COLDS, IRRITATIONS, INFLAMMATIONS.

BRIANT'S Anti-Phlogistic SYRUP

PATENTED—Paris, St. Denis street, No. 137. Briant's Drug Store.

This SYRUP, PREPARED SPECIALLY for the treatment and prompt CURE of the above named diseases, has been prescribed for upwards of thirty years with constant success by the most distinguished Physicians, members of the Academy of Medicine, and Professors of the Faculty in Paris, particularly by Messrs. FOUQUIER, DUBOIS (D'ERSANT) and [illegible]. The illustrious VAUQUELIN gave them his qualified approval.

A patent has been delivered to the discoverer after an examination by Messrs. THENARD, DUMAS, [illegible], a member of the Institute of France, and a favorable report presented by the Royal Academy of Medicine, which condemns all the properties of pectoral syrups. Quite recently, Messrs. CHEVALIER, DUBOISKY and LASSAIGNE were called upon to make a report on BRIANT'S ANTI-PHLOGISTIC SYRUP, before a commission appointed by the Academy, which declared: *That this syrup is prepared with the properties of which make it highly favorable to the cure of diseases of the chest.*

Briant's Syrup is also used with equal success in cures arising from all kinds of *irritations and inflammations*, *painful splitting of blood, croup, whooping-cough, dysentery, &c. &c.*

N. B.—Every bottle of this Syrup of genuine comes from the pharmacy of J. LAMOUROUX & FILS, [illegible] BRIANT, their predecessor. The glass is green and is stamped "VERRERIE DE MASSIERE A BRIANT Fils." MALFESTE, metallic cap, made by DURRE, bears the seal of BRIANT. Printed instructions accompany each bottle.

DEPOTS: In New Orleans in every apothecary store; but *especially* at Fonteneau, Dupuy, Dupont, Arnaud and Royal streets and E. P. Dupuy, Pharmacist, in New York, sold by Fougera, Beekman St. Mexico, by E. Martinez & Co.

Dr. Mott's CHALYBEATE RESTORATIVE PILLS OF IRON.

An aperient and stomachic preparation of IRON purified by Oxygen and Carbonic Acid—combining Hydrogen. [illegible] Europe and the United States and prescribed in their practice.

The experiences of thousands daily prove that no preparation of iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity, almost every conceivable case [illegible] death which it has been tried it has proved absolutely curative in each of the following complaints, viz.:

In Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhea, Dysentery, Incipient Consumption, Scrofulous Tuberculosis, Nail Eruption, Menstruation, Whites, Leucorrhea, Liver Complaints, Chronic headaches, Rheumatism, Intermittent fevers, Pimples on the Face, &c.

In cases of GENERAL DEBILITY, whether the fault of a long disease or of the continued dissipation of young and unmarried, energy from chronic complaints, a trial of this restorative has proved successful in most which no description nor written attestation could render credible. Invalids coming bed-ridden soon become forgotten in their own neighborhoods have suddenly reappeared in the busy world as if just returning from protracted travel in a distant land. Some very signal instances of this kind are related of female sufferers, emaciated victims of apparent consumption, sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to all and each one for which the physician has no name.

In NERVOUS AFFECTIONS of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary for, unlike the old oxides it is rendered tonic without being exciting and overbearing, and gently regularly aperient even in the most obstinate cases of costiveness without ever being alternative purgative, or inflicting a disagreeable operation.

It is this latter property among others which makes it a remarkably effectual and permanent remedy in those upon which it also appears to exert a distinct curative action, by dispositing the constitutional tendency which forms them.

In DYSPEPSIA [illegible] the most habitual cases, including the attendant [illegible] symptoms.

In unbroken DIARRHŒA, even when accompanied by DYSENTERY, confirmed, emaciating and apparently malignant, the effects have been equally decisive and astonishing.

In the least pains, loss of flesh and strength, debilitating cough, and resistant hectic, with apparently indubitable INCIPIENT CONSUMPTION, this remedy has allayed the alarm of friends and physicians to severe, very gratifying and interesting instances.

In SCROFULOUS TUBERCULOSIS the iron has had far more than the good effect of the most cautiously balanced preparations of iodine without any of their well known liabilities.

The attention of females cannot be too confidently invited to this remedy and restorative in the cases peculiarly affecting them.

In RHEUMATISM, both chronic and inflammatory, in the latter however, its effects directly. It has been invariably reported both as alleviating pains and reducing the swellings and stiffness of the joints and muscles.

In INTERMITTENT FEVERS it most successfully has a great remedy and energetic restorative, and its progress in the new settlements of the West will probably be one of high renown and usefulness.

No remedy has ever been discovered in the whole list of medicines which exerts such prompt, happy and finally restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exertion, immediately follow its use.

Put up in neat flat metal boxes containing 50 pills, price $1 per box. For sale by druggists and dealers. Will be sent free to any address on receipt of the price. Address orders, etc., should be addressed to

Preservation of the Sight.

MR. C. DUHAMEL, optician, No. 46 Chartres street, begs leave to inform all those whose sight is defective that he has just received a fresh invoice of patent Cylindrical Glasses, approved by the most renowned oculists in Paris, and Drs. Beard, Fennlesom, Crawcour, Nee and others in New Orleans. The curb is such that these glasses can be used without the least danger to the weakest eyes.

The most skillful opticians have made a report declaring that the above articles are unquestionably the best for the preservation and improvement of the sight.

Their superiority over all others consists in the focus being equally divided over the whole surface, instead of being in the center only, as is the case with spectacle glasses generally. The interposition of the two cylindrical curbs makes them besides achromatic, and, consequently, much clearer than the others.

Near-sighted persons will find a great improvement in these glasses.

A pattern showing the advantages of these new glasses will be exhibited and explained, on application to Mr. Duhamel, to all those who may be desirous of being further informed on the subject. feb11
