INSECT TENT.

A NEWLY invented article called the insect tent, is now on sale at the Hardware store of Messrs. Ward & Ashton. It is a very light and elegant article, of simple construction, and so light portable and comfortable, that it must meet with universal approbation. It is a complete protection against the bite of all winged insects, and must be a great comfort to those who are obliged to sleep in a room, the tenant of which has taken up his abode with the insects, and who may be desirable to be at any hour of the night, to avoid the annoyance of musquitoes, and other insects. Mosquitoes, and other insects, are the cause of much sickness, and a great deal of suffering to those who may be obliged to be out at night, or to sleep in a room, in which they have taken up their abode. It is a very cheap article, and from its portability, it can be used in any place, and in any way, as a mosquito bar, or canopy, or tent, for the sick, or for the use of the family, or for a party of pleasure, or for the use of the sick, or for a party of pleasure, or for the use of the sick, or for a party of pleasure, or for the use of the sick
