INSECT FEET.

A NEW, invented Lamp is called an insect trap is now in use at the Exchange. Hotel, and the public are invited to call and see the Exchange-Hotel, at which an elegant and convenient room and comfortable bed, can at any time be had.

As a complete protection against the annoyance from all wing insects in warm weather, among the first inconvenience in Cotton, Sugar Houses and Dwellings, this lamp is considered peculiarly desirable. It will give to the inhabitants of warm climates a comfort and luxury no other before approached by any other invention. It is the only one ever suspended from the ceiling of a room, inside of a tree, or any place, and is in fact, in every sense, portable. It is said may be carried or suspended at pleasure, and burn from twenty to thirty hours, constantly filled by mere trifling work of large quantity of oil, and requires the time and be as much out of the way as a sugar bowl lamp, and yet, it is said, may be as quickly unlatched and perfectly put on. This lamp is not to be the best or to be left to rest on the way will not require more than one minute to put it in or take it out. It is an ornament to the room instead of an eyesore, and is so simple in its construction that it cannot get out of order. It is in use in a very large room, in which there are two sleeping rooms, and is certainly free to all travellers, superior, at a greater distance than any other lamp. People will never know the effects of the mosquito, and yet, in some of the warm southern country, and they say one of these is only to have one of this lamp, and they may be assured of a good night's rest. It is not to be neglected any longer, for it is the best of its kind, and must soon be used by every family either in the cities or the country.

The subscriber is the inventor of the insect trap, appears to be a great and valuable invention, and is prepared to contract for the erection of its channel through the Rapids of the Ohio River, and to do the work of the Ohio River, and to do the work in accordance with a plan and estimate made by the late T. Toubat, Civil Engineer, of the State of Louisiana, to be filed with an application for a charter that purpose by the Legislature of the State, all which can be seen at the office of the Board in the city of New Orleans, on application to E. Romanzo, Secretary, No. 28 Old Levee Street.

The persons or persons contracting to do this work will be required to give security in the sum of $100,000 sufficient security, or a sum at least the full amount of the contract, and to stipulate that one half of the value of the work as it goes on shall be delivered to the Board, to be applied to the payment of the contract. It is sufficiently believed that high advantageous terms can be offered to such persons as may be inclined to undertake the contract for work of the character here proposed to be done.

THOS. W. CHINN,
President of the Board of Public Works.

The Red River Whig at Alexandria, will please insert the above twice a week for two months, and hand in the bill to E. Romanzo, Secretary of the Board of Public Works, Old Levee.

DENTISTRY.—Dr. Dubois, of the Faculty of Paris, Member of the Medical College of Louisiana, Dentist of the Faculty of Paris, respectfully invites the attention of the public to his new method of inserting artificial teeth, which he has practised for the last three years. The great advantage is limited to the use of the upper jaw, for which he has invented a new method of fastening the teeth, which is perfectly secure, and which no other in the city.
