Creole Table Mustard.

PREPARED BY LABROQUE.

THIS Mustard is, both to taste and odor, of the most peculiar kind, and has over all other preparations of the sort an indisputable superiority. In the first place, it is no way heating, which is a very just cause of complaint against other mustards. It stimulates the palate, but This preparation does not contain any ingredients capable of neutralizing constituent parts of the mustard seed, (Sinapis Nigra) which most of the manufacturers are ignorant of, and do not scruple to add for increasing the pungency of their mustard, the most obnoxious salts. Some use as far as to make use of a mixture of which the non-coconut oil substance is extracted and make up for the deficiency with other substances, and give to the mustard powders an artificial tart by adding nitrat of carbonate of mosaic and strongly pungent substances. You cannot detect the presence of the latter by the taste, but it produces a tingling in the throat and colds, which the tart of the genuine article is almost or entirely unknown to feel.
