see under Sulphur); -- formerly so called on the dualistic theory of salts. [Obs.] (b) A heavy, corrosive, oily liquid, H2SO4, colorless when pure, but usually yellowish or brownish, produced by the combined action of sulphur dioxide, oxygen (from the air), steam, and nitric fumes. It attacks

and dissolves many metals and other intractable substances, sets free most acids from their salts, and is used in the manufacture of hydrochloric and nitric acids, of soda, of bleaching powders, etc. It is also powerful dehydrating agent, having a strong affinity for water, and eating and corroding paper, wood, clothing, etc. It is thus used in the manufacture of ether, of imitation parchment, and of nitroglycerin. It is also used in etching iron, in removing iron scale from forgings, in petroleum refining, etc., and in general its manufacture is the most important and fundamental of all the chemical industries. Formerly called vitriolic acid, and now popularly vitriol, and oil of vitriol.
-- Fuming sulphuric acid, or Nordhausen sulphuric acid. See Disulphuric acid, under Disulphuric.
-- Sulphuric anhydride, sulphur trioxide. See under Sulphur.
-- Sulphuric ether, common anæsthetic ether; -- so called because made by the catalytic action of sulphuric acid on alcohol. See Ether, 3 (a).

SULPHURINE
Sul"phur*ine, a.

Defn: Sulphureous. [R.]

SULPHURING
Sul"phur*ing, n.

Defn: Exposure to the fumes of burning sulphur, as in bleaching; the process of bleaching by exposure to the fumes of sulphur.

SULPHURIZE

Sul"phur*ize, v. t. (Chem.)

Defn: To combine or impregnate with sulphur or any of its compounds; as, to sulphurize caoutchouc in vulcanizing.

SULPHUROUS
Sul"phur*ous, a. Etym: [L. sulphurosus, sulfurosus: cf. F. sulfureux.]

1. Of or pertaining to sulphur.

2. (Chem.)
(a) Derived from, or containing, sulphur; specifically, designating those compounds in which the element has a lower valence as contrasted with the sulphuric compounds.
(b) Having the characteristic odor of sulphur dioxide, or of hydrogen sulphide, or of other sulphur compounds. Sulphurous acid. (a) Sulphur dioxide. See under Sulphur. [Obs.] (b) An acid, H_2SO_3, not known in the free state except as a solution of sulphur dioxide in water, but forming a well-known series of salts (the sulphites).
-- Sulphurous anhydride (Chem.), sulphur dioxide. See under Sulphur.

SULPHURWORT
Sul"phur*wort`, n. (Bot.)

Defn: The hog's fennel. See under Fennel.

SULPHURY
Sul"phur*y, a.

Defn: Resembling, or partaking of the nature of, sulphur; having the qualities of sulphur.

SULPHURYL
Sul"phur*yl, n. Etym: [Sulphur + -yl.] (Chem.)

Defn: The hypothetical radical SO2; -- called also sulphon. Sulphuryl chloride, a chloride, pungent, fuming liquid, SO2.Cl2, obtained by the action of phosphorus pentachloride on sulphur trioxide. On treatment with water it decomposes into sulphuric and hydrochloric acids, and is hence called also sulphuric chloranhydride.

SULPHYDRATE
Sul*phy"drate, n. (Chem.)

Defn: A compound, analogous to a hydrate, regarded as a salt of sulphydric acid, or as a derivative of hydrogen sulphide in which one half of the hydrogen is replaced by a base (as potassium sulphydrate, KSH), or as a hydrate in which the oxygen has been wholly or partially replaced by sulphur.

SULPHYDRIC
Sul*phy"dric, a. (Chem.)

Defn: Of, pertaining to, or designating, hydrogen sulphide, which is regarded as an acid, especially when in solution.

SULPICIAN
Sul*pi"cian, n. Etym: [So called after the parish of St. Sulpice in Paris, of which the founder, Jean Jacques Olier, was pastor in 1643.]

(R. C. Ch.)

Defn: One of an order of priests established in France in 1642 to educate men for the ministry. The order was introduced soon afterwards into Canada, and in 1791 into the United States. [Written also Sulpitian.]

SULTAN
Sul"tan, n. Etym: [F. sultan (cf. Sp. soldan, It. sultano, soldano), Ar. sultan sultan, dominion. Cf. Soldan.]

Defn: A ruler, or sovereign, of a Mohammedan state; specifically, the ruler of the Turks; the Padishah, or Grand Seignior; -- officially so called. Sultan flower. (Bot.) See Sweet sultan, under Sweet.

SULTANA
Sul*ta"na, n. Etym: [It.]

1. The wife of a sultan; a sultaness.

2. pl.

Defn: A kind of seedless raisin produced near Smyrna in Asiatic Turkey. Sultana bird (Zoöl.), the hyacinthine, or purple, gallinule. See Illust. under Gallinule.

SULTANATE
Sul"tan*ate, n. Etym: [Cf. F. sultanat.]

Defn: The rule or dominion of a sultan; sultanship.

SULTANESS
Sul"tan*ess, n.

Defn: A sultana.

SULTANIC
Sul*tan"ic, a.

Defn: Pertaining to a sultan.

SULTAN-RED
Sul"tan-red`, a.

Defn: Having a deep red color.

SULTANRY
Sul"tan*ry, n.

Defn: The dominions of a sultan. Bacon.

SULTANSHIP
Sul"tan*ship, n.

Defn: The office or dignity of a sultan.

SULTANY
Sul"tan*y, n.

Defn: Sultanry. [Obs.] Fuller.

SULTRILY
Sul"tri*ly, adv.

Defn: In a sultry manner.

SULTRINESS
Sul"tri*ness, n.

Defn: The quality or state of being sultry.

SULTRY
Sul"try, a. [Compar. Sultrier; superl. Sultriest.] Etym: [From Sweltry.]

1. Very hot, burning, and oppressive; as, Libya's sultry deserts. Such as, born beneath the burning sky And sultry sun, betwixt the tropics lie. Dryden.

2. Very hot and moist, or hot, close, stagnant, and oppressive, as air.
When in the sultry glebe I faint, Or on the thirsty mountain plant. Addison.

SULU
Su*lu", n. [Malay Suluk.]

Defn: A member of the most prominent tribe of the Moro tribes, occupying the Sulu Archipelago; also, their language.

SUM

Sum, n. Etym: [OE. summe, somme, OF. sume, some, F. somme, L. summa, fr. summus highest, a superlative from sub under. See Sub-, and cf. Supreme.]

1. The aggregate of two or more numbers, magnitudes, quantities, or particulars; the amount or whole of any number of individuals or particulars added together; as, the sum of 5 and 7 is 12.
Take ye the sum of all the congregation. Num. i. 2.

Note: Sum is now commonly applied to an aggregate of numbers, and number to an aggregate of persons or things.

2. A quantity of money or currency; any amount, indefinitely; as, a sum of money; a small sum, or a large sum. "The sum of forty pound." Chaucer.
With a great sum obtained I this freedom. Acts xxii. 28.

3. The principal points or thoughts when viewed together; the amount; the substance; compendium; as, this is the sum of all the evidence in the case; this is the sum and substance of his objections.

4. Height; completion; utmost degree.
Thus have I told thee all my state, and brought My story to the sum of earthly bliss. Milton.

5. (Arith.)

Defn: A problem to be solved, or an example to be wrought out. Macaulay.
