Preservation of the Sight.

MR. C. DUHAMEL, optician, No. 46 Chartres street, has to inform all those whose sight is defective that he has just received a fresh invoice of patent Cylindrical Glasses, approved by the most eminent Oculists in Europe and Drs. Beard, Pennisson, Crawcour, Nee and others in New Orleans. The curb is such that these glasses can be used without the least danger to the weakest eyes.

The most skillful opticians have made a report declaring that the above articles are unquestionably the best for the preservation and improvement of the sight.

Their superiority over other glasses consists in the fact, being equally divided over the whole surface, instead of being in the center only, as in the case with spectacles and glasses generally. The peculiar position of the cylindrical glasses allows them besides automatic, and, consequently, much clearer than the others.

Near-sighted persons will find a great improvement in these glasses.

A pattern showing the advantages of these new glasses will be exhibited and explained, on application to M. Duhamel, to all those who may be desirous of being further informed on the subject. feb11
