## SC26-4120

VM/PERSONAL COMPUTER S/370 LANGUAGE SUPPLEMENT PERSONAL COMPUTER PROGRAM PRODUCT 6936733

VM/PC is an IBM licensed program that runs on the IBM XT/370 Personal Computer. VM/PC is an interactive system with the characteristics of a VM/SP Release 2 system. This publication describes how to use the IBM programming languages under VM/PC. These languages are Assembler H, IBM BASIC, OS/VS COBOL, VS FORTRAN, OS PL/I Optimizer, and OS COBOL Interactive Debug. Relationships between VM/PC and these languages are discussed, and information on licensing considerations and VM/PC programming restrictions are included.

Manual, 8 1/2 x 11 inches, 44 pages, 11/83

## SC26-4121

OS PL/I OPTIMIZING COMPILER, 5734-PL1, -LM4, -LM5, INSTALLATION GUIDE FOR MVS

This publication is designed for those who are responsible for installation of Release 5.0 of the OS PL/I Optimizing Compiler, OS PL/I Resident Library, and OS PL/I Transient Library. It describes how to install these products under the MVS and MVS/XA Operating Systems.

Manual, 8 1/2 x 11 inches, 108 pages, 1/85  
 ////5734-PL1,5734-PLI,5734-LM4,5734-LM5

## SC26-4122

OS PL/I OPTIMIZING COMPILER INSTALLATION GUIDE FOR CMS 5734-LM4, 5734-LM5, 5734-PL3, 5734-PL1

This publication is primarily for readers who are responsible for the installation of the OS PL/I Optimizing Compiler, OS PL/I Resident Library, and OS PL/I Transient Library. It describes how to install these three products under the Conversational Monitor System (CMS) of the Virtual Machine/System Product (VM/SP). To install this product under the Multiple Virtual Systems System, see OS PL/I Optimizing Compiler: Installation Guide for MVS, SC26-4121. The reader should already be familiar with the VM system used at your installation, with the publications that describe that system, and with EXEC processing.

Manual, 50 pages, 9/85

## GC26-4123

DFDSS GENERAL INFORMATION

This publication introduces Version 2 of the Data Facility Services (DFDSS) program product. It is directed primarily to data processing managers and to systems and applications programmers. It can be used as an aid in evaluating the product and planning for its use.

Manual, 8 1/2 x 11 inches, 44 pages, 12/84  
 //20//5665-327

## GC26-4124

DFDSS, 5665-327, LICENSED PROGRAM SPECIFICATIONS

This publication is the licensed program specifications for the above program product.

Flyer, 8 1/2 x 11 inches, 3 pages, 3/85  
 //20//5665-327

## SC26-4125

DFDSS, 5665-327, USER'S GUIDE AND REFERENCE

This publication describes how to use Version 2 Release 1.0 of the Data Facility Data Set Services (DFDSS) program product. It is intended for system and application programmers. Other DFDSS publications are Data Facility Data Set Services: General Information, GC26-4123, and Data Facility Data Set Services: Diagnosis Guide, SY26-3951. The reader should be familiar with the information in

Linkage Editor and Loader, GC26-4061, for MVS/370, or GC26-4143, for MVS/XA; MVS JCL, 6T28-1349 and 6T28-1350, or MVS/Extended Architecture Linkage Editor and Loader User's Guide, GC26-4143; and MVS/370 System Generation Reference, GC26-4063, or MVS/XA Installation: System Generation, GC26-4148. Other required publications are listed in the preface.

Manual, 8 1/2 x 11 inches, 400 pages, 4/85  
//40//5665-327

## SC26-4126

DATA EXTRACT MASTER INDEX

This publication is a compilation of the index entries from each book in the Data Extract product library. These entries will help locate information relating to a specific task or topic by book name.

This index does not give page numbers for each reference, but points to the books that contain the information needed. When the appropriate book is found, go to that book's index to get the page numbers. Using the master index assists in finding all the relevant information for a topic.

Manual, 8 1/2 x 11 inches, 30 pages, 04/84  
//20//5668-973

## SC26-4127

QUERY MANAGEMENT FACILITY INSTALLING AND USING THE UPPER CASE FEATURE

This book is for data base administrators and installers of Query Management Facility (QMF) who need to know about the Upper Case Feature and its effect on using QMF, how to plan for its installation, how to install the Feature, and how to plan for using the Feature with QMF. Prerequisite knowledge for installing the Upper Case Feature assumes familiarity with VM/SP, OS/VS2 MVS and System Modification Program (SMP).

Manual, 8 1/2 x 11 inches, 32 pages, 04/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SC26-4130

DEVELOPMENT GUIDE FOR RELATIONAL APPLICATIONS

This publication contains tips and techniques for writing applications for use under either CMS or TSO. It describes products that help the user write programs that solve a general class of user tasks and therefore accept a wide variety of input.

It is also a development guide for general applications under CMS and TSO. It describes products that make full screen alphanumeric and graphic processing easier and discusses ways to store data in relational data base managers, DATABASE 2 and SQL/Data System (SQL/DS).

Manual, 8 1/2 x 11 inches, 06/84  
///5748-XXJ,5748-XXH,5668-960,5664-167,5740-XYR,5740-XC6, 5665-291,5665-284,5665-285

## CC26-4135

MVS/XA VERSION 2 INTEGRATED CATALOG ADMINISTRATION ACCESS METHOD SERVICES REFERENCE

This publication is intended for catalog administrators and VSAM system programmers. It contains reference information about the access method services commands used to manipulate VSAM (virtual storage access method) catalogs and VSAM data sets. The format, a description, and examples of each access method services command used is given. This publication is a companion to MVS/Extended Architecture VSAM Administration Guide, GC26-4151, and MVS/Extended Architecture Catalog Administration Guide, GC26-4138. Readers should have a background in job control language, VSAM data management, and catalog administration.

Manual, 8 1/2 x 11 inches, 326 pages, 04/85  
//34//5665-XA2

## GC26-4136

MVS/XA VSAM VERSION 2 CATALOG ADMINISTRATION ACCESS METHOD SERVICES

This publication gives the format, a brief description, and examples for each access method services command used with VSAM catalogs and the objects cataloged in them. It is a companion to the MVS/Extended Architecture VSAM Administration Guide, GC26-4151, and the MVS/Extended Architecture Data Facility Product Version 2: Planning Guide, GC26-4147. For information on VSAM data sets and VSAM catalog format and structure, see MVS/Extended Architecture Catalog Administration Guide, GC26-4138. For information on the use of VSAM macro instructions, VSAM optimization options, and various VSAM algorithms affecting performance, see MVS/Extended Architecture VSAM Administration: Macro Instruction Reference, GC26-4152. Readers are assumed to have a background in programming.

Manual, 8 1/2 x 11 inches, 363 pages, 04/85  
//34//5665-XA2

## GC26-4137

MVS/XA VERSION 2 CACHE DEVICE ADMINISTRATION

This publication specifies the tools and techniques that can be used to administer a cache device. A cache device is a storage controller that contains high speed storage called subsystem storage.

The reader should have a general understanding of the 3880 Storage Control subsystems and have a knowledge of access method services commands. Also, be familiar with the information presented in the following publications - Introduction to 3880 Storage Control Model 11, GA32-0060, Introduction 3880 Storage Control Model 13, GA32-0062, Introduction to 3880 Storage Control Model 21, GA32-0080, Introduction to 3880 Storage Control Model 23, GA32-0082.

Manual, 8 1/2 x 11 inches, 77 pages, 4/85  
//34//5665-XA2

## GC26-4138

MVS/XA VERSION 2 CATALOG ADMINISTRATION GUIDE

This publication describes how to use the Integrated Catalog Facility (ICF). It includes information on ICF catalog structure and environment; procedures for defining, backing up, recovering, and converting catalogs; use of DIAGNOSE to aid recovery; and access method services commands used for ICF catalogs.

Prerequisites for using this publication are a knowledge of VSAM and the catalog environment, and a systems background. The reader should understand VSAM as explained in MVS/Extended Architecture VSAM Administration Guide, GC26-4151, and may also need to know how to plan for ICF catalogs. This information is in MVS/Extended Architecture Data Facility Product Version 2: Planning Guide, GC26-4147.

Manual, 8 1/2 x 11 inches, 300 pages, 04/85  
//34//5665-XA2

## GC26-4139

MVS/XA VERSION 2 CHECKPOINT/RESTART USER'S GUIDE

This publication describes checkpoint/restart for MVS/Extended Architecture (MVS/XA). The checkpoint/restart program allows programmers and systems analysts to record information about a job at designated checkpoints, and restart a job at the beginning of a step or at a checkpoint within a step.

A general understanding of job control language and data management is a prerequisite.

Manual, 8 1/2 x 11 inches, 88 pages, 04/85  
//40//5665-XA2

GC26-4140

MVS/XA VERSION 2 DATA ADMINISTRATION GUIDE

This publication is intended for system programmers who use the data management access methods-other than VSAM (Virtual Storage Access Method)-to process data sets. It does not cover such specialized applications as time sharing option (TSO), graphics, teleprocessing, optical character readers, optical reader-sorters, and magnetic character readers. These specialized applications are described in separate publications listed in System/370 and 4300 Processors Bibliography, GC20-0001.

Prerequisites for using this publication are knowledge of assembler language and job control language.

Manual, 8 1/2 x 11 inches, 256 pages, 04/85  
//34//5665-XA2

GC26-4141

MVS/XA VERSION 2 DATA ADMINISTRATION MACRO INSTRUCTION REFERENCE

This publication contains descriptions and definitions for data management macro instructions, other than those of VSAM (virtual storage access method), available in the assembler language. It provides application and system programmers with the necessary information to code macro instructions. The user should be familiar with the information in Assembler H Version 2 Application Programming: Language Reference, GC26-4037; Assembler H Version 2 Application Programming: Guide, GC26-4036; MVS/Extended Architecture Data Administration Guide, GC26-4140 and MVS/Extended Architecture JCL, GC28-1148.

The prerequisite is knowledge of assembler language.

Manual, 8 1/2 x 11 inches, 264 pages, 04/85  
//34//5665-XA2

GC26-4142

MVS/XA DFP VERSION 2 GENERAL INFORMATION

This publication is an introduction to the MVS/Extended Architecture Data Facility Product Version 2 and offers general information on how DFP can be used in an MVS/XA environment.

System programmers who are planning to install DFP can use this publication to learn how DFP fits into the MVS/XA operating environment. In addition, anyone with a general background in programming and the use of operating systems can use this publication to get an overview of DFP and its components.

Manual, 8 1/2 x 11 inches, 80 pages, 02/85  
//20//5665-XA2

GC26-4143

MVS/XA LINKAGE EDITOR AND LOADER VERSION 2 USER'S GUIDE

This publication provides application programmers with the information necessary to use the linkage editor and loader to prepare the output of a language translator for execution. Information on the operation and use of the linkage editor and loader is directed to the system programmer responsible for installing and maintaining the operating system.

The diagnostic messages issued by both the linkage editor and the loader program are described in MVS/Extended Architecture Message Library: System Messages, GC28-1376 and GC28-1377. The description of each message includes an explanation, a system action, and a problem determination action to be taken.

The reader should be familiar with job control language.

Manual, 8 1/2 x 11 inches, 226 pages, 4/85  
//40//5665-XA2

GC26-4144

MVS/XA DATA FACILITY PRODUCT VERSION 2 SPECIFICATIONS

This publication is the Program Product Specifications for the MVS/Extended Architecture Data Facility Product Version 2 program product.

Flyer, 8 1/2 x 11 inches, 4 pages, 4/85  
//20//5665-XA2

GC26-4145

MVS/XA VERSION 2 MAGNETIC TAPE LABELS AND FILE STRUCTURE ADMINISTRATION

This publication explains, for programmers and operations analysts, how the MVS/Extended Architecture system processes magnetic tape labels. The reader should be familiar with data management and job control language.

Prerequisite publications are MVS/Extended Architecture JCL, GC28-1148, and MVS/Extended Architecture Data Administration Guide, GC26-4140.

Manual, 8 1/2 x 11 inches, 185 pages, 04/85  
//34//5665-XA2

GC26-4146

MVS/XA DATA FACILITY PRODUCT VERSION 2 MASTER INDEX

This publication is provided to help locate information in the MVS/Extended Architecture (MVS/XA) Data Facility Product Version 2 library. It lists index entries alphabetically and uses a code to name the publications in which they are discussed. The indexes of the individual publications provide the exact page numbers.

Manual, 8 1/2 x 11 inches, 130 pages, 04/85  
//20//5665-XA2

GC26-4147

MVS/XA DATA FACILITY PRODUCT VERSION 2 PLANNING GUIDE

This publication is intended for the personnel responsible for planning. It describes planning considerations and the steps to consider to install, migrate, or convert to the integrated catalog facility (ICF) catalog environment, and to install the indexed VTOC. It also explains how to plan for ICF catalog installation and how to prepare for catalog conversion.

The reader should be familiar with catalog environments, VTOCs, data set procedures, and access methods.

Manual, 8 1/2 x 11 inches, 100 pages, 04/85  
//34//5665-XA2

GC26-4148

MVS/XA VERSION 2 SYSTEM GENERATION INSTALLATION

This publication provides information on how to do a complete system generation (sysgen), an I/O device generation (iogen), or an eligible device table generation (edtgen) for an MVS/Extended Architecture (MVS/XA) system.

Manual, 8 1/2 x 11 inches, 235 pages, 4/85  
//34//5665-XA2

GC26-4149

MVS/XA VERSION 2 SYSTEM DATA ADMINISTRATION

This publication is for system programmers and provides information about Data Facility Product components of MVS/XA, and how to modify and extend the data management capabilities of the operating system. Some topics discussed are using catalog management macro instructions, controlling space on DASD volumes, executing channel programs, and password protecting data sets. This publication discusses exits for installation-written routines, JES2 printer support, VTOC access macros, and specifying buffer numbers for DASD data sets.

Readers should understand how to code programs in assembler language, to use standard linkage conventions, the EHLIST

GC26

and IEHPROGM utility programs, and data management access methods and macro instructions.  
Manual, 8 1/2 x 11 inches, 290 pages, 04/85  
//34//5665-XA2

GC26-4150

MVS/XA VERSION 2 DATA ADMINISTRATION UTILITIES

This publication describes how to use the MVS/Extended Architecture utility programs. The user should be familiar with virtual storage management, data management and job control language.

This publication summarizes the utility programs and gives information on the differences among system, data set, and independent utility programs. It also describes the macro instructions used to invoke a utility program from a problem program, and contains information about linking to and returning from optional user-supplied exit routines. It also describes user-label processing.  
Manual, 8 1/2 x 11 inches, 460 pages, 04/85  
//32//5665-XA2

GC26-4151

MVS/XA VSAM VERSION 2 ADMINISTRATION GUIDE

This publication describes the use of virtual storage access Method (VSAM). It is intended for programmers who use VSAM macro instructions, access method services commands, or JCL to process VSAM data sets.

The user should have a general understanding of catalog administration, job control language, and principles of operations.

Manual, 8 1/2 x 11 inches, 260 pages, 04/85  
//34//5665-XA2

GC26-4152

MVS/XA VERSION 2 VSAM ADMINISTRATION MACRO INSTRUCTION REFERENCE

This publication contains the macro instructions that are used for VSAM (virtual storage access method). It is intended for programmers who use VSAM macro instructions, access method service commands, or JCL to process data. It also contains return codes for macros used to open and close data sets, manage control blocks, and issue data management request, and describes the standard way to build parameter lists.

Required and related publications are listed in the preface.  
Manual, 8 1/2 x 11 inches, 195 pages, 04/85  
//34//5665-XA2

GC26-4171

IMS/VS VERSION 2 SPECIFICATIONS

This publication describes the warranted specifications of the subject program product.

Flyer, 8 1/2 x 11 inches, 4 pages, 03/86  
//20//5665-332

SC26-4172

IMS/VS VERSION 2 INSTALLATION GUIDE

This publication, together with its companion manual, IMS/VS Installation Listings, SC26-4215, is for new and current users installing IMS/VS Data Base (DB) only or Data Base/Data Communication (DB/DC) systems.

Following successful installation, define the IMS system using the third manual, the IMS/VS System Definition Reference Manual, SC26-4216, which is also used for later system modification.

Manual, 8 1/2 x 11 inches, 240 pages, 03/86  
//34//5665-332

SC26

SC26-4173

IMS/VS VERSION 2 UTILITIES REFERENCE

This publication is designed for systems programmers, application programmers, systems analysts and computer operators who require a knowledge of how to execute the Information Management System/Virtual Storage (IMS/VS) utility programs, IMS/VS Fast Path utility programs and IMS/VS DBRC utility programs under the operating system. Message Format Service utilities are described in IMS/VS Message Format Service User's Guide, SC26-4181.

Manual, 8 1/2 x 11 inches, 668 pages, 06/87  
//32//5665-332

SC26-4174

IMS/VS VERSION 2 MESSAGES AND CODES REFERENCE

This publication lists abend codes, messages, and status codes produced by the components of the IMS/VS system. This information is provided for programmers, operators, and system support personnel to advise them of the status of their programs and the action(s) required to correct a given problem. It contains information on User Abend Codes, DFS Messages, DXR Messages, DSP Messages, DBDGEN Messages, PSBGEN Messages, IMSDALOC Messages, System Definition Messages, IMS/VS Problem Determination, IMS/VS Status Codes Quick-Reference Table, Return Codes and Function Codes, and a Summary of Amendments.

Manual, 8 1/2 x 11 inches, 770 pages, 03/86  
//40//5665-332

SC26-4175

IMS/VS, 5665-332, VERSION 2 OPERATOR'S REFERENCE

This publication describes how terminal operators can use the IMS/VS commands and the OS/VS commands used for IMS/VS Resource Lock Manager (IRLM). Because each user's IMS/VS System is tailored to a specific operating environment, this publication is not intended to serve each installation's operational needs. It is recommended that each installation prepare an operator's guide to meet the needs of its IMS/VS terminal operators. The contents can be used as input for or as a supplement to the installation-prepared guides. IMS/VS Summary of Operator Commands, SX26-3754, is a reference publication which contains syntax diagrams of the IMS/VS commands discussed.

Manual, 8 1/2 x 11 inches, 335 pages, 3/86  
//40//5665-332

SC26-4176

IMS/VS VERSION 2 SYSTEM ADMINISTRATION GUIDE

This publication is a guide to the administration of the IMS/VS Data Base/Data Communication system, consisting of the IMS/VS Data Base system and the Data Communication feature. It covers the control, protection and monitoring of IMS/VS online resources. Its purpose is to provide guidance for the tasks involved in managing an IMS/VS online system and in providing end-user services. Materials included pertain to: Multiple Systems Coupling, Fast Path, Extended Recovery Facility (XRF) capable IMS/VS. These are major facilities that require the Data Communication feature and operate in the IMS/VS online environment. Also included is guidance information for data sharing. The major treatment of data base structure and information pertinent to data base design and implementation is contained in IMS/VS Data Base Administration Guide, SC26-4179. This publication will aid in coordinating installation and security planning when establishing the IMS/VS online system. It is a companion book to IMS/VS Installation Guide, SC26-4172, and IMS/VS System Definition Reference Manual, SC26-4216. Also valuable are: IMS/VS Operations and Recovery Guide, SC26-4183 and IMS/VS Operator's Reference Manual, SC26-4175.

SC26-4177

INFORMATION MANAGEMENT SYSTEM/VIRTUAL STORAGE, 5665-332, VERSION 2 APPLICATION PROGRAMMING FOR CUSTOMER INFORMATION CONTROL SYSTEM/VIRTUAL STORAGE USERS

This publication contains information on IMS/VS application programming for CICS/OS/VS users. It gives information needed to write an online, batch, or shared data base program using either CICS/OS/VS DL/I commands, called EXEC DLI, or DL/I calls. Before using this publication, the user should understand basic CICS/OS/VS concepts and the CICS/OS/VS environment. The CICS/OS/VS and IMS/VS concepts explained are limited to those concepts pertinent to developing and coding application programs using DL/I commands or calls. The user should also know how to use COBOL, PL/I, or assembler language.  
Manual, 8 1/2 x 11 inches, 375 pages, 3/86  
//40//5665-332

SC26-4186

IMS/VS VERSION 2 PROGRAMMING GUIDE FOR REMOTE SNA SYSTEMS

This publication discusses the IMS/VS support for programmable logical units or network nodes operating in a Systems Network Architecture (SNA) environment. Only those areas of IMS/VS that are directly affected are addressed. While several types of logical units may be defined to IMS/VS on the UNITYPE=keyword of the IMS/VS TYPE macro statement, this publication addresses only those logical unit types that are programmable. This includes secondary logical units type P (UNITYPE=3601 and UNITYPE=SLUTYPEP respectively), and network nodes defined as logical units type 6 (UNITYPE=LUTYPE6). Nonprogrammable secondary logical units (type 1 and type 2) are discussed in the IMS/VS Installation Guide. Refer to other IMS/VS publications for additional information. A knowledge of IMS/VS particularly the Data Communication feature, is required for understanding the information in this publication. Readers should be familiar with the Systems Network Architecture (SNA) and with VTAM concepts and facilities that govern communication between a VTAM application program and an SNA logical unit. Refer to Systems Network Architecture: Concepts and Products. For more detailed information on SNA communication, refer also to Systems Network Architecture Format and Protocol Reference Manual: Architecture Logic and ACF/VTAM Concepts and Planning. ACF/TCAM is an alternative to VTAM but is not discussed in this publication. To understand TCAM support for IMS/VS, refer to ACF/TCAM General Information: Introduction and ACF/TCAM General Information: Functional Description.

3380 DIRECT ACCESS STORAGE: MIGRATION  
This publication discusses migration to the 3380 and tells how to install and prepare new units. It discusses moving necessary data from the existing volumes and the needed follow-up activities, such as tuning the system for performance, documenting the resulting configuration and data set placement, and updating written operating procedures. The reader should be familiar with the operating system (VSE, VM, or MVS) and should have a basic understanding of direct access storage devices. This publication assumes the reader has already performed the planning activities described in the prerequisite book, 3380 Direct Access Storage: Planning and Use, GC26-4208. This publication is a component of 680F-1630.  
Manual, 8 1/2 x 11 inches, 100 pages, 1/85

THE INFORMATION FACILITY, 5664-194, GENERAL INFORMATION  
This publication is for managers, with or without an extensive data processing background. It introduces The Information Facility (TIF) to them, and explains how TIF, as a simple end-user tool, can be an alternative to turning to data processing professionals for application programming and end-user support.  
This publication explains what TIF is and lists the special features of the product. It contains a demonstration of what TIF can do and how easy it is to use it. Also included is a summary of TIF capabilities and a list of the requirements (programs, machines, human resources, and TIF publications) that are needed to run TIF.  
Related publications are listed in the preface.  
Manual, 8 1/2 x 11 inches, 70 pages, 9/85

3380 DAS: PLANNING AND USE  
This publication is intended for the systems administrator, systems planner, systems analyst, or systems programmer who will be responsible for installing 3380 units, for

establishing procedures to move data from one volume that resides on a direct access storage device (DASD) to another DASD, for developing backup and recovery procedures, for preparing space allocation and utilization guides and for writing 3380 operating procedures. The user should be familiar with the operating system that will control the newly installed 3380 unit. This publication discusses planning to move data, ongoing planning, and techniques for the 3380. It describes how to perform initial planning activities and how to determine which data to migrate. It also discusses planning the new configuration and data placement and planning a strategy to move data. Ongoing planning consists of planning for backup and recovery and for storage management.  
This publication is a component of GBOF-1630.  
Manual, 8 1/2 x 11 inches, 100 pages, 1/85

SC26-4209

INFORMATION MANAGEMENT SYSTEM/VIRTUAL STORAGE, 5665-332, VERSION 2 DATA BASE RECOVERY CONTROL: GUIDE AND REFERENCE  
This publication describes the facilities and capabilities of IMS/VS Data Base Recover Control (DBRC). DBRC extends the capabilities of IMS/VS Data Language/I (DL/I) utilities for data base recovery to allow easier recovery of IMS/VS DL/I data bases, including Fast Path Data Entry Data Bases and data bases accessed through Customer Information Control System/Operating System/Virtual Storage (CICS/OS/VS). It is written for data base administrators, system programmers, and other data processing personnel involved in the recovery of IMS/VS DL/I data bases.  
The publication provides a detailed description of the three environments of DBRC: log control, recovery control, and share control. Readers should understand the IMS/VS utilities for data base recovery and be familiar with the concepts and terminology of IMS/VS, MVS, and DBRC.  
The user should understand MVS control programs, VSAM Access Method Services, and the IMS/VS administration task of operations and recovery. The following publications contain this information: IMS/VS Version 2 Operations and Recovery Guide, SC26-4183, and OS/VS2 Access Method Services, GC26-3841.

INSTALLATION AND CUSTOMIZATION FOR CMS VS COBOL II

This publication provides information on planning for installation, installing, and customizing the VS COBOL II program products under VM/System Product (VM/SP) Release 3. Installation information in this publication is a high-level overview of the steps needed for installation. Detailed installation information is provided in the VS COBOL II Release 1.1. Program Directory. The publication also provides the planning and procedures necessary for downloading the VS COBOL II program products to Virtual Machine/Personal Computer (VM/PC).

The reader should have a knowledge of VS COBOL II and of the operating environment to use this publication and VM/PC and to successfully install VS COBOL II.

VS COBOL II and related VM/SP and VM/PC publications are listed in the preface.

VS FORTRAN VERSION 2 LANGUAGE AND LIBRARY REFERENCE

This publication gives programming rules for the VS FORTRAN Version 2 source language. It conforms to Full American National Standards. FORTRAN (X3.9-1978), plus extensions. Part 1, Language Reference, discusses language, data, expressions, statements, and intrinsic functions. Part 2, Library Reference, discusses mathematical, character, and bit routines; service and utility subroutines, error-handling subroutines and error option table; multitasking facility subroutines. Nine appendixes include: 1) source language (FIPS) flagger; 2) ANS FORTRAN features; 3) EBCDIC and ISCII/ASCII codes; 4) algorithms for library math functions; 5) execution-time library entry names; 6) accuracy statistics; 7) assembler language information; 8) sample storage printouts; 9) library procedures and messages.

It is for FORTRAN application programmers.

## SC27-0441

ACF/VTAME, 5746-RC7, PRE-INSTALLATION PLANNING (CURRENT RELEASE)

This manual is for customer system programmers and installation managers. It is an aid in planning and estimating the time and resources required for the installation of an ACF/VTAME.

It addresses two types of situations:

1. The customer will use ACF/VTAME standalone or in a network with other ACF/VTAMES.

2. The customer will use ACF/VTAME in a network with ACF/VTAM or ACF/TCAM, as well as other ACF/VTAMES.

In function, this manual is between ACF/VTAME General Information: Concepts (an introduction to ACF/VTAME) and ACF/VTAME Installation (a system programmer's reference). Manual, 8 1/2 x 11 inches, 140 pages, 7/79  
 ////5746-RC7

## SC27-0442

ACF/VTAME, 5746-RC7, PROGRAMMING (CURRENT RELEASE)

The ACF/VTAME Programming manual describes how to write the Advanced Communications Function for VTAM Entry (ACF/VTAME) and the macro instructions used with ACF/VTAME. The macro instructions are used to write the data communication portions of ACF/VTAME application programs that communicate with logical units within an ACF/VTAME domain, in an ACF/VTAM domain, or in an ACF/TCAM domain. This manual provides the specifications needed to code such programs.

This manual is for any programmer, whether an application programmer, or a system programmer, who must write a program that uses ACF/VTAME macro instructions. The reader is assumed to be familiar with Basic Assembler Language.

Manual, 8 1/2 x 11 inches, 622 pages, 9/79

 ////5746-RC7

SC27-0449

ACF/VTAME, 5746-RC3, PROGRAMMER'S REFERENCE (CURRENT RELEASE)

This manual describes how to write an ACF/VTAM application program. An ACF/VTAM application program contains ACF/VTAM macro instructions which establish and terminate sessions, and perform communication functions with logical units and subsystems that are supported by ACF/VTAM.

A summary of the Contents of the manual is as follows:

- An overview of ACF/VTAM application programs and their relation to other elements in a teleprocessing network.
- Suggestions on how to organize an ACF/VTAM application program.
- A discussion of the concepts, facilities, and language for opening and closing a program, and for establishing a session with and communicating with logical units.
- Requirements and suggestions on using exit routines, handling errors and special conditions in the network and debugging an ACF/VTAM application program. The user is assumed to be familiar with Basic Assembler Language.
- Detailed explanations of how to code each macro instruction.
- Prerequisite Publications: None, however, ACF/VTAM General Information: Concepts, GC27-0463, may be helpful in understanding the concepts of an ACF/VTAM network.

PROGRAM SUMMARY VM/VTAM CNA

The Virtual Machine/VTAM Communications Network Application (VM/VCNA) is a program product that provides the Virtual Machine/System Product (VM/SP) user the ability to use a System Network Architecture (SNA), binary synchronous communication (BSC), start-stop, or local terminal as an operator console for a virtual machine. VM/VCNA supports Control Program/Conversational Monitor System (Control Program/CMS) command processing, CMS editor processing, and VM full-screen processing. The selected start-stop devices are supported through the Network Terminal Option (NTO) as line-at-a-time devices. VM/VCNA provides an interface between VM's console support and the application program interface of the Advanced Communications Function for VTAM (ACF/VTAM) or the Advanced Communications Function for VTAM Entry (ACF/VTAME), in order to support SNA, BSC, start-stop, or local terminals as virtual machine consoles.

Flyer, 8 1/2 x 11 inches, 4 pages, 9/80

## SC27-0584

ACF/VTAM, 5735-RC2, 5746-RC3, PLANNING AND INSTALLATION REFERENCE (CURRENT RELEASE)

This manual is for customer system programmers and installation managers. It provides detailed planning and reference information on:

- Installing ACF/VTAM on the system
- Network definition
- Defining session establishment and termination
- Providing exit routines and user replaceable modules
- Defining start options and procedures

It also introduces planning for work described in more detail in other IBM books:

- Operating procedures and documentation
- Problem determination procedures
- Application programming

A prerequisite to this publication is ACF/VTAM Concepts, GC27-0463.

## SC27-0593

NETWORK ROUTING FACILITY PLANNING

Use this publication to plan for NRF in your network. It contains information that allows estimating of storage requirements and helps prepare code for installation and resource definition. It explains how to customize NRF and how to prepare a plan of action in case of network errors. It is used by system planners and designers, and administrative personnel.

Manual, 8 1/2 x 11 inches, 70 pages, 05/86  
////5668-963

## GC27-0594

NETWORK ROUTING FACILITY GENERAL INFORMATION

To present a general understanding of the function of NRF. It explains how NRF relates to its data processing environment and how NRF operates. Discusses the basic requirements needed to use NRF and outlines the problem

determination aids NRF provides for maintenance and error recovery.  
It is intended for DP personnel interested in incorporating NRF into a network.

BASIC TELECOMMUNICATIONS ACCESS METHOD/SYSTEM PRODUCT PROGRAM SUMMARY

The BTAM/SP Program Summary is a two page flyer that introduces the program product and provides planning information.

BTAM/SP extends OS/VS2 BTAM support to an environment including the 3081 Processor Complex and MVS/System Product Version 2.

The flyer describes the BTAM/SP environment, including devices supported, programming requirements, and hardware requirements. The flyer also lists conversion tasks that the BTAM customer must perform to migrate from OS/VS2 BTAM to BTAM/SP, and descriptions of licenses, warranty, and availability.

Flyer, 8 1/2 x 11 inches, 2 pages, 10/81

ACF/VTAM VERSION 2 RELEASES 1 AND 2 OPERATIONS (CURRENT RELEASE)

This publication is a reference manual for system programmers who must provide system programmers with the detailed information necessary to operate Version 2 of the Advanced Communications Function for the Virtual Telecommunications Access Method (VTAM). VTAM V2R1 refers to Version 2 Release 1 of VTAM, and VTAM V2R2 refers to Version 2 Release 2 of VTAM.

The description of VTAM operation in this manual assumes a network consisting of VTAM Version 2, NCP Version 2 or 3, and TCAM Version 2 Release 4 nodes. Some functions of VTAM V2R2 such as SNA network interconnection are available only with NCP Version 3. The VTAM publications cited in this publication refer to VTAM Version 2 unless otherwise noted. Special considerations that apply to VTAM operation in a network containing other supported nodes are supplied as migration considerations at the end of each section, as appropriate.

Manual, 8 1/2 x 11 inches, 275 pages, 06/85

NETWORK PROGRAM PRODUCTS PLANNING (CURRENT RELEASE)

This publication assumes that the user is an experienced network planner with a good background in business, systems design, and systems programming. It describes how to plan for establishing networks and for connecting networks with the following program products: Advanced Communications Function for the Virtual Telecommunications Access Method (VTAM) Version 2 Release 2; Advanced Communications Function for the Virtual Telecommunications Access Method (VTAM) Version 2 Release 1; Advanced Communications Function for the Network Control Program (NCP) Version 3 for the 3705 Communications Controller; Advanced Communications Function for the Network Control Program (NCP) Version 3 for the 3725 Communication Controller; Advanced Communications Function for the System Support Programs (SSP) Version 2 Release 2 for the 3705 and 3725 Communication Controllers; Network Communications Control Facility (NCCF) Version 2; and Network Logical Data Manager (NLDM) Release 2.

This publication is intended to help the user do the planning required to use VTAM, NCP, SSP, NCCF, and NLDM. It explains the various ways that functions might be used, the advantages and disadvantages of using them in different situations, how functions interrelate, and overall considerations for specifying the functions wanted. It can also help the user decide which type of network configuration is needed (for example, a single-domain network, a multiple-domain network, or a set of interconnected SNA networks). It should assist in selecting

GC27

the SNA functions needed to create one of these configurations to meet the business requirements.

7074 OS EMULATOR ON SYSTEM/370 REFERENCE, PROG. NOS. 360C-EU-739, 741 (OS); 5744-AJ1, AK1 (VS1, VS2)

This publication provides information about the IBM 7074 Emulator Program for the IBM System/370 Models 155, 158, 165, and 168. The emulator program is executed as a problem program under control of the MFT, MVT, VS1, or VS2 versions of the operating system. The System/370 Models 155, 158, and 165 must be equipped with the IBM 7074 Compatibility Feature #7117; the Model 168 must be equipped with the Compatibility Feature #7127. Using one of these features,

GC27

the System/370 can execute programs written on the IBM 7074 Data Processing System. These 7074 programs can be run with little or no reprogramming, mixed with IBM System/360 and System/370 jobs.

Information on machine requirements, considerations for emulation, data formats, generating and executing the program, and communicating with the emulator program is included. For a thorough understanding of this publication, a basic knowledge of IBM System/370, of the operating system, and of the system to be emulated is required.

The information in this publication is intended for those responsible for emulating the IBM 7074 Data Processing System.

VIDEO/370, LIC PROG 5734-RC5, 5736-RC3, USER'S GUIDE

VIDEO/370 is a computer program that is used to enter information to a computer system and to check the accuracy of that information. This book is intended for the operator who will use the IBM 3277 or 3275 display station as a part of VIDEO/370. Experience with conventional keypunch equipment is helpful but not required. Before using this book, you should be familiar with the basic operation of the display station, as described in Operator's Guide for the IBM 3270 Information Display System, 6A22-2742. CICS users may also find helpful the CICS Terminal Operator's Guide, SH20-1044.

This book contains three types of information:

1. General background information
2. Tutorial (how to do it) information
3. Reference information

Manual, 122 pages, 5/75  
////5734-RC5,5736-RC3

OS/VS GRAPHIC PROGRAMMING SERVICES (GPS) FOR IBM 2250 DISPLAY UNIT

Describes macro instructions and routines provided under OS/VS to aid in writing assembler-language programs that use the IBM 2250 Display Unit, Model 1 or 3.

These programming services are useful in:

- o Displaying data in alphameric or graphic form
- o Controlling input/output
- o Communicating with the 2250 operator

This manual is intended primarily for application programmers coding in assembler language. It also provides installation managers, system engineers, and system programmers with general information about programming the 2250 display unit.

The reader should be familiar with the information in:

IBM System/360 Component Description:  
IBM 2250 Display Unit Model 1, 6A27-2701

IBM System/360 Component Description:  
IBM 2250 Display Unit Model 3  
IBM 2840 Display Control Model 2, 6A27-2721

GC27-6973

OS/VS GRAPHIC SUBROUTINE PACKAGE (GSP) FOR FORTRAN IV, COBOL, AND PL/I

This manual describes how a FORTRAN, COBOL, or PL/I programmer can write graphic programs for use with the IBM 2250 Display Unit under control of OS/VS. It also describes how the graphic subroutine package may be used in a program

written in Assembler Language.

The graphic subroutine package (GSP) consists of subroutines and functions for displaying characters or graphic forms on the 2250 screen and for controlling communication between the program and the 2250 operator. The subroutines may be called from a program written in the E, G, or H level of FORTRAN IV, in COBOL (F), in PL/I (F), or from a program written in Assembler Language. They are not an extension of the FORTRAN IV, COBOL, or PL/I languages, but may be used in conjunction with them. Manual, 8 1/2 x 11 inches, 194 pages, /8/82 //30/2250,3250,3251/5741,5742,5752,5652,5741-6S1,5752-6S1

OS/VS PROBLEM DETERMINATION AIDS, MESSAGES AND CODES FOR GPS AND GSP

This manual contains aids for determining and solving problems that involve display programs that use either the Graphic Programming Services (GPS) for the IBM 2250 Display Unit and IBM 2260 Display Station or the Graphic Subroutines Package (GSP) for the IBM 2250 Display Unit. The aids are directed to the display operator, application programmer, system operator, system programmer, and system maintenance personnel.

The manual is divided into an introduction and six sections of problem determination aids:

- o Display operator aids
- o Application programmer aids
- o Messages
- o Codes
- o Generalized Trace Facility
- o Problem-related data

The reader should be familiar with information in:

OS/VS Graphic Programming Services (GPS) for IBM 2250 Display Unit, GC27-6971  
OS/VS Graphic Programming Services (GPS) for IBM 2260 Display Station (Local Attachment), GC27-6972

DOS VERSION 4 - BASIC TELECOMMUNICATIONS ACCESS METHOD MANUAL - PROGRAM NUMBER 370N-CQ-469

This publication describes the Basic Telecommunications Access Method (BTAM) used with the System/370 Disk Operating System (DOS) control program. BTAM provides the READ/WRITE level macro instructions for the assembler-language programmer who is implementing programs for telecommunications applications.

Included are macro instruction formats and descriptions and specific information on device-dependent considerations.

For titles and abstracts of associated publications see the IBM System/370 Bibliography, 6A22-6822.

Manual, 392 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GC27-6980

OS/VS BTAM

Describes the Basic Telecommunications Access Method (BTAM) available with OS/VS. BTAM provides facilities that enable an assembler-language programmer to write a teleprocessing control program that effects communications at the Read/Write level between a System/370 and a variety of computers and terminals connected to the System/370 over common-carrier or private-wire communications networks. BTAM provides similar facilities for the local IBM 3270 Display System. BTAM employs both start-stop and binary synchronous communications (BSC) techniques, depending on

the type of remote station.

Typical BTAM applications include data acquisition, message switching, and inquiry processing.

This publication explains some concepts of teleprocessing and BTAM, describes line control and message transmission techniques, and describes each of the BTAM macro instructions and facilities needed to construct a control program. The READ and WRITE macro instructions applicable for each type of remote station and line configuration are given, along with the channel programs generated for each type.

Prerequisite to use of this publication is a knowledge of System/370 assembler language and data management facilities.

GC27-6985

DOS/VS QTAM MPPS (MESSAGE PROCESSING PROGRAM SERVICES)

This publication is intended for the problem programmer assigned to write a message processing program to support a QTAM-controlled telecommunications system operating under DOS/VS (Disk Operating System with Virtual Storage). Included is a general discussion of message processing programs, followed by a detailed description of the services QTAM provides in support of a message processing program. The QTAM services are provided through macro-language statements such as GET, PUT, OPEN, and CLOSE. Also included is a discussion of services QTAM provides to enable the programmer to examine and modify the telecommunications system.

General information of interest to the programmer writing a message processing program (such as telecommunications applications, concepts and terminology, and message formats) is contained in the publications OS/VS QTAM Message Control Program, GC27-6986.  
Manual, 56 pages

GC27-6986

DOS/VS QTAM MCP (MESSAGE CONTROL PROGRAM)

The first part of this publication contains information of a general nature and is of interest to anyone, including managers, system analysts, and programmers, involved in planning or implementing a QTAM-controlled telecommunications system to operate under DOS/VS (Disk Operating System with Virtual Storage). The topics discussed include: devices supported; concepts and terminology; QTAM facilities; and applications supported.

The remaining two parts of this publication, beginning with the chapters on nonaudio and audio message handling respectively, describe in detail the problem programming necessary for constructing QTAM message control programs to support telecommunications applications. A thorough understanding of this publication requires a basic knowledge of System/370 machine concepts and DOS/VS.

GC27-6994

VTAM, 5752-801, LEVEL 2 MACRO LANGUAGE GUIDE

Describes how to write a VTAM application program. A VTAM application program is a program that contains VTAM macro instructions to request connection to and communication with telecommunications devices and subsystem supported by VTAM. This book should be used with reference publication, VTAM Macro Language Reference, GC27-6995.

The contents include:

An overview of VTAM application programs and their relation to other elements in a teleprocessing network.

Suggestions on how to organize a VTAM application program.

A discussion of the concepts, facilities, and language for opening and closing the program, and for connecting to and communicating with logical units and terminals.

Requirements and suggestions on using exit-routines, handling errors and special conditions in the network and debugging a VTAM application program. The user is assumed to be familiar with System/370 assembler language.

Prerequisite Publications: None, however; VTAM Concepts and Planning, GC27-6998, may be helpful in understanding the concepts of a VTAM network.

This manual is available immediately in Mechanicsburg for planning purposes until VTAM Level 2 is available. Users of this manual for VTAM Level 1.1 should now order by the pseudo order number, 6T27-6994-0.

INTRODUCTION TO JES3 RELEASE 3

This publication provides an overview of JES3 Release 3 (selectable unit ID 5752-826). The purpose of this manual is to provide introductory and planning information about JES3 components and concepts. Included in this manual is information about the services provided by JES3 and the interaction of these services with the user and the operating system. JES3 system configuration options are discussed along with installation planning considerations and RAS features.

Manual, 8 1/2 x 11 inches, 85 pgs, 4/78

OS/VS1 SERVICE AIDS (CURRENT RELEASE)

This publication explains when, why, and how to use IBM service aids to diagnose and fix failures in system or application programs. Each service aid is discussed in a separate chapter. The service aids are:

- o GTF (Generalized Trace Facility) traces selected system events such as SVC and I/O interruptions.
- o IMCJOBQD -- Operates as a standalone program to format and print the system job queue, system events such as SVC and I/O interruptions.
- o HMBLIST -- Formats and prints object modules, load modules, and CSECT identification records; maps reenterable load module area.
- o IMCOSJQD -- Operates as a problem program to format and print the system job queue.
- o HMDPRDMP -- Formats and prints dump data sets, which may include page data sets and GTF trace data.
- o HMAPTFLE -- Updates an operating system by applying PTFs or by generating JCL statements needed to apply PTFs or ICRs in a later step.
- o HMDSADMP -- Operates as a standalone program to produce high-speed or low-speed dump of real storage. The high-speed version can also dump page data sets.
- o HMASPZAP -- Verifies and/or replaces instructions and/or data in a load module. Information about how to write PRDMP/EDIT user exit programs is provided in a separate appendix. Messages issues by the service aids are described in OS/VS Message Library: Service Aids and OLTEP Messages.

SERVICE AIDS OS/VS2 MVS SPL (CURRENT RELEASE)

This publication explains how, why, and when to use IBM service aids programs for MVS when diagnosing and fixing failures in system or application programs. It is intended for system programmers and IBM program support representatives.

This publication describes:

- GTF (Generalized Trace Facility) - Traces selected system events such as SVC and I/O interruptions.
- AMBLIST - Formats and prints object modules, load modules, and CSECT identification records; maps reenterable load module area.
- AMDPRDMP - Formats and prints dump data sets, which may include GTF trace data.
- AMAPTFLE - Updates an operating system by applying PTFs or by generating JCL statements needed to apply PTFs or ICRs in a later step.
- AMDSADMP - Operates as a stand-alone program to produce a dump of real and virtual storage.
- AMASPZAP - Verifies and/or replaces instructions and/or data in a load module.

This publication includes information related to:

OS/VS2 MVS SYSTEM PROG LIBR INITIALIZATION AND TUNING GUIDE

This book contains information on the following general topics:

- o System parameters in SYS1.PARMLIB
- o How to use the System Resource Manager (SRM)
- o How to use the System Activity Measurement Facility (MF/1)
- o System performance factors, such as those affecting VIO, catalog, device allocation, the use of SMF as a tuning aid, the pageable link pack areas, and paging data sets

Changes have been made throughout this publication to reflect a service update to OS/VS2 Release 3.7 and include the listed Selectable Units:

SUPERVISOR PERFORMANCE #2

Information was added for supervisor performance #2 in the following areas:

- A redesigned system resources manager (SRM).
- A redesigned auxiliary storage manager (ASM).

TSO/VTAM

Information was added for TSO/VTAM in the following area:

- A new parmlib member description for TSOKEY00

MSS ENHANCEMENTS

Information was added for MSS Enhancements in the following area:

- The description of the VATLSTxx parmlib member has been updated to indicate the handling of MSS entries.

DUMPING IMPROVEMENTS

Information was added for Dumping Improvements in the following areas:

- Addition of the IEADMR00 parmlib member.
- Addition of new parameters to the IEAABD00 and IEADMP00

GC28

parmlib members for dumps specified by the SYSABEND and SYSUDUMP DD statements.

- Addition of information on estimating the size of the SYS1.DUMP data set for SVC dumps of multiple address spaces.

HARDWARE RECOVERY ENHANCEMENTS

Information was added for Hardware Recovery Enhancements in the following areas:

- Changes to the PAGE parameter description.
- Changes to the PLPA data set size.
- Changes to the common page data set size.

TSO/VTAM LEVEL 2

Information was added for TSO/VTAM Level 2 in the following area:

- Two new parameter descriptions for the TSOKEY00 parmlib member

MODE

MODESW

PROCESSOR SUPPORT

Information was added for Processor Support in the following areas:

- "The first IPL after Sysgen".
- "CPU Service".

The sectioned title "Part 2: Storage Management Overview", has been incorporated in this publication from OS/VS2 System Programming Library: Storage Estimates, GC28-0604-4.

Manual, 8 1/2 x 11 inches, 360 pgs, 5/78

GC28-0683

OS/VS2 MVS SUPERVISOR SERVICES & MACRO INSTRUCTIONS

This publication describes the services of the supervisor, the macro instructions used to request these services, and the linkage conventions used by the control program to provide these services. The book is intended for the applications programmer coding in assembler language. Changes have been made throughout this publication to reflect a service update to OS/VS2 Release 3.7 and include the following listed Selectable Units:

SUPERVISOR PERFORMANCE #2 GN28-2713

Information was added for Supervisor Performance #2 in the following areas:

- The addition of the RACHECK macro instruction for checking the authorization of RACF-protected data sets.

IBM 3800 PRINTING SUBSYSTEM GN28-2713

Information was added to support the IBM 3800 Printing Subsystem in the following areas:

- Changes to the parameters in the control block for dumps.

- Changes to the SNAP macro instruction.

SYSTEM SECURITY SUPPORT GC28-0842

Information was added for System Security Support in the following areas:

- Additional specifications for the CLASS parameter in the RACHECK macro instruction.
- Addition of the OLDVOL parameter to the RACHECK macro instruction.

DUMPING IMPROVEMENTS GC28-0821

Information was added for Dumping Improvements in the following areas:

- SYSMDUMP has been added to the DD statements that can be specified for ABEND dumps.

- Changes to the SNAP macro instruction include the TRT, DM, ERR and I/O SDATA codes, and the STRHDR parameter.

Manual, 8 1/2 x 11 inches, 230 pgs, 3/78

//36//5752

GC28-0689

OS/VS2 CONVERSION NOTEBOOK

Documents the impact of certain features and facilities on an installation's conversion process: documents experiences with OS/VS2 Multiple Virtual Storage (MVS) at internal IBM

installations, field test installations, and user installations and supplements existing publications in the MVS library. Also includes conversion considerations for Selectable Units. As such, the material is not submitted to any formal IBM testing. Users must evaluate the applicability of the recommendations at their installations before implementing them.

Intended for installation managers, installation system programmers, and others responsible for converting from OS/MVT, OS/VS2 Single Virtual Storage or one MVS release level to the latest MVS release level. Reader is expected to be familiar with MVS system (such as found in IBM System/370 Summary, GA22-7001) and with the information in the applicable MVS release guide.

This book is not intended to present a comprehensive description of the conversion process, to describe the features and facilities of MVS, to replace existing publications, or to provide information on tuning and performance. This book also does not explain how to plan for operating with MVS program products (such as CICS/VS), specific industry-oriented IBM subsystems (such as the IBM 3600 Finance Communication System), and the IBM 3850 Mass Storage System.

The chapters are organized to cover these distinct conversion steps: overview and MVS planning, system generation and initialization, catalog conversion, JES2, JES3, TSO, accounting, system integrity, RAS and problem determination, multiprocessing, teleprocessing networks, and application, operator, and miscellaneous considerations. Except for the first chapter, each chapter is divided into two parts:

- o Introductory information that lists the publications relevant to that conversion step and, if necessary, background information on that topic.
- o A series of bulletins that contain hints or considerations for that conversion step.

The introductory information in each part first presents general conversion considerations and then any unique considerations for specific conversion paths.

Manual, 8 1/2 x 11 inches, 500 pgs., 5/77  
//34//5742,5752

## GC28-0692

OS/VS2 MVS JCL

This publication contains the information necessary to code job control language (JCL), job entry subsystem 2 (JES2), and job entry subsystem 3 (JES3) statements. It is intended for use by programmers who code JCL, JES2, and JES3 control statements and who understand the concepts of job management and data management.

The publication applies to OS/VS2 MVS Release 3.7 and includes information related to the following Selectable Units (SUs):

- SU3 - JES2 Release 4.0
- SU4 - Scheduler Improvements
- SU7 - Supervisor Performance #2
- SU10 - IBM 3800 Printing Subsystem
- SU18 - JES3 3850 Mass Storage System
- SU24 - MSS Enhancements
- SU25 - JES 2 Release 4.1
- SU29 - 3838 Vector Processing Subsystem Support
- SU33 - Dumping Improvements
- SU48 - IBM 3800 Printing Subsystem - 12 lines per inch

The first part of the publication is tutorial, explaining the use of the various statements and parameters. The second part explains each parameter for the JCL, JES2, and JES3 statements. The third part contains reference tables and a glossary.

Manual, 8 1/2 x 11 inches, 385 pages, 12/77

## GC28-0706

OS/VS2 SYSTEM MANAGEMENT FACILITIES (SMF)

This publication assists installation managers and system programmers in planning for, installing, and using System Management Facilities (SMF). SMF collects records accounting, data set, subsystem, system and volume information. It also has exits that can link to user-written routines for monitoring a job or job step.

The publication describes the basic SMF functions and the relationship of SMF to the operating system and to user-written exit routines. It also explains:

- o How to include user written exit routines in the operating system.
- o The additional storage required by SMF.
- o How to switch and dump the SMF data sets.
- o How to plan, write and test exit routines.
- o When each SMF record is written and the information contained in each record.

GC28-0886

OS/VS2 MVS PERFORMANCE NOTEBOOK

The subject of the OS/VS2 MVS Performance Notebook is performance evaluation: the process of tuning a system to meet performance expectations and to optimize use of the system resources. (Although configuration planning and capacity planning are related to performance evaluation,

they are not explicitly addressed in the book; benchmarking aspects of performance evaluation also are not addressed.) The purpose of the book is to document the experience of MVS performance analysts so that the reader can evaluate the performance of his system in a disciplined way and with some degree of confidence that the evaluation will succeed in identifying his system's problem areas.

The performance Notebook is written for system programmers/analysts who are responsible for the performance evaluation of their installation's system. The reader should have experience in tuning complex systems and a thorough knowledge of MVS concepts and facilities.

Information in the book is a combination of performance theory and MVS tuning experience. It is divided into the following topics:

- An overview of the steps required for a disciplined performance evaluation.
- Planning and preparing for a performance evaluation, which includes information on defining performance objectives, selecting measurement tools, and pre-initialization MVS performance factors.
- Performance hints, which are specific recommendations and considerations.

These topics will be expanded as more information becomes available. The information is based on MVS Release 3.8 systems and certain SUs and program products, such as RMF, SLR, and MVS/System Extensions Releases 1 and 2.

Because the information in this book is derived from experience and has not been formally tested, the reader must evaluate the applicability of the information to his environment before implementing any of the recommendations. Manual, 8 1/2 x 11 inches, 252 pages, 12/79

VS1 TO MVS CONVERSION NOTEBOOK

The VS1 to MVS Conversion Notebook is designed to aid in the planning, migration, and testing phases an installation goes through when converting from VS1 to MVS. It contains conversion hints, debugging aids, and problems and solutions encountered by installations already through the conversion process.

Manual, 8 1/2 x 11 inches, 400 pages, 1/78

OS/VS1 & OS/VS2 MVS PROGRAMMED CRYPTOGRAPHIC FACILITY, LIC PROG 5740-XY5, INSTALLATION REFERENCE MANUAL

This book introduces you to the concepts of the OS/VS1 and OS/VS2 MVS Programmed Cryptographic Facility, Program Number 5740-XY5. It also describes the installation process and operating considerations for this program product.

This book is intended for:

- System programmers responsible for installing and tuning your installations program products and for designing and writing application programs coded in Basic

Assembler Language (BAL)

- Security administrators responsible for establishing, maintaining, and monitoring the security of your installation

Specific topics in this book include:

- A short introduction to the subject of cryptography in general including an introduction to cryptographic algorithms and cryptographic keys.
- An explanation of how the Programmed Cryptographic Facility uses and protects cryptographic keys.
- A description of built-in security features.
- A description of installation security responsibilities.
- A description of the tasks that must be performed when installing this program product.
- An explanation of how to code the Programmed Cryptographic Facility macro instructions.
- Operating considerations.
- A glossary of terms.

OS/VS2 SPL SUPERVISOR (CURRENT RELEASE)

This publication describes supervisor facilities that are used by the system programmer. The topics described are:

- Subtask Creation and Control
- Program Management
- Resource Control (Includes Global Resource Serialization)
- Program Interruption, Recovery/Termination, and Dumping Services
- Virtual Storage Management
- Real Storage Management
- Inter-Address Space Communication (Includes Cross Memory)
- Miscellaneous Services

Included are the macro instruction needed to use these facilities. This publication supports MVS/System Product Release 2.

GC28-1062

OS/VS2 MVS PLANNING GLOBAL RESOURCE SERIALIZATION

A global resource serialization complex enables an installation to serialize access to resources, such as data sets on shared DASD volumes, at the data set level rather than at the volume level. This book is for the system programmers and planners at an installation who must decide whether or not to build a global resource serialization complex and who, once that decision is made, must plan how to make the best use of the global resource serialization complex.

The book includes an overview of how global resource serialization works and describes the planning tasks associated with building a global resource serialization complex. These tasks include selecting the resources for global serialization and designing, operating, and tuning the global resource serialization complex. The book also includes information on the storage global resource serialization requires and presents one approach to installing the global resource serialization complex.

MVS/XA MVS/SP-JES3 VERSION 2 MVS/SP-JES2 VERSION 2 USER EXITS (CURRENT RELEASE)

This publication contains information concerning the user exits located within both the base control program (BCP) and various components of MVS/XA. System programmers who create and maintain user-supplied routines can use this book with the MVS/XA SPL: System Modifications publication and the MVS/XA SPL: System Macro and Facilities publication. Functional areas where such modifications are primarily used are in the areas of syntactical checking of input records as well as an installation's statistical accounting retrieval function, device allocation and for specific performance needs. We assume the user of this book has an extensive knowledge of both MVS/XA and your installation's special requirements in these areas.

This book consists of 3 sections, which include the following information:

- . Section 1 - introduces the subject of exit points through an overview description of why and how you would use these exit points.
- . Section 2 - documents the user exits that are in the BCP of MVS/XA.
- . Section 3 - Lists the user exits that are located throughout the components of MVS/XA.

This publication provides customer engineers, PSRs, other qualified personnel and operators with the information required to use the Online Test Executive Program (OLTEP) to run online test programs, under MVS/XA, to test input/output devices. The publication discusses OLTEP Concepts, terminology system requirements and restrictions in Section

I. Section II deals with methods of creating and modifying OLTEP data sets, cataloguing OLTEP procedures, and defining an OLTEP job. Section III details OLTEP procedures and how to set up an MCS console, vary off-line, involve OLTEP, define and run tests and how to equate devices.

MVS/XA SYSL.LOGREC ERROR RECORDING (CURRENT RELEASE)

This publication is for system operators, system programmers, and administrators who use or are concerned with the information on the SYSL.LOGREC data set under the MVS/XA control program.

The publication describes how different errors and system conditions are recorded on SYSL.LOGREC data set; how the different type of records for hardware and software failures are built and recorded - their formats and controls. It also describes how to initialize and maintain the SYSL.LOGREC data set; how to use the service aid programs that do this.

MVS/BULK DATA TRANSFER FACILITY GENERAL INFORMATION

This book is intended for anyone who wishes to learn about the external characteristics of the MVS/BDT program product (5665-302). This book describes: the function of MVS/BDT, the external user interfaces, and the hardware/software requirements of MVS/BDT.

Manual, 8 1/2 x 11 inches, 52 pages, 07/83  
 //20//5665-302

## SC28-1314

MVS/BDT FACILITY INITIALIZATION AND NETWORK DEFINITION

This publication is intended for anyone who is responsible for installing or initializing MVS/BDT. It provides an overview of MVS/BDT and the initialization process. It also explains how to define nodes, how to select home node options, how to code MVS/BDT start procedures, and how to code MVS/BDT initialization statements.

Manual, 8 1/2 x 11 inches, 08/84  
 //34//5665-302

## LC28-1315

MVS/BULK DATA TRANSFER WRITING AND INSTALLING USER EXITS

This publication describes what an MVS/BDT user exit is and the categories of user exit routines that can be coded for MVS/BDT in both the JES3 and MVS/BDT address spaces. It is intended for MVS/BDT system programmers responsible for coding the required MVS/BDT authorization exit routines and any additional optional exit routines.

Information describing the procedures for correctly naming and loading user exit routines, the intended use of each exit routine, exit linkage conventions, and exit routine operation, environment, and required mapping macros is presented for each MVS/BDT exit. Also included is a description of the MVS/BDT mapping and executable macros available to the system programmer when coding MVS/BDT exits. A description of all available macros, their function, syntax keyword usage, and valid specifications is presented.

Manual, 8 1/2 x 11 inches, 08/84

GC28-2000

IBM TIME SHARING SYSTEM ASSEMBLER LANGUAGE

This publication describes the IBM Time Sharing System Assembler Language, a symbolic programming language. The language provides a convenient means for representing machine instructions and related data, especially as related to the Time Sharing System (TSS). The TSS Assembler Program processes the language and provides auxiliary functions for preparing and documenting a program; the Assembler includes facilities for processing the assembler macro language.  
Systems Reference Library Manual, 110 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GC28-2001

IBM TIME SHARING SYSTEM COMMAND SYSTEM USER'S GUIDE

This is a reference book for users of the commands that are part of the IBM Time Sharing System. The command system gives the user the ability to (1) construct, execute, and debug programs; (2) create, modify, copy, and share data sets; (3) enter data into and retrieve data from the system; and (4) modify and add to the system-supplied commands.

Commands that are used exclusively by the system operator, system manager, system administrator, and system programmer are not presented in this book.

Three types of information make up the major part of this reference: basic information for the new user, examples, and command descriptions. Part II contains seven sections, and each section describes a different category of commands. Introductory material in Part II is provided to give the new user of the command system general knowledge of the commands. Part III contains format illustrations and descriptions of the commands. Parts II and III also contain examples that show ways of using the commands. Before reading Command System User's Guide, you should have general knowledge of TSS. For an introduction to TSS see IBM Time Sharing System: Concepts and Facilities, GC28-2003. If you enter commands through a terminal, you should be familiar with the terminal. See IBM Time Sharing System: Terminal User's Guide, GC28-2017 for instructions on operating the IBM 2741 Communications Terminal and the IBM 1052 Printer-Keyboard.

Systems Reference Library Manual, 341 pages

## GC28-2003

IBM TIME SHARING SYSTEM CONCEPTS AND FACILITIES

This publication provides an introduction to the IBM Time Sharing System (TSS), a general purpose operating system used with IBM System/370 computers that have dynamic address translation. TSS allows many users to have simultaneous access to a computing system. The combination of machine and control program creates a data processing environment for each user which can be utilized independently or shared with other users. Each user operates in a separate virtual storage address space potentially as big as the addressing capability of the machine.

The design of TSS aids program development because the functions provided support a convenient, interactive programming environment. Programs developed in this environment may be used in production mode without change. Integration of virtual storage with data management permits a novel approach to data base applications. A feature of TSS is user ownership of data with excellent security and privacy.

This publication is written for managers of data processing installations, system programmers, application programmers, end users of applications, and operators. It is an introduction to the purpose, design, and use of TSS and contains general descriptions of the control program, data management, and task management; a summary of publications relating to TSS; and information about the use of the system to support individual users and subsystem programming development projects.

There is no prerequisite reading for this publication. However, the reader should have a basic understanding of data processing techniques.

Systems Reference Library Manual, 76 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2004

IBM TIME SHARING SYSTEM ASSEMBLER USER MACRO INSTRUCTIONS

Provides the information necessary to code assembler language macro instructions under the IBM Time Sharing System. The intended audience is the non-privileged assembler language user.

The primary macro instruction services are program management and data management. These macro instructions aid in programming and processing time-shared tasks.

The first section of the book describes the macro instructions by functional groups, enabling the user to select the macro instructions he needs to manage his program (manage virtual storage, load and link modules, handle interruptions, transfer to command mode, communicate with SYSIN/SYSOUT and with the operator and the log, maintain timers, and create commands) and to manage data (define, connect, access, manipulate, disconnect, or remove data sets). The second portion of the book lists the macro instructions alphabetically and provides all the information needed to code the macro instructions. Appendixes detail exit lists, synchronous error exits, end-of-data processing, machine control characters, linkage conventions, DCB fields, the DDEF macro instruction, the generation of literals by macro instructions, interruption handling, the TSS Macro and Copy library, sharing virtual data sets, the OPEN/CLOSE generated parameter list, and the conditional assembly of macro instructions.

The reader must be familiar with the information presented in IBM Time Sharing System: Concepts and Facilities, GC28-2003, and Assembler Language, GC28-2000. Systems Reference Library Manual, 315 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2005

IBM TIME SHARING SYSTEM LINKAGE EDITOR

This publication describes the linkage editor, an optional Sharing System (TSS/360). The linkage editor connects and

edits program modules that have been assembled or compiled separately to produce a single program module that can be efficiently loaded by the dynamic loader at execution time. Linkage editor facilities are illustrated in conversational and nonconversational modes of operation.

Tells how to use the time sharing system's linkage editor. This optional program can be used to join two or more related object modules into one object module, saving dynamic loader processing time. A linkage editor user can also, without having to reassemble or recompile his program, combine control sections (possibly saving external storage and reducing program execution time); rename entry points, control sections, and external references; and change control section attributes. An introduction explains: how a TSS object module is created, its structure, how control sections are named and attributes assigned, external definitions and references, the difference between static and dynamic linking. The reader is shown how to invoke the linkage editor and how to use linkage editor control statements. Examples are provided for both conversational and non-conversational users. Before using this publication, be familiar with the contents of IBM Time Sharing Systems: Concepts and Facilities, GC28-2003, and IBM Time Sharing System: Command System User's Guide, GC28-2001.

Systems Reference Library Manual, 52 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2006

TIME SHARING SYSTEM, TIME SHARING SUPPORT SYSTEM

The Time Sharing Support System is an on-line program error analysis facility that provides the capability of collecting data from the Time Sharing System for analysis, and of altering the TSS storage and machine registers. This system is used only by system programmers with authority code 0 or P and is not intended to be available to any other TSS users.

The functions of TSSS may be performed on command from a terminal or dynamically during TSS execution. The programs, tables, and control blocks of real, virtual, and secondary storage can all be referred to and modified.

Part I of this publication describes the TSSS system and its capabilities in a general way. Part II describes the TSSS command language, defining the functions of the language elements and the language syntax. Part III presents additional requirements for correct use of TSSS.

The reader must be familiar with the information contained in:

IBM Principles of Operation, 6A22-6821

IBM Time Sharing System:

Concepts and Facilities, GC28-2003

System Programmer's Guide, GC28-2008

Systems Reference Library Manual, 60 pages

## GC28-2007

IBM TIME SHARING SYSTEM FORTRAN IV LANGUAGE

This publication describes and illustrates the use of the IBM FORTRAN IV language for the IBM Time Sharing System (TSS).

The IBM FORTRAN IV language is a symbolic programming language that parallels the symbolism and format of mathematical notation. It provides programming features and facilities that can be used in FORTRAN programs to solve mathematical problems.

The material in IBM FORTRAN IV is arranged to provide a quick definition and syntactical reference to the various elements of FORTRAN IV by means of a box format. Each element is described, with appropriate examples of possible use.

The reader should have a basic knowledge of the FORTRAN language. While some information relating FORTRAN IV to TSS

is presented, most of the necessary guidance required by a FORTRAN user to perform a task is given in IBM Time Sharing System: FORTRAN Programmer's Guide, GC28-2025. Systems Reference Library Manual, 100 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

o Section 4 is a sample terminal session.

There are two appendixes: one that summarizes the commands that can be used by each privilege class and authorization code, and one that lists format descriptions of commands. Managers and administrators must be familiar with TSS. IBM Time Sharing System: Concepts and Facilities, GC28-2003, contains an introduction to the system. In addition, they need to know how to operate the terminals that are used with the system. Instructions on operating terminals are given in IBM Time Sharing System: Terminal User's Guide, GC28-2017. Systems Reference Library Manual, 45 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2008

IBM TIME SHARING SYSTEM SYSTEM PROGRAMMER'S GUIDE

IBM Time Sharing System (TSS) makes a distinction between user and system programmers. This publication is intended for persons responsible for maintaining, modifying, or extending the system and discusses:

- o Operating environment
- o Program structure
- o Coding practices and conventions
- o Privileged supervisor call instructions
- o Serviceability aids
- o System macro definitions
- o Changing TSS
- o Privilege Class E

Systems Reference Library Manual, 286 pages

## GC28-2025

IBM TIME SHARING SYSTEM FORTRAN IV PROGRAMMER'S GUIDE

This publication describes how to use the IBM Time Sharing System (TSS) for compiling and executing programs written in the FORTRAN IV language. It also describes how to use the services and features of TSS that, while not directly related to FORTRAN programming, are frequently of use to the FORTRAN programmer. Systems Reference Library Manual, 162 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2010

TIME SHARING SYSTEM, SYSTEM GENERATION & MAINTENANCE

This publication explains how an installation specifies, creates, maintains, and modifies an installation-adapted IBM Time Sharing System. The intended audience is the system programmer charged with system generation and maintenance.

Part I is an overall description of system generation and maintenance; Part II describes the creation of a basic time-sharing system; Part III describes the macro instructions used to adapt the basic system to the installation's needs; Part IV explains the system maintenance process, and Part V shows how to modify the system for the duration of a startup-to-shutdown session. The appendixes contain examples of system generation, maintenance, and modification, reference material on device addressing and system libraries, a sample machine configuration, and sample system generation macro instructions.

The reader must be familiar with the information presented in: IBM Time Sharing System Concepts and Facilities, GC28-2003

Systems Reference Library Manual, 84 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2026

IBM TIME SHARING SYSTEM FORTRAN IV LIBRARY SUBPROGRAMS

This publication describes the FORTRAN IV library subprograms provided with IBM Time Sharing System (TSS) and provides the information necessary to use the subprograms in either a FORTRAN IV or an assembler-language program. Systems Reference Library Manual, 65 pages

## GC28-2017

IBM TIME SHARING SYSTEM TERMINAL USER'S GUIDE

This manual gives instructions for operating the IBM 2741 Communications Terminal, the IBM 1050 Data Communications System and the teletypewriter terminal with the IBM Time Sharing System. It is intended for programmers, system managers, and system administrators who use terminals in the IBM Time Sharing System.

Systems Reference Library Manual, 31 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2032

IBM TIME SHARING SYSTEM ASSEMBLER PROGRAMMER'S GUIDE

This publication explains the use of the Time Sharing System (TSS) for assembler language programmers. It describes how to assemble, store, and execute programs in TSS, introduces the command system, and explains the basic rules of task and data management. Numerous examples are given showing typical user-system interaction. The appendixes include information on assembler options, output, and restrictions, as well as program control system use, interrupt handling, and command creation.

Systems Reference Library Manual, 191 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2024

IBM TIME SHARING SYSTEM MANAGER'S AND ADMINISTRATOR'S GUIDE

This manual describes the special commands that managers and administrators of the IBM Time Sharing System (TSS) use.

There are four sections in the book:

- o Section 1 introduces the command system as it relates to the job and responsibilities of a system manager or a system administrator.
- o Section 2 explains the basics of using the command system and of the command descriptions.
- o Section 3 contains the command descriptions, which are in alphabetical order.

## GC28-2033

IBM TIME SHARING SYSTEM OPERATOR'S GUIDE

This guide presents the basic information an operator needs to run the IBM Time Sharing System. The book is divided into four main parts. These parts present a general view of the system, descriptions of the commands used by the

operator, an explanation of the operator's terminal, and procedures the operator uses to run the system. Additional information that supplements the operator's knowledge of the system is presented in the appendices. These appendices include a description of the system control panel, a definition of the types of data set names, an explanation of device addresses, and summaries of the formats of the operator's commands and the TSS commands.

The system operator should be familiar with IBM Time Sharing System: Concepts and Facilities, GC28-2003. Systems Reference Library Manual, 56 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2038

IBM TIME SHARING SYSTEM INDEPENDENT UTILITIES

Explains the use of the independent utility programs that support the IBM Time Sharing Systems (TSS), and describes their features, functions, capabilities, control statements, and record formats.

The independent utility programs are primarily intended to assist the systems programmer and operator to initialize, copy, restore, and print the contents of direct access storage devices.

The programs are:

- o direct access storage device initialization (DASDI)
- o direct access storage device dump/restore (DASDDR)
- o direct access storage device print (DADUMP)
- o system/370 memory dump
- o VAM2 utility (VAM2UT)

Before using this book, be familiar with the contents of: IBM Time Sharing System: Concepts and Facilities, GC28-2003 and Operator's Guide, GC28-2033. Systems Reference Library Manual, 39 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2045

IBM TIME SHARING SYSTEM PL/I LANGUAGE REFERENCE MANUAL

This publication is a companion volume to IBM Time Sharing System: PL/I Programmer's Guide, GC28-2049. Together the two books form a guide to the writing and execution of PL/I programs under the control of an IBM Time Sharing System that includes the PL/I compiler.

Systems Reference Library Manual, 353 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2046

IBM TIME SHARING SYSTEM PL/I LIBRARY COMPUTATIONAL SUBROUTINES

This publication gives details of the computational subroutines available in the PL/I Library. These subroutines are used by the PL/I compiler in the implementation of PL/I built-in functions and of the operators used in the evaluation of PL/I expressions. Not all PL/I built-in functions and expression operators are supported by the PL/I Library; the compiler generates in-line code for a small number of them. The details provided include summaries of the mathematical methods used, and (where appropriate) figures for range and accuracy.

Systems Reference Library Manual, 49 pages

## GC28-2048

TIME SHARING SYSTEM, A PRIMER FOR FORTRAN IV USERS, PROG NO 360G-CL-627

A subset of the IBM Time Sharing System (TSS) is presented in this book to allow use of basic system facilities without an extensive knowledge of the command system, by which system functions are invoked. The reader of the book is presumed to have at least a basic knowledge of FORTRAN. In addition, the user profile under which the reader will use

TSS should be altered as explained in Appendix B. This can be done by the reader himself, if necessary; preferably, however, it should be done by someone in a supervisory or tutorial relationship to the reader.

The altered user profile can be changed again by the reader if he progresses to using the full command system. The full system is explained in manuals such as Command System User's Guide, Form C28-2001, and FORTRAN Programmer's Guide, Form C28-2025.

This book contains basic information on the kinds of terminals that can be used with TSS. If more information is needed, see Terminal User's Guide, C28-2017.

Manual, 51 pages

## GC28-2049

IBM TIME SHARING SYSTEM PL/I PROGRAMMER'S GUIDE

This publication is a companion volume to IBM Time Sharing System: PL/I Language Reference Manual, GC28-2045.

Together, the two books form a guide to the writing and execution of PL/I programs under the control of an IBM Time Sharing System that includes a PL/I compiler. This publication is concerned with the relationship between a PL/I program and the Time Sharing System. It explains how to compile and execute a PL/I program, and introduces the command system, data management, and other essential features of TSS.

Systems Reference Library Manual, 245 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2056

IBM TIME SHARING SYSTEM DATA MANAGEMENT FACILITIES

This book is to be used as a reference guide for TSS users of data management facilities. Topics dealt with include: storage classes, unit record devices, data set characteristics, data set sharing, gaining access to data sets, and use of data management facilities. This book is equally useful to assembler, FORTRAN, or PL/I users.

The reader should be familiar with IBM Time Sharing System: Concepts and Facilities, GC28-2003.

Systems Reference Library Manual, 85 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC28-2057

IBM TIME SHARING SYSTEM REMOTE JOB ENTRY

Remote Job Entry (RJE) allows users at remote locations to submit punched-card input to, and receive printed output from, the central TSS installation.

RJE users can enter card decks in the same format as that used at the local, online card reader. Nonconversational SYSIN data sets can be entered for execution, and data-card card decks can be entered and stored as virtual storage data sets. Output can be returned to the originating location or routed to the installation's high-speed printer. SYSOUT data sets are returned to the originating location unless redirected by the system operator.

This publication describes RJE concepts, terminology, and procedures. Information required by users at remote locations, including RJE control statements, is presented; also, commands used by the system manager, system administrator, and system operator to control the RJE system are described.

OS FULL ANS COBOL COMPILER & LIBRARY VERSION 3 INSTALLATION REFERENCE MANUAL, PROG. PROD. 5734-CB1

Contains system related information needed to make the most effective use of the Program Product IBM Full American National Standard COBOL Compiler and Library Version 3, under the control of the Operating System.

This publication consists of three sections. The first two sections, "Program Product Installation" and "Storage Estimates", are directed to the system programmer or planner who is responsible for operating system generation and maintenance. The third section, "Operating Instructions," is directed to the console operator. Each section is designed to be used with an existing Operating System publication.

"Program Product Installation" describes the system requirements for the compiler and the procedure needed to add the compiler to an operating system. This section supplements IBM OS System Generation, Order No. GC28-6554. A module summary is also included.

"Storage Estimates" defines the storage required by the compiler. This section supplements IBM OS Storage Estimates, Order No. GC28-6551.

"Operating Instructions" describes certain messages the console operator may be required to answer and presents information on Multiple Console Support (MCS). This section supplements IBM OS Operator's Reference, Order No. GC28-6991.

OS/VS COBOL COMPILER & LIBRARY, LIC PROG 5740-CB1, -LM1  
GENERAL INFORMATION

Contains information to aid data systems planners and analysts in evaluating and planning for the use of the OS/VS COBOL Compiler and Library Program Product.

OS/VS COBOL operates under control of OS/VS1 or OS/VS2 (with or without TSO), and with restrictions under the CMS component of VM/370; it processes COBOL source programs in an OS virtual environment. OS/VS COBOL includes all eight processing modules of American National Standard COBOL, X3.23-1968 and International Standard ISO/R and IBM Programming Language COBOL; CODASYL-specified and IBM-specified extensions are also included.

Brief descriptions of Compiler and Library capabilities are provided - including as major features support for VSAM entry-sequenced and key-sequenced data sets, the MERGE statement, the FIPS (Federal Information Processing Standard) Flagger, and the Lister Facility (which provides a specially formatted source listing with embedded cross references). System requirements and data set and programming compatibility are described. A complete description of the language implementation is also included.

This publication is an aid in evaluation and planning; it is not intended to be used as a specification manual.

OS/MVT AND OS/VS2 TSO TERMINALS MANUAL

This publication describes how to use the terminals supported by the Time Sharing Option (TSO) under the OS/MVT and OS/VS2 configurations of the Operating System (OS). It is intended for all TSO terminal users. The operation and characteristics of the following terminals in a TSO environment are discussed:

- o IBM 2741 Communication Terminal
- o IBM 1052 Printer-Keyboard
- o Teletype\* Model 33
- o Teletype\* Model 35
- o IBM 2260 Display Station
- o IBM 2265 Display Station

o IBM 3270 Information Display System

\*Trademark of Teletype Corporation

The publication is divided into independent sections; each describes one type of terminal.

An appendix describes the LOGOFF, LOGON, PROFILE, and TERMINAL commands that a user issues to control his terminal session.

OS/MVT AND OS/VS2 TSO DATA UTILITIES: COPY, FORMAT, LIST &  
MERGE: USER'S GUIDE AND REFERENCE, PROG. NO. 5734-UT1

The TSO Data Utilities: COPY, LIST, FORMAT, MERGE is a program product designed to augment the text and data manipulation capabilities of the TSO Command Language. This publication describes the syntax and use of the TSO Data Utility commands: COPY, FORMAT, LIST, and MERGE. This publication is intended for use by terminal users whose installation includes this TSO program product. This manual has two sections:

- o "How to Use the Commands" describes the operations that can be performed by using the utility commands and subcommands at a terminal.
- o "Command Descriptions" describes the syntax of the four utility commands: COPY, FORMAT, LIST, and MERGE, and the two subcommands of the EDIT command, FORMAT and MERGE. Examples of each command and subcommand are included.

Prerequisites and corequisites for this publication are:  
IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION,  
COMMAND LANGUAGE REFERENCE (GC28-6732)  
IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION,

GUIDE TO PL/S II

The PL/S II compiler is a proprietary program used by IBM to develop other programs that are made generally available. This provides general information on understanding and interpreting PL/S II listings. The book also provides some guidelines on how to modify compiler generated assembler code. Readers will be experienced systems programmers who

need to understand and possibly modify operating system modules. They should know the basic assembler language such as PL/I.

SYSTEM/360 OS/DOS AND OS (TSO) ITF: PL/I AND BASIC PROG PROD 5734-RC1, -RC2, -RC3, -RC4, 5736-RC1, -RC2, GENERAL INFORMATION

This publication gives general information about the external characteristics of the PL/I feature of the Interactive Terminal Facility (ITF), a Program Product that operates under the System/360 Operating System or the System/360 Disk Operating System. The book includes descriptions of terminal commands, PL/I language elements, and machine requirements.

This publication is intended as an aid to evaluation and planning; it is not meant for the terminal user. Publications will be provided for the terminal user when ITF:PL/I becomes available.

## SC28-6842

SYSTEM/360 OS (TSO CODE AND GO FORTRAN PROCESSOR TERMINAL USER'S GUIDE, PROG PROD 5734-F01, -LMI

Provides the information necessary to use the Code and Go FORTRAN Processor for foreground programs developed in an OS (TSO) environment.

Code and Go is a compile-and-go processor that compiles at a fast rate and produces an object program directly in main storage. For the TSO foreground, Code and Go was specifically developed for users who place a premium on quick compilation and execution, and on easy and rapid debugging.

This publication, while primarily directed to engineers, mathematicians, and others who may not be full-time, professional programmers, also provides information for experienced production programmers who will be using Code and Go to write and test components of a large program for later execution in a batch environment. Readers must be familiar with the FORTRAN IV Language as described in the publication IBM System/360 and System/370 FORTRAN IV Language, Order No. 6C28-6515.

Included are explanations of that portion of the TSO command language that is directly relevant to the needs of the Code and Go foreground user, a sample terminal session, a section on programming considerations, and other reference information. Also provided are a discussion of the FORTRAN syntax checker and its associated messages, and a listing (with explanations) of compiler-related and load module execution diagnostic messages. Program Product Manual, 186 pages

## SC28-6855

OS TSO FORTRAN IV (G1) PROCESSOR, TSO FORTRAN PROMPTER, LIC PROG 5734-F02, -CP3, -LMI, TERMINAL USER'S GUIDE

This publication describes the use of the FORTRAN IV (G1) compiler and the TSO FORTRAN Prompter from a TSO Terminal. It is intended as a supplement to the IBM System/360 OS TSO Terminal User's Guide. This book describes the G1 compiler and its features, and methods of invoking the compiler. It contains examples of the use of the G1 compiler and the Prompter, diagnostic messages that a user receives at his terminal, and reference information. It makes no attempt to cover general TSO operation, which is covered in the TSO Terminal User's Guide.

The FORTRAN IV (G1) compiler is an extended version of the FORTRAN G compiler, adapted for more efficient use from a time-sharing terminal. The Prompter provides the interface between the compiler and the user, creating a conversational environment for the G1 programmer.

This publication is intended for use by FORTRAN programmers of all levels, but its approach is essentially toward the inexperienced programmer. It is not a reference document for the system programmer.

Co-requisite publications for this book are the IBM System/360 Operating System TSO Terminal User's Guide, Order No. 6C28-6763, and the IBM System/360 Operating System Time Sharing Option Command Language Reference, Order No. 6C28-6732. Manual, 124 pages

OS/VS1 RES WORKSTATION USER'S GUIDE

This publication is intended for an RES workstation user who creates one or more jobs to be sent, using RES (Remote Entry Services), to a central computer for processing. In addition, it can be used by one who merely operates the RES workstation, sending jobs created by others. The publication describes input and output queues and how the workstation user can control them. The workstation commands available to the user are described according to their function. The parameters used for various forms of the commands are explained. For each type of RES workstation, there is a separate chapter that describes its operation. This portion can be tailored to each installation's requirements by removing chapters that pertain to types of workstations not used by that installation. For a user's guide to be used only at one workstation, only the pertinent chapter need be retained.

SC28-6885

FORTRAN INTERACTIVE DEBUG FOR CMS & TSO, LIC PROG 5734-F05 GUIDE & REFERENCE (CURRENT RELEASE)

This manual provides the information required to use FORTRAN Interactive Debug to debug Code and Go FORTRAN G1 programs from a TSO or CMS terminal.

FORTRAN Interactive Debug is a conversational, symbolic debugging language with which the FORTRAN programmer can dynamically control the execution of his program. While using it, he can stop and start execution, examine and change values of program variables, dynamically control the Extended Error Handling facility, display execution frequencies for program statements, and trace control transfers as they occur.

The intended audience is the TSO or CMS FORTRAN programmer who codes in Code and Go FORTRAN or FORTRAN G1. The first section of the book describes FORTRAN Interactive Debug, its invocation, and its use, and gives instructions for compiling FORTRAN programs so that they can be processed under interactive debug. The second section is a reference section containing all all the FORTRAN Interactive Debug subcommands. The third section covers programming considerations. Messages issued by FORTRAN Interactive Debug are covered in the fourth section.

FORTRAN IV PROGRAM PRODUCTS FOR VM/370 (CMS), LIC PROG 5734-F01, -F02, -F03, -LM1, -LM3, TERMINAL USER'S GUIDE (CURRENT RELEASE)

This user's guide is intended for FORTRAN programmers who will be using the IBM System/360 OS FORTRAN IV (G1) or Code and Go FORTRAN IV compiler and the FORTRAN IV Library (Mod I) or the FORTRAN IV (H Extended) compiler and the IBM FORTRAN IV Library (Mod II) under the control of the Conversational Monitor System component of the Virtual Machine Facility/370. It is assumed that the reader is familiar with the FORTRAN IV Language and the CMS component of VM/370.

VS BASIC, LIC PROG 5748-XX1, GENERAL INFORMATION (CURRENT RELEASE)  
This publication is for installation managers and system programmers responsible for planning an installation of the IBM program product VS BASIC under one of the virtual storage operating systems: VM/370; OS/VS2 with TSO; or the IBM program product VS Personal Computing (VSPC). The publication aids in evaluating VS BASIC. It provides general information about the characteristics and capabilities of VS BASIC: it lists and discusses the statements, functions, and constants of the language; describes the environments in which VS BASIC operates; and summarizes related publications where the reader can obtain more specific product information.

VS BASIC, LIC PROG 5748-XX1, SPECIFICATIONS (CURRENT RELEASE)

The VS BASIC processor, which operates in time-sharing and batch environments, is used for compiling and executing programs written in the BASIC language. With VS BASIC, the user can execute a program immediately after compilation or can store it and execute it later.

VS BASIC is designed to operate in virtual storage systems. It operates in the time-sharing environments: CMS (Conversational Monitor System) of VM/370 and TSO (Time Sharing Option) under OS/VS2 and VSPC (Virtual Storage Personal Computing) under OS/VS1, OS/VS2, and DOS/VS. It operates as a batch compiler under control of OS/VS1, OS/VS2, DOS/VS, and CMS Batch. This publication replaces the Program Product Design Objectives, GX28-8301, at release time. It is aimed at customer employees and prospective customers responsible for planning and maintaining an installation. It provides information upon which the IBM

OS/VS2 TCAM (LEVELS 8 & 9) PROGRAMMER'S GUIDE

For users of TCAM (Telecommunications Access Method). This book is a coding guide for the programmers who must construct or modify a TCAM message control program (MCP) or write a TCAM - compatible application program. It also explains how to use a variety of auxiliary service facilities. It contains information that might be of use in planning and setting up a teleprocessing system incorporating TCAM/VTAM (Virtual Telecommunications Access Method) and SNA (Systems Network Architecture). The reader should be familiar with OS/VS TCAM Concepts and Facilities, GC30-2042.

Manual, 800 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

GC30-2042

OS TCAM (LEVELS 8 & 9) CONCEPTS AND FACILITIES

This publication is an introduction to the Telecommunications Access Method (TCAM) for persons requiring either a general knowledge of TCAM, or a basic understanding before studying more detailed documentation.

Readers should have a general knowledge of data processing and the IBM operating systems.

Manual, 60 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

GC30-2044

OS/VS TCAM LEVELS 5 & 6 PROGRAMMER'S GUIDE: VS2 REL 1.6, 1.7

For users of TCAM (Telecommunications Access Method), Level 5 and above; VS1 and VS2. Incorporates TSO (VS2 only). This book is a coding guide for the programmers who must construct or modify a TCAM message control program (MCP) or write a TCAM-compatible application program. It also explains how to use a variety of auxiliary service facilities. It also has information that might be of use in planning and setting up a teleprocessing system incorporating TCAM. The reader should be familiar with OS TCAM Concepts and Facilities, Order No. GC30-2022.

Manual, 820 pages

OPERATOR'S LIBRARY: OS/VS2 TCAM (LEVELS 8 & 9)

For users of TCAM (Telecommunications Access Method). This book familiarizes the operator with TCAM procedures and commands, and provides a convenient reference. For more details on Level 8 TCAM and the operator commands, see the TCAM Programmer's Guide, order OS/VS2, No. GC30-2040. Manual, 40 pages

GC30

SLSS: ORDER NO. SUBSCRIPTION ONLY

GC30-2047

OS/VS1 TCAM (LEVELS 8 & 9), OPERATOR'S LIBRARY

The OS/VS1 TCAM Operator's Library is a module in the OS/VS Operator's Library for the operator of teleprocessing systems using the VS1 Operating System and the Telecommunications Access Method (TCAM). It familiarizes the operator with TCAM procedures and commands, and provides a convenient reference. A familiarity with data processing is assumed, however a knowledge of teleprocessing would be helpful.

The material in this publication was previously contained in the Operator's Library: OS/VS TCAM, GC30-2037 which was a combination VS1 and VS2 publication. Beginning with VS1 release 3.1 this publication contains VS1 TCAM Operator's Library information, while VS2 TCAM Operator's Library information continues in the publication Operator's Library, OS/VS TCAM, GC30-2037.

A summary of the commands has been placed at the beginning of this guide for easy reference.

Technical terms used in this publication are defined in A Data Processing Glossary, GC20-1699. For more details about OS/VS TCAM and the operator commands, see the OS/VS TCAM Programmer's Guide, GC30-2054.

Manual, 30 pages

GC30-2049

OS/VS TCAM (M/NCP/VS FOR SNA) CONCEPTS & APPLICATIONS

This is a new publication that introduces the Telecommunications Access Method (TCAM) with direct network control program/virtual storage (NCP/VS) support. This version of TCAM supports IBM's System Network Architecture (SNA) without the Virtual Telecommunications Access Method (VTAM); it operates with OS/VS1, Multiple Virtual Storage (MVS), or Single Virtual Storage (SVS). This manual is for persons requiring a general knowledge of TCAM: data processing managers, system programmers, and application programmers. It describes how TCAM operates with an IBM 3704 or 3705 Communications Controller in network control mode.

TCAM can also operate with an IBM 2701 Data Adapter Unit, an IBM 2702 or 2703 Transmission Control Unit, an IBM 7770 Audio Response Unit, or with an IBM 3704 in emulation mode. The reader who plans to use TCAM with any of these control units or with the emulation program should refer to the OS/VS TCAM Concepts and Facilities, GC30-2042. OS/VS Concepts and Applications includes information on:

- o Basic TCAM concepts, such as buffering and queuing
- o How TCAM and NCP/VS operate in a teleprocessing network
- o SNA sessions and changes made to TCAM's structure to add SNA support
- o The message control program and message handlers
- o Use of the Time Sharing Option (TSO) in a TSO-only and a TSO/TCAM mixed environment
- o Design consideration for application programs
- o Network control using application-program macros and operator commands.
- o TCAM's service facilities - online tests, operator control, checkpoint/restart, and debugging aids
- o Hardware configurations supported.

Manual, 76 pages, 6/76

GC30-2050

ADVANCED COMMUNICATIONS FOR TCAM, LIC PROG 5735-RC1, GENERAL INFORMATION

This publication introduces Advanced Communications Function for the Telecommunications Access Method (ACF/TCAM). This

program product supports IBM's System Network Architecture (SNA) and operates with OS/VS1, Multiple Virtual Storage (MVS), or Single Virtual Storage (SVS). This manual is for persons requiring a general knowledge of ACF/TCAM: data processing managers, system programmers, and application programmers. It describes how ACF/TCAM operates with an IBM 3704 or 3705 Communications Controller in network control mode.

ACF/TCAM can operate with an IBM 2701 Data Adapter Unit, an IBM 2702 or 2703 Transmission Control Unit, an IBM 7770 Audio Response Unit, or with an IBM 3704 or 3705 in emulation mode. The reader who plans to use ACF/TCAM with any of these control units or with the emulation program should refer to the OS/VS TCAM Concepts and Facilities, GC30-2042, for information on:

- o Line control
- o Invitation and selection of terminals
- o Polling and addressing
- o Error-recovery procedures.

Advanced Communications Function for TCAM General

Information includes information on:

- o Basic ACF/TCAM concepts, such as buffering and queuing
- o How ACF/TCAM and NCP/VS operate in a teleprocessing network
- o SNA sessions and SNA support
- o How ACF/TCAM operates in a multiple-domain network
- o The message control program and message handlers
- o Use of the Time Sharing Option (TSO) in a TSO-only and TSO/TCAM mixed environment
- o Design consideration for application programs
- o Network control using application-program macros and operator commands
- o TCAM's service facilities: online tests, operator control, checkpoint/restart, and debugging aids
- o Hardware configurations supported

Migration considerations.

Manual, 8-1/2 x 11 inches, 90 pgs, 10/76

3735 PROGRAMMER'S GUIDE (OS, DOS, & VS SYSTEMS)

This publication provides system programmers, application programmers, and operators with the information they need to use IBM 3735 Programmable Buffered Terminal facilities in a teleprocessing system.

All readers should have a general knowledge of System/360 and System/370 data processing techniques in a teleprocessing environment. Those responsible for designing or installing part or all of a system that includes IBM 3735 terminals should have a detailed knowledge of teleprocessing systems.

All users of this book should be familiar with the information contained in IBM 3735 Programmable Buffered Terminal Concept and Application, GA27-3043, which describes the operating characteristics and features of the 3735 terminal.

Programmer's Guide, 200 pages

//30/3735/

## GC30-3003

3704/3705 COMMUNICATIONS CONTROLLER ASSEMBLER LANGUAGE (CURRENT RELEASE)

This publication is a reference manual for the systems programmer, the systems engineer and the applications programmer coding in the IBM Communications Controller Assembler Language.

The publication is similar to the IBM System/360 Operating System Assembler Language publication, GC28-6514. The Communications Controller Assembler is similar to the OS Assembler (level F) and the DOS Assembler (level D). The similarity is intended to aid the Communications Controller programmer who already has OS or DOS Assembler knowledge.

Chapter 1 introduces the assembler language and describes the major differences between the language and the OS and DOS Assembler language. Chapter 2 presents basic assembler language concepts. Chapter 3 describes instruction alignment, machine instruction mnemonics, machine formats and briefly describes the extended mnemonics.

Chapter 4 discusses the instructions to the assemblers,

GC30

including symbol definition, data definition, program sectioning and linkages, symbolic linkages, base register instructions, listing control and program control instructions. Chapter 5 describes the macro language and the procedures for its use.

Appendixes A through E contain a summary of assembler language features and usage. Appendix F describes the job control language and the storage requirements necessary to produce an assembly, and Appendix G contains messages and codes helpful in debugging a program.

Before using this publication, the reader should be familiar with basic programming concepts and techniques. The prerequisite publication is Introduction to the IBM 3705 Communications Controller, GA27-3051. Corequisite to this publication is the IBM 3705 Communications Controller Principles of Operation, GC30-3004.

The contents of this publication apply to both OS and DOS users unless noted differently in the text.  
Manual, 116 pages

GC30-3004

3704, 3705-I, AND 3705-II COMMUNICATIONS CONTROLLERS PRINCIPLES OF OPERATION

This publication is the machine reference manual for the IBM 3704, 3705-I, and 3705-II Communications Controllers. It provides a direct comprehensive description of the controllers' functional components, the arithmetic, logical, branching, status switching, and input/output operations, and the priority interrupt scheme.  
Manual, 4/81  
//09/3705,3704/

GC30-3005

3704 & 3705 COMMUNICATIONS CONTROLLERS, EMULATION PROGRAM STORAGE AND PERFORMANCE REFERENCE (CURRENT RELEASE)

This publication has two purposes (1) to assist you in determining the storage requirements for the IBM 3705 Emulation Program, and (2) to assist you in determining the 3705 line attachment capability and proper arrangement of lines on the Communications controller's internal priorities for best Emulation Program performance. The publication is intended for systems analysts and systems programmers responsible for defining and generating an Emulation Program, and for IBM systems engineers and salesmen.

Chapter 1 summarizes the contents of the book. Chapter 2 defines storage requirements. Chapter 3 defines formulas and procedures for establishing line speeds and priorities for best performance.

You should be familiar with the information contained in The IBM 3705 Communications Controller Emulation Program Generation and Utilities, Guide and Reference Manual, GC30-3002. A related publication is the IBM 3705 Communications Controller Principles of Operation, GC30-3004.  
Manual, 30 pages  
//30/3705,3704/

GC30-3006

STORAGE ESTIMATES & PERFORMANCE PLANNING FOR 3704 & 3705 NCP

This publication is a guide to determining the storage requirements of the network control program, versions 1, 2, and 5 (NCP 1, NCP 2, and NCP 5). It is also a guide to help in the planning for the NCP's performance. (The network control program is a control program for the IBM 3704 and 3705 Communications Controllers. It is generated by the user from a library of IBM supplied modules). The manual is directed to systems analysts, systems programmers, IBM systems engineers, and IBM salesmen who are planning for NCP storage estimates and performance. The manual's user should be thoroughly familiar with the generation and utilities manual appropriate for his version of NCP, as follows:

GC30

NCP 1 - GC30-3000  
NCP 2 - GC30-3007  
NCP 5 - GC30-3008

GC30-3020

TELEPROCESSING PREINSTALLATION GUIDE FOR IBM 3704 AND 3705 COMMUNICATIONS CONTROLLERS

Teleprocessing Preinstallation Guide for IBM 3704 and 3705 Communications Controllers GC30-3020)

This publication lists the equipment characteristics of the teleprocessing network and communications controller that the user must specify when coding an emulation program or network control program. The publication consists of a series of tables, one for each type of station supported by the program and one for each type of line set with which the controller can be equipped. Each table gives the appropriate values to code for the station or line set represented. For some characteristics several values are listed, the appropriate choice depending on how the user's station is equipped (for instance, which transmission code it employs) or in which of alternate modes he wishes the station or line to operate. In these cases, accompanying notes suggest where the user may learn the values appropriate for his installation.

A companion publication, Teleprocessing Installation Record for IBM 3704 and 3705 Communications Controllers (GC30-3021), is useful for recording the equipment characteristics of a particular teleprocessing installation as a guide for coding programs for the communications controller.  
Manual, 128 pages

GC30-3021

TELEPROCESSING INSTALLATION RECORD FOR IBM 3704 AND 3705 COMMUNICATIONS CONTROLLERS

This publication provides the user with a convenient means for recording the details of his 3704 or 3705 based teleprocessing configuration existing or planned that he must know before coding an emulation program or network control program. As furnished, the publication consists of a series of formatted charts, each of which as appropriately labelled spaces representing the information items pertinent to a particular type of communication line (such as a multipoint line) and the stations associated with that line. A chart is also provided for recording the hardware units installed in the communications controller, along with related information such as line interface and subchannel addresses used.

From the package of charts provided the user selects the number and types appropriate to his teleprocessing configuration. Upon filling in the information indicated and assembling the charts into a binder, he has a convenient record of his configuration that gives much of the information needed to code a program appropriate to his installation. (The charts also contain spaces for related information not needed in coding the program; for example, common-carrier circuit numbers.)

A companion publication, Teleprocessing Preinstallation Guide for IBM 3704 and 3705 Communications Controllers (GC30-3020), provides guidance in selecting many of the parameters to be documented in the installation record. Manual, 20 pages

## GC30-3024

IBM 3650 SUBSYSTEM PROGRAM PREPARATION SUPPORT - APPLICATION PROGRAMMER'S GUIDE, SCP 5747-BJ2 & 5744-BQ2

This manual is for systems analysts and application programmers who use Subsystem Program Preparation Support (SPPS) to design and code user unique applications for the IBM 3650 Retail Store System. Subsystem Program Preparation Support consists of an assembler language subset and a group of macros for coding applications, and the Transformation Definition Language (a declarative language used for defining data transfer between the IBM 3651 Subsystem Controller and an IBM 3275 Information Display Station).

Detailed specifications for the macros, the Transformation Definition Language, and the translator for the Transformation Definition Language are provided for the application programmer.

Manual, 300 pages

## GC30-3028

3773, 3774, & 3775 PROGRAMMABLE COMMUNICATION TERMINALS PROGRAMMER'S GUIDE

This manual contains programming information about the IBM 3773, 3774, and 3775 Programmable Communication Terminals. It is directed to the application programmer who codes the 3770 programs, and to the system programmer who generates the system and installs the 3770 programming capability.

Some of the descriptions in the manual are:

- o Programming characteristics of the terminal.
- o Functions that can be performed by the 3770 programs.
- o How to code the 3770 programs, including a list of all the programming statements.
- o How to code the supervisor (job control) programs.
- o Host services that are necessary to assemble, validate, test, and prepare the program for inclusion into the 3770 program library.

The programmer using this manual should have a thorough understanding of the operating system, access method, and teleprocessing system to which the 3770 is attached.

A prerequisite publication for this manual is IBM 3770 Communication System, System Components, GA27-3097.

Manual, 450 pages

## GC30-3033

INTRODUCTION TO ADVANCED COMMUNICATIONS FUNCTION

Provides an introductory description of the types of data communication network configurations that are supported by the three principal programming components of Advanced Communications Function: ACF/VTAM (Advanced Communications Function for Virtual Telecommunications Access Method), ACF/TCAM (Advanced Communications Function for Telecommunications Access Method), and ACF/NCP/VS (Advanced Communications Function for Network Control Program/Virtual

Storage). This publication (1) explains the concepts of single-domain networks, and networking; (2) summarizes the capabilities and functions of Release 2 of ACF/VTAM, Version 2 Release 2 of ACF/TCAM, and Release 2 of ACF/NCP/VS; (3) explains the further capabilities and functions provided by Release 3 of ACF/VTAM, Version 2 Release 3 of ACF/TCAM, and Release 3 of ACF/NCP/VS; (4) lists the communication systems and stations supported by the program products listed in (3); (5) contains some preinstallation planning considerations for users intending to install or upgrade a network based on the IBM Systems Network Architecture (SNA); and (6) contains a glossary of terms and abbreviations used in describing SNA-based networks.

## GC30-3035

3650 RETAIL STORE SYSTEM PROGRAMMER'S GUIDE REL 3.0 AND 3.1

This publication is a guide for the programmer of the IBM 3650 Retail Store System. It supports both Release 3.0 and 3.1 of the IBM 3650 Retail Store System. It describes the retail environment and the communication network to the host IBM System/370 virtual storage computer.

It is written primarily for the system programmer responsible for the complete host and store system, as well as for the IBM system engineer and field engineering programming support representative who may assist in its installation and maintenance. Also, the store training staff may find it helpful in understanding more about the retail store system functions. The major areas of this manual includes a review of the sales, administrative, and ticketing functions of the retail store system, how the user may add his own programming at the store controller to create a set of functions uniquely fitted to his store environment, and how to recognize and diagnose errors in the system.

This manual tells how to use the programming support available to the retail store system. It emphasizes ways of installing, operating, and maintaining the whole system. It suggests means by which the programmer can coordinate the operation of the system through subsystem definition, user programming, operating procedures, and error diagnosis. As a guide, it is not complete in itself but organizes this information and leads the user to other reference sources available in the retail store system library and IBM System/370 publications.

## GC30-3036

OS/VS TCAM (LEVEL 10) APPLICATION PROGRAMMER'S GUIDE SUIDS 5741-602, 5752-836, ICR 5742

This manual describes how to write application programs for the TCAM environment. The TCAM application programming environment is described in detail, and all the OS/VS and TCAM MCP requirements are discussed. All of the TCAM application Program macros are presented, and the rationale for each macro is discussed.

This manual is both a tutorial and a reference guide. It is organized from general to specific. This is so the new programmer can begin at Chapter 1, and progress through the book as his knowledge of TCAM increases. The programmer who is experienced with TCAM can use the manual as a reference guide by turning directly to the area that he is interested in.

The user of this manual should be an application programmer, and must be able to code programs in either Assembler language, COBOL, or PL/I. The TCAM system programmer may also occasionally want to refer to this manual.

Manual, 8 1/2 x 11 inches, 160 pgs, 2/77  
/C/30//5742,5741-602,5752

GC30-3037

OPERATOR'S LIBRARY: OS/VS TCAM (LEVEL 10), SUID 5741-602, 5752-836, ICR 5742

This manual is primarily a reference guide. It describes how a TCAM telecommunication network can be controlled through TCAM operator control commands. Since this manual will be used in a telecommunication environment, a typical telecommunication network is described and discussed. Next, the format and syntax of the TCAM operator control commands is discussed and described. Immediately preceding the detailed discussion of what each command does, a discussion on how to issue the commands is given.

One chapter is a quick reference guide on how to code each command. This chapter may be removed from the manual for use at the terminal that has been designated as the operator control terminal. The last chapter is a list of all the operator awareness messages that may be returned as a result of issuing an operator control command.

The user of this manual should be familiar with the concept of operator control through a keyboard device. The TCAM system programmer may have need to refer to this manual occasionally, and if you plan to write a programmed operator (that is, a TCAM application program that is designed to control your network by issuing operator control commands), you should use this manual in conjunction with the TCAM Application Programmer's Guide GC30-3036. OS/VS TCAM INSTALLATION AND MIGRATION GUIDE LEVEL 10 SELECTABLE UNIT (SU) IDENTIFIERS; 5741-602 (OS/VS1 SU ID) 5742-UY99915 (OS/SVS ICR); 5752-836 (OS/MVS SU ID)

This publication will help shorten the time required to install a TCAM10 system or to migrate from an existing TCAM system to TCAM10. This manual provides sample message control programs (MCPs) and a network control program (NCP) for three system configurations: TCAM only, TSO only, and TCAM mixed operation. These samples are to be used as adjunct information to that contained in TCAM System Programmer's Guide GC30-2051 and the TCAM Macro Reference Guide GC30-2052. Both of these manuals as well as the TCAM 10 Program Directory document should be at hand as this guide is read. This manual points to detailed information in the other publications.

This manual is intended for system programmers and those responsible for installing TCAM10.

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM CONCEPTS AND PLANNING

This publication provides an overview of Advanced Communications Function for the Telecommunications Access Method (ACF/TCAM). The ACF/TCAM program product supports IBM's systems network architecture (SNA) and operates with OS/VS1, Multiple Virtual Storage (MVS), and Single Virtual Storage (SVS). All information in this manual pertaining to multiple-domain configurations and cross-domain operations applies to ACF/TCAM systems with the Multisystem Networking Facility. The manual is directed primarily to data processing managers and the system programmers who will design, install, or maintain a data communication system that uses ACF/TCAM. The application programmer can also use the manual to understand the context in which ACF/TCAM application programs execute.

Manual, 8 1/2 x 11 inches, 92 pgs, 12/77 /C/30//5735-RC1

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM VERSION 2, LIC PROG 5735-RC3, GENERAL INFORMATION: INTRODUCTION

This publication provides an overview of ACF/TCAM, Version 2, summarizes the capabilities of Releases 1, 2, 3, and 4, of ACF/TCAM Version 2, and provides some migration and planning considerations, including devices and subsystems supported by ACF/TCAM, Version 2.

The manual is directed primarily to data processing managers, their technical staff, and others who want information that will enable them to evaluate the benefits of Version 2 of ACF/TCAM.

Manual, 8 1/2 x 11 inches, 76 pages, 10/81 /C/30//5735-RC3

GC30-3058

ACF/NCP/VS NETWORK CONTROL PROGRAM SYSTEM SUPPORT PROGRAMS, 5735-XX1, -XX3, 5747-CH1, GENERAL INFORMATION (CURRENT RELEASE)

Provides a general introduction to the role of ACF/NCP/VS (Advanced Communications Function for Network Control Program/VS) in a data communication network and explains the purposes and advantages of Release 2 of ACF/NCP/VS.

ACF/NCP/VS is a licensed program product that is executed in an IBM 3705 Communications Controller. The program performs many functions relating to transmission of data over communication lines, including routing of message traffic through the network; activating, deactivating, and monitoring resources in the network (such as lines and stations); performing error recovery actions; translating message data from processing code to transmission code, and vice versa; and establishing operating parameters such as timeouts.

Each user of ACF/NCP/VS defines the configuration and operational requirements of his network in program generation statements, then generates the ACF/NCP/VS from a library of IBM-supplied modules. The user then loads the generated program into the communications controller that is to execute the program.

Release 2 of ACF/NCP/VS provides capabilities beyond those available in Release 1 that can assist the user in optimizing the management, control, and flexibility of the

network.

This publication is directed to data processing managers and data communication network designers intending to install or upgrade an ACF/NCP/VS-based network or to consolidate existing networks.

Prerequisite to use of this publication is a general knowledge of data communication.

Manual, 8 1/2 x 11 inches, 96 pages, 10/78

3770 REMOTE JOB ENTRY (RJE) SYSTEM NETWORK ARCHITECTURE (SNA) INSTALLATION GUIDE

Provides a general description (1) the Network Control Program (NCP) macros, (2) the Remote Job Entry (RJE) parameters, and (3) the System Network Architecture (SNA) commands required to generate the programs used when the 3770 Data Communication System is installed. The IBM 3770 Data Communication System consists of multipurpose keyboard/printer terminals (fixed-function or programmable) and attachable I/O devices.

This publication emphasizes the NCP macros, RJE parameters, and SNA commands that affect the installation and performance of the 3776 and 3777 Communication Terminals. The publication is written for system programmers, IBM system engineers, and IBM customer engineers who have a thorough understanding of the SNA environment in which the 3770 Data Communication System operates.

The purpose of this publication is to assist the reader in installing the 3770 Data Communication System and one of the RJE subsystems in an SNA environment. The RJE parameters described are for the Remote Entry Services subsystem, the Job Entry subsystem, and the POWER subsystem. The information provided is intended to supplement, not replace, the existing documentation for each subsystem and program described. The publication also contains a sample MVS/JES2 system generation.

3705-80 COMMUNICATIONS CONTROLLER PRINCIPLES OF OPERATION

This publication is the machine reference manual for the IBM 3705-80 Communications Controller. It provides a direct comprehensive description of the controllers' functional components; the arithmetic, logical, branching, status switching, and input/output operations; and the priority interrupt scheme.

It is intended to provide any 3705-80 user with the knowledge of the controller hardware requirements needed to write or modify a 3705-80 control program. The reader is assumed to have a basic knowledge of data processing and data communication systems and to have read Introduction to the IBM 3705-80 Communications Controller, GA27-3304, which provides a brief description of the controller and its available features.

X.25 NCP PACKET SWITCHING INTERFACE PROGRAM DESCRIPTION AND OPERATION

This publication provides the information necessary to define and generate the X.25 NCP Packet Switching Interface (X25NPSI) Release 1, which runs with the same operating systems as the prerequisite NCP on which it is installed, that is, DOS/VSE, OS/VSI, OS/VS2 (MVS), or MVSE.

X25NPSI is built on ACF/NCP/VS Version 1 Release 2.1 and, as such, operates with ACF/VTAM Version Releases 2 and 3 and with ACF/TCAM Version 2 Release 3 access methods. X25NPSI runs on both 3705-II and 3705-80

Communications Controllers. It is a Program Product that enables the users of ACF/NCP Program Products to attach 3705-II or 3705-80 Communications Controllers to data transmission services which support interfaces that comply with CCITT X.25 recommendations.

This publication is directed to system analysts and system programmers responsible for preparing an ACF/NCP/VS and X25NPSI system to be used in communication with a System/370 in which one or more of the following access methods are being executed: ACF/TCAM, ACF/VTAM, TCAM, and VTAM.

Prerequisite to use of this publication is a basic understanding of data communications and related access methods.

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM, LIC PROG 5735-RC1, SYSTEM PROGRAMMER'S GUIDE

This book is for users of the telecommunications access method (TCAM). It is a coding guide for the system programmer who must construct or modify a TCAM message control program (MCP) supporting IBM's Advanced Communications Function (ACF). It explains how to write an ACF/TCAM MCP using assembler language coding conventions and how to use a variety of auxiliary service facilities. This book contains information that might be of use in planning and setting up a data communication system incorporating ACF/TCAM and systems network architecture (SNA). The reader is expected to be familiar with ACF/TCAM Concepts and Planning (GC30-3049) and to have a basic understanding of SNA.

Manual, 8 1/2 x 11 inches, 224 pgs, 12/77  
////5735-RC1

SC30-3121

ADVANCED COMMUNICATION FUNCTION FOR TCAM, LIC PROG 5735-RC1,  
INSTALLATION AND MIGRATION GUIDE

This publication provides a general description of the concepts you should be familiar with to install or migrate to an ACF/TCAM system. Its purpose is to help reduce the time required to migrate to or install an ACF/TCAM controlled data communication network. More detailed information about the concepts and topics discussed in this Guide is provided in other publications in the ACF/TCAM library. The primary reference source, however, is the ACF/TCAM System Programmer's Guide.

This Guide is intended for systems programmers and IBM systems engineers who have a through knowledge of operating systems as well as experience in how to install a TCAM system. It is organized in four chapters and four appendixes as follows:

"Chapter 1. Introduction" summarizes the ACF/TCAM functions for single-domain and for multiple-domain networks. It also provides a general description of Systems Network Architecture and ACF/TCAM as well as the ACF/TCAM Multisystem Networking Facility. An understanding of the information contained in this chapter is required to construct a data communication network controlled by ACF/TCAM.

"Chapter 2. ACF/TCAM Installation Guidelines" describes the channel and device configurations of a sample multiple-domain network that utilizes the program examples described in Chapter 3.

"Chapter 3. Sample Program Descriptions" contains the descriptions of two message control programs, three network control programs and five application programs that are used in the sample multiple-domain network configuration described in Chapter 2. The source listings for these programs are in Appendix D.

"Chapter 4. Migration" contains a summary of ACF/TCAM migration considerations for single-domain and multiple-domain networks. This chapter also describes the changes required for current TCAM systems to migrate to an ACF/TCAM system.

"Appendix A. Macros Required to Define and ACF/TCAM Message Control Program" describes the new or modified macros used to define an ACF/TCAM message control program.

"Appendix B. Macro Changes for OS/VS TCAM and ACF/TCAM Releases" describes, in chart form, the TCAM macros and operands for TCAM release 5F through ACF/TCAM. This information may be used as a migration aid. It identifies the differences in the macros and their operands between one release of TCAM and another.

"Appendix C. Storage Estimates" describes the storage requirements for an ACF/TCAM message control program.

"Appendix D. Program Listings" contains the source listings for the sample message control programs, network control programs and the application programs used in the sample network configuration described in Chapter 2. The source listings represent executable examples of the program definition directions described in the ACF/TCAM library of manuals. These programs may be used as patterns when you code your message control program, or they can be installed with the appropriate modifications to make them match your

SC30-3123

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM,  
LIC PROG 5735-RC1, OPERATOR'S GUIDE

Program No. 5735-RC1 with base feature No. 9001 and networking feature No. 6008. This manual describes the ACF/TCAM operator control commands and how these commands are used to control and monitor ACF/TCAM networks. It is primarily a comprehensive reference for an experienced OS/VS system operator who has been designated as the ACF/TCAM operator. System programmers and application programmers may also occasionally use this manual.

This manual contains five chapters. Chapter 1 briefly reviews some telecommunications concepts pertaining to ACF/TCAM and then describes the physical and logical elements of both single- and multiple-domain ACF/TCAM networks. Chapter 2 describes how to format and enter operator commands and how to respond to ACF/TCAM reply messages to operator commands. Chapter 3 describes the operator commands, including an explanation of the function of the commands and their operands. Chapter 4 is a summary of the operator commands. Chapter 5 lists the message number and text for messages that the operator is likely to receive after entering one of the operator commands. Manual, 8 1/2 x 11 inches, 140 pgs, 12/77

SC30-3124

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM AND NCP (ACF/TCAM  
- NCP), LIC PROG 5735-RC1, -XX1, -XX3, BIBLIOGRAPHY AND  
MASTER INDEX

This publication is a centralized guide to information contained in the ACF/TCAM and ACF/NCP/VS libraries. It also introduces Data Processing Division (DP) publications and self-study courses that may be used to supplement the information found in the library manuals.

This bibliography and master index is intended for the use of anyone who will plan, install, program, operate, or debug a data communication system that uses ACF/TCAM and ACF/NCP/VS. It should be especially helpful to system programmers who must code (1) a TCAM message control program, message handler, or application program and/or (2) a network control program for the IBM 3705 Communications Controller.

Manual, 8 1/2 x 11 inches, 132 pages, 3/78  
////5735-RC1,5735-XX1,5735-XX3

## GC30-3131

ACF/TCAM, VERSION 2 GENERAL INFORMATION: FUNCTIONAL DESCRIPTION

This publication provides an overview of Advanced Communications Function for the Telecommunications Access Method, (ACF/TCAM), Version 2, Release 1. The ACF/TCAM program product supports IBM's Systems Network Architecture (SNA) and operates with OS/VS1 and OS/VS2 MVS. All information in this manual pertaining to multiple-domain configurations and cross-domain operations applies to ACF/TCAM networks with the Multisystem Networking Facility (an optional feature). The manual describes ACF/TCAM's operation, in accordance with SNA, using an IBM 3705 Communications Controller loaded with either of the following IBM network control programs:

- NCP/VS, Version 5, can be used for single-domain networks only
- ACF/NCP/VS, Releases 1 and 2, can be used for both single and multiple domain networks.

The manual is directed primarily to data processing managers and system programmers who will design, install, or maintain a network that uses ACF/TCAM; application programmers can also use the manual to understand the context in which ACF/TCAM application programs execute. Manual, 8 1/2 x 11 inches, 90 pages, 5/79  
 ////5735-RC3

## SC30-3132

ACF/TCAM, VERSION 2 BASE INSTALLATION GUIDE, LIC PROG 5735-RC3

This book is for users of the telecommunications access method (TCAM). It is a reference guide for the system programmer who must construct or modify a TCAM message control program (MCP) supporting IBM's Advanced Communications Function (ACF), Version 2. It explains how to write an MCP for an ACF/TCAM base system using assembler language coding conventions and how to use a variety of auxiliary service facilities. This book contains information that might be of use in planning and setting up a data communication system incorporating ACF/TCAM, Version 2 and Systems Network Architecture (SNA). The reader is expected to be familiar with ACF/TCAM Functional Description (GC30-3131) and to have a basic understanding of SNA. Manual, 8 1/2 x 11 inches, 614 pages, 10/80  
 ////5735-RC3

## SC30-3133

ACF/TCAM RELEASE 1 VERSION 2, LIC PROG 5735-RC3, INSTALLATION REFERENCE

This publication is a reference publication that contains detailed information on the macro instructions used with the Advanced Communications Function for the Telecommunications Access Method (ACF/TCAM) with direct network control program/virtual storage (NCP/VS) support. This program product supports IBM's Systems Network Architecture (SNA) and operates with OS/VS1 and OS/VS2 Multiple Virtual Storage (MVS).

This manual is for a system programmer who is thoroughly familiar with the ACF/TCAM Installation Guide and is ready to code an MCP. It is essential that the user refer to the ACF/TCAM Installation Guide for a functional explanation of ACF/TCAM; this book is not tutorial and contains only a deleted explanation of the macros with specific operand-coding considerations.

Manual, 8 1/2 x 11 inches, 840 pages, 10/79  
 ////5735-RC3

## SC30-3134

ACF/TCAM, VERSION 2 INSTALLATION: SAMPLE PROGRAMS, LIC PROG 5735-RC3 RELEASE 1

Describes the ACF/TCAM sample programs (including MCPs, NCPs, and applications) and model MCPs. It is intended to reduce the time required for a system programmer to design and install ACF/TCAM.

Prerequisite publications are ACF/TCAM, Version 2 Functional Description, SC30-3131-0 and ACF/TCAM, Version 2 Installation Guide, SC30-3132-0.

Manual, 8 1/2 x 11 inches, 528 pages, 9/79

## SC30-3135

ACF/TCAM VERSION 2, LIC PROG 5735-RC3 ASSET ASSIGNMENTS 9001 AND 6003, MVS 5752 TC221, VS1 5741 TC221, APPLICATION PROGRAMMING

This manual is intended for the application programmer whose programs communicate with channel-attached or link-attached stations, or application programs via ACF/TCAM. The ACF/TCAM Application Programming manual provides the information needed by an application programmer to ensure that his application program interfaces with ACF/TCAM. The ACF/TCAM MCP programming information in this manual is introductory and the information allows the application programmer to fully understand the interface between an ACF/TCAM MCP and an ACF/TCAM application program.

## SC30-3136

ACF/TCAM VERSION 2 OPERATION ASSET ASSIGNMENT 9001 AND 6003 MVS 5752-TC221 VS1 5741-TC221

This publication describes the ACF/TCAM operator commands and details their use in controlling and monitoring an ACF/TCAM network. It is primarily a comprehensive reference for an experienced OS/VS system operator who has been designated as an ACF/TCAM operator. System programmers and application programmers may also need to refer to it occasionally. And, although this is essentially a reference publication, its organization, from general to specific, enables the reader to use it tutorially.

Prerequisite Publication: ACF/TCAM, Version 2 General Information: Functional Description, GC30-3131. Manual, 8 1/2 x 11 inches, 265 pages  
 ////5735-RC3

## SC30-3137

ACF/TCAM, VERSION 2: DIAGNOSIS, LIC PROG 5735-RC3

This manual can be used three ways: as a source of hints for originally coding the ACF/TCAM message control program (MCP) in a manner that facilitates the detection, handling, and diagnosis of error conditions that occur while ACF/TCAM is running; as an aid in diagnosing certain problems that occur due to incorrect coding of MCP macros; and as a guide to the selection and running of ACF/TCAM diagnostic aids that facilitate troubleshooting and debugging in an ACF/TCAM that is experiencing trouble.

Manual, 8 1/2 x 11 inches, 315 pages, 5/79  
 ////5735-RC3

## SC30-3138

ACF/TCAM VERSION 2, SERVICE FACILITIES, SYSTEM SERVICE PROGRAMS AND UTILITIES ACF/TCAM 5735-RC3; VS1 5741-TC221; MVS 5752-TC221

This publication describes the ACF/TCAM service facilities, system service programs, and utilities, all of which are auxiliary routines designed to help the message control program (MCP) in directing message traffic through the network.

ACF/TCAM service facilities include checkpoint/restart, dynamic accounting, security and authorization, message logging, and startup/restart message generation. Among the ACF/TCAM system service programs are basic and extended operator control, online retrieval, save/restore message queues, internodal awareness, and internodal sequence number synchronization. ACF/TCAM utilities include the message queue data set preformatting utility (IEDQXA), COMEDIT print utility (IEDQXB), message queue data set dump utility (IEDQXC).

This publication includes explanations of these facilities and examples of procedures and techniques. It should be used as a reference for the system programmer responsible for the planning and coordination of a network with ACF/TCAM.

Manual, 8 1/2 x 11 inches, 150 pages, 4/79  
 ////5735-RC3

## SC30-3140

ACF/TCAM, VERSION 2 MESSAGES, LIC PROG 5735-RC3

This publication guides recipients of DKJ and IED system messages in establishing, maintaining, controlling and responding to an ACF/TCAM network. It is part of the OS/VS Message Library and contains:

- The DKJ and IED system messages applicable to ACF/TCAM
- Problem determination (Appendix A)
- Routing and descriptor codes (Appendix B)

This publication is intended for use by ACF/TCAM operators and programmers. The messages are listed in alphanumeric order, and each listing includes an explanation of the message as well as a statement of any resultant system action and any necessary programmer response and operator response. Users of ACF/TCAM may replace the corresponding section of their system messages book with these pages.

Manual, 8 1/2 x 11 inches, 270 pages, 5/79  
 ////5735-RC3

## SC30-3142

ACF/NCP/VS SSP, 5735-XX1, -XX3, RELEASE 2.1 INSTALLATION

This publication provides the information necessary to define and generate an Advanced Communications Function for Network Control Program/VS (ACF/NCP/VS) for the IBM 3705-I and 3705-II Communications controllers.

The publication is directed to system analysts and system programmers responsible for preparing an ACF/NCP/VS to be used in communicating with an IBM System/370 in which one or more of the following access methods are being executed: ACF/TCAM, ACF/VTAM, TCAM, and VTAM. Also in this publication is information on the partitioned emulation programming (PEP) extension to ACF/NCP/VS, which permits the 3705 to emulate the operation of an IBM 2701, 1702, 9r 2703 transmission control unit for specified communication lines. Stations on these lines communicate in emulation mode with application programs in the System/370 via BTAM, QTAM, TCAM, or equivalent access methods that can be used with the transmission control units mentioned. Prerequisite Publications: ACF/NCP/VS General Information manual (GC30-3058).

Manual, 8 1/2 x 11 inches, 474 pages, 5/79  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

## SC30-3143

ACF/NCP/VS SSP, 5735-XX1, -XX3, RELEASE 2.1 UTILITIES

This publication provides the information necessary to use the Advanced Communications Function Trace Analysis Program (called ACF/TAP), the OS/VS loader and dump utilities, and the DOS/VS loader and dump utilities. The Advanced Communications Function Trace Analysis Program (ACF/TAP) is an IBM service and that increases the usefulness of trace data by providing:

- A common trace analysis facility for ACF/VTAM, ACF/TCAM, and ACF/NCP trace data.
- Output reports that show SNA and SDLC network trace data in formats that are easy to read and understand.

The independent loader utility program is for use when you wish to load a local network control program into a communications controller before assigning the controller to the access method. An OS/VS and a DOS/VS version of the independent loader program are available.

The independent dump utility programs (OS/VS and DOS/VS) are used to dump the storage contents of a 3705 communications controller. The dynamic dump utility programs (OS/VS and DOS/VS) are used in emulation mode only to obtain dynamic dumps of storage or of the emulation trace table and to start the emulation mode line trace function.

This manual is for IBM customer engineers, program support representatives who use ACF/TAP and the loader and dump utilities to provide hardware and program maintenance for customer data communication networks.

A general knowledge of traces, SNA (SDLC and networking), VTAM or TCAM access methods, and communications controllers is a prerequisite for using ACF/TAP, the loader utilities, and the dump utilities. This publication has no prerequisite publications.

Manual, 8 1/2 x 11 inches, 162 pages, 5/79  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

## SC30-3145

ACF/NCP/VS & SSP LIC PROG 5735-XX1, -XX3, MESSAGES (CURRENT RELEASE)

The ACF/NCP/VS Network Control Program and Support Programs Messages publication is a reference book for messages issued by the following system support programs associated with Version 1, Release 2 of ACF/NCP/VS:

- The Advance Communications Function/Trace Analysis Program (ACF/TAP)
- The Independent Loader Utility, provided as an NCP system service program, under OS/VS
- The Dynamic Dump Utility, provided as an NCP system service program, under OS/VS (emulation mode only)
- The 3705 Communications Controller Assembler program (messages issued during stage 1 of NCP generation)
- The Independent Loader Utility, provided as an NCP system service program, under DOS/VS
- The Dynamic Dump Utility, provided as an NCP system service program, under DOS/VS
- The Independent Dump Utility, provided as an NCP system service program, under OS/VS and DOS/VS

This publication is provided for persons who operate, maintain, or generate an Advanced Communication Function Network control program.

## SC30-3152

ACF/TCAM, VERSION 2 SUPPORT FOR IBM SUBSYSTEMS 5735-RC3;ASSET ASSIGNMENT NUMBERS 9007 and 6003 MVS 5752 TC221

Provides an overall view of the subsystems interface, describes how to code an MCP to operate with the subsystems

SC30

interface, and describes how to operate a subsystem with ACF/TCAM. This book tells system programmers for IBM subsystems exactly what they must do in order to implement the ACF/TCAM subsystem interface.

IBM subsystems such as CICS, IMS/VS, and JES may use the ACF/TCAM subsystems interface as the single access method for their networks. This book describes the job control language, the coding in the MCP, how to initiate and terminate a session with a subsystem, the flow of messages to a subsystem, the basic operator control commands that are used, and the messages and codes that are obtained when running with the subsystems interface.

ADVANCED COMMUNICATIONS FUNCTION NETWORK CONTROL PROGRAM/VS DIAGNOSIS GUIDE (CURRENT RELEASE)

This manual contains information designed to help customer diagnosticians and IBM Program Service Representatives (PSRs) isolate and define problems in the Advanced Communications Function/Network Control Program for Virtual Storage systems (ACF/NCP/VS) Release 3. Its primary purpose is to help the reader interact with Level 1 of the IBM Support Center to get a fix for his problem. Procedures in the manual tell how to assure that the problem is with ACF/NCP/VS, how to use relevant information to describe the

SC30

problem, how to gather appropriate documentation about the problem, and how to report the problem to the IBM Support Center.

Prerequisite publications include the ACF/NCP/VS General Information manual, (GC30-3058); and the ACF/NCP/VS Installation manual, (SC30-3154). Control Panel manual, (GA27-3087).

Manual, 8 1/2 x 11 inches, 120 pages, 05/81

ADVANCED COMMUNICATIONS FUNCTION FOR TCAM AND NETWORK CONTROL PROGRAM BIBLIOGRAPHY AND MASTER INDEX

This publication is a centralized guide to information in the publication libraries of ACF/TCAM, Version 2, Release 3; ACF/NCP, Release 3; and SNA. It is intended for use by anyone who will plan, install, program, operate, or debug a data communication system that uses ACF/TCAM and ACF/NCP.

This publication consists of two chapters - a bibliography and a master index. The bibliography contains a library chart that classifies each publication into one of the following categories: general information, installation, application programming, operation, messages, and diagnosis. The bibliography also contains an abstract summarizing the general contents of each publication shown in the library chart. The master index consolidates the indexes of the publications in the ACF/TCAM, ACF/NCP, and SNA libraries.

This specification sheet describes warranted specifications of the 3705 Extended Features PRPQ which provides additional functions to the 3705 Emulation Program. These additional functions give the 3705 II user new capabilities which make his total teleprocessing system more flexible. These additional functions are:

- Multiple Host support (Maximum of 4 Type 4 channel adapters)
- Operator Console support
- Statistics Gathering
- System/CPU Select for Some START/STOP Terminals
- Automatic Speed Selection
- Code Conversion

The Extended features are totally compatible with the Multiple Subchannel Line Access (MSLA) facility in EP V3M0. The MSLA feature may be used in a multiple host environment to provide line recovery operations in the event of a host malfunction. Should one host processor go down, all or some of its teleprocessing load may be transferred to a second host processor. Communication over the same lines resumes via the MSLA paths.

3890 DOCUMENT PROCESSOR MODELS E AND F MACHINE AND PROGRAMMING DESCRIPTION

This publication provides application and system programmers with the necessary information to code the macro instructions and serves as a source of reference to those persons doing systems analysis and performing machine maintenance. The reader is assumed to have an understanding of bank data processing.

This publication contains descriptions of machine capabilities, storage assignments, record formats, operating principles and controls, and explanations of the channel attachment, item numbering, endorsing, and microfilming. It also contains descriptions and definitions for the data management and device-dependent macro instructions available in assembler language.

Manual, 8 1/2 x 11 inches, 160 pages, 09/82  
//04/3890/

LC31-1500

LOOP ADAPTER CICS/VS EXTENSIONS FOR 3640 TERMINALS PRPQ X99909

The PRPQ Loop Adapter CICS/VS Extension for IBM 3640 terminals is a series of programs and exit routines that enhance the support of the IBM 3641, 3642, 3644, 3646, and 3647 terminals when they are attached to the IBM 4331 Processor by the Loop Adapter feature.

The functions provided by the PRPQ Loop Adapter CICS/VS Extension are not applicable to the IBM 3643 and 3645 terminals, therefore, the CICS/VS support for these terminals is not enhanced by this PRPQ. Four functions are addressed by the PRPQ Loop Adapter CICS/VS Extension for the IBM 3640 terminals: terminal initialization, transaction selection, terminal reinitialization, and 3642 Check handling.

4730 PERSONAL BANKING MACHINE OPERATOR'S GUIDE FOR FRONT-SERVICED MODELS

The key operators of a 4730 use the Operator's Guide to do the tasks that are done every day, such as opening and closing the 4730 and loading document and coin cartridges. Because the inside of the 4730 looks different from each service position, there are two operator's guides: one for the front-serviced 4730 and one for the rear-serviced 4730. The rear-serviced 4730 is discussed in another operator's guide, the 4730 Personal Banking Machine Operator's Guide for Rear-Serviced Models, GC31-2520.

OS PL/I, 5734-PL1, OPTIMIZING COMPILER GENERAL INFORMATION (CURRENT RELEASE)

This manual introduces and describes the compiler and the associated resident and transient libraries. The information is provided for use as a planning aid only, and is intended to assist both existing and prospective users of PL/I. Topics covered in the manual include:

- o Design philosophy and performance of the compiler
- o Optimization facilities provided
- o Comparison with the PL/I (F) Compiler
- o Machine and system requirements of the compiler
- o Summary of the PL/I language implemented
- o Bibliography of related publications

The reader is assumed to be familiar with PL/I and with the Operating System.

Program product manual, 44 pages  
////5734-PL3,5734-PL1

## SC33-0006

OS PL/I, 5734-PL1, -LM4, -LM5, OPTIMIZING COMPILER  
PROGRAMMER'S GUIDE (CURRENT RELEASE)

This publication is a companion volume to OS and DOS PL/I Language Reference Manual, 6C26-3977 and OS PL/I Optimizing Compiler: TSO User's Guide, SC33-0029. The three manuals form a guide to the writing and execution of PL/I programs using the optimizing compiler and the associated resident and transient libraries in the batch and time-sharing environments of the Operating System.

The programmer's guide is concerned with the relationship between a PL/I program, the optimizing compiler, and the operating system. It explains how to compile, link-edit, and execute a program in a batch environment, and it introduces job control language, the linkage editor, and the loader, data management, and other operating system features that may be required by a PL/I programmer.

Manual, 8 1/2 x 11 inches, 248 pages  
 ///5734-PL1,5734-LM5,5734-LM4,5734-PL3

## SC33-0007

OS PL/I CHECKOUT COMPILER, 5734-PL2, -LM5, PROGRAMMER'S  
GUIDE (CURRENT RELEASE)

This publication is a companion volume to OS and DOS PL/I Language Reference Manual, 6C26-3977, and the OS PL/I Checkout Compiler: TSO User's Guide, SC33-0033. The three manuals form a guide to the writing and execution of PL/I programs using the checkout compiler and the transient

library in the batch and time-sharing environments of the Operating System.

The programmer's guide is concerned with the relationship between a PL/I program, the checkout compiler, and the operating system. It explains how to use the checkout compiler to run a PL/I program in a batch environment, and introduces job control language, the linkage editor, the loader, data management and other operating system features that may be required by a PL/I programmer.

## SC33-0019

DOS PL/I OPTIMIZING COMPILER, 5736-PL1, -PL3, -LM4, -LM5,  
EXECUTION LOGIC (CURRENT RELEASE)

This publication describes the object module produced by the DOS PL/I Optimizing Compiler, and explains how the compiled code uses subroutines from the resident and transient libraries of the optimizing compiler.

The topics covered include program initialization, storage management, input/output, error handling, and interlanguage communication. The use of storage dumps for debugging is also explained.

The manual is intended primarily for programmers concerned with maintenance of the compiler and its libraries. It will also be useful for applications programmers who require an understanding of the processes of execution (for example, to link PL/I and Assembler-language routines).

OS PL/I OPTIMIZING COMPILER, 5734-PL1, -LM5 MESSAGES

This publication lists all the messages that may be issued by the OS PL/I Optimizing Compiler and the associated transient library during processing of a PL/I program. Both the long and short forms of each message are listed where applicable. The messages are in three groups:

- o Compile-time messages (generated by the compiler during compilation of a PL/I source program)
- o Execution-time messages (generated by the transient library during execution of the compiled program)
- o Prompter messages (generated by the compiler when it is used in a time-sharing environment)

Where appropriate, explanations of the messages and suggested programmer responses are included.

## SC33-0031

OS PL/I CHECKOUT COMPILER, LIC PROG 5734-PL2, -LM5, INSTALLATION

This publication is intended primarily for programmers responsible for installing the OS PL/I Checkout Compiler and the associated transient library. It is divided into three parts which give detailed information on Installation Procedures and Storage Estimates.

Manual, 72 pages  
 ////5734-PL2,5734-LM5

## SC33-0032

OS PL/I CHECKOUT COMPILER EXECUTION, 5734-PL2, -LM5, LOGIC

The PL/I Checkout Compiler operates in two distinct stages: translation and interpretation. During translation, the original PL/I source program is converted into an intermediate code. During interpretation, this code is interpreted to achieve the effect of object-time execution.

This manual describes those aspects of interpretation which are common to all PL/I programs processed in this way. The topics covered include program initialization; input/output; storage management; error handling; conversational processing; the use of storage dumps for debugging; and interlanguage communication.

The manual is intended primarily for programmers responsible for the maintenance of the compiler and its library. It will also be useful for application programmers who require an understanding of the process of execution.

Manual, 280 pages  
 ////5734-PL2,5734-LM5

## SC33-0033

OS PL/I CHECKOUT COMPILER, LIC PROG 5734-PL2, -LM5, TSO USER'S GUIDE

This book describes how to use the facilities of TSO to create a PL/I program, and to debug and execute it using the PL/I Checkout Compiler. The reader is assumed to be familiar with PL/I but not with TSO. The book contains the definitive descriptions of the PLIC command and its subcommands. It gives sufficient information for a PL/I programmer to start using TSO effectively without reference to any other publications.

Manual, 252 pages  
 ////5734-PL2,5734-LM5

## SC33-0034

OS PL/I CHECKOUT COMPILER: MESSAGES, 5734-PL2, -LM5

This publication is an essential source of reference for users of the PL/I checkout compiler in either the batch or TSO environment. It describes the components of the messages that can be produced by the compiler when processing a PL/I program. Then it lists each message and provides additional information in many cases.

The messages are divided into two groups; those that can be produced by the compiler during pre-processing, translation, and interpretation (in conjunction with the PL/I Transient Library), and those that can be produced by the PL/I Prompter when invoking the compiler in a TSO

SC33

SC33-0047

OS PL/I CHECKOUT COMPILER, 5734-PL2, -LM5, CMS USER'S GUIDE  
This book explains, for the users of the Conversational Monitor System (CMS), how to invoke the PL/I Checkout Compiler and use its conversational facilities. The reader is assumed to have a basic knowledge of PL/I and of CMS. The book provides enough information to allow the reader to enter, compile, debug, and execute a straightforward PL/I program under CMS, together with a full description and examples of how to use the interactive debugging facilities of the checkout compiler. It also contains reference data covering:  
o The special restrictions and conventions that apply to PL/I when it is compiled by the checkpoint compiler and executed under CMS.  
o The syntax of the PLIC and PLICR commands, subcommands, and options.  
o The restrictions and conventions that apply to PL/I statements used in immediate mode.

CICS/DOS/VS VERSION 1 RELEASE 7 RELEASE GUIDE (CURRENT RELEASE)

This book collects together, in one place, details of all the changes introduced by CICS/DOS/VS Version 1 Release 7. It is intended for existing CICS/DOS/VS users who have a working knowledge of Version 1 Release 6, and who plan to convert to the new release. Although the book is directed mainly towards data processing management, the changes to CICS are described in sufficient detail for application programmers and other users to learn about and assess the new release before it is installed.  
Manual, 8 1/2 x 11 inches, 228 pages, 10/86

GRAPHICS ACCESS METHOD/SYSTEM PRODUCT

This book introduces the Graphics Access Method/System Product (GAM/SP). It describes the functions of GAM/SP and explains how the product can be used with the 5080 Graphics System, the 3250 Graphics Display System and the 2250 Display Unit Model 3.

The book is intended for data processing managers, team leaders, and programmers who work in the field of graphics applications based on the 5080, 3250, or 2250 Model 3. It explains how the product can be used with the 5080 Graphics System, the 3250 Graphics Display System and the 2250 Display Unit Model 3.

The book is intended for data processing managers, team leaders, and programmers who work in the field of graphics applications based on the 5080, 3250, or 2250 Model 3.

1401/1440/1460 OS/VS EMULATOR ON SYSTEM/370 - REFERENCE (5744-AH1)

This manual describes the IBM 1401/1440/1460 Emulator Program for the IBM System/370 Models 135/145/155/155-II/158, and provides the information needed to use the program. The emulator program runs as a problem program under the OS/VS1 and OS/VS2 control programs and executes programs written for the IBM 1401, 1440, and 1460 Data Processing Systems (the Model 135 must be equipped with IBM Compatibility Feature #4457 or #4458; Model 145 with IBM Compatibility Feature #3950). In addition, this manual describes the 1401/1440/1460 programs to be executed on System/370 Models 135 through 168 under the control of OS/VS1 and OS/VS2, without the need for the compatibility feature (the functions of the compatibility feature are performed by simulator routines).

Also describes in this manual are three programs that are distributed with the emulator - the tape preprocessor program, the tape postprocessor program, the disk formatting program. These programs handle compatibility between 1401/1440/1460 data formats and System/370 data formats for tape and disk.

The manual contains information for system planners and programmers on how to plan, generate, use, and modify the emulator; for programmers on how to process 1401/1440/1460 data and execute the emulator; and for operators on how to communicate with the emulator. All messages issued by the emulator and the data manipulation programs are included as an appendix.

Programmers and planners should be familiar with the IBM 1401/1440/1460 Data Processing Systems and with the appropriate OS control program  
Manual, 156 pages

## GC33-2019

1410/7010 OS/VS EMULATOR ON SYSTEM/370, REFERENCE - PROG. NO. 5744-AG1

This manual describes the IBM 1410/7010 Emulator program for the IBM System/370 Models 145/155/155-II/158, and provides the information needed to use the program. The emulator program runs as a problem program under the OS/VS1 and OS/VS2 control programs and executes programs written for the IBM 1410 and 7010 Data Processing Systems (the Model 155 with IBM Compatibility Feature #3950).

Also described in this manual are three programs that are distributed with the Emulator - the tape preprocessor program, the tape postprocessor program, and the disk formatting program. These programs handle compatibility between 1410/7010 data formats and System/370 data formats for tape and disk.

The manual contains information for system planners and programmers on how to plan, generate, use, and modify the emulator; for programmers on how to process 1410/7010 data and execute the emulator, and for operators on how to communicate with the emulator. All messages issued by the emulator and the data manipulation programs are included as an appendix.

Programmers and planners should be familiar with the IBM 1410/7010 Data Processing Systems and with the appropriate OS control program.

DOS TO OS EMULATOR - REFERENCE PROGRAM NUMBER 360C-EU-738

The DOS Emulator Program executes under OS/MFT and OS/MVT. It enables DOS programs to execute in an OS environment. The emulator may be multiprogrammed with other OS jobs, and it can run the multiprogramming options of DOS.

This publication provides information for programmers and operators to help them code and run DOS jobs with the emulator. Emulator operation, requirements, facilities and messages are described, and sample jobstreams are provided.

It is assumed that readers of this publication are familiar with DOS and OS/MFT or OS/MVT. Note: DOS to OS Emulator-Reference, GC26-3777 is now obsolete.

NON-SNA INTERCONNECTION GENERAL INFORMATION

Non-SNA Interconnection is a program product that allows BSC RJE terminals, via BSC lines, and RJE subsystems, via emulation subchannels (ESC's), to access the SNA network as though they were SNA facilities. This publication describes the functions of the Non-SNA Interconnection program product. It provides customer executives, system administrators, system planners, and installation managers with a fundamental understanding of the Non-SNA Interconnection program, so that they can evaluate its capabilities and usability in their data processing network.

Manual, 8 1/2 x 11 inches, 72 pages, 03/87

GC33-4010

OS/VS, DOS/VSE AND VM/370 ASSEMBLER LANGUAGE (CURRENT RELEASE)

Provides the information necessary for programmers responsible for designing and writing programs in either the OS/VS or DOS/VS assembler language, and for programmers running their assembler program under VM/370.

The assembler language is a symbolic programming language which allows the use of alphabetic and numeric characters to represent machine instructions and related data. Using symbolic language instead of the binary 1s and 0s required when coding in machine language makes coding easier to write, understand, and change. The assembler can process a program written in assembler language to produce output in machine language suitable for link editing and subsequent execution.

The book is divided into four parts:

- Part I. Coding and Structure
- Part II. Function and Coding of Machine Instructions
- Part III. Functions of Assembler Instructions
- Part IV. The Macro Facility

The first part describes the statements, character set, terms, literals, and expressions that make up the assembler language, and give the rules and conventions for writing code. The second part describes the alignment, statement formats, mnemonic operations codes, and operand entries of machine instructions. The third part describes the assembler instructions used for program sectioning, addressing, symbol and data definition, and controlling the assembler. Finally, the fourth part gives an introduction to the macro facility for beginners, and then describes the macro definition, the macro instruction, and the conditional assembly language, a language that can alter the contents and sequence of the output produced by the assembler.  
Manual, 468 pages

SC33-4018

DOS SORT/MERGE, LIC PROG 5743-SM1, PROGRAMMER'S GUIDE

This manual enables a programmer to prepare input to perform a sort or merge using Program Product 5743-SM1, and to link to the program his own assembler-language routines to perform such tasks as summarizing, altering, inserting or deleting records. Specifically, it describes:

- o Program Organization
- o Environmental requirements
- o Label processing
- o Control statements
- o Program Modification
- o Linking to user routines

GC33-4020

S/360 DOS SORT/MERGE, LIC PROG 5743-SM1, GENERAL INFORMATION

This publication provides general information about the IBM System/360 Disk Operating System Sort/Merge Program Product. It describes:

- o Program Organization
- o Control Statement Formats
- o User Exit Facilities
- o Label Handling Requirements
- o Program Performance Characteristics

Program Product Manual, 20 pages

OS/VS, VM/370 ASSEMBLER PROGRAMMER'S GUIDE (CURRENT RELEASE)

This manual complements OS/VS - DOS/VS - VM/370 Assembler Language, Order No. 6C33-4010. It is intended for the programmer writing assembler language programs to be run under OS/VS and/or VM/370. The manual contains the following major sections:

- o Job control statements to run the assembler
- o Including macro definitions in a library
- o Interpreting the assembler listing
- o Programming considerations
- o Assembler language programming under CMS

Other topics, covered in appendixes, are assembler data set requirements, the object module produced by the assembler, invoking the assembler dynamically, and the assembler error messages. Prerequisite reading is Introduction to OS, VM/370: Introduction, and OS/VS DOS/VS - VM/370 Assembler Language.  
Manual, 168 pages

SC33-4023

DOS SORT/MERGE, LIC PROG 5743-SM1, INSTALLATION REFERENCE

This manual provides the information necessary to install and test program number 5743-SM1:

- a) Hardware requirements
- b) Installation procedures, including a list of the relocatable modules and an explanation of the use of the calling books
- c) Sample problems: how to use them, and what they do.

The user should have a good understanding of the Disk Operating System and of DOS and TOS assembler language.  
Manual, 52 pages  
////5743-SM1

GC33-4024

GUIDE TO THE DOS/VSE ASSEMBLER (CURRENT RELEASE)

This publication is intended for those users who maintain the macro and copy libraries. It explains in detail how the de-editor program (ESERV) works and how it can be used to de-edit and update macros simultaneously. Other sections explain the use of Job Control Language (JCL) statements associated with DOS/VS, how to interpret DOS/VS listings, object deck output, and data files. All assembler

and de-editor diagnostic messages are listed and explained. Typical users of this manual are programmers responsible for JCL and the maintenance of the DOS/VS system data files; and FEs and CEs or system programmers who want information on maintaining files and using the ESERV program.

The level of knowledge required for efficient use of this manual is an understanding of DOS/VS assembler language as described in OS/VS and DOS/VS Assembler Language, Order No. GC33-4010.  
Manual, 124 pages

GC33-5008

DOS VERSION 4 SYSTEM GENERATION

This reference publication describes the planning and the procedures necessary to generate and to maintain an installation-tailored IBM Disk Operating System (DOS) that provides support for IBM-supplied DOS programs you desire, as well as for your own programs. The major topics discussed are:

- o Planning the installation-tailored DOS supervisor
- o Planning the installation-tailored DOS operational pack(s)
- o Procedures for generating and for maintaining the DOS system
- o Sample problems for testing the IBM-supplied DOS programs

The information in this publication is of particular interest to anyone responsible for the planning and/or implementation of system generation and maintenance for DOS. This includes installation managers, system analysts, programmers, and machine operators. System Library Manual, 428 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GC33-5371

DOS/VSE SYSTEM MANAGEMENT GUIDE

This manual is a guide to the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE). The system in its entirety is discussed on a conceptual and functional level. System Management refers not only to the way DOS/VSE is organized, but also to the way the user can efficiently manage the system facilities at his disposal. This manual, therefore, does more than describe the functions and interaction of the system control and system service programs that constitute DOS/VSE. It also describes how the system planner, systems programmer, and applications programmer, or operator can use DOS/VSE to your best advantage. Manual, 8 1/2 x 11 inches, 276 pages, 2/79  
//34//5745-020

GC33-5372

DOS/VS DATA MANAGEMENT GUIDE

Provides conceptual and functional information about the data management facilities offered by DOS/VS. These facilities concern primary items such as record design, file organization, and file processing, as well as secondary items like file labeling, data security, data integrity, and symbolic device names.

The intended audience is a systems designer who has to decide on a certain type of file organization and a method of file maintenance for a given application, and an application programmer who needs general background information about the access methods he will use in his programs. Prerequisite publication: Introduction to DOS/VS, GC33-5370.

Manual, 300 pages  
//30//5746-XE2,5745-010

GC33-5373

DOS/VS SUPERVISOR AND I/O MACROS

This publication is for the programmer planning to use the DOS/VS Input/Output Control System macro instructions and supervisor macro instructions. These macro instructions can be combined with problem programs to produce generalized or specific file processing programs. The major subjects describe the macro types and their usage, label processing; the IOCS macros for the various access methods (SAM, DAM, ISAM, and VSAM); physical IOCS, supervisor, multitasking, program linkage, and other miscellaneous macros. Manual, 420 pages

Manual, 420 pages  
//30//5746-XE2,5745-010

GC33-5374

DOS/VSE TAPE LABELS

The types of labels that may be written on magnetic tape by DOS/VSE are defined and described in this reference manual. The processing performed by the system, and the described. The processing of standard, user-standard and specifications that the user must supply to the system, are nonstandard labels, and unlabelled files, is explained, primarily in regard to the functions performed for volume, header, and trailer labels when the user gives specifications directly to IOCS through DTF entries.

Illustrations of volume layouts depict the various arrangements of labels and data records that can be handled by the four programming systems. For a thorough understanding of this manual, the reader should have a basic knowledge of the Input/Output Control Systems (IOCS). The manuals providing this information are: DOS/VSE Data Management Guide, GC33-5372, and DOS/VSE Supervisor and I/O Macros, GC33-5373.  
Manual, 8 1/2 x 11 inches, 58 pages, 2/79  
//30//5745-020

GC33-5375

DOS/VSE DASD LABELS

The types of labels that may be written on magnetic disks by DOS/VSE are defined and described in this reference manual. The processing performed by the system, and the specifications that the user must supply to the system, are described. The processing of standard and user-standard labels is explained primarily for SAM, DAM, and diskette files.

Illustrations of volume layouts depict the various arrangements of labels and data records that can be handled by the programming systems.

This publication is divided into four major chapters: Introduction, Label Processing, Label Fields, and Glossary.  
Manual, 8 1/2 x 11 inches, 108 pages, 2/79  
//30//5745-020

GC33-5376

DOS/VSE SYSTEM CONTROL STATEMENTS

This manual is provided for those who need to know about the control statements that relate to the SCP (system control programming) and the VSE/Advanced Functions of DOS/VSE (Disk Operating System/Virtual Storage Extended). The manual consists of the following:

- The sections, Initial Program Load and Job Control, describe these general programs of DOS/VSE. These sections are of interest to anyone using the system, including system analysts, programmers, and operators. Detailed attention routine, job control statement, and job control command formats are given.
- The sections, Linkage Editor and Librarian, are of interest to persons responsible for maintaining the resident system. These sections fully describe the control statements for the linkage editor and librarian programs.
- The section, System Buffer Load (SYSBUFLD) Program, is of interest to DOS/VSE users who have an IBM 1403U, 3203, 5203, or PRT1 printer attached to their system. The section describes the purpose of SYSBUFLD and how to use it.

Manual, 248 pages, 2/79  
//36//5745-020

GC33-5377

DOS/VSE SYSTEM GENERATION

The manual provides information for installing the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE) and shows how to generate support for the various functions available with DOS/VSE.

Topics include step-by-step procedures for installing and tailoring the DOS/VSE system control programming (SCP), describe the supervisor generation macros, and, for planning purposes, give information on calculating the size of a supervisor, libraries, and disk storage requirements. The contents of the DOS/VSE SCP libraries is summarized as an aid for checking an installation-tailored system. The audience addressed are persons responsible for the installation, generation, and availability of an installation's operating system.

Use of the manual assumes the reader to be familiar with the following publications:

DOS/VSE System Management Guide, GC33-5371  
DOS/VSE System Control Statements, GC33-5376  
DOS/VSE Operating Procedures, GC33-5378  
DOS/VSE System Utilities, GC33-5381

Manual, 8 1/2 x 11 inches, 256 pages, 2/79  
//34//5745-020

GC33-5378

OPERATOR'S LIBRARY DOS/VSE OPERATING PROCEDURES

This manual contains the information required by system operators to run jobs under DOS/VSE. It is intended primarily for system operators who have acquired a basic knowledge of data processing and computer equipment. The introduction of the manual familiarizes the operator with the major concepts and components of DOS/VSE and provides the basis that is required to understand the subsequent sections of the manual. The section, Procedures, tells the operator how to run jobs under control of DOS/VSE; the procedures are illustrated by examples. The section, Reference Information contains details of all operator commands and job control statements. A glossary defines a number of terms frequently used in a DOS/VSE System Operator's environment.

Manual, 242 pages, 2/79  
//40//5745-020

GC33-5379

DOS/VSE MESSAGES

This publication lists and interprets the messages which DOS/VSE issues to the operator and to the programmer. It enables him to decide on the action they have to take in reply to the message received.

Each message is preceded by an identifying number so that it can easily be found in the book. This message of listing also ensures that messages issued by the same programmer are grouped together. Not included are:

- Any language messages, except assembler messages that cause job termination
- System/370
- Any Licensed Program Product messages, except VSE/Advanced Functions.
- OLTEP messages
- Subsystem Support Services messages
- System/370 Emulator messages

These messages can be removed from the application publications and inserted in this manual, if required. A tab is provided for these messages.

Manual, 8 1/2 x 11 inches, 532 pages, 2/79  
//40//5745-020

GC33-5380

DOS/VSE SERVICEABILITY AIDS & DEBUGGING PROCEDURES

The manual provides detailed guide and reference information, including procedures, for isolating the cause of system and program malfunctions by operators and programmers.

The manual recommends when and how to use the IBM supplied serviceability aids, which are programs designed to collect relevant information about malfunctions. It includes

examples of storage dump printouts that show how to locate important control blocks in such printouts.

The publication assumes that operators using it are familiar with DOS/VSE Operating Procedures, GC33-5378; programmers using it are familiar with the Principles of Operation manual applicable to their installation; the publication DOS/VSE Messages is always available for quick reference.

//37//5745-020

## GC33-5381

DOS/VSE SYSTEM UTILITIES

This reference publication describes to programmers the use of the IBM DOS/VSE System Utilities. The programs described are:

- Assign Alternate Block
- Assign Alternate Track
- Backup and Restore System
- Surface Analysis
- Clear Disk
- Format Emulated Extent
- Copy and Restore Diskette
- Copy File and Maintain Object Module (OBJMAINT)
- Printer Train Cleaning
- Fast Copy Disk
- Initialize Tape
- Initialize Disk
- Print Hardcopy File (PRINTLOG)
- VTDC Display

Supplementary information is provided for those system utilities that can run in stand-alone mode.

Manual, 8 1/2 x 11 inches, 160 pages, 2/79

DOS/VSE OLTEP (CURRENT RELEASE)

This reference publication describes the Disk Operating System (DOS) Online Test Executive Program (OLTEP) that controls online testing of I/O units under the DOS/VS supervisor. It explains the functions of the program and gives procedures for running the test programs which are obtained from the IBM Customer Engineer.

Supplementary information is contained in the following publications:

- DOS/VS Operating Procedures, GC33-5378
- DOS/VS System Generation, GC33-5377
- DOS/VS Tape Labels, GC33-5374
- DOS/VS DASD Labels, GC33-5375
- DOS/VS Messages, GC33-5379

## GC33-5384

1401/1440/1460 DOS/VS EMULATOR ON SYSTEM/370 REFERENCE PROG PROD 5747-CC3

This publication describes the 1401/1440/1460 Emulator Program for the IBM System/370 Models 115, 125, 135, 135-3, 138, 145, 145-3, 148, 155-II, and 158 The emulator program

is executed as a problem program under control of the Disk Operating System/Virtual Storage (DOS/VS) on an IBM System/370 equipped with the appropriate compatibility feature. Using the program and the compatibility feature, the System/370 can execute programs written for the IBM 1401, 1440, and 1460 Data Processing Systems.

The information in this publication is intended for installation personnel, programmers, and operators.

MODEL 20 DOS/VS EMULATOR ON SYSTEM/370 REFERENCE

This publication describes the program that emulates the System/360 Model 20 on the System/370 Models 115, 125, 135, 135-3, and 138. The emulator program is executed as a problem program under control of the Disk Operating System/Virtual Storage (DOS/VS) on an IBM System/370 equipped with the Compatibility Feature #7520. Using the program and the compatibility feature, the System/370 can execute programs written for the system/360 Model 20.

The information in this publication is intended for installation personnel, programmers, and operators.

DOS/VS POWER/VS WITH RJE, SNA GUIDE

This manual contains information for customers who intend to use the Remote Job Entry facilities of POWER/VS with RJE SNA for IBM 3770 Communication Terminal configurations using Synchronous Data Link Control (SDLC). Power/VS with RJE SNA can also be generated to include Remote Job Entry support for IBM 2770, 2780, 3741, and 3780 terminals, using the BSC method of communication, as well as for IBM 3770 terminals in 2770/3780 mode. Prerequisite reading material is formed by the following manuals:

- DOS/VS System Management Guide, GC33-5371
- DOS/VS System Control Statements, GC33-5376
- DOS/VS System Generation, GC33-5377
- DOS/VS Operating Procedures, GC33-5378
- DOS/VS Messages, GC33-5379

The guide provides information, additional to that contained in these publications.

///5746-R61

## SC33-6031

DOS/VS RPG II, LIC PROG 5746-R61, SYSTEM LIBRARY (CURRENT RELEASE)

The publication describes RPG II, a problem-oriented language, as implemented for compilation by the DOS/VS RPG II compiler. RPG II uses a set of specification forms on which the user specifies his input data, the calculations to be performed and the desired output. The DOS/VS RPG II compiler uses these specifications to generate a report program. In addition to a description of the language, the manual provides system related information needed to compile an RPG II program, to link-edit that program and to execute it. Debugging aids are also provided. To use this manual, the reader should be familiar with the concepts of the access methods available to users of DOS/VS as discussed in DOS/VS Data Management Guide, GC33-5372.

DOS/VS POWER/VS INSTALLATION GUIDE AND REFERENCE REL 34

This manual is designed as a reference source for all DOS/VS users interested in using POWER/VS, primarily in the local environment.

Chapter 1 is an introduction to POWER/VS.

Chapter 2 describes the storage requirements for POWER/VS and the macros, options, and procedures for the POWER/VS generation.

Chapter 3 lists the central operator commands, the JECL statements, and the AUTOSTART statements. It also discusses POWER/VS job accounting, output segmentation, and cross-partition communication.

Chapter 4 illustrates how to use POWER/VS: to start and to stop the system, and to start, control, and stop POWER/VS tasks.

The three appendixes discuss the data compaction support, the I/O specifications for the RJE, SNA support, and the LOGON BIND parameter requirements for VTAM.

DOS/VSE MAINTAIN SYSTEM HISTORY PROGRAM (MSHP) USER'S GUIDE

The manual gives an overall view of the scope and functions of the Maintain System History Program (MSHP) and the program's operating environment; it provides procedures for installing and servicing DOS/VSE and fully describes the MSHP control statements.

The audience addressed are persons responsible for installing and servicing DOS/VSE - for tasks such as installing program packages and making corrections to a system by means of PTFs and local fixes.

The program supports the installation and servicing of IBM program packages; it maintains a record of installation and system service activities in the system history file.

Familiarity with the concept of DOS/VSE as described in 'DOS/VSE System Management Guide', and with the system generation process as described in 'DOS/VSE System Generation' is required.

VIRTUAL STORAGE EXTENDED/INTERACTIVE COMPUTING AND CONTROL FACILITY, 5746-TS1, SPECIFICATIONS (CURRENT RELEASE)

This publication provides information on the warranted functions of the Virtual Storage Extended/Interactive Computing and Control Facility (VSE/ICCF) and describes the specified operating environment. The publication is intended for readers concerned with installation planning and administration.

VSE/ICCF is an online interactive computing facility that provides local and remote terminal users with conversational access to the computer resources of a DOS/VSE controlled central processor. It allows terminal users to enter, store in libraries, edit and retrieve data, and also to write, update, compile, test and debug programs with the results displayed back at the terminal or directed to a printer, or both. If VSE/POWER is available terminal users can also submit batch jobs for processing in DOS/VSE partitions. Terminal management for VSE/ICCF is handled either by the Terminal Transaction Facility (TTF) or by CICS/VS.

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, GENERAL INFORMATION (CURRENT RELEASE)

This manual describes the functions available when the licensed program VSE/Advanced Functions is installed. It is intended primarily for those who need to have an overview of VSE/Advanced Functions.

VSE/Advanced Functions is designed to operate with the DOS/VSE SCP, to which it provides a number of functional enhancement and performance improvements.  
Manual, 8 1/2 x 11 inches, 28 pages, 1/79  
//20//5746-XE8

SC33-6107

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8 SYSTEM INFORMATION (CURRENT RELEASE)

This manual provides information for installing the licensed support package VSE/Advanced Functions in the DOS/VSE environment and shows how to generate support for the various functions available with the package.

Topics discuss the interdependencies between this support package and the DOS/VSE SCP, and the prerequisites for the installation of this package and its use.

SC33

Procedures show how to install the package; the supervisor generation macros as relating to the package are presented in detail. For planning purposes, information is given on processor storage and library requirements.

The functions discussed include asynchronous operator communication, operation with up to seven partitions, the controlling of shared resources (such as files, libraries, and disk volumes), up to 15 extents for the page data set, and access control. Procedures shipped with the package allow the VSE/Advanced Functions supervisors to be initialized with a minimum of operator/system interaction.

The audience addressed are persons responsible for the installation, generation, and availability of an installation's operating system.

Use of the manual assumes the reader to be familiar with VSE/Advanced Functions General Information, GC33-6106; it should be used with the DOS/VSE publications: DOS/VSE System Generation, and DOS/VSE Maintain System History Program (MSHP) User's Guide.

VSE/OCCF SPECIFICATIONS (CURRENT RELEASE)

This publication provides information on the warranted functions of the Virtual Storage Extended/Operator Communication Control Facility (VSE/OCCF) and describes the warranted operating environment.

VSE/OCCF can be used in the single-system and distributed-data-processing environments to: suppress the display of messages, reply to messages automatically, route messages to a remote console, and translate messages, message replies, and commands to another language or end-user terms.

The program includes pre-defined control tables that provide specific selections of the above functions.

VSE/OCCF always requires VSE/Advanced Functions Release 3 or subsequent releases unless otherwise stated and, depending on the desired functions, requires the Network Communications Control Facility together with the applicable access method (ACF/VTAME, ACF/VTAM, or ACF/TCAM).

Flyer, 8 1/2 x 11 inches, 2 pages, 9/80  
///5746-XC5

SC33-6115

INSTALLATION GUIDE AND REFERENCE VSE/OCCF (CURRENT RELEASE)

The publication contains information on how to plan, install, support, and operate VSE/OCCF. It provides, for planning purposes, information on the VSE/OCCF functions, the requirements for operation, and the control tables; it lists restrictions that must be considered by the application programmer. Examples show how to define control tables by means of the VSE/OCCF macros; the macros are described in detail.

Operations at the system console and NCCF operator station are explained; the VSE/OCCF commands and VSE/OCCF messages are described.

The publication includes considerations for operation with the Network Communications Control Facility (NCCF).

Manual, 8 1/2 x 11 inches, 80 pages, 7/80

///5746-XC5

SC33-6119

VSE/INTERACTIVE COMPUTING AND CONTROL FACILITY LIC PROG  
5746-TS1 DIAGNOSIS GUIDE

The publication helps the user to identify whether a system problem has originated in the VSE/ICCF environment, and whether IBM supplied code is involved. It also describes the procedures that the user should follow in obtaining assistance from IBM if this is necessary. It explains how to submit the problem to an IBM support center to find out if the problem is already known, and whether a solution is available. If not, the publication describes how to submit the problem to IBM via an Authorized Program Analysis Report (APAR).

It is assumed that the reader is familiar with the operational concepts of a VSE system as discussed in VSE/Advanced Functions System Management Guide, SC33-6094. The publication must be used in conjunction with the VSE/Advanced Functions Diagnosis Guide, SC33-6112. Manual, 8 1/2 x 11 inches, 28 pages, 7/80

VSE/ICCF TERMINAL USER'S GUIDE (CURRENT RELEASE)

This publication provides the information needed by a terminal user to work with the VSE/Interactive Computing and Control Facility (VSE/ICCF). It introduces the main concepts of VSE/ICCF and describes the program's terminal user facilities in detail, including the format, parameters and functions of all VSE/ICCF system and editor commands, the job entry language, and the dump commands. It tells the terminal user how to write procedures and macros, outlines the utility programs, and describes the facilities that are needed to build job streams for execution in interactive partitions.

Users who are entirely new to VSE/ICCF are recommended to complete the VSE/ICCF Introduction to Interactive Programming, SC33-6202, first.

MESSAGES VSE/ICCF (CURRENT RELEASE)

This publication lists and explains the messages which the VSE/Interactive Computing and Control Facility (VSE/ICCF) issues to the operator or to the programmer and the return codes which are contained in some of the messages. It enables the operator or programmer to decide on the action that has to be taken in reply to the message received. Each message is preceded by an identifying number so that it can easily be found in the publication. Messages that are issued by the same program are grouped together.

INFORMATION DEVELOPMENT/VSE SPECIFICATIONS

Information Development/VSE (ID/VSE) is an application package which runs under either SSX/VSE or VSE/SP. It combines functions for convenient program development and queries of VSE/VSAM files. Data extracted through queries can be presented in graphical form and also be transferred to Intelligent Workstations.

The subject publication provides information on the warranted functions of the package and describes the specified operating environment.

SERIAL OEMI INTERFACE ACCESS METHOD USER'S GUIDE

This publication describes the Serial OEM Interface Access Method.  
The Serial Original Equipment Manufacturer Interface (SOEMI) provides a means of connecting a 4361 host system to an Original Equipment Manufacturer (OEM) subsystem, allowing the data to be exchanged between the host system and the subsystem.  
The application program executing in the host system communicates with the subsystem through the Serial OEM Interface (SOEMI) Access Method. This Access Method provides a set of modules and macro instructions that may either be executed in-line in Assembler programs or called as subroutines from programs written in Assembler or in a high-level language. This applies to both the VM and VSE environment.  
The purpose of this publication is to describe the SOEMI Access Method as seen from the application program, giving detailed information on how to use the Access Method macros.

GC34-0056

DISTRIBUTED INTELLIGENCE SYSTEM, LIC PROG 5744-BK1, GENERAL INFORMATION

Introductory in nature, this manual serves two purposes. First, it explains a Distributed Intelligence System, in manufacturing terms, to production-line managers and industrial executives. Second, it explains the System, in software terms, to programmers and system designers.

A Distributed Intelligence System united all the information-gathering resources of a production-line into one network, with a System/370 as its central computer.

Manual, 20 pages  
//36//5744-BK1

GC34-0057

DISTRIBUTED INTELLIGENCE SYSTEM REFERENCE GUIDE

Describes the Distributed Intelligence System. It tells how to include the code for Distributed Intelligence System functions in System/7 or System/370 programs, for user application programmers, and IBM System Engineers.

The manual includes both introductory and reference information on the macros and high-level call statements that are used to transmit information between the System/7 and the System/370.

Prerequisite Publications:

Distributed Intelligence System General Information Manual, GC34-0056

Distributed Intelligence System: Operations Manual, GC34-0058.

Distributed Intelligence System: Operations Manual, GC34-0058.

Manual, 164 pages

GC34-0058

DISTRIBUTED INTELLIGENCE SYSTEM, LIC PROG 5744-BK1, OPERATIONS

Contains the information and instructions necessary to install and operate the Distributed Intelligence System on System/370 and System/7. This information is required by people responsible for the following functions in Distributed Intelligence System installations:

- o Designing and performing an OS/VSI SYSGEN
- o Installing a Distributed Intelligence System on a System/370 operating under OS/VSI
- o Coding Distributed Intelligence System nucleus for a System/7
- o Executing and controlling a Distributed Intelligence System from the System/370 operator console

GC34

- o Using Customer Information Control System (CICS) with the Distributed Intelligence System
- o Using Information Management System (IMS) with the Distributed Intelligence System
- o Using Distributed Intelligence System tools in program debugging

The Distributed Intelligence System is a system control program that operates under OS/VS1, resides in its own partition in a System/370, and logically connects that System/370 to one or more System/7s. Once installed, the Distributed Intelligence System enables all processors in the network to function as if they were a single processor. Prerequisite publications:

Distributed Intelligence System: Program Reference Guide, GC34-0057. OS/VS1 System Generation Reference, GC26-3791. MSP/7 Installation and Nucleus Generation Guide, GC34-0031. Manual, 126 pages

OS/VS2 MVS INTERACTIVE PROBLEM CONTROL SYSTEM (IPCS), SYSTEM INFORMATION, SUID 5752-857

This manual provides information needed to plan for the installation and use of the OS/VS2 MVS Interactive Problem Control System (IPCS), a Selectable Unit that allows the user to analyze and manage system software problems in a TSO environment.

The manual contains three sections:

- Introduction: General information about IPCS.
- Planning: IPCS hardware and software requirements.
- Supplemental Information - Publications and module information.

The manual is intended to provide planning information for installation managers, system programmers, and IBM field engineering personnel. A basic knowledge of OS/VS2 MVS and TSO is assumed.

Manual, 8 1/2 x 11 inches, 19 pages, 3/78

Flyer, 8 1/2 x 11 inches, 1 page, 3/78

GC34-2006

OS/VS2 MVS IPCS, SUID 5752-857 USER GUIDE AND REFERENCE

This manual describes the functions and uses of the Interactive Problem Control System (IPCS) and the syntax of the IPCS subcommands. The audience is system programmers, customer engineers, and anyone who needs to examine dumps or debug them. IPCS is an online facility for examining dumps and for maintaining centralized information about problems and their related data. IPCS operates as a TSO command and provides subcommands to manipulate problems and their associated data sets and to examine unformatted dumps at the user's terminal.

This manual describes the preparations for an IPCS session and the control the user has over a session; how to use IPCS subcommands to manipulate problems and data sets associated with them; how to examine unformatted dumps; and the function, syntax, and operands of the subcommands.

## GC34-2016

VSE INTERACTIVE PROBLEM CONTROL SYSTEM, LIC PROG 5746-SAI, PROGRAM SUMMARY

The VSE Interactive Problem Control System Program Summary is part of the marketing support for the product. It is directed primarily to customer management and technical staff and secondarily to IBM personnel. Its purposes are to meet the requirements of the Program Product Licensing Agreement and to serve as a basis for the warranty of VSE/IPCS.

VSE/IPCS assists the DOS/VSE user in software problem determination and management of problem information. The Program Summary briefly describes these functions, the operating environment, testing period, reference material, license, program services, product availability and warranty.

SC34-2044

INFORMATION/MVS, LIC PROG 5735-OZS, USER'S GUIDE

This manual describes how to use the search and retrieval program of the Information System Program Product to obtain data from the Information/MVS data base feature.

The information in the Information/MVS data base is intended primarily for system programmers and system engineers, but can also be used by data processing managers and by clerks and program librarians.

The Information/MVS feature is an organized collection

of technical information pertinent to the MVS environment. The information is kept online on the user's system. Users access the data by signing on to Information/System through either TSO or NCCF onto a display terminal, such as a 3270.

To retrieve the Information/MVS data, users enter subcommands that search the data base using specific keyword combinations in a search argument. Subcommands can also be used to browse the data base.

Functions are also provided to enable data to be printed to output devices, and also to allow users to add their own data to the searchable data base.

The Information/System Installation and Customization manual is a prerequisite document for Information/MVS users.

INFORMATION/SYSTEM, LIC PROG 5735-OZS, PROGRAM SUMMARY  
Information/System (Info/System) is a program product that supports system management tasks through the following set of optional features:

- Information/MVS (Info/MVS) - an IBM-supplied data base that is updated regularly to provide direct user access to a broad base of current technical information pertinent to the MVS environment.
- Information/Management (Info/Management) - an interactive application that facilitates the management of data processing problem, change, and system configuration information.
- Information/Access (Info/Access) - an interactive application that extends the software problem resolution and change management capabilities of Info/Management by providing teleprocessing access to the most current source of information for servicing IBM software.

Through online, interactive support of the data processing system or network, Info/System and its features enable the installation to collect, update, retrieve, display, and report on data processing information with the goal of improving the delivery of system services to the end user.

ISPF AND ISPF/PDF FOR VSE/AF GENERAL INFORMATION (CURRENT RELEASE)

This publication provides an overview of and initial planning information for two related program products, Interactive System Productivity Facility (ISPF) and ISPF/Program Development Facility (ISPF/PDF or PDF). These cross-system program products are designed to increase user productivity in developing applications on display terminals, with special emphasis on developing and using interactive applications called dialogs. The dialog management functions of ISPF and the program development capabilities of PDF are separate products. They were previously combined in the System Productivity Facility (SPF) Program Product. This publication is intended for marketing and customer personnel who are assessing the applicability of ISPF and ISPF/PDF to a particular installation.

SC34-2079

ISPF/PDF FOR VSE PROGRAM REFERENCE (CURRENT RELEASE)

This publication consists of related program products. They are designed to improve user productivity in the development of development, test and use of interactive applications called dialogs. ISPF is a dialog manager that provides control and services to support execution of dialogs. PDF is a facility that aids in the development of dialogs and other types of applications. It makes use of display terminals and an interactive environment to assist with many of a programmer's tasks. This publication is intended to develop applications or systems programmer programs under VSE.

ISPF FOR VSE/AF DIALOG MANAGEMENT SERVICES EXAMPLES (CURRENT RELEASE)

This publication applies to the use of Interactive System Productivity Facility (ISPF) in the MVS, VM and VSE/AF environment. It is intended for use by applications and systems programmers engaged in development of interactive programs. This publication which supplements ISPF Dialog Management Services, SC34-2088, provides examples of how dialogs invoke ISPF services. The examples appear in the context of implementations of an employee records application and a telephone book application. Each application includes a description of the application and listings of dialog components (Dialog functions, selection and data entry panel definitions, messages and file tailoring skeletons) required to process the application under ISPF. Example dialog functions are provided for both applications in the following command procedures and programming languages: CLIST, EXEC2, COBOL, FORTRAN and PL/1.

ISPF/PDF FOR MVS PROGRAM REFERENCE

The Interactive System Productivity Facility (ISPF) and the ISPF/Program Development Facility (ISPF/PDF or PDF) are related program products. Together, they are designed to improve user productivity in the development of applications and contain special functions for the development, test and use of interactive applications, called dialogs. ISPF is a dialog manager that provides control and services to support execution of dialogs; PDF is a facility that aids in the development of dialogs and other types of applications. It makes use of display terminals and an interactive environment to assist with many of the programmer's tasks. This publication is intended for developing applications for systems programmer programs under MVS. The functions of ISPF and PDF were previously combined in the predecessor program SPF and described in ISPF General Information, GC34-2078.

INFORMATION/SYSTEM MESSAGES AND CODES

This publication lists the messages and user completion (ABEND) codes produced by Information/System and its associated features. The messages described in this publication are those for which online explanations are not available. The messages and codes are intended for users of the product and for systems programmers who install and maintain the product.  
The messages are presented in alphanumeric order where possible. Completion codes are listed in numeric order (hexadecimal and decimal). Each message and code is explained and, where appropriate, the accompanying actions

SC34-2093

INFORMATION/ACCESS INFORMATION/SYSTEM INSTALLATION CUSTOMIZATION AND OPERATION

This publication provides detailed information for installing, customizing and operating the Information/Access feature of the Information/System program product. The publication, Information/System Installation and Customization is a corequisite. The Information/Access feature with its prerequisites, Information/System and Information/Management, enables the user to collect, retrieve and manage information necessary to the efficient and organized operation of a data processing installation. Specifically, Info/Access provides a teleprocessing connection to the Customer Software Support Facility (CSSF).  
This publication is intended for the systems programmers and administrators who define the role of Information/System in the installation's systems or networks install Information/System and decide in what ways to customize it to their installation.

## SC34-2102

INFORMATION/MANAGEMENT VERSION 2 PROBLEM MANAGEMENT GUIDE

Information/Management (Info/Management) is a program product that aids the user in the management of problem, change and configuration information within a data processing system. Info/Management users can be systems administrators, clerks, managers, operators, systems and applications programmers, or other systems or operational personnel. This publication describes how Info/Management may be used to perform various problem management tasks. It includes task scenarios (step-by-step and quick-use examples), panel descriptions and report formats. This publication is 1 of 3 that replaces SC34-2031. The other two in this group are SC34-2103 and SC34-2104.

Manual, 8 1/2 x 11 inches, 09/83

## SC34-2104

INFORMATION/MANAGEMENT VERSION 2 CONFIGURATION MANAGEMENT GUIDE

Information/Management (Info/Management) is a program product that aids the user in the management of problem, change and configuration information within a data processing system. This publication is 1 of 3 that replaces SC34-2031. The other two in this group are SC34-2103 and SC34-2102. Info/Management users can be systems administrators, clerks, managers, operators, systems and applications programmers, or other systems or operational personnel. This publication describes how Info/Management may be used to perform various configuration management tasks. It includes task scenarios (step-by-step and quick-use examples), panel descriptions and report formats.

Manual, 8 1/2 x 11 inches, 09/83  
//37//5665-953

## SC34-2105

INFORMATION/SYSTEM VERSION 2 REFERENCE

This publication provides comprehensive material needed to exercise the facilities and functions of Information/System and Information/Management. Information/Management is a program product related to the Information/System program product which is an online conversational tool that can help an installation control and manage its problems, changes, system configurations and also search for Info/MVS data. This publication describes all Info/System commands. It explains how to search the Info/MVS data base and the Info/System Data base (which also contains Info/Management

## SC34

problem, change and configuration records). It describes how to use stored response chains, how to run reports and it explains the purpose of user profiles.

Manual, 8 1/2 x 11 inches, 250 pages, 09/83  
//37//5665-952

## SC34-2106

INFORMATION/SYSTEM MESSAGES AND CODES

This publication lists the messages and user completion (ABEND) codes produced by Information/System and its companion program products, Information/Management and Information/MVS. The messages described are those for which online explanations are not available. The messages and codes are intended for users of the product and for systems programmers who install and maintain the product. The messages are presented in alphabetic order where possible. Completion codes are listed in numeric order (hexadecimal and decimal). Each message and code is explained and, where appropriate, the accompanying actions by Information/System are described and a user response is suggested.

Manual, 8 1/2 x 11 inches, 144 pages, 09/83

## SC34-2107

INFORMATION/MVS GUIDE

This publication describes how to use the search and retrieval program of the Information/System Program to obtain data from the Information/MVS data base program product. The information in the Information/MVS data base is intended primarily for systems programmers and engineers, but can also be used by data processing managers and by clerks and program librarians. Information/MVS is an organized collection of technical information pertinent to the MVS environment. The information is kept online on the user's system. Users access the data by signing on to Information/System through TSO and ISPF onto a display terminal such as 3270. To retrieve the Information/MVS data, users enter commands that search the data base using specific keyword combinations in a search argument. Commands can also be used to browse the data base. Functions are also provided to enable data to be printed to output devices, and also to allow users to add their own data to the searchable data base. The Information/System Installation manual is a prerequisite document for Information/MVS users.

Manual, 8 1/2 x 11 inches, 09/83  
//37//5665-955

## SC34-2108

NPDA VERSION 2 USER REFERENCE

This publication is intended to provide assistance to the help-desk operator, system/network operator and technical support person in interpreting data presented on NPDA displays. It consists of a general tutorial about error and statistical data supplied to NPDA and also provides scenarios demonstrating how a user would retrieve and analyze this information for the purpose of problem determination. A substantial portion of this publication is devoted to products supported by NPDA and for each describes the environment under which the product operates, specific error data provided to NPDA and other problem determination information that relates to the product.

Manual, 8 1/2 x 11 inches, 02/83

A STRUCTURED APPROACH TO DESCRIBING AND SEARCHING PROBLEMS

This publication provides guidelines on how the symptom and resolution sections of the Info/Management prompting sequence may be used for problem analysis and duplicate problem recognition. The prompting sequence defines a problem definition language used to describe problems with all data processing related products. This publication includes general discussions concerning the meaning and use of the problem language defined by the Info/Management symptom and resolution panels, general discussions concerning how this problem language may be used when communicating with Level One or when using Info/Access, general problem analysis steps and guidelines and general search techniques. This publication is intended for all product developers, systems engineers, change team representatives, program support representatives, Level One personnel and systems programmers that communicate with data bases containing APARs, SE Communication Data and other problem description data.

VMAP GENERAL INFORMATION (CURRENT RELEASE)  
This publication describes the Virtual Machine Monitor Analysis Program, used to create performance reports on VM systems. It is intended for Data Processing and Information System managers, planners and analysts who are responsible for managing the performance of their current VM systems and for capacity planning activities. It includes an overview of the product, sample product output and installation planning information. Manual, 8 1/2 x 11 inches, 26 pages, 10/85  
//34//5664-191

GC34-2165

VMAP SPECIFICATIONS (CURRENT RELEASE)  
The Virtual Machine Monitor Analysis Program Licensed Program Specifications (LPS) serves as a basis for the warranty of the Virtual Machine Monitor Analysis Program. This publication provides information on the warranted function of the program and states the specified operating environment. Flyer, 8 1/2 x 11 inches, 4 pages, 11/86  
//34//5664-191

VMAP USER'S GUIDE AND REFERENCE (CURRENT RELEASE)  
This publication describes the capabilities, operating procedures and uses of the Virtual Machine Monitor Analysis Program. It is a combination User's Guide and Reference Manual. The User's Guide describes the basic functions of VMAP and how to use these functions. The Reference Guide describes command syntax and parameter files, lists all error messages and provides detailed report descriptions. It is intended for VM System Analysts and Programmers who use the product. This is a component of SK2T-0888. Manual, 8 1/2 x 11 inches, 440 pages, 12/84  
//34//5664-191

SC34-2168

VMAP INSTALLATION GUIDE (CURRENT RELEASE)  
This publication describes the installation procedure for the program product Virtual Machine Monitor Analysis Program. Prerequisite hardware and software, as well as DASD space requirements are included. The manual also describes how to apply service to the product. This manual is intended for System Programmers and those responsible for installing and maintaining VMAP.

WHAT'S NEW IN ISPF (CURRENT RELEASE)

This publication provides information about the improvements and enhancements that have been made to the Interactive System Productivity Facility (ISPF) and ISPF Program Development Facility (ISPF/PDF) for MVS and VM/SP. These new features are contained in Version 2 Release 2 of these program products.

These features apply to applications using the dialog manager services, or to applications using the dialog manager services and the Program Development Facility, or to direct use of the Program Development Facility. This publication is intended to be read by people who are familiar with Version 1 of ISPF and ISPF/PDF.

ISPF VERSION 2 DIALOG MANAGEMENT SERVICES EXAMPLES FOR VM/SP (CURRENT RELEASE)

This publication applies to the use of Interactive System Productivity Facility (ISPF) in the VM/SP environment. It is intended for applications and systems programmers engaged in development of interactive programs. This publication supplements ISPF Dialog Management Services (SC34-2173) and provides examples of how dialogs invoke ISPF services. The examples appear in the context of three small dialogs (Examples 1, 2, and 3) and implementations of an "employee records" application and a "telephone book" application (Examples 4 and 5). Examples 1, 2, and 3 are in REXX. Examples 4 and 5 include a description of the application and listings of dialog components (dialog functions, selection and data entry panel definitions, messages and file tailoring skeletons) required to process the application under ISPF.

Manual, 8 1/2 x 11 inches, 125 pages, 10/84

ISPF/PDF VERSION 2 PROGRAM REFERENCE FOR VM/SP (CURRENT RELEASE)

This publication is designed to improve user productivity in the development of applications and contains special functions for the development, test and use of interactive applications called dialogs. It is intended to aid applications or systems programmers developing programs under VM. The first three chapters provide information pertinent to use of the terminal, format of the displays and a description of programming libraries. Succeeding chapters deal with the use of particular PDF functions selectable from the primary option menu. Appendixes contain a usage scenario, a description of listing formats and command summaries.

Manual, 8 1/2 x 11 inches, 10/84

ISPF/PDF EDIT MACROS FOR VM/SP (CURRENT RELEASE)

This publication is designed to improve user productivity in the development of applications and contains special functions for the development, test and use of interactive applications called dialogs. It is intended to be used to aid applications or systems programmers developing edit macros to be run with the ISPF/PDF editor. It provides an introduction to the macro facilities and how to use them with sample macros for guidance. It also provides reference information about each macro statement. The reader must be familiar with CMS and the ISPF/PDF editor and must have some knowledge of EXEC coding in EXEC2 and/or REXX. Before reading this publication, the user must read the ISPF/PDF Program Reference for VM (Version 2), SC34-2176.

SC34-4018

ISPF/PDF VERSION 2 FOR MVS EDIT MACROS (CURRENT RELEASE)

The Interactive System Productivity Facility (ISPF) and the ISPF/Program Development Facility (ISPF/PDF and PDF) are related program products. Together, they are designed to improve user productivity in the development of applications and contain special functions for development, test and use of interactive applications, called dialogs.

Specifically: ISPF is a dialog manager for interactive applications. It provides control and services to permit execution of dialogs. PDF is a facility that aids in the development of dialogs and other types of applications. It makes use of display terminals and an interactive environment to assist with many of a programmer's tasks. This publication describes the edit macro facility, the statements that are available and how to code them. It assumes that the user is an application or systems programmer, engaged in program development, and is familiar with coding CLISTS in the MVS environment and with the ISPF/PDF editor.

SC34-4023

ISPF/PDF, 5665-317, VERSION 2 FOR MVS SERVICES (CURRENT RELEASE)

The Interactive System Productivity Facility (ISPF) and the ISPF/Program Development Facility (ISPF/PDF or PDF) are related products. Together, they are designed to improve user productivity in the development of applications, and contain special functions for the development, test, and use of interactive applications, called dialogs. Specifically: ISPF is a dialog manager for interactive applications. It

provides control and services to permit execution of the dialogs. PDF is a facility that aids in the development of dialogs and other types of applications. It makes use of display terminals and an interactive environment to assist with many of a programmer's tasks. This publication describes the Library Management Services and the enhancements to the Edit and Browse options of ISPF/PDF. It assumes that you are an application or systems programmer, engaged in program development and are familiar with MVS.  
Manual, 8 1/2 x 11 inches  
////5665-317

## SC34-4024

INTERACTIVE SYSTEM PRODUCTIVITY FACILITY/PROGRAM DEVELOPMENT FACILITY VERSION 2 FOR MVS, 5665-317, PROGRAM REFERENCE  
This publication is intended to aid applications or systems programmers developing programs under MVS. The first three chapters provide information pertinent to use of the terminal, format of the displays, and a description of programming libraries. Succeeding chapters deal with the use of particular PDF functions selectable from the primary option menu. Appendixes contain a usage scenario, a description of listing formats, and command summaries.  
Manual, 8 1/2 x 11 inches, 9/85  
////5665-317

## SC34-4025

ISPF/PDF VERSION 2 FOR MVS LIBRARY MANAGEMENT FACILITY (CURRENT RELEASE)  
The Library Management Facility (LMF) is an extension of the Interactive System Productivity Facility (ISPF) library concepts and options. It allows users to control the contents of their libraries and manage their development processes. Libraries controlled by LMF are called controlled libraries. This publication tells the user how to create the LMF library and how the controlled libraries are used in the development process. It assumes that the user is engaged in program development and is familiar with the operation of the ISPF/PDF in the MVS environment.

## GC34-4045

INTRODUCING THE INFORMATION/FAMILY VM/SP AND MVS  
Introducing the Information/Family presents a high level overview of Information/System, Information/Management, Information/Access, Information/MVS, and Information/VM-VSE for both MVS and VM/SP operating environments. Chapter 1, describes the functions and relationships of each member of the Information/Family. Chapter 2, gives a visual and a descriptive overview of the books in the Information/Family Library. Chapter 3, highlights the new function provided by Version 3. Chapter 4, outlines the hardware and software requirements. This publication is a component of SBOF-0017 and SBOF-0018.

SC34-4054

USING INFORMATION/FAMILY, 5664-322, -323, 5665-383, -384, CHANGE MANAGEMENT FOR MVS AND VM/SP

Information/Management is a program product that aids in the management of problem, change, and configuration information within a data processing system.

The change management facility of Information/Management is an online, automated approach to controlling hardware, software, procedural, and documentation changes at an installation. The change process is the procedure used to implement changes. It consists of change entry, technical assessment, business assessment, management approval, monitor testing, monitor installation and report/control status.

Manual, 8 1/2 x 11 inches, 128 pages, 1/86

VIDEOTEX/370, 5798-DTM, INFORMATION PROVIDER'S GUIDE

This publication is intended for Videotex/370 information providers who create Videotex/370 services for end users. It gives general information on designing services for Videotex/370 and specific information on creating two types of services, informational and transactional, using the Videotex/370 utilities. An information provider creating information services does not need CICS/VS programming knowledge, but does need to be able to use an editor or system utility to create a file. An information provider creating transactional services is assumed to be able to write CICS/VS command level applications.

Manual, 232 pages, 1/86  
///5798-DTM

SC34-4059

VIDEOTEX/370, 5798-DTM, INSTALLATION AND ADMINISTRATION GUIDE

This publication supports the tasks of installing and administering Videotex/370. The systems administrator tasks are preinstallation planning and administering the Messaging service (including subscribing users). These tasks may be performed by different people or groups within the support organization of the information system.

The installation task assumes that Videotex/370 is to be installed on an existing CICS/VS system. The steps in installing Videotex/370 include: unloading the SCL library; defining VSAM files; loading Videotex/370 VSAM files; loading Videotex/370 load and source libraries; installing the Messaging service; customizing Videotex/370; installing JCL for informational services; configuring SNA and X.25 networks; defining the CICS/VS environment; and verifying the installation.

OPERATOR'S LIBRARY, S/370 MODEL 135 PROCEDURES

This manual provides operating and reference information for operators of the IBM System/370 Model 135, and Model 135-3 (includes the performance enhancement feature). The Models 135 and 135-3 operate the same except during Initial Microprogram Load (IMPL) procedures. These procedure differences are explained in the manual. References in the manual made to the Model 135 also apply to the Model 135-3 unless otherwise specified.

The reader is assumed to have a working knowledge of "Introduction to IBM Data Processing Systems," GC20-1684, and some previous data processing experience.

The manual describes how to operate the following system hardware and compatibility feature:

- o IBM 3135/3135-3 Processing Unit - the system processing unit.
- o IBM 3210 and 3215 Console Printer-Keyboard - the operator's primary link with the system.
- o IBM 3277 Display Station - a secondary stand-alone console.
- o 2314/3340 Compatibility feature - IPL procedure, direct access storage devices data volume conversion, and feature description.

For operating information of IBM input/output devices that attach to the processing unit channels and/or integrated adapters, see "IBM System/370 Bibliography," GC20-0001. Also, see the Bibliography for program operating systems that support the system.

Manual, 108 pages

3135//16//

GC38-0015

S/370 MODEL 145 OPERATING PROCEDURES

This System Library Manual contains information necessary to operate the following units of the IBM System/370 Model 145:

- IBM 3145 Processing Unit
- IBM 3210 Console Printer-Keyboards
- IBM 3215 Console Printer-Keyboards
- IBM 3047 Power Unit

The reader is assumed to have basic computer knowledge and experience, or computer operating experience on a similar system or other related data processing equipment. The information in this manual is written for all levels of operator experience for training as well as system operation. This manual has five major sections:

- o System Control Panel Indicators, Switches, and Keys - Describes the purpose of individual indicators, switches, and keys. It does not describe the applications of these facilities within operating procedures. Service-personnel usage is not included.
- o Console File - Contains location, handling, flexible disk insertion and removal information, and the necessary cautions associated with flexible disks.
- o Console Printer-Keyboards - Contains initial setup and operator adjustments, 3210 print element cleaning procedures, associated manual PR-KB operations, and a description of indicators and controls.
- o Operating Procedures - Describes in detail procedures necessary for system operation. Initialization and error recovery procedures are included. Operating procedures for System Error Record Editing Program (SEREP) and System Test 370

- (ST370) are also in this section.
- o Handling Abnormal Situations - Includes text and flowcharts used in analyzing the four major types of abnormal situations encountered:
    1. Cannot power system on
    2. Cannot start any job
    3. Cannot continuously run any job
    4. Cannot power system off

Manual, 96 pages

## GC38-0016

S/370 MODEL 138 OPERATING PROCEDURES

This manual contains information for operators of the IBM System/370 Data Processing System Model 138. The reader is assumed to have a working knowledge of Introduction to IBM Data Processing Systems, GC20-1684. Some previous operating experience on either a similar system or related data processing equipment is helpful. The information in this manual is for all levels of operator experience - for training as well as for system operation.

- The manual describes how to operate the following:
- o IBM 3138 Processing Unit and Console Display-KeyBoard
  - o IBM 3046 Power Unit - major source of electrical power for the processing unit
  - o IBM 3286 Printer - the optional console printer
  - o Input/Output devices that are attached to the CPU integrated adapters
  - o 2314/3340 Compatibility Feature - IPL procedure, data volume conversion, and feature description.

Manual, 112 pages, 11/76  
3138//16//

## GC38-0017

S/370 MODEL 148 OPERATING PROCEDURES

This manual contains information necessary to operate these units of the IBM System/370 Model 148:

- IBM 3148 Processing Unit
- Console Display-KeyBoard
- IBM 3286 Printer
- Console File.

The reader is assumed to have basic computer knowledge and experience or to have computer operating experience on a similar system or other related data processing equipment. The information in this manual is for all levels of operator experience, for training as well as system operation. The five major sections are:

- o System Control Panel Indicators, Switches, and Keys, describes the purpose of individual indicators, switches, and keys. It does not describe the applications of these facilities beyond normal operating procedures.
- o Console File, contains procedures for handling, insertion, and removal of magnetic disk cartridges.
- o Console Display-KeyBoard, contains D-KB manual operations, keyboard keys and functions, and description of indicators and controls. Also includes 3286 Printer operation, controls, and procedures for forms insertion and ribbon replacement.
- o Operating Procedures, contains procedures for system operation, initialization, and error recovery.
- o Handling Abnormal Situations, contains flowcharts and text for analyzing abnormal situations.

Manual, 96 pgs, 12/76  
3148//16//

## GC38-0025

S/370 MODEL 158 OPERATING PROCEDURES

This manual introduces the operator to the Model 158 display console. Subjects describes from an operational level include:

- o Control Panel
- o Console Display
- o Keyboard
- o Console Files
- o Console Printer

This publication should be used in conjunction with Operator's Library: OS/VS2 Consoles, GC38-0260, and Operator's Library: OS/VS2 Reference, GC38-0210. A knowledge of IBM System/360 Operating System: Operating Procedures, GC28-6692 is considered a prerequisite.  
Manual, 52 pages  
3158//16//

## GC38-0030

S/370 MODEL 168 OPERATING PROCEDURES

This publication describes the basic procedures performed by the Model 168 operator at the system console. These procedures, in conjunction with corresponding procedures provided in the appropriate operating system reference and console manuals, enables the operator to power the machine system, load and execute control and problem programs, and to receive and issue messages to communicate with the system.

The anticipated reader is the Model 168 operator who receives the program job, enters it into the production records, enters the program into the system, and returns the completed job to the problem programmers. The reader is assumed to have at least a basic understanding of computers and some preliminary experience in operating a similar system.

Manual, 70 pages  
3168//16//

## GC38-0031

3033 OPERATOR'S GUIDE

This publication describes the operator controls and basic procedures performed by the operator of a 3032 Processor Complex using a 3036 Console. The procedures, when used with corresponding procedures in the appropriate operating system reference and console publications, enable the operator to power up the system, execute control and problem programs, and communicate with the system. The reader is assumed to have basic computer knowledge and experience on a similar system.

Manual, 8 1/2 x 11 inches, 164 pages, 6/84  
3033//16//

## GC38-0032

3032 PROCESSOR COMPLEX OPERATOR'S GUIDE

This publication describes the operator controls and basic procedures performed by the operator of a 3032 Processor Complex. The procedures, when used with corresponding procedures in the appropriate operating system reference and console publications enable the operator to power up the system, execute control and problem programs, and communicate with the system. The reader is assumed to have basic computer knowledge and experience on a similar system.

Manual, 8 1/2 x 11 inches, 100 pages, 5/83  
3032//16//

## GC38-0033

3031 OPERATOR'S GUIDE

This publication describes the operator controls and basic procedures performed by the operator of a 3031 Processor Complex or 3031 Attached Processor Complex using a 3036

GC38

SC38

Console. The procedures, when used with corresponding procedures in the appropriate operating system reference and console publications, enable the operator to power up the system, execute control and problem programs, and communicate with the system. The reader is assumed to have basic computer knowledge and experience on a similar system. Manual, 8 1/2 x 11 inches, 106 pages, 2/80  
3031//16//

Manual, 8 1/2 x 11 inches, 240 pages, 07/85

GC38-0034

3081 OPERATOR GUIDE FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This manual provides information that is required for the operation of the system console of the 3081 Processor Complex. This manual is intended for the operator of the system console of the 3081 Processor Complex.

The manual contains descriptions of operator controls (display frames, commands, function keys, pushbuttons, and switches) and task-oriented procedures that are performed at the system console.

Manual, 8 1/2 x 11 inches, 350 pages, 10/81  
3081//16//

SC38-0039

3090 PROCESSOR COMPLEX OPERATOR MESSAGES FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

The 3090 Processor Complex Operator Messages for the System Console lists and defines the messages displayed during the operation of the System Console for the 3090.

The primary user is the System Console operator. Manual, 8 1/2 x 11 inches, 176 pages, 08/85  
3090//16//

SC38-0040

3090 PROCESSOR COMPLEX MODELS 120E 150 150E 180 180E 200 200E 400 AND 400E OPERATOR CONTROLS FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This publication includes descriptions of the controls used by the system console operator and a brief description of each model. The 3180 Display Station is included.

The primary user is the system console operator. The secondary user is the systems programmer.

Manual, 8 1/2 x 11 inches, 308 pages, 05/87  
3090//16//

GC38-0035

3081, 3083, AND 3084 MESSAGES FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This publication lists and defines the messages displayed during operation of the system console for the 3081, 3083, or 3084 Processor Complex. It is intended for the operator of the system console and is to be used in conjunction with 3081 Operator's Guide for the System Console, GC38-0034; 3083 Operator's Guide for the System Console, GC38-0036; or 3084 Operator's Guide for the System Console, GC38-0037.

Manual, 8 1/2 x 11 inches, 234 pages, 7/85

SC38-0041

3090 PROCESSOR COMPLEX MODELS 200 AND 200E OPERATOR TASKS FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This 3090 Processor Complex Models 200 and 200E Operator Tasks for the System Console includes descriptions for each task normally performed by a system console operator. A brief description of the 3090 Processor Complex and the 3180 Display Station is also included.

The primary user is the system console operator. The system programmer is the secondary user.

Manual, 8 1/2 x 11 inches, 472 pages, 03/87  
3090//16//

GC38-0036

3083 OPERATOR'S GUIDE FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This publication contains information about the operation of the system console for the IBM 3083 Process Complex. The operator controls and the basic procedures that are performed at the system console are described.

Manual, 500 pages, 10/82  
3083//16//

SC38-0049

3090 PROCESSOR COMPLEX MODELS 120E 150 150E 180 AND 180E OPERATOR TASKS FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This publication includes descriptions of each task normally performed by a system console operator. A brief description of the 3090 Processor Complex and the 3180 Display Station is also included.

The primary user is the system console operator. The systems programmer is the secondary user.

Manual, 8 1/2 x 11 inches, 456 pages, 05/87  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GC38-0037

3084 OPERATOR'S GUIDE FOR THE SYSTEM CONSOLE (CURRENT RELEASE)

This publication contains information about the operation of the system console for the 3084 Processor Complex. The operator controls and the basic procedures that are performed at the system console are described.

The 3084 system console operation in partitioned mode are described in the 3081 Operator Guide for the System Console, GC38-0034. Messages for 3084 Operations are contained in 3081, 3083, and 3084 Messages, GC38-0035.

Manual, 8 1/2 x 11 inches, 550 pages, 7/84  
3084//16//

SC38-0051

3090 PROCESSOR COMPLEX RECOVERY GUIDE (CURRENT RELEASE)

This publication is a guide to processing on the 3090 Processor Complex after a hardware failure occurs.

Manual, 8 1/2 x 11 inches, 160 pages, 08/86  
3090//16//

SC38-0038

3090 PROCESSOR COMPLEX INPUT/OUTPUT CONFIGURATION PROGRAM USER'S GUIDE AND REFERENCE

This publication is intended for systems programmers and service representatives who are responsible for defining, installing, and configuring the channels or the channel paths, control units, and I/O devices on the 3090 Processor Complex.

It describes the MVS version, the VM version, and the stand-alone version of IOCP.

SC38-0107

VM/SYSTEM PRODUCT HIGH PERFORMANCE OPTION, 5664-173, RELEASE 3.2 INSTALLATION GUIDE (CURRENT RELEASE)

This publication is intended for system programmers and those responsible for the planning and installation of a VM/SP HPO system.

This publication consists of the following:

Part 1 describes the steps required to install VM/SP HPO. Two separate procedures are provided:

Installing VM/SP HPO using the starter system and product tape(s).

Installing VM/SP HPO using the product tape (for existing VM/SP users).  
Part 2 describes the procedures for verifying CP and CMS, a method to load and save saved segments, and sample files of configurations by device types.  
Appendices A-N provide reference information to support parts 1 and 2.  
Manual, 8 1/2 x 11 inches, 546, 10/83  
//34//5664-167,5664-173

## GC38-0110

OPERATOR'S LIBRARY: OS/VS1 REFERENCE

This reference manual contains VS1 system operator and RES (Remote Entry Services) commands. It is part of the Operator's Library and is for the system operator and the operator at the central computer of an RES system, but some sections are also of interest to operators at secondary consoles, such as those in the tape or disk pool. Appendix A describes procedures for single and multiple console configuration and contains information formerly found in Operator's Library: OS/VS Console Configurations, GC38-0120.

This publication documents only operator initiated commands. Parameters to be issued in response to messages appear in the System Messages manual and operator instructions for a particular console are in the applicable Operating Procedures manual.  
Manual, 150 pages  
//40//5652

## GC38-0225

OPERATOR'S LIBRARY: OS/VS2 REMOTE TERMINALS (JES2)

This guide is for operators and users of JES2 remote workstations who enter one or more jobs to be sent, using JES2, to a central computer for processing.

This book describes input/output queues and how the workstation user can control them. The workstation commands available to the user are described according to their function. The parameters used for various forms of the commands are explained.

For each type of workstation (1130, S/360, S/360 Model 20, 2922, S/3, 3780, 2780, 2770) there is a separate chapter that describes its operation. This part of the book can be tailored to each installation's requirements by removing sections that do not apply.  
Manual, 120 pages  
/C/38//5752

## GC38-0228

OPERATOR'S LIBRARY: OS/VS2 REMOTE TERMINALS (JES3)

This publication consists of a general section and a self-contained section for each of the remote terminals supported by JES3. Each such section provides information necessary to operate the remote terminal and to recover from errors that may occur during operation. The publication is designed primarily for the remote terminal user.  
Manual, 72 pages  
/C/38//5752

## GC38-0229

OPERATOR'S LIBRARY: OS/VS2 MVS SYSTEM COMMANDS

This publication describes commands used by a system console operator running a System/370 under OS/VS2 MVS. (Subsystem commands are documented in separate publications.)

The publication is intended for computer operators and system programmers responsible for controlling and operating an OS/VS2 MVS system.

The publication includes:

- An overview of multiprocessing characteristics and system operation

- Characteristics and use of multiple-console configurations
  - Characteristics and use of display consoles
  - The function and syntax of each system command
  - A glossary of technical terms used
- Manual, 8 1/2 x 11 inches, 258 pages, 7/78  
//40//5752

## GC38-0251

NETWORK OPERATION SUPPORT PROGRAM, LIC PROG 5735-XX2, GENERAL INFORMATION

This publication is a general description of the Network Operation Support Program. It is intended for customer executives, system administrators, system analysts, system programmers, application programmers, and terminal operators. The first part of this publication provides an overview of the Network Operation Support Program in a complex data communications network. The second part is a functional description of the program including its major functions. The remaining sections discuss terminal and program support and compatibility considerations.  
Manual, 8 1/2 x 11 inches, 28 pages, 10/76  
////5735-XX2

## GC38-0254

ACF/VTAM, 5735-RC2, 5746-RC3, GENERAL INFORMATION

This manual is intended for those who will decide whether or not to use ACF/VTAM (an IBM program product), and is a preliminary source of information for installation managers and system programmers who will install it.

It discusses:

- o Definition of ACF/VTAM to the operating system
- o Operation of an ACF/VTAM network
- o ACF/VTAM macro instructions
- o Reliability, availability, and serviceability features available to ACF/VTAM

The reader should be familiar with teleprocessing concepts. System programmers should be familiar with the operating system with which they will use ACF/VTAM.  
Manual, 8 1/2 x 11 inches, 50 pgs, 10/76  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GC38-0255

OPERATOR'S LIBRARY: OS/VS1 DISPLAY CONSOLES

Tells system operators how to use cathode ray tube (CRT) display devices as operator consoles to run a VS1 operating system. The display devices supported are:

- o 2250 Display Unit
- o 2260 Display Station

The book summarizes the basic procedures for operating a system through display consoles and includes detailed instructions for each device telling:

- o How to start the system
- o How to enter commands
- o How to delete messages
- o How to control the screen
- o How to use the CONTROL command

The book must be used in conjunction with Operator's Library: OS/VS1 Reference, GC28-1001.  
Manual, 80 pages  
//40//5652

## GC38-0256

ACF/VTAM, 5735-RC2, 5746-RC3, MACRO LANGUAGE GUIDE

This publication describes how to write an ACF/VTAM application program. An ACF/VTAM application program is a program that contains ACF/VTAM macro instructions to request connection to and communicate with telecommunications devices and subsystems supported by ACF/VTAM. This manual should be used with reference publication, ACF/VTAM Macro

SC38

Language Reference, SC38-0261.

The contents include:

- an overview of ACF/VTAM application programs and their relation to other elements in a teleprocessing network;
- suggestions on how to organize an ACF/VTAM application program;
- a discussion of the concepts, facilities, and language for opening and closing a program, and for connecting to and communicating with terminals and logical units;
- requirements and suggestions on using exit routines, handling errors and special conditions in the network and debugging an ACF/VTAM application program. The user is assumed to be familiar with Basic Assembler Language.

Prerequisite Publications: None, however; ACF/VTAM Concepts and Planning, GC38-0282, may be helpful in understanding the concepts of an ACF/VTAM network. Manual, 8 1/2 x 11 inches, 276 pgs, 7/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SC38-0257

ACF/VTAM, 5735-RC2, 5746-RC3, PROGRAM OPERATOR'S GUIDE

This book describes how to write the Program Operator portion of an ACF/VTAM application program. It supplements the information on writing ACF/VTAM application programs contained in ACF/VTAM macro Language Guide, SC38-0256. The primary audience for this book is the ACF/VTAM application programmer who is writing a Program Operator application program. The secondary audience is the system programmer who requires background information for planning and maintaining an ACF/VTAM network.

Manual, 8 1/2 x 11 inches, 88 pgs, 7/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SC38-0258

ACF/VTAM, 5735-RC2, PROGRAMMER'S GUIDE

Provides the necessary information for defining an ACF/VTAM network in an OS/VS system. It describes the interfaces that must be created between the user's ACF/VTAM application program and the system. It also describes how the system can be modified to better serve the needs of the user.

Prerequisite publication: Advanced Communications Function for VTAM (ACF/VTAM) Concepts and Planning, GC38-0282

Corequisite publication: Advanced Communications Function for VTAM (ACF/VTAM) Installation Guide, SC38-2069

This book is intended for system programmers who are primarily concerned with system generation and ACF/VTAM network definition.

Manual, 8 1/2 x 11 inches, 300 pgs, 12/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SC38-0261

ACF/VTAM, 5735-RC2, 5746-RC3, MACRO LANGUAGE REFERENCE

This publication is a reference manual that describes the ACF/VTAM macro instructions in detail.

ACF/VTAM is an access method that allows a program operating under a virtual storage operating system to communicate with terminals and logical units of a teleprocessing network, or optionally to communicate with terminals and logical units of several combined teleprocessing networks.

This manual is used by installation personnel (typically system programmers) who code the programs that provide the interface between the application program and the teleprocessing network and is designed to be used in conjunction with the ACF/VTAM Macro Language Guide, SC38-0256.

Prerequisite Publications: None. However, the reader should be familiar with the parts of the OS/VS and DOS/VS Assembler Language (GC33-4010) that explains the rules for coding assembler statements.

SC38-0268

ACF/VTAM, LIC PROG 5746-RC3, SYSTEM PROGRAMMER'S GUIDE

Provides the necessary information for defining an ACF/VTAM network in a DOS/VS system. It describes the interfaces that must be created between the user's ACF/VTAM application program and the system. It also describes how the system can be notified to better serve the needs of the users. This book is intended for system programmers who are primarily concerned with system generation and ACF/VTAM network definition.

Prerequisite: ACF/VTAM Concepts and Planning, GC38-0282

Corequisite: ACF/VTAM Installation Guide for DOS/VS, SC38-0271.

Manual, 8 1/2 x 11 inches, 300 pages, 7/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SC38-0269

ACF/VTAM, 5735-RC2, OS/VS INSTALLATION GUIDE

This publication provides an overview of the steps required to install ACF/VTAM, including the Multisystem Networking Facility. "Installing" is defined to include planning requirements coding customer programming, and testing the programming with ACF/VTAM and related products. The intended audience is the customer or IBM system engineers who must do the installing. This publication refers to and must be used with other publications in the ACF/VTAM library and with related product publications, such as ACF/NCP/VS publications.

This publication contains:

- o An introductory chapter
- o A installation chapter describing specific planning, coding, and testing steps to take and referring to publications that contain required information
- o A chapter describing possible stages in migrating from a pre-ACF VTAM system
- o chapter describing the coding and operating requirements of a hypothetical customer using the Multisystem Networking Facility

ACF/VTAM Concepts & Planning, GC38-0282, is a prerequisite publication. ACF/VTAM System Programmer's Guide for OS/VS, SC38-0258 is a corequisite publication.

Manual, 8 1/2 x 11 inches, 210 pgs, 12/77

SC38-0273

ACF/VTAM, 5746-RC3, DOS/VS NETWORK OPERATING PROCEDURES

This publication is a reference manual for system operators who run an ACF/VTAM network. It is also a guide for system programmers who must supply operators with the detailed information that they need to run the ACF/VTAM network.

The publication provides an introduction to operating ACF/VTAM (Chapter 1), describes the fundamentals of ACF/VTAM commands and messages (Chapter 2), and explains the use of commands in performing particular operations (Chapter 3-7). The commands are presented on the basis of function and the network elements they act upon. Command formats can be found either where the command is first discussed or in Appendix D, which summarizes the commands and their functions.

GC38-0335

OPERATOR'S LIBRARY: OS/VS1 CRJE

This publication contains information pertinent to the central computer operator for starting, stopping, and running Conversational Remote Job Entry (CRJE) under OS/VS1. It should be used in conjunction with Operator's Library: OS/VS1 Reference, GC38-0110.

All the messages received by the operator as a result of CRJE commands are documented in OS/VS Message Library: VS1 System Messages, GC38-1001.  
Manual  
//38//5741,5652

## GC38-1000

OS/VS MESSAGE LIBRARY: MASS STORAGE SYSTEM (MSS) MESSAGES

This publication is part of the OS/VS Message Library. It documents the mass storage system messages (with prefixes ICB and ICG) and the reason codes returned from the mass storage system communicator. "ICB" prefixed messages from the mass storage system communicator (including mass storage volume control messages) are documented. "ICG" prefixed messages from the mass storage control table create program and the mass storage control trace report programs are documented.

Manual, 100 pages  
//30/3850,3851/5741,5752,5652

## GC38-1001

OS/VS1 SYSTEM MESSAGES (CURRENT RELEASE)

This manual is the basic manual of the message library for OS/VS1 systems. It contains messages for most system control program functions, including scheduler, supervisor, data management, system generation, and checkpoint/restart.

VS1 System Messages, when used with other appropriately chosen message library publications, enables effective use of VS1 messages. For messages documented, it contains pertinent data about:

- o an expanded explanation of the message text,
- o the resulting action of the system,
- o the response required of the operator and/or programmer,
- o and how to obtain the information necessary for problem determination.

It is written for operators, programmers, system support personnel - anyone who responds to system messages.

Manual, 400 pages  
//40//5652

## GC38-1003

OS/VS1 SYSTEM CODES

This publication lists the system completion codes and wait state codes for VS1.

Each code is explained, and where appropriate, a programmer response is suggested.

Problem determination actions accompany problem identifying codes.

Manual, 72 pages  
//40//5652

## GC38-1007

OS/VS LINKAGE EDITOR AND LOADER MESSAGES

This publication lists, explains, and suggests appropriate responses for the messages issued by the OS/VS linkage editor and loader programs. The messages are grouped by component and listed in alphanumeric order.

The associated publication is OS/VS Linkage Editor & Loader, GC26-3813

Manual, 21 pages  
//31//5741,5652,5752

## GC38-1008

OS/VS2 MESSAGE LIBRARY: VS2 SYSTEM CODES (CURRENT RELEASE)

This publication lists, explains, and suggests appropriate responses for the system completion codes and wait state codes issued by IBM-supplied components of OS/VS2 MVS, Release 3.8. The codes are presented in alphanumeric order.

This publication includes the following Selectable Unit information:

Supervisor Performance #1	VS2.03.805
Supervisor Performance #2	VS2.03.807

OS/VS1 RES RTAM AND ACCOUNT MESSAGES

This book is intended for users of RES (Remote Entry Services) under VS1. The book contains messages produced by RTAM (Remote Terminal Access Method) and by the account facility. The messages are presented in message number order. In addition to the text of the message, an explanation of it is given together with the action the system takes and the expected response, if any, of the operator and/or programmer.

This book is part of the Message Library and need be included in the library only when RES is used.

Manual, 80 pages

## GC38-1047

OS/VS SYSTEM MODIFICATION PROGRAM MESSAGES AND CODES

This is a new publication which lists the SMP messages and Return codes for use with the OS/VS System Modification Program Release 4. Included in this publication is the chapter titled "SMP Diagnostic Techniques" formally Chapter 5 of OS/VS SMP System Programmer's Guide GC28-0673-5.

This publication is designed to assist the user of the OS/VS System Modification Program, by having all references to problem solving easily accessible within a smaller support manual.

Manual, 8 1/2 x 11 inches, 116 pages, 9/80  
//40//5752,5741,5652

## GC38-1101

OS/VS1 ROUTING AND DESCRIPTOR CODES (CURRENT RELEASE)

This publication lists the routing and descriptor codes of OS/VS1 messages as they are assigned by IBM. Most messages in the system are issued by the WTO and WTOR macro statements, which have routing and descriptor code parameters.

This is a reference publication for a limited and specific audience: those who wish to alter the code assignments. It can be helpful, for example, to the user whose system has multiple console support (MCS) and who is rerouting messages to certain consoles.

In this manual, message identifiers (IDs) are listed in alphanumeric order; message texts are not given. Descriptor codes appear to the left of the message IDs, and the routing codes to the right.

For additional information like message texts and explanations, you must refer to other publications in the OS/VS Message Library.

Manual, 30 pages, 11/76  
//40//5741,5652

## GC38-1102

MVS/370 ROUTING AND DESCRIPTOR CODES (CURRENT RELEASE)

This publication documents the routing and descriptor codes assigned by IBM programming to OS/VS2 MVS messages through WTO/WTOR macro parameters. The message IDs are presented in alphanumeric order.

This publication includes the following Selectable Unit information:

## SC38-2002

VIDEOTEK/370 VERSION 2 INSTALLATION & ADMINISTRATION GUIDE

This publication presents a complete, detailed procedure for installing Videotex/370 Version 2 from the PID tape; adequate information for the systems administrator to control and manage the Videotex/370 Version 2 resources and adequate information for the group administrator to create and maintain end user and information provider profiles and user groups.

The installation task assumes that Videotex/370 Version 2 is to be installed on an existing CICS/OS/VS system. The steps in installing Videotex/370 Version 2 include unloading the JCL library, defining VSAM files, loading Videotex/370 Version 2 VSAM files, loading Videotex/370 Version 2 load and source libraries, installing the messaging service, customizing Videotex/370 Version 2, installing JCL for informational services, configuring SNA and X.25 networks, defining the CICS/OS/VS environment and verifying the installation.

Manual, 254 pages, 09/86  
////5798-DZD

## SC38-2003

VIDEOTEK/370 VERSION 2 INFORMATION PROVIDER'S GUIDE

This publication is intended for Videotex/370 Version 2 information providers who create and maintain informational and transactional services for Videotex/370 Version 2 end users. It incorporates both general information on designing services for Videotex/370 Version 2, and specific information on creating informational and transactional services using Videotex/370 utilities.

An information provider involved in creating an informational service does not need CICS/OS/VS programming knowledge, but does need to be able to use an editor or system utility to create a file. An information provider creating a transactional service is assumed to be able to write CICS/OS/VS command level applications.

Manual, 289 pages, 09/86

SUPPLEMENT FOR MVS/SE, 5740-XE1 RELEASE 2, TO SYSTEM  
INITIALIZATION & TUNING GUIDE, 6C28-0681-3

MVS/System Extensions does not support system activity measurement facility (MF/1) and dynamic support system (DSS). All references to MF/1 including "Part 4: How to use System Activity Measurement Facility (MF/1)", have been deleted. In addition, the section, "Changes to Initialization Parameters" found in Part 2 has been deleted. For a list of parameters that have changed or that are no longer supported, see VS2 Conversion Notebook, 6C28-0689-4. The following is added in support of MVS/System Extensions:

- o The ALT parameter is added to identify an alternate nucleus.
- o A new member (IECIOSxx) is added to SYS1.PARMLIB to provide installation control of channel selection algorithms.
- o Changes to SYS1.PARMLIB member IEAIPSxx provide installation control of:
  - SRB execution time included in the service definition.
  - Target multiprogramming levels by specifying target control keywords.
  - Dispatching priorities including: Automatic Priority group (APG) function, fixed, rotate, and mean-time-to-wait groups, and time slicing.
  - I/O requests that are deferred on a logical channel.
- o Demand (logical) swapping is added as a resource use function of the SRM
- o Maintenance changes are included throughout the publication.

This supplement provides updated information to support MVS/System Extensions Release 2 as follows:

- A new SYS1.PARMLIB member IEAICSxx, which provides a central place for assigning performance groups.
- Addition of many internal SRM constants to the IEAOPTxx SYS1.PARMLIB member.
- Improvements in resource control:
  - Storage isolation
  - Selectivity of Storage, CPU, and I/O load balancers
  - Extended I/O priority queuing
  - TSO response time objective

Manual, 8 1/2 x 11 inches, 248 pages, 5/79

////5740-XE1

SD23-0005

SUPPLEMENT FOR MVS/SE, 5740-XE1 RELEASE 2, TO SYSTEM  
MANAGEMENT FACILITIES (SMF), 6C28-2706-1

The changes that support MVS/System Extensions are as follows:

- o Additional fields have been added to the relocate section for Record Types 4 and 34.
- o Relocate sections for job related service data have been added to Record Types 5 and 35.
- o References to the new fields have been added to "Appendix A: Field-to-record Cross-Reference".
- o Changes have been made to "Appendix C: CPU Time".

This supplement provides updated information to support MVS/System Extensions Release 2 as follows:

- Addition of four new records

SD23

type 23 - SMF Status Record  
type 30 - Common Address Space Work Record  
type 32 - TSO User Work Accounting Record  
type 90 - System Status Record

- Addition of a new SMS dump program (IFASMFDP)
- Addition of new parameters to define the use of SMF (SMFPRMxx)
- Addition of the SET SMF and DISPLAY SMF commands
- Addition of a user-exit routine (IFFU84)
- Addition of five new macro instructions to facilitate writing of user-exit routines
- Provide a new direction in billing (transaction billing)
- SMF recording is now done on VSAM data sets

Manual, 8 1/2 x 11 inches, 236 pages, 5/79  
///5740-XE1

SD23-0006

SUPPLEMENT FOR MVS/SE, 5740-XE1 RELEASE 2, TO SUPERVISOR, GC28-0608-3

This supplement to SPL Supervisor includes the following changes in support of MVS/System Extensions:

- o The addition of four new macro instructions.
  - INTSECT - Intersect with the dispatcher.
  - PGFIXA - Fast path to fix virtual storage contents
- o PGFREEA - Fast path to free virtual storage contents
- o PROTPSA - Disable or enable low address protection
  - o The RPSGNL macro instruction has been changed to add the MEMSMT parameter.
  - o The SCHEDULE macro instruction has been changed to add the LLOCK, FRR, CLEAR, COMPAT, and DISABLED parameters.
  - o The SETLOCK macro instruction has been changed to support additional specifications for the TYPE parameter.
  - o The STATUS macro instruction has been changed to support additional specifications for the SRB parameter.
  - o The RESUME macro instruction has been changed to support a conditional/unconditional RESUME.
  - o Locking- changes have been made in the functions of the Global dispatcher lock (DISP) and the general cross memory services lock (CMS). A new lock, ENQ/DEQ cross memory services lock (CMSEQDQ), has been established.

This supplement to SPL Supervisor includes the following changes in support of MVS/System Extensions Release 2.

- Addition of the SMF cross memory services lock (CMSSMF)
- Addition of a description on using the SRM reporting interface
- Addition of the SYSEVENT macro instruction

Manual, 8 1/2 x 11 inches, 116 pages, 5/79

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LD23-0191

SUPPLEMENT FOR MVS/SP, 5740-XYN, -XYS, TO SYSTEM LOGIC VOLUME 7, SY28-0719-2  
This supplement contains new and updated module descriptions for modules added or changed by MVS/System Product 5740-XYN, -XYS.  
Manual, 8 1/2 x 11 inches, 5/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LD23-0192

SUPPLEMENT FOR MVS/SP, 5740-XYN, -XYS, TO SYSTEM INITIALIZATION LOGIC, SY28-0623-2  
This supplement documents initialization logic changes required to support the following MVS/System Product (5740-XYN) features:

- Improved SMF data selection, collection, and recording; new facilities for functional accounting
- Improved SRM control and reporting mechanisms and easier usage of certain SRM capabilities
- An action message retention facility
- An event notification facility
- Dynamic path selection for online devices

Manual, 8 1/2 x 11 inches, 5/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LD23-0203

JES3, 5740-XYN, LOGIC LIBRARY VOLUME 7  
This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

GD23-0204

SUPPLEMENT FOR MVS/SP, -XYS, TO SMF, 6T28-1030-0  
This is a supplement for the item named in the title.

## LD23-0377

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 1

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11 inches, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SD23

## LD23-0378

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 2

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11 inches, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LD23-0379

MVS/XA JES3 LOGIC LIBRARY VOLUME 6

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11 inches, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LD23-0380

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 7

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
Manual, 8 1/2 x 11 inches, 06/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LD23-0381

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 9

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LD23-0382

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 10

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
System Library Supplement, 8 1/2 x 11 inches, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LD23-0383

MVS/XA, 5665-291, JES3 LOGIC LIBRARY VOLUME 11

This Supplement adds information for the JES3 SNA/NJE Enhancement which supports MVS/BDT Version 2.  
Manual, 8 1/2 x 11 inches, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LD23-0384

(BASE: SY28-0650-4; SUPPLEMENT NUMBER: LD23-0384-0) OS/VS; TSO TERMINAL MONITOR PROGRAM AND SERVICE ROUTINES LOGIC TSO/EXTENSIONS (TSO/E)

This publication contains changes to Phase 2 CLIST processing, replaces IKJCT438 with IKJCTJBL and adds LISTDSI CLIST statement information.  
System Library Supplement, 8 1/2 x 11 inches, 04/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SD23-9000

SUPPLEMENT FOR VM/SE (SEPP), 5748-XE1, TO INTRODUCTION, GC20-1800-9

This publication serves as an introduction to the VM/370 System Control program. It is intended for anyone interested in VM/370. However, readers should have a basic understanding of IBM data processing.

This publication briefly describes the four components that comprise the VM/370 system; namely:

- CP (Control Program)
- CMS (Conversational Monitor System)
- RSCS (Remote Spooling Communications Subsystem)
- IPCS (Interactive Problem Control System)

Manual, 8 1/2 x 11 inches,  
///5748-XE1

SD23-9002

SUPPLEMENT FOR VM/SE (SEPP), 5748-XE1, TO OPERATOR'S GUIDE RELEASE 6, GC20-1806-9

This supplement contains replacement pages for VM/370 Operator's Guide to support VM/370 System Extensions. Manual, 8 1/2 x 11 inches, 136 pages, 6/79 ///5748-XE1

SD23-9003

SUPPLEMENT FOR VM/SE (SEPP), 5748-XE1, TO PROGRAMMER'S GUIDE, GC20-1807-7

Provides the detailed information the system programmer needs to understand and use Release 2 of the VM/370 System Extensions Program Product. This publication, which supplements the IBM Virtual Machine Facility/370: System Programmer's Guide, discusses:

- How VM/370 preserves virtual storage when a virtual machine becomes inoperative
- Changes the method that VM/370 uses to manage the real processor
- Changes to the favored execution performance option
- Changes to the information that the INDICATE command provides
- Support for writing accounting records to disk and spool files to tape
- Support that expands a virtual machine's capability to control a 3270 display screen
- Requirements for using CMS/DOS tape label processing
- Support for fixed-block storage devices
- Support of the small-CP option
- Changes to the CMS file system
- Support for the 3289 Model 4 printer
- Multiple shadow-table support
- MVS/System Extensions support
- Dynamic SCP transition to or from native mode
- Single processor mode

Prerequisite Publication: IBM Virtual Machine Facility/370: System Programmer's Guide, GC20-1807. Manual, 8 1/2 x 11 inches, ///5748-XE1

VIRTUAL MACHINE/SYSTEM PRODUCT END-USER SOFTWARE SUPPORT SYSTEM SUPPLEMENT TO VM/SP SYSTEM MESSAGES AND CODES

This supplement is intended for users of the VM/SP End-User Software Support System.

It contains messages that are new or changed from VM/SP Release 4.  
Manual, 8 1/2 x 11 inches, 5 pages

SD25-0600

SUPPLEMENT FOR S/VS1 MVS PROCESSOR SUPPORT, 5752-851 TO SYS1.LOGREC ERROR RECORDING LOGIC, SY28-0678-4

This publication is intended for the IBM programming service representative, installation programmer, and others involved in using EREP.

The disk initialization program (IFCOIP00) reads MCH and CCH edit format information, formats it into MCF and CCF "frame" records, and writes the records on SYS1.LOGREC.

This publication supports OS/VS2 MVS SYS1.LOGREC ERROR RECORDING LOGIC, RELEASE 3.7, SY28-0678-04.  
Manual, 8 1/2 x 11 inches, 32 pages, 11/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GD25-0601

SUPPLEMENT FOR SU51 MVS PROCESSOR SUPPORT, 5752-851 TO SYS1.LOGREC ERROR RECORDING LOGIC, GC28-0677-4

This publication is intended for system operation, programmers and administrators involved in using EREP.

The intent of the Processor Support is to allow machine check (MCH) and channel check (CCH) records to be formatted properly without EREP having knowledge of the EC level, format, or data content logout.

This publication supports OS/VS2 MVS SYS1.LOGREC ERROR RECORDING, GC28-0677-04.

Manual, 8 1/2 x 11 inches, 20 pages, 11/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SD25-0602

SUPPLEMENT FOR SU20 3031, 3032, 3033 PROCESSOR SUPPORT, 5741-620 TO VS1 SYS1.LOGREC ERROR RECORDING, SY28-0669-3

This publication is intended for the IBM programming service representative, installation programmers, and others involved in using EREP.

The disk initialization program (IFCDIP00) reads MCH and CCH edit format information, formats it into MCF and CCF "frame" records, and writes the records on SYS1.LOGREC.

Manual, 36 pages, 3/78  
////5741-620

GE20-0312

PREFACE TO PL/I PROGRAMMING IN SCIENTIFIC COMPUTING

In a brief and simple manner, this manual:  
-Lists some problems arising in industry, business, science, and engineering  
-Survey the mathematical, statistical, and operations research (OR) by which these problems are solved  
-Tells how a few of such techniques and models are programmed for computers using the PL/I language  
The major portion of the manual concentrates on PL/I. The essentials are brought out mostly by the many short examples and the summary exhibits.  
Manual

3895 DEPOSIT PROCESSING SYSTEM INPUT CONTROL PROCEDURES

This publication describes the personnel training and document flow activities necessary to achieve optimum throughput with the IBM 3895 Document Reader/Inserter. The manual is divided into four parts.  
• Input Control Requirements  
• Teller Education  
• Large Commercial Account Education  
• Input Preparation  
The appendixes contain a suggested class outline for teller training, forms for analyzing large commercial accounts, and an input preparation section.  
This manual assumes the reader has a basic understanding of bank data processing operations.  
Manual, 42 pages, 4/78  
//04/3895/

GE20-0633

3895 DEPOSIT PROCESSING SYSTEM WORKSTATION PROCEDURES

This publication is intended to be used as a guide by those preparing workstation procedures and developing training tools for personnel who will perform the deposit processing activities at each workstation. It is organized by task and should be used in conjunction with related program product publications, machine operator guides and user bank materials. The user bank should set up up its own procedures and publications for the workstation operators and supervisors, since internal bank systems and procedures vary from bank to bank.

Manual, 78 pages, 01/79  
//04/3895/

GE20-0731

ORGANIZING AND MAINTAINING A SYSTEM LIBRARY

This publication presents guidelines for setting up, organizing, and maintaining IBM system libraries. The intended audience is the customer librarian, who may be a secretary or other administrative person, a programmer, or someone with a degree in library science. This guide should also be useful to anyone needing information on publication ordering and distribution in IBM.

Manual, 8 1/2 x 11 inches, 26 pages, 3/82

3694 DOCUMENT PROCESSOR: A GUIDE TO CREATING WORKSTATION AND HOST OPERATIONS RUNBOOK PROCEDURES

This manual provides information that can be used by 3694 operations personnel in the day-to-day 3694 operation, and also serves as a learning tool for new operators. The document attempts to standardize those repetitive steps that are required in running the various 3694 applications (workstation and host) so that a user can easily create customized run book procedures.

Manual

GE20-0760

3694 DOCUMENT PROCESSOR: A GUIDE TO IMPLEMENTING AND INSTALLING

This manual contains information needed to plan a 3694 installation in either a CHX/GS or a CHX/VS (OS or DOS) environment. It should be utilized during planning sessions to develop the associated plans and tasks for the 3694 installation.

Manual  
//04/3694/

GE20-0765

3694 DOCUMENT PROCESSOR SORTING APPLICATIONS GUIDE

This document is intended to help users take advantage of the advanced sorting techniques possible with the 3694 system. Included in the manual are concepts and techniques of fine sorting, cycle sorting, bulk filing, and statement sorting as well as considerations for the implementation of a bulk filing system using the 3694.

Manual, 06/83

VSI TO MVS CONVERSION PLANNING GUIDE

The installation planning information contained in this bulletin can be helpful in assisting a VSI account to define and develop a VSI to MVS conversion plan. Areas such as justification, staffing, education, SCP incompatibilities, and MVS implementation are addressed. Copies from two foil presentations addressing conversion planning are provided with the technical bulletin. This publication is a component of GBOF-2208.

Technical Bulletin, 8 1/2 x 11 inches, 68 pages, 02/78

6622-9023

AN MVS TUNING PERSPECTIVE

There are several requirements to be effective in tuning MVS. Among them are knowledge of MVS operation, knowledge of the particular system to be tuned, and tuning experience. This paper addresses the latter skill; experience. It does so by sharing with the reader the tuning experiences of the DP Washington Systems Center

staff. Specifically this paper is intended to:

1. Provide an approach to tuning an MVS system
2. Suggest actions MVS installations can take to manage performance.

This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 124 pages, 05/80  
 //34//5752

6622-9048

OS/VS VSAM RECOVERY GUIDE

This document provides a guide to recovery for VSAM catalogs and datasets. The emphasis is on planning a strategy for backup and recovery so that recovery can be performed in a controlled fashion.

Technical manual, 8 1/2 x 11 inches, 80 pages, 7/80

6622-9050

MSS CAPACITY PLANNING

This bulletin is intended to provide technical understanding of performance and capacity planning for the MSS subsystem. Included are the various factors which would be monitored, as well as the tools and data which can be used. Also included are appropriate guidelines where applicable.

Technical bulletin, 8 1/2 x 11 inches, 60 pages, 6/80

6622-9054

CONSIDERATIONS FOR INSTALLING S/34 IN AN IMS/VS AND JES2/RJE SNA ENVIRONMENT

This publication provides information and guidance in the use of System/34 in a Distributed Data Processing (DDP) Information Management System (IMS) and Job Entry System 2 (JES2) network based upon the Systems Network Architecture (SNA). It identifies considerations and requirements for network implementation based upon an actual installation experience. It is intended for use by those who are involved in planning or installing the System/34 in an IMS and JES2 environment. The information is presented from an implementation standpoint with the intent of consolidating available product specific documentation into a self-contained reference document. This publication is a component of GBOF-2207.

Technical Bulletin, 8 1/2 x 11 inches, 140 pages, 03/82  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9200

JES3 A PRIMER

This publication is designed to serve as a learning aid for those who have a need to expand their knowledge of JES3 and its relationships to MVS. The most valuable use of this material will be a supplementary text for the standard JES3 Courses offered by the Advanced Education Centers.

This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 100 pages, 06/80

6622-9209

3081 PROCESSOR IOCP AND CHANNEL CONFIGURATION

This publication provides information on the Input/Output Configuration Program (IOCP) and process as it pertains to the 3081 Processor Complex. The purpose is to provide material (visuals and script) for use in IOCP education and to provide additional information on channel configuration and operation in an MVS operation environment. Much of the information in this technical bulletin relative to the IOCP program is also applicable to the VM/SP environment. The technical bulletin does discuss, at a high level, the VM/SP copy of the IOCP program. It does not address the VM/SP IOCP program in detail nor does it address VM/SP operation on a 3081 Processor. Detailed information about the VM/SP IOCP program can be found in the VM/SP IOCP User's Guide and Reference Manual (6C20-1843). This publication is a component of GBOF-2208.

Technical Bulletin, 8 1/2 x 11 inches, 168 pages, 07/82

THE JES2 CHECKPOINT MECHANISM

This document is derived from a presentation by the author to Guide. It discusses the history of the checkpoint function and its implementation in JES2.

This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 01/81  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9222

MVS/SYSTEM PRODUCT RELEASE 1 INSTALLATION GUIDE

The purpose of this document is user guidance in the installation of MVS/SP Release 1 and selected related products. It supplements the information contained in the program directory.

Technical bulletin, 8 1/2 x 11 inches, 2/81

6622-9224

MSS RECOVERY HANDBOOK

This publication contains a description of the MSS hardware, MSS tables and the MSVI dataset. Additionally, there is an MSS problem determination overview, a

discussion of MSS recovery techniques and a list of tools and techniques used for MSS recovery. There is a detailed description of Schedule Queue Blocks and Queue Control Blocks with many figures. The appendices to this bulletin contain a list of MSVIZAP examples that have been used to recover from common MSVI problems, a collection of control blocks, QCB addresses and MSS order IDs for reference. This publication is a component of GBOF-2214.  
 Technical Bulletin, 8 1/2 x 11 inches, 64 pages, 07/86

6622-9228

RECOVERY OF RACF IN PROTECTED SYSTEMS  
 This publication provides information on procedures and techniques to recover from a situation where the RACF dataset is unavailable for whatever reason rather than situations where individual RACF profiles are unavailable. Techniques for recovery of individual profiles are covered in the Installation Reference Manual for RACF. The procedures described in this publication were tested in a controlled environment meant to typify a production environment as nearly as practicable. This publication is a component of GBOF-2208.  
 Technical Bulletin, 44 pages, 06/81  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9229

PLANNING FOR A NEW CATALOG ENVIRONMENT WITH DATA FACILITY EXTENDED FUNCTION  
 This publication provides information and guidance useful in designing and implementing an improved MVS catalog environment using the Integrated Catalog Facility (ICF) of Data Facility/Extended Function (DFEF). It is structured following an orderly approach for understanding and addressing the considerations and tasks associated with improving the system cataloging facilities for an MVS installation, independent of the products actually being used. The facilities of Data Facility/Extended Function in addition to ICF, namely the Virtual Storage Access Method (VSAM) enhancements, are not discussed. This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 76 pages, 06/81  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9231

CROSS MEMORY SERVICES USER'S GUIDE  
 This publication describes the Cross Memory Services provided by MVS/SP Release 2. It is primarily intended for systems programmers who need to understand how the Cross Memory Services work. In addition, it will assist systems programmers planning to develop subsystems which use cross memory functions. This publication is a component of GBOF-2208.  
 Technical Bulletin, 148 pages, 06/81  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9234

PERFORMANCE OF JES3 MULTITASKING WRITER SUPPORT IN MVS/SP-JES3  
 This publication provides performance data concerning the multitasking writer support in the JES3 component of MVS/SP-JES3 1.3.1 (referred to as JES3 1.3.1). This data should be used for planning purposes only. All data was collected in a laboratory environment using a combination of two standard job streams. While these job streams attempt to produce an accurately measureable and repeatable load, they may not be typical of a particular installation. The amount of multiprocessor (MP) exploitation will depend on user configuration and the nature of the user's workload. This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 28 pages, 02/82

 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9250

MVS/SP RELEASE 3 INSTALLATION CONSIDERATIONS  
 This publication is designed to aid in planning for the transition to MVS/SP Release 3. MVS/SP Release 3 includes all of the MVS/SP Release 2 features, plus additional enhancements. The publication documents the MVS/SP Release

2 function as though they were new with Release 3. It is not intended to be a complete reference on the features and functions of the MVS/SP Release 3 product; that detail is available in the standard product documents available with the product. The publication identifies those features of the product of specific interest in a transition and presents a suggested installation plan which can be tailored to an individual account. This publication is a component of GBOF-2208.

GG22-9251

GLOBAL RESOURCE SERIALIZATION CONSIDERATIONS

This publication assists users with the planning and implementation of Multi-System Global Resource Serialization (MS/GRS) function of Multiple Virtual Storage System Product (MVS/SP) Release 3.1. It is not intended to be a complete description of the functions and features of Multi-System Global Resource Serialization, as that information can be found in standard product documents. This publication discusses the considerations that should be addressed during the implementation of the multi-system function. It also includes a suggested implementation plan which can be tailored to an individual account. This publication is a component of GBOF-2208.

6622-9277

VM/370 MAINTENANCE MADE SIMPLE

There seem to be many misconceptions regarding the generation and maintenance of VM/CMS systems. Simplicity has always been the hallmark of VM/370. Many of the problems arise from new users imagining that the processes must contain a certain complexity which simply is not there. Much of the imagined complexity has doubtless been caused by the many procedures and EXEC's which have been developed over the years in an effort to simplify the generation and maintenance process. And while they do, indeed, provide valuable and time-saving tools to the initiated, they tend to obscure the basic processes from the struggling novice. This publication tries to clarify the process. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 48 pages, 06/82

MSS CAPACITY PLANNING CONSIDERATIONS

This Technical Bulletin contains a copy of a foil presentation given at SHARE 59, August, 1982, and a script which closely approximates the presentation. The presentation discusses MSS Capacity Planning tasks, the collection and analysis of a significant RMF and MSS Trace data, MSS performance Guidelines and rules-of-thumb and possible solutions to some MSS capacity problems. This publication is a component of GBOF-2214. Technical Bulletin, 8 1/2 x 11 inches, 64 pages, 12/82

GG22-9302

WHY GO TO MVS/XA?

The need for S/370 Extended Architecture will be examined from the perspective of the configuration and operating system requirements of the large processor environment of the 1980s. Illustrations will be drawn from the recent evolution of, and trends in, the large systems environment. The benefits of an MVS/XA system will be discussed, together with the factors that contribute to compatibility, migration and coexistence between MVS/370 and MVS/XA. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 88 pages, 12/82

GG22-9305

MVS/XA 31 BIT ASSEMBLER PROGRAMMING

MVS/370 has 16 Megabyte (Mb) address spaces requiring 24 bits of addressability. MVS/XA supports address spaces as large as 2 gigabytes (2,147,483,648). This requires 31 bits of addressability. While 31 bit assembler language programming is very similar to 24 bit assembler language programming, some updating is necessary to successfully use

this new function. This tutorial discusses the techniques for writing assembler language programs that will execute in 31 bit mode on MVS/XA. The following topics are discussed: when to write 31 bit assembler language programs, compatibility with MVS/370, coexistence in a mixed MVS/370-MVS/XA installation, new terminology, new and changed instructions, linkage conventions, I/O in MVS/XA, and MVS/XA support. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 104 pages, 01/83

USING DATA FACILITY DEVICE SUPPORT EXITS FOR DASD SPACE MANAGEMENT ASSISTANCE

This document discusses use of the DADSM and OPEN exits provided by the Data Facility Device Support (5740-AM7) to assist in a number of specific DASD space management activities. The objective is to automate control over certain DASD space-related JCL and DCB parameters. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 84 pages, 12/82

GG22-9307

NETWORK PERFORMANCE MANAGEMENT FOIL PRESENTATION

Network Performance Management (NPM) is a cyclical process aimed at controlling the performance of a communications network; it applies to the planning, development, and operational phases of network installation and use. This document describes an approach to this discipline using standard software products, (NPA, NETPARS, VTAMPARS II, TPNS), combined with some suggested techniques based on capabilities of these products. Managers, system programmers, and analysts who have responsibility for managing the performance of a communications network should benefit from this document. This publication is a component of GBOF-2206. Technical Bulletin, 8 1/2 x 11 inches, 88 pages, 3/83

GG22-9308

3380 DASD FEATURES INSTALLATION AND CONVERSION

This publication is designed to help in installing and using 3380 DASD. It includes sections on what 3380 is, what is needed to install it and some ideas on what and how to convert data to the 3380. There is also an extensive write-up on what Dynamic Path Selection is, how it functions and what operational procedures should be followed in using this feature. This publication is a component of GBOF-2214. Technical Bulletin, 8 1/2 x 11 inches, 104 pages, 08/83

GG22-9309

MSS TABLE MAINTENANCE PROGRAM USER'S HANDBOOK

This Technical Bulletin is a republished version of the Washington Systems Center Technical Bulletin, MSS Microcode Release 7 and Table Maintenance IUP Update, 6622-9039. This Technical Bulletin is no longer available. This User's Handbook contains the same TMP information as the original, with some minor editing. The outdated MSS microcode information was removed. This Bulletin describes the functions contained in the MSS Table Maintenance Program (TMP), 5796-PHY. It is intended to be a user's guide for the TMP describing the commands and parameters available, and examples of their use. The bulletin contains MSS microcode release-dependent information about the MSC Table Maintenance Program, examples of interpretation of MSC Tables, and sample sessions for MSS problem determination

and recovery.

This publication is a component of GBOF-2208.

**3814 SWITCHING MANAGEMENT SYSTEM ENHANCEMENTS UPDATE**  
 This bulletin supersedes the previous 3814 Switching Management System (SMS) Enhancements bulletin (6622-9313). The first bulletin was based on early specifications. This one has been written using the microcode level that was available at General Availability. Most of the changes are in the 3278 panels. It is less confusing to publish a new manual rather than distribute updates to all the panels in the first bulletin.  
 This publication is a component of GBOF-2208.  
 Technical Bulletin, 8 1/2 x 11 inches, 84 pages, 05/83

6622-9318

**SO YOU WANT TO ESTIMATE THE VALUE OF AVAILABILITY**  
 This publication provides a series of ideas and exercises to help estimate the value of Information Systems Availability. Nine exercises are included. They are designed to define information systems services, users, value, outage cost, and component cost. Completion of these exercises can be done several ways. The first method is using a traditional work session, with appropriate managers and professionals. Another way is to gain group consensus using the Delphi Technique of estimation. Background information and suggestions for utilization of this technique are included.  
 This publication is a component of GBOF-2211.  
 Technical Bulletin, 8 1/2 x 11 inches, 80 pages, 04/83

6622-9319

**PAGING IN VM/SP**  
 The aim of this paper is to explain the paging and real storage management algorithms of VM/SP, and to show how to measure them. This paper should leave the reader with an understanding of what paging resources are needed to build a "balanced" VM system. The CPU is but one resource of the VM system and many times is constrained by the paging, storage and Input/Output systems mentioned here.  
 This publication is a component of GBOF-2208.

6622-9315

**USING APL WITH ADRS II**  
 This Technical Bulletin illustrates the extensibility of ADRS II through the use of APL. The ADRS II user can make use of available APL functions as well as writing his own. This publication is divided into two parts. PART I contains tips and techniques for developing ADRS II applications by making use of APL. PART II contains a set of APL functions which have general utility value in the ADRS II environment. These functions are listed along with examples showing their use. These functions can be considered as candidates for being placed in a public workspace in an ADRS II installation, thereby making them available to all users in an installation. This public workspace could be viewed as a 'TOOLKIT' accessible to all of the ADRS II users in an installation.  
 Technical Bulletin, 8 1/2 x 11 inches, 124 pages, 07/83

6622-9322

**MVS/SP-JES2 1.3.3 MVS/SP-JES2 2.1.1 JES2 MIGRATION CONSIDERATIONS**  
 This technical bulletin is designed to aid in planning for the installation of, and migration to, the JES2 component of MVS/SP Version 1 Release 3 Modification Level 3. (This is also the same level of JES2 in MVS/SP JES2 2.1.1.) It is not intended to be a complete reference on all the features of JES2; that information can be found in the standard documents available with the product. This document identifies those features of specific interest in a transition to the new JES2 component from the previous version of JES2 (MVS/SP 1.3.0). The 1.3.0 version of JES2 is the same JES2 found in 1.3.1 and 1.3.2. Included in the appendices are a foil presentation of the new JES2, plus an overview of the new Scheduler JCL Facility.  
 This publication is a component of GBOF-2208.

6622-9317

**PROBLEM AND CHANGE MANAGEMENT USING INFORMATION/MANAGEMENT**  
 This publication aids the installation wanting to use the Information/Management Feature of the Information/System Product as a tool for Systems Management.  
 This publication is a component of GBOF-2211.  
 Technical Bulletin, 8 1/2 x 11 inches, 104 pages, 04/83

6622-9325

**COMPARISON OF MVS/SP VERSION 1 RELEASE 3 (MVS/370) TO MVS/SP VERSION 2 RELEASE 1.0 (MVS/XA) ON THE 3081K**  
 This document compares the performance of MVS/System

GG22

ProductVersion 1 Release 3 (MVS/SP 1.3) to MVS/System Product Version 2 Release 1 (MVS/SP 2.1) on a 3081K. Most major subsystems were measured: Batch, CICS/VS, IMS/VS, TSO/ISPF. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 128 pages, 06/83 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9326

SYSTEM/NETWORK MANAGEMENT TOOLS PLANNING AND IMPLEMENTATION CONSIDERATIONS

This document is intended to aid in the planning process for System/Network Management (S/NM) tools. It discusses considerations for defining tool requirements and provides information which can be used in identifying a complementary set of tools which can assist in performing S/NM related activities. The document contains both planning and technical level information. The planning information focuses on defining requirements, performing tools evaluation, selection and implementation planning. Technical information is related to techniques for controlling and managing the system/network environment and descriptions of specific product capabilities. This publication is a component of GBOF-2211. Technical Bulletin, 8 1/2 x 11 inches, 116 pages, 08/83 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9327

3088 INSTALLATION CONSIDERATIONS

This document is designed to provide assistance to those individuals responsible for the configuration and installation of the IBM 3088 Multi-system Channel Communication Unit. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 72 pages, 04/83 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9328

VM/SP RELEASE 2 PERFORMANCE

VM/SP Release 2 contains many enhancements, both in added function and in usability. Anytime additional function and usability enhancements are made to a software product there is the possibility that the performance of the product will suffer. There has been an effort made to minimize the effect on performance of the additional function included in VM/SP release 2. In general, VM/SP Release 2 is more storage constrained than VM/SP Release 1 and will degrade in storage/paging constrained environments. Unconstrained environments should show negligible performance differences between VM/SP Release 1 and VM/SP Release 2. This publication is a component of GBOF-2209. Technical Bulletin, 8 1/2 x 11 inches SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9332

MVS/XA PLANNING GUIDE

This technical bulletin is designed to aid in planning for the implementation of MVS/Extended Architecture (MVS/XA). It is not intended to be a complete reference on all the features of MVS/XA; that information can be found in the standard documents available with the product. This document is intended for MVS systems programmers, systems analysts, IBM Systems Engineers, or anyone having the project planning responsibility for implementing MVS/XA. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 116 pages, 05/83 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9333

MVS/SP JES2 1.3.4 MVS/SP JES2 2.1.2 JES2 MIGRATION CONSIDERATIONS

This document contains an overview of the features provided in MVS/SP JES2 1.3.4 (or MVS/SP JES2 2.1.2) and describes the considerations required to migrate to this release from MVS/SP JES2 1.3.3 (or MVS/SP JES2 2.1.1). Installations migrating to this version of JES2 from versions other than JES2 1.3.3 should consult the following additional publications: GG22-9250, MVS/SP Release 3 Installation Considerations, GG24-1534, JES2 Guide for MVS System Product Rel. 2 and 3 and GG22-9322, MVS/SP JES2 1.3.3 MVS/SP JES2 2.1.1 JES2 Migration Considerations. The primary audience for this publication is assumed to be MVS systems programmers responsible for the installation, maintenance and migration of the JES2 component of MVS/SP. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 124 pages, 08/84 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9334

8100/DPPX/PDA WITH NPDA NETWORK MANAGEMENT TOOLS

This bulletin provides a description of the Network Problem Determination Application (NPDA) Version 2 support available for the 8100 DPPX system with the DPPX/Problem Determination Application (DPPX/PDA, Program 5660-272). This bulletin is based on experience with NPDA Version 2, DPPX level 801, and DPPX/PDA level 100. Many of the examples in this document show sample NPDA screens. The audience for this bulletin includes those who are already using NPDA and need to add 8100 capability, or 8100/DPPX skilled people who need to know more about the use of NPDA in enhancing central site network management. Operations staff who are users of NCCF/NPDA in support of 8100/DPPX networks typically do not need to know all of the detailed information presented in this book. They should however, become familiar with NPDA alerting facilities, screen flows, commands, and resource naming conventions. Technical Bulletin, 8 1/2 x 11 inches, 60 pages, 08/83 SLSS: ORDER NO. SUBSCRIPTION ONLY

3880 MODEL 13 PERFORMANCE MEASUREMENTS

This publication presents the results of performance measurements made at five installations with 3880 Model 13's in production. Results from two TSO installations, two IMS/VS installations and one CICS/VS installation are presented. Comparisons of application-level and I/O sub-system-level performance are made between periods with and without use of the 3880-13 cache. Although a brief description of the 3880-13 is included, it is assumed that readers of this document are familiar with basic 3880-13 operations. This document is intended for use by customer system programmers, Systems Engineers and other technical personnel familiar with I/O performance analysis.

This publication is a component of GBOF-2214.

AVAILABILITY MANAGEMENT PLANNING WORKSHOP LEADERS GUIDE  
This document describes how to lead an Availability Management Planning Workshop. The document contains a general description of the workshop, information on how to conduct the workshop, and foil masters used to lead analysis exercises. The workshop is designed for Information Systems (I/S) executives and their immediate management staff. The workshop focuses on management, rather than technical issues that affect the ability to provide high quality Information Systems services. The workshop materials are designed to be self supporting. This publication is a component of GBOF-2211. Technical Bulletin, 8 1/2 x 11 inches, 76 pages, 02/84 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9354

AVAILABILITY MANAGEMENT PLANNING WORKBOOK  
This document is designed to help managers in planning for availability. The planning focuses on evaluating current management systems relating to quality of service delivery.

It is designed to be used in a workshop with a companion video tape and project guides to address availability requirements. It contains a series of exercises designed to identify areas where management action can improve availability attainment. The output of the exercises is a list of projects for improving areas of organization, process, and tools/techniques related to executing, managing and controlling the I/Service delivery process. The workshop is intended for information systems executives and managers who have responsibility for planning, controlling and managing the service delivery function of an Information Systems Department. This publication is a component of GBOF-2211. Technical Bulletin, 8 1/2 x 11 inches, 80 pages, 02/84 SLSS: ORDER NO. SUBSCRIPTION ONLY

GG22-9355

AVAILABILITY MANAGEMENT PLANNING PROJECT GUIDE PROBLEM MANAGEMENT

This manual was developed as part of an Availability Management Planning Workshop. This workshop is conducted using a video tape for content presentations and a workbook. Problem management is one of the projects that the workshop specifies high level requirements for. To obtain maximum value from this manual and the project it specifies, you should have completed the Availability Management workshop. This manual was written to improve guidance in determining the tasks necessary to build or improve a problem management system. The users of this manual are capacity management system planners. They are doing work on the implementation project conceived in the management planning process. The work product from the first work with this manual is an estimate of the time and resources that will be needed to implement or improve a problem management system. Later use of this manual could be in the management of the problem management system implementation project after resource allocation by the sponsoring executive. This publication is a component of GBOF-2211. Technical Bulletin, 8 1/2 x 11 inches, 64 pages, 02/84 SLSS: ORDER NO. SUBSCRIPTION ONLY

AVAILABILITY MANAGEMENT PLANNING PROJECT GUIDE RECOVERY MANAGEMENT

This manual was developed as part of an Availability Management Planning Workshop. This workshop is conducted using a video tape for content presentations and a workbook. Recovery management is one of the projects that the workshop specifies high level requirements for. To obtain maximum value from this manual and the project it specifies, you should have completed the Availability Management workshop. This manual was written to improve guidance in determining the tasks necessary to build or improve a recovery management system. The users of this manual are recovery management system planners. They are doing work on the implementation project conceived in the management planning process. The work product from the first work with this manual is an estimate of the time and resources that will be needed to implement or improve a recovery management system. Later use of this manual could be in the management of the recovery management system implementation project after resource allocation by the sponsoring executive.

This publication is a component of GBOF-2211.

SYSTEM PRODUCT INTERPRETER REXX EXAMPLES AND TECHNIQUES

This document is intended to acquaint the reader with various techniques for writing EXECs and XEDIT MACROS in the restructured extended executor language (REXX) provided by the System Product Interpreter in VM/SP Release 3. Examples of both EXECs and XEDIT MACROS are provided that demonstrate the structured programming constructs (IF/THEN/ELSE, SELECT, DO/WHILE), built-in functions, recursive execution, and many other features of the REXX language. Also illustrated are various ways to improve the readability of REXX EXECs including indentation styles and methods of providing comments.

6622-9363

DASD EXPECTATIONS THE 3380 3880-23 AND MVS/XA

A balanced system requires the right amount of processor, storage, and I/O to perform its tasks. Of interest here, is the role of I/O. Specifically, the capability of the 3380 family and 3880 Model 23 (3880-23) and the enhancements of the I/O subsystem provided by MVS/XA. Expectations for

these devices will be developed which reflect the improved I/O responsiveness required for good system performance. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 72 pages, 07/85

operate on an 308X or 4381 model group 1 or model group 2 processor unit in extended architecture (370-XA) mode. For the sake of simplicity, hereafter the VM/XA Migration Aid Release 1 will be referred to as the Migration Aid. Although the Migration Aid provides a method to migrate to MVS/XA, it can also be used concurrently as a testing and maintenance facility. The Migration Aid is a VM based product, however its functions may not be equivalent to those in VM/SP.

SNA MULTI-SITE NETWORK PLANNING AND DESIGN

This publication resulted from a project to develop a comprehensive network management plan for a large multi-function, multi-site network. The primary objective was development of a plan to manage multi-site ACF and NJE networks connecting autonomous divisions, each of which had comprehensive systems management plans. The project involved four task teams. This documentation describes the activities and deliverables of one of those teams, the Network Planning and Design team.

PAGING ENHANCEMENTS IN VM/SP HPD 3.4

This document explains the changes in the VM/SP paging subsystem for VM/SP HPD Release 3.4. The motivation and the background for these paging enhancements are discussed. The design of the new paging subsystem is described and contrasted with the old design. Specifically, the following new functions are highlighted: logical and physical swapping, pre-paging, disposable page collection, block paging, N-select, trimming, and moving cursor. The new SET commands and their effects are discussed. The last section of the document discusses some of the things learned in running a prototype of the paging enhancements in a CMS interactive environment. It also answers some configuration questions. Note: The material in this technical bulletin was originally prepared for an oral presentation at SHARE 60.5, Salt Lake City.

6622-9378

HOW JES2 USES SNA FOR RJE AND NJE

This publication is a presentation given to describe how JES2 uses Systems Network Architecture (SNA). It concentrates on JES2 design and initialization statements used to control and define SNA activity; however, some tuning, performance, and problem determination tips are also given. This description is based on MVS/SP JES2 1.3.4; processing for other JES2 releases may be slightly different. The primary audience for this publication is assumed to be MVS and VTAM systems programmers responsible

6622

for the installation, maintenance, and tuning of MVS/SP JES2 NJE networks and MVS/SP JES2 RJE devices. Some of the material may be suitable for those wishing a general overview to NJE and RJE processing in MVS/SP JES2 systems. This publication is a component of GBOF-2208. ACF/VTAM VERSION 3 ACF/NCP VERSION 4 ACF/SSP VERSION 3 OVERVIEW

The purpose of this technical bulletin is to familiarize people with ACF/VTAM Version 3, ACF/NCP Version 4, and ACF/SSP Version 3. The proper planning and migration can then be developed for this set of products. The audience for this technical bulletin is anyone having responsibilities for the installation of ACF/VTAM Version 3, ACF/NCP Version 4, and ACF/SSP Version 3. This includes: systems engineers, systems analysts, systems programmers, managers, communications technicians, and network operators. It is presumed that the reader of this bulletin is familiar with previous releases of these products. This publication is a component of GBOF-2206. 6622-9392

VM/SP HPO PERFORMANCE TUNING GUIDE

VM/SP HPO Release 3.4 has made significant enhancements in the function and control of the VM subsystems. The enhancements provide several new options for improving performance and allow tuning of each subsystem on an individual basis. The purpose of this publication is to provide Systems Engineers and system programmers with a guide for installing a VM/SP HPO 3.4 system to take the most benefit from the system resources. The script and matching foils can be used for presenting the subject of HPO system configuration and tuning. Technical knowledge of HPO 3.4 and VM are prerequisites to reading this guide. This publication describes the new tuning functions of the VM/SP HPO 3.4 system. The guidelines to constructing an effective system are reviewed with the important measurement parameters. Some guidelines and recommendations are discussed for measuring and tuning HPO system performance. This publication is a component of GBOF-2208. Technical Bulletin, 8 1/2 x 11 inches, 12/85 SLSS: ORDER NO. SUBSCRIPTION ONLY

6622-9393

VM/SP HPO RELEASE 3.4 FUNCTIONAL OVERVIEW PRESENTATION GUIDE

The purpose of this publication is to provide the Systems Engineers with a guide which can be used to create a presentation on the contents of VM/SP HPO Rel. 3.4. This guide is not intended to be presented as is, nor is the script to be read for the presentation. By knowing the audience for this presentation and having a knowledge of HPO3.4 the SE can use this guide as a base to create an appropriate presentation. The script contains a copy of the

foils used in the presentation. The master copy of the foils is found in Appendix A.

GG24-1550

GUIDE TO MVS/SP RELEASE 3  
This document describes the contents of MVS/System Product Release 3 and includes many topics on both the performance and the functional enhancements of this release of MVS.  
Manual, 8 1/2 x 11 inches, 02/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1552

SMALL COMMUNICATIONS SYSTEMS INSTALLATION PRIMER VSE SYSTEM IPO/E  
The purpose of this document is to assist in the installation of small communications systems including VSE System IPO/E Extended, the 3705-80 Communications Controllers and CICS/VSE.  
Manual, 8 1/2 x 11 inches, 12/81  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1554

COMMUNICATION NETWORK MANAGEMENT CNM CUSTOMIZING NCCF  
The purpose of this document is to supplement the NCCF Customizing Manual SC27-0433 with further hints, comments and examples for writing CLISTS, Command Processors and User Exits for NCCF.  
Manual, 120 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1557

ACF PRODUCTS INSTALLATION GUIDE  
The purpose of this publication is to provide information that may help Systems Programmers in installing SNA Products in either a VSE/SP, VM or MVS environment. This publication is a component of GBOF-2206.  
Manual, 8 1/2 x 11 inches, 650 pages, 03/87  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1558

CNM CENTRAL SITE OPERATION  
This document shows how a multi-domain (multi-host) network can be operated from a single control position.  
Manual, 88 pages, 01/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1559

ANNOTATED IMS/VSE PERFORMANCE REPORTS  
This document contains information on DC Monitor and IMSPARS. The DC Monitor portion covers measuring techniques, the DC Monitor Trace records and the flow of an IMS Transaction as far as DC Monitor is concerned. The IMSPARS section contains information regarding measuring techniques, overview of IMS log record types, and the flow of an IMS transaction as far as IMSPARS is concerned.  
Manual, 8 1/2 x 11 inches, 238 pages, 10/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1560

COMMUNICATION NETWORK MANAGEMENT CNM BUILDING FULLSCREEN CENTRAL NETWORK SUPPORT NCCF  
This document gives hints, comments and examples on the writing and use of a fullscreen monitor in an online environment.  
Manual, 63 pages, 11/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24

GG24-1561

COMMUNICATION NETWORK MANAGEMENT USING THE CNM TOOLS  
This document discusses how the different CNM products can enhance the "help desk" and the operator's ability to manage the network.  
Manual, 154 pages, 10/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1563

VSAM PRIMER FOR INTEGRATED CATALOG FACILITY ICF IN AN MVS ENVIRONMENT  
This document gives new VSAM users the information required to use VSAM properly. It also includes comprehensive information for the Integrated Catalog Facility.  
Manual, 8 1/2 x 11 inches, 310 pages, 09/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1565

EXPERIENCES INSTALLING JES3/SPI.3.1  
The new JES3 facilities provided in MVS/SP.1.3.1-JES3 (5740-XYN) are described and compared with those in the previous version of JES3 (i.e., JES3 Release 3 or SU26). Guidelines for the installation of the product and usage of the new functions are also included.  
Manual, 8 1/2 x 11 inches, 186 pages, 01/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1568

X.25 SNA GUIDE  
The purpose of this publication is to provide guidance for the planning and successful implementation of SNA to SNA connections over X.25 based packet switched data networks. This is a component of GBOF-2206.  
Manual, 8 1/2 x 11 inches, 166 pages, 09/85

GG24-1569

X.25 NPSI PAD IMPLEMENTATION GUIDE  
This publication discusses connection of ASCII terminals via X.3 PAD services to an SNA Host Computer via a packet switched data network.  
Manual, 8 1/2 x 11 inches, 112 pages, 08/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1570

VSE/POWER VERSION 2 NETWORKING DESIGN GUIDE  
This guide describes Design and Implementation of the new job networking function of VSE/POWER Version 2 (PNET). It contains sample tables and definitions, installation checklists, and usage hints and tips.  
Manual, 284 pages, 01/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1573

SMALL COMMUNICATIONS SYSTEMS INSTALLATION PRIMER 4331 ACF/VTAM VERSION 2  
A guide for installing ACF/VTAM with the Appropriate 3270, 364X and CICS support in a 4331 environment.  
Manual, 8 1/2 x 11 inches, 252 pages, 07/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GG24-1575

COMMUNICATION NETWORK MANAGEMENT  
This publication discusses the use of a central site team for the maintenance of software in a distributed interconnected network.  
Manual, 8 1/2 x 11 inches, 79 pages, 05/83

6624-1581

**DATABASE 2 RELATIONAL CONCEPTS**

This document describes the relational approach to data basesystems in general and to IBM DATABASE 2 (DB2) in particular. The relationship between IMS/VSE DL/I and DB2 applications is also covered. The intended audience is DP professionals who wish to understand the relational model of data and how it is implemented in DB2.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 80 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1582

**DATABASE 2 CONCEPTS AND FACILITIES GUIDE**

This document gives a functional overview of the IBM DATABASE 2 (DB2) relational data base management system. It is intended to be read by all DP professionals who wish to obtain a good functional knowledge of the product.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 216 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1583

**DATABASE 2 SQL USAGE GUIDE**

This document demonstrates the power of Structured Query Language (SQL), a database management language which permits IBM DATABASE 2 (DB2) users to access and manipulate data in relational data bases. The document is intended for DP professionals who wish to obtain a good functional knowledge of SQL.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 154 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1584

**AN INTRODUCTION TO ADVANCED PROGRAM-TO-PROGRAM COMMUNICATION APPC**

This publication provides an introduction to APPC, IBM's architecture for distributed transaction processing. It looks at the requirements for APPC, provides an overview of the underlying logical unit (LU 6.2), and describes the LU 6.2 protocol boundary whereby transaction programs invoke APPC functions.

It is a component of GBOF-2206.

Manual, 8 1/2 x 11 inches, 108 pages, 12/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1585

**COMMUNICATION NETWORK MANAGEMENT USING NETWORK LOGICAL DATA MANAGER**

This document contains installation and ease of use guidance for network logical data manager (NLDM).

Manual, 8 1/2 x 11 inches, 104 pages, 06/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1586

**DB2 QMF AND DXT PRESENTATION GUIDE**

This document provides a script and accompanying foils for presenting an overview of the IBM DATABASE 2 (DB2), Query Management Facility (QMF) and Data Extract (DXT) products to DP professionals.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 234 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1587

**DB2 INTERACTIVE DB2I DEMONSTRATION GUIDE**

This document provides a script to demonstrate all stages of DB2 application development using the DB2I TSO/ISPF interface to DB2. A set of foils is provided to enable an equivalent foil presentation to be given where a running DB2 system is not available. The demonstration is intended for DP professionals.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 152 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1590

**COMMUNICATION NETWORK MANAGEMENT USING SERVICE LEVEL REPORTER**

A description of how to use SLR in a Network Management environment. Examples are provided.

Manual, 8 1/2 x 11 inches, 214 pages, 08/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1594

**IMS/VSE VERSION 1 RELEASE 3 LOGGING USER'S GUIDE**

Guide to implement the new logging environment. Planning information, MTO and Recovery/Restart considerations are provided.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 145 pages, 09/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1595

**DBRC MIGRATION AND USAGE GUIDE**

This publication describes migration between the various releases of DBRC and provides information about the new features in DBRC Release 3.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 212 pages, 01/84

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1597

**VM/VSE INTERFACE GUIDE**

This publication provides planning and usage information to support the use of VM/VSE Interface Facilities, oriented towards Systems Engineering and their customer system programmer.

Manual, 8 1/2 x 11 inches, 132 pages, 10/83

6624-1599

**DATABASE 2 SECURITY AND AUTHORIZATION GUIDE**

This guide describes the authorization mechanism that is part of DB2. It discusses it from the standpoint of what facilities are available, as well as looking at how it might best be put to use. It accomplishes the latter by showing examples of possible scenarios that would be used by various people involved with the DB2 installation. The document is intended for DP professionals who wish to obtain an overall and comprehensive view of the DB2 security mechanism, in order to make best use of it over the entire installation.

This is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 106 pages, 11/83

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1600

**DATABASE 2 PERFORMANCE DESIGN AND TUNING GUIDE**

Guidelines on how to design tables, DB2 applications and the DB2 subsystem, DB2 system monitoring and tuning, application monitoring and tuning.

This is a component of GBOF-2205.

6624

Manual, 8 1/2 x 11 inches, 124 pages, 02/84

SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1618

COMMUNICATION NETWORK MANAGEMENT NCCF VERSION 2  
The purpose of this document is to evaluate the new functions and usability enhancement, provide installation and customization examples and assist in the installation of NCCF Version 2.  
Manual, 8 1/2 x 11 inches, 120 pages, 04/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1625

DBRC AND DATA SHARING FOR THE CICS/VS USERS  
CICS 1.6.1 exploits DBRC R3 and IMS 1.3 Data Sharing. This publication describes the new function available for recovery control and sharing DL/I data at the data base and block levels between CICS and IMS subsystems on the same processor or on multiple local processors. Procedures and recommendations are included for installing the software, implementation and operational use in the environment of multiple on-line CICS-DL/I and Batch DL/I subsystems within a single processor under MVS.  
This is a component of GBOF-2205.  
Manual, 8 1/2 x 11 inches, 220 pages, 04/84

IMS DATABASE VERSION 1 RELEASE 1 IMS/VS INTERFACE GUIDE  
This publication contains information on the DB2 attachment facility for IMS/VS. It is to be used as a primer for first time installation of the attachment.  
Manual, 8 1/2 x 11 inches, 142 pages, 09/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1642

GUIDE TO THE 3880 STORAGE CONTROL MODEL 23  
This publication is intended to assist system planners and programmers and system engineers in planning and installing the 3880 Storage Control Model 23. It gives an overview of the hardware, software, performance, and usage aspects of the product.  
Manual, 8 1/2 x 11 inches, 100 pages, 2/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1650

GUIDE TO THE 3880 MODEL 21 PAGING SUBSYSTEM  
This publication provides planning and installation information on the 3880 Model 21 Paging Subsystem. It is designed to give the systems programmer or systems engineer an overview of the hardware, software and usage aspects of the products.  
Manual, 8 1/2 x 11 inches, 84 pages, 7/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1653

3725 COMMUNICATION CONTROLLER GUIDE  
This publication is intended to assist System Programmers and System Engineers who plan to install the 3725 Communication Controller or update it with new features. It is a component of GBOF-2206.  
Manual, 8 1/2 x 11 inches, 168 pages, 02/87  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1655

7171 INSTALLATION EXPERIENCES  
This publication provides an overview of the 7171, a summary of installation experience, installation hints, and document references.  
It is a component of GBOF-2206.  
Manual, 8 1/2 x 11 inches, 60 pages, 09/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1658

GUIDE DEVELOPING QMF APPLICATIONS USING ISPF (CURRENT RELEASE)  
This publication provides guidance for a systems or applications developer or Info-Center specialist to install, design, and implement ISPF dialogs which run under control of QMF. It also documents concrete examples of three sample applications which can then be tailored to an installation.

6624

The samples are of graduated complexity, going from simple panels and fixed QMF PROCs to ISPF dialog table display/update panels and dynamically created QMF PROCs.  
Manual, 8 1/2 x 11 inches, 200 pages, 4/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1665

ENGINEERING/SCIENTIFIC SUPPORT SYSTEM INSTALLATION GUIDE  
This publication is intended to assist first-time users of hardware and program products who are installing the Engineering/Scientific Support System (E/S\*\*3). It does not attempt to replace prerequisite courses and documentation supplied, but should be used as a supplementary publication during the installation and tailoring phase.  
Manual, 8 1/2 x 11 inches, 62 pages, 11/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1673

CNM PERFORMANCE MEASUREMENT TOOLS  
This publication is intended for use by the service level control staff in charge of defining and controlling the service level agreements, and for users who are responsible for network design. It provides information for network center personnel managing performance of the communications network. System programmers who are responsible for the implementation of the network products and for system tuning are also addressed.  
Manual, 8 1/2 x 11 inches, 96 pages, 3/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

DB/DC DATA DICTIONARY RELEASE 5 IMPLEMENTATION PRIMER  
This publication contains guidelines for a successful implementation of the DB/DC Data Dictionary. The main objective of the Primer is to make the implementation both simpler and faster. It is aimed at the Data Base Administrator (or Dictionary Administrator) who has to implement the product in the customer environment.  
This is a component of GBOF-2205.  
Manual, 8 1/2 x 11 inches, 219 pages, 3/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1683

4381 DUAL PROCESSORS INSTALLATION GUIDE  
This revised publication provides a basic knowledge for the installation of the 4381 Dual Processors and is intended for system programmers and professionals involved in this activity. It is a component of GBOF-2208.  
Manual, 8 1/2 x 11 inches, 128 pages, 09/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6624-1684

IMS/VS FAST PATH APPLICATION DESIGN  
This publication is intended for the application designers in the IMS/VS Fast Path mixed mode environment. IMS/VS Fast Path is an integrated part of IMS/VS and the designer should use the Fast Path and the Full Function resources that are best suited to meet the application requirement.  
It will give guidelines on when to choose Fast Path resources and when to choose Full Function resources. All phases of a project are described based on the assumption that most applications in the future will use a mixture of Fast Path and Full Function.  
It is a component of GBOF-2208.  
Manual, 8 1/2 x 11 inches, 200 pages, 7/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

3090 MODEL 200 PROCESSOR COMPLEX INSTALLATION NOTEBOOK

This publication contains information pertinent to the installation of a 3090 Model 200 Processor Complex. The overall design is for use both as a presentation guide and a technical reference manual. Use of this dual design permits information to be imported to the general audience, while at the same time assisting those whose responsibility it is to present this information. This publication is structured into four major sections: hardware overview, software support, installation considerations, and operational considerations. Full size copies of the visuals used in the hardware overview and operational considerations sections are provided in appendices A and B. For those who are presenters, two adjacent visuals shown on the same page indicates that both should be displayed simultaneously.

This publication is a component of GBOF-2208.

Technical Bulletin, 8 1/2 x 11 inches, 208 pages, 07/85

6666-0216

SNA NETWORKS OF SMALL SYSTEMS

This publication discusses SNA/LEN, a possible extension of Systems Network Architecture intended to allow peer, dynamic, and easy to use networking functions for a variety of node sizes down to and including the new generation of personal computers. After reviewing the special requirements posed by small systems and the need for including them as equal partners in networks, the LEN architecture is described. This is done by following a sequence of steps that begin when a logical resource at a node that may not yet be part of the connectivity of an existing network requests a session with a remote logical resource of unknown location. After connectivity with the preexisting network is established, directory services locates the remote object, route selection services determines the preferred path, a session is activated, and deadlock-free flow control assures a useful flow of data. Preliminary quantitative results from a LEN prototype are presented.

This publication is a component of GBOF-2206.

6624-1723

IMS/VS VERSION 2 RELEASE 1 PRESENTATION GUIDE

This publication provides notes and foils which describe the new features and functions of IMS/VS Version 2 Release 1. These product enhancements include: IMS/VS XRF Support which increases the online availability as seen by the end user, higher data availability for application programs, additional virtual storage constraint relief items, and enhancements to Data Base Recovery Control and logging features. IMS/VS Version 2 Release 1 addresses those customers who have increased requirements for high availability and virtual storage constraint relief. IMS/VS XRF support is not included in this presentation guide.

It is a component of GBOF-2205.

Manual, 8 1/2 x 11 inches, 328 pages, 8/85

SQL/DS REMOTE RELATIONAL ACCESS SUPPORT GUIDE FOR VM/SP  
The Structured Query Language/Data System (SQL/DS) Remote Relational Access Support is an enhancement to SQL/DS Release 3.5. It allows the user to make use of the Transparent Services Access Facility present in VM/System Product (VM/SP) Release 5. With the Remote Relational Access Support, the user can use an SQL/DS data base when on the same processor as SQL/DS or on a different processor.

DL/I-ENTRY DOS/VS, LIC PROG 5746-XX7, GENERAL INFORMATION  
This book introduces DL/I-Entry DOS/VS to the executive, system programmer, or application programmer and gives a general picture of what DL/I-Entry is.

The DL/I-Entry data base system makes data handling easier for application programs, and centralizes the data required by more than one application program. Both batch programs running under DOS/VS and online programs running under the Customer Information Control System/DOS/VS (CICS/VS) can use DL/I-Entry.

This book explains the advantages of using data bases, gives a general description of DL/I-Entry data bases and of how application programs use them, and lists machine configuration requirements. Examples are provided of using DL/I-Entry to control the ordering and distribution of products, to produce a bill of materials in a manufacturing application, and to provide a complete system for order entry and production planning and control in the process industry.

Prerequisite to understanding this book is some familiarity with the use of computers to process data.

IMS DATA BASE ANALYZER (OS/VS), LIC PROG 5740-XXR, GENERAL INFORMATION (CURRENT RELEASE)

IMS/VS Data Base Analyzer (DB analyzer) is an Information Management System/Virtual Storage (IMS/VS) productivity aid that analyzes the structure of an existing IMS/VS data base with hierarchical direct (HDAM or HIDAM) organization. It produces reports on distribution of pointers and free space, to allow monitoring of the efficiency of data base space allocation in storage. It also checks pointer integrity, examining whether recovery procedures have been applied successfully.

This manual includes a general description of the program components and their interaction, computing system and system control program requirements, and sample output.

This publication is intended primarily for data base administrators and system analysts. The reader is assumed to be familiar with IMS/VS data bases and their pointer structures. Publications providing this background are IMS/VS Utilities Reference Manual, SH20-9029 and IMS/VS System/Application Design Guide, SH20-9025.

VSE/POWER, LIC PROG 5746-XE3, GENERAL INFORMATION (CURRENT RELEASE)

This manual introduces VSE/POWER together with the VSE/POWER Remote Job Entry feature. It is intended for users of DOS/VSE with VSE/Advanced Functions. After an introduction that acquaints the reader with the concept of VSE/POWER and its applicability, the following topics are covered in this manual:

- A general description of VSE/POWER
  - A discussion of the input for the system, the output produced, and the processing that is done by VSE/POWER
  - A summary of the machine and programming environment in which VSE/POWER operates
- The reader of this manual should be familiar with the data processing terminology. In particular, basic knowledge of DOS/VSE or DOS/VS will be helpful in evaluating the advantages of this program product.

S/370 & 4300 PROCESSORS, JOB ENTRY PROGRAM, LIC PROG 5746-XE6, & FILE TRANSFER PROGRAM, LIC PROG 5748-XE6, GENERAL INFORMATION

This manual introduces the IBM program products Job Entry Program and File Transfer Program. These programs are designed to interconnect one or more decentralized computing systems with one or more central data processing installations.

With the Job Entry Program, jobs may be transferred for processing from one installation, thus enabling the user, for example, to utilize resources such as data bases, programs, or peripheral devices available only at the receiving location. The File Transfer Program additionally allows the user to transfer sequential files on tape or disk from one installation to another.

The reader of this manual should be familiar with the data processing terminology. Additional knowledge of IBM operating systems (DOS/VSE, OS/VS1, and OS/VS2) will be helpful to the reader in evaluating the applicability of the Job Entry Program and the File Transfer program.

## SH12-5317

IMS/VS DATA BASE ANALYZER (OS/VS), LIC PROG 5740-XXR, USER'S GUIDE (CURRENT RELEASE)

IMS/VS Data Base Analyzer (DB analyzer) is an Information Management System/Virtual Storage (IMS/VS) productivity aid that analyzes the structure of an existing IMS/VS data base with hierarchical direct (HDAM or HIDAM) organization. It produces reports on distribution of pointers and free space, to allow monitoring of the efficiency of data base space allocation in storage. It also checks pointer integrity, examining whether recovery procedures have been applied successfully.

This manual describes the processing, installation, and operation of the four DB analyzer programs. It helps with understanding and applying the output of DB analyzer and includes explanations of all the messages.

This publication is intended primarily for data base administrators and system analysts. The reader is assumed to be familiar with IMS/VS data bases and their pointer structures. Publications providing this background are IMS/VS Utilities Reference Manual, SH20-9029 and IMS/VS System/Application Design Guide, SH20-9025. Manual, 8 1/2 x 11 inches, 92 pgs, 12/76

SH12-5411

DL/I DOS/VS CALL AND RODLI INTERFACES APPLICATION PROGRAMMING (CURRENT RELEASE)

This manual describes how to write a DL/I DOS/VS application program for execution in the batch or online environments. It is intended for COBOL, PL/1, or Assembler language application programmers who wish to employ DL/I DOS/VS functions in their programs, and for data base administrators who are designing DL/I DOS/VS applications.

DL/I DOS/VS is a data management control system that assists the user in creating, accessing, and maintaining large common data bases. In conjunction with the Customer Information Control System (CICS/DOS/VS), DL/I DOS/VS can be used in an online teleprocessing environment. This manual contains four main sections: an overall view of how a DL/I DOS/VS application program is written and executed, a description of the function codes, the considerations to apply for an online application program, and a description of the advanced programming functions. A glossary of DL/I terms is also included.

Readers of this manual must be thoroughly familiar with the use of DOS/VS, and of CICS/DOS/VS if DL/I DOS/VS is to be used in the online environment.

Manual, 8 1/2 x 11 inches, 144 pages, 05/84

SH12-5412

DL/I DOS/VS UTILITIES GUIDE FOR THE SYSTEM PROGRAMMER (CURRENT RELEASE)

This manual describes each of the DL/I DOS/VS utility programs and explains how to execute them under DOS/VS. This manual is written for data base administrators and system programmers who are concerned with maintaining and reorganizing data bases and creating data base control blocks.

DL/I DOS/VS is a data management control system that assists the user in creating, accessing, and maintaining large common data bases. In conjunction with the Customer Information System (CICS/DOS/VS), DL/I DOS/VS can be used in an online teleprocessing environment. This manual describes procedures used for creating control blocks and utilities for data base recovery, for data base reorganization, and for the resolution of data base logical relationships.

Readers of this manual must be thoroughly familiar with the use of DOS/VS, and of CICS/DOS/VS if DL/I DOS/VS is to be used in the online environment. Before using the DL/I DOS/VS utilities and procedures described in this manual, users should read DL/I DOS/VS System/Application Design Guide, SH12-5413. Manual, 262 pages

DL/I-ENTRY, LIC PROG 5746-XX7, APPLICATION PROGRAMMER'S REFERENCE SUMMARY  
Summarized programming reference information for DL/I - Entry. Reference card, 8 panels, 12/78  
////5746-XX7

SH12-5418

DL/I-ENTRY, UTILITIES REFERENCE SUMMARY  
This reference card provides system personnel with a guide to using the DL/I-Entry DOS/VS utilities. Using this card, the data base descriptions (DEBs) and program specification blocks (PSBs) necessary to use DL/I-Entry data bases can be generated.

The DL/I-Entry data base system makes data handling easier for application programs, and centralizes the data required by more than one application program. Both batch programs running under DOS/VS and online programs running under the Customer Information Control System/DOS/VS (CICS/VS) can use DL/I-Entry.

This card presents in condensed form the information on DL/I-Entry utilities covered in the DL/I-Entry DOS/VS Design and Implementation Guide, SH12-5311. Some familiarity with the book is therefore a prerequisite to using the card. Summary, 6 pages, 11/74  
////5746-XX7

SH12-5420

DL/I-ENTRY DOS/VS LOW-LEVEL CODE/CONTINUITY CHECK FEATURE, LIC PROG 5746-XX7, REFERENCE/OPERATIONS  
Low-level coding and continuity checking are established techniques for production planning and control in a manufacturing industry. The DL/I-Entry DOS/VS low-level code/continuity check feature generates, performs continuity checks upon and updates such low-level codes. The feature

SH12

is a subroutine called by batch DL/I-Entry application programs written in COBOL, PL/I, or Assembler.

This book describes the DL/I-Entry LLC/CC feature, and explains to the application programmer and data base administrator how to work with it. First a general description is given of the LLC/CC feature and the data bases it requires; then an explanation of how to use the feature in application programs is given. Information follows on generation, operation, and system and programming requirements.

For the application programmer, prerequisite to using this book is a knowledge of how to write DL/I-Entry programs as explained in the DL/I-Entry DOS/VS Application Programming Reference Manual, SH12-5415. For the data base administrator, prerequisite to using this book is a knowledge of DL/I-Entry data base concepts as explained in the DL/I-Entry DOS/VS Design and Implementation Guide, SH12-5311.

TERMINAL BUSINESS SYSTEM/VS TO CICS/VS CONVERSION GUIDE

This publication is intended for users of Terminal Business System/VS, who are planning to move their applications onto an in-house CICS/VS system. Because it is anticipated that most users will be considering the DOS/VS version of CICS/VS, attention is focused on this product. However, most of the points covered will apply equally to CICS-OS/VS.

Systems programmers will find that this publication will give them an understanding of the application designer's requirements, but not detailed information about, or assistance with, installing a CICS/VS system. These subjects are covered in other publications.

Manual, 8 1/2 x 11 inches, 84 pgs, 1/77

INTERNATIONAL FIELD PROGRAM VS PERSONAL COMPUTING PL/I, LIC PROG 5785-EAB, USER'S GUIDE  
This book explains to users of VSPC terminals how to develop programs using VS Personal Computing PL/I (VSPC PL/I), whose compiler is an upward-compatible subset of the IBM OS PL/I Optimizing Compiler. The reader is assumed to have some experience of writing programs in PL/I.

VSPC PL/I is a language processor operating under one of the IBM program products: VS Personal Computing (OS/VS1), program number 5740-XR5, or VS Personal Computing (OS/VS2), program number 5740-XR6. It combines the interactive nature of VS Personal Computing and the problem solving nature of the PL/I language to provide a powerful tool for program development from the convenience of the user's own terminal.

This book summarizes the structure of VSPC, the operation of available terminals, and outlines the VSPC commands needed for developing and running programs. A sample terminal session is given, showing step-by-step the method of constructing a program at the terminal.

Prerequisite to this book is a familiarity with the VSPC PL/I language as explained in VSPC PL/I Language Reference Manual, SH19-6049.  
Manual, 8 1/2 x 11 inches, 114 pgs, 7/77

SCREEN DEFINITION FACILITY/CUSTOMER INFORMATION CONTROL SYSTEM OPERATIONS GUIDE

The Screen Definition Facility/Customer Information Control System (SDF/CICS) supports the development of BMS maps and map sets for application programs for the IBM Customer Information Control System/VS (CICS/VS) for OS/VS.

This publication contains information necessary for generating and operating the program. It provides system programmers and customer operators with mainly operating system dependent information, such as the job control to generate and operate SDF/CICS.

This publication is intended for system console operators, system programmers, and CICS/VS application programmers. Manual, 8 1/2 x 11 inches, 130 pages, 01/87

SDF/CICS SSX/VSE GENERAL INFORMATION

Screen Definition Facility/CICS Small System Executive/Virtual Storage Extended (SDF/SSX) is an interactive application development tool for the CICS/VS application programmer who wants to define or change map sets and maps for CICS/VS Basic Mapping Support (BMS). SDF/SSX provides the application programmer with a full screen editor and libraries to maintain the maps and map sets.

This publication contains a general description of the program and its various functions. Also included is a list of devices supported, a summary of user installation requirements, and a sample application.

SI ELIAS-I/VM

ELIAS-I/VM Licensed Program and its supporting documentation  
is intended to improve productivity of users of CICS/DOS/VS,  
DL/I DOS/VS, and/or VSE/VSAM, when run on an IBM System/370,  
IBM 303X or IBM 4300 Processor. ELIAS-I/VM is designed to  
run in the environment provided by the VM/SP Conversational  
Monitor System.

ELIAS-I/VM provides a series of interactive dialogs  
called "procedures", which prompt the user to specify the  
definitions of the data bases and batch and online  
application programs. It provides a set of predefined  
sequences of code called "bricks". Each brick performs a  
specific and frequently used program function, and can be  
incorporated into the user's application program to perform  
that function.

This manual is addressed to the managers responsible for  
the development of computer applications. It describes the  
process of implementing a data base/data communications  
system using the facilities and methods supplied by  
ELIAS-I/VM.

SH19

ELIAS-I is the collective name for two related Licensed Programs, ELIAS-I (Program Number 5746-XXV), and ELIAS-I/VM (Program Number 5748-XXK). These two Licensed Programs and their supporting documentation are designed to help improve the productivity of users of CICS/VS and DL/I when run on selected IBM System/370 or IBM 4300 Processors.

The two products differ in the control program environment to which they relate. ELIAS-I is executed in the environment provided by the VSE/Interactive Computing and Control Facility, and is primarily intended to be used with DOS/VSE System IPO/E, (Program Number 5750-AAA, 5750-AAB, or 5750-AAC). ELIAS-I/VM is executed in the environment provided by the Conversational Monitor System (CMS), and is primarily intended to be used with VM/DOS/VSE System IPO/E, (Program Number 5750-AAE or 5750-AAF). It can also be used with VM System IPO/E, (Program Number 5750-AAD) to provide the jobstream creation facility.

Both programs provide a series of interactive dialogs called procedures, which prompt the user to specify the definitions of data bases and batch and online application programs. They also provide a set of predefined sequences of code called bricks. Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

ENTRY LEVEL INTERACTIVE APPLICATION SYSTEM-ONE SPECIFICATIONS (CURRENT RELEASE)

Entry Level Interactive Application System-One (abbreviated to ELIAS-I) is designed to assist designers and programmers who are implementing data base (DB), VSE/VSAM, data communication (DC) or data base/data communication (DB/DC) applications with CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, using COBOL, PL/I, or DMS/CICS/VS-DOS.

ENTRY LEVEL INTERACTIVE APPLICATION SYSTEM-ONE APPLICATION DESIGN GUIDE (CURRENT RELEASE)

ELIAS-I Licensed Program and its supporting documentation is intended to improve productivity of users of CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, when run on a System/370, 303X or 4300 Processor. ELIAS-I is designed to run in the environment provided by the VSE/Interactive Computing and Control Facility, and is primarily intended to be used with one of the current VSE System IPO/E.

ELIAS-I provides a series of interactive dialogs called "procedures", which prompt the user to specify the definitions of the data bases and batch and online application programs. It provides a set of predefined sequences of code called "bricks". Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

This manual presents the implementation at a conceptual level and is intended to be used for reference while designing applications.

Manual, 8 1/2 x 11 inches, 128 pages, 08/81

INSTALLING AS IN A VM ENVIRONMENT  
This publication describes how to install Application System (AS) on a VM/SP system.  
Application System licensed program is an end-user application development facility which provides business professionals with a powerful and easy-to-use set of commands and conversational facilities for use in solving a broad range of business problems. Previous data processing experience is not essential for end users.  
The different models of the AS licensed program provide for access by up to a specified number of Concurrently Signed-on Terminal Users (CSTUs). A CSTU is an end-user who is currently logged on to the host VM system and who has commenced a session with AS and may or may not be actively using AS.  
This is a component of SBOF-7519.

DISTRIBUTED SYSTEMS EXECUTIVE VERSION 3.2 GENERAL INFORMATION

This publication is intended for business executives and for persons responsible for setting up and maintaining a distributed data processing network. It describes DSX by answering a number of basic questions. First, it explains what DSX is and what it offers. Then it discusses what is needed to install, set up, use, and operate DSX. It also describes what is required at the nodes, and gives an overview of what is involved in migrating to DSX Version 3 from a previous version.

VSE/JCL CONVERSION AID

This publication assists the system programmer in converting VSE JCL statements to equivalent MVS JCL statements. As VSE programs are executed, they are monitored and profiles are built. Also, VSE batch jobstreams are expanded, and the results are used by a set of dialogs which prompt the user to set specific installation standards. All results are then used by a program which creates MVS parameter and procedure libraries equivalent to the original VSE jobstreams.

Manual, 8 1/2 x 11 inches, 04/85

DESCRIPTION/OPERATIONS NMPPF

This publication is a set of aids designed to help customers install, learn, and make productive use of many systems and network management products. This product contains job streams, tutorials, help facilities, operational scenarios, sample data bases and sample procedures, all of which show a customer how to more effectively use products to manage a network. It is built on Network Communications Control Facility, 5735-XX6, and uses standard command list, command processor and user exit facilities.

This publication is a reference document which provides instructions for the installation, operation and customization of the Network Management Productivity Facility.

Manual, 8 1/2 x 11 inches, 204 pages, 05/85

GENERALIZED CICS/VS APPLICATION DEVELOPMENT ARCHITECTURE VERSION 2.0 APPLICATIONS PROGRAMMERS REFERENCE GUIDE

The Generalized CICS/VS Application Development Architecture, developed by the Southern California Edison Company, is a system of generalized program modules designed to increase the productivity of application programmers involved in developing online applications under CICS/OS/VS and CICS/DOS/VS. The generalized modules are driven by specification tables which are defined via user-selected macro parameters.

This manual provides a system description and is an application programmer's reference manual.

Manual, 8 1/2 x 11 inches, 540 pages, 04/84

VSE RSCS/SNA FOR VM

VSE Remote Spooling Communication Subsystem/SNA for VM (VSE/RSCS/SNA) is designed to provide SNA support for a VM/SP and DOS/VSE environment. As an extension of the Remote Spooling Communication Subsystem program product (5748-XPI) and an ACF/VTAM application, it allows VM to use SNA printers, to print color files, and to transfer files to other SNA systems. When combined with VM/VTAM Communication Network Applications (VM/VCNA, 5735-RC5), CMS users can now take advantage more fully of SNA hardware and benefits. Users can now access CMS with VM/VCNA and spool the output to either a 328X printer or to another computer in a multi-system network running VSE RSCS/SNA or JES2 Release 3.

This manual is a reference document which provides instructions for the installation and use of this Program Offering.

Manual, 8 1/2 x 11 inches, 72 pages, 11/83

CICS/VS CONVERSION UTILITY PROGRAM DESCRIPTION/OPERATIONS  
The CICS/VS Conversion Utility (CICS/CVT) Program Offering is a utility program to aid system or application programmers in the conversion of OS and DOS COBOL and PL/I Optimizer source application programs from CICS/VS Macro Level Language to CICS/VS Command Level Language. It is an automated tool that can help in the conversion process.

APL/360 PRIMER, STUDENT TEXT  
This primer provides an introduction to the APL/360 system and to the APL programming language. It discusses the mechanics of using the system, and shows how to write representative programs for a variety of applications. The treatment is elementary, and for a discussion of advanced system features and available operations, refer to the APL/360 User's Manual.

INFORMATION MANAGEMENT SYSTEM/360, VERSION 2, GENERAL INFORMATION MANUAL: PROG. PROD. 5734-XX6  
The Information Management System/360 is an Operating System/360 processing program designed to facilitate the implementation of medium to large common data bases in a multiapplication environment. This environment is created to accommodate both online message processing and conventional batch processing, either separately or concurrently. The system permits the evolutionary expansion of data processing applications from a batch-only to a teleprocessing environment.

This manual includes a general description of the system and its various facilities and programs, listings of typical and minimum configurations, and sample applications.  
Manual, 112 pages  
////5734-XX6

GH20-0850

APL/360, 5734-XM6 (OS), 5736-XM6 (DOS), GENERAL INFORMATION  
This publication provides a general introduction to the use, operation, and installation of APL/360. APL/360 is a conversational time-shared terminal system utilizing APL (A Programming Language), a concise notation which makes use of well known mathematical symbols, plus a number of symbols that are used for designating other simple and powerful functions. Because APL is closely related to mathematical notation, and its functions operate on sets of information as well as individual data items, the user can write effectively in this language with a minimum of instruction.

APL/360 is designed to operate under either (a) the IBM System/360 Operating System (OS/360), Multiprogramming with a Fixed Number of Tasks (MFT with subtasking) or Multiprogramming with a Variable Number of Tasks (MVT) or (b) the IBM System/360 Disk Operating System (DOS/360).  
The manual is in three parts:

Part I describes APL/360 as viewed by a user at a typewriter-like terminal. The statements and commands used to describe the operations to be performed by the APL/360 System are summarized.

Part II describes APL/360 as viewed from the central data processing system location. The system features which facilitate the management and operation of an APL/360 System are summarized.

Part III describes the items to be considered in planning for the installation of an APL/360 System. Minimum machine requirements and storage requirements are provided.  
Manual, 65 pages

GH20-0892

GIS/2, LIC PROG 5734-XX1, APPLICATION DESCRIPTION  
This manual surveys the operational concepts and system capabilities of the Generalized Information System, Version 2. The manual introduces the language of GIS/2 and describes the file organization and processing actions supported by GIS/2.

The Generalized Information System operates under control of the Operating System on System/360 and System/370 and supports a wide variety of applications by providing information-handling capabilities against many typical data base organizations. GIS/2 provides facilities for defining, maintaining, and retrieving data from user files under direction of the using installation and its personnel.

////5734-XX1

GH20-0906

APL/360, 5734-XM6 (OS), 5736-XM6 (DOS), USER'S MANUAL  
This publication provides information necessary to use the APL/360 system. It discusses procedures and equipment required for interacting with the system, how to establish connection between terminal and central computer, how to start and end work sessions, and how to apply system control features. Application of the APL language to user problems is thoroughly discussed, and appendices give both elementary and advanced examples of actual terminal sessions.

## GH20-0940

CSP/AD CSP/AE GENERAL INFORMATION (CURRENT RELEASE)

The CSP/AD and CSP/AE General Information manual provides a general description of the functions provided by the CSP/AD and CSP/AE products. The CSP/Application Development product, which is used to interactively define, test and generate application programs, is for CICS/VS, VM/SP CMS, OS/VS2 TSO, SSX/VSE (5668-944) and for DPPX/SP (5660-284). Both data processing professionals and new users can use this program product to develop application programs with a minimum learning period.

The CSP/Application Execution product, which is used to execute CSP/AD applications, is for CICS/VS, VM/SP CMS, OS/VS2 TSO, SSX/VSE (5668-944) and for DPPX/SP (5660-284). This manual is available by itself or as part of the set of CSP/AD or CSP/AE set of manuals, which are orderable by one number, respectively; SBOF-1023 or SBOF-1024.  
Manual, 8 1/2 x 11 inches, 80 pages, 09/83

## SH20-0943

CSP/AD OPERATION DEVELOPMENT GUIDE (CURRENT RELEASE)

The CSP/AD Operation-Development manual describes how to use all of the CSP/AD facilities and functions to interactively define data structures, display (map) formats, and define application programs. CSP/AD definitions can be interactively tested and generated into an executable form. This manual is intended as a reference for programmers who are using CSP/AD to define application programs. The following two products are described in this manual: CSP/AD for CICS/VS, SSX/VSE, VM/SP CMS, OS/VS2 TSO (5668-944) and CSP/AD for DPPX/SP (5660-284). This manual is available by

STAT/BASIC FOR S/3 MODEL 6, ITF, AND VM/370-CMS: GENERAL INFORMATION

STAT/BASIC is a comprehensive set of interactive statistical programs for System/3 Model 6 and ITF (DOS, OS, or TSO). It consists of 40 BASIC programs, providing the user with procedures for data generation, elementary statistics, regression and correlation analysis, multivariate analysis, analysis of variance, nonparametric statistics, time series analysis, and biostatistics. The interactive features include instructional messages, flexible control of calculations, extensive error checking, and data editing.

This manual provides an overview of STAT/BASIC, describing the program features, usage, maximum problem sizes, precision, timing, system requirements, and customer responsibilities. It also includes a sample problem to illustrate the use of STAT/BASIC.  
Manual, 40 pages

SH20-0947

CSP/AD CSP/AE PROBLEM DETERMINATION GUIDE (CURRENT RELEASE)

The CSP/AD and CSP/AE Problem Determination Guide describes how to determine and resolve problems that may occur during the operation of the CSP/AD and CSP/AE products. This manual is intended for customer and IBM personnel who are responsible for the maintenance of CSP/AD and CSP/AE. Application programmers, as well as system administrators, are involved in problem diagnosis with different areas of interest. This manual is available by itself or as part of the set of CSP/AD or CSP/AE manuals, which are orderable through one number, respectively; SBOF-1023 and SBOF-1024.  
Manual, 8 1/2 x 11 inches, 35 pages, 09/83

## SH20-1030

GIS/2 SYSTEM OVERVIEW AND CONTROL, 5734-XX1, PROGRAM DESCRIPTION VOLUME 1

The IBM Generalized Information System, Version 2, abbreviated GIS/2, consists of an integrated set of programs to provide general-purpose information handling. User input statements initiate and direct the system functions of creating, querying, and maintaining formatted data files variously structured. GIS routines are completely coded in the Assembler Language and operate under the overall control of OS with MFT or MVT.

This manual is presented in three volumes, the first of which describes the GIS monitor program and the capabilities associated with it. Data Description (file definition) facilities and Procedural Language facilities are specified in Volumes 2 and 3, respectively.

Program Product Manual, 40 pages  
 ///5734-XX1

## SH20-1032

GIS/2, LIC PROG 5734-XX1, OPERATIONS MANUAL

This manual addresses operations personnel intending to run the Generalized Information System, Version 2 (GIS/2), under the Operating System with Multiprogramming with a Fixed Number of Tasks or Multiprogramming with a Variable Number of Tasks. Contents include SYSGEN procedures, execution procedures, and diagnostic messages available to the system user.

Program Product Manual, 160 pages  
 ///5734-XX1

RCA 301 EMULATOR ON S/370 USING DOS AND DOS/VS (PRPQ) - TRANSITION GUIDE

This publication presents areas for consideration while planning and implementing the transition from the RCA 301 to the IBM System/370 Models 135 and 145. It is intended as an aid to management in making a total project plan. The transition plan discusses the objectives and techniques of transition, schedules, file conversion, program conversion, education and installation standards.

The guide also discusses the use of DOS resources and the differences between an RCA system and an IBM System/370. Because of the differences among data processing installations, the guidelines in this publication should be adjusted to fit the reader's particular operating conditions.

## GH20-1153

HONEYWELL SERIES 200 EMULATOR ON SYSTEM/370 USING DOS AND DOS/VS (PRPQ) - TRANSITION GUIDE, PROG. NO. 5799-ADT

This publication presents areas for consideration while planning and implementing the transition from the Honeywell Series 200 to the IBM System/370 Models 135 and 145. It is intended as an aid to management in making a total project plan. The transition plan discusses the objectives and techniques of transition, schedules, file conversion, program conversion, education and installation standards.

The guide also discusses the use of DOS resources and the differences between a Honeywell system and an IBM System/370. Because of the differences among data processing installations, the guidelines in this publication should be adjusted to fit the reader's particular operating conditions.

Manual, 40 pages

## GH20-1128

MATH/BASIC FOR S/3 MODEL 6, ITF & VM/370-CMS GENERAL INFORMATION

MATH/BASIC provides easy-to-use powerful mathematics problem-solving tools to the user of BASIC. The program operates on the IBM System/3 Model 6 or under the Interactive Terminal Facility (ITF) or under VM/370-CMS for System/360 or System/370. It consists of 44 BASIC routines covering the solution of linear questions, matrix eigen problems, polynomial equations, numerical quadrature, numerical differentiation, interpolation, approximation, smoothing, solution of systems of ordinary differential equations, fast Fourier transform, special functions and linear programming.

The user can employ any of the programs as stand-alone or can merge one or more of them into his own programs. The modules of MATH/BASIC can be applied to many problems that occur in science, engineering, and related fields.

This manual provides an overall view of MATH/BASIC. It describes the program features, usage, maximum problem

## SH20-1158

BUSINESS ANALYSIS/BASIC GENERAL INFORMATION

Business Analysis/BASIC is a comprehensive set of interactive routines for use on System/3 Model 6, System/360 or System/370 with ITF (DOS, OS, or TSO) or VM/370-CMS. It consists of 30 routines written in the BASIC language, providing the problem-solving professional with procedures for data generation and maintenance, spread sheet analysis, investment analysis, break-even or cost-volume profit analysis, depreciation analysis, and time series analysis. The program is designed so that a detailed knowledge of programming is not required. Interactive features include instructional messages, flexible control of calculation, extensive error checking and data editing.

This manual provides an overview of Business Analysis/BASIC, describing the program features, data file concepts, usage, maximum problem sizes, precision, timing, system requirements, and customer responsibilities. It also includes an "Application Handbook" consisting of a number of case studies illustrating use of the routines. Manual, 60 pages

SH20-1177

GIS/2 DL/I QUERY SUPPORT FEATURE, LIC PROG 5734-XX1, PLANNING GUIDE

This document describes the use and characteristics of the DL/I (Data Language I) Query Support Feature of the Generalized Information System, Version 2 (GIS/2). This feature provides the means by which a person can employ the GIS query language against DL/I data bases of Information Management System/360, Version 2 (IMS).

IMS/VS, 5740-XX2, GENERAL INFORMATION (CURRENT RELEASE)

IMS/VS is an OS/VS system program designed to facilitate user implementation of data base system in a batch and/or online environment supporting a wide variety of applications.

The purpose of this manual is twofold. First, by providing an overview description of the IMS/VS product, it enables new and prospective users to acquaint themselves with IMS/VS functions and the hardware and software products prerequisite to using IMS/VS. This information is fundamental to being able to consider how using IMS/VS can satisfy business needs. Second, it informs current users of new IMS/VS facilities and enables them to consider whether the new facilities can be applied at their installation.

This manual includes a general description of the system and its various facilities and programs, diagrams of typical hardware configurations, sample applications, and a guide for using the IMS/VS manuals.

SH20-1359

S/370 CICS/COBOL CALL INTERFACE NATIONAL BANK OF DETROIT, IUP 5796-AEG, DESCRIPTION/OPERATIONS

Current users of the Customer Information Control System (CICS) who are writing application programs in ANS COBOL usually with Assembler Language macros in the middle of their application programs. This procedure requires the use of the CICS Preprocessor Program and two compilations of the program, one for the Assembler Language macros and one for the COBOL.

This program provides a COBOL/CICS interface technique which eliminates the use of the CICS Preprocessor Program and makes the writing and debugging of ANS COBOL/CICS application programs considerably easier. The system consists of 12 modules, one for each of the CICS management functions, and a Resident Interface Module. When the COBOL application programmer requires a CICS service, rather than write an Assembler Language macro, he simply codes a predefined COBOL CALL statement passing a list of parameters depending upon the service requested. The test CICS macro is then issued in the subsequently called CICS Service Handler and control is returned to the requesting COBOL program upon completion of the CICS service.

DOS TO OS CONVERSION SYSTEM, IUP 5796-AFZ,  
DESCRIPTION/OPERATIONS

The DOS to OS Conversion System IUP automates the conversion process for JCL, COBOL, RPG, SORT and some utility programs. DOS JCL and DOS programs are displayed side by side with their OS equivalents. The OS equivalents are punched with JCL ready for compilation and cataloging for testing. COBOL D programs are processed by the Language Conversion Program to bring them to the ANS COBOL Level before conversion. COBOL programs with End of Page indicators are modified for handling of the carriage control tape. All CALL subroutines are identified for further resolution. DOS RPG FILENAMES are converted to OS RPG DDNAMES through the use of cards provided during the conversion process. All SORT Control Cards are handled automatically. A management report is provided as part of the process which shows the status of the conversion on a dynamic basis.

The Envirotech Corporation converted 1,200 routines to OS/VS from four geographically separated divisions while consolidating their operations at Salt Lake City, Utah. They did this with one system programmer and three part-time clerical personnel in six months through the use of the Conversion System. They estimate that two-thirds of all time and effort were saved over manual alternatives.

This Program Description/Operations Manual provides the user with sufficient information to understand, install and successfully use the program.

REFERENCE/OPERATIONS

This book, which describes the programs and operations of the Data Base Design Aid (DBDA), is intended primarily for the data base designer who will use it and for the system programmer who will install it.

An overview of the system is presented followed by a description of the programs in DBDA. Next, the installation procedures and alternatives are discussed, and finally the use of DBDA is described.

MCGILL UNIVERSITY SYSTEM FOR INTERACTIVE COMPUTING (MUSIC)  
IUP 5796-PQA, SCRIPT USER'S MANUAL  
MUSIC, developed by McGill University of Montreal, Canada, is an interactive operating system complete with a collection of utilities, compiler interfaces and application packages intended to provide a high performance, cost effective and manageable computing environment. MUSIC/SCRIPT is a text formatting program included with MUSIC. It is useful for the production of manuals, technical papers and form letters. This manual describes all the features of the MUSIC/SCRIPT facility including its utilities that perform spelling checks, generate indexes, and tables of contents. This is a component of ZBOF-1002. Manual, 8 1/2 x 11 inches, 126 pages, 7/81  
////5796-PQA

procedures for shutting the system down are described. The operator command language used by the system operator is also included along with the messages and codes issued by the system on the system console. Manual, 144 pages plus 46 page TNL, 7/76

SH20-1698

DB/DC DRIVER SYSTEM, LIC PROG 5740-XXA, TERMINAL USER'S MANUAL  
This manual is intended primarily for the test supervisor and the driver terminal user. A functional overview of the terminal and logical driver command languages is followed by a detailed presentation of all the commands. Logical driver command console and terminal command messages are also included. Manual

SH20-1669

VS/REPACK, IUP 5796-PDZ, DESCRIPTION/OPERATION  
VS/REPACK is a set of tools enabling the programmer to collect and display program storage activity data at varying levels of detail and to analyze this data in order to predict and improve program performance or to verify that a program is operating correctly. This manual presents detail regarding the installation and operation of the system and guidelines for interpreting the results. Manual, 160 pages, 3/76  
////5796-PDZ

SH20-1699

DB/DC DRIVER SYSTEM, LIC PROG 5740-XXT, SCRIPT WRITER'S GUIDE  
This manual is intended primarily for personnel responsible for writing the scripts to be used to test DB/DC application programs. The types of scripts are defined and the statements used in them are described in detail. Also included are script development aids and examples. This manual also describes the Script Generation Utility. This utility operates scripts from telecommunication systems logs. Manual, 108 pages plus 40 pages TNL, 7/76

GH20-1685

TELECOMMUNICATIONS ACCESS METHOD IMS/VS INTERFACE, LIC PROG 5740-XXC, GENERAL INFORMATION  
The TCAM-IMS/VS Interface is provided as a bridge between TCAM and IMS/VS. This manual includes a general description of the program and discusses its facilities and supported machine configurations. Manual

GH20-1702

EXTENDED TELECOMMUNICATIONS MODULES (EXTM) VERSION 2, FEATURE OF CICS/DOS/VS, LIC PROG 5746-XXB, GENERAL INFORMATION  
The Extended Telecommunications Modules (EXTM) Feature of CICS/DOS/VS provides linkage between CICS/DOS/VS 1.1.1 and a telecommunications network. It provides access to the IBM 3600 Finance Communication System and functions within the framework of Systems Network Architecture (SNA). Data flow for certain pre-SNA terminals is also provided. The basic function of this program is to establish and support a data flow between a CICS/DOS/VS application and a corresponding user application in the IBM 3601 Finance Communication Controller. This manual includes a general description of the facilities provided by the Extended Telecommunications Modules Feature of CICS/DOS/VS. Manual

TSO-3270 STRUCTURED PROGRAMMING FACILITY (SPF), LIC PROG 5740-XT2, REFERENCE

The Structured Programming Facility (SPF) is a programming aid that operates in the Time Sharing Option (TSO) environment and is designed to increase productivity in developing and modifying programs. SPF supports any VS2-TSO user who has a 24-line IBM 3270 display terminal equipped with a full keyboard, including 12 program function keys. SPF increases programmer productivity through:

- o display presentations which prompt the user and simplify command/data entry.
- o time-saving use of program function keys for commonly performed operations.
- o features which facilitate structured programming in a TSO environment

This manual provides detailed information on how to use and install SPF.

TELECOMMUNICATIONS CONTROL SYSTEM-ADVANCED FUNCTION (TCS-AF) OPERATIONS GUIDE

The manual provides the user of TCS-AF with information necessary for the operation of the TCS-AF product. Among the subjects covered in the discussion of day-to-day operations are the execution of the TCS-AF message control program, restart capabilities, and operator control commands and command responses. In addition, there is a section describing main storage requirements.

The level of TCS-AF described in this manual functions with TCAM level 5F.

Manual  
////5740-XXD

## SH20-1735

TCS/AF, 5740-XXD, CONCEPTS AND FACILITIES

The IBM Telecommunications Control System - Advanced Function (TCS-AF) program product provides control for network systems incorporating one or more CPU's, each with terminals and/or application programs. Based on and enhancing IBM's Telecommunications Access Method (TCAM), TCS-AF controls traffic between terminals and application programs, message switching between terminals, and message transfer between applications. Lines and terminals may be shared among applications on the same CPU, or different CPU's connected by communications lines. Both user application programs and complex subsystem environments such as IMS/VS and CICS/VS may be supported. Queuing and priority facilities for handling fixed message types may optimize line and speed delivery of inquiry/response messages.

A TCS-AF message control program (MCP), customized by the user with TCS-AF and TCAM macro instructions and

assembler language, operates in each network computer, usually in a different storage-protected region or partition from application programs. Support facilities include:

- o operator control for complex networks
- o online statistics gathering and security/authorization capabilities.
- o load-balancing over multiple intercomputer links
- o alternate path and indirect routing capabilities
- o message integrity safeguards
- o start/stop, binary synchronous communications, and (via VTAM) SHA synchronous data link control device support equivalent to TCAM's
- o aids for minimizing application program device-characteristic dependencies, including extended support for the IBM 3270 Information Display System
- o capabilities for interfacing to non TCS-AF systems in multicomputer networks

BATCH TERMINAL SIMULATOR II, IUP 5796-PGT, DESCRIPTION/OPERATIONS

The Batch Terminal Simulator II allows IMS/VS batch and online application programs to be tested in an IMS/VS batch environment without the use of teleprocessing hardware. BTS II provides information about each transaction and message as it progresses through the IMS/VS system. The facilities inherent in the BTS II design philosophy provide the user with a comprehensive means of checking and debugging:

- o Application program logic
- o Interfaces between application programs and IMS/VS
- o Data base activities
- o Teleprocessing activity
- o 3270 format control blocks

In addition, BTS II provides a number of debugging aids and application program performance statistics.

This publication provides a general description of BTS II and describes in detail the programs' functional capabilities and how to use them. The publication also includes explanations of BTS II messages and codes.

DISPLAY MANAGEMENT SYSTEM/VS VERSION 1 (DMS/VS) GENERAL INFORMATION

The Display Management System/VS Version 1 (DMS/VS) is a set of programs designed to simplify the implementation of online data processing operations using the 3270 Information Display System. The display management, file management, and message handling capabilities offered by DMS/VS make it possible to implement many new or existing applications in an online environment with little or no user programming. Preprogrammed facilities are provided to perform display operations such as paging and panel selection; data base and file operations such as data entry, inquiry, record update, and search; and message routing between display stations. Application specification is simplified through the use of DMS/VS forms on which the user describes data files, designs 3275 or 3277 Display Station images (panels), and describes the utility operations required by the application.

The DMS/VS operates under control of the IBM Customer Information and Control System/VS (CICS/VS).

This manual provides an overview of the DMS/VS functions. Statements of customer responsibilities, programming system requirements, and system configuration are included.

SH20-1865

DMS/VS VERSION 1, LIC PROG 5740-XC2 (OS/VS), 5746-XC2 (DOS/VS), PROGRAM REFERENCE

Display Management System/Virtual Storage (DMS/VS) is an application management offering which simplifies implementing online information systems using the 3270 Information Display System. The DMS/VS DL/I data base and file management, display management, and message handling capabilities make it possible to implement many new or existing applications in the online environment with reduced programming. Preprogrammed facilities are provided to perform display operations such as paging and panel selection, data base and file operations (data entry, inquiry, record update, and search), and message routing between display stations. Application specification is simplified through the use of DMS/VS forms on which the user describes data files, 3275 or 3277 Display Station images (panels), and the batch utility operations required by the application. The Customer Information Control System Version 1.2 (CICS/VS) is a prerequisite to DMS/VS. Application security through use of CICS/VS and DMS/VS sign-on procedures can be used to control operator access to predetermined applications.

The purpose of this manual is to provide sufficient information to enable the user to understand the functions of the system, the programs constituting the system, and the effort required for successful installation. The manual contains a system-oriented description of DMS/VS, provides guidance in installing the system, and describes the input and results.

Statements of customer responsibilities, programming system requirements, and system configuration are included.

DBPROTOTYPE II, IUP 5796-PJK, DESCRIPTION/OPERATIONS

The DBPROTOTYPE II Installed User Program consists of a set of programs that provide data base design evaluation support of Information Management System/Virtual Storage (IMS/VS). DBPROTOTYPE II enables the IMS/VS data base evaluator to obtain performance information about a data base and its Application programs before they are implemented. DB PROTOTYPE II includes a program which estimates performance characteristics of the data base from its description. Other programs enable the evaluator to create model data bases and skeletal application programs to run against these data bases. By analyzing different design parameters, the user can select the system design best suited to the needs of the installation.

This manual describes the functions and use of the DBPROTOTYPE II programs; how to specify the characteristics of the system being modeled, and; how to interpret the resulting performance data. It includes sections on modeling methodology, usability, sample problems, installation and operating procedures, program descriptions, error messages, and an index

ASP NETWORKING (PROGRAMMING RPP P09008) REFERENCE AND OPERATIONS - PROG 5799-ATB

This publication is intended for system programmers responsible for installation and maintenance of ASP and for ASP system operators. It describes how to install the ASP Networking PRPQ 5799-ATB in an existing ASP system and how to operate the network interface.

The system programmer should be familiar with the generation process for ASP. The system operator should be familiar with the operator procedures and commands for ASP.

This publication is comprised of five major parts and two appendixes.

- GENERAL DESCRIPTION contains an overview of the ASP Network Job Interface, a discussion of the hardware assumed, and description of the format of the distribution tape.
- INSTALLATION PROCEDURE contains a step-by-step procedure to be used to install ASP NJI in an existing production system.
- INITIALIZATION describes the new and changed initialization cards to be placed in the ASP startup deck.
- OPERATOR PROCEDURES describes the procedures and commands for starting, stopping, and controlling network operations.
- NJI MESSAGES describes the messages issued by the system.
- The two appendixes describe the line logging facility and operation in RJP mode.

HASP NETWORKING SYSTEM, PRPQ P09009, LIC PROG 5799-ATC, USER'S GUIDE

This publication is designed to be both a guide and a reference for the user of a HASP II Version 4.0 system with the HASP Networking PRPQ installed (HASP/NJI). It is assumed that the reader is familiar with the standard HASP II Version 4.0 and the use of HASP control statements. For a detailed description of standard HASP control statements,

see the OS/V52 HASP II Version 4 Operator's Guide (GC27-6993). In this publication, the first section, What Is NJI? gives an overview of the new capabilities of NJI. The next three sections, Extended Control Statement Facilities, Job and SYSOUT Transmission, and Bulk Data Transfer, describe the new capabilities in detail. They include descriptions of the control statements to be used to take advantage of these capabilities, and illustrations of how to use them. Appendix A contains a summary of the HASP/NJI control statements and their parameters. Appendix B contains sample job streams that can be used to accomplish a Bulk Data Transfer (See Terms Used in This Publication). Appendix C illustrates and explains the error messages that can be produced by HASP/NJI. Appendix D illustrates and explains system NOTIFY messages that can be produced by HASP/NJI.

TELECOMMUNICATIONS CONTROL SYSTEM - ADVANCED FUNCTION VERSION 4, PROG PROD 5740-XXD, MODEL MESSAGE CONTROL PROGRAM (MODEL MCP)

This manual contains an assembler listing and a narrative discussion of the Model Message Control Program (Model MCP) that is supplied with Telecommunications Control System - Advanced Function (TCS-AF).

The model MCP is intended to facilitate adaptation of TCS-AF to the user's specific requirements and resources by serving as an example for study and as a model containing tested and readily adaptable code. The model MCP may actually be run if the network definition corresponds (or is changed to correspond) to the user's resources.

Although efforts are made to keep all TCS-AF manuals current, the user should refer to the actual assembler listing of the model MCP, as received with TCS-AF, when using it to plan, or to aid in making modifications to his MCP.

GH20-2007

TELECOMMUNICATIONS CONTROL SYSTEM - ADVANCED COMMUNICATIONS FUNCTION (TCS-ACF), LIC PROG 5740-XY3, CONCEPTS AND FACILITIES

This manual describes the IBM Telecommunications Control System - Advanced Communications Function (TCS-ACF) program product, which provides control for single CPU network systems incorporating terminals and/or application programs. Based on and enhancing IBM's Telecommunications Access Method (TCAM), TCS-ACF controls traffic between terminals and application programs, message switching between terminals, and message transfer between applications. Lines and terminals may be shared among applications. Both user application programs and complex subsystem environments such as CICS/VS may be supported. Queuing and priority facilities for handling mixed message types may optimize line use and speed delivery of inquiry/responses messages.

A TCS-ACF message control program (MCP), customized by the user with TCS-ACF and TCAM macro instructions and assembler language, operates in the network computer, usually in a different storage-protected region or partition from application programs.

Support Facilities include:

- operator control for complex networks
- online statistics gathering and security/authorization capabilities
- alternate path and indirect routing capabilities
- message integrity safeguards
- start/stop, binary synchronous communications, and SNA synchronous data link control device support equivalent to TCAM's
- aids for minimizing application program device-characteristic dependencies, including extended support for the IBM 3270 Information Display System

Note: This manual describes the Basic TCS-ACF program and does not apply to the multicomputer Networking Feature.

SH20-2024

DMS/VS, 5740-XC2, APPLICATION PROGRAM DESIGN GUIDE

Display Management System/VS (DMS/VS) is a set of programs designed to simplify the implementation of online data processing operations using the 3270 Information Display System. The display management, file management, and message handling capabilities offered by DMS/VS make it possible to implement many new or existing applications in an online environment with little or no user programming. Preprogrammed facilities are provided to perform display operations such as paging and panel selection; data base and file operations such as data entry, inquiry, record update, and search; and message routing between display stations. These preprogrammed facilities will tend to simplify the design process and can lead to adoption of a standardized application design.

This manual presents a number of topics and coding examples which will help in the design and implementation of many DMS/VS applications. The manual is intended to be used as a reference document to complement information contained in the DMS/VS Program Reference Manual (SH20-1865), the DMS/VS Operations Guide (SH20-1864), and the DMS/VS Logic Manual (LY20-2266).

HOST REMOTE NODE ENTRY SYSTEM, IUP 5796-PJY  
DESCRIPTION/OPERATIONS (CURRENT RELEASE)

This Program Description/Operations Manual provides the user with sufficient information to understand, install and successfully use the program.

The Host Remote Node Entry System, Installed User Program (5796-PJY), provides the capability of making a VS1 system a remote job entry station to any OS/VS2 MVS/JES2 or SVS/HASP system or another OS/VS1 system. (In an OS/VS1 to OS/VS1 configuration, HRNES could be installed on both CPUs, but is not required. This program, running in a VS1 partition, will do the following; automatically sign on to MVS/JES2 or SVS/HASP, SCAN the specified VS1 input queues and send all jobs found there to MVS/JES2 or SVS/HASP for execution, receive all output from MVS/JES2 or SVS/HASP and will disperse it to the originator at either a local printer/punch or to an RJE printer/punch, provide all MVS/JES2 or SVS/HASP RJE commands to the VS1 operator, provide commands to the VS1 operator, allow sign-off from the VS1 console.

Manual, 8 1/2 x 11 inches, 48 pages, 1/78

SH20-2050

VSPC LIBRARY PRINT, IFP 5785-EAA, DESCRIPTION/OPERATIONS

This Program Description/Operations Manual provides the user with sufficient information to understand, install and successfully use the program.

The VSPC Library Print Program, Installed User Program

SH20

5785-BAA, provides the VSPC chief administrator with an easy aid to list all enrolled users and their profiles, and to list all file profiles currently in the VSPC library. These are read from either the VSPC directory (SYSLDIR) on disk or a backup tape created by the VSPC Service Program.

Output consists of four reports:

- . List of users and their profile attributes
- . List of users' files and their attributes
- . List of users' accumulated accounting information
- . List of System, Foreground Processor, and Auxiliary Processor profiles

SH20-2067

OS/VS1 PRIORITY QUEUE AGING PROCESSOR, IUP 5796-ARG,  
DESCRIPTION/OPERATIONS

This Program Description/Operations Manual provides the user with sufficient information to understand, install and successfully use the program.

The VS1 Priority Queue Aging Processor is designed to ensure a consistent level of service for all jobs processed in a system. Under the VS1 Priority Queue Aging Processor all jobs are periodically aged or advanced in priority within the input queue. Thus, low priority jobs will eventually reach the highest dispatching priority and be executed in a timely fashion.

Highlights:

- Variable, time initiated processing of the job queue
- Ages both centrally submitted (local) and RJE (remote) jobs
- Operator query and modification of the scan time period
- Executes in a normal batch partition
- Employs standard interfaces to the OS/VS1 operating system

SH20-2077

QUERY BY EXAMPLE, IUP 5796-PKT, DESCRIPTION/OPERATIONS  
(CURRENT RELEASE)

This manual is intended for those operations personnel responsible for the installation, application, and maintenance of Query-by-Example in the end-user environment. It is also intended for the end user who is a data processing professional.

The Query-by-Example Installed User Program is a VM/370 CMS-based facility. It is intended for use with an IBM 3277 (Model 2) Display Station in an interactive mode. It does, however, have a linear syntax for use in batch processing and with non-3277 input terminals. Query-by-Example provides the end user community with a simple and unified

approach to manipulating data stored on a Query-by-Example data base. The major feature of Query-by-Example is its high-level language which is simple to learn and use while providing a powerful capability for defining, retrieving, updating, inserting, and deleting Query-by-Example stored data. The Query-by-Example language provides for:

- Definition of tables.
- Definition of access control (user authority).
- Retrieval of data from tables via query operations.
- Flexible update, insert, and delete operations.
- Query storage and recall.
- Disk and printer output control.

Additional system features include:

- A bulk-loading facility for entering data into QBE.
- An IMS extract facility which provides a selection capability for incorporating, via the bulk-loading facility, subsets of operational IMS data bases into Query-by-Example.
- A set of utilities for backup, restore, analysis, and compaction of data.
- An application programming interface for PL/1 and APL programs executing in the VM/CMS environment.

Manual, 8 1/2 x 11 inches, 144 pages, 9/78

#### SH20-2100

##### S/370 FORTRAN H EXTENDED OPTIMIZATION ENHANCEMENT, IUP 5796-PKR, DESCRIPTION/OPERATIONS

This manual contains reference information for the IBM System/370 Fortran H Extended Optimization Enhancement.

The Optimization Enhancement provides a higher level of optimization for the compilation of Fortran language source programs into executable object programs. It also provides faster versions of the most commonly used mathematical subroutines in the Fortran library and of the interpretation and conversion subroutines necessary for formatted input and output. The Optimization Enhancement requires no changes to Fortran source programs.

The Optimization Enhancement generally results in object programs which run faster than those executed under the standard Fortran H Extended compiler and library. The amount of improvement varies from program to program and from one System/370 model to another. In general, the best results are observed for larger programs on larger systems.

The Optimization Enhancement runs under VM/CMS, OS/VS1, and OS/VS2 using the same conventions as the standard Fortran H Extended compiler and library.

Manual, 60 pages, 8/78

#### SH20-2078

##### QUERY BY EXAMPLE, 5796-PKT, DESCRIPTION/OPERATIONS

(CURRENT RELEASE)

(CURRENT RELEASE)

This manual is intended for a wide range of users, from people with little or no computer experience to those who know computers well and use them professionally. Therefore, the manual is organized into three general areas: introduction, language examples, and reference material.

The first two sections contain introductory information; they tell you about computers and teach you how to use Query-by-Example. The next four sections show you how to use all of the facilities of the Query-by-Example language to retrieve, update insert, and delete data from tables, as well as how to create tables of your own, authorize others to use your tables, store queries for later use, and manipulate your output. The last section contains reference material to be used after you have learned the language. Appendices contain additional reference material. Query-by-Example is a powerful and flexible language which can be used to manipulate tabular information; that is, information arranged by rows and columns.

Query-by-Example lets you look at, update, create, add to, and delete from this data in a convenient and simple manner. For example, you might want to obtain the names of all employees who work second shift in the Chicago area. To obtain a list of these names, you fill in a blank table by typing in the required information, thus asking Query-by-Example to get the list for you. The list of names appears in front of you on a display screen. You can then either act on this information by updating the data or make a new request.

##### BULK DATA TRANSFER, IUP 5796-PKK, DESCRIPTION/OPERATIONS

The Bulk Data Transfer IUP provides users of NJE for JES2, HASP/NJI and ASP/NJI with the capability to transfer data sets from one mode in a network to another. This requirement is common to a number of customers who wish to transmit large data files between geographically separated systems or co-located systems via the channel-to-channel adaptor. This manual includes operating procedures, installation instructions, message formats, and error conditions for this IUP.

Manual, 8 1/2 x 11 inches, 32 pages, 5/78

#### SH20-2105

##### IMS/VS EMERGENCY LOG TERMINATOR, IUP 5796-ATN, DESCRIPTION/OPERATIONS

This Program Description/Operations Manual provides the user with sufficient information to understand, install and successfully use the program.

The IMS/VS Emergency Log Terminator program is to be used when an IMS/VS System Log Tape cannot be otherwise closed through normal programs and procedures. This

SH20

typically occurs following a catastrophic failure such as a power failure.

Expeditious closing of the IMS/VS System Log Tape is required in order to attempt IMS/VS Emergency Restart as soon as possible after a system failure. This is frequently successfully done by the existing IMS/VS System Log Termination Utility Program (DFSIFLTO). When DFSIFLTO is not successful, such as when the system dump is not available, due to a power failure, the log must be closed in some other way before an Emergency Restart can be attempted. In both on-line and batch IMS/VS environments, the properly closed log is also needed to effect data base recovery. To insure the integrity this requires, use of the IMS Write Ahead Log feature is a prerequisite for this IUP.

Manual, 8 1/2 x 11 inches, 40 pages, 9/78

TELECOMMUNICATIONS CONTROL SYSTEM ADVANCED COMMUNICATIONS FUNCTION (TCS-ACF), NETWORKING, CONCEPTS AND FACILITIES MANUAL

This manual introduces the Networking feature of TCS-ACF, which may be ordered with TCS-ACF Base program. The Networking feature enriches the functions provided by ACF/TCAM with the Multisystem Networking Facility.

The Networking feature of TCS-ASF:

- . Extends device support provided by ACF/TCAM MSNF
- . Provides enhanced routing capability and traffic management facilities.
- . Provides an integrated inter-host message switching capability.
- . Simplifies network definition in a multi-host network.
- . Provides a structure for incorporation of foreign (non-SNA) hosts, foreign links, or multiple SNA networks into a single network.
- . Provides a Model Message Control Program that can be run without change, or tailored to the user's requirements.

Manual, 36 pages, 1/79

## SH20-2161

RACF/CODES UPDATE SYSTEM, IUP 5796-PLK DESCRIPTION/OPERATIONS

The RACF/Codes Update System Installed User Program is a fully automated password generation and auditing system. It provides the installation with the ability to update RACF user type passwords and/or audit their users within any desirable time frame. With the use of the system, a RACF installation can centralize the control of the password assignment and change functions which are normally a RACF user responsibility.

The RACF/Codes Update System is designed to be used with "snap-out" form-type mailers, which are readily available from various forms vendors. The program prints the new password, name and address, and any user message on the cover sheet of the special form. This cover sheet is removed and held as the master listing and is used for the auditing process. The new password and message are printed only on the cover sheet and on the inside part of the form. This is accomplished by the arrangement of carbons within the mailer envelope. The new password is visible only when it is separated from the envelope portion of the multipart form.

## SH20-2166

IMS - CMS DATA LINK FOR VM/370, IUP 5796-PLE, DESCRIPTION/OPERATIONS

This program links the power of APL or CMS data manipulation

with the data storage capabilities of IMS. An APL or CMS user may submit IMS transactions and, upon completion of IMS processing, have IMS output available in the users' APL or CMS address space. After processing the data, the user may store results in the IMS system.

This publication describes how to install and use the program. Sections concerning hardware and software prerequisites, sample JCL, and program checkout procedures are intended to be used by systems programmers. Other sections dealing with terminal procedures are intended for APL and CMS terminal users.

Manual, 88 pages, 1/79

## SH20-2169

HIGH-SPEED SEQUENTIAL RETRIEVAL OF IMS/VIS DATA BASES, IUP 5787-LAA, DESCRIPTION/OPERATIONS

Many IMS/VIS installations run batch DL/I jobs which sequentially process large physical DL/I data bases. If the installation is an online system, these batch runs may have to be made at night while the data bases are not being updated. In both cases there may be a need to increase the system throughput. High-Speed Sequential Retrieval (HSSR) was designed as a high performance option to improve throughput for sequential processing of IMS/VIS physical data bases. The reduction in CPU-time depends on the Data Base environment, but could reach up to 80% of the CPU-time needed by DL/I.

With HSSR, an installation may:

- Reduce the time required for batch processing
- Find that new batch applications are now feasible
- Run online for a longer period of time

This Installed User Program was developed by, and is running at, the Swiss Bank Corporation, Basel, Switzerland.

JES3 MONITORING FACILITY II, IUP 5796-PLW, DESCRIPTION/OPERATIONS

JES3 Monitoring Facility II (JMF II) is a software monitor that provides the ability to measure and evaluate the performance of an existing IBM system operating under JES3 Release 3.

This program Description/Operations Manual provides all the material necessary to install and operate the JMF II Installed User Program (IUP). It is intended for the systems programmer(s) responsible for maintaining and tuning the JES3/MVS operating system.

An in depth knowledge of JES3 internals is required for proper and effective use of this program. This document does not provide that knowledge.

SH20-2177

DATA EXTRACTION PROCESSING & RESTRUCTURING SYSTEM,  
IUP 5796-PLH, DESCRIPTION/OPERATIONS

This is a generalized data restructuring and extraction program. It takes sequential files and/or DL/I data bases, and restructures them or extracts information from them, to form new sequential files or different DL/I data bases. During the process, validity checking and data translation are performed.

The system is driven by two high-level control statement facilities: Define, for data description, and Convert, for data restructuring.

The program consists of three components: a reader, a restructurer, and a writer. The system is written in PL/I and assembler languages. It generates customized PL/I Programs and requires PL/I compiler and libraries for execution. It operates under OS/VSI, SVS, and MVS. Manual, 8 1/2 x 11 inches, 356 pages, 8/79  
////5796-PLH

TELECOMMUNICATIONS CONTROL SYSTEM - ADVANCED COMMUNICATIONS  
FUNCTION (TCS-ACF) - NETWORKING LIC PROG 5740-XY3  
MODEL MESSAGE CONTROL PROGRAM (MODEL MCP)

This manual contains an assembler listing and a narrative discussion of the Model Message Control Program (Model MCP) that is supplied with Telecommunications Control System - Advanced Communications Function (TCS-ACF), Base Program with Networking Feature.

The model MCP is intended to facilitate adaptation of TCS-ACF to the user's specific requirements and resources by serving as an example for study and as a model containing tested and readily adaptable code. The model MCP may actually be run if the network definition corresponds (or is changed to correspond) to the user's resources.

Although efforts are made to keep all TCS-ACF manuals current, the user should refer to the actual assembler listing of the model MCP, as received with TCS-ACF, when using it to plan, or to aid in making modifications to his MCP.

DMS/CICS/VS, 5746-XC4, 5740-XC5, GENERAL INFORMATION  
(CURRENT RELEASE)

Development Management System/CICS/VS (DMS/CICS/VS) is a set of programs designed to simplify the implementation of online data processing operations using the 3270 Information Display System. The display management, file management, and message handling capabilities offered by DMS/CICS/VS make it possible to implement many new or existing applications in an online environment with little or no user programming. Preprogrammed facilities are provided to perform display operations such as paging and panel selection; data base and file operations such as data entry, inquiry, record update, and search; and message routing between display stations. Application specification is simplified by the application generation facility. The user describes data files, display station images (panels), and application processing either interactively from a display station or through the use of DMS/CICS/VS forms.

Calculation/edit statements may be used to perform arithmetic operations, editing of data fields for validity and movement of data between fields. The DMS/CICS/VS processing flow may be altered through the use of these calculation/edit statements. The number of user exit routines previously needed to perform these functions should be significantly reduced.

DMS/CICS/VS operates under control of the IBM Customer Information Control System/VS (CICS/VS). This manual provides an overview of the DMS/CICS/VS functions. Statements of customer responsibilities, programming system requirements, and system configuration are included.

The DMS/CICS/VS online functions and offline maintenance facilities are distributed as part of the DMS/CICS/VS base program products (5740-XC5 and 5746-XC4). The batch and interactive application definition facilities and the batch application generation facility are distributed as the DMS/CICS/VS Application Generation feature.

VS APL EXTENDED EDITOR AND FULL SCREEN MANAGER, IUP  
5796-PLY, DESCRIPTION/OPERATIONS

This manual describes the functional capabilities of the VS APL Extended Editor and Full Screen Manager. It contains a general overview of the editor, detailed descriptions of the commands available, and illustrations of the usage of the commands. Also included are the instructions necessary to install and use the VS APL Extended Editor and Full Screen Manager.

The VS APL Extended Editor is written in S/370 Assembler and is a replacement for the standard APL del-editor. The Extended Editor supports the hardware editing features of the 3270 display station, and aids the APL programmer in the creation, modification, and testing of programs in a shorter amount of time.

The Full Screen Manager is an auxiliary processor that allows the APL programmer to manipulate the 3270 console in full screen mode. The auxiliary processor, AP124X, is similar to the APL124 auxiliary processor for VSPC and CICS. AP124X has some additional capabilities that are not available in the versions for VSPC and CICS.

Some of the major features of this IUP are:

- Full Screen Support for Editor
- Full Screen Support for APL programmer
- Multiple Function Parallel Editing
- Execution of APL expressions within the Editor
- Context Editing commands
- Ability to Edit Character Matrices and Vectors
- Compatibility with del-editor
- Similarity to CMS and TSC Editors

NETWORK MONITOR DESCRIPTION/OPERATIONS

Network Monitor provides 3270 Display Station users with a single interface to application subsystems available on a network.

The 3270 Display Stations users are presented with an installation defined logo on the screen, and enter the name of the application with which a session is desired. Network Monitor then checks the status of the application and, if the application is active and accepting logons, passes control of the terminal to that application. If the application is not active, or is active but not accepting logons, the user is given an appropriate message.

Network Monitor operates as a VTAM application program, and will operate with VTAM II, and all releases of ACF/VTAM, in a VSI or MVS environment. It supports, in Model 2 mode, all models of the 3270 Display Station.

GIS/VS, LIC PROG 5740-XX7, SPECIFICATIONS (CURRENT RELEASE)  
Describes the warranted specifications of the program.  
The Generalized Information System/Virtual Storage, Version 1, Release 1, Modification Level 1 (GIS/VS R1.1), provides additional functions and enhancements over GIS/VS 1.0, while remaining compatible with and retaining the functional capabilities of GIS/VS 1.0.  
GIS/VS is designed to support a wide variety of information processing activities by providing the facilities for defining, maintaining, and processing OS/VS and DL/I data files required in many application areas. GIS/VS is designed to provide broad, general purpose, processing capabilities by generating tailored processing modules on the basis of system-resident data file descriptions together with user-entered, high-level, procedural language statements. The generated modules are then executed to provide the requested file processing actions.

TPF VERSION 2 DATABASE CONTROL PROGRAM REFERENCE (CURRENT RELEASE)

This manual contains a general description, plus implementation and usage information for functions within TPF that control file accessing and integrity including input/output control, device support, and file pool management. The audience comprises marketing personnel, system engineers, and customer personnel who need to understand the general characteristics of the function, or who are responsible for its implementation or ongoing operations. TPF provides a reliable, high performance, operating system for realtime, transaction-driven applications. It is capable of supporting large terminal networks with thousands of terminals and multiple CPUs, largely due to specialized management techniques designed to optimize efficiency in data communication, data base, and system resources.

PASCAL/VS, 5796-PNG, PROGRAMMER'S GUIDE (CURRENT RELEASE)

Pascal/VS is a Pascal compiler operating in MVS and VM/CMS. Originally designed as a high level programming language to teach computer programming by N. Wirth (circa 1968), Pascal has emerged as an influential and well accepted user language in today's data processing environment. Pascal provides the user with the ability to produce very reliable code by performing many error detection checks automatically.

The compiler adheres to the currently proposed ISO standard and includes many important extensions. The language extensions include: separate compilation, dynamic character strings and extended I/O capabilities. The implementation features include: fast compilation, optimization and a symbolic terminal oriented debugger that allows the user to debug a program quickly and efficiently. This is a component of SK2T-0902.

Manual

## SH20-6168

PASCAL/VS, 5796-PNG, LANGUAGE REFERENCE (CURRENT RELEASE)

Pascal/VS is a Pascal compiler operating in VSI, MVS and VM/CMS. Originally designed as a high level programming language to teach computer programming by Professor Niklaus Wirth (circa 1968), Pascal has emerged as an influential and well accepted user language in today's data processing environment. Pascal provides the user with the ability to produce very reliable code by performing many error detection checks automatically.

This publication describes the implementation of the language by this compiler, and is intended as a reference guide for the Pascal programmer.

This is a component of SK2T-0902.

MVS RESOURCE UTILIZATION TOOL USER'S GUIDE

The MVS Resource Utilization tool captures and reports the use of resources serialized through the ENQ and RESERVE interfaces in MVS/SP or MVS/XA. The basic elements presented using this tool include the name of the resource, identification of its users, active time of request, and scope of serialization. This tool is intended to assist those users planning the implementation of multiple system global resource serialization (GRS) environments.

CICS/VS PERFORMANCE ANALYSIS REPORTING SYSTEM GENERAL INFORMATION

The publication describes the online capabilities of CICS/VS, including interactive starting and stopping of CMF data collection, display of collected data at a 3270 terminal, and an alert monitor to notify users of possible CICS/VS performance problems when user-specified thresholds are exceeded. The menus, prompts, and online help that facilitate the use of the online functions are discussed, as well as the fast path option for experienced users.

This version is enhanced by an optional function called Multiple System Alert Monitor (MSAM). Its purpose is to display resource information and alert conditions from multiple CICS regions on a 3270 PC or 3270 PC/AT. In addition, PC graphics can be used to emulate CICS/VS GDDM graphic displays.

The publication also describes batch generation of reports and graphs that show the way in which CICS/VS resources are being used, including three reports based on information collected by CICS/VS, eight tabular reports based on CMF performance, accounting, and exception class data, and twenty different CICS/VS graphic reports based on CMF data.

In addition, the hardware and software requirements for CICS/VS and CICS/VS are listed.

Prerequisite publication is CICS/VS General Information, GC33-0155.

CICS/VS PERFORMANCE ANALYSIS REPORTING SYSTEM/MVS INSTALLATION AND ADMINISTRATION GUIDE

This publication is addressed primarily to the system programmer responsible for installing CICS/VS. It also contains information useful to those involved in planning for a CICS/VS installation and managing the use of the product after installation. Knowledge of MVS, CICS/VS, and CICS/VS is assumed.

The publication describes the prerequisites for installing CICS/VS and the decisions involved in the installation. It gives step-by-step instructions for installing the product under SMP/E or SMP4. It also describes how to verify successful installation.

Prerequisite Publications are: CICS/OS/VS Installation and Operation Guide, SC33-0071; CICS/OS/VS Performance Guide, SC33-0229; CICS/OS/VS Customization Guide, SC33-0239; CICS/OS/VS Resource Definition Guide (Online), SC33-0186; CICS/OS/VS Resource Definition Guide (Macro), SC33-0237; OS/VS2 System Maintenance Program User's Guide, GC28-0673; System Maintenance Program Extended User's Guide, SC28-1302; System Maintenance Program Extended Reference, SC28-1107, or equivalent familiarity with MVS, SMP, and CICS/OS/VS.

MULTIPLE APPLICATIONS FROM A SINGLE SCREEN, 5785-EDH, DESCRIPTION/OPERATIONS

Multiple Applications from a Single Screen is a general-purpose program which allows a 3270 terminal user to access several VTAM applications concurrently. The user is presented with a panel at sign-on which the desired applications can be specified. The user can switch easily from one to another using PF keys or commands. This publication is intended for the user and installer of the program. It describes product functions, installation procedures, and how to use the product.  
Manual, 8 1/2 x 11 inches, 06/86  
////5785-EDH

relationship between IMS/VS and OS/VS; a general description of IMS/VS system and terminal functions and how they are used; a description of each terminal supported by IMS/VS; a description of the function and use of each IMS/VS terminal command, including examples; suggested procedures for the online execution of IMS/VS.

IMS/VS V1, LIC PROG 5740-XX2, UTILITIES REFERENCE

This publication is designed for programmers, system analysts and computer operators and describes how to execute the Information Management System/Virtual Storage (IMS/VS) utility programs under the operating system. Individual Chapters provide information on (1) Data Base Description Generation and the control statements used as input to DBDGEN; (2) Programs Specification Block Generation and the control statements used as input to PSBGEN; (3) Application Control Block Maintenance Utility in creating and maintaining a consolidated library of data base and program descriptions used by the DB/DC System; (4) Data Base Reorganization/Load Processing utilities in reorganizing a data base; (5) Data Base Recovery System utilities in reconstructing a data base; (6) Utility Control Facility and how it implements the functions of the recovery and reorganization utilities; (7) Log Maintenance Utilities and how to produce a new system log from one containing read errors and how to recover log data; (8) Log Data Formatting utilities that perform analysis on and print reports from the system log tape; (9) Performance Reporting utilities for organizing, formatting, and printing performance-related reports; (10) System Service utilities, which include the SPOOL SYSOUT Print and Multiple Systems Verification utilities; (11) Fast Path MSOB offline utilities, which initialize, load, maintain, and reconstruct MSDBD; (12) Fast Path DEDB utilities for initializing, maintaining, and reorganizing DEDBs.

The reader should be familiar with the concepts and terminology described in IMS/VS General Information (GH20-1260), System/Application Design Guide (SH30-9025), and Application Programming Reference Manual (SH20-9026).

IMS/VS VERSION 1 APPLICATION PROGRAMMING DESIGNING AND CODING (CURRENT RELEASE)

This retitled edition supersedes the seventh edition, called the IMS/Version 1 Application Programming Reference Manual. This manual contains the application programming information from the previous edition, and additional information on designing IMS/VS application programs. The application programming information from the previous edition has been separated into a guidance part and a reference part to better support application programming programmers. Its contents will assist the design of an IMS/VS system. It contains programming application information and additional information on designing IMS/VS application programs. Guidance and reference information is separated to better support application programming.

Provides the information required to control the online execution of IMS/VS and to establish procedures for the operator of the IMS/VS master terminal and operators of remote terminals attached to IMS/VS. The intended audience is IMS/VS machine operations personnel responsible for an IMS/VS installation's operating procedures.

This publication provides: an overview of the

GH20-9035

GIS/VS, LIC PROG 5740-XX7, GENERAL INFORMATION

This manual surveys the operational concepts and system capabilities of the Generalized Information System/Virtual Storage. The manual introduces the language of GIS/VS and describes the file organization and processing actions supported by GIS/VS.

The Generalized Information System operates on System/370 Virtual Storage Systems and supports a wide variety of applications by providing information handling capabilities against many typical data base organizations. GIS/VS provides facilities for defining, maintaining, and retrieving data from user files under direction of the using installation and its personnel.

Manual, 76 pages

DL/I DOS/VS LOW-LEVEL CODE/CONTINUITY CHECK FEATURE REFERENCE OPERATIONS (CURRENT RELEASE)

This manual is intended for application programmers who want to use the services of Low-Level Code/Continuity Check in Data Language/I DOS/VS (LLC/CC in DL/I DOS/VS). It describes the functions and the operation of the system, and contains all the information required to generate and execute LLC/CC in DL/I DOS/VS.

Low-level codes are used primarily in the manufacturing industry to indicate the lowest level at which at particular part number is found in all product structure trees. The product structures must not contain any loops. Therefore, a continuity check is applied to ensure proper assembly-to-subassembly continuity.

The reader is assumed to have a working knowledge of the functions and the facilities of Data Language/I Disk Operating System/Virtual Storage (DL/I DOS/VS). He should be familiar with the contents of the following publications:

- o DL/I DOS/VS Application Programming Reference Manual, SH12-5411
- o DL/I DOS/VS Operator's Reference Manual and Messages and Codes SH12-5414
- o DL/I DOS/VS Utilities and Guide for the System Programmers, SH12-5412

IMS/VS, 5740-XX2, VERSION 1 FOR REMOTE SNA SYSTEMS PROGRAMMING GUIDE

This manual provides planning and reference information for the system analysts and programmers, and application programmers of Systems Network Architecture (SNA) based networks. The manual addresses the network communication protocols required for programmable logical units to communicate with IMS/VS. It also addresses the Intersystem Communication facility of IBM/VS's Multiple Systems Coupling Feature. Intersystem Communication permits multiple communication sessions between IMS/VS and another subsystem such as another IMS/VS system, CICS/VS, or a user-written subsystem, provided that the other subsystem also implements ISC.

Only those areas of IMS/VS that are directly affected are addressed. Refer to other IMS/VS manuals for additional IMS/VS information. A knowledge of IMS/VS, particularly the Data Communication Feature, is required to understand this manual. Readers should be familiar with SNA and VTAM concepts and facilities that govern communication between a

This publication describes the APL Shared Variable System (APLSV) Version 3, an interactive programming system that executes statements written in APL. This publication describes the TSIO and auxiliary processor which allows an APL user to perform input and output operations to disks, magnetic tapes, line printing, and other devices. It also describes how to use a 3270 Information Display Terminal in an APLSV System.

The information in this publication supplements APL language, GC26-3847, which is required for full understanding of the use and facilities of APLSV. This publication is intended for all APLSV users.

APL SHARED VARIABLES (APLSV) VERSION 3.0 SPECIFICATIONS, PROGRAMMING RPQ MG6282, PROG 5799-AQC

APL SHARED VARIABLES (APLSV) VERSION 3.0 SPECIFICATIONS interactive system designed to give rapid response to a large number of terminal users. This publication is aimed at customer employees and prospective customers responsible for planning and maintaining an installation. It describes the enhancements which make APLSV differ from its predecessor, APL/360, and describes the ways in which it differs from earlier releases of APLSV.

The following are described: operation, programming Systems Supported, System Requirements, Compatibility among APL systems, conversion considerations, reference material, and programming service classification.

It is the preferred APL system to be used in OS/VS1 or OS/VS2 environments where BSAM and/or BDAM are the access methods in use. Since it provides its own EXCP-level terminal access method, it may be considered for use where main storage requirements are to be minimized.

The Program Product Specifications (PPS) describe the warranted specifications of the subject Program Product.

DB/DC DATA DICTIONARY, 5740-XXF, 5746-XXC, GENERAL INFORMATION (CURRENT RELEASE)

The DB/DC Data Dictionary is an IMS/VS or DL/I DOS/VS application system that serves as a tool for data base design, maintenance, and administration. Through the dictionary programs, users can create a central, organized collection of definitions of their data resources, including non-DL/I data sets as well as DL/I data bases, which can then be effectively evaluated and controlled. With batch commands, users can enter definitions directly from COBOL copy libraries (or sequential files containing COBOL source statements) and DL/I DBD and PSB libraries and then add, change, copy, search, delete, and retrieve definitions as desired. In addition, through the IBM 3277 Display Station Model 2, IMS/VS DB/DC users can enter most commands online and can enter and display DL/I definitions on display forms presented by an interactive display forms facility. Machine and human readable output includes varied reports, programming language data structures, DL/I data base descriptions (DBDs), and program specification blocks (PSBs). This manual explains the purpose of the dictionary and gives examples of its use. It outlines responsibilities in installing the system; machine, programming, and storage requirements; and compatibility with the previous IBM field-developed IBM Dictionary System and its enhancements.

SH20-9105

OS/MVI 3350 and 3330 MODEL II PROGRAMMER'S GUIDE, PROG 5799-ARG, RPQ EG4653

This manual is intended for installation managers and system programmers who require planning, conversion, and system generation information to install the IBM 3350 Direct Access Storage and the IBM 3330 Model II Disk Storage on their systems.

This manual also contains information on how to use the 3350 or 3330 Model II which is intended for the application and system programmers who write programs using the 3350 or 3330.

One section describes operating considerations for the operator when using OLTEP, HASP, and AP-1 with the 3350 and 3330.

A messages and codes section describes the new messages supported. There is no prerequisite reading for the understanding of this manual; however, a basic knowledge of computers and direct-access storage devices is assumed.

OS/VS2 MVS SEQUENTIAL ACCESS METHOD-EXTENDED (SAM-E), LIC PROG 5740-AML, -AM3, GENERAL INFORMATION

Sequential Access Method-Extended (SAM-E) is an enhancement to the existing System Control Program (SCP) version of the Sequential Access Method (SAM). SAM-E improves the performance of SAM for DASD operations. This general information manual enables the prospective user to prepare for using SAM-E. The manual's audience is data processing managers and others seeking information on SAM-E.

The reader is expected to be familiar with basic concepts such as access methods, direct-access storage, and the distinction between data-set organization and data-set processing. The sections dealing with those concepts in the VS1 and MVS Data Management Services Guide, GC26-3874 and GC26-3875, are suitable for preparatory reading.

 ////5799-ATQ

SH20-9136

HASP/MVT/3800 USER'S GUIDE, PRPG MJ0792 - LIC PROG 5799-ATQ  
 HASP is an optional program not required for the operation of an OS/MVT system. This book is intended for programmers at installations that have chosen to install HASP. This book is divided into four sections: Routing a job through the system with HASP, obtaining output with HASP, coding JCL in the HASP environment, and coding HASP control statements.  
 Note: The external characteristics of HASP can be greatly influenced by the parameters used at HASP generation. This book does not describe all of those options. Also, HASP is often modified by an installation to provide different external characteristics. Thus, the descriptions herein should not be regarded as typical. If your installation's system programming staff has made changes to HASP, be sure you understand the effects of those changes.

 ////5740-AH3

SH20-9145

IMS/VS, 5740-XX2, VERSION 1 PRIMER  
 This publication is intended for first-time users of the Information Management System/Virtual Storage (IMS/VS). It provides system analysts, data base administrators, system programmers, and application programmers with the information necessary for the design, installation, and operation of their initial applications, using a subset of the data base or data base/data communication facilities of IMS/VS. Included is the information the user would ordinarily need to:

- Plan for IMS/VS use
- Design DL/I data bases
- Design, write, and test IMS/VS programs
- Install IMS/VS
- Operate IMS/VS
- Maintain IMS/VS

The IMS/VS Primer is designed to be used with IMS/VS Primer Master Terminal Operator's Guide - BTAM (SH20-9146), IMS/VS Primer Master Terminal Operator's Guide - VTAM (SH20-9147), IMS/VS Primer Remote Terminal Operator's Guide (SH20-9148), and the IMS/VS Primer Sample Listings (SH20-9149). The only other IMS/VS manuals the user of the subset would normally have to refer to are the IMS/VS General Information Manual (GH20-1260) and the IMS/VS Messages and Codes Reference Manual (SH20-9030).

By using the approach suggested in the IMS/VS Primer, users can avoid much of the complexity usually associated with IMS/VS. Many of the steps required to install IMS/VS can be shortened, simplified, and/or accomplished in a more orderly manner.

Manual, 8 1/2 x 11 inches, 500 pages, 9/78  
 ////5740-XX2

SH20-9146

IMS/VS VERSION 1, LIC PROG 5740-XX2, PRIMER MASTER TERMINAL OPERATOR'S GUIDE: BTAM

This publication is a guide for the master terminal operator to operate the online Information Management System/Virtual Storage (IMS/VS) as described in the IMS/VS Primer (SH20-9145) that uses the Basic Telecommunications Access Method (BTAM). Included is an introduction to IMS/VS, information on how to operate the master terminal, and a glossary of frequently used terms. Also included are descriptions of:

- The flowcharts, forms, and tables that are used with detailed IMS/VS operating instructions.
- The format and function of the IMS/VS subset commands.
- The configuration of the online IMS/VS system.

This guide should be used together with the IMS/VS Primer which describes a subset of IMS/VS. In addition, the IMS/VS Messages and Codes Reference Manual (SH20-9030) and the IMS/VS Primer Remote Terminal Operator's Guide (SH20-9148) should be used.

OS/VS DB/DC DATA DICTIONARY ADMINISTRATION AND CUSTOMIZATION GUIDE (CURRENT RELEASE)

This publication is addressed to data base administrators, and other administrative personnel who are responsible for establishing the DB/DC Data Dictionary at an installation. The book is also for system programmers who code user programs and validation routines in response to specifications defined by end users, system analysis personnel, or data base administrators.

This manual is a guide to the administration of the Dictionary, and is used for installation planning. This book is also a reference manual for Dictionary extensions to describe data resources not formally supported by the Dictionary standards categories, and to describe how user programs can be coded to access Dictionary data. This book assumes familiarity with the operation of the Dictionary and an understanding of the use and syntax of its commands. The prerequisite manual is the OS/VS DB/DC Data Dictionary Terminal User's Guide and Command Reference, SH20-9189.

Manual, 8 1/2 x 11 inches, 475 pages, 1/84

DOS/VS DB/DC DATA DICTIONARY TERMINAL USER'S GUIDE AND REFERENCE (CURRENT RELEASE)

This publication is a guide for terminal operators, librarians, and others who use, or direct others to use, the DOS/VS DB/DC Data Dictionary. It is intended as a guide to using the Dictionary online and preparing batch input streams, and as a reference for all Dictionary commands, batch forms, and display forms. It is intended as a companion publication to DOS/VS DB/DC Data Dictionary Applications Guide, SH20-9197, which contains extensive examples of the use of commands and forms.

Before using this publication, DOS/VS DB/DC Data

SH20

Dictionary General Information Manual, GH20-9193, should be read as an introduction to the basic application of the Dictionary and the terminology associated with the Dictionary.  
Manual, 8 1/2 x 11 inches, 360 pages, 12/81

SH20-9203

VSPC VERSION 2 FOR OS/VS2 MVS WRITING PROCESSORS

This book is intended for the experienced data processing professional who wants to extend the facilities provided by VSPC to the terminal user. The book describes the VSPC facilities the programmer uses to design, code and run terminal-oriented processors tailored to the organization's needs under VSPC.

This book gives the purpose of writing processors for VSPC and describes the part of VSPC that controls the communication between processors that run under VSPC or as batch jobs. The steps in writing processors are also described.

DOS/VS DB/DC DATA DICTIONARY INSTALLATION GUIDE (CURRENT RELEASE)

This publication explains the steps needed to install the DOS/VS DB/DC Data Dictionary in the DOS/VSE environment. DOS/VSE, DL/I, and CICS must be installed prior to installing the Dictionary.

This book contains sample job control statements that can be modified for a particular installation. It also describes the procedures for verifying Dictionary function and lists the Dictionary commands.

The prerequisite publication is DOS/VS DB/DC Data Dictionary General Information, GH20-9192.  
Manual, 8 1/2 x 11 inches, 150 pages, 12/81  
////5746-XXC

SH20-9204

VSPC VERSION 2 FOR OS/VS2 MVS GENERAL USER'S GUIDE AND COMMAND LANGUAGE

Provides introductory, procedural, and reference information about the VSPC general commands, CLIST processor commands, and the VSPC facilities they control, for the general user. The manual describes VSPC facilities available to the general user, how to conduct terminal sessions, and how to use commands for both interactive and deferred sessions. A section describing how to use VSPC batch processing facilities is included. A separate reference section provides formal definitions and formats for VSPC commands and CLIST processor commands.

Manual, 8 1/2 x 11 inches, 200 pages, 04/81

DOS/VS DB/DC DATA DICTIONARY DEMONSTRATION AND CUSTOMIZATION GUIDE (CURRENT RELEASE)

This publication is addressed to data base administrators and other personnel responsible for establishing the DOS/VS DB/DC Data Dictionary at an installation.

The publication is also for system programmers and those who code user programs and validation routines in response to specifications defined by end users, systems analysis personnel, or data base administrators.

Before using this publication, the user should understand the basic concepts of the Dictionary system. The DOS/VSE user should have an understanding of DL/I DOS/VS, and, for online, CICS/DOS/VS with DL/I applications. Knowledge of the access methods used by DL/I is assumed.

IMS/VS VERSION 1 RELEASE GUIDE

This publication is an aid to evaluating and planning for the current release of IMS/VS, and it highlights the changes to IMS/VS that resulted from the current release. This book compares Release 3 with Release 2 of IMS/VS and is primarily intended for people who want to move from Release 2 to Release 3. To use this book effectively, the reader should understand IMS/VS concepts and how IMS/VS functioned in previous releases. This book explains how to change resources without bringing your IMS/VS system down and how to attach to a DB2 subsystem from IMS/VS. The following are some of the additional topics covered: Fast Path, DBRC, and IRLM enhancements; MFS support for MVS/XA; and separate address space for DL/I.

IMS/VS VERSION 1 PRIMER FUNCTION INSTALLATION GUIDE

This manual describes how to install and use the primer function of IMS/VS. This function is a series of batch sample jobs and online transactions that, by demonstrating a subset of the functions of IMS/VS and CICS/VS DL/I, serves as a model on which to base these systems. The book is intended for new users who want to install a subset of the full IMS/VS function, for users of an installed IMS/VS Data Base System running in batch who want to add online facilities, and for users of an installed CICS/VS who want to access IMS/VS DL/I data bases. The book assumes an understanding of JCL, the operating system in use (OS/VS1 or OS/VS2 MVS), VSAM, and SMP4. Implementation of online transactions requires knowledge of the Network Control Program and a telecommunications protocol (VTAM or BTAM), while CICS/VS DL/I subset installation requires knowledge of CICS/VS Version 1 Release 6.

Prerequisite and associated publications are listed in the preface.

APL2 GENERAL INFORMATION (CURRENT RELEASE)

This publication introduces the APL2 product, and provides information to help prospective users evaluate the product. This book is useful for personnel directly involved in daily business operations as well as those responsible for selecting, installing, and administering technical products and equipment. It gives information for application users and programmers, and it describes the language, session manager, editors, workspaces and auxiliary processors distributed with APL2. Also included is a description of the requirements, preparation for installations, and preparation of the operating environment (CMS or TSO). The book contains a comparison between APL2 and VS APL and shows a comparison between programs written in APL2 and PASCAL.

OS/VS DB/DC DATA DICTIONARY INTERACTIVE DISPLAY FORMS FACILITY USER'S GUIDE

This publication is for data entry personnel, librarians, data base administrators, programmers, and others who use the Interactive Display Forms facility of the OS/VS DB/DC Data Dictionary. It is intended to supplement, not to replace, the corequisite publications listed in the preface. The most frequently used data entry procedures are described, and examples illustrated of the content and interaction of most of the available display forms. Practical exercises are provided of accessing the correct set of display forms required to accomplish a specific task. This guide is written for those people who will be entering data into the Dictionary. It may also be helpful to those who need to retrieve Dictionary data. A knowledge of the structure and functions of the Dictionary and a general knowledge of the functions of the Interactive Display Forms facility are assumed. This knowledge can be obtained by completion of OS/VS DB/DC Data Dictionary Self Study, published by Science Research Associates, Inc. Those who will be entering data base data should have a knowledge of Data Language/I (DL/I). This publication supersedes SR20-4726. Manual, 8 1/2 x 11 inches, 05/85

SH24-5001

DL/I DOS/VS USER'S GUIDE (CURRENT RELEASE)

DL/I DOS/VS is a data management control system that assists the user in creating, accessing, and maintaining large common data bases. In conjunction with the Customer Information System (CICS/DOS/VS), DL/I DOS/VS permits expansion of data processing applications from a batch-only environment to an online teleprocessing environment.

This manual is intended for first-time users of DL/I DOS/VS. It provides system analysts, data base specialists, system programmers, and application programmers with the information necessary for the design, installation, and operation of initial applications using the data base management facilities of DL/I DOS/VS. Through extensive use of examples and references to sample application programs supplied with DL/I DOS/VS, the manual reinforces the user's knowledge of data base concepts and the functions provided by DL/I; describes organizing, creating, and maintaining data bases; guides the user in writing data base application programs; and provides workable examples for setting up a specific data base application such as an online order entry and inventory system.

Readers of this manual are expected to be familiar with the concepts of DL/I data bases and the functions provided by DL/I through the information contained in DL/I DOS/VS General Information, GH20-1246.

Manual, 8 1/2 x 11 inches, 324 pages, 05/84

PLANNING AND ADMINISTRATION FOR VSE SQL/DS (CURRENT RELEASE)

This publication is for users who do the administrative tasks for the Structured Query Language/Data System on VSE. These tasks include planning for the installation of this product, designing data bases (physical configurations and logical contents), and managing their use. Aspects such as recovery, security, and performance are also addressed.

Manual, 8 1/2 x 11 inches, 619 pages, 01/85

SH24-5015

SQL/DS FOR VSE INSTALLATION (CURRENT RELEASE)

This manual is for the person who installs the Structured Query Language/Data System (SQL/DS) on a VSE or SSX/VSE system.

This manual contains procedures for installing SQL/DS, including generating a data base and starting SQL/DS for productive use. This manual assumes that the person responsible for planning the SQL/DS data base has already studied SQL/Data System Planning and Administration VSE, SH24-5014, and decided on certain parameters and values to be used in generating the data base. This manual also assumes that the planner and the installer are familiar with VSE or SSX/VSE systems, VSE job control, VSE/VSAM and CICS/DOS/VS.

Manual, 8 1/2 x 11 inches, 260 pages, 08/81  
 ////5748-XXJ

SH24-5016

SQL/DS FOR VSE TERMINAL USER'S GUIDE (CURRENT RELEASE)

This publication is a tutorial for new SQL/Data System (SQL/DS) users on VSE systems. It is designed for users who will access SQL/DS data through a terminal using ISQL. It provides information on SQL/DS concepts and how to get started using SQL and ISQL commands; how to establish data in tables; and how to create and use ISQL routines. Information is presented in a manner that allows novice users to obtain all they need to know by reading the first three or four chapters. Intermediate users can proceed through the next three or four chapters, and advanced users can complete the entire guide. Each topic develops actual commands that can be issued against sample tables (also provided) to reinforce the reader's understanding of the commands. Several exercises are included in the guide at key points.

SQL/DS FOR VSE TERMINAL USER'S REFERENCE (CURRENT RELEASE)

This manual provides experienced SQL/Data System (SQL/DS) users with reference information for accessing SQL/DS through a terminal using ISQL. It provides information on SQL and ISQL commands, ISQL routines, and the system and extract catalogs. Information is organized alphabetically for easy retrieval.

Manual, 8 1/2 x 11 inches, 208 pages, 11/84  
 ////5748-XXJ

SH24-5018

SQL/DS FOR VSE APPLICATION PROGRAMMING (CURRENT RELEASE)

This publication is for applications programmers. It tells how to write application programs that use the Structured Query Language (SQL) to access data stored in SQL/DS tables.

Manual, 8 1/2 x 11 inches, 536 pages, 01/85  
 ////5748-XXJ

SH24-5019

SQL/DS FOR VSE MESSAGES AND CODES (CURRENT RELEASE)

This publication lists and explains the messages which the SQL/Data System issues to the operator and to the programmer. It enables both to decide on the action they have to take in reply to the message received. Each message is preceded by an identifying number so that it can easily be found in the manual. This method of listing also ensures that messages issued by the same program are grouped together.

Manual, 8 1/2 x 11 inches, 330 pages, 12/84  
 ////5748-XXJ

SQL/DS FOR VSE OPERATION (CURRENT RELEASE)

This publication describes how to operate the Structured Query Language/Data System (SQL/DS) program on a VSE system. It is intended for those who operate the SQL/DS program. Others, such as data base administrators, might find this publication a handy reference for SQL/DS initialization parameters and for operator commands.

Manual, 8 1/2 x 11 inches, 95 pages, 12/84  
 ////5748-XXJ

SH24-5021

DL/I DOS/VS RESOURCE DEFINITION AND UTILITIES (CURRENT RELEASE)

Provides data base administrators and system programmers with "how-to" information about specific tasks used in the physical implementation and maintenance of DL/I DOS/VS data bases. The following tasks are described: Describing the characteristics of DL/I data bases; describing an application program's view of a data base; building internal control blocks from DBDs and PSBs; defining your data sets to VSAM; describing DL/I tables for an online system; running DL/I programs in your system; and using data base reorganization utilities. Prerequisite publication: DL/I DOS/VS Data Base Administration, SH24-5011.

Manual, 8 1/2 x 11 inches, 462 pages, 05/84  
 ////5746-XXI

SH24-5022

DL/I DOS/VS APPLICATION AND DATABASE DESIGN (CURRENT RELEASE)

This book describes a method of performing the task of application design when DL/I DOS/VS and DL/I data bases are used. It is written for those responsible for this type of application design. As part of the process, a method of designing data bases is described and illustrated.

Designing data bases by this method will make sure that they perform the requirements of the application in an efficient, economical manner.

There are three major parts in this book. The first describes an application design procedure that incorporates data bases in the application. The second gives a method of designing data bases. The third part tells how to implement the application.

NETWORK EXTENSION FACILITY VERSION 2 PROGRAMMING RPQ P85025  
GENERAL INFORMATION

This publication is an introduction to the Network Extension Facility Version 2 (NEF2), a Programming RPQ for the support of Airline Line Control (ALC) terminals attached to a 3725 or a 3720 Communication Controller. It is directed primarily to Network System Administrators, for overall evaluation, based on the actual needs of the network users and Network System Planners, for network configuration definition and, particularly, migration planning when this PRPQ is to be used in existing networks. It is also intended for personnel who require introductory information about NEF2.

IMS/VS DATA BASE RECOVERY CONTROL FEATURE, LIC PROG 5740-XX2  
GENERAL INFORMATION (CURRENT RELEASE)

This book describes the IMS/VS Data Base Recovery control feature, which is a priced feature of IMS/VS Release 1.1.4 for S/370 under OS/VS1 or OS/VS2.

The IMS/VS Data Base Recovery Control feature controls the recovery of IMS/VS DL/I data-base data sets. The feature is composed of new data sets, new utilities, and changes to existing programs in IMS/VS that are related to the recovery of data base data sets.

This book is intended to be used as promotional literature to be given to prospective customers by DPD marketing personnel.

OS/V5 MASS STORAGE SYSTEM EXTENSIONS GENERAL INFORMATION

This publication contains general information about the programming support provided in the Mass Storage System Extensions for the IBM 3850 Mass Storage System. This publication is for data processing executives, operations manager, system programmers, and other professional data processing personnel who are interested in buying the extensions.

Readers of this publication should have some familiarity with OS/V5 concepts and terms, with the Mass Storage System, and with the Access Method Services Commands for the Mass Storage System.

INSTALLATION MANUAL - PHYSICAL PLANNING

This manual contains physical planning data necessary to

GL24

install the IBM 2914 Switching Unit Model 1. The planning requirements of this unit are subject to modification by engineering developments.

In any multiple-equipment installation, specifications for the most critical unit must be met.  
Manual, 22 pages

GL22-6937

SYSTEM/360 AND SYSTEM/370 CUSTOM FEATURE DESCRIPTION:  
2914 SWITCHING UNIT MODEL 1 - RPQ 880882

This publication describes the organizational, functional, and operational characteristics of the IBM 2914 Switching Unit Model 1, which attaches to the IBM System/360 Models 25, 30, 40, 44, 50, 65, 67, 75, and 85. Attachment to a System/360 is via the standard System/360 I/O interface of a selector or multiplexer channel.

Manual, 19 pages  
///14/2914/

GL22-7015

IBM 7441-1/1980-9 CUSTOM TERMINAL FUNCTIONAL CHARACTERISTICS  
OPERATING PROCEDURES AND PHYSICAL PLANNING

This manual describes the operations, controls and special features of the IBM 7441 Buffered Terminal Control (Model 1) and the IBM 1980 Buffered Terminal (Model 9). The communication facilities that can be used with the teleprocessing terminal are described. Appendixes containing the physical planning specifications, RPQ numbers, a glossary of terms, terminal service procedures, a problem identification chart and character coding are provided.

Manual, 52 pages  
///14/7441,1980/

GL22-7025

2914 STORAGE CONTROL INTERFACE SWITCH MODEL 2 (RPQ 8P0290)  
PRODUCT DESCRIPTION AND PHYSICAL PLANNING

This publication provides systems engineers with both introductory and reference information about the IBM 2914. It includes the characteristics, operation, and physical planning information about the 2914, an operator-controlled facility for switching storage devices of the IBM System/360 Model 195 and System/370 Models 115 through 195.

Manual, 28 pages

GL24-3570

2946 TERMINAL CONTROL SUBSYSTEM COMPONENT  
DESCRIPTION & OPERATING GUIDE

This reference publication describes the IBM 2946 Terminal Control Subsystem used with an IBM Programmed Airlines Reservations System (PARS), or equivalent. Subsystem components are: IBM 2946 Terminal Control Unit Model 1 and 2, and 4 (RPQ 810480, RPQ 810491, and RPQ 810555), IBM 4505 Model 22 Keyboard (RPQ 8G0019), IBM 4505 Model 23 Video Display (RPQ 8G0016), and IBM 1980 Model C24 Printer (RPQ 888126). Presented for reservations system planners, programmers, and terminal operators are: unit descriptions, line control, message formats, operator controls, and operating procedures.

Manual, 32 pages  
///14/2946/

GL24-3571

IBM 2946 TERMINAL CONTROL SUBSYSTEM INSTALLATION MANUAL  
PHYSICAL PLANNING

This publication provides physical planning information for the IBM 2946 Terminal Control Unit Models 1, 2, and 4 (RPQ

810480, RPQ 810491, and RPQ 810555), and associated input/output units used in an IBM Programmed Airlines Reservation System (PARS): IBM 4505 Model 22 Keyboard (RPQ 860019), IBM 4505 Model 23 Video Display (RPQ 860160, IBM 1980 Model C24 Printer (RPQ 888126), and IBM 7411 Model 1 Remote Terminal Control Unit (RPQ 8K0142). Included are physical specifications and cable, electrical, and environmental requirements.

For related publications, see IBM System/360 and System/370 Bibliography, GA22-6822.

INTRODUCTION TO VIRTUAL STORAGE IN SYSTEM/370 STUDENT TEXT

This student text explains the concepts of dynamic relocation, dynamic address translation and virtual storage and it defines all related terminology. The student text describes a theoretical virtual storage system that is closely related to the implementation of OS/VS and DOS/VS, and it then describes how virtual storage is implemented in the OS/VS and DOS/VS systems on System/370.  
Student text, 96 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SR20-4438

CMS FOR PROGRAMMERS -- A PRIMER: (VM/370) TERMINAL-ORIENTED  
SELF-STUDY TEXT

This terminal oriented self-study text is intended to be an introduction to CMS the Conversational Monitor System for the programmer who performs the function of coding, testing, debugging, and documenting applications for data processing. It is assumed that the individual using this text already has a knowledge of a programming language (Assembler, COBOL, FORTRAN, or PL/I), an operating familiarity with the terminal to be used, and a VM/370 system with the terminal attached.

The text is divided into 5 major areas:  
Gaining Access to VM/370  
Creating and Maintaining Data Files  
Program Development and Execution  
Program Debugging  
Program Documentation

The sections on Program Development and Program Debugging are further divided according to the programming language selected.  
Manual, 128 pages

SR20-4482

INTRODUCTION TO DATA COMMUNICATIONS NETWORK DESIGN, STUDENT  
TEXT

This self-study text deals with basic elements of data communication design. It is intended for use primarily by

SR20

personnel desiring an introduction to network design, i.e., students in marketing training program, qualified marketing representatives, and systems engineers, who have not been trained in network design. The manual method of data communications network design is used with emphasis on line utilization rather than response time as the design criteria. It is expected that this text will provide students with a base for the standard and advanced course in network design and related subjects.

Manual, 68 pages

ADVANCED FUNCTION NCP DATA FLOW - COURSE CODE S3851

This text provides the module flow and control block relationships for an NCP and SDLC devices to enable dump reading and debugging capability.  
Manual, 128 pages, 7/5  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SR20-4546

3704, 3705 COMMUNICATIONS CONTROLLERS EMULATION PROGRAMMING  
COURSE CODE G3689, STUDENT TEXT

This publication is a student text on the 3704 and 3705 Communications Controllers emulation programming. A knowledge of the hardware is required for coding many of the macro operands which define the network. 3704 and 3705 Communications Controllers Hardware, SR20-4544, provides the hardware prerequisite to this material.  
Manual, 8 1/2 x 11 inches, 50 pages, 9/78

ACF/NCP RELEASE 2 PROGRAMMING STUDENT TEXT

This publication is a student text on the generation macros of the Advanced Communications Function (ACF) Network Control Program/VS (NCP/VS) Release 2 which supports multiple, concurrent channel adapters in NCP mode, multiple-domain networks, and dynamic reconfiguration. Prerequisite information may be obtained in 3704 and 3705 Communications Controllers Hardware, SR20-4544. Manual, 8 1/2 x 11 inches, 150 pages, 3/80

GR20-4640

INTRODUCTION TO CRYPTOGRAPHY STUDENT TEXT

This text explains in non-technical terms the function and concepts of cryptography in a data communications environment. It is assumed, in the discussions of how a cryptographic session is created, that the reader understands the concepts of a physical unit (PU) and a logical unit (LU).

Manual, 8/78

GR20-4666

INTRODUCTION TO IBM 4300 AND DOS/VSE FACILITIES STUDENT TEXT

This self-study course is designed for new data processing personnel who require an understanding of the hardware and software components of an IBM 4300 DOS/VSE data processing system. The course describes the hardware and functions and features of DOS/VSE, VSE/POWER, and VSE/ICCF. The student is also introduced to CICS/VS, DL/I DOS/VS, DB/DC Data Dictionary and DMS/CICS/VS. In addition, the facilities provided by DOS/VSE System IPO/E are described. Time required is 24 to 30 hours. Student exercises and solutions are provided.

Manual, 388 pages, 2/80

SR20-4672

SYSTEM/360-370 ASSEMBLER LANGUAGE (DOS)

This text has been designed for use in both introductory and advanced training. It teaches S/360-370 assembler language for the DOS and DOS/VS operating system. Chapters 1 through 5 provide an effective introduction to assembler language programming; chapters 6 through 16 provide greater detail on the language including magnetic tape programming and direct access programming. After the first five chapters students may continue with any of the other parts or modules. Students should have a basic familiarity with data processing components such as cards, tape or direct access system.

Manual, 407 pages, 1/80

SR20-4680

DL/I FUNCTIONS FOR APPLICATION DESIGN STUDENT TEXT

This text is written for the application analyst as a representative of the user to the data processing specialists. Objectives: What DL/I functions exist and their purposes, types of application processes these functions support, how to select options appropriate to a specific application, and what the benefits and costs are to the applications. The text is meant to be self-explanatory and is modular. Each chapter is devoted to a distinct area of discussion, divided internally into major sections. Each chapter includes a brief summary and the time required to complete it. Total estimated time for the text is eight hours, with possibly two hours for review.

Manual, 300 pages, 4/81

SR20-4686

TCAM BSC/SS NETWORK DEFINITION STUDENT TEXT

This text is a coding guide for the system programmer who must generate or modify a TCAM Message Control Program (MCP) for a Start Stop (SS) and/or Binary Synchronous (BSC) communications terminals. It explains how the MCP is structured and how to use a variety of TCAM's functional and service facilities. The text familiarizes the reader with TCAM macros and facilities so that he will know how to code an MCP. Topics include: overview, MCP structure, buffer unit pool, resource definition, message queues, message handlers, message handler macros, switched devices, operator control, error recovery macros, checkpoint restart, initialization and termination, application program interface, TCAM service aids, time sharing option, TCAM logging facility, and Emulator to MCP migration.

REFERENCE SUMMARY ELIAS-I/VM  
ELIAS-I/VM Licensed Program and its supporting documentation is intended to improve productivity of users of CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, when run on an IBM System/370, IBM 303X or IBM 4300 Processor. ELIAS-I/VM is designed to run in the environment provided by the VM/SP Conversational Monitor System.

ELIAS-I/VM provides a series of interactive dialogs called "procedures", which prompt the user to specify the definitions of the data bases and batch and online application programs. It provides a set of predefined sequences of code called "bricks". Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

This reference card is addressed to the application programmer responsible for the coding of computer applications in PL/I.

It describes the process of coding data base/data communications programs using the facilities supplied by ELIAS-I/VM.

Reference card, 9 x 21.5 centimeters, 14 pages, 9/81

ENTRY LEVEL INTERACTIVE APPLICATION SYSTEM-ONE, 5746-XXV, REFERENCE SUMMARY (CURRENT RELEASE)  
ELIAS-I Licensed Program and its supporting documentation is intended to improve productivity of users of CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, when run on a System/370, 303X or 4300 Processor. ELIAS-I is designed to run in the environment provided by the VSE/Interactive Computing and control Facility, and is primarily intended to be used with one of the current VSE System IPO/E.

ELIAS-I provides a series of interactive dialogs called "procedures", which prompt the user to specify the definitions of the data bases and batch and online application programs. It provides a set of predefined sequences of code called "bricks". Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

DATA BASE INTEGRITY CONTROL FACILITY, 5787-LAG, REFERENCE SUMMARY CARD  
This publication is designed to be used by the operators and system programmers in an IMS/VS Data Base Recovery Control environment having installed the Data Base Integrity Control Facility (DBICF).  
It contains basic information about DBICF summarized from the Data Base Integrity Control Facility Program Description and Operations Manual, SB11-6305 (DBICF PDOM), and the Data Base Integrity Control Facility General Information Manual, GB11-6306 (DBICF GIM).

It also shows how all DBICF functions are started and which DBRC commands are generated by which DBICF functions and procedures, thus providing the DBICF user with a useful quick reference for all his operations.

GX20-1787

DEBUGGING AID DIRECT EVALUATION OF FLOATING POINT NUMBERS IN HEXADECIMAL

The following tables can be used to evaluate a floating point number represented in hexadecimal form. The technique uses a table lookup in the hexadecimal integer table, and a table lookup in the hexadecimal fraction table. The user unites the integer from the first table with the fraction from the second table, to form one number, and then performs a calculation to obtain the value of the floating point number.

QUERY BY EXAMPLE: IUP 5796-PKT, REFERENCE SUMMARY CARD (CURRENT RELEASE)

Query-by-Example is a powerful and flexible language which can be used to manipulate tabular information; that is, information arranged by rows and columns. Query-by-Example lets you look at, update, create, add to, and delete from this data in a convenient and simple manner. For example, you might want to obtain the names of all employees who work second shift in the Chicago area. To obtain a list of these names, you fill in a blank table by typing in the required information, thus asking Query-by-Example to get the list for you. The list of names appears in front of you on a display screen. You can then either act on this information by updating the data or make a new request.

This publication is intended for a wide range of users, from people with little or no computer experience to those who know computers well and use them professionally. Therefore, the manual is organized into three general areas: introduction, language examples, and reference material. The first two sections contain introductory information; they tell you about computers and teach you how to use Query-by-Example. The next four sections show you how to use all of the facilities of the Query-by-Example language to retrieve, update, insert, and delete data from tables, as well as how to create tables of your own, authorize others to use your tables, store queries for later use, and manipulate your output. The last section contains reference material to be used after you have learned the language. Appendices contain additional reference material.

TOTAL STORAGE MANAGEMENT PRODUCT MATRIX REFERENCE SUMMARY

The Total Storage Management Product Matrix is a tool designed to help the marketing representative select the right solution for a given storage management problem.

It lists more than thirty storage management functional areas relating to data set creation, space and data set management, backup and recovery, and IBM aids. Each area is explained in its relation to performance, availability, capacity and environment, as well as the IBM Program Products and tools that address the function.

Reference card, 3 3/4 x 8 1/2 inches, 6 panels, 7/80

## GX20-2365

PASCAL/VS, 5796-PNQ, REFERENCE CARD

Pascal/VS is a Pascal compiler operating in VS1, MVS and VM/CMS. Originally designed as a high level programming language to teach computer programming by Professor Niklaus Wirth (circa 1968). Pascal has emerged as an influential and well accepted user language in today's data processing environment. Pascal provides the user with the ability to produce very reliable code by performing many error detection checks automatically.

The compiler adheres to the current ANSI and ISO (Level 0) standard (with minor deviations) and includes many important extensions. The language extensions include: separate compilation, dynamic character strings, and extended I/O capabilities. The implementation features include: fast compilation, optimization and a symbolic terminal oriented debugger that allows the user to debug a program quickly and efficiently.

Card, 3 1/2 x 8 1/2 inches, 20 panels, 2/85

VM/SP QUICK GUIDE FOR USER'S REFERENCE SUMMARY (CURRENT RELEASE)

This guide describes some essential VM/SP operations for the new user. It also provides a brief description of all VM/SP commands for the experienced user. Only a limited amount of prior VM/SP knowledge is assumed for the section on VM/SP operations. Prerequisite publications are listed in the "Preface."

The user of the "CP, CMS, RSCS, and IPCS Command Descriptions and Formats/Service Aids" section should have a thorough understanding of VM/370 command syntax and usage.

This is one of three reference summaries that can be ordered together under order number SBOF-3820. Manual, 3 3/4 x 6 3/4 inches, 300 pages, 03/84  
//36//5664-167

SX20-4401

VM/SP COMMAND REFERENCE SUMMARY GENERAL USERS (CURRENT RELEASE)

This reference summary lists the CP Class G and Any commands, the CMS commands for the general user, RSCS and IPCS commands, and such Service Aids as are useful to the general user.

This is one of three reference summaries that can be ordered together under order number SBOF-3820. Manual, 32 pages, 06/84  
//20//5664-167

SX20-4402

VM/SP COMMAND REFERENCE SUMMARY OTHER THAN GENERAL USERS (CURRENT RELEASE)

This reference summary lists the CP commands for the Class A, Class B, Class C, Class D, Class E, and Class F user; such CMS commands as are needed by these classes of users; IPCS commands; and Service Aids.

This is one of three reference summaries that can be ordered together under order number SBOF-3820. Manual, 24 pages, 05/84

MVS/INFORMATION DISTRIBUTION WORKSTATION SUPPORT OPERATION WORKSTATION CONTROLLER AND SYSTEM OWNER COMMAND REFERENCE SUMMARY  
This card is published for MVS/Information Distribution Workstation Support (IDWS) users who have workstation controller and system owner command authority. It lists all IDWS commands and their parameters, a brief description of their use and the command authority required for each parameter. This information is also published as an

appendix to MVS/Information Distribution Workstation Support Operation: Workstation Controller and System Owner Guide, SC23-0033.

The IDWS commands are explained in the guide. They enable the user to start, stop and run IDWS with the 6670 Information Distributor and MVS. Users with system owner authority should be familiar with MVS, the job entry subsystem and the SNA communications subsystem used in the installation. Users with workstation controller authority should be familiar with the 6670 Information Distributor and understand the concepts of networking and remote job processing.  
Reference Card, 8 1/2 x 14 1/2 inches, 8 panels, 02/80

JES3 OPERATOR'S LIBRARY, REFERENCE SUMMARY (CURRENT RELEASE)  
This book contains the formats and summarized descriptions of the operator commands used to control and diagnose errors in JES3 functions. The information is a summary of the console operator commands described in JES3 Operator's Library, SC23-0045 and JES3 System Programming Library: Diagnosis, SC23-0043.

This edition applies to the JES3 component of MVS/System Product - JES3 Release 2 and to all subsequent releases and modifications until otherwise indicated in new editions or technical newsletters.

Reference summary, 8 x 9 1/2 inches  
//40//5740-XYN

SX23-0008

MVS/SYSTEM PRODUCT JES2 COMMAND SYNTAX (CURRENT RELEASE)

This card provides the console operator with a quick reference to JES2 command syntax. For more in-depth information concerning these commands, reference the Operator's Library: JES2 Commands, SC23-0048.

IBM 3614 TROUBLE REPORT  
This is a one page form assembled in a pad of 25 sheets. It is to be filled out by the operator working with the IBM 3614 Consumer Transaction Facility. The operator fills in the form to show display codes and lamp conditions as a problem occurs in order that the customer engineer may better analyze problems at a later time when machine conditions have changed.  
Padded form, 8 1/2 x 11 inches, 25 sheets per pad, 11/76

GX27-0042

**ADVANCED COMMUNICATIONS FUNCTION FOR VTAM RELEASE 3 LIBRARY SUMMARY**  
 This manual describes the library of publications available for Release 3 of the Advanced Communications Function for VTAM (ACF/VTAM). It describes the intended audience of each publication in the library, summarizes the content of each publication, and also provides a master index for the entire library of publications.  
 The manual is intended for users and prospective users of ACF/VTAM, at both the administrative and technical levels. Users of earlier ACF/VTAM releases will be particularly interested in a fold-out that illustrates the evolution of ACF/VTAM publications, which is helpful in tracing the movement of technical information from one release to the next.  
 Manual, 8 1/2 x 11 inches

GX27-0216

**NETWORK PROGRAM PRODUCTS BIBLIOGRAPHY AND MASTER INDEX**  
 This publication contains a bibliography, list of related publications, and master index for the publications that

GX27

make up the Network Program Products library: Advanced Communications Function for Virtual Telecommunications Access Method (VTAM) publications; Advanced Communications Function for Network Control program and System Support Programs (NCP-SSP) publications; Network Communications Control Facility (NCCF) publications; and Network Logical Data Manager (NLDM) publications.

This publication is for anyone who uses the VTAM, NCP-SSP, NCCF, or NLDM libraries.

Manual, 8 1/2 x 11 inches, 225 pages, 11/85

**2770 DATA COMMUNICATIONS SYSTEM: PHYSICAL PLANNING TEMPLATE**

This equipment template on acetate sheet is for the 2770 Data Communication System. Its scale is 1/4 inch equals 1 inch.

Template  
//15/2770,2772/

GX27-2917

**3770 DATA COMMUNICATION SYSTEM PHYSICAL PLANNING TEMPLATE**

This template contains plan views for the machines that make up the 3770 Data Communication System. Included are:

- o 3771-3773-3774-3775 Communication Terminals
- o 3782 Card Attachment Unit
- o 3784 Line Printer
- o 3501 Card Reader

**3770 DATA COMMUNICATION SYSTEM, ERROR LOG OVERLAY**

This is an acetate overlay used by customer engineers in more easily interpreting error log printouts resulting from following maintenance information procedures given in the IBM 3770 Data Communication System Maintenance Information Base Segments Manuals.

Acetate overlay, 1 page

GX27-2922

**3289 LINE PRINTER MODELS 1 & 2 OPERATOR'S TROUBLE REPORT FORM**

Used by the printer operator to record pertinent error information. When an error or malfunction occurs that cannot be corrected by the operator, the Error Recovery and Problem Determination Guide directs the operator to complete the Trouble Report Form. The operator records the status of the printer when the error occurred, which indicators and switches were on, and any other information that may be helpful to the service personnel.

Other publications that should be available for the operator's use are:

- IBM 3289 Line Printer Models 1 and 2 Operator's Guide, GA27-3147
- IBM 3289 Line Printer Models 1 and 2 Error Recovery and Problem Determination Guide, GA27-3141
- IBM 3289 Line Printer Models 1 and 2 Operator's Reference Summary, GA27-3148

25-sheet pad, 8 1/2 x 11 inches, 8/78

ACF/VTAM OS/VS1, LIC PROG 5735-RC2, CONTROL BLOCK OVERVIEW

This publication is an overview diagram showing the relationships of frequently used ACF/VTAM control blocks. This overview can be used in conjunction with ACF/VTAM Data Areas, LY27-8002. It may be inserted in a binder or used as a wall-chart. The first three pages of this overview show control block contents and relationships, while the fourth and fifth pages show resource definition table (RDT) segments for various nodes.

ACF/VTAM REFERENCE SUMMARY

This publication contains selected reference information extracted from the Advanced Communication Function for VTAM

(ACF/VTAM) Macro Language Reference, SC38-0261 and the Advanced Communication Function for VTAM (ACF/VTAM) Network Operating Procedures, SC38-0259.

Contents include: network operator commands, RPL return codes a summary of the ACF/VTAM macro instructions, and SNA (FM, TS, and LU) profiles as implemented by ACF/VTAM.

Prerequisite Publications: none.  
Manual, 3 1/2 x 8 1/2 inches, 32 pages, 1/78

ACF/VTAM SNA PROBLEM DETERMINATION

This handbook describes a general approach to help isolating SNA network problems to a component (ACF/VTAM, NCP, IMS, CICS, JES2, TSO/VTAM, VSPC, and SSS). Twelve network problems and the tools needed to detect these problems are presented. Each problem type discussion describes what should happen, asks questions to determine what did happen, and compares the traces and dumps used to determine where the problem occurred

OS/VS2 TSO COMMAND LANGUAGE REFERENCE SUMMARY  
This booklet is intended for reference use at a terminal. It outlines the syntax of TSO commands and is based on OS/VS2 TSO Command Language Reference, GC28-0646. The booklet applies to OS/VS2 Release 3.7 and subsequent releases until otherwise indicated, and contains information that applies to the following selectable units:  
TSO/VTAM Level 1 (VS2.03.813)  
System Security Support (5752-832)  
TSO/VTAM Level 2 (5752-858)  
Since the command descriptions are brief and only the syntax is presented, the user should have an understanding of the TSO commands and of using a terminal. Booklet, 3 1/2 x 8 1/2 inches, 100 pages, 5/78  
//39//5752

GX33-9006

VIRTUAL STORAGE EXTENDED/INTERACTIVE COMPUTING AND CONTROL FACILITY, 5746-XC5, REFERENCE SUMMARY (CURRENT RELEASE)

This booklet is intended as a convenient, pocket-sized guide to the most essential information needed by a terminal user of the VSE/Interactive Computing and Control Facility (VSE/ICCF). It contains a summary of information from the VSE/Interactive Computing and Control Facility Terminal User's Guide, SC33-6068.

The publication describes the following components of the VSE/ICCF command language: system commands, editor commands, job entry statements and procedures and macros. These commands, statements procedures and macros are listed alphabetically together with a description of their format,

GX34

functions and operands.

VSE/ICCF is an interactive online computing facility that runs in a computing installation under the control of DOS/VSE with VSE/Advanced Functions. It allows users to conversationally enter and store data and programs from a terminal, to edit and format text data sets and to compile, run and test programs and have the results displayed back at the terminal and/or printed, either at a terminal-associated printer or at the central installation.

Reference Summary, 3 5/8 x 8 1/2 inches, 40 pages, 6/79  
////5746-TS1

GX33-9007

VSE/AF, 5746-XE8, REFERENCE (CURRENT RELEASE)

This booklet is a convenient, pocket-sized guide to the most essential information for those who need to know about the control statements that relate to VSE/Advanced Functions. It contains a summary of information from VSE/Advanced Functions System Control Statements, SC33-6095.

Reference summary, 3 5/8 x 8 1/2 inches, 40 pages, 7/80

## SYB0-0900

IBM VM/370: CP MICROFICHE - PROGRAM NUMBER 5749-010  
 This publication is the microfiche of the VM/370 Control Program. It is divided into four sections:

1. The table of contents and index
2. The assembler listings of the Control Program modules
3. The label cross reference for CP
4. The PTFs

For convenience, OS/VS1 EREP Assembler Listings are also included.  
 Microfiche  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

## SYB0-0901

IBM VM/370: CMS MICROFICHE - PROGRAM NUMBER 5749-010  
 This publication is the VM/370 CMS microfiche. It is divided into six sections:

1. The Table of Contents and Index
2. The Assembler Listings of the CMS Modules
3. The Assembler Listings of the System Assembler
4. The Assembler Listings of VM/370 BASIC
5. The Label Cross-reference for CMS
6. The PTFs

Microfiche, 21 cards, 3/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-2519

DMS/CICS/VS, LIC PROG 5746-XC4 DOS APPLICATION GENERATION LISTINGS (CURRENT RELEASE)  
This is the microfiche for the DMS/CICS/VS DOS/VS Application Generation feature.  
Microfiche, 32 cards, 3/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-2570

BATCH TERMINAL SIMULATOR, LIC PROG 5668-948, LISTINGS  
Contains program listings as specified in the title.  
Microfiche, 2 cards, 8/82  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8016

IMS/VS, 5740-XX2, VERSION 1, LISTINGS (CURRENT RELEASE)  
Contains SCP program listings for OS/VS1 and/or OS/VS2 as specified in the title.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8017

IMS/VS V1 LIC PROG 5740-XX2 COMMUNICATION FEATURE LISTINGS (CURRENT RELEASE)  
Contains Type I OS program listings as specified in the title.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8018

IMS/VS V1 INTERACTIVE QUERY FACILITY LISTINGS, PROG 5740-XX2  
Contains SCP program listings for OS/VS1 and/or OS/VS2 as specified in the title.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8023

GIS/VS BASIC QUERY FEATURE, LIC PROG 5740-XX7, LISTINGS  
This microfiche publication contains the assembly listings for the Basic Query Feature of the GIS/VS.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8024

GIS/VS ADVANCED QUERY FEATURE, LIC PROG 5740-XX7, LISTINGS  
This microfiche publications contains the assembly listings for the Advanced Query Feature of GIS/VS.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8025

GIS/VS MODIFY FEATURE, LIC PROG 5740-XX7, LISTINGS  
This microfiche publication contains the assembly listings for the Modify feature of GIS/VS.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0

LYB0-8026

GIS/VS UPDATE/CREATE FEATURE, LIC PROG 5740-XX7, LISTINGS  
This microfiche publication contains the assembly listings for the Update/Create Feature of GIS/VS.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8038

IMS/VS VERSION 1 MSC LISTINGS, 5740-XX2,(CURRENT RELEASE)  
Listings for the above OS/VS1 and/or OS/VS2 program.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8040

VSAPL, LIC PROG 5748-API, LISTINGS (CURRENT RELEASE)  
Microfiche listings for Program Product in title. Available to each licensee under the licensing agreement from IBM Program Control Center. Available to IBM personnel from IBM Distribution Center.  
Microfiche, 4/76  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8042

APL SHARED VARIABLES (APLSV) VERSION 3, LISTINGS, PROG 5799-AQC  
Microfiche listings for Program Product in title. Available to each licensee under the licensing agreement from IBM Program Control Center. Available to IBM personnel from IBM Distribution Center.  
Microfiche, 4/76  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8043

VS PERSONAL COMPUTING OS/VS1, LISTINGS, PROG PROD 5740-XR5  
Contains SCP program listings for OS/VS1 and/or OS/VS2 as specified in the title.  
Microfiche (updated by 140 cards TNL 6/78) 4/76  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8044

VSPC FORTRAN, LIC PROG 5748-FO2, PROGRAM LISTINGS  
Microfiche listings for Program Product in title. Available to each licensee under the licensing agreement from IBM Program Control Center. Available to IBM personnel from IBM Distribution Center.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8045

VS PERSONAL COMPUTING OS/VS2 PROG 5740-XR6  
Microfiche listings for subject Program Product  
Microfiche, with TNL LNB6-9962, 359 cards, 6/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8046

DOS/VS VS PERSONAL COMPUTING (VSPC) PROG PROD 5746-XR3, ICR LISTINGS  
Contains SCP program listings for DOS/VS as specified in the title.  
Microfiche, with TNL LNB6-9961, 405 cards, 6/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8048

DOS/VS VSPC CROSS REFERENCE AND DATA AREAS PROG PROD 5746-XR3  
Microfiche contains three cross-reference reports:

LYB0

Symbol where used  
Macro where used  
Macro what used  
and data area descriptions.  
Microfiche, 10/76

LYB0-8056

VS TSO 5740-XR9  
This microfiche contains listings of the program shown in the title.  
Microfiche  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8061

OS/VS2 MVS SEQUENTIAL ACCESS METHOD-EXTENDED (SAM-E): DATA AREAS MICROFICHE LISTINGS  
This microfiche lists and describes control blocks in Sequential Access Method-Extended (SAM-E). The information provided about each control block, in addition to its name, includes the following about each of its fields:

- field name
- its offset
- its length
- field description

Control blocks are presented in alphanumeric order of their common name acronyms.  
Microfiche, 1 card, 1/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYB0-8062

OS/VS2 MVS SEQUENTIAL ACCESS METHOD-EXTENDED (SAM-E): SYMBOLIC NAME CROSS REFERENCE TABLE  
This microfiche contains a table which lists each symbolic name that is accessed by more than one module. For each symbolic name, the modules that access it, and the kind of access, are listed. Symbolic names are listed in alphanumeric order.  
In addition, the publication contains another table which lists each macro that is used by more than one module. For each macro, the names of the modules using it are listed. Macros are listed in alphanumeric order.  
Microfiche, 3 cards, 1/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

GYB1-0012

OS BSAM LOGIC FOR 1419/1275 (MICROFICHE)  
This is a microfiche copy of a logic manual that is also available as a printed manual. For a description of its contents, see the abstract of GY21-0012, same title as above.  
Microfiche, 2/76  
SLSS: ORDER NO. SUBSCRIPTION ONLY

GYB1-0013

OS DATA MANAGEMENT MACRO LOGIC FOR 1285/1287/1288 (MICROFICHE)  
This is a microfiche copy of a logic manual that is also available as a printed manual. For a description of its contents, see the abstract for GY21-0013, same title as above.  
Microfiche, 2/76  
SLSS: ORDER NO. SUBSCRIPTION ONLY
