

Improving the Iris Database

Luca Giese

13th September 2020

Some guidelines for people interested in

will review your submission and update the database so that the whole ClamAV user community can take benefit from it.

Never send virus samples to ClamAV mailing-lists or deor

1. Set up a virtual host for
`http://database.clamav.net`, `http://db.*.clamav.net` and `http://clama`

3. Download the following files:

clam-clientsync.conf

clam-clientsync

authorized_keys_shell

authorized_keys_noshell

authorized_keys_shell.sig

authorized_ke

3. Next, you need to notify `rsync1.clamav.net` that a new database is available:
