

eli::mutil::quad::simpson
::internal_recurse

```
graph LR; A["eli::mutil::quad::simpson  
::internal_recurse"] --> B["eli::mutil::quad::simpson  
::simple"]
```

A diagram illustrating a transition between two states. On the left, a gray rectangular box contains the text "eli::mutil::quad::simpson" on the first line and "::internal_recurse" on the second line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text "eli::mutil::quad::simpson" on the first line and "::simple" on the second line. Both boxes have a thin black border.
