Defn: Moving in the manner of undulations, or waves; resembling the motion of waves, which successively rise or swell rise or swell and fall; pertaining to a propagated alternating motion, similar to that of waves. Undulatory theory, or Wave theory (of light) (Opt.), that theory which regards its various phenomena as due to undulations in an ethereal medium, propagated from the radiant with immense, but measurable, velocities, and producing different impressions on the retina according to their amplitude and frequency, the sensation of brightness depending on the former, that of color on the latter. The undulations are supposed to take place, not in the direction of propagation, as in the air waves constituting sound, but transversely, and the various phenomena of refraction, polarization, interference, etc., are attributable to the different affections of these undulations in different circumstances of propagation. It is computed that the frequency of the undulations corresponding to the several colors of the spectrum ranges from 458 millions of millions per second for the extreme red ray, to 727 millions of millions for the extreme violet, and their lengths for the same colors, from the thirty-eight thousandth to the sixty thousandth part of an inch. The theory of ethereal undulations is applicable not only to the

UNIRADIATED
U`ni*ra"di*a`ted, a. Etym: [Uni- + radiated.]

Defn: Having but one ray.

UNIRAMOUS
U`ni*ra"mous, a. Etym: [Uni- + L. ramus branch.] (Biol.)

Defn: Having but one branch.

UNISEPTATE
U`ni*sep"tate, a. Etym: [Uni- + septate.] (Bot.)

Defn: Having but one septum, or partition; -- said of two-celled fruits, such as the silicles of cruciferous plants.

UNISERIAL
U`ni*se"ri*al, a. Etym: [Uni- + serial.]

Defn: Having only one row or series.

UNISERIATE
U`ni*se"ri*ate, a. Etym: [Uni- + seriate.]

Defn: Having one line or series; uniserial.
-- U`ni*se"ri*ate*ly, adv.

UNISEXUAL
U`ni*sex"u*al, a. Etym: [Uni- + sexual: cf. F. unisexuel.] (Biol.)

Defn: Having one sex only, as plants which have the male and female flowers on separate individuals, or animals in which the sexes are in separate individuals; dioecious; -- distinguished from bisexual, or hermaphrodite. See Dioecious.

UNISILICATE
U`ni*sil"i*cate, n. Etym: [Uni- + silicate.] (Min.)

Defn: A salt of orthosilicic acid, H4SiO4; -- so called because the ratio of the oxygen atoms united to the basic metals and silicon respectively is 1:1; for example, Mg2SiO4 or 2MgO.SiO2.

UNISON
U"ni*son, n. Etym: [LL. unisonus having the same sound; L. unus one + sonus a sound: cf. F. unisson, It. unisono. See One, and Sound a noise.]

1. Harmony; agreement; concord; union.

2. (Mus.)

Defn: Identity in pitch; coincidence of sounds proceeding from an equality in the number of vibrations made in a given time by two or more sonorous bodies. Parts played or sung in octaves are also said to be in unison, or in octaves.

Note: If two cords of the same substance have equal length, thickness, and tension, they are said to be in unison, and their sounds will be in unison. Sounds of very different qualities and force may be in unison, as the sound of a bell may be in unison with a sound of a flute. Unison, then, consists in identity of pitch alone, irrespective of quality of sound, or timbre, whether of instruments or of human voices. A piece or passage is said to be sung or played in unison when all the voices or instruments perform the same part, in which sense unison is contradistinguished from harmony.

3. A single, unvaried. [R.] Pope. In unison, in agreement; agreeing in tone; in concord.

UNISON
U"ni*son, a. Etym: [Cf. It. unisono. See Unison, n.]

1. Sounding alone. [Obs.]
[sounds] intermixed with voice, Choral or unison. Milton.

2. (Mus.)

Defn: Sounded alike in pitch; unisonant; unisonous; as, unison passages, in which two or more parts unite in coincident sound.

UNISONAL

U*nis"o*nal, a.

Defn: Being in unison; unisonant.
-- U*nis"o*nal*ly, adv.

UNISONANCE
U*nis"o*nance, n. Etym: [See Unisonant.]

Defn: Accordance of sounds; unison.

UNISONANT
U*nis"o*nant, a. Etym: [Uni- + sonant. See Unison.]

Defn: Being in unison; having the same degree of gravity or acuteness; sounded alike in pitch.

UNISONOUS
U*nis"o*nous, a. Etym: [See Unison.]

Defn: Being in unison; unisonant. Busby.

UNIT
U"nit, n. Etym: [Abbrev. from unity.]

1. A single thing or person.

2. (Arith.)

Defn: The least whole number; one.
Units are the integral parts of any large number. I. Watts.

3. A gold coin of the reign of James I., of the value of twenty shillings. Camden.

4. Any determinate amount or quantity (as of length, time, heat, value) adopted as a standard of measurement for other amounts or quantities of the same kind.

5. (Math.)

Defn: A single thing, as a magnitude or number, regarded as an undivided whole. Abstract unit, the unit of numeration; one taken in the abstract; the number represented by 1. The term is used in distinction from concrete, or determinate, unit, that is, a unit in which the kind of thing is expressed; a unit of measure or value; as 1 foot, 1 dollar, 1 pound, and the like.
-- Complex unit (Theory of Numbers), an imaginary number of the form a + b-1, when a2 + b2 = 1.
-- Duodecimal unit, a unit in the scale of numbers increasing or decreasing by twelves.
-- Fractional unit, the unit of a fraction; the reciprocal of the denominator; thus, unit of the fraction -- Integral unit, the unit of integral numbers, or 1.
-- Physical unit, a value or magnitude conventionally adopted as a unit or standard in physical measurements. The various physical units are usually based on given units of length, mass, and time, and on the density or other properties of some substance, for example, water. See Dyne, Erg, Farad, Ohm, Poundal, etc.
-- Unit deme (Biol.), a unit of the inferior order or orders of individuality.

-- Unit jar (Elec.), a small, insulated Leyden jar, placed between the electrical machine and a larger jar or battery, so as to announce, by its repeated discharges, the amount of electricity passed into the larger jar.
-- Unit of heat (Physics), a determinate quantity of heat adopted as a unit of measure; a thermal unit (see under Thermal). Water is the substance generally employed, the unit being one gram or one pound, and the temperature interval one degree of the Centigrade or Fahrenheit scale. When referred to the gram, it is called the gram degree. The British unit of heat, or thermal unit, used by engineers in England and in the United States, is the quantity of heat necessary to raise one pound of pure water at and near its temperature of greatest density (39.1º Fahr.) through one degree of the Fahrenheit scale. Rankine.
-- Unit of illumination, the light of a sperm candle burning 120 grains per hour. Standard gas, burning at the rate of five cubic feet per hour, must have an illuminating power equal to that of fourteen such candles.
-- Unit of measure (as of length, surface, volume, dry measure, liquid measure, money, weight, time, and the like), in general, a determinate quantity or magnitude of the kind designated, taken as a standard of comparison for others of the same kind, in assigning to them numerical values, as 1 foot, 1 yard, 1 mile, 1 square foot, 1 square yard, 1 cubic foot, 1 peck, 1 bushel, 1 gallon, 1 cent, 1 ounce, 1 pound, 1 hour, and the like; more specifically, the fundamental unit adopted in any system of weights, measures, or money, by which its several denominations are regulated, and which is itself defined by comparison with some known magnitude, either natural or empirical, as, in the United States, the dollar for money, the pound avoirdupois for weight, the yard for length, the gallon of

8.3389 pounds avoirdupois of water at 39.8º Fahr. (about 231 cubic inches) for liquid measure, etc.; in Great Britain, the pound sterling, the pound troy, the yard, or -- Unit of power. (Mach.) See Horse power.
-- Unit of resistance. (Elec.) See Resistance, n., 4, and Ohm.
-- Unit of work (Physics), the amount of work done by a unit force acting through a unit distance, or the amount required to lift a unit weight through a unit distance against gravitation. See Erg, Foot Pound, Kilogrammeter.
-- Unit stress (Mech. Physics), stress per unit of area; intensity of stress. It is expressed in ounces, pounds, tons, etc., per square inch, square foot, or square yard, etc., or in atmospheres, or inches of mercury or water, or the like.

UNITABLE
U*nit"a*ble, a.

Defn: Capable of union by growth or otherwise. Owen.

UNITARIAN
U`ni*ta"ri*an, n. Etym: [Cf. F. unitaire, unitairien, NL. unitarius. See Unity.]

1. (Theol.)

Defn: One who denies the doctrine of the Trinity, believing that God exists only in one person; a unipersonalist; also, one of a denomination of Christians holding this belief.

2. One who rejects the principle of dualism.

3. A monotheist. [R.] Fleming.

UNITARIAN
U`ni*ta"ri*an, a.

Defn: Of or pertaining to Unitarians, or their doctrines.

UNITARIANIZE
U`ni*ta"ri*an*ize, v. t. & i. [imp. & p. p Unitarianized; p. pr. & vb. n. Unitarianizing.]

Defn: To change or turn to Unitarian views.

UNITARY
U"nit*a*ry, a.

1. Of or pertaining to a unit or units; relating to unity; as, the unitary method in arithmetic.

2. Of the nature of a unit; not divided; united. Unitary theory (Chem.), the modern theory that the molecules of all complete compounds are units, whose parts are bound together in definite structure, with mutual and reciprocal influence on each other, and are not mere aggregations of more or less complex groups; --

distinguished from the dualistic theory.

UNITE
U*nite", v. t. [imp. & p. p. United; p. pr. & vb. n. Uniting.] Etym: [L. unitus, p. p. of unire to unite, from unus one. See One.]

1. To put together so as to make one; to join, as two or more constituents, to form a whole; to combine; to connect; to join; to cause to adhere; as, to unite bricks by mortar; to unite iron bars by welding; to unite two armies.

2. Hence, to join by a legal or moral bond, as families by marriage, nations by treaty, men by opinions; to join in interest, affection, fellowship, or the like; to cause to agree; to harmonize; to associate; to attach.
Under his great vicegerent reign abide, United as one individual soul. Milton.
The king proposed nothing more than to unite his kingdom in one form of worship. Clarendon.

Syn.
-- To add; join; annex; attach. See Add.

1. To become one; to be cemented or consolidated; to combine, as by adhesion or mixture; to coalesce; to grow together.

2. To join in an act; to concur; to act in concert; as, all parties

united in signing the petition.

UNITE
U*nite", a Etym: [L. unitus, p. p. See Unite, v. t.]

Defn: United; joint; as, unite consent. [Obs.] J. Webster.

UNITED
U*nit"ed, a.

Defn: Combined; joined; made one. United Brethren. (Eccl.) See Moravian, n.
-- United flowers (Bot.), flowers which have the stamens and pistils in the same flower.
-- The United Kingdom, Great Britain and Ireland; -- so named since January 1, 1801, when the Legislative Union went into operation.
-- United Greeks (Eccl.), those members of the Greek Church who acknowledge the supremacy of the pope; -- called also uniats.

UNITEDLY
U*nit"ed*ly, adv.

Defn: In an united manner. Dryden.

UNITER
U*nit"er, n.

Defn: One who, or that which, unites.

UNITERABLE

U*nit"er*a*ble, a.

Defn: Not iterable; incapable of being repeated. [Obs.] "To play away an uniterable life." Sir T. Browne.

UNITION
U*ni"tion, n. Etym: [LL. unitio, from L. unire. See Unite,v. t.]

Defn: The act of uniting, or the state of being united; junction. [Obs.] Wiseman.

UNITIVE
U"ni*tive, a. Etym: [LL. unitivus: cf. F. unitif.]

Defn: Having the power of uniting; causing, or tending to produce, union. Jer. Taylor.

UNITIVELY
U"ni*tive*ly, adv.

Defn: In a unitive manner. Cudworth.

UNITIZE
U"nit*ize, v. t. [imp. & p. p. Unitized; p. pr. & vb. n. Unitizing.]

Defn: To reduce to a unit, or one whole; to form into a unit; to unify.

UNITUDE
U"ni*tude, n.

Defn: Unity. [R.] H. Spenser.

UNITY
U"ni*ty, n.; pl. Unities. Etym: [OE. unite, F. unité, L. unitas, from unus one. See One, and cf. Unit.]

1. The state of being one; oneness.
Whatever we can consider as one thing suggests to the understanding the idea of unity. Locks.

Note: Unity is affirmed of a simple substance or indivisible monad, or of several particles or parts so intimately and closely united as to constitute a separate body or thing. See the Synonyms under Union.

2. Concord; harmony; conjunction; agreement; uniformity; as, a unity of proofs; unity of doctrine.
Behold, how good and how pleasant it is for brethren to dwell together in unity! Ps. cxxxiii. 1.

3. (Math.)

Defn: Any definite quantity, or aggregate of quantities or magnitudes taken as one, or for which 1 is made to stand in calculation; thus, in a table of natural sines, the radius of the circle is regarded as unity.

Note: The number 1, when it is not applied to any particular thing, is generally called unity.

4. (Poetry & Rhet.)

Defn: In dramatic composition, one of the principles by which a uniform tenor of story and propriety of representation are preserved; conformity in a composition to these; in oratory, discourse, etc., the due subordination and reference of every part to the development of the leading idea or the eastablishment of the main proposition.

Note: In the Greek drama, the three unities required were those of action, of time, and of place; that is, that there should be but one main plot; that the time supposed should not exceed twenty-four hours; and that the place of the action before the spectators should be one and the same throughout the piece.

5. (Fine Arts & Mus.)

Defn: Such a combination of parts as to constitute a whole, or a kind of symmetry of style and character.

6. (Law)

Defn: The peculiar characteristics of an estate held by several in joint tenancy.

Note: The properties of it are derived from its unity, which is fourfold; unity of interest, unity of title, unity of time, and unity of possession; in other words, joint tenants have one and the same interest, accruing by one and the same conveyance, commencing at the same time, and held by one and the same undivided possession. Unity of possession is also a joint possession of two rights in the same

thing by several titles, as when a man, having a lease of land, afterward buys the fee simple, or, having an easement in the land of another, buys the servient estate.

At unity, at one.
-- Unity of type. (Biol.) See under Type.

Syn.
-- Union; oneness; junction; concord; harmony. See Union.

UNIVALENCE
U*niv"a*lence, n. (Chem.)

Defn: The quality or state of being univalent.

UNIVALENT
U*niv"a*lent, a. Etym: [Uni- + L. valens, -entis, p. pr. See Valence.] (Chem.)

Defn: Having a valence of one; capable of combining with, or of being substituted for, one atom of hydrogen; monovalent; -- said of certain atoms and radicals.

UNIVALVE
U"ni*valve, n. Etym: [Uni- + valve: cf. F. univalve.] (Zoöl.)

Defn: A shell consisting of one valve only; a mollusk whose shell is composed of a single piece, as the snails and conchs.

Note: Most univalves are spiral and are the shells of gastropods, but

many belong to cephalopods and pteropods. A large number of univalves belonging to the gastropods are conical, cup-shaped, or shieldlike, as the limpets.

UNIVALVE; UNIVALVED
U"ni*valve, U"ni*valved, a. Etym: [Cf. F. univalve.] (Bot. & Zoöl.)

Defn: Having one valve; as, a univalve shell or pericarp.

UNIVALVIA
U`ni*val"vi*a (, n. pl. Etym: [NL.] (Zoöl.)

Defn: Same as Gastropoda.

Defn: Same as Univalve, a.

UNIVARIANT
U`ni*va"ri*ant, a. (Chem.)

Defn: Having one degree of freedom or variability.

UNIVERSAL
U`ni*ver"sal, a. Etym: Etym: [L. universalis: cf. F. universel, OF. also universal. See Universe.]

1. Of or pertaining to the universe; extending to, including, or affecting, the whole number, quantity, or space; unlimited; general;

all-reaching; all-pervading; as, universal ruin; universal good; universal benevolence or benefice. "Anointed universal King." Milton. The universal cause Acts not by partial, but by general laws. Pope. This universal frame began. Dryden.

Note: Universal and its derivatives are used in common discourse for general and its derivatives. See General.

2. Constituting or considered as a whole; total; entire; whole; as, the universal world. Shak.
At which the universal host up dent A shout that tore Hell's concave. Milton.

3. (Mech.)

Defn: Adapted or adaptable to all or to various uses, shapes, sizes, etc.; as, a universal milling machine.

4. (Logic)

Defn: Forming the whole of a genus; relatively unlimited in extension; affirmed or denied of the whole of a subject; as, a universal proposition; -- opposed to particular; e. g. (universal affirmative) All men are animals; (universal negative) No men are omniscient. Universal chuck (Mach.), a chuck, as for a lathe, having jaws which can be moved simultaneously so as to grasp objects of various sizes.
-- Universal church, the whole church of God in the world; the catholic church. See the Note under Catholic, a., 1.
-- Universal coupling. (Mach.) Same as Universal joint, below.

-- Universal dial, a dial by which the hour may be found in any part of the world, or under any elevation of the pole.
-- Universal instrument (Astron.), a species of altitude and azimuth instrument, the peculiarity of which is, that the object end of the telescope is placed at right angles to the eye end, with a prism of total reflection at the angle, and the eye end constitutes a portion of the horizontal axis of the instrument, having the eyepiece at the pivot and in the center of the altitude circle, so that the eye has convenient access to both at the same time.
-- Universal joint (Mach.), a contrivance used for joining two shafts or parts of a machine endwise, so that the one may give rotary motion to the other when forming an angle with it, or may move freely in all directions with respect to the other, as by means of a cross connecting the forked ends of the two shafts (Fig. 1). Since this joint can not act when the angle of the shafts is less than 140º, a double joint of the same kind is sometimes used for giving rotary motion at angles less than 140º (Fig. 2).
-- Universal umbel (Bot.), a primary or general umbel; the first or largest set of rays in a compound umbel; -- opposed to partial umbel. A universal involucre is not unfrequently placed at the foot of a universal umbel.

Syn.
-- General; all; whole; total. See General.

UNIVERSAL
U`ni*ver"sal, n.

1. The whole; the general system of the universe; the universe. [Obs.]

Plato calleth God the cause and original, the nature and reason, of the universal. Sir W. Raleigh.

Defn: All created things viewed as constituting one system or whole; the whole body of things, or of phenomena; the mundus of the Latins; the world; creation.
How may I Adore thee, Author of this universe And all this good to man! Milton.

UNIVERSITY
U`ni*ver"si*ty, n.; pl. Universities. Etym: [OE. universite, L. universitas all together, the whole, the universe, a number of persons associated into one body, a society, corporation, fr. universus all together, universal: cf. F. université. See Universe.]

1. The universe; the whole. [Obs.] Dr. H. More.

2. An association, society, guild, or corporation, esp. one capable of having and acquiring property. [Obs.]
The universities, or corporate bodies, at Rome were very numerous. There were corporations of bakers, farmers of the revenue, scribes,

and others. Eng. Cyc.

3. An institution organized and incorporated for the purpose of imparting instruction, examining students, and otherwise promoting education in the higher branches of literature, science, art, etc., empowered to confer degrees in the several arts and faculties, as in theology, law, medicine, music, etc. A university may exist without having any college connected with it, or it may consist of but one college, or it may comprise an assemblage of colleges established in any place, with professors for instructing students in the sciences and other branches of learning.
The present universities of Europe were, originally, the greater part of them, ecclesiastical corporations, instituted for the education of churchmen . . . What was taught in the greater part of those universities was suitable to the end of their institutions, either theology or something that was merely preparatory to theology. A. Smith.

Note: From the Roman words universitas, collegium, corpus, are derived the terms university, college, and corporation, of modern languages; and though these words have obtained modified significations in modern times, so as to indifferently applicable to the same things, they all agree in retaining the fundamental signification of the terms, whatever may have been added to them. There is now no university, college, or corporation, which is not a juristical person in the sense above explained [see def. 2, above]; wherever these words are applied to any association of persons not stamped with this mark, it is an abuse of terms. Eng. Cyc.

UNIVERSITY EXTENSION

U`ni*ver"si*ty ex*ten"sion.

Defn: The extension of the advantages of university instruction by means of lectures and classes at various centers.

UNIVERSOLOGICAL

Up*turn", v. t.

Defn: To turn up; to direct upward; to throw up; as, to upturn the ground in plowing. "A sea of upturned faces." D. Webster.
So scented the grim feature, and upturned His nostril wide into the

murky air. Milton.

UPUPA
U"pu*pa, n. Etym: [L., the hoopoe.] (Zoöl.)

Defn: A genus of birds which includes the common hoopoe.

UPWAFT
Up*waft", v. t.

Defn: To waft upward. Cowper.

UPWARD; UPWARDS
Up"ward, Up"wards, adv. Etym: [AS. upweardes. See Up-, and -wards.]

1. In a direction from lower to higher; toward a higher place; in a course toward the source or origin; -- opposed to downward; as, to tend or roll upward. I. Watts.
Looking inward, we are stricken dumb; looking upward, we speak and prevail. Hooker.

2. In the upper parts; above.
Dagon his name, sea monster, upward man, And down ward fish. Milton.

3. Yet more; indefinitely more; above; over.
From twenty years old and upward. Num. i. 3.
Upward of, or Upwards of, more than; above.
I have been your wife in this obedience Upward of twenty years. Shak.

UPWARD

Up"ward, a. Etym: [AS. upweard. See Up, and -ward.]

Defn: Directed toward a higher place; as, with upward eye; with upward course.

UPWARD
Up"ward, n.

Defn: The upper part; the top. [Obs.]
From the extremest upward of thy head. Shak.

UPWHIRL
Up*whirl", v. t. & i.

Defn: To rise upward in a whirl; to raise upward with a whirling motion.

UPWIND
Up*wind", v. t.

Defn: To wind up. Spenser.

UP-WIND
Up"-wind`, adv.

Defn: Against the wind.

UPWREATH
Up*wreath", v. i.

Defn: To rise with a curling motion; to curl upward, as smoke. Longfellow.

UPYAT
Up*yat", obs.

Defn: imp. of Upgive. Chaucer.

UR; URE
Ur, Ure, n. (Zoöl.)

Defn: The urus.

URACHUS
U"ra*chus, n. Etym: [NL., fr. Gr. (Anat.)

Defn: A cord or band of fibrous tissue extending from the bladder to the umbilicus.

URAEMIA
U*ræ"mi*a, n. Etym: [NL., fr. Gr. (Med.)

Defn: Accumulation in the blood of the principles of the urine, producing dangerous disease.

URAEMIC
U*ræ"mic, a. (Med.)

Defn: Of or pertaining to uræmia; as, uræmic convulsions.

URAEUM
U*ræ"um, n. Etym: [NL., from Gr. uraeus, adj.] (Zoöl.)

Defn: The posterior half of an animal.

URAEUS
U*ræ"us, n. [NL., fr. L. uraeus pertaining to a tail, Gr. , fr. tail.] (Egypt. Archæol.)

Defn: A serpent, or serpent's head and neck, represented on the front of the headdresses of divinities and sovereigns as an emblem of supreme power.

URAL
U"ral, a.

Defn: Pertaining to, or designating, the Urals, a mountain range between Europe and Asia.

URAL-ALTAIC
U"ral-Al*ta"ic, a.

Defn: Of or pertaining to the Urals and the Altai; as the Ural-Altaic, or Turanian, languages.

URALI
U"ra*li, n. Etym: [See Wourali.]

Defn: See Curare.

URALIAN; URALIC
U*ra"li*an, U*ral"ic, a.

Defn: Of or relating to the Ural Mountains.

URALITE
U"ral*ite, n. Etym: [So called because first observed in the Ural Mountains.] (Min.)

Defn: Amphibole resulting from the alternation of pyroxene by paramorphism. It is not uncommon in massive eruptive rocks.

URALITIZATION
U`ral*i`ti*za"tion, n. (Geol.)

Defn: The change of pyroxene to amphibole by paramorphism.

URAMIL
U*ram"il, n. (Chem.)

Defn: Murexan.

URANATE
U"ra*nate, n. (Chem.)

Defn: A salt of uranic acid.

URANIA
U*ra"ni*a, n. Etym: [L., from Gr.

1. (Class. Myth.)

Defn: One of the nine Muses, daughter of Zeus by Mnemosyne, and patron of astronomy.

2. (Zoöl.)

Defn: A genus of large, brilliantly colored moths native of the West Indies and South America. Their bright colored and tailed hind wings and their diurnal flight cause them to closely resemble butterflies.

URANIAN
U*ra"ni*an, a. (Astron.)

Defn: Of or pertaining to the planet Uranus; as, the Uranian year.

URANIC
U*ran"ic, a.

1. Of or pertaining to the heavens; celestial; astronomical.
On I know not what telluric or uranic principles. Carlyle.

2. (Chem.)

Defn: Pertaining to, resembling, or containing uranium; specifically, designating those compounds in which uranium has a valence relatively higher than in uranous compounds.

URANIN
U"ra*nin, n. (Chem.)

Defn: An alkaline salt of fluorescein, obtained as a brownish red substance, which is used as a dye; -- so called from the peculiar yellowish green fluorescence (resembling that of uranium glass) of its solutions. See Fluorescein.

URANINITE
U*ran"i*nite, n. (Min.)

Defn: A mineral consisting chiefly of uranium oxide with some lead, thorium, etc., occurring in black octahedrons, also in masses with a pitchlike luster; pitchblende.

URANISCOPLASTY
U`ra*nis"co*plas`ty, n. Etym: [Gr. -plasty.] (Surg.)

Defn: The process of forming an artificial palate.

URANISCORAPHY; URANISCORRHAPHY
U`ra*nis*cor"a*phy, U`ra*nis*cor"rha*phy, n. Etym: [Gr. (Surg.)

Defn: Suture of the palate. See Staphyloraphy.

URANITE
U"ra*nite, n. Etym: [Cf. G. uranit, F. uranite.] (Min.)

Defn: A general term for the uranium phosphates, autunite, or lime uranite, and torbernite, or copper uranite.

URANITIC

U`ra*nit"ic, a. (Chem.)

Defn: Of or pertaining to uranium; containing uranium.

URANIUM
U*ra"ni*um, n. Etym: [NL., from Uranus the planet. See Uranus.] (Chem.)

Defn: An element of the chromium group, found in certain rare minerals, as pitchblende, uranite, etc., and reduced as a heavy, hard, nickel-white metal which is quite permanent. Its yellow oxide is used to impart to glass a delicate greenish-yellow tint which is accompanied by a strong fluorescence, and its black oxide is used as a pigment in porcelain painting. Symbol U. Atomic weight 239.

Note: Uranium was discovered in the state of an oxide by Klaproth in 1789, and so named in honor of Herschel's discovery of the planet Uranus in 1781.

URAN-OCHER; URAN-OCHRE
U"ran-o`cher, U"ran-o`chre, n. Etym: [Cf. F. uranochre.] (Min.)
(a) A yellow, earthy incrustation, consisting essentially of the oxide of uranium, but more or less impure.

URANOGRAPHIC; URANOGRAPHICAL
U`ra*no*graph"ic, U`ra*no*graph"ic*al, a.

Defn: Of or pertaining to uranography; as, an uranographic treatise.

URANOGRAPHIST

U`ra*nog"ra*phist, n.

Defn: One practiced in uranography.

URANOGRAPHY
U`ra*nog"ra*phy, n. Etym: [Gr.

Defn: A description or plan of the heavens and the heavenly bodies; the construction of celestial maps, globes, etc.; uranology.

URANOLITE
U*ran"o*lite, n. Etym: [Gr. -lite.]

Defn: A meteorite or aërolite. [Obs.] Hutton.

URANOLOGY
U`ra*nol"o*gy, n. Etym: [Gr. -logy.]

Defn: A discourse or treatise on the heavens and the heavenly bodies; the study of the heavens; uranography.

URANOMETRIA
U`ra*nom`e*tri"a, n. Etym: [NL.]

Defn: A uranometry.

URANOMETRY
U`ra*nom"e*try, n. Etym: [Gr. -metry.] (Astron.)

Defn: A chart or catalogue of fixed stars, especially of stars

visible to the naked eye.

URANOPLASTY
U"ra*no*plas`ty, n. Etym: [See Uraniscoplasty.] (Surg.)

Defn: The plastic operation for closing a fissure in the hard palate.

URANOSCOPY
U`ra*nos"co*py, n. Etym: [Gr. -scopy.]

Defn: Observation of the heavens or heavenly bodies.

URANOSO-
U`ra*no"so- (, a. (Chem.)

Defn: A combining form (also used adjectively) from uranium; -- used in naming certain complex compounds; as in uranoso-uranic oxide, uranoso-uranic sulphate.

URANOUS
U"ra*nous (u"ra*nûs), a. (Chem.)

Defn: Pertaining to, or containing, uranium; designating those compounds in which uranium has a lower valence as contrasted with the uranic compounds.

URANUS
U"ra*nus (-nûs), n. Etym: [L. Uranus, Gr. O'yrano`s Uranus, o'yrano`s heaven, sky. Cf. Uranium.]

1. (Gr. Myth.)

Defn: The son or husband of Gaia (Earth), and father of Chronos (Time) and the Titans.

2. (Astron.)

Defn: One of the primary planets. It is about 1,800,000,000 miles from the sun, about 36,000 miles in diameter, and its period of revolution round the sun is nearly 84 of our years.

Note: This planet has also been called Herschel, from Sir William Herschel, who discovered it in 1781, and who named it Georgium Sidus, in honor of George III., then King of England.

URAN-UTAN
U*ran"-u*tan`, (Zoöl.)

Defn: The orang-utang

URANYL
U"ra*nyl, n. Etym: [Uranium + -yl.] (Chem.)

Defn: The radical UO2, conveniently regarded as a residue of many uranium compounds.

URAO
U*ra"o, n. Etym: [Sp.] (Min.)

Defn: See Trona.

URARE; URARI
U*ra"re, U*ra"ri, n.

Defn: See Curare.

URATE
U"rate, n. Etym: [Cf. F. urate.] (Physiol. Chem.)

Defn: A salt of uric acid; as, sodium urate; ammonium urate.

URATIC
U*rat"ic, (Physiol. Chem.)

Defn: Of or containing urates; as, uratic calculi.

URBAN
Ur"ban, a. Etym: [L. urbanus belonging to the urbs, urbis, a city: cf. F. urbain. Cf. Urbane.]

1. Of or belonging to a city or town; as, an urban population.

2. Belonging to, or suiting, those living in a city; cultivated; polite; urbane; as, urban manners. Urban servitude. See Predial servitude, under Servitude.

URBANE
Ur*bane", a. Etym: [See Urban.]

Defn: Courteous in manners; polite; refined; elegant.

URBANISTE
Ur"ban*iste, n. (Bot.)

Defn: A large and delicious pear or Flemish origin.

URBANITY
Ur*ban"i*ty, n. Etym: [L. urbanitas; cf. F. urbanité.]

1. The quality or state of being urbane; civility or courtesy of manners; politeness; refinement.
The marquis did the honors of his house with the urbanity of his country. W. Irving.

2. Polite wit; facetiousness. [Obs.] Dryden.
Raillery in the sauce of civil entertainment; and without some such tincture of urbanity, good humor falters. L'Estrange.

Syn.
-- Politeness; suavity; affability; courtesy.

URBANIZE
Ur"ban*ize, v. t.

Defn: To render urban, or urbane; to refine; to polish. Howell.

URBICOLAE
Ur*bic"o*læ, n. pl. Etym: [NL., fr. L. urbs, urbis, a city + colere to inhabit.] (Zoöl.)

Defn: An extensive family of butterflies, including those known as skippers (Hesperiadæ).

URBICOLOUS
Ur*bic"o*lous, a.

Defn: Of or pertaining to a city; urban. [R.]

URCEOLAR
Ur"ce*o*lar, a.

Defn: Urceolate.

URCEOLATE; URCELATE
Ur"ce*o*late, Ur"ce*late, a. Etym: [L. urceolus, dim. of urceus a pitcher or waterpot.] (Nat. Hist.)

Defn: Shaped like a pitcher or urn; swelling below, and contrasted at the orifice, as a calyx or corolla.

URCEOLE
Ur"ce*ole, n. Etym: [See Urceolate.] (R. C. Ch.)

Defn: A vessel for water for washing the hands; also, one to hold wine or water.

URCEOLUS
Ur*ce"o*lus, n.; pl. Urceoli. Etym: [L., a little pitcher.] (Bot.)

Defn: Any urn-shaped organ of a plant.

URCHIN
Ur"chin, n. Etym: [OE. urchon, irchon, a hedgehog, OF. ireçon, eriçon, heri, herichon, F. hérisson, a derivative fr. L. ericius, from er a hedgehog, for her; akin to Gr. Herisson.]

1. (Zoöl.)

Defn: A hedgehog.

2. (Zoöl.)

Defn: A sea urchin. See Sea urchin.

3. A mischievous elf supposed sometimes to take the form a hedgehog. "We 'll dress [them] like urchins, ouphes, and fairies." Shak.

4. A pert or roguish child; -- now commonly used only of a boy. And the urchins that stand with their thievish eyes Forever on watch ran off each with a prize. W. Howitt.
You did indeed dissemble, you urchin you; but where's the girl that won't dissemble for an husband Goldsmith.

5. One of a pair in a series of small card cylinders, arranged around a carding drum; -- so called from its fancied resemblance to the hedgehog. Knight. Urchin fish (Zoöl.), a diodon.

URCHIN
Ur"chin, a.

Defn: Rough; pricking; piercing. [R.] "Helping all urchin blasts." Milton.

URCHON
Ur"chon, n. (Zoöl.)

Defn: The urchin, or hedgehog.

URDU
Ur"du, n. Etym: [Hind. urdu.]

Defn: The language more generally called Hindoostanee.

URE
Ure, n. Etym: [OE. ure, OF. oevre, ovre, ouvre, work, F. oeuvre, L. opera. See Opera, Operate, and cf. Inure, Manure.]

Defn: Use; practice; exercise. [Obs.] Fuller.
Let us be sure of this, to put the best in ure That lies in us. Chapman.

URE
Ure, v. t.

Defn: To use; to exercise; to inure; to accustom by practice. [Obs.] The French soldiers . . . from their youth have been practiced and ured in feats of arms. Sir T. More.

UREA
U"re*a, a. Etym: [NL. See Urine.] (Physiol. Chem.)

Defn: A very soluble crystalline body which is the chief constituent of the urine in mammals and some other animals. It is also present in small quantity in blood, serous fluids, lymph, the liver, etc.

Note: It is the main product of the regressive metamorphosis (katabolism) of proteid matter in the body, and is excreted daily to the amount of about 500 grains by a man of average weight. Chemically it is carbamide, CO(NH2)2, and when heated with strong acids or alkalies is decomposed into carbonic acid and ammonia. It unites with acids to form salts, as nitrate of urea, and it can be made synthetically from ammonium cyanate, with which it is isomeric. Urea ferment, a soluble ferment formed by certain bacteria, which, however, yield the ferment from the body of their cells only after they have been killed by alcohol. It causes urea to take up water and decompose into carbonic acid and ammonia. Many different bacteria possess this property, especially Bacterium ureæ and Micrococcus ureæ, which are found abundantly in urines undergoing alkaline fermentation.

UREAL
U"re*al, a.

Defn: Of or pertaining to urea; containing, or consisting of, urea; as, ureal deposits.

UREAMETER
U`re*am"e*ter, n. Etym: [Urea + -meter.] (Physiol. Chem.)

Defn: An apparatus for the determination of the amount of urea in

urine, in which the nitrogen evolved by the action of certain reagents, on a given volume of urine, is collected and measured, and the urea calculated accordingly.

URECHITIN
U`re*chi"tin, n. (Chem.)

Defn: A glucoside extracted from the leaves of a certain plant (Urechitis suberecta) as a bitter white crystalline substance.

URECHITOXIN
U`re*chi*tox"in, n. Etym: [Urechitin + toxic + -in.] (Chem.)

Defn: A poisonous glucoside found accompanying urechitin, and extracted as a bitter white crystalline substance.

UREDO
U*re"do, n. Etym: [L., a blast, blight, a burning itch, fr. urere to burn, to scorch.]

1. (Bot.)

Defn: One of the stages in the life history of certain rusts (Uredinales), regarded at one time as a distinct genus. It is a summer stage preceding the teleutospore, or winter stage. See Uredinales, in the Supplement.

2. (Med.)

Defn: Nettle rash. See Urticaria.

UREDOSPORE
U*re"do*spore, n. (Bot.)

Defn: The thin-walled summer spore which is produced during the so-called Uredo stage of certain rusts. See (in the Supplement) Uredinales, Heteroecious, etc.

UREIDE
U"re*ide, n. (Chem.)

Defn: Any one of the many complex derivatives of urea; thus, hydantoin, and, in an extended dense, guanidine, caffeine, et., are ureides. [Written also ureid.]

-URET
-u*ret.

Defn: A suffix with the same meaning as -ide. See -ide. [Obs.]

URETER
U*re"ter, n. Etym: [NL., fr. Gr. Urine.] (Anat.)

Defn: The duct which conveys the urine from the kidney to the bladder or cloaca. There are two ureters, one for each kidney.

URETERITIS
U*re`ter*i"tis, n. Etym: [NL. See Ureter, and -itis.] (Med.)

Defn: Inflammation of the ureter. Dunglison.

URETHANE
U*reth"ane, n. (Chem.)

Defn: A white crystalline substance, NH2.CO.OC2H5, produced by the action of ammonia on ethyl carbonate. It is used somewhat in medicine as a hypnotic. By extension, any one of the series of related substances of which urethane proper is the type.

URETHRA
U*re"thra, n. Etym: [L., fr. Gr. Urine.] (Anat.)

Defn: The canal by which the urine is conducted from the bladder and discharged.

URETHRAL
U*re"thral, a.

Defn: Of or pertaining to the urethra. Urethral fever (Med.), fever occurring as a consequence of operations upon the urethra.

URETHRITIS
U`re*thri"tis, n. Etym: [NL. See Urethra, and -itis.] (Med.)

Defn: Inflammation of the urethra.

URETHROPLASTY
U*re"thro*plas`ty, n. Etym: [Urethra + -plasty.] (Surg.)

Defn: An operation for the repair of an injury or a defect in the

walls of the urethra.
-- U*re`thro*plas"tic, a.

URETHROSCOPE
U*re"thro*scope, n. Etym: [Urethra + -scope.] (Med.)

Defn: An instrument for viewing the interior of the urethra.

URETHROSCOPY
U`re*thros"co*py, n. (Med.)

Defn: Examination of the urethra by means of the urethroscope.

URETHROTOME
U*re"thro*tome, n. Etym: [Urethra + Gr.

Defn: An instrument for cutting a urethral stricture.

URETHROTOMY
U`re*throt"o*my, n. Etym: [Urethra + Gr. (Surg.)

Defn: An incision of the urethra, esp. incision for relief of urethral stricture.

URETIC
U*ret"ic, a. Etym: [L. ureticus, Gr. Urine.] (Med.)

Defn: Of or pertaining to the urine; diuretic; urinary; as, uretic medicine.

URGE
Urge, v. t. [imp. & p. p. Urged; p. pr. & vb. n. Urging.] Etym: [L. urgere; akin to E. wreak. See Wreak, v. t.]

1. To press; to push; to drive; to impel; to force onward.
Through the thick deserts headlong urged his flight. Pope.

2. To press the mind or will of; to ply with motives, arguments, persuasion, or importunity.
My brother never Did urge me in his act; I did inquire it. Shak.

3. To provoke; to exasperate. [R.]
Urge not my father's anger. Shak.

4. To press hard upon; to follow closely
Heir urges heir, like wave impelling wave. Pope.

5. To present in an urgent manner; to press upon attention; to insist upon; as, to urge an argument; to urge the necessity of a case.

6. To treat with forcible means; to take severe or violent measures with; as, to urge an ore with intense heat.

Syn.
-- To animate; incite; impel; instigate; stimulate; encourage.

URGE
Urge, v. i.

1. To press onward or forward. [R.]

2. To be pressing in argument; to insist; to persist.

URGENCE
Ur"gence, n.

Defn: Urgency. [Obs.]

URGENCY
Ur"gen*cy, n. Etym: [Cf. F. urgence.]

Defn: The quality or condition of being urgent; insistence; pressure; as, the urgency of a demand or an occasion.

URGENT
Ur"gent, a. Etym: [L. urgens, p. pr. of urgere: cf. F. urgent. See Urge.]

Defn: Urging; pressing; besetting; plying, with importunity; calling for immediate attention; instantly important. "The urgent hour." Shak.
Some urgent cause to ordain the contrary. Hooker.
The Egyptians were urgent upon the people that they might send them out of the land in haste. Ex. xii. 33.

URGENTLY
Ur"gent*ly, adv.

Defn: In an urgent manner.

URGER
Ur"ger, n.

Defn: One who urges. Beau. & Fl.

URIC
U"ric, a. Etym: [Gr. urique. See Urine.] (Physiol. Chem.)

Defn: Of or pertaining to urine; obtained from urine; as, uric acid. Uric acid, a crystalline body, present in small quantity in the urine of man and most mammals. Combined in the form of urate of ammonia, it is the chief constituent of the urine of birds and reptiles, forming the white part. Traces of it are also found in the various organs of the body. It is likewise a common constituent, either as the free acid or as a urate, of urinary or renal calculi and of the so-called gouty concretions. From acid urines, uric acid is frequently deposited, on standing in a cool place, in the form of a reddish yellow sediment, nearly always crystalline. Chemically, it is composed of carbon, hydrogen, nitrogen, and oxygen, C5H4N4O3, and by decomposition yields urea, among other products. It can be made synthetically by heating together urea and glycocoll. It was formerly called also lithic acid, in allusion to its occurrence in stone, or calculus.

URIM
U"rim, n. Etym: [Heb. , pl. of , fire light.]

Defn: A part or decoration of the breastplate of the high priest among the ancient Jews, by which Jehovah revealed his will on certain occasions. Its nature has been the subject of conflicting

conjectures.
Thou shall put in the breastplate of judgment the Urim and the Thummim. Ex. xxviii. 30.
And when Saul inquired of the Lord, the Lord answered him not, neither by dreams, nor by Urim, nor by prophets. 1 Sam. xxviii. 6.

Note: Professor Plumptre supposes the Urim to have been a clear and colorless stone set in the breastplate of the high priest as a symbol of light, answering to the mystic scarab in the pectoral plate of the ancient Egyptian priests, and that the Thummim was an image corresponding to that worn by the priestly judges of Egypt as a symbol of truth and purity of motive. By gazing steadfastly on these, he may have been thrown into a mysterious, half ecstatic state, akin to hypnotism, in which he lost all personal consciousness, and received a spiritual illumination and insight.

URINAL
U"ri*nal, n. Etym: [L. urinal, fr. urina urine: cf. F. urinal.]

1. A vessel for holding urine; especially, a bottle or tube for holding urine for inspection.

2. A place or convenience for urinating purposes.

URINARIUM
U`ri*na"ri*um, n. Etym: [LL. urinarium.] (Agric.)

Defn: A reservoir for urine, etc., for manure.

URINARY

U"ri*na*ry, a. Etym: [L. urina urine: cf. F. urinaire.]

1. Of or pertaining to the urine; as, the urinary bladder; urinary excretions.

2. Resembling, or being of the nature of, urine. Urinary calculus (Med.), a concretion composed of some one or more crystalline constituents of the urine, liable to be found in any portion of the urinary passages or in the pelvis of the kidney.
 -- Urinary pigments, (Physiol. Chem.), certain colored substances, urochrome, or urobilin, uroerythrin, etc., present in the urine together with indican, a colorless substance which by oxidation is convertible into colored bodies.

URINARY
U"ri*na*ry, n.

Defn: A urinarium; also, a urinal.

URINATE
U"ri*nate, v. i. Etym: [LL. urinare.]

Defn: To discharge urine; to make water.

URINATION
U`ri*na"tion, n.

Defn: The act or process of voiding urine; micturition.

URINATIVE

U"ri*na*tive, a.

Defn: Provoking the flow of urine; uretic; diuretic. [R.] Bacon.

URINATOR
U"ri*na`tor, n. Etym: [L., from urinari to plunge under water, to dive.]

Defn: One who dives under water in search of something, as for pearls; a diver. [R.] Ray.

URINE
U"rine, n. Etym: [F. urine, L. urina; akin to urinari to plunge under water, to dive, Gr. var water, Icel. drizzling rain, AS. wær the sea.] (Physiol.)

Defn: In mammals, a fluid excretion from the kidneys; in birds and reptiles, a solid or semisolid excretion.

Note: In man, the urine is a clear, transparent fluid of an amber color and peculiar odor, with an average density of 1.02. The average amount excreted in 24 hours is from 40 to 60 ounces (about 1,200 cubic centimeters). Chemically, the urine is mainly an aqueous solution of urea, salt (sodium chloride), and uric acid, together with some hippuric acid and peculiar pigments. It usually has an acid reaction, owing to the presence of acid phosphates of soda or free uric acid. Normally, it contains about 960 parts of water to 40 parts of solid matter, and the daily average excretion is 35 grams (540 grains) of urea, 0.75 gram (11 grains) of uric acid, and 16.5 grams (260 grains) of salt. Abnormally, it may contain sugar as in

diabetes, albumen as in Bright's disease, bile pigments as in jaundice, or abnormal quantities of some one or more of the normal constituents.

URINE
U"rine, v. i.

Defn: To urinate. [Obs.] Bacon.

URINIFEROUS
U`ri*nif"er*ous, a. Etym: [Urine + -ferous.]

Defn: Bearing or conveying urine; as, uriniferous tubules.

URINIPAROUS
U`ri*nip"a*rous, a. Etym: [Urine + L. parere to produce: cf. F. urinipare.] (Physiol.)

Defn: Producing or preparing urine; as, the uriniparous tubes in the cortical portion of the kidney.

URINOGENITAL
U`ri*no*gen"i*tal, a. (Anat.)

Defn: Pertaining to the urinary and genital organs; genitourinary; urogenital; as, the urinogenital canal.

URINOMETER
U`ri*nom"e*ter, n. Etym: [Urine + -meter.]

Defn: A small hydrometer for determining the specific gravity of urine.

URINOMETRY
U`ri*nom"e*try, n.

Defn: The estimation of the specific gravity of urine by the urinometer.

URINOSE; URINOUS
U"ri*nose, U"ri*nous, a. Etym: [Cf. F. urineux. See Urine.]

Defn: Of or pertaining to urine, or partaking of its qualities; having the character or odor of urine; similar to urine. Arbuthnot.

URITE
U"rite, n. Etym: [Gr. (Zoöl.)

Defn: One of the segments of the abdomen or post-abdomen of arthropods.

URITH
U"rith, n.

Defn: The bindings of a hedge. [Obs. or Prov. Eng.] Halliwell.

URN
Urn, n. Etym: [OE. urne, L. urna; perhaps fr. urere to burn, and sop called as being made of burnt clay (cf. East): cf. F. urne.]

USAGE
Us"age, n. Etym: [F. usage, LL. usaticum. See Use.]

1. The act of using; mode of using or treating; treatment; conduct with respect to a person or a thing; as, good usage; ill usage; hard usage.
My brother Is prisoner to the bishop here, at whose hands He hath good usage and great liberty. Shak.

2. Manners; conduct; behavior. [Obs.]
A gentle nymph was found, Hight Astery, excelling all the crew In courteous usage. Spenser.

3. Long-continued practice; customary mode of procedure; custom; habitual use; method. Chaucer.
It has now been, during many years, the grave and decorous usage of Parliaments to hear, in respectful silence, all expressions, acceptable or unacceptable, which are uttered from the throne. Macaulay.

4. Customary use or employment, as of a word or phrase in a particular sense or signification.

5. Experience. [Obs.]
In eld [old age] is both wisdom and usage. Chaucer.

Syn.
-- Custom; use; habit.
-- Usage, Custom. These words, as here compared, agree in expressing the idea of habitual practice; but a custom is not necessarily a usage. A custom may belong to many, or to a single individual. A usage properly belongs to the great body of a people. Hence, we speak of usage, not of custom, as the law of language. Again, a custom is merely that which has been often repeated, so as to have become, in a good degree, established. A usage must be both often repeated and of long standing. Hence, we speak of a "hew custom," but not of a "new usage." Thus, also, the "customs of society" is not so strong an expression as the "usages of society." "Custom, a greater power than nature, seldom fails to make them worship." Locke. "Of things once received and confirmed by use, long usage is a law sufficient." Hooker. In law, the words usage and custom are often used interchangeably, but the word custom also has a technical and restricted sense. See Custom, n., 3.

From henceforth all the whole realm shall have but one use. Pref. to

Book of Common Prayer.

7. The premium paid for the possession and employment of borrowed money; interest; usury. [Obs.]
Thou art more obliged to pay duty and tribute, use and principal, to him. Jer. Taylor.

8. Etym: [In this sense probably a corruption of OF. oes, fr. L. opus need, business, employment, work. Cf. Operate.] (Law)

Defn: The benefit or profit of lands and tenements. Use imports a trust and confidence reposed in a man for the holding of lands. He to whose use or benefit the trust is intended shall enjoy the profits.
An estate is granted and limited to A for the use of B.

9. (Forging)

Defn: A stab of iron welded to the side of a forging, as a shaft, near the end, and afterward drawn down, by hammering, so as to lengthen the forging. Contingent, or Springing, use (Law), a use to come into operation on a future uncertain event.
-- In use. (a) In employment; in customary practice observance. (b) In heat; -- said especially of mares. J. H. Walsh.
-- Of no use, useless; of no advantage.
-- Of use, useful; of advantage; profitable.
-- Out of use, not in employment.
-- Resulting use (Law), a use, which, being limited by the deed, expires or can not vest, and results or returns to him who raised it, after such expiration.
-- Secondary, or Shifting, use, a use which, though executed, may

change from one to another by circumstances. Blackstone.
-- Statute of uses (Eng. Law), the stat. 27 Henry VIII., cap. 10, which transfers uses into possession, or which unites the use and possession.
-- To make use of, To put to use, to employ; to derive service from; to use.

USE
Use, v. t. [imp. & p. p. Used; p. pr. & vb. n. Using.] Etym: [OE. usen, F. user to use, use up, wear out, LL. usare to use, from L. uti, p. p. usus, to use, OL. oeti, oesus; of uncertain origin. Cf. Utility.]

1. To make use of; to convert to one's service; to avail one's self of; to employ; to put a purpose; as, to use a plow; to use a chair; to use time; to use flour for food; to use water for irrigation.
Launcelot Gobbo, use your legs. Shak.
Some other means I have which may be used. Milton.

2. To behave toward; to act with regard to; to treat; as, to use a beast cruelly. "I will use him well." Shak.
How wouldst thou use me now Milton.
Cato has used me ill. Addison.

3. To practice customarily; to make a practice of; as, to use diligence in business.
Use hospitality one to another. 1 Pet. iv. 9.

4. To accustom; to habituate; to render familiar by practice; to inure; -- employed chiefly in the passive participle; as, men used to

cold and hunger; soldiers used to hardships and danger.
I am so used in the fire to blow. Chaucer.
Thou with thy compeers, Used to the yoke, draw'st his triumphant wheels. Milton.
To use one's self, to behave. [Obs.] "Pray, forgive me, if I have used myself unmannerly." Shak.
-- To use up. (a) To consume or exhaust by using; to leave nothing of; as, to use up the supplies. (b) To exhaust; to tire out; to leave no capacity of force or use in; to overthrow; as, he was used up by fatigue. [Colloq.]

Syn.
-- Employ.
-- Use, Employ. We use a thing, or make use of it, when we derive from it some enjoyment or service. We employ it when we turn that service into a particular channel. We use words to express our general meaning; we employ certain technical terms in reference to a given subject. To make use of, implies passivity in the thing; as, to make use of a pen; and hence there is often a material difference between the two words when applied to persons. To speak of "making use of another" generally implies a degrading idea, as if we had used him as a tool; while employ has no such sense. A confidential friend is employed to negotiate; an inferior agent is made use of on an intrigue.
I would, my son, that thou wouldst use the power Which thy discretion gives thee, to control And manage all. Cowper.
To study nature will thy time employ: Knowledge and innocence are perfect joy. Dryden.

USE

Use, v. i.

1. To be wont or accustomed; to be in the habit or practice; as, he used to ride daily; -- now disused in the present tense, perhaps because of the similarity in sound, between "use to," and "used to."
They use to place him that shall be their captain on a stone. Spenser.
Fears use to be represented in an imaginary. Bacon.
Thus we use to say, it is the room that smokes, when indeed it is the fire in the room. South.
Now Moses used to take the tent and to pitch it without the camp. Ex. xxxiii. 7 (Rev. Ver.)

2. To be accustomed to go; to frequent; to inhabit; to dwell; -- sometimes followed by of. [Obs.] "Where never foot did use." Spenser.

Not to sit idle with so great a gift Useless, and thence ridiculous. Milton.

Syn.
-- Fruitless; ineffectual.
-- Useless, Fruitless, Ineffectual. We speak of an attempt, effort, etc., as being useless when there are in it inherent difficulties which forbid the hope of success, as fruitless when it fails, not from any such difficulties, but from some unexpected hindrance arising to frustrate it; as, the design was rendered fruitless by the death of its projector. Ineffectual nearly resembles fruitless, but

implies a failure of a less hopeless character; as, after several ineffectual efforts, I at last succeeded.
Useless are all words Till you have writ "performance" with your swords. The other is for waiving. Beau. & Fl.
Waiving all searches into antiquity, in relation to this controversy, as being either needless or fruitless. Waterland.
Even our blessed Savior's preaching, who spake as never man spake, was ineffectual to many. Bp. Stillingfleet.

Etym: [L. usurpare, usurpatum, to make use of, enjoy, get possession of, usurp; the first part of usurpare is akin to usus use (see Use, n.): cf. F. usurper.]

Defn: To seize, and hold in possession, by force, or without right; as, to usurp a throne; to usurp the prerogatives of the crown; to usurp power; to usurp the right of a patron is to oust or dispossess him.
Alack, thou dost usurp authority. Shak.
Another revolution, to get rid of this illegitimate and usurped government, would of course be perfectly justifiable. Burke.

Note: Usurp is applied to seizure and use of office, functions, powers, rights, etc.; it is not applied to common dispossession of private property.

Syn.
-- To arrogate; assume; appropriate.

USURP
U*surp", v. i.

Defn: To commit forcible seizure of place, power, functions, or the like, without right; to commit unjust encroachments; to be, or act

as, a usurper.
The parish churches on which the Presbyterians and fanatics had usurped. Evelyn.
And now the Spirits of the Mind Are busy with poor Peter Bell; Upon the rights of visual sense Usurping, with a prevalence More terrible than magic spell. Wordsworth.

Defn: Usurpation. [R.] "Beneath man's usurpature." R. Browning.

USURPER
U*surp"er, n.

Defn: One who usurps; especially, one who seizes illegally on sovereign power; as, the usurper of a throne, of power, or of the rights of a patron.
A crown will not want pretenders to claim it, not usurpers, if their power serves them, to possess it. South.

USURPINGLY
U*surp"ing*ly, adv.

Defn: In a usurping manner.

USURY

U"su*ry, n. Etym: [OE. usurie, usure, F. usure, L. usura use, usury, interest, fr. uti, p. p. usus, to use. See Use, v. t.]

1. A premium or increase paid, or stipulated to be paid, for a loan, as of money; interest. [Obs. or Archaic]
Thou shalt not lend upon usury to thy brother; usury of money, usury of victuals, usury of anything that is lent upon usury. Deut. xxiii. 19.
Thou oughtest therefore to have put my money to the exchanges, and then at my coming I should have received mine own with usury. Matt. xxv. 27.
What he borrows from the ancients, he repays with usury of Dryden.

2. The practice of taking interest. [Obs.]
Usury . . . bringeth the treasure of a realm or state into a few Bacon.

3. (Law)

Defn: Interest in excess of a legal rate charged to a borrower for the use of money.

Note: The practice of requiring in repayment of money lent anything more than the amount lent, was formerly thought to be a great moral wrong, and the greater, the more was taken. Now it is not deemed more wrong to take pay for the use of money than for the use of a house, or a horse, or any other property. But the lingering influence of the former opinion, together with the fact that the nature of money makes it easier for the lender to oppress the borrower, has caused nearly all Christian nations to fix by law the rate of compensation for the

use of money. Of late years, however, the opinion that money should be borrowed and repaid, or bought and sold, upon whatever terms the parties should agree to, like any other property, has gained ground everywhere. Am. Cyc.

UTILITARIAN
U*til`i*ta"ri*an, n.

Defn: One who holds the doctrine of utilitarianism.
The utilitarians are for merging all the particular virtues into one,

and would substitute in their place the greatest usefulness, as the alone principle to which every question respecting the morality of actions should be referred. Chalmers.
But what is a utilitarian Simply one who prefers the useful to the useless; and who does not Sir W. Hamilton.

UTILITARIANISM
U*til`i*ta"ri*an*ism, n.

1. The doctrine that the greatest happiness of the greatest number should be the end and aim of all social and political institutions. Bentham.

2. The doctrine that virtue is founded in utility, or that virtue is defined and enforced by its tendency to promote the highest happiness of the universe. J. S. Mill.

3. The doctrine that utility is the sole standard of morality, so that the rectitude of an action is determined by its usefulness.

UTILITY
U*til"i*ty, n. Etym: [OE. utilite, F. utilité, L. utilitas, fr. utilis useful. See Utile.]

1. The quality or state of being useful; usefulness; production of good; profitableness to some valuable end; as, the utility of manure upon land; the utility of the sciences; the utility of medicines.
The utility of the enterprises was, however, so great and obvious that all opposition proved useless. Macaulay.

2. (Polit. Econ.)

Defn: Adaptation to satisfy the desires or wants; intrinsic value. See Note under Value, 2.

3. Happiness; the greatest good, or happiness, of the greatest number, -- the foundation of utilitarianism. J. S. Mill.

Syn.
-- Usefulness; advantageous; benefit; profit; avail; service.
-- Utility, Usefulness. Usefulness has an Anglo-Saxon prefix, utility is Latin; and hence the former is used chiefly of things in the concrete, while the latter is employed more in a general and abstract sense. Thus, we speak of the utility of an invention, and the usefulness of the thing invented; of the utility of an institution, and the usefulness of an individual. So beauty and utility (not usefulness) are brought into comparison. Still, the words are often used interchangeably.

V

1. V, the twenty-second letter of the English alphabet, is a vocal consonant. V and U are only varieties of the same character, U being the cursive form, while V is better adapted for engraving, as in stone. The two letters were formerly used indiscriminately, and till a comparatively recent date words containing them were often classed together in dictionaries and other books of reference (see U). The letter V is from the Latin alphabet, where it was used both as a

consonant (about like English w) and as a vowel. The Latin derives it from it from a form (V) of the Greek vowel UPSILON (see Y), this Greek letter being either from the same Semitic letter as the digamma F (see F), or else added by the Greeks to the alphabet which they took from the Semitic. Etymologically v is most nearly related to u, w, f, b, p; as in vine, wine; avoirdupois, habit, have; safe, save; trover, troubadour, trope. See U, F, etc. See Guide to Pronunciation, § 265; also §§ 155, 169, 178-179, etc.

2. As a numeral, V stands for five, in English and Latin.

1. (Physics)

Defn: Any substance in the gaseous, or aëriform, state, the condition of which is ordinarily that of a liquid or solid.

Note: The term vapor is sometimes used in a more extended sense, as identical with gas; and the difference between the two is not so much one of kind as of degree, the latter being applied to all permanently elastic fluids except atmospheric air, the former to those elastic fluids which lose that condition at ordinary temperatures. The atmosphere contains more or less vapor of water, a portion of which, on a reduction of temperature, becomes condensed into liquid water in

the form of rain or dew. The vapor of water produced by boiling, especially in its economic relations, is called steam.
Vapor is any substance in the gaseous condition at the maximum of density consistent with that condition. This is the strict and proper meaning of the word vapor. Nichol.

2. In a loose and popular sense, any visible diffused substance floating in the atmosphere and impairing its transparency, as smoke, fog, etc.
The vapour which that fro the earth glood [glided]. Chaucer.

VARIETY

Va*ri"e*ty, n.; pl. Varieties. Etym: [L. varietas: cf. F. variété. See Various.]

1. The quality or state of being various; intermixture or succession of different things; diversity; multifariousness.

Variety is nothing else but a continued novelty. South.

The variety of colors depends upon the composition of light. Sir I. Newton.

For earth this variety from heaven. Milton.

There is a variety in the tempers of good men. Atterbury.

2. That which is various. Specifically: --

(a) A number or collection of different things; a varied assortment; as, a variety of cottons and silks.

He . . . wants more time to do that variety of good which his soul thirsts after. Law.

(b) Something varying or differing from others of the same general kind; one of a number of things that are akin; a sort; as, varieties of wood, land, rocks, etc.

(c) (Biol.) An individual, or group of individuals, of a species differing from the rest in some one or more of the characteristics typical of the species, and capable either of perpetuating itself for a period, or of being perpetuated by artificial means; hence, a subdivision, or peculiar form, of a species.

Note: Varieties usually differ from species in that any two, however unlike, will generally propagate indefinitely (unless they are in their nature unfertile, as some varieties of rose and other

cultivated plants); in being a result of climate, food, or other extrinsic conditions or influences, but generally by a sudden, rather than a gradual, development; and in tending in many cases to lose their distinctive peculiarities when the individuals are left to a state of nature, and especially if restored to the conditions that are natural to typical individuals of the species. Many varieties of domesticated animals and of cultivated plants have been directly produced by man.
(d) In inorganic nature, one of those forms in which a species may occur, which differ in minor characteristics of structure, color, purity of composition, etc.

Note: These may be viewed as variations from the typical species in its most perfect and purest form, or, as is more commonly the case, all the forms, including the latter, may rank as Varieties. Thus, the sapphire is a blue variety, and the ruby a red variety, of corundum; again, calcite has many Varieties differing in form and structure, as Iceland spar, dogtooth spar, satin spar, and also others characterized by the presence of small quantities of magnesia, iron, manganese, etc. Still again, there are Varieties of granite differing in structure, as graphic granite, porphyritic granite, and other Varieties differing in composition, as albitic granite, hornblendic, or syenitic, granite, etc. Geographical variety (Biol.), a variety of any species which is coincident with a geographical region, and is usually dependent upon, or caused by, peculiarities of climate.
-- Variety hybrid (Biol.), a cross between two individuals of different varieties of the same species; a mongrel.

Syn.
-- Diversity; difference; kind.

-- Variety, Diversity. A man has a variety of employments when he does many things which are not a mere repetition of the same act; he has a diversity of employments when the several acts performed are unlike each other, that is, diverse. In most cases, where there is variety there will be more or less of diversity, but not always. One who sells railroad tickets performs a great variety of acts in a day, while there is but little diversity in his employment.
All sorts are here that all the earth yields! Variety without end. Milton.
But see in all corporeal nature's scene, What changes, what diversities, have been! Blackmore.

fibers.
-- Vegetable sponge. See 1st Loof.
-- Vegetable sulphur, the fine highly inflammable spores of the club moss (Lycopodium clavatum); witch.
-- Vegetable tallow, a substance resembling tallow, obtained from various plants; as, Chinese vegetable tallow, obtained from the seeds of the tallow tree. Indian vegetable tallow is a name sometimes given to piney tallow.
-- Vegetable wax, a waxy excretion on the leaves or fruits of certain plants, as the bayberry. Vegetable kingdom (Nat. Hist.), that primary division of living things which includes all plants. The classes of the vegetable kingdom have been grouped differently by various botanists. The following is one of the best of the many arrangements of the principal subdivisions. I. Phænogamia (called also Phanerogamia).

Defn: Plants having distinct flowers and true seeds. { 1. Dicotyledons (called also Exogens).
-- Seeds with two or more cotyledons. Stems with the pith, woody fiber, and bark concentrically arranged. Divided into two subclasses: Angiosperms, having the woody fiber interspersed with dotted or annular ducts, and the seed contained in a true ovary; Gymnosperms, having few or no ducts in the woody fiber, and the seeds naked. 2. Monocotyledons (called also Endogens).
-- Seeds with single cotyledon. Stems with slender bundles of woody fiber not concentrically arranged, and with no true bark.} II. Cryptogamia.

Defn: Plants without true flowers, and reproduced by minute spores of various kinds, or by simple cell division. { 1. Acrogens.

-- Plants usually with distinct stems and leaves, existing in two alternate conditions, one of which is nonsexual and sporophoric, the other sexual and oöphoric. Divided into Vascular Acrogens, or Pteridophyta, having the sporophoric plant conspicuous and consisting partly of vascular tissue, as in Ferns, Lycopods, and Equiseta, and Cellular Acrogens, or Bryophyta, having the sexual plant most conspicuous, but destitute of vascular tissue, as in Mosses and Scale Mosses. 2. Thallogens.
-- Plants without distinct stem and leaves, consisting of a simple or branched mass of cellular tissue, or educed to a single cell. Reproduction effected variously. Divided into Algæ, which contain chlorophyll or its equivalent, and which live upon air and water, and Fungi, which contain no chlorophyll, and live on organic matter. (Lichens are now believed to be fungi parasitic on included algæ.}

Note: Many botanists divide the Phænogamia primarily into Gymnosperms and Angiosperms, and the latter into Dicotyledons and Monocotyledons. Others consider Pteridophyta and Bryophyta to be separate classes. Thallogens are variously divided by different writers, and the places for diatoms, slime molds, and stoneworts are altogether uncertain. For definitions, see these names in the Vocabulary.

Ve*loc"i*pede, n. Etym: [L. velox, -ocis, swift + pes, pedis, a foot. See Velocity, and Foot.]

Defn: A light road carriage propelled by the feet of the rider. Originally it was propelled by striking the tips of the toes on the roadway, but commonly now by the action of the feet on a pedal or pedals connected with the axle of one or more of the wheels, and causing their revolution. They are made in many forms, with two, three, or four wheels. See Bicycle, and Tricycle.

VELOCIPEDIST
Ve*loc"i*pe`dist, n.

Defn: One who rides on a velocipede.

VELOCITY

Ve*loc"i*ty, n.; pl. Velocities. Etym: [L. velocitas, from velox, -ocis, swift, quick; perhaps akin to v to fly (see Volatile): cf. F. vélocité.]

1. Quickness of motion; swiftness; speed; celerity; rapidity; as, the velocity of wind; the velocity of a planet or comet in its orbit or course; the velocity of a cannon ball; the velocity of light.

Note: In such phrases, velocity is more generally used than celerity. We apply celerity to animals; as, a horse or an ostrich runs with celerity; but bodies moving in the air or in ethereal space move with greater or less velocity, not celerity. This usage is arbitrary, and perhaps not universal.

2. (Mech.)

Defn: Rate of motion; the relation of motion to time, measured by the number of units of space passed over by a moving body or point in a unit of time, usually the number of feet passed over in a second. See the Note under Speed. Angular velocity. See under Angular.
-- Initial velocity, the velocity of a moving body at starting; especially, the velocity of a projectile as it leaves the mouth of a firearm from which it is discharged.
-- Relative velocity, the velocity with which a body approaches or recedes from another body, whether both are moving or only one.
-- Uniform velocity, velocity in which the same number of units of space are described in each successive unit of time.
-- Variable velocity, velocity in which the space described varies from instant, either increasing or decreasing; -- in the former case called accelerated velocity, in the latter, retarded velocity; the

acceleration or retardation itself being also either uniform or variable.
-- Virtual velocity. See under Virtual.

Note: In variable velocity, the velocity, strictly, at any given instant, is the rate of motion at that instant, and is expressed by the units of space, which, if the velocity at that instant were continued uniform during a unit of time, would be described in the unit of time; thus, the velocity of a falling body at a given instant is the number of feet which, if the motion which the body has at that instant were continued uniformly for one second, it would pass through in the second. The scientific sense of velocity differs from the popular sense in being applied to all rates of motion, however slow, while the latter implies more or less rapidity or quickness of motion.

Syn.
-- Swiftness; celerity; rapidity; fleetness; speed.

VELOURS
Ve*lours", n. Etym: [F. See Velure.]

Defn: One of many textile fabrics having a pile like that of velvet.

Defn: Of or pertaining to veins; venous; as, venal blood. [R.]

VENAL
Ve"nal, a. Etym: [L. venalis, from venus sale; akin to Gr. vasna: cf. F. vénal.]

Defn: Capable of being bought or obtained for money or other valuable consideration; made matter of trade or barter; held for sale; salable; mercenary; purchasable; hireling; as, venal services. " Paid court to venal beauties." Macaulay.
The venal cry and prepared vote of a passive senate. Burke.

Syn.
-- Mercenary; hireling; vendible.
-- Venal, Mercenary. One is mercenary who is either actually a hireling (as, mercenary soldiers, a mercenary judge, etc.), or is governed by a sordid love of gain; hence, we speak of mercenary motives, a mercenary marriage, etc. Venal goes further, and supposes either an actual purchase, or a readiness to be purchased, which places a person or thing wholly in the power of the purchaser; as, a venal press. Brissot played ingeniously on the latter word in his celebrated saying, " My pen is venal that it may not be mercenary," meaning that he wrote books, and sold them to the publishers, in order to avoid the necessity of being the hireling of any political party.
Thus needy wits a vile revenue made, And verse became a mercenary trade. Dryden.
This verse be thine, my friend, nor thou refuse This, from no venal or ungrateful muse. Pope.

4. (Nat. Hist.)

Defn: Capable of turning; freely movable; as, a versatile anther, which is fixed at one point to the filament, and hence is very easily turned around; a versatile toe of a bird.
-- Ver"sa*tile*ly, adv.
-- -- Ver"sa*tile*ness, n.

VERSATILITY
Ver`sa*til"i*ty, n. Etym: [Cf. F. versatilité.]

Defn: The quality or state of being versatile; versatileness.

VERS DE SOCIETE
Vers` de so`cié`té". Etym: [F.]

Defn: See Society verses, under Society.

VERSE
Verse, n. Etym: [OE. vers, AS. fers, L. versus a line in writing, and, in poetry, a verse, from vertere, versum, to turn, to turn round; akin to E. worth to become: cf. F. vers. See Worth to become, and cf. Advertise, Averse, Controversy, Convert, Divers, Invert, Obverse, Prose, Suzerain, Vortex.]

1. A line consisting of a certain number of metrical feet (see Foot, n., 9) disposed according to metrical rules.

Note: Verses are of various kinds, as hexameter, pentameter, tetrameter, etc., according to the number of feet in each. A verse of twelve syllables is called an Alexandrine. Two or more verses form a

stanza or strophe.

2. Metrical arrangement and language; that which is composed in metrical form; versification; poetry.
Such prompt eloquence Flowed from their lips in prose or numerous verse. Milton.
Virtue was taught in verse. Prior.
Verse embalms virtue. Donne.

3. A short division of any composition. Specifically: --
(a) A stanza; a stave; as, a hymn of four verses.

Note: Although this use of verse is common, it is objectionable, because not always distinguishable from the stricter use in the sense of a line.
(b) (Script.) One of the short divisions of the chapters in the Old and New Testaments.

Note: The author of the division of the Old Testament into verses is not ascertained. The New Testament was divided into verses by Robert Stephens [or Estienne], a French printer. This arrangement appeared for the first time in an edition printed at Geneva, in 1551.
(c) (Mus.) A portion of an anthem to be performed by a single voice to each part.

4. A piece of poetry. "This verse be thine." Pope. Blank verse, poetry in which the lines do not end in rhymes.
-- Heroic verse. See under Heroic.

Defn: The reverse, or left-hand, page of a book or a folded sheet of paper; -- opposed to recto.

VERSOR
Ver"sor, n. Etym: [NL., fr. L. vertere, versus, to turn. See Version.] (Geom.)

Defn: The turning factor of a quaternion.

Note: The change of one vector into another is considered in quaternions as made up of two operations; 1st, the rotation of the first vector so that it shall be parallel to the second; 2d, the change of length so that the first vector shall be equal to the second. That which expresses in amount and kind the first operation is a versor, and is denoted geometrically by a line at right angles to the plane in which the rotation takes place, the length of this line being proportioned to the amount of rotation. That which expresses the second operation is a tensor. The product of the versor and tensor expresses the total operation, and is called a quaternion. See Quaternion. Quadrantal versor. See under Quadrantal.

VERST
Verst, n. Etym: [Russ. versta: cf. F. verste.]

Defn: A Russian measure of length containing 3,500 English feet. [Written also werst.]

(b) The right or privilege of cutting growing wood.

2. (Her.)

Defn: The color green, represented in a drawing or engraving by parallel lines sloping downward toward the right.

VERTEBER
Ver"te*ber, n.

Defn: A vertebra. [Obs.]

VERTEBRA
Ver"te*bra, n.; pl. Vertebræ. Etym: [L. vertebra, fr. vertere to turn, change. See Verse.]

1. (Anat.)

Defn: One of the serial segments of the spinal column.

Note: In many fishes the vertebræ are simple cartilaginous disks or short cylinders, but in the higher vertebrates they are composed of many parts, and the vertebræ in different portions of the same column vary very greatly. A well-developed vertebra usually consists of a more or less cylindrical and solid body, or centrum, which is surmounted dorsally by an arch, leaving an opening which forms a part of the canal containing the spinal cord. From this dorsal, or neural, arch spring various processes, or apophyses, which have received special names: a dorsal, or neural, spine, spinous process, or neurapophysis, on the middle of the arch; two anterior and two posterior articular processes, or zygapophyses; and one or two transverse processes on each side. In those vertebræ which bear well-developed ribs, a tubercle near the end of the rib articulates at a tubercular facet on the transverse process (diapophysis), while the end, or head, of the rib articulates at a more ventral capitular facet which is sometimes developed into a second, or ventral, transverse process (parapophysis). In vertebrates with well-developed hind limbs, the spinal column is divided into five regions in each of which the vertebræ are specially designated: those vertebræ in front of, or anterior to, the first vertebra which bears ribs connected with the sternum are cervical; all those which bear ribs and are back of the cervicals are dorsal; the one or more directly supporting the pelvis are sacral and form the sacrum; those between the sacral and dorsal are lumbar; and all those back of the sacral are caudal, or coccygeal. In man there are seven cervical vertebræ, twelve dorsal,

five lumbar, five sacral, and usually four, but sometimes five and rarely three, coccygeal.

2. (Zoöl.)

Defn: One of the central ossicles in each joint of the arms of an ophiuran.

VERTEBRAL
Ver"te*bral, a. Etym: [Cf. F. vertébral.]

1. (Anat.)

Defn: Of or pertaining to a vertebræ, or the vertebral column; spinal; rachidian.

2. Vertebrate.

VERTEBRAL
Ver"te*bral, n. (Zoöl.)

Defn: A vertebrate. [R.]

VERTEBRALLY
Ver"te*bral*ly, adv. (Anat.)

Defn: At or within a vertebra or vertebræ; -- distinguished from interverterbrally.

VERTEBRARTERIAL

Ver`te*brar*te"ri*al, a. (Anat.)

Defn: Of or pertaining to a vertebræ and an artery; -- said of the foramina in the transverse processes of cervical vertebræ and of the canal which they form for the vertebral artery and vein.

VERTEBRATA
Ver`te*bra"ta, n. pl. Etym: [NL.] (Zoöl.)

Defn: One of the grand divisions of the animal kingdom, comprising all animals that have a backbone composed of bony or cartilaginous vertebræ, together with Amphioxus in which the backbone is represented by a simple undivided notochord. The Vertebrata always have a dorsal, or neural, cavity above the notochord or backbone, and a ventral, or visceral, cavity below it. The subdivisions or classes of Vertebrata are Mammalia, Aves, Reptilia, Amphibia, Pisces, Marsipobranchia, and Leptocardia.

VERTEBRATE
Ver"te*brate, n. (Zoöl.)

Defn: One of the Vertebrata.

VERTEBRATE; VERTEBRATED
Ver"te*brate, Ver"te*bra`ted, a. Etym: [L. vertebratus.]

1. (Anat.)

Defn: Having a backbone, or vertebral column, containing the spinal marrow, as man, quadrupeds, birds, amphibia, and fishes.

2. (Bot.)

Defn: Contracted at intervals, so as to resemble the spine in animals. Henslow.

3. (Zoöl.)

Defn: Having movable joints resembling vertebræ; -- said of the arms ophiurans.

4. (Zoöl.)

Defn: Of or pertaining to the Vertebrata; -- used only in the form vertebrate.

VERTEBRE
Ver"te*bre, n. (Anat.)

Defn: A vertebra. [Obs.]

VERTEBRO-
Ver"te*bro-.

Defn: A combining form used in anatomy to indicate connection with, or relation to, a vertebra, vertebræ, or vertebral column; as in vertebrocostal.

VERTEBRO-ILIAC
Ver"te*bro-il"i*ac, a. (Anat.)

Defn: Iliolumbar.

VERTEX
Ver"tex, n.; pl. Vertexes, L. Vertices. Etym: [L. vertex, -icis, a whirl, top of the head, top, summit, from vertere to turn. See Verse, and cf. Vortex.]

Defn: A turning point; the principal or highest point; top; summit; crown; apex. Specifically: --(a) (Anat.)

Defn: The top, or crown, of the head.
(b) (Anat.) The zenith, or the point of the heavens directly overhead.
(c) (Math.) The point in any figure opposite to, and farthest from, the base; the terminating point of some particular line or lines in a figure or a curve; the top, or the point opposite the base.

Note: The principal vertex of a conic section is, in the parabola, the vertex of the axis of the curve: in the ellipse, either extremity of either axis, but usually the left-hand vertex of the transverse axis; in the hyperbola, either vertex, but usually the right-hand vertex of the transverse axis. Vertex of a curve (Math.), the point in which the axis of the curve intersects it.
-- Vertex of an angle (Math.), the point in which the sides of the angle meet.
-- Vertex of a solid, or of a surface of revolution (Math.), the point in which the axis pierces the surface.

VERTICAL

Ver"ti*cal, a. Etym: [Cf. F. vertical. See Vertex.]

1. Of or pertaining to the vertex; situated at the vertex, or highest point; directly overhead, or in the zenith; perpendicularly above one.
Charity . . . is the vertical top of all religion. Jer. Taylor.

2. Perpendicular to the plane of the horizon; upright; plumb; as, a vertical line. Vertical angle (Astron. & Geod.), an angle measured on a vertical circle, called an angle of elevation, or altitude, when reckoned from the horizon upward, and of depression when downward below the horizon.
-- Vertical anthers (Bot.), such anthers as stand erect at the top of the filaments.
-- Vertical circle (Astron.), an azimuth circle. See under Azimuth.
-- Vertical drill, an drill. See under Upright.
-- Vertical fire (Mil.), the fire, as of mortars, at high angles of elevation.
-- Vertical leaves (Bot.), leaves which present their edges to the earth and the sky, and their faces to the horizon, as in the Australian species of Eucalyptus.
-- Vertical limb, a graduated arc attached to an instrument, as a theodolite, for measuring vertical angles.
-- Vertical line. (a) (Dialing) A line perpendicular to the horizon. (b) (Conic Sections) A right line drawn on the vertical plane, and passing through the vertex of the cone. (c) (Surv.) The direction of a plumb line; a line normal to the surface of still water. (d) (Geom., Drawing, etc.) A line parallel to the sides of a page or sheet, in distinction from a horizontal line parallel to the top or bottom.

-- Vertical plane. (a) (Conic Sections) A plane passing through the vertex of a cone, and through its axis. (b) (Projections) Any plane which passes through a vertical line. (c) (Persp.) The plane passing through the point of sight, and perpendicular to the ground plane, and also to the picture.
-- Vertical sash, a sash sliding up and down. Cf. French sash, under 3d Sash.
-- Vertical steam engine, a steam engine having the crank shaft vertically above or below a vertical cylinder.

VERTICAL
Ver"ti*cal, n.

1. Vertical position; zenith. [R.]

2. (Math.)

Defn: A vertical line, plane, or circle. Prime vertical, Prime vertical dial. See under Prime, a.

VERTICALITY
Ver`ti*cal"i*ty, n.

Defn: The quality or state of being vertical; verticalness. [R.]
The different points of the verticality. Sir T. Browne.

VERTICALLY
Ver"ti*cal*ly, adv.

Defn: In a vertical manner, position, or direction; perpendicularly;

as, to look down vertically; to raise a thing vertically.

VERTICALNESS
Ver"ti*cal*ness, n.

Defn: Quality or state of being vertical.

VERTICIL
Ver"ti*cil, n. Etym: [L. verticillus, dim. of vertex a whirl: cf. F. verticille. See Vertex.] (Bot.)

VOICE

Voice, n. Etym: [OE. vois, voys, OF. vois, voiz, F. voix, L. vox, vocis, akin to Gr. vac to say, to speak, G. erwähnen to mention. Cf. Advocate, Advowson, Avouch, Convoke, Epic, Vocal, Vouch, Vowel.]

1. Sound uttered by the mouth, especially that uttered by human beings in speech or song; sound thus uttered considered as possessing some special quality or character; as, the human voice; a pleasant voice; a low voice.
He with a manly voice saith his message. Chaucer.
Her voice was ever soft, Gentle, and low; an excellent thing in woman. Shak.
Thy voice is music. Shak.
Join thy voice unto the angel choir. Milton.

2. (Phon.)

Defn: Sound of the kind or quality heard in speech or song in the consonants b, v, d, etc., and in the vowels; sonant, or intonated, utterance; tone; -- distinguished from mere breath sound as heard in f, s, sh, etc., and also whisper.

Note: Voice, in this sense, is produced by vibration of the so-called vocal cords in the larynx (see Illust. of Larynx) which act upon the air, not in the manner of the strings of a stringed instrument, but as a pair of membranous tongues, or reeds, which, being continually forced apart by the outgoing current of breath, and continually brought together again by their own elasticity and muscular tension, break the breath current into a series of puffs, or pulses, sufficiently rapid to cause the sensation of tone. The power, or loudness, of such a tone depends on the force of the separate pulses,

and this is determined by the pressure of the expired air, together with the resistance on the part of the vocal cords which is continually overcome. Its pitch depends on the number of aërial pulses within a given time, that is, on the rapidity of their succession. See Guide to Pronunciation, §§ 5, 146, 155.

3. The tone or sound emitted by anything.
After the fire a still small voice. 1 Kings xix. 12.
Canst thou thunder with a voice like him Job xl. 9.

of the Lord your God. Deut. viii. 20.

8. One who speaks; a speaker. "A potent voice of Parliament." Tennyson.

9. (Gram.)

Defn: A particular mode of inflecting or conjugating verbs, or a particular form of a verb, by means of which is indicated the relation of the subject of the verb to the action which the verb expresses. Active voice (Gram.), that form of the verb by which its subject is represented as the agent or doer of the action expressed by it.
-- Chest voice (Phon.), a kind of voice of a medium or low pitch and of a sonorous quality ascribed to resonance in the chest, or thorax; voice of the thick register. It is produced by vibration of the vocal cords through their entire width and thickness, and with convex surfaces presented to each other.
-- Head voice (Phon.), a kind of voice of high pitch and of a thin quality ascribed to resonance in the head; voice of the thin register; falsetto. In producing it, the vibration of the cords is limited to their thin edges in the upper part, which are then presented to each other.
-- Middle voice (Gram.), that form of the verb by which its subject is represented as both the agent, or doer, and the object of the action, that is, as performing some act to or upon himself, or for his own advantage.
-- Passive voice. (Gram.) See under Passive, a.

VOLITATION
Vol`i*ta"tion, n. Etym: [L. volitare, volitatum, to fly to and fro, v. freq. from volare to fly.]

Defn: The act of flying; flight. [R.] Sir T. Browne.

VOLITIENT
Vo*li"tient, a. Etym: [See Volition.]

Defn: Exercising the will; acting from choice; willing, or having power to will. "What I do, I do volitient, not obedient." Mrs. Browning.

VOLITION
Vo*li"tion, n. Etym: [F., fr. L. volo I will, velle to will, be willing. See Voluntary.]

1. The act of willing or choosing; the act of forming a purpose; the exercise of the will.
Volition is the actual exercise of the power the mind has to order the consideration of any idea, or the forbearing to consider it. Locke.
Volition is an act of the mind, knowingly exerting that dominion it takes itself to have over any part of the man, by employing it in, or withholding it from, any particular action. Locke.

2. The result of an act or exercise of choosing or willing; a state of choice.

3. The power of willing or determining; will.

Syn.
-- Will; choice; preference; determination; purpose.
-- Volition, Choice. Choice is the familiar, and volition the scientific, term for the same state of the will; viz., an "elective

preference." When we have "made up our minds" (as we say) to a thing, i. e., have a settled state of choice respecting it, that state is called an immanent volition; when we put forth any particular act of choice, that act is called an emanent, or executive, or imperative, volition. When an immanent, or settled state of, choice, is one which controls or governs a series of actions, we call that state a predominant volition; while we give the name of subordinate volitions to those particular acts of choice which carry into effect the object sought for by the governing or "predominant volition." See Will.

VOLITIONAL
Vo*li"tion*al, a.

Defn: Belonging or relating to volition. "The volitional impulse." Bacon.

VOLITIVE
Vol"i*tive, a. Etym: [See Volition.]

1. Of or pertaining to the will; originating in the will; having the power to will. "They not only perfect the intellectual faculty, but the volitive." Sir M. Hale.

a center makes two concentric tracks.

2. (Fencing)

Defn: A sudden movement to avoid a thrust.

VOLT
Volt, n. Etym: [After Alessandro Volta, the Italian electrician.] (Elec.)

Defn: The unit of electro-motive force; -- defined by the International Electrical Congress in 1893 and by United States Statute as, that electro-motive force which steadily applied to a conductor whose resistance is one ohm will produce a current of one ampère. It is practically equivalent to

VOLTA
Vol"ta, n.; pl. Volte. Etym: [It. volta a turn, turning, a time. See Volt a tread.] (Mus.)

Defn: A turning; a time; -- chiefly used in phrases signifying that the part is to be repeated one, two, or more times; as, una volta, once. Seconda volta, second time, points to certain modifications in the close of a repeated strain.

VOLTA-ELECTRIC
Vol"ta-e*lec"tric, a.

Defn: Of or pertaining to voltaic electricity, or voltaism.

VOLTA-ELECTROMETER
Vol`ta-e`lec*trom"e*ter, n.

Defn: An instrument for the exact measurement of electric currents.

VOLTAGE
Vol"tage, n. (Elec.)

Defn: Electric potential or potential difference, expressed in volts.

VOLTAGRAPHY
Vol*tag"ra*phy, n. Etym: [Voltaic + -graphy.]

Defn: In electrotypy, the act or art of copying, in metals deposited by electrolytic action, a form or pattern which is made the negative electrode. [R.]

VOLTAIC
Vol*ta"ic, a. Etym: [Cf. F. voltaïque, It. voltaico.]

1. Of or pertaining to Alessandro Volta, who first devised apparatus for developing electric currents by chemical action, and established this branch of electric science; discovered by Volta; as, voltaic electricity.

2. Of or pertaining to voltaism, or voltaic electricity; as, voltaic induction; the voltaic arc.

Note: See the Note under Galvanism. Voltaic arc, a luminous arc, of intense brilliancy, formed between carbon points as electrodes by the

passage of a powerful voltaic current.
-- Voltaic battery, an apparatus variously constructed, consisting of a series of plates or pieces of dissimilar metals, as copper and zinc, arranged in pairs, and subjected to the action of a saline or acid solution, by which a current of electricity is generated whenever the two poles, or ends of the series, are connected by a conductor; a galvanic battery. See Battery, 4. (b), and Note.
-- Voltaic circuit. See under Circuit.
-- Voltaic couple or element, a single pair of the connected plates of a battery.
-- Voltaic electricity. See the Note under Electricity.
-- Voltaic pile, a kind of voltaic battery consisting of alternate disks of dissimilar metals, separated by moistened cloth or paper. See 5th Pile.
-- Voltaic protection of metals, the protection of a metal exposed to the corrosive action of sea water, saline or acid liquids, or the like, by associating it with a metal which is positive to it, as when iron is galvanized, or coated with zinc.

VOLTAIREAN
Vol*tair"e*an, a. Etym: [Cf. F. voltairien.]

Defn: Of or relating to Voltaire, the French author. J. Morley.

VOLTAIRISM
Vol*tair"ism, n.

Defn: The theories or practice of Voltaire. J. Morley.

VOLTAISM

Vol"ta*ism, n. Etym: [Cf. F. voltaïsme.] (Physics)

Defn: That form of electricity which is developed by the chemical action between metals and different liquids; voltaic electricity; also, the science which treats of this form of electricity; -- called also galvanism, from Galvani, on account of his experiments showing the remarkable influence of this agent on animals.

VOLTAMETER
Vol*tam"e*ter, n. Etym: [Voltaic + -meter.] (Physics)

Defn: An instrument for measuring the voltaic electricity passing through it, by its effect in decomposing water or some other chemical compound acting as an electrolyte.

VOLTAMMETER
Volt*am"me`ter, n.

Defn: A wattmeter.

VOLT AMPERE
Volt ampère. (Elec.)

Defn: A unit of electric measurement equal to the product of a volt and an ampere. For direct current it is a measure of power and is the same as a watt; for alternating current it is a measure of apparent power.

VOLTAPLAST
Vol"ta*plast, n. Etym: [Voltaic + Gr.

Defn: A form of voltaic, or galvanic, battery suitable for use electrotyping. G. Francis.

VOLTATYPE
Vol"ta*type, n. Etym: [Voltaic + type.]

Defn: An electrotype. [R.]

VOLTI
Vol"ti, imperative. Etym: [It., fr. voltare to turn. See Volt a tread.] (Mus.)

Defn: Turn, that is, turn over the leaf. Volti subito Etym: [It.] (Mus.), turn over quickly.

VOLTIGEUR
Vol`ti*geur, n. Etym: [F., fr. voltiger to vault, It. volteggiare. See Volt a tread.]

1. A tumbler; a leaper or vaulter.

2. (Mil.)

Defn: One of a picked company of irregular riflemen in each regiment of the French infantry.

VOLTMETER
Volt"me`ter, n. Etym: [2d volt + -meter.] (elec.)

Defn: An instrument for measuring in volts the differences of potential between different points of an electrical circuit.

VOLTZITE
Voltz"ite, n. Etym: [So named in honor of Voltz, a French engineer.] (Min.)

Defn: An oxysulphide of lead occurring in implanted spherical globules of a yellowish or brownish color; -- called also voltzine.

VOLUBILATE; VOLUBILE
Vo*lu"bi*late, Vol"u*bile}, a. Etym: [See Voluble.]

Defn: Turning, or whirling; winding; twining; voluble.

VOLUBILITY
Vol`u*bil"i*ty, n. Etym: [L. volubilitas: cf. F. volubilité.]

Defn: The quality or state of being voluble (in any of the senses of the adjective).

VOLUBLE
Vol"u*ble, a. Etym: [L. volubilis, fr. volvere, volutum, to roll, to turn round; akin to Gr. welle a wave: cf. F. voluble. Cf. F. Well of water, Convolvulus, Devolve, Involve, Revolt, Vault an arch, Volume, Volute.]

1. Easily rolling or turning; easily set in motion; apt to roll; rotating; as, voluble particles of matter.

2. Moving with ease and smoothness in uttering words; of rapid speech; nimble in speaking; glib; as, a flippant, voluble, tongue. [Cassio,] a knave very voluble. Shak.

a book; a tome; especially, that part of an extended work which is bound up together in one cover; as, a work in four volumes.
An odd volume of a set of books bears not the value of its proportion to the set. Franklin.

4. Anything of a rounded or swelling form resembling a roll; a turn; a convolution; a coil.
So glides some trodden serpent on the grass, And long behind wounded volume trails. Dryden.
Undulating billows rolling their silver volumes. W. Irving.

4. Dimensions; compass; space occupied, as measured by cubic units, that is, cubic inches, feet, yards, etc.; mass; bulk; as, the volume of an elephant's body; a volume of gas.

5. (Mus.)

Defn: Amount, fullness, quantity, or caliber of voice or tone. Atomic volume, Molecular volume (Chem.), the ratio of the atomic and molecular weights divided respectively by the specific gravity of the substance in question.
-- Specific volume (Physics & Chem.), the quotient obtained by dividing unity by the specific gravity; the reciprocal of the specific gravity. It is equal (when the specific gravity is referred to water at 4º C. as a standard) to the number of cubic centimeters occupied by one gram of the substance.

VOLUMED
Vol"umed, a.

1. Having the form of a volume, or roil; as, volumed mist.
The distant torrent's rushing sound Tells where the volumed cataract doth roll. Byron.

2. Having volume, or bulk; massive; great.

VOLUMENOMETER
Vol`u*me*nom"e*ter, n. Etym: [L. volumen volume + -meter.] (Physics)

Defn: An instrument for measuring the volume of a body, especially a solid, by means of the difference in tension caused by its presence and absence in a confined portion of air.

VOLUMENOMETRY
Vol`u*me*nom"e*try, n. (Chem. & Physics)

Defn: The method or process of measuring volumes by means of the volumenometer.

VOLUMESCOPE
Vol*u"me*scope, n. Etym: [Volume + -scope.] (Physics)

Defn: An instrument consisting essentially of a glass tube provided with a graduated scale, for exhibiting to the eye the changes of volume of a gas or gaseous mixture resulting from chemical action, and the like.

VOLUMESCOPE
Vo*lu"me*scope, n. [Volume + -scope.] (Physics)

Defn: An instrument consisting essentially of a glass tube provided with a graduated scale, for exhibiting to the eye the changes of volume of a gas or gaseous mixture resulting from chemical action, etc.

VOLUMETER
Vol*u"me*ter, n. Etym: [Cf. F. volumètre. See Volumetric.] (Physics)

Defn: An instrument for measuring the volumes of gases or liquids by introducing them into a vessel of known capacity.

VOLUMETRIC
Vol`u*met"ric, a. Etym: [Volume + -metric.]

Defn: Of or pertaining to the measurement of volume. Volumetric analysis (Chem.), that system of the quantitative analysis of solutions which employs definite volumes of standardized solutions of reagents, as measured by burettes, pipettes, etc.; also, the analysis of gases by volume, as by the eudiometer.

VOLUMETRICAL
Vol`u*met"ric*al, a.

Defn: Volumetric.
-- Vol`u*met"ric*al*ly, adv.

VOLUMINOUS
Vo*lu"mi*nous, a. Etym: [L. voluminosus: cf. F. volumineux.]

Defn: Of or pertaining to volume or volumes. Specifically: --

(a) Consisting of many folds, coils, or convolutions.
But ended foul in many a scaly fold, Voluminous and vast. Milton.
Over which dusky draperies are hanging, and voluminous curtains have long since fallen. De Quincey.

(b) Of great volume, or bulk; large. B. Jonson. (c) Consisting of many volumes or books; as, the collections of Muratori are voluminous.

WATCH
Watch, n. Etym: [OE. wacche, AS. wæcce, fr. wacian to wake; akin to D. wacht, waak, G. wacht, wache. Wake, v. i.]

1. The act of watching; forbearance of sleep; vigil; wakeful, vigilant, or constantly observant attention; close observation; guard; preservative or preventive vigilance; formerly, a watching or guarding by night.
Shepherds keeping watch by night. Milton.
All the long night their mournful watch they keep. Addison.

Note: Watch was formerly distinguished from ward, the former signifying a watching or guarding by night, and the latter a watching, guarding, or protecting by day Hence, they were not unfrequently used together, especially in the phrase to keep watch and ward, to denote continuous and uninterrupted vigilance or protection, or both watching and guarding. This distinction is now rarely recognized, watch being used to signify a watching or guarding both by night and by day, and ward, which is now rarely used, having simply the meaning of guard, or protection, without reference to time.
Still, when she slept, he kept both watch and ward. Spenser.
Ward, guard, or custodia, is chiefly applied to the daytime, in order to apprehend rioters, and robbers on the highway . . . Watch, is properly applicable to the night only, . . . and it begins when ward ends, and ends when that begins. Blackstone.

2. One who watches, or those who watch; a watchman, or a body of watchmen; a sentry; a guard.

WHARF
Wharf, n.; pl. Wharfs or Wharves. Etym: [AS. hwerf, hwearf, a returning, a change, from hweorfan to turn, turn about, go about; akin to D. werf a wharf, G. werft, Sw. varf a shipbuilder's yard, Dan. verft wharf, dockyard, G. werben to enlist, to engage, woo, OHG. werban to turn about, go about, be active or occupied, Icel. hverfa to turn, Goth. hwaírban, hwarbon, to walk. Cf. Whirl.]

1. A structure or platform of timber, masonry, iron, earth, or other material, built on the shore of a harbor, river, canal, or the like, and usually extending from the shore to deep water, so that vessels may lie close alongside to receive and discharge cargo, passengers, etc.; a quay; a pier.
Commerce pushes its wharves into the sea. Bancroft.
Out upon the wharfs they came, Knight and burgher, lord and dame. Tennyson.

Note: The plural of this word is generally written wharves in the United States, and wharfs in England; but many recent English writers use wharves.

2. Etym: [AS. hwearf.]

Defn: The bank of a river, or the shore of the sea. [Obs.] "The fat weed that roots itself in ease on Lethe wharf." Shak. Wharf boat, a kind of boat moored at the bank of a river, and used for a wharf, in places where the height of the water is so variable that a fixed wharf would be useless. [U. S.] Bartlett.
-- Wharf rat. (Zoöl.) (a) The common brown rat. (b) A neglected boy who lives around the wharfs. [Slang]

Wharp, n.

Defn: A kind of fine sand from the banks of the Trent, used as a polishing powder. [Eng.]

WHAT
What, pron., a., & adv. Etym: [AS. hwæt, neuter of hwa who; akin to OS. hwat what, OFries. hwet, D. & LG. wat, G. was, OHG. waz, hwaz, Icel. hvat, Sw. & Dan. hvad, Goth. hwa. sq. root182. See Who.]

1. As an interrogative pronoun, used in asking questions regarding either persons or things; as, what is this what did you say what poem is this what child is lost
What see'st thou in the ground Shak.
What is man, that thou art mindful of him Ps. viii. 4.
What manner of man is this, that even the winds and the sea obey him! Matt. viii. 27.

Note: Originally, what, when, where, which, who, why, etc., were interrogatives only, and it is often difficult to determine whether they are used as interrogatives or relatives. What in this sense, when it refers to things, may be used either substantively or adjectively; when it refers to persons, it is used only adjectively with a noun expressed, who being the pronoun used substantively.

2. As an exclamatory word: -- (a) Used absolutely or independently; -- often with a question following. "What welcome be thou." Chaucer.
What, could ye not watch with me one hour Matt. xxvi. 40.

(b) Used adjectively, meaning how remarkable, or how great; as, what folly! what eloquence! what courage!
What a piece of work is man! Shak.
O what a riddle of absurdity! Young.

Note: What in this use has a or an between itself and its noun if the qualitative or quantitative importance of the object is emphasized.
(c) Sometimes prefixed to adjectives in an adverbial sense, as nearly equivalent to how; as, what happy boys!
What partial judges are our and hate! Dryden.

3. As a relative pronoun: --
(a) Used substantively with the antecedent suppressed, equivalent to that which, or those [persons] who, or those [things] which; -- called a compound relative.
With joy beyond what victory bestows. Cowper.
I'm thinking Captain Lawton will count the noses of what are left before they see their whaleboats. Cooper.
What followed was in perfect harmony with this beginning. Macaulay.
I know well . . . how little you will be disposed to criticise what comes to you from me. J. H. Newman.

(b) Used adjectively, equivalent to the . . . which; the sort or kind of . . . which; rarely, the . . . on, or at, which.
See what natures accompany what colors. Bacon.
To restrain what power either the devil or any earthly enemy hath to work us woe. Milton.
We know what master laid thy keel, What workmen wrought thy ribs of steel. Longfellow.

(c) Used adverbially in a sense corresponding to the adjectival use; as, he picked what good fruit he saw.

4. Whatever; whatsoever; what thing soever; -- used indefinitely.
"What after so befall." Chaucer.
Whether it were the shortness of his foresight, the strength of his will, . . . or what it was. Bacon.

5. Used adverbially, in part; partly; somewhat; -- with a following preposition, especially, with, and commonly with repetition.
What for lust [pleasure] and what for lore. Chaucer.
Thus, what with the war, what with the sweat, what with the gallows, and what with poverty, I am custom shrunk. Shak.
The year before he had so used the matter that what by force, what by policy, he had taken from the Christians above thirty small castles. Knolles.

Note: In such phrases as I tell you what, what anticipates the following statement, being elliptical for what I think, what it is, how it is, etc. "I tell thee what, corporal Bardolph, I could tear her." Shak. Here what relates to the last clause, "I could tear her;" this is what I tell you. What not is often used at the close of an enumeration of several particulars or articles, it being an abbreviated clause, the verb of which, being either the same as that of the principal clause or a general word, as be, say, mention, enumerate, etc., is omitted. "Men hunt, hawk, and what not." Becon. "Some dead puppy, or log, orwhat not." C. Kingsley. "Battles, tournaments, hunts, and what not." De Quincey. Hence, the words are often used in a general sense with the force of a substantive,

equivalent to anything you please, a miscellany, a variety, etc. From this arises the name whatnot, applied to an étagère, as being a piece of furniture intended for receiving miscellaneous articles of use or ornament. But what is used for but that, usually after a negative, and excludes everything contrary to the assertion in the following sentence. "Her needle is not so absolutely perfect in tent and cross stitch but what my superintendence is advisable." Sir W. Scott. "Never fear but what our kite shall fly as high." Ld. Lytton. What ho! an exclamation of calling.
-- What if, what will it matter if; what will happen or be the result if. "What if it be a poison" Shak.
-- What of this that it etc., what follows from this, that, it, etc., often with the implication that it is of no consequence. "All this is so; but what of this, my lord" Shak. "The night is spent, why, what of that" Shak.
-- What though, even granting that; allowing that; supposing it true that. "What though the rose have prickles, yet't is plucked." Shak.
-- What time, or What time as, when. [Obs. or Archaic] "What time I am afraid, I will trust in thee." Ps. lvi. 3.
What time the morn mysterious visions brings. Pope.

(b) An instrument of torture formerly used.
His examination is like that which is made by the rack and wheel. Addison.

Note: This mode of torture is said to have been first employed in Germany, in the fourteenth century. The criminal was laid on a cart wheel with his legs and arms extended, and his limbs in that posture were fractured with an iron bar. In France, where its use was restricted to the most atrocious crimes, the criminal was first laid on a frame of wood in the form of a St. Andrew's cross, with grooves cut transversely in it above and below the knees and elbows, and the executioner struck eight blows with an iron bar, so as to break the limbs in those places, sometimes finishing by two or three blows on the chest or stomach, which usually put an end to the life of the criminal, and were hence called coups-de-grace -- blows of mercy. The criminal was then unbound, and laid on a small wheel, with his face upward, and his arms and legs doubled under him, there to expire, if he had survived the previous treatment. Brande.

WILL
Will, n. Etym: [OE. wille, AS. willa; akin to OFries. willa, OS. willeo, willio, D. wil, G. wille, Icel. vili, Dan. villie, Sw. vilja, Goth wilja. See Will, v.]

1. The power of choosing; the faculty or endowment of the soul by which it is capable of choosing; the faculty or power of the mind by which we decide to do or not to do; the power or faculty of preferring or selecting one of two or more objects.
It is necessary to form a distinct notion of what is meant by the word "volition" in order to understand the import of the word will, for this last word expresses the power of mind of which "volition" is the act. Stewart.

Will is an ambiguous word, being sometimes put for the faculty of willing; sometimes for the act of that faculty, besides [having] other meanings. But "volition" always signifies the act of willing, and nothing else. Reid.
Appetite is the will's solicitor, and the will is appetite's controller; what we covet according to the one, by the other we often reject. Hooker.
The will is plainly that by which the mind chooses anything. J. Edwards.

2. The choice which is made; a determination or preference which results from the act or exercise of the power of choice; a volition. The word "will," however, is not always used in this its proper acceptation, but is frequently substituted for "volition", as when I say that my hand mover in obedience to my will. Stewart.

3. The choice or determination of one who has authority; a decree; a command; discretionary pleasure.
Thy will be done. Matt. vi. 10.
Our prayers should be according to the will of God. Law.

4. Strong wish or inclination; desire; purpose.

Note: "Inclination is another word with which will is frequently confounded. Thus, when the apothecary says, in Romeo and Juliet, -- My poverty, but not my will, consents; . . . Put this in any liquid thing you will, And drink it off. the word will is plainly used as, synonymous with inclination; not in the strict logical sense, as the immediate antecedent of action. It is with the same latitude that the word is used in common conversation, when we speak of doing a thing

which duty prescribes, against one's own will; or when we speak of doing a thing willingly or unwillingly." Stewart.

5. That which is strongly wished or desired.
What's your will, good friar Shak.
The mariner hath his will. Coleridge.

6. Arbitrary disposal; power to control, dispose, or determine.
Deliver me not over unto the will of mine enemies. Ps. xxvii. 12.

7
7 (Law)

Defn: The legal declaration of a person's mind as to the manner in which he would have his property or estate disposed of after his death; the written instrument, legally executed, by which a man makes disposition of his estate, to take effect after his death; testament; devise. See the Note under Testament, 1.

Note: Wills are written or nuncupative, that is, oral. See Nuncupative will, under Nuncupative. At will (Law), at pleasure. To hold an estate at the will of another, is to enjoy the possession at his pleasure, and be liable to be ousted at any time by the lessor or proprietor. An estate at will is at the will of both parties.
-- Good will. See under Good.
-- Ill will, enmity; unfriendliness; malevolence.
-- To have one's will, to obtain what is desired; to do what one pleases.
-- Will worship, worship according to the dictates of the will or fancy; formal worship. [Obs.] -- Will worshiper, one who offers will

worship. [Obs.] Jer. Taylor.
-- With a will, with willingness and zeal; with all one's heart or strength; earnestly; heartily.

Caleb said unto her, What will thou Judg. i. 14.
They would none of my counsel. Prov. i. 30.

2. As an auxiliary, will is used to denote futurity dependent on the verb. Thus, in first person, "I will" denotes willingness, consent, promise; and when "will" is emphasized, it denotes determination or fixed purpose; as, I will go if you wish; I will go at all hazards.
In the second and third persons, the idea of distinct volition, wish, or purpose is evanescent, and simple certainty is appropriately expressed; as, "You will go," or "He will go," describes a future event as a fact only. To emphasize will denotes (according to the tone or context) certain futurity or fixed determination.

Note: Will, auxiliary, may be used elliptically for will go. "I'll to

her lodgings." Marlowe.

Note: As in shall (which see), the second and third persons may be virtually converted into the first, either by question or indirect statement, so as to receive the meaning which belongs to will in that person; thus, "Will you go" (answer, "I will go") asks assent, requests, etc.; while "Will he go" simply inquires concerning futurity; thus, also,"He says or thinks he will go," "You say or think you will go," both signify willingness or consent.

Note: Would, as the preterit of will, is chiefly employed in conditional, subjunctive, or optative senses; as, he would go if he could; he could go if he would; he said that he would go; I would fain go, but can not; I would that I were young again; and other like phrases. In the last use, the first personal pronoun is often omitted; as, would that he were here; would to Heaven that it were so; and, omitting the to in such an adjuration. "Would God I had died for thee." Would is used for both present and future time, in conditional propositions, and would have for past time; as, he would go now if he were ready; if it should rain, he would not go; he would have gone, had he been able. Would not, as also will not, signifies refusal. "He was angry, and would not go in." Luke xv. 28. Would is never a past participle.

Note: In Ireland, Scotland, and the United States, especially in the southern and western portions of the United States, shall and will, should and would, are often misused, as in the following examples: -- I am able to devote as much time and attention to other subjects as I will [shall] be under the necessity of doing next winter. Chalmers. A countryman, telling us what he had seen, remarked that if the

conflagration went on, as it was doing, we would [should] have, as our next season's employment, the Old Town of Edinburgh to rebuild. H. Miller.
I feel assured that I will [shall] not have the misfortune to find conflicting views held by one so enlightened as your excellency. J. Y. Mason.

WILL
Will, v. i.

Defn: To be willing; to be inclined or disposed; to be pleased; to wish; to desire.
And behold, there came a leper and worshiped him, saying, Lord if thou wilt, thou canst make me clean. And Jesus . . . touched him, saying, I will; be thou clean. Matt. viii. 2, 3.

Note: This word has been confused with will, v. i., to choose, which, unlike this, is of the weak conjugation. Will I, nill I, or Will ye, hill ye, or Will he, nill he, whether I, you, or he will it or not; hence, without choice; compulsorily; -- sometimes corrupted into willy nilly. "If I must take service willy nilly." J. H. Newman.
"Land for all who would till it, and reading and writing will ye, nill ye." Lowell.

WILL
Will, v. t. [imp. & p. p Willed; p. pr. & vb. n. Willing. Indic. present I will, thou willeth, he wills; we, ye, they will.] Etym: [Cf. AS. willian. See Will, n.]

WISDOM
Wis"dom (-dûm), n. Etym: [AS. wisdom. See Wise, a., and -dom.]

1. The quality of being wise; knowledge, and the capacity to make due use of it; knowledge of the best ends and the best means; discernment and judgment; discretion; sagacity; skill; dexterity.
We speak also not in wise words of man's wisdom, but in the doctrine of the spirit. Wyclif (1 Cor. ii. 13).
Behold, the fear of the Lord, that is wisdom; and to depart from evil is understanding. Job xxviii. 28.
It is hoped that our rulers will act with dignity and wisdom that they will yield everything to reason, and refuse everything to force. Ames.
Common sense in an uncommon degree is what the world calls wisdom.

Coleridge.

2. The results of wise judgments; scientific or practical truth; acquired knowledge; erudition.
Moses was learned in all the wisdom of the Egyptians, and was mighty in words and in deeds. Acts vii. 22.

Syn.
-- Prudence; knowledge. Wisdom, Prudence, Knowledge. Wisdom has been defined to be "the use of the best means for attaining the best ends." "We conceive," says Whewell, " prudence as the virtue by which we select right means for given ends, while wisdom implies the selection of right ends as well as of right means." Hence, wisdom implies the union of high mental and moral excellence. Prudence (that is, providence, or forecast) is of a more negative character; it rather consists in avoiding danger than in taking decisive measures for the accomplishment of an object. Sir Robert Walpole was in many respects a prudent statesman, but he was far from being a wise one. Burke has said that prudence, when carried too far, degenerates into a "reptile virtue," which is the more dangerous for its plausible appearance. Knowledge, a more comprehensive term, signifies the simple apprehension of facts or relations. "In strictness of language," says Paley, " there is a difference between knowledge and wisdom; wisdom always supposing action, and action directed by it." Knowledge and wisdom, far from being one, Have ofttimes no connection. Knowledge dwells In heads replete with thoughts of other men; Wisdom, in minds attentive to their own. Knowledge, a rude, unprofitable mass, The mere materials with which wisdom builds, Till smoothed, and squared, and fitted to its place, Does but encumber whom it seems to enrich. Knowledge is proud that he has learned so

much; Wisdom is humble that he knows no more. Cowper.
Wisdom tooth, the last, or back, tooth of the full set on each half of each jaw in man; -- familiarly so called, because appearing comparatively late, after the person may be supposed to have arrived at the age of wisdom. See the Note under Tooth, 1.

WISDOM LITERATURE
Wis"dom lit"er*a*ture.

Defn: The class of ancient Hebrew writings which deal reflectively with general ethical and religious topics, as distinguished from the prophetic and liturgical literature, and from the law. It is comprised chiefly in the books of Job, Proverbs, Ecclesiasticus, Ecclesiastes, and Wisdom of Solomon. The "wisdom" (Hokhmah) of these writings consists in detached sage utterances on concrete issues of life, without the effort at philosophical system that appeared in the later Hellenistic reflective writing beginning with Philo Judæus.

WISE
Wise, a. [Compar. Wiser; superl. Wisest.] Etym: [OE. wis, AS. wis; akin to OS. & OFries. wis, D. wijs, G. weise, OHG. wis, wisi, Icel. viss, Sw. vis, Dan. viis, Goth. weis; akin to wit, v. i. See Wit, v., and cf. Righteous, Wisdom.]

2. A mental faculty, or power of the mind; -- used in this sense chiefly in the plural, and in certain phrases; as, to lose one's wits; at one's wits' end, and the like. "Men's wittes ben so dull." Chaucer.
I will stare him out of his wits. Shak.

3. Felicitous association of objects not usually connected, so as to produce a pleasant surprise; also. the power of readily combining

objects in such a manner.
The definition of wit is only this, that it is a propriety of
thoughts and words; or, in other terms, thoughts and words elegantly
adapted to the subject. Dryden.
Wit which discovers partial likeness hidden in general diversity.
Coleridge.
Wit lying most in the assemblage of ideas, and putting those together
with quickness and variety wherein can be found any resemblance or
congruity, thereby to make up pleasant pictures in the fancy. Locke.

4. A person of eminent sense or knowledge; a man of genius, fancy, or
humor; one distinguished for bright or amusing sayings, for repartee,
and the like.
In Athens, where books and wits were ever busier than in any other
part of Greece, I find but only two sorts of writings which the
magistrate cared to take notice of; those either blasphemous and
atheistical, or libelous. Milton.
Intemperate wits will spare neither friend nor foe. L'Estrange.
A wit herself, Amelia weds a wit. Young.
The five wits, the five senses; also, sometimes, the five qualities
or faculties, common wit, imagination, fantasy, estimation, and
memory. Chaucer. Nares.
But my five wits nor my five senses can Dissuade one foolish heart
from serving thee. Shak.

Syn.
-- Ingenuity; humor; satire; sarcasm; irony; burlesque.
-- Wit, Humor. Wit primarily meant mind; and now denotes the power
of seizing on some thought or occurrence, and, by a sudden turn,
presenting it under aspects wholly new and unexpected -- apparently

natural and admissible, if not perfectly just, and bearing on the subject, or the parties concerned, with a laughable keenness and force. "What I want," said a pompous orator, aiming at his antagonist, "is common sense." "Exactly!" was the whispered reply. The pleasure we find in wit arises from the ingenuity of the turn, the sudden surprise it brings, and the patness of its application to the case, in the new and ludicrous relations thus flashed upon the view. Humor is a quality more congenial to the English mind than wit. It consists primarily in taking up the peculiarities of a humorist (or eccentric person) and drawing them out, as Addison did those of Sir Roger de Coverley, so that we enjoy a hearty, good-natured laugh at his unconscious manifestation of whims and oddities. From this original sense the term has been widened to embrace other sources of kindly mirth of the same general character. In a well-known caricature of English reserve, an Oxford student is represented as standing on the brink of a river, greatly agitated at the sight of a drowning man before him, and crying out, "O that I had been introduced to this gentleman, that I might save his life! The, "Silent Woman" of Ben Jonson is one of the most humorous productions, in the original sense of the term, which we have in our language.

3. (Criminal Law)

Defn: An injury to the person by which the skin is divided, or its continuity broken; a lesion of the body, involving some solution of continuity.

Note: Walker condemns the pronunciation woond as a "capricious novelty." It is certainly opposed to an important principle of our language, namely, that the Old English long sound written ou, and pronounced like French ou or modern English oo, has regularly changed, when accented, into the diphthongal sound usually written with the same letters ou in modern English, as in ground, hound, round, sound. The use of ou in Old English to represent the sound of modern English oo was borrowed from the French, and replaced the older and Anglo-Saxon spelling with u. It makes no difference whether the word was taken from the French or not, provided it is old enough in English to have suffered this change to what is now the common sound of ou; but words taken from the French at a later time, or influenced by French, may have the French sound. Wound gall (Zoöl.), an elongated swollen or tuberous gall on the branches of the grapevine, caused by a small reddish brown weevil (Ampeloglypter sesostris) whose larvæ inhabit the galls.

WRESTLING
Wres"tling, n.

Defn: Act of one who wrestles; specif., the sport consisting of the hand-to-hand combat between two unarmed contestants who seek to throw each other. The various styles of wrestling differ in their definition of a fall and in the governing rules. In Greco-Roman wrestling, tripping and taking hold of the legs are forbidden, and a fall is gained (that is, the bout is won), by the contestant who pins both his opponent's shoulders to the ground. In catch-as-catch-can wrestling, all holds are permitted except such as may be barred by mutual consent, and a fall is defined as in Greco-Roman style. Lancashire style wrestling is essentially the same as catch-as-catch-can. In Cumberland and Westmorland wrestling the contestants stand chest to chest, grasping each other around the body. The one first losing his hold, or touching the ground with any part of his body except his feet, loses the bout. If both fall to the ground at the same time, it is a dogfall, and must be wrestled over. In the Cornwall and Devon wrestling, the wrestlers complete in strong loose linen jackets, catching hold of the jacket, or anywhere above the waist. Two shoulders and one hip, or two hips and one shoulder, must touch the ground to constitute a fall, and if a man is thrown otherwise than on his back the contestants get upon their feet and the bout recommences.

Note: Writs are usually witnessed, or tested, in the name of the chief justice or principal judge of the court out of which they are issued; and those directed to a sheriff, or other ministerial officer, require him to return them on a day specified. In former English law and practice, writs in civil cases were either original or judicial; the former were issued out of the Court of Chancery,

under the great seal, for the summoning of a defendant to appear, and were granted before the suit began and in order to begin the same; the latter were issued out of the court where the original was returned, after the suit was begun and during the pendency of it. Tomlins. Brande. Encyc. Brit. The term writ is supposed by Mr. Reeves to have been derived from the fact of these formulæ having always been expressed in writing, being, in this respect, distinguished from the other proceedings in the ancient action, which were conducted orally. Writ of account, Writ of capias, etc. See under Account, Capias, etc.

XENON
Xen"on, n. [Gr. , neut. of strange.] (Chem.)

Defn: A very heavy, inert gaseous element occurring in the atmosphere in the proportion of one volume is about 20 millions. It was discovered by Ramsay and Travers in 1898. It can be condensed to a liquid boiling at -109º C., and to a solid which volatilizes without melting. Symbol Xe or X; atomic weight 130.2.

XENOPTERYGII
Xe*nop`te*ryg"i*i, n. pl. Etym: [NL., from Gr. xe`nos strange + (Zoöl.)

Defn: A suborder of fishes including Gobiesox and allied genera. These fishes have soft-rayed fins, and a ventral sucker supported in front by the pectoral fins. They are destitute of scales.

XENOTIME
Xen"o*time, n. Etym: [Gr. xe`nos guest, stranger + xenotim.] (Min.)

Defn: A native phosphate of yttrium occurring in yellowish-brown tetragonal crystals.

XENURINE
Xe*nu"rine, n. Etym: [Gr. xe`nos strange + (Zoöl.)

Defn: A cabassou.

XENYL
Xen"yl, n. Etym: [Gr. xe`nos strange + -yl.] (Chem.)

Defn: The radical characteristic of xenylic compounds.

XENYLIC
Xe*nyl"ic, a. (Chem.)

Defn: Pertaining to, derived from, designating, certain amido compounds obtained by reducing certain nitro derivatives of diphenyl.

XERAPHIM
Xer"a*phim, n. Etym: [Pg. xarafin, xerafin, fr. Ar. ashrafi noble, the name of a gold coin.]

Defn: An old money of account in Bombay, equal to three fifths of a rupee.

Xe`ro*der"ma, n. Etym: [NL., fr. Gr. (Med.)
(a) Ichthyosis.
(b) A skin disease characterized by the presence of numerous small pigmented spots resembling freckles, with which are subsequently mingled spots of atrophied skin.

XERONATE
Xe"ro*nate, n. (Chem.)

Defn: A salt of xeronic acid.

XERONIC
Xe*ron"ic, a. Etym: [Gr. conic.] (Chem.)

Defn: Pertaining to, or designating, an acid, C8H12O4, related to fumaric acid, and obtained from citraconic acid as an oily substance having a bittersweet taste; -- so called from its tendency to form

its anhydride.

XEROPHAGY
Xe*roph"a*gy, n. Etym: [L. xerophagia, Gr.

Defn: Among the primitive Christians, the living on a diet of dry food in Lent and on other fasts.

XEROPHILOUS
Xe*roph"i*lous, a. Etym: [Gr. (Bot.)

Defn: Drought-loving; able withstand the absence or lack of moisture. Plants which are peculiarly adapted to dry climates are termed by De Candolle xerophilous. Goodale.

XEROPHTHALMIA
Xe`roph*thal"mi*a, n. Etym: [L., fr. Gr. Ophthalmia.] (Med.)

Defn: An abnormal dryness of the eyeball produced usually by long-continued inflammation and subsequent atrophy of the conjunctiva.

XEROPHTHALMY
Xe`roph*thal"my, n. (Med.)

Defn: Xerophthalmia.

XIPHIAS
Xiph"i*as, n. Etym: [L., a swordfish, a sword-shaped comet, fr. Gr.

1. (Zoöl.)

Defn: A genus of fishes comprising the common swordfish.

2. (Anat.)

Defn: The Röntgen rays; -- so called by their discoverer because of their enigmatical character.

X-RAY TUBE
X"-ray" tube. (Physics)

Defn: A vacuum tube suitable for producing Röntgen rays.

XYLAMIDE
Xy*lam"ide, n. Etym: [Xylic + amide.] (Chem.)

Defn: An acid amide derivative of xylic acid, obtained as a white crystalline substance.

XYLAN
Xy"lan, n. (Chem.)

Defn: A gummy substance of the pentosan class, present in woody tissue, and yielding xylose on hydrolysis; wood gum.

XYLANTHRAX
Xy*lan"thrax, n. Etym: [Gr. xy`lon wood +

Defn: Wood coal, or charcoal; -- so called in distinction from mineral coal.

XYLATE
Xy"late, n. (Chem.)

Defn: A salt of xylic acid.

XYLEM
Xy"lem, n. Etym: [Gr. xy`lon wood.] (Bot.)

Defn: That portion of a fibrovascular bundle which has developed, or will develop, into wood cells; -- distinguished from phloëm.

XYLENE
Xy"lene, n. Etym: [Gr. xy`lon wood.] (Chem.)

Defn: Any of a group of three metameric hydrocarbons of the aromatic series, found in coal and wood tar, and so named because found in crude wood spirit. They are colorless, oily, inflammable liquids, C6H4.(CH3)2, being dimethyl benzenes, and are called respectively orthoxylene, metaxylene, and paraxylene. Called also xylol.

Note: Each of these xylenes is the nucleus and prototype of a distinct series of compounds.

XYLENOL
Xy"le*nol, n. Etym: [Xylene + -ol.] (Chem.)

Defn: Any one of six metameric phenol derivatives of xylene, obtained as crystalline substances, (CH3)2.C6H3.OH.

XYLETIC
Xy*let"ic, a. (Chem.)

Defn: Pertaining to, or designating, a complex acid related to mesitylenic acid, obtained as a white crystalline substance by the action of sodium and carbon dioxide on crude xylenol.

XYLIC

Xy"lic, a. (Chem.)

Defn: Pertaining to, derived from, or related to, xylene; specifically, designating any one of several metameric acids produced by the partial oxidation of mesitylene and pseudo-cumene.

XYLIDIC
Xy*lid"ic, a. (Chem.)

Defn: Pertaining to, or designating, either one of two distinct acids which are derived from xylic acid and related compounds, and are metameric with uvitic acid.

XYLIDINE
Xy"li*dine, n. (Chem.)

Defn: Any one of six metameric hydrocarbons, (CH3)2.C6H3.NH2, resembling aniline, and related to xylene. They are liquids, or easily fusible crystalline substances, of which three are derived from metaxylene, two from orthoxylene, and one from paraxylene. They are called the amido xylenes.

Note: The xylidine of commerce, used in making certain dyes, consists chiefly of the derivatives of paraxylene and metaxylene.

XYLINDEIN
Xy*lin"de*in, n. (Chem.)

Defn: A green or blue pigment produced by Peziza in certain kinds of decayed wood, as the beech, oak, birch, etc., and extracted as an

amorphous powder resembling indigo.

XYLITE
Xy"lite, n. Etym: [Gr. xy`lon wood.] (Chem.)

Defn: A liquid hydrocarbon found in crude wood spirits.

XYLITONE
Xy"li*tone, n. (Chem.)

Defn: A yellow oil having a geraniumlike odor, produced as a side product in making phorone; -- called also xylite oil.

XYLO-
Xy"lo-.

Defn: A combining form from Gr. xy`lon wood; as in xylogen, xylograph.

XYLOBALSAMUM
Xy`lo*bal"sa*mum, n. Etym: [NL., fr. Gr. xy`lon wood + xylobalsamum balsam wood, Gr. (Med.)

Defn: The dried twigs of a Syrian tree (Balsamodendron Gileadense). U. S. Disp.

XYLOCARPOUS
Xy`lo*car"pous, a. Etym: [Xylo- + Gr. (Bot.)

Defn: Bearing fruit which becomes hard or woody.

XYLOCOPA
Xy*loc"o*pa, n. Etym: [NL., fr. Gr. xy`lon wood + (Zoöl.)

Defn: A genus of hymenopterous insects including the carpenter. See Carpenter bee, under Carpenter.
-- Xy*loc"o*pine, a.

XYLOGEN
Xy"lo*gen, n. Etym: [Xylo- + -gen.]
(a) (Bot.) Nascent wood; wood cells in a forming state.
(b) Lignin.

XYLOGRAPH
Xy"lo*graph, n. Etym: [Xylo- + -graph.]

Defn: An engraving on wood, or the impression from such an engraving; a print by xylography.

XYLOGRAPHER
Xy*log"ra*pher, n.

Defn: One who practices xylography.

XYLOGRAPHIC; XYLOGRAPHICAL
Xy`lo*graph"ic, Xy`lo*graph"ic*al, a. Etym: [Cf. F. xylographique.]

Defn: Of or pertaining to xylography, or wood engraving.

XYLOGRAPHY

Xy*log"ra*phy, n. Etym: [Xylo- + -graphy: cf. F. xylographie.]

1. The art of engraving on wood.

2. The art of making prints from the natural grain of wood. Knight.

3. A method pf printing in colors upon wood for purposes of house decoration. Ure.

XYLOID
Xy"loid, a. Etym: [Xylo- + -oid.]

Defn: Resembling wood; having the nature of wood.

XYLOIDIN
Xy*loid"in, n. Etym: [Xylo- + -oid.] (Chem.)

Defn: A substance resembling pyroxylin, obtained by the action of nitric acid on starch; -- called also nitramidin.

XYLOL
Xy"lol, n. Etym: [Xylo- + L. oleum oil.] (Chem.)

Defn: Same as Xylene.

XYLOLOGY
Xy*lol"o*gy, n. [Pref. xylo-+ -logy.]

Defn: The branch of dendrology treating of the gross and minute structure of wood.

XYLONITE
Xy"lon*ite, n.

Defn: See Zylonite.

XYLOPHAGA
Xy*loph"a*ga, n. Etym: [NL. See Xylophagous.] (Zoöl.)

Defn: A genus of marine bivalves which bore holes in wood. They are allied to Pholas.

XYLOPHAGAN
Xy*loph"a*gan, n. Etym: [See Xylophagous.] (Zoöl.)
(a) One of a tribe of beetles whose larvæ bore or live in wood.
(b) Any species of Xylophaga.
(c) Any one of the Xylophagides.

XYLOPHAGIDES
Xy`lo*phag"i*des, n. pl. Etym: [See Xylophagous.] (Zoöl.)

Defn: A tribe or family of dipterous flies whose larvæ live in decayed wood. Some of the tropical species are very large.

XYLOPHAGOUS
Xy*loph"a*gous, a. Etym: [Gr. xy`lon wood + (Zoöl.)
(a) Eating, boring in, or destroying, wood; -- said especially of certain insect larvæ, crustaceans, and mollusks.
(b) Of or pertaining to the genus Xylophaga.

XYLOPHILAN
Xy*loph"i*lan, n. Etym: [See Xylophilous.] (Zoöl.)

Defn: One of a tribe of beetles (Xylophili) whose larvæ live on decayed wood.

XYLOPHILOUS
Xy*loph"i*lous, a. Etym: [Xylo- + Gr. filei^n to love.] (Zoöl.)

Defn: Of or pertaining to the xylophilans.

XYLOPHONE
Xy"lo*phone, n. Etym: [Xylo- + Gr. fwnh` sound.]

1. (Mus.)

Defn: An instrument common among the Russians, Poles, and Tartars, consisting of a series of strips of wood or glass graduated in length to the musical scale, resting on belts of straw, and struck with two small hammers. Called in Germany strohfiedel, or straw fiddle.

2. An instrument to determine the vibrative properties of different kinds of wood. Knight.

XYLOPLASTIC
Xy`lo*plas"tic, a. Etym: [Xylo- + -plastic.] (Technol.)

Defn: Formed of wood pulp by molds; relating to casts made of wood pulp in molds.

XYLOPYROGRAPHY
Xy`lo*py*rog"ra*phy. n. Etym: [Xylo- + Gr. -graphy.]

Defn: The art or practice of burning pictures on wood with a hot iron; -- called also poker painting. See Poker picture, under Poker.

XYLOQUINONE
Xy`lo*qui"none, n. Etym: [Xylene + quinone.] (Chem.)

Defn: Any one of a group of quinone compounds obtained respectively by the oxidation of certain xylidine compounds. In general they are yellow crystalline substances.

XYLORCIN
Xy*lor"cin, n. Etym: [Xylene + orcin.] (Chem.)

Defn: A derivative of xylene obtained as a white crystalline substance which on exposure in the air becomes red; -- called also betaorcin.

XYLOSE
Xy"lose, n. [Pref. xylo- + -ose.] (Chem.)

Defn: An unfermentable sugar of the pentose class, C5H10O5, formed by the hydrolysis of xylan; wood sugar.

XYLOSTEIN
Xy*los"te*in, n. Etym: [Xylo- + Gr. (Chem.)

Defn: A glucoside found in the poisonous berries of a species of

honeysuckle (Lonicera xylosteum), and extracted as a bitter, white, crystalline substance.

XYLOTILE
Xy"lo*tile, n.

Defn: Same as Parkesine.

XYLOTOMIST
Xy*lot"o*mist, n.

Defn: One versed or engaged in xylotomy.

XYLOTOMOUS
Xy*lot"o*mous, a. [Pref. xylo-+ root of Gr. to cut.] (Zoöl.)

Defn: Capable of boring or cutting wood; -- said of many insects.

XYLOTOMY
Xy*lot"o*my, n. [Pref. xylo-+ -tomy.]

Defn: Art of preparing sections (transverse, tangential, or radial) of wood, esp. by means of a microtome, for microscopic examination.

XYLOTRYA
Xy*lo"try*a, n. Etym: [NL., fr. Gr. xy`lon wood + (Zoöl.)

Defn: A genus of marine bivalves closely allied to Teredo, and equally destructive to timber. One species (Xylotrya fimbriata) is very common on the Atlantic coast of the United States.

XYLYL
Xy"lyl, n. Etym: [Xylo- + -yl.] (Chem.)

Defn: Any one of three metameric radicals which are characteristic respectively of the three xylenes.

XYLYLENE
Xy"lyl*ene, n. (Chem.)

Defn: Any one of three metameric radicals, CH2.C6H4.CH2, derived respectively from the three xylenes. Often used adjectively; as, xylylene alcohol.

XYRIDACEOUS
Xyr`i*da"ceous, a. (Bot.)

Defn: Of or pertaining to a natural order (Xyrideæ) of endogenous plants, of which Xyris is the type.

XYRIS
Xy"ris, n. Etym: [L., a kind of Iris, Gr. (Bot.)

YES
Yes, adv. Etym: [OE. yis, ýis, ýes, ýise, AS. gese, gise; probably fr. geá yea + swa so. sq. root188. See Yea, and So.]

Defn: Ay; yea; -- a word which expresses affirmation or consent; -- opposed to Ant: no.

Note: Yes is used, like yea, to enforce, by repetition or addition, something which precedes; as, you have done all this -- yes, you have

done more. "Yes, you despise the man books confined." Pope.

Note: "The fine distinction between `yea' and `yes,' `nay' and `no,' that once existed in English, has quite disappeared. `Yea' and `nay' in Wyclif's time, and a good deal later, were the answers to questions framed in the affirmative. `Will he come' To this it would have been replied, `Yea' or `Nay', as the case might be. But, `Will he not come' To this the answer would have been `Yes' or `No.' Sir Thomas More finds fault with Tyndale, that in his translation of the Bible he had not observed this distinction, which was evidently therefore going out even then, that is, in the reign of Henry VIII.; and shortly after it was quite forgotten." Trench.

It was during those civil troubles . . . this aspiring family reached

the zenith. Macaulay.
Zenith distance. (Astron.) See under Distance.
-- Zenith sector. (Astron.) See Sector, 3.
-- Zenith telescope (Geodesy), a telescope specially designed for determining the latitude by means of any two stars which pass the meridian about the same time, and at nearly equal distances from the zenith, but on opposite sides of it. It turns both on a vertical and a horizontal axis, is provided with a graduated vertical semicircle, and a level for setting it to a given zenith distance, and with a micrometer for measuring the difference of the zenith distances of the two stars.

ZENITHAL
Ze"nith*al, a.

Defn: Of or pertaining to the zenith. "The deep zenithal blue." Tyndall.

ZEOLITE
Ze"o*lite, n. Etym: [Gr. -lite: cf. F. zéolithe.] (Min.)

Defn: A term now used to designate any one of a family of minerals, hydrous silicates of alumina, with lime, soda, potash, or rarely baryta. Here are included natrolite, stilbite, analcime, chabazite, thomsonite, heulandite, and others. These species occur of secondary origin in the cavities of amygdaloid, basalt, and lava, also, less frequently, in granite and gneiss. So called because many of these species intumesce before the blowpipe. Needle zeolite, needlestone; natrolite.

ZEOLITIC
Ze`o*lit"ic, a.

Defn: Of or pertaining to a zeolite; consisting of, or resembling, a zeolite.

ZEOLITIFORM
Ze`o*lit"i*form, a.

Defn: Having the form of a zeolite.

ZEPHYR
Zeph"yr, n. Etym: [L. zephyrus, Gr. zéphyr.]

Defn: The west wind; poetically, any soft, gentle breeze. "Soft the zephyr blows." Gray.
As gentle As zephyrs blowing below the violet. Shak.
Zephyr cloth, a thin kind of cassimere made in Belgium; also, a waterproof fabric of wool.
-- Zephyr shawl, a kind of thin, light, embroidered shawl made of worsted and cotton.
-- Zephyr yarn, or worsted, a fine, soft kind of yarn or worsted, -- used for knitting and embroidery.

ZEPHYRUS
Zeph"y*rus, n. Etym: [L. See Zephyr.]

Defn: The west wind, or zephyr; -- usually personified, and made the most mild and gentle of all the sylvan deities.
Mild as when Zephyrus on Flora breathes. Milton.

ZEPPELIN
Zep`pe*lin" (tsep`pe*le"; Angl. zep"pe*lin), n.

Defn: A dirigible balloon of the rigid type, consisting of a cylindrical trussed and covered frame supported by internal gas cells, and provided with means of propulsion and control. It was first successfully used by Ferdinand Count von Zeppelin.

ZEQUIN
Ze"quin, n.

Defn: See Sequin.

ZERDA
Zer"da, n. Etym: [Of African origin.] (Zoöl.)

Defn: The fennec.

ZERIBA
Ze*ri"ba, n. (Mil.)

Defn: Same as Zareba.

ZERO
Ze"ro, n; pl. Zeros or Zeroes. Etym: [F. zéro, from Ar. çafrun, çifrun, empty, a cipher. Cf. Cipher.]

1. (Arith.)

Defn: A cipher; nothing; naught.

2. The point from which the graduation of a scale, as of a thermometer, commences.

Note: Zero in the Centigrade, or Celsius thermometer, and in the Réaumur thermometer, is at the point at which water congeals. The zero of the Fahrenheit thermometer is fixed at the point at which the mercury stands when immersed in a mixture of snow and common salt. In Wedgwood's pyrometer, the zero corresponds with 1077° on the Fahrenheit scale. See Illust. of Thermometer.

3. Fig.: The lowest point; the point of exhaustion; as, his patience had nearly reached zero. Absolute zero. See under Absolute.
-- Zero method (Physics), a method of comparing, or measuring, forces, electric currents, etc., by so opposing them that the pointer of an indicating apparatus, or the needle of a galvanometer, remains at, or is brought to, zero, as contrasted with methods in which the deflection is observed directly; -- called also null method.
-- Zero point, the point indicating zero, or the commencement of a scale or reckoning.

ZEST
Zest, n. Etym: [F. zeste, probably fr. L. schistos split, cleft, divided, Gr. Schism.]

1. A piece of orange or lemon peel, or the aromatic oil which may be squeezed from such peel, used to give flavor to liquor, etc.

2. Hence, something that gives or enhances a pleasant taste, or the

taste itself; an appetizer; also, keen enjoyment; relish; gusto.
Almighty Vanity! to thee they owe Their zest of pleasure, and their balm of woe. Young.
Liberality of disposition and conduct gives the highest zest and relish to social intercourse. Gogan.

3. The woody, thick skin inclosing the kernel of a walnut. [Obs.]

ZEST
Zest, v. t. [imp. & p. p. Zested; p. pr. & vb. n. Zesting.]

1. To cut into thin slips, as the peel of an orange, lemon, etc.; to squeeze, as peel, over the surface of anything.

2. To give a relish or flavor to; to heighten the taste or relish of; as, to zest wine. Gibber.

ZETA
Ze"ta, n. Etym: [L., from Gr. Zed.]

Defn: A Greek letter [z] corresponding to our z.

ZETETIC
Ze*tet"ic, a. Etym: [Gr. zététique.]

Defn: Seeking; proceeding by inquiry. Zetetic method (Math.), the method used for finding the value of unknown quantities by direct search, in investigation, or in the solution of problems. [R.] Hutton.

ZETETIC
Ze*tet"ic, n.

Defn: A seeker; -- a name adopted by some of the Pyrrhonists.

ZETETICS
Ze*tet"ics, n. Etym: [See Zetetic, a.] (Math.)

Defn: A branch of algebra which relates to the direct search for unknown quantities. [R.]

ZEUGLODON
Zeu"glo*don, n. Etym: [Gr. (Paleon.)

Defn: A genus of extinct Eocene whales, remains of which have been found in the Gulf States. The species had very long and slender bodies and broad serrated teeth. See Phocodontia.

ZEUGLODONT
Zeu"glo*dont, (Zoöl.)

Defn: Any species of Zeuglodonta.

ZEUGLODONTA
Zeu`glo*don"ta, n. pl. Etym: [NL.] (Zoöl.)

Defn: Same as Phocodontia.

ZEUGMA
Zeug"ma, n. Etym: [L., from Gr. Yoke.] (Gram.)

Defn: A figure by which an adjective or verb, which agrees with a nearer word, is, by way of supplement, referred also to another more remote; as, "hic illius arma, hic currus fuit;" where fuit, which agrees directly with currus, is referred also to arma.

ZEUGMATIC
Zeug*mat"ic, a.

Defn: Of or pertaining to zeugma; characterized by zeugma.

ZEUGOBRANCHIATA
Zeu`go*bran`chi*a"ta, n. pl. Etym: [NL., fr. Gr. (Zoöl.)

Defn: Same as Zygobranchia.

ZEUS
Zeus, n. (Gr. Myth.)

Defn: The chief deity of the Greeks, and ruler of the upper world (cf. Hades). He was identified with Jupiter.

ZEUZERIAN
Zeu*ze"ri*an, n. (Zoöl.)

Defn: Any one of a group of bombycid moths of which the genus Zeuzera is the type. Some of these moths are of large size. The goat moth is an example.

ZEYLANITE

Zey"lan*ite, n. (Min.)

Defn: See Ceylanite.

ZIBET; ZIBETH
Zib"et, Zib"eth, n. Etym: [Cf. It. zibetto. See Civet.] (Zoöl.)

Defn: A carnivorous mammal (Viverra zibetha) closely allied to the civet, from which it differs in having the spots on the body less distinct, the throat whiter, and the black rings on the tail more numerous.

Note: It inhabits India, Southern China, and the East Indies. It yields a perfume similar to that of the civet. It is often domesticated by the natives, and then serves the same purposes as the domestic cat. Called also Asiatic, or Indian, civet.

ZIEGA
Zie"ga, n.

Defn: Curd produced from milk by adding acetic acid, after rennet has ceased to cause coagulation. Brande & C.

ZIETRISIKITE
Zie`tri*si"kite, n. (Min.)

Defn: A mineral wax, vert similar to ozocerite. It is found at Zietrisika, Moldavia, whence its name.

ZIF

Zif, n. Etym: [Heb. ziv.]

Defn: The second month of the Jewish ecclesiastical year, corresponding to our May.

ZIGGER; ZIGHYR
Zig"ger, Zig"hyr, v. i. (Mining)

Defn: Same as Sicker. [Prov. Eng.] Raymond.

ZIGZAG
Zig"zag`, n. Etym: [F. zigzag, G. zickzack, from zacke, zacken, a dentil, tooth. Cf. Tack a small nail.]

1. Something that has short turns or angles.
The fanatics going straight forward and openly, the politicians by the surer mode of zigzag. Burke.

2. (Arch.)

Defn: A molding running in a zigzag line; a chevron, or series of chevrons. See Illust. of Chevron, 3.

3. (Fort.)

Defn: See Boyau.

ZIGZAG
Zig"zag`, a.

Defn: Having short, sharp turns; running this way and that in an onward course.

ZIGZAG
Zig"zag`, v. t. [imp. & p. p. Zigzagged; p. pr. & vb. n. Zigzagging.]

Defn: To form with short turns.

ZIGZAG
Zig"zag`, v. i.

Defn: To move in a zigzag manner; also, to have a zigzag shape. R. Browning.

ZIGZAGGERY
Zig"zag`ger*y, n.

Defn: The quality or state of being zigzag; crookedness. [R.]
The . . . zigzaggery of my father's approaches. Sterne.

ZIGZAGGY
Zig"zag`gy, a.

Defn: Having sharp turns. Barham.

ZIKKURAT
Zik"ku*rat, n.

Defn: A temple tower of the Babylonians or Assyrians, consisting of a lofty pyramidal structure, built in successive stages, with outside

staircases, and a shrine at the top.

ZILLA
Zil"la, n. (Bot.)

Defn: A low, thorny, suffrutescent, crucifeous plant (Zilla myagroides) found in the deserts of Egypt. Its leaves are boiled in water, and eaten, by the Arabs.

ZILLAH
Zil"lah, n. Etym: [Ar. zila.]

Defn: A district or local division, as of a province. [India]

ZIMB
Zimb, n. (Zoöl.)

Defn: A large, venomous, two-winged fly, native of Abyssinia. It is allied to the tsetse fly, and, like the latter, is destructive to cattle.

ZIMENT-WATER
Zim"ent-wa`ter, n. Etym: [G. cement-wasser. See Cement.]

Defn: A kind of water found in copper mines; water impregnated with copper.

ZIMOCCA
Zi*moc"ca, n.

Defn: A sponge (Euspongia zimocca) of flat form and fine quality, from the Adriatic, about the Greek islands, and the coast of Barbary.

ZINC
Zinc, n. Etym: [G. zinc, probably akin to zinn tin: cf. F. zinc, from the German. Cf. Tin.] (Chem.)

Defn: An abundant element of the magnesium-cadmium group, extracted principally from the minerals zinc blende, smithsonite, calamine, and franklinite, as an easily fusible bluish white metal, which is malleable, especially when heated. It is not easily oxidized in moist air, and hence is used for sheeting, coating galvanized iron, etc. It is used in making brass, britannia, and other alloys, and is also largely consumed in electric batteries. Symbol Zn. Atomic weight 64.9 [Formerly written also zink.] Butter of zinc (Old Chem.), zinc chloride, ZnCl2, a deliquescent white waxy or oily substance.
-- Oxide of zinc. (Chem.) See Zinc oxide, below.
-- Zinc amine (Chem.), a white amorphous substance, Zn(NH2)2, obtained by the action of ammonia on zinc ethyl; -- called also zinc amide.
-- Zinc amyle (Chem.), a colorless, transparent liquid, composed of zinc and amyle, which, when exposed to the atmosphere, emits fumes, and absorbs oxygen with rapidity.
-- Zinc blende Etym: [cf. G. zinkblende] (Min.), a native zinc sulphide. See Blende, n. (a) -- Zinc bloom Etym: [cf. G. zinkblumen flowers of zinc, oxide of zinc] (Min.), hydrous carbonate of zinc, usually occurring in white earthy incrustations; -- called also hydrozincite.
-- Zinc ethyl (Chem.), a colorless, transparent, poisonous liquid, composed of zinc and ethyl, which takes fire spontaneously on

exposure to the atmosphere.
-- Zinc green, a green pigment consisting of zinc and cobalt oxides;
-- called also Rinmann's green.
-- Zinc methyl (Chem.), a colorless mobile liquid Zn(CH3)2, produced by the action of methyl iodide on a zinc sodium alloy. It has a disagreeable odor, and is spontaneously inflammable in the air. It has been of great importance in the synthesis of organic compounds, and is the type of a large series of similar compounds, as zinc ethyl, zinc amyle, etc.
-- Zinc oxide (Chem.), the oxide of zinc, ZnO, forming a light fluffy sublimate when zinc is burned; -- called also flowers of zinc, philosopher's wool, nihil album, etc. The impure oxide produced by burning the metal, roasting its ores, or in melting brass, is called also pompholyx, and tutty.
-- Zinc spinel (Min.), a mineral, related to spinel, consisting essentially of the oxides of zinc and aluminium; gahnite.
-- Zinc vitriol (Chem.), zinc sulphate. See White vitriol, under Vitriol.
-- Zinc white, a white powder consisting of zinc oxide, used as a pigment.

ZINC
Zinc, v. t. [imp. & p. p. Zincked or Zinced (; p. pr. & vb. n. Zincking or Zincing (.]

Defn: To coat with zinc; to galvanize.

ZINCANE
Zinc"ane, n. (Chem.)

Defn: Zinc chloride. [Obs.]

ZINCIC
Zinc"ic, a. (Chem.)

Defn: Pertaining to, containing, or resembling, zinc; zincous.

ZINCIDE
Zinc"ide, n.

Defn: A binary compound of zinc. [R.]

ZINCIFEROUS
Zinc*if"er*ous, a. Etym: [Zinc + -ferous.]

Defn: Containing or affording zinc.

ZINCIFICATION
Zinc`i*fi*ca"tion, n.

Defn: The act or process of applying zinc; the condition of being zincified, or covered with zinc; galvanization.

ZINCIFY
Zinc"i*fy, v. t. Etym: [Zinc + -fy.] (Metal.)

Defn: To coat or impregnate with zinc.

ZINCITE
Zinc"ite, n. (Min.)

Defn: Native zinc oxide; a brittle, translucent mineral, of an orange-red color; -- called also red zinc ore, and red oxide of zinc.

ZINCKING; ZINCING
Zinck"ing, or Zinc"ing, n. (Metal.)

Defn: The act or process of applying zinc; galvanization.

ZINCKY
Zinck"y

Defn: , Pertaining to zinc, or having its appearance. [Written also zinky.]

ZINCO-
Zin"co-.

Defn: A combining form from zinc; in chemistry, designating zinc as an element of certain double compounds. Also used adjectively.

ZINCODE
Zinc"ode, n. Etym: [Zinc + -ode, as in electrode.] (Elec.)

Defn: The positive electrode of an electrolytic cell; anode. [R.] Miller.

ZINCOGRAPH
Zin"co*graph, n.

Defn: A zinc plate prepared for printing by zincography; also, a print from such a plate.

ZINCOGRAPHER
Zin*cog"ra*pher, n.

Defn: Am engraver on zinc.

ZINCOGRAPHIC; ZINCOGRAPHICAL
Zin`co*graph"ic, Zin`co*graph"ic*al, a.

Defn: Of or pertaining to zincography; as, zincographic processes.

ZINCOGRAPHY
Zin*cog"ra*phy, n. Etym: [Zinco- + -graphy.]

Defn: The art or process of engraving or etching on zinc, in which the design is left in relief in the style of a wood cut, the rest of the ground being eaten away by acid.

ZINCOID
Zinc"oid, a. Etym: [Zinc + -oid.]

Defn: Pertaining to, or resembling, zinc; -- said of the electricity of the zincous plate in connection with a copper plate in a voltaic circle; also, designating the positive pole. [Obs.]

ZINCO-POLAR
Zin`co-po"lar, a. Etym: [Zinco- + polar.] (Elec.)

Defn: Electrically polarized like the surface of the zinc presented to the acid in a battery, which has zincous affinity. [Obs.]

ZINCOUS
Zinc"ous, a.

1. (Chem.)
(a) Of, pertaining to, or containing, zinc; zincic; as, zincous salts.
(b) Hence, formerly, basic, basylous, as opposed to chlorous.

2. (Physics)

Defn: Of or pertaining to the positive pole of a galvanic battery; electro-positive.

ZINGARO
Zin"ga*ro, n.; pl. Zingari. Etym: [It.]

Defn: A gypsy.

ZINGEL
Zing"el, n. (Zoöl.)

Defn: A small, edible, freshwater European perch (Aspro zingel), having a round, elongated body and prominent snout.

ZINGIBERACEOUS
Zin`gi*ber*a"ceous, a. Etym: [L. zingiber ginger. See Ginger.] (Bot.)

Defn: Of or pertaining to ginger, or to a tribe (Zingibereæ) of endogenous plants of the order Scitamineæ. See Scitamineous.

ZINK
Zink, n. (Chem.)

Defn: See Zinc. [Obs.]

ZINKENITE
Zink"en*ite, n. Etym: [From Zinken, director at one time of the Hanoverian mines.] (Min.)

Defn: A steel-gray metallic mineral, a sulphide of antimony and lead.

ZINKY
Zink"y, a.

Defn: See Zincky. Kirwan.

ZINNIA
Zin"ni*a, n. Etym: [NL. So called after Professor Zinn, of Göttingen.] (Bot.)

Defn: Any plant of the composite genus Zinnia, Mexican herbs with opposite leaves and large gay-colored blossoms. Zinnia elegans is the commonest species in cultivation.

ZINNWALDITE
Zinn"wald*ite, n. Etym: [So called after Zinnwald, in Bohemia, where it occurs.] (Min.)

Defn: A kind of mica containing lithium, often associated with tin ore.

ZINSANG
Zin"sang, n. (Zoöl.)

Defn: The delundung.

ZINZIBERACEOUS
Zin`zi*ber*a"ceous, a. (Bot.)

Defn: Same as Zingiberaceous.

ZION
Zi"on, n. Etym: [Heb. tsiy, originally, a hill.]

1. (Jewish Antiq.)

Defn: A hill in Jerusalem, which, after the capture of that city by the Israelites, became the royal residence of David and his successors.

2. Hence, the theocracy, or church of God.

3. The heavenly Jerusalem; heaven.

ZIONISM
Zi"on*ism, n. [Zion + -ism.]

Defn: Among the Jews, a theory, plan, or movement for colonizing their own race in Palestine, the land of Zion, or, if that is impracticable, elsewhere, either for religious or nationalizing purposes; -- called also Zion movement. --Zi"on*ist, n. --Zi`on*is"tic (#), a.

ZIP
Zip, n. [Imitative.]

Defn: A hissing or sibilant sound such as that made by a flying bullet.

ZIP
Zip, v. i.

Defn: To make, or move with, such a sound.

ZIPHIOID
Ziph"i*oid, n. (Zoöl.)

Defn: See Xiphioid.

ZIRCO-
Zir"co-. (Chem.)

Defn: A combining form (also used adjectively) designating zirconium as an element of certain double compounds; zircono-; as in zircofluoric acid, sodium zircofluoride.

ZIRCOFLUORIDE

Zir`co*flu"or*ide, n. (Chem.)

Defn: A double fluoride of zirconium and hydrogen, or some other positive element or radical; as, zircofluoride of sodium.

ZIRCON
Zir"con, n. Etym: [F., the same word as jargon. See Jargon a variety of zircon.] (Min.)

Defn: A mineral occurring in tetragonal crystals, usually of a brown or gray color. It consists of silica and zirconia. A red variety, used as a gem, is called hyacinth. Colorless, pale-yellow or smoky-brown varieties from Ceylon are called jargon. Zircon syenite, a coarse-grained syenite containing zircon crystals and often also elæolite. It is largely developed in Southern Norway.

ZIRCONA
Zir"co*na, n. Etym: [NL.] (Chem.)

Defn: Zirconia.

ZIRCONATE
Zir"con*ate, n. (Chem.)

Defn: A salt of zirconic acid.

ZIRCONIA
Zir*co"ni*a, n. Etym: [NL.] (Chem.)

Defn: The oxide of zirconium, obtained as a white powder, and

possessing both acid and basic properties. On account of its infusibility, and brilliant luminosity when incandescent, it is used as an ingredient of sticks for the Drummomd light.

ZIRCONIC
Zir*con"ic, a. (Chem.)

Defn: Pertaining to, containing, or resembling, zirconium; as, zirconic oxide; zirconic compounds. Zirconic acid, an acid of zirconium analogous to carbonic and silicic acids, known only in its salts.

ZIRCONIUM
Zir*co"ni*um, n. Etym: [NL.] (Chem.)

Defn: A rare element of the carbon-silicon group, intermediate between the metals and nonmetals, obtained from the mineral zircon as a dark sooty powder, or as a gray metallic crystalline substance. Symbol Zr. Atomic weight, 90.4.

ZIRCON LIGHT
Zir"con light. (Physics)

Defn: A light, similar to the calcium light, produced by incandescent zirconia.

ZIRCONO
Zir"co*no.

Defn: See Zirco-.

ZIRCONOID
Zir"con*oid, n. Etym: [Zircon + oid.] (Crystallog.)

Defn: A double eight-sided pyramid, a form common with tetragonal crystals; -- so called because this form often occurs in crystals of zircon.

ZITHER
Zith"er, n. Etym: [G. zither. See Cittern.] (Mus.)

Defn: An instrument of music used in Austria and Germany. It has from thirty to forty wires strung across a shallow sounding-board, which lies horizontally on a table before the performer, who uses both hands in playing on it.

Note: [Not to be confounded with the old lute-shaped cittern, or cithern.]

ZITTERN
Zit"tern, n. (Min.)

Defn: See Cittern.

ZIZANIA
Zi*za"ni*a, n. Etym: [NL., from L. zizanium darnel, cockle, Gr.
(Bot.)

Defn: A genus of grasses including Indian rice. See Indian rice, under Rice.

ZIZEL
Ziz"el, n. Etym: [G. ziesel.] (Zoöl.)

Defn: The suslik. [Written also zisel.]

ZIZITH
Zi"zith, n. pl. [Heb. tsitsith.]

Defn: The tassels of twisted cords or threads on the corners of the upper garment worn by strict Jews. The Hebrew for this word is translated in both the Authorized and Revised Versions (Deut. xxii. 12) by the word "fringes."

ZOANTHACEA
Zo`an*tha"ce*a, n. pl. Etym: [NL., from Gr. (Zoöl.)

Defn: A suborder of Actinaria, including Zoanthus and allied genera, which are permanently attached by their bases.

ZOANTHARIA
Zo`an*tha"ri*a, n. pl. Etym: [NL.] (Zoöl.)

Defn: Same as Anthozoa.

ZOANTHARIAN
Zo`an*tha"ri*an, a. (Zoöl.)

Defn: Of or pertaining to the Zoantharia.
-- n.

Defn: One of the Anthozoa.

ZOANTHODEME
Zo*an"tho*deme, n. Etym: [See Zoantharia, and Deme.] (Zoöl.)

Defn: The zooids of a compound anthozoan, collectively.

ZOANTHOID
Zo*an"thoid, a. Etym: [See Zoantharia, and -oid.] (Zoöl.)

Defn: Of or pertaining to the Zoanthacea.

ZOANTHROPY
Zo*an"thro*py, n. Etym: [Gr. (Med.)

Defn: A kind of monomania in which the patient believes himself transformed into one of the lower animals.

ZOANTHUS
Zo*an"thus, n. Etym: [NL. See Zoantharia.] (Zoöl.)

Defn: A genus of Actinaria, including numerous species, found mostly in tropical seas. The zooids or polyps resemble small, elongated actinias united together at their bases by fleshy stolons, and thus forming extensive groups. The tentacles are small and bright colored.

ZOBO
Zo"bo, n. Etym: [Native name.] (Zoöl.)

Defn: A kind of domestic cattle reared in Asia for its flesh and milk. It is supposed to be a hybrid between the zebu and the yak.

ZOCCO; ZOCCOLO
Zoc"co, Zoc"co*lo, n. Etym: [It. fr. L. socculus. See Socle, and cf. Zacco.] (Arch.)

Defn: Same as Socle.

ZOCLE
Zo"cle, n. (Arch.)

Defn: Same as Socle.

ZODIAC
Zo"di*ac, n. Etym: [F. zodiaque (cf. It. zodiaco), fr. L. zodiacus, Gr.

1. (Astron.)
(a) An imaginary belt in the heavens, 16º or 18º broad, in the middle of which is the ecliptic, or sun's path. It comprises the twelve constellations, which one constituted, and from which were named, the twelve signs of the zodiac.
(b) A figure representing the signs, symbols, and constellations of the zodiac.

Defn: See under Zygosphene.

ZYGAPOPHYSIS
Zyg`a*poph"y*sis, n.; pl. Zygapophyses. Etym: [Gr. apophysis.] (Anat.)

Defn: One of the articular processes of a vertebra, of which there are usually four, two anterior and two posterior. See under Vertebra.
-- Zyg`ap*o*phys"i*al, a.

ZYGENID
Zyg"e*nid, n. Etym: [Cf. Gr. (Zoöl.)

Defn: Any one of numerous species of moths of the family Zygænidæ, most of which are bright colored. The wood nymph and the vine forester are examples. Also used adjectively.

ZYGOBRANCHIA
Zyg`o*bran"chi*a, n. pl. Etym: [NL., from Gr. (Zoöl.)

Defn: A division of marine gastropods in which the gills are developed on both sides of the body and the renal organs are also paired. The abalone (Haliotis) and the keyhole limpet (Fissurella) are examples.

ZYGOBRANCHIATE

Zyg`o*bran"chi*ate, a. (Zoöl.)

Defn: Of or pertaining to the Zygobranchia.

ZYGODACTYL; ZYGODACTYLE
Zyg`o*dac"tyl, Zyg`o*dac"tyle, n. Etym: [See Zygodactylic.] (Zoöl.)

Defn: Any zygodactylous bird.

ZYGODACTYLAE
Zyg`o*dac"ty*læ, n. pl. Etym: [NL.] (Zoöl.)

Defn: The zygodactylous birds. In a restricted sense applied to a division of birds which includes the barbets, toucans, honey guides, and other related birds.

ZYGODACTYLI
Zyg`o*dac"ty*li, n. pl. Etym: [NL.] (Zoöl.)

Defn: Same as Scansores.

ZYGODACTYLIC; ZYGODACTYLOUS
Zyg`o*dac"ty*lic, Zyg`o*dac"tyl*ous, a. Etym: [Gr. zygodactyle.] (Zoöl.)

Defn: Yoke-footed; having the toes disposed in pairs; -- applied to birds which have two toes before and two behind, as the parrot, cuckoo, woodpecker, etc.

ZYGOMA

Zy*go"ma, n. Etym: [NL., fr. Gr. (Anat.)
(a) The jugal, malar, or cheek bone.
(b) The zygomatic process of the temporal bone.
(c) The whole zygomatic arch.

ZYGOMATIC
Zyg`o*mat"ic, a. Etym: [Cf. F. zygomatique.] (Anat.)

Defn: Of, pertaining to, or in the region of, the zygoma. Zygomatic arch, the arch of bone beneath the orbit, formed in most mammals by the union of the malar, or jugal, with the zygomatic process of the temporal bone. In the lower vertebrates other bones may help to form it, and there may be two arches on each side of the skull, as in some reptiles.
-- Zygomatic process, a process of the temporal or squamosal bone helping to form the zygomatic arch.

ZYGOMORPHIC; ZYGOMORPHOUS
Zyg`o*mor"phic, Zyg`o*mor"phous, a. Etym: [Gr. (Biol.)

Defn: Symmetrical bilaterally; -- said of organisms, or parts of organisms, capable of division into two symmetrical halves only in a single plane.

ZYGOPHYTE
Zy"go*phyte, n. Etym: [Gr. (Bot.)

Defn: Any plant of a proposed class or grand division (Zygophytes, Zygophyta, or Zygosporeæ), in which reproduction consists in the union of two similar cells. Cf. Oöphyte.

ZYGOSIS
Zy*go"sis, n. Etym: [NL., fr. Gr. (Biol.)

Defn: Same as Conjugation.

ZYGOSPERM
Zyg"o*sperm, n. Etym: [Gr. sperm.] (Bot.)

Defn: A spore formed by the union of the contents of two similar cells, either of the same or of distinct individual plants. Zygosperms are found in certain orders of algæ and fungi.

ZYGOSPHENE
Zyg"o*sphene, n. Etym: [Gr. (Anat.)

Defn: A median process on the front part of the neural arch of the vertebræ of most snakes and some lizards, which fits into a fossa, called the zygantrum, on the back part of the arch in front.

ZYGOSPORE
Zyg"o*spore, n. Etym: [Gr. spore.] (Bot.)
(a) Same as Zygosperm.
(b) A spore formed by the union of several zoöspores; -- called also zygozoöspore.

ZYLONITE
Zy"lon*ite, n. Etym: [Gr.

Defn: Celluloid.

ZYMASE
Zym"ase, n. Etym: [From Zyme.] (Physiol. Chem.)

Defn: A soluble ferment, or enzyme. See Enzyme.

ZYME
Zyme, n. Etym: [Gr.

1. A ferment.

2. (Med.)

Defn: The morbific principle of a zymotic disease. Quain.

ZYMIC
Zym"ic, a. (Old Chem.)

Defn: Pertaining to, or produced by, fermentation; -- formerly, by confusion, used to designate lactic acid.

ZYMOGEN
Zym"o*gen, n. Etym: [Zyme + -gen.] (Physiol. Chem.)

Defn: A mother substance, or antecedent, of an enzyme or chemical ferment; -- applied to such substances as, not being themselves actual ferments, may by internal changes give rise to a ferment. The pancreas contains but little ready-made ferment, though there is present in it a body, zymogen, which gives birth to the ferment. Foster.

ZYMOGENE
Zym"o*gene, n. Etym: [Zyme + root of Gr. (Biol.)

Defn: One of a physiological group of globular bacteria which produces fermentations of diverse nature; -- distinguished from pathogene.

ZYMOGENIC
Zym`o*gen"ic, a. (Biol.)
(a) Pertaining to, or formed by, a zymogene.
(b) Capable of producing a definite zymogen or ferment. Zymogenic organism (Biol.), a microörganism, such as the yeast plant of the Bacterium lactis, which sets up certain fermentative processes by which definite chemical products are formed; -- distinguished from a pathogenic organism. Cf. Micrococcus.

ZYMOLOGIC; ZYMOLOGICAL
Zy`mo*log"ic, Zy`mo*log"ic*al, a. Etym: [Cf. F. zymologique.]

Defn: Of or pertaining to zymology.

ZYMOLOGIST
Zy*mol"o*gist, n.

Defn: One who is skilled in zymology, or in the fermentation of liquors.

ZYMOLOGY
Zy*mol"o*gy, n. Etym: [Zyme + -logy: cf. F. zymologie.]

Defn: A treatise on the fermentation of liquors, or the doctrine of fermentation. [Written also zumology.]

ZYMOLYSIS
Zy*mol"y*sis, n. [NL. See Zyme, and Lysis.] (Physiol. Chem.)

Defn: The action of enzymes; also, the changes produced by such action. --Zy`mo*lyt"ic (#), a.

ZYMOME
Zy"mome, n. Etym: [Gr. (Old Chem.)

Defn: A glutinous substance, insoluble in alcohol, resembling legumin; -- now called vegetable fibrin, vegetable albumin, or gluten casein.

ZYMOMETER; ZYMOSIMETER
Zy*mom"e*ter, Zy`mo*sim"e*ter, n. Etym: [Gr. -meter: cf. F. zymosimètre.]

Defn: An instrument for ascertaining the degree of fermentation occasioned by the mixture of different liquids, and the degree of heat which they acquire in fermentation.

ZYMOPHYTE
Zym"o*phyte, n. Etym: [Zyme + Gr. (Physiol. Chem.)

Defn: A bacteroid ferment.

ZYMOSE
Zy*mose", n. (Chem.)

Defn: Invertin.

ZYMOSIS
Zy*mo"sis, n. Etym: [NL., fr. Gr. (Med.)
(a) A fermentation; hence, an analogous process by which an infectious disease is believed to be developed.
(b) A zymotic disease. [R.]

ZYMOTIC
Zy*mot"ic, a. Etym: [Gr.

1. Of, pertaining to, or caused by, fermentation.

2. (Med.)

Defn: Designating, or pertaining to, a certain class of diseases. See Zymotic disease, below. Zymotic disease (Med.), any epidemic, endemic, contagious, or sporadic affection which is produced by some morbific principle or organism acting on the system like a ferment.

ZYTHEM
Zy"them, n.

Defn: See Zythum.

ZYTHEPSARY
Zy*thep"sa*ry, n. Etym: [Gr.

Defn: A brewery. [R.]

ZYTHUM
Zy"thumn. Etym: [L.fr. Gr.

Defn: A kind of ancient malt beverage; a liquor made from malt and wheat. [Written also zythem.]

Updated editions will replace the previous one--the old editions will be renamed.

Creating the works from public domain print editions means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg-tm electronic works to protect the PROJECT GUTENBERG-tm concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for the eBooks, unless you receive specific permission. If you do not charge anything for copies of this eBook, complying with the rules is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. They may be modified and printed and given away--you may do practically ANYTHING with public domain eBooks. Redistribution is subject to the trademark license, especially commercial redistribution.

*** START: FULL LICENSE ***

THE FULL PROJECT GUTENBERG LICENSE
PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg-tm mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase "Project Gutenberg"), you agree to comply with all the terms of the Full Project Gutenberg-tm License (available with this file or online at http://gutenberg.net/license).

Section 1. General Terms of Use and Redistributing Project Gutenberg-tm electronic works

1.A. By reading or using any part of this Project Gutenberg-tm electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg-tm electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg-tm electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. "Project Gutenberg" is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg-tm electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg-tm electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg-tm electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation ("the Foundation" or PGLAF), owns a compilation copyright in the collection of Project Gutenberg-tm electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an

individual work is in the public domain in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg-tm mission of promoting free access to electronic works by freely sharing Project Gutenberg-tm works in compliance with the terms of this agreement for keeping the Project Gutenberg-tm name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg-tm License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg-tm work. The Foundation makes no representations concerning the copyright status of any work in any country outside the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg-tm License must appear prominently whenever any copy of a Project Gutenberg-tm work (any work on which the phrase "Project Gutenberg" appears, or with which the phrase "Project Gutenberg" is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at www.gutenberg.net

1.E.2. If an individual Project Gutenberg-tm electronic work is derived from the public domain (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase "Project Gutenberg" associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg-tm trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg-tm electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg-tm License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg-tm License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg-tm.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without

prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg-tm License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg-tm work in a format other than "Plain Vanilla ASCII" or other format used in the official version posted on the official Project Gutenberg-tm web site (www.gutenberg.net), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original "Plain Vanilla ASCII" or other form. Any alternate format must include the full Project Gutenberg-tm License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg-tm works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg-tm electronic works provided that

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg-tm works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg-tm trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments

must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."

- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg-tm License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg-tm works.

- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.

- You comply with all other terms of this agreement for free distribution of Project Gutenberg-tm works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg-tm electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from both the Project Gutenberg Literary Archive Foundation and Michael Hart, the owner of the Project Gutenberg-tm trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread public domain works in creating the Project Gutenberg-tm collection. Despite these efforts, Project Gutenberg-tm electronic works, and the medium on which they may be stored, may contain "Defects," such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the "Right of Replacement or Refund" described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg-tm trademark, and any other party distributing a Project Gutenberg-tm electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH F3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE
LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can

receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS' WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTIBILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg-tm electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg-tm electronic works, harmless from all liability, costs and expenses, including legal fees,

that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg-tm work, (b) alteration, modification, or additions or deletions to any Project Gutenberg-tm work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg-tm

Project Gutenberg-tm is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg-tm's goals and ensuring that the Project Gutenberg-tm collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg-tm and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation web page at http://www.pglaf.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non profit 501(c)(3) educational corporation organized under the laws of the

state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Its 501(c)(3) letter is posted at http://pglaf.org/fundraising. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's principal office is located at 4557 Melan Dr. S. Fairbanks, AK, 99712., but its volunteers and employees are scattered throughout numerous locations. Its business office is located at 809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887, email business@pglaf.org. Email contact links and up to date contact information can be found at the Foundation's web site and official page at http://pglaf.org

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg-tm depends upon and cannot survive without wide spread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine readable form accessible by the widest array of equipment including outdated equipment. Many small donations ($1 to $5,000) are particularly important to maintaining tax exempt

status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit http://pglaf.org

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg Web pages for current donation methods and addresses. Donations are accepted in a number of other ways including including checks, online payments and credit card donations. To donate, please visit: http://pglaf.org/donate

Section 5. General Information About Project Gutenberg-tm electronic works.

Professor Michael S. Hart is the originator of the Project Gutenberg-tm

concept of a library of electronic works that could be freely shared with anyone. For thirty years, he produced and distributed Project Gutenberg-tm eBooks with only a loose network of volunteer support.

Project Gutenberg-tm eBooks are often created from several printed editions, all of which are confirmed as Public Domain in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our Web site which has the main PG search facility:

http://www.gutenberg.net

This Web site includes information about Project Gutenberg-tm, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
