

# Introduction to FreDoko

## Configuration

Menu item `settings` `settings`

- If the language is not english, click on the button in the second row and select english.
- insert your name in the name field
- adjust the max future limit to your computer:
  - ◆ 250Mhz: ca. 2500
  - ◆ 500Mhz: ca. 5000
  - ◆ 1Ghz: ca. 7500
  - ◆ 2Ghz: ca. 10000
- customize FreeDoko, p.e. in the category behaviour:
  - ◆ whether to show a summary of each trick in a separate window (`show full trick window`)
  - ◆ whether you want the full trick to remain until you press a mouse button (`close full trick with click`)

## Play

*Settings of the party*

- ◇ you can adjust the rules of the game in the category `rules`
- ◇ press `start party` to start playing

*Reservation*

- ◇ select one of the reservations or in the category `solo` a solo game
- ◇ press `announce` to start the game

*The gamefield*

- ◇ normal game/solo game:
  - click on the card you want to play
  - you can make announcements in the menu `announcements`
- ◇ poverty
  - if you have a trump poverty, you see three hooded cards and an arrow
  - if you want to accept the poverty, click on the cards, else click on the arrow
  - If you have accepted the poverty you can change the cards with a single click. A click on one of the three cards in the middle, adds it to your hand, a click on a card in your hand adds it to the cards in the middle. When you have finished, click on the arrow to shift the cards to the poverty player.

*overview of the points*

The menu item `party points` shows a summary of the games you have played so far.

Have fun playing FreeDoko.
