DOS/VS OLTEP (CARDLESS) INDEPENDENT COMPONENT RELEASE 33.0

This document contains assembler listings for DOS/VS OLTEP (Cardless) Independent Component Release 33.0. "Cardless" refers to a computer system which has no card reader or card punch equipment configured; but does have a 3540 Diskette I/O unit in lieu of card equipment. Two manuals support DOS/VS OLTEP "Cardless" R 33.0: 6C33-5383-2, DOS/VS OLTEP; SY33-8568-1, DOS/VS OLTEP Logic. DOS/VS OLTEP (Cardless) R33.0 is intended for use by IBM Customer Engineers; however, the customer can use it to help isolate system failures or to periodically check I/O devices.

1401/1440/1460 EMULATOR 5745-SC-EML (609) MICROFICHE LISTINGS

The IBM Systems 1401/1440/1460 Emulator Program - hereafter referred to as the 1400 Emulator - allows the execution of 1400 programs on IBM 4331 machines equipped with the 1400 Compatibility Feature and on IBM 4341 with the 1400 Simulator generated as part of the 1400 Emulator. The simulation of disk I/O on FBM (Fixed Block Mode) devices is provided. The 1400 Emulator runs as a problem program under control of the DOS Releases 26 and 27 or all DOS/VS Releases up to Release 34 and DOS/VSE with VSE/Advanced Functions. As a problem program it is possible to integrate the 1400 Emulator into a DOS, DOS/VS or DOS/VSE system and to take advantage of the capabilities of such a system.

Several 1400 Emulators, up to the number of partitions available, can run concurrently.

SYC7-1938

DISK OPERATING SYSTEM/VIRTUAL STORAGE DISK ERP LISTINGS  
COMPONENT NUMBER 5745-SC-DKE  
Microfiche Assembly Listings of DOS/VS Disk ERP.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1939

DISK OPERATING SYSTEM/VIRTUAL STORAGE DISPLAY OPERATOR  
CONSOLE LISTINGS - COMPONENT NUMBER 5745-SC-DOC  
Microfiche assembly listings of DOS/VS Display Operator  
Console.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1940

DISK OPERATING SYSTEM/VIRTUAL STORAGE SEQUENTIAL DISK IOCS  
LISTINGS - COMPONENT NUMBER 5745-SC-DSK  
Microfiche assembly listings of DOS/VS Sequential Disk IOCS.  
  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1942

DISK OPERATING SYSTEM/VIRTUAL STORAGE EREP LISTINGS  
COMPONENT NUMBER 5745-SC-ERP  
Microfiche assembly listings of DOS/VS EREP.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1943

DISK OPERATING SYSTEM/VIRTUAL STORAGE MODEL 20 EMULATOR  
LISTINGS - COMPONENT NUMBER 5745-SC-E20  
Microfiche assembly listings of DOS/VS Model 20 Emulator.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1944

DISK OPERATING SYSTEM/VIRTUAL STORAGE COMPILER I/O MODULES  
LISTINGS - COMPONENT NUMBER 5745-SC-IOH  
Microfiche assembly listings of DOS/VS Compiler I/O Modules.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1945

DISK OPERATING SYSTEM/VIRTUAL STORAGE IOCS AND DEVICE  
INDEPENDENCE LISTINGS - COMPONENT NUMBER 5745-SC-IOX  
Microfiche Assembly Listings of DOS/VS IOCS and Device  
Independence.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1946

DISK OPERATING SYSTEM/VIRTUAL STORAGE IPL AND BUFFER LOAD  
LISTINGS - COMPONENT NUMBER 5745-SC-IPL  
Microfiche assembly listings of DOS/VS IPL and Buffer Load.  
title.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1947

DISK OPERATING SYSTEM/VIRTUAL STORAGE ISAM LISTINGS  
COMPONENT NUMBER 5745-SC-ISM  
Microfiche assembly listings of DOS/VS ISAM.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7

SYC7-1948

DISK OPERATING SYSTEM/VIRTUAL STORAGE JOB CONTROL LISTINGS  
COMPONENT NUMBER 5745-SC-JCL  
Microfiche assembly listings of DOS/VS Job Control.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1949

DISK OPERATING SYSTEM/VIRTUAL STORAGE LIBRARIAN LISTINGS  
COMPONENT NUMBER 5745-SC-LBR  
Microfiche assembly listings of DOS/VS Librarian.  
title.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1950

DISK OPERATING SYSTEM/VIRTUAL STORAGE LINKAGE EDITOR  
LISTINGS - COMPONENT NUMBER 5745-SC-LNK  
Microfiche assembly listings of DOS/VS Linkage Editor.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1951

DISK OPERATING SYSTEM/VIRTUAL STORAGE MAGNETIC CHARACTER  
READER IOCS LISTINGS - COMPONENT NUMBER 5745-SC-MCR  
Microfiche assembly listings of DOS/VS Magnetic Character  
Reader IOCS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1952

DISK OPERATING SYSTEM/VIRTUAL STORAGE OPTICAL CHARACTER  
READER IOCS LISTINGS - COMPONENT NUMBER 5745-SC-OCR  
Microfiche assembly listings of DOS/VS OCR IOCS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1953

DISK OPERATING SYSTEM/VIRTUAL STORAGE OLTEP LISTINGS  
COMPONENT NUMBER 5745-SC-OLT  
Contains SCP program listings for DOS/VS as specified in the  
title.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1954

DISK OPERATING SYSTEM/VIRTUAL STORAGE PDAIDS LISTINGS  
COMPONENT NUMBER 5745-SC-PDA  
Microfiche assembly listings of DOS/VS PDAIDS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1955

DISK OPERATING SYSTEM/VIRTUAL STORAGE PAPER TAPE IOCS  
LISTINGS - COMPONENT NUMBER 5745-SC-PTP  
Microfiche assembly listings of DOS/VS Paper Tape IOCS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1956

DISK OPERATING SYSTEM/VIRTUAL STORAGE POWER LISTINGS  
COMPONENT NUMBER 5745-SC-PMR  
Contains SCP program listings for DOS/VS as specified in the  
title.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7

SYC7-1957

DISK OPERATING SYSTEM/VIRTUAL STORAGE QTAM LISTINGS  
COMPONENT NO. 5745-SC-QTM  
Microfiche assembly listings of DOS/VS QTAM.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1958

DISK OPERATING SYSTEM/VIRTUAL STORAGE RMSR LISTINGS  
COMPONENT NUMBER 5745-SC-RMS  
Microfiche assembly listings of DOS/VS RMSR.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1959

DISK OPERATING SYSTEM/VIRTUAL STORAGE SUPERVISOR LISTINGS  
COMPONENT NUMBER 5745-SC-SUP  
Microfiche assembly listings of DOS/VS Supervisor.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1960

DISK OPERATING SYSTEM/VIRTUAL STORAGE MAGNETIC TAPE IOCS  
LISTINGS - COMPONENT NUMBER 5745-SC-TAP  
Microfiche assembly listings of DOS/VS Magnetic Tape IOCS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1961

DISK OPERATING SYSTEM/VIRTUAL STORAGE TAPE ERP LISTINGS  
COMPONENT NUMBER 5745-SC-TPE  
Microfiche assembly listings of DOS/VS Tape ERP.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1962

DISK OPERATING SYSTEM/VIRTUAL STORAGE SYSTEM UTILITY  
PROGRAMS LISTINGS - COMPONENT NUMBER 5745-SC-UTL  
Microfiche assembly listings of DOS/VS System Utility Programs.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1963

DISK OPERATING SYSTEM/VIRTUAL STORAGE VSAM LISTINGS  
COMPONENT NUMBER 5745-SC-VSM  
Microfiche assembly listings of DOS/VS VSAM.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1964

DOS/VS: DOS DISTRIBUTION PROGRAM LISTINGS (5745-SC-DIS)  
Microfiche assembly listings of DOS/VS DOS Distribution Program.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1965

DOS/VSE AND DOS/VS MASTER INDEX  
This is the master index for DOS/VS and DOS/VSE microfiche.  
Master Index, 12 cards, 12/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7

SYC7-1966

DISK OPERATING SYSTEM/VIRTUAL STORAGE DISKETTE IOCS  
5745-SC-DIO  
Microfiche assembly listings of DOS/VS Diskette IOCS.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1968

DOS/VS VTAM  
Microfiche Assembly Listings of DOS/VS VTAM Routines,  
5745-SC-VTM.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1969

DOS/VS TOLTEP LISTINGS - COMPONENT NO. 5745-SC-TLT  
Microfiche assembly listings of DOS/VS TOLTEP Routines,  
5745-SC-TLT.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1972

VIRTUAL TELECOMMUNICATIONS ACCESS METHOD AND 3600 SYSTEM  
INDEX  
Microfiche Assembly - Listings Index to be used to locate individual modules and macros in the following components: 5745-SC-VTAM, 5745-SC-TLT, 5745-SC-SSS, 5745-SC-124, (i.e. Form Nos. SYC7-1968, SYC7-1969, SYC7-1970-1, SYC7-1971 1971 respectively.  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1976

DOS/VS POWER/VS RJE, SNA ICR - SCP COMPONENT 5745-SC-PWR  
Microfiche assembly listings of DOS/VS POWER/VS RJE, SNA ICR  
Microfiche  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1980

DOS/VSE ATTENTION ROUTINES 5745-SC-AIT (350) MICROFICHE  
LISTINGS  
This document contains assembler Listings for all DOS/VSE Attention Routine modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.  
Microfiche, 3 cards  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1981

DOS/VSE ANALYSIS PROGRAM COMPONENT 5745-SC-APC (350)  
MICROFICHE LISTINGS  
This document contains assembler Listings for all DOS/VSE Analysis Program Component modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.  
Microfiche, 2 cards  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1982

DOS/VSE ASSEMBLER 5745-SC-ASM (350) MICROFICHE LISTINGS  
This document contains assembler listings for all DOS/VSE Assembler modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.  
Microfiche, 11 cards

SYC7

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1983

DOS/VSE CHECKPOINT/RESTART 5745-SC-CKR (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Checkpoint/Restart modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 2 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1984

DOS/VSE DIRECT ACCESS METHOD 5745-SC-DAM (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Direct Access Method modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1985

DOS/VSE DISKETTE IOCS 5745-SC-DIO (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Diskette IOCS modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 2 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1986

DOS/VSE DISTRIBUTION PROGRAM 5745-SC-DIS (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Distribution Program modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 2 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1987

DOS/VSE DISK ERROR RECOVERY PROCEDURES 5745-SC-DKE (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE DKE modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1988

DOS/VSE DISPLAY OPERATOR CONSOLE 5745-SC-DOC (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE DOC modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 3 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7

SYC7-1989

DOS/VSE SEQUENTIAL DISK IOCS 5745-SC-DSK (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Sequential Disk IOCS modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 5 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1990

DOS/VSE EREP I DOS/VS INTERFACE 5745-SC-ERI (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE ERI modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 40 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1991

DOS/VSE COMPILER I/O MODULES 5745-SC-IOM (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Compiler I/O modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 24 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1992

DOS/VSE IOCS AND DEVICE INDEPENDENT I/O 5745-SC-IOX (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE IOX modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 19 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1993

DOS/VSE IPL AND BUFFER LOAD 5745-SC-IPL (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE IPL and Buffer Load modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 3 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1994

DOS/VSE ISAM 5745-SC-ISM (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE ISAM modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 2 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1995

DOS/VSE JOB CONTROL 5745-SC-JCL (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Job control modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 5 cards

SYC7

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1996

DOS/VSE LIBRARIAN 5745-SC-LBR (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Librarian modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 10 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1997

DOS/VSE LINKAGE EDITOR 5745-SC-LNK (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Linkage Editor modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1998

DOS/VSE MAGNETIC CHARACTER READER IOCS 5745-SC-MCR (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE MCR modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-1999

DOS/VSE OPTICAL CHARACTER READER IOCS 5745-SC-OCR (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE OCR modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2000

DOS/VSE ONLINE TEST EXECUTIVE 5745-SC-OLT (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE OLT modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 3 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2001

DOS/VSE PROBLEM DETERMINATION AIDS 5745-SC-PDA (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE PDAID modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 22 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2002

DOS/VSE PAPER TAPE IOCS 5745-SC-PTP (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Paper Tape IOCS modules and the PL/S source used to generate these listings. This document is intended for use by IBM

SYC7

personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2003

DOS/VSE RECOVERY MANAGEMENT SUPPORT 5745-SC-RMS (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Recovery Management Support modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 3 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2004

DOS/VSE SPECIFIC DEVICE SUPPORT 5745-SC-SDS (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE SDS modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2005

DOS/VSE SUPERVISOR 5745-SC-SUP (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Supervisor modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 12 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2006

DOS/VSE MAGNETIC TAPE IOCS 5745-SC-TAP (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE TAP modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 1 card

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2007

DOS/VSE TAPE ERROR RECOVERY 5745-SC-TPE (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Tape Error Recovery Procedure modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 2 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7-2008

DOS/VSE SYSTEM UTILITIES 5745-SC-UTL (350) MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE System Utility modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors. Microfiche, 14 cards

SLSS: ORDER NO. SUBSCRIPTION ONLY

SYC7

LYC7

SYC7-2009

DOS/VSE MAINTAIN SYSTEM HISTORY 5745-SC-UTS (350)  
MICROFICHE LISTINGS

This document contains assembler listings for all DOS/VSE Maintain System History modules and the PL/S source used to generate these listings. This document is intended for use by IBM personnel for the correction of program design errors.

Microfiche, 26 cards  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LYC7-2010

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
ATTENTION ROUTINES LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF attention routines modules.

Microfiche, 3 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2011

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
ASSEMBLER LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF assembler modules

Microfiche, 11 Cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2012

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
CHECKPOINT/RESTART LISTINGS (CURRENT RELEASE)

Microfiche assembler listing for all VSE/AF checkpoint/restart Modules.

Microfiche, 2 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2013

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
DIRECT ACCESS METHOD LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF direct access method modules.

Microfiche, 1 card, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2014

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
DYNAMIC DUMP UTILITY LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF dynamic dump utility modules.

Microfiche, 1 card, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2015

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8, DISK  
INPUT/OUTPUT CONFIGURATION SYSTEM LISTINGS (CURRENT  
RELEASE)

Microfiche assembler listings for all VSE/AF Diskette IOCS modules.

Microfiche, 2 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2016

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
DISTRIBUTION PROGRAM LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF distribution prog. modules.

Microfiche, 1 card, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2017

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8, DISK  
ERROR RECOVERY PROCEDURES LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF DKE modules.

Microfiche, 1 card, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2018

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
DISPLAY OPERATOR CONSOLE LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF DOC modules.

Microfiche, 3 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2019

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, DEVICE SUPPORT  
FACILITIES, LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF DSF Modules.

Microfiche, 21 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2020

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
SEQUENTIAL INPUT/OUTPUT CONFIGURATION SYSTEM LISTINGS  
(CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF Sequential Disk IOCS Modules.

Microfiche, 7 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2021

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, EREPI LISTINGS  
(CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF EREPI Modules.

Microfiche, 40 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2022

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
COMPILER INPUT/OUTPUT MODULES LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF IOM Modules.

Microfiche, 22 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2023

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
INPUT/OUTPUT CONFIGURATION SYSTEM AND DEVICE INDEPENDENT  
INPUT/OUTPUT LISTINGS (CURRENT RELEASE)

Microfiche assembler listings for all VSE/AF IOX Modules.

Microfiche, 21 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2024

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
INITIAL PROGRAM LOAD AND BUFFER LOAD LISTINGS (CURRENT  
RELEASE)

Microfiche Assembler Listings for all VSE/AF IPL modules.

Microfiche, 4 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LYC7-2025

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8,  
INDEXED SEQUENTIAL ACCESS METHOD LISTINGS (CURRENT RELEASE)

Microfiche assembler Listings for all VSE/AF ISAM modules.

Microfiche, 2 cards, 12/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LYC7

## LYC7-2026

VANDL-1, LIC PROG 5799-AEY, LOGIC  
A Program Logic Manual describes the internal design or logic of the subject program. These manuals are intended for persons involved in program maintenance and system programmers who are altering the program design. Program logic information is not necessary for the operation of the program; therefore, distribution of these publications should be limited to persons with maintenance and alteration requirements.  
Manual, 221 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY12-5016

DL/I DOS/VS, 5746-XX1, LOGIC (CURRENT RELEASE)  
This manual is to be used with program listings for DL/I DOS/VS. It discusses the internal operation of the DL/I system as an application program under DOS/VS. It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design.  
In addition to supporting Version 1.6, in this edition, "Section 2, Method of Operation" information is removed and is now included in Data Language/I Disk Operating System/Virtual Storage (DL/I DOS/VS) Logic Manual, Volume 2, Order Number LY24-5215.  
Manual, 332 pages, 11/73  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY12-5026

IBM SYSTEM/370 IMS/VS DATA BASE ANALYZER LOGIC, PROG PROD 5740-XXR (OS/VS)  
IMS/VS Data Base Analyzer (DB analyzer) is an Information Management System/Virtual Storage (IMS/VS) productivity aid that analyzes the structure of an existing IMS/VS data base with hierarchical direct (HDAM or HIDAM) organization. It produces reports on distribution of pointers and free space, to allow monitoring of the efficiency of data base space allocation in storage. It also checks pointer integrity, examining whether recovery procedures have been applied successfully.  
This manual presents an overview of DB analyzer and describes the control flow within the programs by means of text and flowcharts. It also presents the layout of output records and internal tables. It is intended as an aid when maintaining the DB analyzer programs.  
This publication is intended primarily for data base administrators and system analysts. The reader is assumed to be familiar with IMS/VS data bases and their pointer structures. Publications providing this background are

LY12

IMS/VS Utilities Reference Manual, SH20-9029 and IMS/VS System/Application Design Guide, SH20-9025.

VSE/POWER VERSION 2 PART 1 LOGIC (CURRENT RELEASE)  
This manual is one of three program logic manuals which provide information on the internal operation of VSE/POWER. output requests addressed to unit record devices at disk input/output speed. Information provided in this manual is as follows: An overview of VSE/POWER and its relationship to VSE/Advanced Functions; the organization of the VSE/POWER program; reference between phases and CSECT names and microfiche; data areas and control block layout; debugging hints and flowcharts which recommend a method of error analysis. The manual is intended for use by persons involved in program maintenance and by persons who intend to alter the program design. The method of operation of VSE/POWER is described in Program Logic Manual Part 2, LY12-5028. The method of operation of the VSE/POWER Networking function is described in Program Logic Manual Part 3, LY12-5034.  
Manual, 8 1/2 x 11 inches, 506 pages, 12/81

VIRTUAL STORAGE EXTENDED/PRIORITY OUTPUT WRITERS, EXECUTION PROCESSORS, AND INPUT READERS, 5666-273, VERSION 2 PART 2 LOGIC (CURRENT RELEASE)  
This manual is one of three program logic manuals which provide information on the internal operation of VSE/POWER. This program product services input and output requests addressed to unit record devices at disk input/output speed. The manual describes the method of operation of VSE/POWER (including the VSE/POWER Shared Spooling feature) and is intended for use by persons involved in program maintenance. The method of operation of the VSE/POWER networking and RJE functions is described in the Program Logic Manual Part 3, LY12-5034. The Program Logic Manual Part 1, LY12-5027, contains an overview of VSE/POWER and its organization, cross-reference lists, data area and control block layouts, and debugging hints.  
Manual, 8 1/2 x 11 inches, 696 pages, 12/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY12-5031

SYSTEM/370 AND 4300 PROCESSORS JOB ENTRY PROGRAM, LIC PROG 5746-XE6, LOGIC  
The Job Entry Program is a program product designed to assist in interconnecting one or more decentralized computing systems. With the Job Entry Program, jobs may be transferred for processing from one installation to another, thus enabling the user, for example, to utilize resources such as data bases, programs, or peripheral devices available only at the receiving location.  
This manual provides information on the internal operation of the Job Entry Program. It is intended for use by persons involved in program maintenance.  
The reader of this manual should be familiar with the Program Products and publications as shown in the Preface.  
Manual, 8 1/2 x 11 inches, 196 pages, 03/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY12-5032

LOGIC VSE/ACCESS CONTROL LOGGING AND REPORTING (CURRENT RELEASE)  
RELEASE  
VSE/Access Control - Logging and reporting is part of the data security functions offered for batch users of DOS/VSE.

LY12

These security functions are designed for auditing purposes of a DOS/VSE data processing installation. Data access, library access, and program access can be checked and logged for security reasons.

This manual is intended for persons who are maintaining, debugging, or modifying the system. It is assumed that these persons are thoroughly familiar with DOS/VSE, VSE/Advanced Functions, and VSE/Interactive Computing and Control Facility.

Manual, 8 1/2 x 11 inches, 272, 2/79

INFORMATION/LIBRARY AND LIBRARY/MVS, LIC PROG 5665-277, -294, LOGIC

Information/Library is a dialog-oriented retrieval system for MVS information contained in a companion data base. It operates under OS/VS2 MVS and appropriate data-communication facilities.

With Information/Library, users can quickly retrieve all kinds of information pertaining to MVS because extracts of all MVS manuals are contained in the data base.

This manual is intended for persons who are assigned the task of maintaining Information/Library. Publications related to Information/Library are listed in the Bibliography.

LY19-6051

VS PERSONAL COMPUTING PL/I LOGIC, INTERNATIONAL FIELD PROGRAM 5785-EAB

This manual describes the internal logic of the VS Personal Computing PL/I (VSPC PL/I) processor, including the compiler, the library, and the interface between VSPC and PL/I. It is intended for use by system programmers responsible for the maintenance of the PL/I processor. It does not contain information on the PL/I language itself or its usage.

The manual begins with a general description of the contents and composition of the PL/I processor. Information follows on the interface between VSPC and PL/I, including the interface services, the directory of routines, the support macros, and the control blocks. Sections on the compiler cover compiler operations, the directory of routines, the compile-time tables and lists, and the support macros. Runtime information follows, including the directory of routines, the control blocks, and the support macros. The final section describes the sections of the object program.

Manual, 8 1/2 x 11 inches, 226 pgs 9/77

LOGIC ELIAS-I/VM

ELIAS-I/VM Licensed Program and its supporting documentation is intended to improve productivity of users of CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, when run on an IBM System/370, IBM 303X or IBM 4300 Processor. ELIAS-I/VM is designed to run in the environment provided by the VM/SP Conversational Monitor System.

ELIAS-I/VM provides a series of interactive dialogs called "procedures", which prompt the user to specify the definitions of the data bases and batch and online application programs. It provides a set of predefined sequences of code called "bricks". Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

This manual provides a reference document for program support personnel. It describes the program organization of all relevant ELIAS-I/VM facilities.  
Manual, 8 1/2 x 11 inches, 412 pages, 9/81

ENTRY LEVEL INTERACTIVE APPLICATION SYSTEM-ONE, 5746-XXV, LOGIC

ELIAS-I Licensed Program and its supporting documentation is intended to improve productivity of users of CICS/DOS/VS, DL/I DOS/VS, and/or VSE/VSAM, when run on a System/370, 303X or 4300 Processor. ELIAS-I is designed to run in the environment provided by the VSE/Interactive Computing and Control Facility, and is primarily intended to be used with one of the current VSE System IPO/E.

ELIAS-I provides a series of interactive dialogs called "procedures", which prompt the user to specify the definitions of the data bases and batch and online application programs. It provides a set of predefined sequences of code called "bricks". Each brick performs a specific and frequently used program function, and can be incorporated into the user's application program to perform that function.

This manual provides a reference document for program support personnel. It describes the program organization of all relevant ELIAS-I facilities.  
Manual, 8 1/2 x 11 inches, 402 pages, 8/81

VTAM DISPATCHER APPLICATION PROGRAM, PRPQ Y96845 5799-BFX, LOGIC

This publication is intended for programming support representatives and system programmers who maintain VDAP. When used with program listings, this manual gives the information needed to understand the internal operations of VDAP and to change them if necessary. In a host or DP system, VDAP provides the VTAM support necessary to communicate with 1750/3750 Switching System. VDAP also provides the communication path and logic control services for realtime transactions between two end-users. Manual, 8 1/2 x 11 inches, 122 pages, 6/83

DSX VERSION 3 DIAGNOSIS

This publication is intended for customer and personnel whose responsibilities include problem identification within the DSX program product. It describes how to diagnose problems in the Distributed Systems Executive (DSX) Version 3 program product and how to report them to the Support Center. For DSX problems already resolved by a program temporary fix (PTF), this publication explains where to refer to apply the PTF that solves the problem. For previously unreported problems, it explains how to submit an authorized program analysis report (APAR). Manual, 8 1/2 x 11 inches, 164 pages, 01/87

IMS/360, VERSION 2, SYSTEM MANUAL VOL. 2 - FLOWCHARTS, PROG. PROD. 5734-XX6

Information Management System/360 is a processing program designed to facilitate the implementation of medium to large common data bases in a multi-application environment. This environment is created to accommodate both on-line message processing and conventional batch processing, either separately or concurrently.

This manual includes a flowchart of each module in the IMS/360 program. Module descriptions are contained in Volume I. Volume III contains listings of the data base (batch) portion of the IMS/360 program, furnished as microfiche. Volume IV contains listings of the data communications portion of the program, also furnished as microfiche.

GIS/2 FEATURE 8117, LIC PROG 5734-XX1, SYSTEM MANUAL VOLUME 3

This three-volume manual outlines and details the internal logic of the Generalized Information System, Version 2, for the benefit of programmers attempting to revise and/or maintain the system. The organization of the manual reflects the system's design structure of interfacing program units. As applicable, the manual includes diagnostic comments to assist in isolating faulty operation, and contains modification aids to assist in making minor changes to the system.

Program Product Manual, 400 pages

GIS/2 FILE MODIFY FEATURE 8127, LIC PROG 5734-XX1, SYSTEM MANUAL SUPPLEMENT

This manual provides design and internal logic documentation for the above-named feature. These pages replace correspondingly numbered "reserve" pages in the System Manual provided with the Basic Retrieval System package.

Program Product Manual, 24 pages

LY20-0712

CUSTOMER INFORMATION CONTROL SYSTEM (DOS-ENTRY), LIC PROG 5736-XX6, LOGIC

The IBM Customer Information Control System (CICS) is a transaction-oriented, multiapplication data base/data communication interface between a System/360 or System/370 operating system and user-written application programs. Applicable to most online systems, CICS provides many of the facilities necessary for standard terminal applications: message switching, inquiry, data collection, order entry, and conversational data entry.

CICS is available in three systems - two for DOS users

LY20

and one for OS users. Because the two CICS/DOS systems are compatible with each other and with the CICS/OS system, it is possible to start with a small DOS data base/data communication configuration and move up through DOS to OS.

The information contained in this manual is of interest to persons maintaining and modifying the operation of the CICS/DOS-ENTRY system.

Manual, 8 1/2 x 11 inches, 272 pages, 7/73

STAT/BASIC FOR ITF AND VM/370 - CMS: LOGIC MANUAL, FEATURE NUMBER 0100 - PROGRAM NUMBER 5734-XA3

STAT/BASIC is a comprehensive set of interactive statistical programs for ITF. It consists of 40 BASIC programs, providing the user with procedures for data generation, elementary statistics, regression and correlation analysis, multivariate analysis, analysis of variance, nonparametric statistics, time series analysis, and biostatistics. The interactive features include instructional messages, flexible control of calculations, extensive error checking, and data editing.

This manual provides program flowcharts, flowchart narrative, and program listings.

Program Product Manual, 208 pages

DISPLAY MANAGEMENT SYSTEM II -- DOS/VS (DMS II) LOGIC MANUAL, PROG. PROD. 5736-XC4

DMS II is a set of programs to simplify the implementation of online operations using the 3270 Information Display System. Application specification is simplified by means of DMS II forms. Preprogrammed facilities are provided to perform paging and panel selection, file operations, and data routing. This manual is intended primarily for those responsible for maintaining the programs product. It is designed to be used in conjunction with program listings and flowcharts to understand program logic.

Manual, 230 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY20-2045

CICS/VS, LIC PROG 5740-XX1, 5746-XX3, FASTER LANGUAGE FACILITY, LOGIC (CURRENT RELEASE)

The FASTER Language Facility (F.L.F.) feature of CICS/DOS/VS and CICS/OS/VS makes it possible to run most FASTER Transaction Processing Descriptions (TPDs) under CICS/VS.

The F.L.F. consists of a set of language macros and processing routines designed as a conversion aid for users of the five FASTER systems. All language macros present in the FASTER programs are also present in the language facility and are designed in the Program Reference Manual.

The logic manual primarily describes the functions and the interworking of F.L.F. processing routines. A knowledge of those internal details is not ordinarily needed for day-to-day use of the language facility.

Manual, 70 pages

LY20-2050

IMSMAP/VS - IUP 5796-PCY, SYSTEM GUIDE

The Installed User Program IMSMAP/VS is a documentation aid which produces pictorial representations of data base structures. These maps, which are produced on a line printer, graphically represent the many characteristics of an IMS/VS data base. In addition to producing maps, IMSMAP/VS can print a detailed report describing the characteristics of each data base description (DBD).

IMSMAP/VS is an extension of the currently available IUP, IMSMAP (5796-PBC). IMSMAP is a prerequisite for IMSMAP/VS. IMSMAP/VS provides both support for IMS/VS data bases and additional features not available in the original IMSMAP IUP.

EXTENDED TELECOMMUNICATIONS MODULES FEATURE OF CICS/DOS/VS PROBLEM DETERMINATION GUIDE PROGRAM NUMBER: 5746 XXB  
The Extended Telecommunications Modules Feature of CICS/DOS/VS provides linkage between CICS/VS 1.0.1 and a telecommunications network. It provides access to the IBM 3600 Finance Communication System and functions within the framework of System Network Architecture (SNA). Data flow for certain pre-SNA terminals is also provided. The basic function of the program is to establish and maintain a data flow between a CICS/VS application and corresponding user application for the IBM 3600 Finance Communication System.  
This manual provides control block layouts, storage maps, sample dumps, sample traces, and describes an approach to debugging. It presents guidelines, tools, and information needed to assist program systems representatives and system programmers, who maintain the system and the Extended Telecommunications Modules Feature of CICS/DOS/VS.

## LY20-2273

TSO/IQRP INTERFACE, IUP 5796-PHZ, SYSTEMS GUIDE

The purpose of this manual is to provide the system programmer in charge of installation and maintenance of the TSO Interface to IQRP an insight into the system logic flow as well as the IQRP modules changed to accommodate the TSO interface.

This manual serves as an addendum to the Interactive Query and Report Processor Systems Guide (LY20-2072). The IQRP IUP (5796-PDG) is a prerequisite and must be ordered either prior to or in conjunction with the TSO Interface to IQRP. It is strongly recommended that the aforementioned guide be first read in order to gain a more thorough understanding as to how the IQRP System operates.

Manual, 8 1/2 x 11 inches, 16 pages, 1/77

## LY20-2280

FORTRAN INTERACTIVE SUBROUTINE LIBRARY - IUP 5796-PHT, SYSTEM GUIDE

The FORTRAN Interactive Subroutine LIBrary (FISLIB) Installed User Program consists of a set of FORTRAN callable subroutines which can be used by a FORTRAN programmer to give more flexibility to interactive FORTRAN programs. FISLIB is used where the interaction of human decision making ability with the computer program is essential to permit users to choose between alternatives at key points during program execution. The interactive program produced can be run under: VM/CMS; any of the TSO options - OS/MVT, OS/SVS or OS/MVS; VS/PC FORTRAN; or DOS FORTRAN F utilizing the operating console.

The subroutines written in FORTRAN are designed to be system independent. They provide a simplified method of allowing the terminal program user to: specify program functions to be executed; specify parameters to be varied, reset or incremented; use a comprehensive desk calculator mode for intermediate computations; create procedures, a series of commands, executable by procedure name.

System Guide, 24 pgs, 2/77

## LY20-2311

DISPLAY EDITING SYSTEM FOR CMS, IUP 5796-PJP, SYSTEM GUIDE (CURRENT RELEASE)

This systems guide provides the Systems Analyst with the necessary information on the design, logic and coding of the system to enable him to make modifications, diagnose program errors and perform program maintenance.

The Display Editing System Installed User Program is a full-screen editing system for the Virtual Machine Facility/370 Conversational Monitor System (VM/370 CMS) designed to utilize the features of both local and remote terminals. In addition to a comprehensive array of cursor and command oriented data manipulation functions, the IUP has direct usability in a wide range of user applications. Display terminals supported are the 3277 model 2 and the IBM 3278 model 2, including both the TEXT PROCESSING and APL keyboards.

The Display Editing System accommodates CMS files of all types, including program source material, documentation, and data. It permits users to change portions of the display without program intervention. By placing the cursor on the position(s) requiring change, the user may re-enter the correct character(s). The Display Editing System checks for modifications made to the display image and makes permanent copies of the changes to the file.

System guide, 8 1/2 x 11 inches, 64 pgs, 9/77

## LY20-2339

TSO-3270 DISPLAY SUPPORT AND STRUCTURED PROGRAMMING FACILITY VERSION 2, LOGIC, PROG PROD 5740-XT8

SPF is a programming aid that operates in the Time Sharing Option (TSO) environment and is designed to increase productivity in developing and modifying programs. SPF supports VS2-TSO users who have a 24-line IBM 3270 display terminal equipped with a full keyboard, including 12 program function keys. SPF increases programmer productivity through:

- display presentations which prompt the user and simplify command and data entry.
- time-saving use of program function keys for commonly performed operations.
- features which facilitate structured programming in a time sharing environment.

This manual describes the logic of SPF. It is designed for those who maintain and use SPF.

Manual, 8 1/2 x 11 inches, 376 pages, 4/77

## LY20-2340

HASP NETWORKING (PRPQ P09009) LOGIC, PROG 5799-ATC

This manual describes the purpose and functions of the HASP Networking PRPQ and its relationship to OS/VS2, Release 1.7 and HASP II Version 4.0. It does not replace the program listings; it supplements them and makes the information in them more accessible.

Persons interested in determining sources of errors within or making changes to the internal logic of the HASP Networking PRPQ (HASP/NJI) should read this publication. Readers must be familiar with programming techniques and the operating principles of OS/VS2, Release 1.7 and HASP II Version 4.0. This manual assumes the reader is familiar with the contents of the HASP Logic Manual (GY27-7255).

Portions of the HASP Logic Manual were used as a base for this manual. A vertical rule in the left margin indicates NJI additions.

Manual, 8 1/2 x 11 inches, 200 pages, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-2341

ASP NETWORKING (PRPQ P09008) LOGIC, PROG 5799-ATB

The ASP NJI System is a set of programs that can be installed in an existing ASP system to provide an interface to a job network interconnecting processors that may be operating under ASP, HASP, VM/370, and JES2 so that users at any node can have access to programs, data files, and

facilities available at any other node.

JES2 installations using the Network Job Entry program product must predefine all connections between ASP installations operating under this Networking PRPQ.

This manual describes the function and logic of each ASP NJI module and the changes made to ASP, and acts as a guide to the program listings.

Manual, 8 1/2 x 11 inches, 80 pages, 4/77

## LY20-2342

VM/370 NETWORKING (PRPQ P09007) LOGIC, PROG 5799-ATA

This manual describes the internal functioning of the VM/370 Networking PRPQ (VNET). It is intended for use by IBM Program support representatives, and by system programmers and analysts who are responsible for installation, maintenance, and modification of the PRPQ.

This manual assists in isolating VNET module code. It gives:

- An overview of system operations
- Description of VNET's user functions with reference to the tasks and modules that perform them
- A description of each module's main routines and linkages
- Control flow diagrams of inter-routine inter-task relationships
- Data areas: locations and contents
- An approach to problem determination
- Six appendices with extensive reference material

These sections document the program logic sufficiently to point to the module listing that the PLM user needs.

Once in a module listing, the user should readily find the logic he is concerned with, using module and subroutine headers (prologues) and the comments in the assembler language statements.

## LY20-2368

S/370 FORTRAN H EXTENDED OPTIMIZATION ENHANCEMENT, IUP 5796-PKR, SYSTEMS GUIDE

This publication describes the internal design of the IBM System/370 FORTRAN H Extended Compiler Optimization Enhancement. It provides a higher level of optimization to the generation of executable object code from FORTRAN source programs, without requiring any changes to the FORTRAN source or control procedures.

The optimization enhancements to the Library usually provide for faster execution of the commonly used mathematical FORTRAN subroutines and input/output formatted conversions without changing the arithmetic results produced.

The optimization enhancements are applied to the program

products FORTRAN H Extended (5734-F03) and FORTRAN Library M2 (5734-LM3). An understanding of these products is assumed.

The Enhanced Compiler runs under either VM/CMS or MVS using the same conventions as the regular FORTRAN H Extended compiler and FORTRAN Library M2.

This Systems Guide is intended for use by persons involved in the maintenance of systems and program products. The information contained herein is not necessary for the use and operation of the FORTRAN compiler itself.

Manual, 60 pages

## LY20-2383

TELECOMMUNICATIONS CONTROL SYSTEM - ADVANCED COMMUNICATIONS FUNCTION (TCS-ACF), LIC PROG 5740-XY3, LOGIC

This manual describes the internal program logic and operation of the Telecommunications Control System-Advanced Communications Function (TCS-ACF).

The basic TCS-ACF concepts section contains the functional and logical concepts of TCS-ACF and places the program in perspective relative to the Operating System (OS/VS) and the Telecommunications Access Method (TCAM). The method of operation section describes functional flows of programs in the TCS-ACF environment and also points out those features that are major additions to the TCAM facilities or are deviations from TCAM.

The program organization section describes the TCS-ACF modules in the form of a table with the information necessary for an understanding of the function of each

module and its place relative to other related modules. This section also discusses each TCS-ADV macro, with a figure of any created parameter list.

Note: This manual describes the Basic TCS-ACF program and does not apply to the multicomputer Networking Feature. Manual, 8 1/2 x 11 inches, 140 pages, 10/77

## LY20-2416

IMS-CMS DATA LINK FOR VM/370, IUP 5796-PLC, SYSTEMS GUIDE

This program links the power of APL or CMS data management with the data storage capabilities of IMS. An APL or CMS user may submit IMS transactions and, upon completion of IMS processing, have IMS output available in the user's APL or CMS address space. After processing the data, the user may store results in the IMS system. This publication describes the design and processing logic of this program. It is intended to help those involved in making program modifications, diagnosing program errors, and performing program maintenance.

## LY20-2418

VSE PERFORMANCE TOOL, IUP 5796-PLQ, SYSTEMS GUIDE

The performance of an IBM System 4300 operating under DOS/VSE with VSE/Advanced Functions or an IBM System 370 operating under DOS/VSE or DOS/VS depends on many complex and interrelated factors. Manual or theoretical methods cannot adequately evaluate machine/system performance. The VSE/PT Installed User Program is a software tool that provides the ability to measure and report many performance-related factors of such a system.

It uses dynamic event tracing and/or periodic statistical sampling to record system status on an output data file. Subsequently, a series of reports can be produced to aid in the evaluation of software and hardware performance during the entire monitoring period or any portion thereof.

Used on a regular basis, VSE/PT can help answer some key performance questions. It can measure the changing environment to aid in an understanding of the system's internal operations. The measurement detail can be used to identify where changes to the system may produce an improvement in overall performance. Subsequent analysis can verify that the changes produced the desired result.

Finally, an analysis of the VSE/PT reports can assist in determining which resources are available for the future growth of the system.

## LY20-2426

VS APL EXTENDED EDITOR & FULL SCREEN MANAGER, IUP 5796-PLY, SYSTEMS GUIDE

This manual describes the operation and logic of the VS APL

Extended Editor and Full Screen Manager. It contains a general overview of the editor components, the relationship of the editor to the VS APL system, and the overall flow of the VS APL Extended Editor.

The VS APL Extended Editor is written in S/370 Assembler and is a replacement for the standard APL del-editor. The Extended Editor supports the hardware editing features of the 3270 display station, and aids the APL programmer in the creation, modification, and testing of programs in a shorter amount of time.

The Full Screen Manager is an auxiliary processor that allows the APL programmer to manipulate the 3270 console in full screen mode. The auxiliary processor, API24X, is similar to the APL124 auxiliary processor for VSPC and CICS. API24X has some additional capabilities that are not available in the versions for VSPC and CICS.

Some of the major features of this IUP are:

- Full Screen support for Editor
- Full Screen support for APL Programmer
- Multiple Function Parallel Editing
- Execution of APL expressions within the Editor
- Context Editing commands
- Ability to Edit Character Matrices and Vectors
- Compatibility with del-editor
- Similarity to CMS and TSO Editors

## LY20-2429

APL WORKSPACE STRUCTURE ANALYZER, IUP 5796-PNB, SYSTEMS GUIDE

This IUP consists of a collection of programs in a single workspace which gathers cross reference information about a collection of APL or FORTRAN programs. Additional programs display this information in a number of useful ways, and include output on terminal, system printer, or documentation file. Name manipulation functions help group the names of functions and variables into functional groups for program partitioning, or for documentation displays, additional functions are provided that allow one to "browse" a workspace, looking for specific character patterns. A "revision" function helps make global changes to APL functions and character variables.

OS/MVT ANALYSIS PROGRAM-1 (AP-1) LOGIC, PROG 5799-ARG, PRPQ E64653 FOR 3350 & 3330 MODEL 11 ON SYSTEM/370

This manual is intended for maintenance personnel who require an in-depth knowledge of AP-1's design, organization, data area and diagnostic information.

This manual describes the internal logic of AP-1 and contains a Microfiche directory and diagnostic information. The microfiche directory should be used with the program listings which show which module references the fields of data. The labels used in each module is also presented. OS/MVT Analysis Program-1 (AP-1) User's Guide, SH20-9106, is a prerequisite. Manual, 69 pages, 9/76

## LY20-8050

IMS/VS, 5740-XX2, VERSION 1 FAILURE ANALYSIS STRUCTURE TABLE FOR DUMP ANALYSIS (CURRENT RELEASE)

This publication presents Failure Analysis Structure Tables (FAST) that associate abnormal termination conditions encountered in operation of IMS/VS with their causes. It is intended for both IMS/VS users and IBM Field Engineering programming support representatives who define and diagnose problems encountered in the operation of IMS/VS. Readers of this book should be able to use this book to precisely define a particular IMS/VS failure. Manual, 900 pages, 12/76

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-8058

OFFLINE 3800 UTILITY, LIC PROG 5748-UT2, LOGIC

This manual explains the logic of the utility program which controls the Offline 3800 Printer. The purpose of the manual is to help the IBM Programming Service Representative (PSR) to isolate a programming failure as quickly as possible. Although this manual is primarily written for the PSR, system programmers and others may also be interested in some of the information presented.

Manual, 8 1/2 x 11 inches, 2 pgs, 11/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-8063

IMS/VS VERSION 1, LIC PROG 5740-XX2, DIAGNOSTIC AIDS (CURRENT RELEASE)

This book is designed to help IBM PSRs and customer system programmers do three things:

- Define programming failures systematically
- Find fixes in RETAIN/EWS for IMS/VS programming failures
- Find user-caused programming failures

The book is based on a concept of defining programming failures through the use of "keywords". Keywords are simply words that identify aspects of a programming failure, such as the subfunction that failed or the type of failure. The book tells how to construct a set of keywords to define a programming failure. Once keywords are constructed, they are used to search RETAIN/EWS for similarly defined programming failures.

Manual, 8 1/2 x 11 inches, 90 pgs, 11/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-8069

IMS/VS VERSION 1, LIC PROG 5740-XX2, LOGIC (CURRENT RELEASE)

This publication is intended for program systems representatives (PSRs) and system programmers who are involved in the service and/or modification of IMS/VS. Sufficient information is provided to enable a user to rapidly locate a pertinent point in the program code. The structure of the manual is based on an information organization linked to the IMS/VS function/subfunction

breakdown as described in the IMS/VS Diagnostic Aids manual. Prerequisite publications are: IMS/VS Diagnostic Aids, LY20-8063; IMS/VS System/Application Design Guide, SH20-9025; IMS/VS System Programming Reference Manual, SH20-9027; and IMS/VS Utilities Reference Manual, SH20-9029. Manual, 8 1/2 x 11 inches, 400 pages, 9/78

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-8072

OS/VS1 AND OS/VS2 MVS VS PERSONAL COMPUTING (VSPC) LOGIC

This publication describes the internal logic of VS Personal Computing (VSPC), an IBM program product that runs under OS/VS1 and OS/VS2 MVS. It is directed toward persons supporting VSPC who require information about the functions performed and the methods used to determine the nature and cause of problems encountered when executing the functions. Since program logic is not needed to use VSPC, this publication is limited to licensees involved in program service. Manual, 128 pages, 12/78

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY20-8073

OS/VS2 MVS VS PERSONAL COMPUTING (VSPC) DIAGNOSTIC AIDS, LIC PROG 5740-XR6, LOGIC

This book is designed to help define VSPC program failures through the use of keywords. Prerequisite publications:

- VS Personal Computing (VSPC) Logic Summary, LY20-8072
- VS Personal Computing (VSPC) Installation Reference, SH20-9072

Manual, 8 1/2 x 11 inches, 48 pages, 8/79

## SY20-8077

OS/VS DB/DC, 5740-XXF, DATA DICTIONARY DIAGNOSIS REFERENCE (CURRENT RELEASE)

This book is intended for use in diagnosing program failures in the DB/DC Data Dictionary. Before using this book, the program failure should have been analyzed using the diagnostic procedures in OS/VS DB/DC Data Dictionary Diagnosis Guide, SY20-8078, knowledge of which is prerequisite to the use of this book.

Additional information to assist in the isolation of failures is found in DB/DC Data Dictionary Diagnosis Reference, LY20-8037.

Manual, 8 1/2 x 11 inches, 150 pages, 8/80

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY20-8078

OS/VS DB/DC DATA DICTIONARY, 5740-XXF DIAGNOSIS GUIDE (CURRENT RELEASE)

This book is intended for use by people diagnosing program failures in the DB/DC Data Dictionary. It provides information for systematic selection of "keywords" that identify aspects of a program failure, such as the function that failed or the type of failure.

Manual, 8 1/2 x 11 inches, 80 pages, 8/80

////5740-XXF

## SY20-8079

VS PERSONAL COMPUTING (VSPC) VERSION 2 FOR OS/VS2 MVS, LIC PROG 5665-283, DIAGNOSIS

This publication tells how to diagnose failures in OS/VS2 MVS VS Personal Computing (VSPC). It assumes that it has been determined that the suspected failure is not a user error; that is, it was not caused by faulty usage of VSPC, or by an error in the logic of the application program.

Manual, 8 1/2 x 11 inches, 100 pages, 4/81

////5665-283

LY20-8081

DOS/VS DB/DC DATA DICTIONARY DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is designed to be used in conjunction with DOS/VS DB/DC Data Dictionary Diagnosis: Guide. It describes diagnosis reference information pertaining to the Dictionary and is intended primarily for those involved in Dictionary service. Sufficient information is provided to enable a user to rapidly locate a pertinent point in the program code. Together with the comments and coding in the Dictionary program listings, this manual describes the internal concepts of the system.

Prerequisite and associated publications are listed in the preface.

Manual, 8 1/2 x 11 inches, 84 pages, 12/81  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY20-8082

DOS/VS DB/DC DATA DICTIONARY DIAGNOSIS GUIDE (CURRENT RELEASE)

This book provides diagnosticians with information to systematically select "keywords" that describe a suspected program failure in the DOS/VS DB/DC Data Dictionary. Keywords are words that identify aspects of a program failure such as the function that failed or the type of failure.

Reader should have a basic understanding of: Dictionary concepts; dump analysis; System Control Program (SCP) diagnostic practices; and DB/DC diagnostic practices.  
Manual, 8 1/2 x 11 inches, 50 pages, 12/81

LY20-9001

DBPROTOTYPE II, IUP 5796-PJK, SYSTEMS GUIDE

DBPROTOTYPE/II is a set of programs that provide data base design support of Information and Management System/Virtual Storage (IMS/VS). These programs enable the IMS/VS data base designer to create a test data base and skeletal application programs to run against that data base, as well as build analytic models. By analyzing the performance data obtained from these processing sequences, the designer can select the design best suited to his needs.

This manual contains information about the internal logic and organization of the DBPROTOTYPE/II programs. It is intended to assist program maintenance and alteration.

Manual  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY20-9007

APL DATA INTERFACE-II, IUP 5796-PNG, SYSTEMS GUIDE

This manual provides information on the design, logic, and coding of the APL Data Interface-II IUP. It is intended to help those involved in making program modifications and documenting program errors.

Manual  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY20-9040

OS/VS1 HOST REMOTE NODE ENTRY SYSTEM II, IUP 5796-PPL, SYSTEMS GUIDE

OS/VS1 Host Remote Node Entry System II enables a System/370 operating under the control of OS/VS1 to function as a remote terminal (workstation) for submitting jobs to a central System/370 to be executed under any OS/VS environment.

Manual, 8 1/2 x 11 inches, 36 pages, 12/81

GENERALIZED CICS/VS APPLICATION DEVELOPMENT ARCHITECTURE VERSION, 5796-PWJ, 2.0 SYSTEMS GUIDE

The Generalized CICS/VS Application Development Architecture, developed by the Southern California Edison Company, is a system of generalized program modules designed to increase the productivity of application programmers involved in developing online applications under CICS/OS/VS and CICS/DOS/VS. The generalized modules are driven by specification tables which are defined via user-selected macro parameters.

This manual provides a system description and is an installation, operations and programmer's reference manual.  
Manual, 8 1/2 x 11 inches, 1324 pages, 4/84

6Y21-0012

OS BSAM LOGIC FOR IBM 1419/1275

This publication describes the logic of the basic sequential access method (BSAM) routines required to use the IBM 1419 Magnetic Char. Reader and the IBM 1275 Optical Char. Reader with the MFT, MVT, and VS options of the operating system (OS). It is intended for IBM customer engineers and for programmers who must understand or modify 1419/1275 BSAM routines.

A general understanding of OS and data management and an understanding of how to write 1419/1275 programs is required to use this publication. See OS Data Management Services & Macro Instructions for IBM 1419/1275, GC21-5006 for information on how to write programs for the 1419 and 1275.

Manual, 74 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6Y21-0013

OS DATA MANAGEMENT MACRO LOGIC FOR IBM 1285/1287/1288

This publication describes the internal program logic for the MFT, MVT, VS1 and VS2 support of the IBM 1285, the IBM 1287, and the IBM 1288. The support includes modules to read documents with BSAM and journal tapes with QSAM.

This publication is intended for use by IBM programming systems representatives involved in program maintenance and by programmers needing information on the logic of the 1285/1287/1288 data management routines.

Manual, 91 pages

LY21-0014

IBM DOS RPG II LANGUAGE PROGRAM LOGIC MANUAL PROGRAM NUMBER 5736-RG1

This publication describes the internal logic of the RPG II compiler, object program, and formatted dump program. It is intended as a recall mechanism and a debugging aid. As a debugging aid, this manual serves best as a guide to sequences of instructions found in the coding of the program.

This manual is divided into three parts describing the internal logic of the RPG II program. The first part describes the RPG II compiler, the second part describes the

object program, and the third part the RPG II formatted dump program. Each part includes the following areas:

- o Introduction.
- o Method of Operation.
- o Program Organization.
- o Directory.
- o Data Areas.

The information necessary to implement the program is not included in this publication.

Manual, 240 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY22-7186

3090 PROCESSOR COMPLEX INTRODUCTION AND SERVICE STRATEGY (CURRENT RELEASE)

This publication contains information about the 3090 Processor Complex library organization and an introduction to the processors.

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-4024

4381 PROCESSOR MODEL GROUP 3 CONSOLE FUNCTIONS AND MESSAGES

This publication has information about the display screens for the 4381 Processor Model Group 3. The screen images are sample displays of typical functions. This information is primarily for customer engineers and support center personnel. The reader should be familiar with the display console.

Manual, 8 1/2 x 11 inches, 410 pages, 1984

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5155

OS/VS1 SUPERVISOR LOGIC

This manual describes the purpose and function of the VS1 supervisor and its relationship to the control program. The major areas of the supervisor are identified as interrupt management, task management, contents management, virtual storage management, page management, timer management, and overlay management. Each of the routines related to these functions, the data areas used by the supervisor, and the diagnostic aids for maintaining the system are described in detail. Three appendixes provide information on Program Fetch, time slicing, shared DASD, extended precision floating point decimal simulator, generalized trace facility, and ECPS (extended control program support) for VS1.

This manual does not discuss I/O supervision, checkpoint/restart, or recovery management services.

Persons interested in determining sources of errors within or making changes to the internal logic of the VS1 supervisor should read this manual. This manual is also written as a reference tool for educational purposes. Readers must be familiar with programming techniques and the operating principles of VS1.

Prerequisite reading: IBM System/370 System Summary.

Manual, 432 pages, (release 6)

## SY24-5156

OS/VS1 I/O SUPERVISOR LOGIC MANUAL

This manual describes the internal logic of the OS/VS I/O supervisor. It is intended to be used by program support customer engineers and system programmers who alter program design.

The I/O supervisor starts, monitors, and, when necessary, restarts I/O operations.

This manual is comprised of 7 sections:

1. Introduction: Informs you of the I/O supervisor's

services and overall operation.

2. Method of Operation: Provides high level HIPO (Hierarchy plus Input-Process-Output) diagrams that describe the operation of the I/O supervisor and guide you into the program listing.
3. Program Organization: Contains functional organization charts of the I/O supervisor, and flowcharts of new or particularly complex routines.
4. Directories: Provides cross-reference lists.
5. Data Areas: Contains descriptions of the data areas that are used primarily by the I/O supervisor.
6. Diagnostic Aids: Contains information to help you interpret the program listing.
7. Appendixes: Supplements both this manual and the program listing. Included are descriptions of SVC routines and optional features, error recording information, error recovery routines, list of abbreviations, and a glossary.

Manual, 184 pages

## SY24-5159

OS/VS1 CHECKPOINT/RESTART LOGIC

Provides a reference to the checkpoint and restart routines for persons involved in program maintenance, and for system programmers who are altering the program design. Sections included give a brief introduction, major functions, control flow, pointers to the listings, data areas used, and messages issued by the checkpoint and restart routines.

Prerequisite Publications:

- o OS/VS Checkpoint/Restart, GC26-3784
- o OS/VS1 JCL Services, GC24-5100

Manual, 44 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5160

OS/VS1 IPL AND NIP LOGIC

Describes the internal logic of the OS/VS1 Initial Program Loader (IPL) and Nucleus Initialization Program (NIP) for persons involved in program maintenance, and for system programmers who are altering the program design.

Sections included in this reference manual provide the reader with introductory information about IPL and NIP, their functions, their routines, cross-references to the listings, data areas used, messages issued, and possible wait state codes.

Prerequisite Publications:

- o IBM System/370 System Summary, GA22-7001.
- o OS/VS1 Planning and Use Guide, GC24-5090.

SY24-5168

OS/VS1 JOB MANAGEMENT LOGIC, VOLUME 1

This publication is Volume 1 of a two volume set. The two volume set replaces OS/VS1 Job Management Logic, SY24-5161. This volume contains Section 1: Job Management Concepts, Section 2: Method of Operation, and Section 3: Program Organization. Volume 2 (SY24-5169) contains Program Logic Manual Sections 4, 5, and 6.

This manual supplements the program listings and makes the information in the listings easier to access. It is for persons involved with program changes, and provides them with a hierarchical overview of the job management functions to show how they operate functional system flow to illustrate the functions performed by the various job management modules.

The user of this publication should be familiar with OS/VS1 concepts and terminology, and have a knowledge of the OS/VS1 job management functions. Prerequisite publications are:

- OS/VS1 Planning and Use Guide, 6C24-5090
- OS/VS1 JCL Reference, 6C24-5099
- OS/VS1 JCL Services, 6C24-5100
- OS/VS1 Supervisor Services and Macro Instructions, 6C24-5103

SY24-5170

OS/VS1 RECOVERY MANAGEMENT SUPPORT LOGIC

This publication describes three recovery management programs that are part of OS/VS1:

- o The Machine-Check Handler (MCH), a program that processes machine-check interruptions and writes diagnostic messages and error records.
- o The Channel-Check Handler (CCH), a program that receives control after the detection of a channel data check, channel control check, or interface control check.
- o Dynamic Device Reconfiguration (DDR), a program that permits a demountable volume to be moved from one device to another and repositioned. This method is used to bypass I/O errors and avoid abnormally terminating the affected job or reloading the system. This publication also includes appendixes for:
  - o The Missing Interruption Checker (MIC), a program that checks to see that expected I/O interruptions occur within a specified time period.
  - o The Power Warning Feature (PWF), a program that prevents the loss of information in real storage at the occurrence of a utility power disturbance.

This publication is intended to be used as a guide to the program listings. The intended audience includes customer engineers, programming support representatives, and system programmers.

## SY24-5175

SU5 SUPPLEMENT TO OS/VSI I/O SUPERVISOR LOGIC (SY24-5156-5)  
This publication supplements the I/O Supervisor Logic manual, SY24-5156-5, for MSS Enhancements, Selectable Unit 5741-605. It describes the specifications for the Start I/O routine for virtual DASD devices.  
Manual, 8 1/2 x 11 inches, 20 pgs, 3/77  
////5741-605

## SY24-5176

SU5 SUPPLEMENT TO OS/VSI RECOVERY MANAGEMENT SUPPORT LOGIC (SY24-5170-0)  
This publication supplements the OS/VSI Recovery Management Support Logic manual, SY24-5170-0, for MSS Enhancements, selectable unit 5741-605. It describes the specification of longer time intervals needed by the Missing Interrupt Checker (MIC) to properly check for missing interrupts from Mass Storage System (MSS) devices.  
Manual, 8 1/2 x 11 inches, 16 pgs, 3/77  
////5741-605

## SY24-5177

SU 5741-605 SUPPLEMENT TO VSI SYSTEM DATA AREAS, SY28-0605-5  
This publication supplements the OS/VSI System Data Areas manual, SY28-0605-5, for OS/VSI MSS Enhancements, S.U. 5741-605. It documents the additional MSS flags in the Request Queue Element (RQE).  
Manual, 8 pgs, 3/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5178

SU5 SUPPLEMENT TO OS/VSI JOB MANAGEMENT LOGIC, VOLUME 1  
This manual, on OS/VSI selectable unit 5741-605, provides MSS (Mass Storage System) Enhancements information for OS/VSI Job Management Logic, Volume 1 (SY24-5168). Intended users are customers and IBM personnel.  
Manual, 8 1/2 x 11 inches, 16 pgs, 3/77  
////5741-605

## SY24-5179

SU5 SUPPLEMENT TO OS/VSI JOB MANAGEMENT LOGIC, VOLUME 2 (SY24-5169-0) SELECTABLE UNIT 5741-605  
SU5 provides MSS enhancements for VSI. This Supplement adds information to the OS/VSI Job Management Logic, Volume 2 (SY24-5169). The intended audience is customers and IBM personnel.  
Manual, 20 pgs, 3/77  
////5741-605

## SY24-5181

DOS/VSE FIXED BLOCK ARCHITECTURE LOGICAL IOCS  
This reference publication is the fourth of four logic manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operation System/Virtual Storage Extended. The four related logic manuals are:

- Volume 1: General Information and Imperative Macros, SY33-8559
- Volume 2: SAM, SY33-8560
- Volume 3: DAM and ISAM, SY33-8561
- FBA Logical IOCS, SY24-5181

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the programs described.  
Manual, 8 1/2 x 11 inches, 532 pages, 2/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5182

SUPPLEMENT TO OS/VSI SUPERVISOR LOGIC, SUID 5741-606  
This manual is a supplement to, and provides replacement pages for OS/VSI Supervisor Logic, SY24-5155-5. It documents the OS/VSI Subsystem Attachment Support selectable unit impact to the OS/VSI supervisor.  
Manual, 8 1/2 x 11 inches, 40 pgs, 8/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5183

SU 5741-606 SUPPLEMENT TO VSI SYSTEM DATA AREAS, SY28-0605-5  
This publication supplements the OS/VSI System Data Areas manual, SY28-0605-5, for OS/VSI Subsystem Support. It documents new data areas and changes to existing data areas for subsystem support.  
Manual, 36 pgs, 3/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5184

SU6 SUPPLEMENT TO OS/VSI JOB MANAGEMENT LOGIC, VOLUME 1 (SU ID 5741-606)  
VSI SU6 (Selectable Unit 5741-606) provides a generalized linkage to subsystems. This supplement adds SU6 information to OS/VSI Job Management Logic, Volume 1 (SY24-5168). Intended users are customers and IBM personnel.  
Manual, 60 pgs, 3/77  
////5741-606

## SY24-5185

SU6 SUPPLEMENT TO OS/VSI JOB MANAGEMENT LOGIC, VOLUME 2 (SY24-5169-0) SU ID 5741-606  
VSI SU6 (Selectable Unit 5741-606) provides a generalized linkage to subsystems. This supplement adds SU6 information to OS/VSI Job Management Logic, Volume 2 (SY24-5169). Intended users are customers and IBM personnel.  
Manual, 64 pgs, 3/77  
////5741-606

## LY24-5187

IBM 3895 DOCUMENT IDENTIFICATION AND DESCRIPTION MACROS (DIDM) LOGIC, LIC PROG 5748-F12  
This manual describes the internal logic of DIDM and contains macro descriptions and diagnostic information. It is designed to be used with the program listings. The material contained in this manual includes an overview of DIDM macros, logic flow of the program (flow charts), and a description of the tables used.  
Manual, 8 1/2 x 11 inches, 110 pgs, 4/77  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5191

VSE/VSAM VSAM LOGIC, VOLUME 1: CATALOG MANAGEMENT, 5745-SC-VCM (CURRENT RELEASE)  
This book describes the internal logic of VSAM and provides diagnostic information for maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of VSAM.  
Manual, 474 pages, 2/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5192

VSE/VSAM VSAM LOGIC, VOLUME 2: RECORD MANAGEMENT 5745-SC-VSM, LIC PROG 5746-AM2 (CURRENT RELEASE)  
This book describes the internal logic of VSAM and provides diagnostic information for maintenance personnel and

LY24

development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of VSAM.  
Manual, 452 pages, 2/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY24-5193

SU 5741-604 SUPPLEMENT TO VSI SYSTEM DATA AREAS, SY28-0605-5  
This publication supplements the OS/VSI System Data Areas, SY28-0605-5, for the IBM 3895 Document Reader/Inscriber, S.U. 5741-604. It documents changes to the IOB and UCB.  
Manual, 16 pgs, 3/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY24-5194

SU-4 SUPPLEMENT TO OS/VSI I/O SUPERVISOR LOGIC (SY24-5156-5)  
This publication supplements the I/O Supervisor Logic manual, SY24-5156-5, for the IBM 3895 document reader/inscriber, Selectable Unit 5741-604. It describes the 3895 error routine.  
Manual, 8 1/2 x 11 inches, 20 pgs, 3/77  
///5741-604

LY24-5195

VSE/VSAM ACCESS METHOD SERVICES LOGIC, COMPONENT ID 5745-SC-AMS, LIC PROG 5746-AM2 (CURRENT RELEASE)  
This book describes the internal logic of Access Method Services and provides diagnostic information for maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of Access Method Services.  
Manual, 500 pages, 2/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-5203

VIRTUAL MACHINE/SYSTEM PRODUCT: REMOTE SPOOLING COMMUNICATIONS SUBSYSTEM NETWORKING, LIC PROG 5748-XPI LOGIC (CURRENT RELEASE)  
This logic manual describes the internal functioning of the Remote Spooling Communications Subsystem Networking program product. It is for IBM Program Support Representatives, system programmers, and system analysts responsible for installation, maintenance, and modification of RSCS Networking. It contains:  

- An overview of RSCS Networking operations.
- Descriptions of RSCS Networking's user functions with reference to the tasks and modules that perform them.
- A description of each module's main routines and linkages.
- Control flow diagrams.
- Location and contents of data areas.
- An approach to problem determination.
- A description of the RSCS Networking Preloader utility

Manual, 8 1/2 x 11 inches, 180 pages, 3/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-5204

VSE/VSAM SPACE MANAGEMENT FOR SAM FEATURE LOGIC (CURRENT RELEASE)  
This book describes the internal logic of the VSE/VSAM Space Management for SAM Feature and provides diagnostic information for maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of the Feature.  
Manual, 76 pages, 12/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24

LY24-5205

VM/370 VM/INTERACTIVE FILE SHARING FOR CMS, LIC PROG 5748-XXC, LOGIC (CURRENT RELEASE)  
This manual describes the internal logic of VM/Interactive File Sharing for CMS. It contains detailed component descriptions, module interconnecting diagrams, and module descriptions. The information in this manual is designed to be used with program listings.  
Manual, 8 1/2 x 11 inches, 110 pages, 4/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-5206

VM/370 DISPLAY MANAGEMENT SYSTEM FOR CMS, LIC PROG 5748-XXB LOGIC (CURRENT RELEASE)  
This manual contains brief descriptions of the functions, architecture, logic flow, and structure of the Display Management System for CMS. It also contains an extensive description of each module, a number of cross-reference tables to aid in tracking flow, and depictions of the data areas used.  
Manual, 8 1/2 x 11 inches, 100 pages, 3/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-5208

VM/SP VM/PASS-THROUGH FACILITY LOGIC (CURRENT RELEASE)  
This manual describes the internal logical organization and function of the VM/Pass-Through Facility. It defines program components, explains functional flow within and between components; also includes module, control block, and data area descriptions. It may be used by anyone involved in program maintenance and/or program problem source determination. As a reference for the latter use the final section of the manual contains examples of program-generated full and partial dumps, and internal trace records. It also describes Pass-Through/IPCS support commands and messages.  
24257  
GY20-0073  
Manual, 8 1/2 x 11 inches, 184 pages, 03/82  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-5209

VSE/ADVANCED FUNCTIONS DIAGNOSIS REFERENCE LIOCS VOLUME 1 GENERAL INFORMATION & IMPERATIVE MACROS LOGIC (CURRENT RELEASE)  
This reference publication is the first of four logic manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operating System/Virtual Storage Extended. The four related Logic Manuals are:  

1. VSE/Advanced Functions Diagnosis Reference: LIOCS Volume 1 General Information and Imperative Macros, LY24-5209
2. VSE/Advanced Functions Diagnosis Reference: LIOCS Volume 2 SAM, LY24-5210
3. VSE/Advanced Functions Diagnosis Reference: LIOCS Volume 3 DAM and ISAM, LY24-5211
4. VSE/Advanced Functions Diagnosis Reference: Direct and Sequential DASD, LY24-5212

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the programs described. Effective use of this publication requires an understanding of IBM System/370 operations and the DOS/VSE Assembler language and its associated macro definition language.  
Manual, 8 1/2 x 11 inches, 352 pages, 9/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5210

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, DIAGNOSIS REFERENCE LIOCS VOLUME 2, SAM LOGIC (CURRENT RELEASE)

This reference publication is the second in a series of four manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs of VSE/Advanced Functions. The four related manuals are:

Volume 1: General Information and Imperative Macros, LY24-5209

Volume 2: SAM Logic, LY24-5210

Volume 3: DAM and ISAM Logic, LY24-5211

Direct and Sequential DASD, LY24-5212

This manual is intended for persons involved in program maintenance. It is not necessary for the operation of the programs described. Effective use of this manual requires an understanding of IBM VSE/Advanced Functions operation and of the Assembler language and its associated macro language. Reference publications for this information are listed in the front of the manual.

Manual, 8 1/2 x 11 inches, 388 pages, 9/79

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5211

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, DIAGNOSIS REFERENCE LIOCS VOLUME 3 DAM & ISAM LOGIC (CURRENT RELEASE)

This reference publication is the third in a series of four manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs of VSE/Advanced Functions. The four related manuals are: Volume 1:

General Information and Imperative Macros, LY24-5209, Volume 2: SAM Logic, LY24-5210, Volume 3: DAM and ISAM Logic, LY24-5211, and Direct and Sequential DASD, LY24-5212.

This manual is intended for persons involved in program maintenance. It is not necessary for the operation of the program described. Effective use of this manual requires an understanding of IBM VSE/Advanced Functions operation and of the Assembler language and its associated macro language. Reference publications for this information are listed in the front of the manual.

Manual, 8 1/2 x 11 inches, 352 pages, 9/79

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5212

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, DIAGNOSIS REFERENCE LIOCS VOLUME 4 DAM & ISAM LOGIC FOR DASD (CURRENT RELEASE)

This reference publication is the fourth in a series of four manuals that describe the internal logic of the Logical IOCS (Input/Output control System) programs of VSE/Advanced Functions. The four related manuals are:

- Volume 1: General Information and Imperative Macros, LY24-5209

- Volume 2: SAM Logic, LY24-5210

- Volume 3: DAM and ISAM Logic, LY24-5211

- Volume 4: SAM and DAM for DASD, LY24-5212

This manual is intended for persons involved in program maintenance. It is not necessary for the operation of the programs described. Effective use of this manual requires an understanding of IBM VSE/Advanced Functions operation and of the Assembler Language and its associated macro language. Reference publications for this information are listed in the front of the manual.

Manual, 8 1/2 x 11 inches, 670 pages, 9/69

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5213

VSE/VSAM BACKUP/RESTORE FEATURE, LIC PROG 5746-AM2, LOGIC (CURRENT RELEASE)

This manual describes the internal logic of the VSE/VSAM Backup/Restore Feature and provides diagnostic information for maintenance personnel and development programmers who

required an in-depth knowledge of the program's design and organization. It is not required for effective use of the Feature.

Manual, 8 1/2 x 11 inches, 52 pages, 2/80

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5215

DL/I DOS/VS, 5746-XX1, VOLUME 2 LOGIC (CURRENT RELEASE)

This manual is to be used with the Data Language/I Disk Operating System/Virtual Storage (DL/I DOS/VS) Logic Manual, Volume 1 and program listings for DL/I DOS/VS. It contains the HIPO diagrams that illustrate the program logic described in Volume 1. It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design.

Manual, 8 1/2 x 11 inches, 488 pages, 6/81

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5216

SQL/DATA SYSTEM, 5748-XXJ, LOGIC, VOLUME 1 (CURRENT RELEASE)

This publication (Volume 1 of 3) provides a high-level view of the SQL/Data System Logic, control flow of the components and their major modules, a textual description of all the modules, and a module directory.

It provides information needed by those people involved in SQL/Data System program diagnosis and modification.

This manual is a companion to Volumes 2 and 3, which contain data areas, diagnostic aids, and appendices (Volume 3 deals exclusively with the EXTRACT Facility, which is used only on VSE systems).

3 deals exclusively with the EXTRACT Facility, which is used only on VSE systems).

Manual, 8 1/2 x 11 inches, 616 pages, 9/83

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5217

SQL/DATA SYSTEM, 5748-XXJ, LOGIC, VOLUME 2 (CURRENT RELEASE)

This publication (Volume 2 of 3) provides the data areas (control blocks, tables, etc.), layouts, diagnostic aids, and appendices for the SQL/Data System. It provides information needed by those people involved in the SQL/Data System program diagnosis and modification. It is designed to be a companion to Volumes 1 and 3. (Volume 3 deals exclusively with the EXTRACT Facility, which is used only on VSE Systems).

System program diagnosis and modification. It is designed to be a companion to Volumes 1 and 3. (Volume 3 deals exclusively with the EXTRACT Facility, which is used only on VSE Systems).

Manual, 8 1/2 x 11 inches, 528 pages, 9/83

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5218

MVS/OCCF LOGIC SPECIFICATIONS

This publication provides detailed information about the logic of MVS/OCCF. It is intended for persons responsible for program maintenance and for system programmers responsible for altering program design. It contains detailed information about each of the modules in the facility and describes the architecture. It is assumed that the reader is familiar with MVS terminology and concepts and with NCCF.

Manual, 8 1/2 x 11 inches, 120 pages, 6/82

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY24-5220

VM/SP DATA AREAS AND CONTROL BLOCKS LOGIC VOLUME 1 CP (CURRENT RELEASE)

This publication along with LY24-5221 replaces LY20-0891. This publication contains information about the IBM Virtual Machine/System Product (VM/SP) program number 5664-167. This publication, together with the VM/SP System Logic and Problem Determination Guide Volumes 1 and 2, are intended for use by the system programmer responsible for updating VM/SP. This volume contains descriptions of the major data areas and control blocks used by the Control Program (CP). Manual, 8 1/2 x 11 inches, 315 pages, 09/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5221

VM/SP DATA AREAS AND CONTROL BLOCKS LOGIC VOLUME 2 CMS (CURRENT RELEASE)

This publication along with LY24-5220 replaces LY20-0891. This publication contains information about the IBM Virtual Machine/System Product (VM/SP) program number 5664-167. This publication together with the VM/SP System Logic and Problem Determination Guide Volumes 1 and 2, are intended for use by the system programmer responsible for updating VM/SP. This volume contains descriptions of the major data areas and control blocks used by the Conversational Monitor System (CMS). Manual, 8 1/2 x 11 inches, 301 pages, 09/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY24-5222

SQL/DATA SYSTEM, 5748-XXJ, LOGIC, VOLUME 3 (CURRENT RELEASE)

This publication (Volume 3 of 3) deals with the SQL/Data System EXTRACT Facility and is of concern to those using VSE systems only. This volume supplies the method of operations, program organization, module and link book directions, data areas, and diagnostic aids that apply to the EXTRACT Facility. SQL/Data System Logic, Volume 3 provides information needed by those people involved program diagnosis and modification, and is designed to be a companion to volumes 1 and 2. Manual, 8 1/2 x 11 inches, 176 pages, 9/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5223

QMF/VSE, 5666-292, DIAGNOSIS REFERENCE (CURRENT RELEASE)

This manual tells how to diagnose Query Management Facility/VSE internal problems and how to report them to IBM. This includes developing a keyboard string, diagnostic practices, dump analysis, and searching for similar known problems in a software support data base. Manual, 8 1/2 x 11 inches, 72 pages, 9/83  
//37//5666-292

## SY24-5224

REFERENCE QMF/VSE DIAGNOSIS (CURRENT RELEASE)

This manual aids in isolating problems in the Query Management Facility/VSE (QMF/VSE). It is the companion volume of QMF/VSE Diagnosis Guide. This Diagnosis Reference manual contains an overview of QMF/VSE, functional descriptions of the components, a module directly, critical data areas, and some service aids including how to use the diagnostic tools. Manual, 8 1/2 x 11 inches, 264 pages, 9/83  
//37//5666-292

## LY24-5228

VM RSCS NETWORKING VERSION 2 DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is for those who are responsible for problem diagnosis and maintenance of RSCS, Version 2. It describes internal logic of the RSCS program modules, major data areas, and aids to diagnosing problems. Manual, 8 1/2 x 11 inches, 540 pages, 9/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5229

STRUCTURED QUERY LANGUAGE/DATA SYSTEM FOR VIRTUAL STORAGE EXTENDED, 5748-XXJ, DIAGNOSIS GUIDE (CURRENT RELEASE)

This publication is for people involved in diagnosing SQL/DS or SQL/DS-related problems and what can be done to recover from or avoid certain problems. It includes directions for collecting information and reporting problems. Manual, 8 1/2 x 11 inches, 180 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5230

SQL/DS FOR VM/SP DIAGNOSIS GUIDE (CURRENT RELEASE)

This publication is for people involved in diagnosing SQL/DS or SQL/DS-related problems and what can be done to recover from or avoid certain problems. It includes directions for collecting information and reporting problems. This is a component of SK2T-0909 and SBOF-3222. Manual, 8 1/2 x 11 inches, 184 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5231

STRUCTURED QUERY LANGUAGE/DATA SYSTEM FOR VIRTUAL STORAGE EXTENDED, 5748-XXJ, DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is for users involved in SQL/DS problem diagnosis. It contains material on how the components of SQL/DS work, a section called the module directory, the major data areas, and a section on problem isolation and performance tools. Manual, 8 1/2 x 11 inches, 434 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-5232

SQL/DS FOR VM/SP DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is for people involved in SQL/DS problem diagnosis. It contains material on how the components of SQL/DS work, a section called the module directory, the major data areas and a section on problem isolation and performance tools. This is a component of SK2T-0909 and SBOF-3222. Manual, 8 1/2 x 11 inches, 406 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY24-6000

OS/VS2 MVS JES2 R4 LOGIC

This publication provides the Programming Service Representative and the using System Programmer with detailed information on the internal organization and logic of JES2 Release 4. The publication contains:

- Sec. 1 Introduction: describes the general characteristics and functions of JES2.
- Sec. 2 Method of Operation: contains HIPO diagrams that summarize the operation of JES2.
- Sec. 3 Program Organization: provides descriptions of the operation of each JES2 Module.
- Sec. 4 Directory: provides cross-reference lists and describes entry points.
- Sec. 5 Data areas: depicts and describes JES2 control blocks and data areas.
- Sec. 6 Diagnostic Aids: lists register usage by major

SY24

routines and describes error analysis techniques.  
Appendix A. JES2 Programmer Macros: describes JES2 macros and their use. Appendix B. Multi-Leaving: describes the basic principles of Multi-Leaving. Appendix C. Remote Terminal Bootstrap: describes the RTPBOOT bootstrap program. Appendix D. External Writer: describes the external writer program used for producing SYSOUT data sets on magnetic tape or direct-access devices.

Manual, 850 pages, 5/76  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY24-6001

NETWORK JOB ENTRY FACILITY FOR JES2 PROG 5740-XR8, LOGIC  
This manual is for use by IBM PSRs and Customer System Programmers for use in understanding the logic behind the operation of JES2 NJE. This manual is necessary for use in troubleshooting JES2 NJE, when used in conjunction with the program listings, and for designing user modifications to JES2 NJE.

Manual, 8 1/2 x 11 inches, 642 pgs, 1/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-6003

MVS/INFORMATION DISTRIBUTION WORK STATION SUPPORT DIAGNOSIS  
This publication is designed to help internal and external program support representatives diagnose a problem in MVS/Information Distribution Workstation Support (IDWS). Before using this publication, the diagnostician should complete problem determination and problem source identification to isolate the problem to IDWS. The diagnostician then follows the procedures in the Diagnosis Guide, Part 1 to diagnose the problem to the level of an IDWS subfunction. The diagnostician uses the keywords selected in the diagnostic procedures to search the FE RETAIN/370 data base for a program fix to a similarly defined problem. If there is no applicable program fix, the diagnostician submits an APAR on the problem.

If a program fix is not available and the problem requires temporary repair, the diagnostician uses the Diagnosis Reference, Part 2. Diagnosis Reference presents sufficient program logic to enable the diagnostician to discuss the problem with the FE Change Team and work with the team to develop a temporary program repair.

Manual, 8 1/2 x 11 inches, 02/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-6005

JES3, LIC PROG 5740-XYN, LOGIC  
This publication describes the logic of JES3 and applies to MVS/SP-JES3 Release 2. It is designed primarily for those who maintain and modify the IBM-distributed JES3 System. This publication explains the JES3 functions and acts as a directory into the program listing.

Before reading this publication, you should be familiar with the concepts and terminology introduced in:

- JES3 Introduction, GC23-0039
- JES3 Overview, SC23-0040
- JES3 System Programming Library: Installation Planning and Tuning, SC23-0041

Manual, 8 1/2 x 11 inches,  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-6006

MVS/XA JES2 LOGIC (CURRENT RELEASE)  
This publication provides the Programming Service Representative and the using System Programmer with detailed information on the internal organization and logic of JES2 and its relationship to the MVS/System Product. It supplements the program listings and makes the information

LY25

more accessible. This manual is intended to aid its users in determining the sources of errors within, or making changes to, the internal logic of JES2.

Manual, 8 1/2 x 11 inches, 848 pages, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-6007

MVS/EXTENDED ARCHITECTURE JES3, MVS/SYSTEM PRODUCT-JES3 VERSION 2, LIC PROG 5665-291, LOGIC

This publication describes the logic of Job Entry Subsystem 3 (JES3) and applies to MVS/SP-JES3 Version 2. It is designed primarily for those who maintain and modify the IBM distributed JES3 system in an installation using the MVS/Extended Architecture system or the MVS/Extended Architecture and MVS/370 systems. This publication describes each JES3 functional area. In most cases, the functional description is followed by HIPO diagrams of the modules and control flow diagrams. The book acts as a directory into the program listing; it is not intended to act as a program narrative.

Manual, 8 1/2 x 11 inches, 1,171 pages, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY24-6008

MVS/XA MVS/SP-JES2 VERSION 2 LOGIC (CURRENT RELEASE)  
This publication provides detailed information on the internal organization and logic of JES2 and its relationship to MVS Extended Architecture. JES2 logic supplements the program listings and makes the information more accessible. This manual is intended to aid its users in determining the sources of errors within, or making changes to, the internal logic of JES2.

Manual, 8 1/2 x 11 inches, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY24-6051

SUPPLEMENT FOR SU35 TO MVS JES2 REL 4 LOGIC: JES2 REL 4.1, 5752-825

This is a supplement to base publication SY24-6000-0. It contains information in support of Release 4.1 of JES2.  
Manual, 8 1/2 x 11 inches, 212 pgs, 1/77  
////5752-825

SY24-6052

SUPPLEMENT FOR SU33: MVS DUMPING IMPROVEMENTS, 5752-833

This supplement to SY28-0643-4 includes miscellaneous changes describing the new AMDPRDMP LOGDATA and SUNDUMP control statements, and the formatting of data management, IOS, and TRM control blocks by AMDPRDMP.  
Manual, 8 1/2 x 11 inches, 24 pgs, 4/77  
////5752-833

LY25-0002

NPDA, 5735-XX8, LOGIC (CURRENT RELEASE)

This manual provides information about the program logic of the Network Problem Determination Application (NPDA) Program Product.

It describes the structure of NPDA modules by grouping the modules into functional areas. It describes the operations used to access NPDA displays. The manual includes a brief description of every NPDA module, and shows the control flow used in executing the modules. It also includes descriptions of the data sets and control blocks used by NPDA.

The manual is primarily a reference manual. The manual enables a user to identify a failing NPDA component down to the module level. Then microfiche can be used to examine the module's code.

Readers should be familiar with the functions and

LY25

capabilities of NPDA, as explained in: Network Problem Determination Application: General Information, GC34-2010, Network Problem Determination Application: Terminal Use, SC34-2013 and Network Problem Determination application: Installation, SC34-2011.  
Manual, 8 1/2 x 11 inches, 300 pages, 9/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY25-0003

INFORMATION/MANAGEMENT, LIC PROG 5735-OZS, LOGIC AND DIAGNOSIS

This manual describes the internal logic of the Information/Management (Info/Management) Licensed Feature of the Information/System (Info/System) Program Product. The information is directed to IBM and customer maintenance personnel and system programmers who need to know about the Info/Management design, organization, and data areas.  
Manual, 8 1/2 x 11 inches, 150 pages, 12/80  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY25-0004

VSE INTERACTIVE PROBLEM CONTROL SYSTEM, LIC PROG 5746-SAI, LOGIC (CURRENT RELEASE)

This manual describes the internal logic of the VSE Interactive Problem Control System (VSE/IPCS) Program Product. The information contained in the manual is directed to maintenance personnel and development programmers who need to know about the design of IPCS, and its organization and data areas.  
Manual, 8 1/2 x 11 inches, 100 pages, 5/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY25-0005

VM/IPCS, LIC PROG 5748-SAI, LOGIC (CURRENT RELEASE)

This manual describes the internal logic of the VM/Interactive Problem Control System Extension, (VM/IPCS Extension, or IPCS) Program Product. The information presented here is directed to maintenance personnel and development programmers who need to know about the design of IPCS and its organization and data areas.  
Manual, 8 1/2 x 11 inches, 140 pages, 8/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY25-0006

SYSTEM PRODUCTIVITY FACILITY FOR MVS, LIC PROG 5668-009, LOGIC AND DIAGNOSIS

This manual describes the internal logic of the System Productivity Facility (SPF) Program Product for MVS. It is intended for the use of maintenance personnel and development programmers who need to know about SPF's design, organization and data areas.  
Manual, 8 1/2 x 11 inches, 150 pages, 12/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY25-0007

3600 TARA FEATURE, 5735-XX8, LOGIC

This manual describes the internal logic of the IBM 3600 Threshold Analysis and Remote Access Feature of the Network Problem Determination Application Program Product.

The information is directed to IBM and customer maintenance personnel and system programmers who need to know about the design, organization, and data areas of the 3600 feature.

Manual, 8 1/2 x 11 inches, 225 pages, 5/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26

LY25-0008

INFORMATION/SYSTEM, LIC PROG 5735-OZS, LOGIC AND DIAGNOSIS

This manual describes the internal logic of the Information/System (Info/System) Program Product. The information is directed to IBM and customer maintenance personnel and system programmers who need to know about the Info/System design, organization, and data areas.  
Manual, 8 1/2 x 11 inches, 125 pages, 12/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY25-0010

LOGIC AND DIGNOSIS ISPF FOR VM/SP

This manual describes the internal logic of the System Productivity Facility (SPF) Program Product for VM/SP. It is intended for the use of maintenance personnel and development programmers who need to know about SPF's design, organization and data areas.  
Manual, 8 1/2 x 11 inches, 464 pages, 4/81  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY25-0012

NETWORK PROBLEM DETERMINATION APPLICATION VERSION 2, RELEASE 2.1.0, LOGIC (CURRENT RELEASE)

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3737

IBM SYSTEM/360 OPERATING SYSTEM TIME SHARING OPTION ASSEMBLER PROMPTER PROGRAM LOGIC MANUAL PROGRAM NUMBER 5734-CP2

This manual describes the assembler prompter, a program product that operates only under the Time Sharing Option (TSO) of the IBM System/360 Operating System.

The assembler prompter consists of two modules that interact with the TSO terminal monitor program (TMP), the parse service routine (IKJPARS), the dynamic allocation interface routine (IKJDAIR), the PUTLINE service routine, and the stack service routine. This manual discusses how the assembler prompter interacts with these routines to analyze the ASM command and to allocate data sets required by the assembler. It also discusses how the prompter passes control to the assembler.

The manual assumes that the reader knows the ASM command, its operands, and how to use the command as described in the IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION ASSEMBLER PROMPTER USER'S GUIDE (SC26-3740). The book also assumes that the reader is familiar with the assembler language and the concepts of TSO as described in: IBM SYSTEM/360 OPERATING SYSTEM: ASSEMBLER LANGUAGE (GC28-6514)

IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION GUIDE (GC28-6698)

IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION COMMAND

## LANGUAGE REFERENCE (GC28-6732)

IBM SYSTEM/360 OPERATING SYSTEM: TIME SHARING OPTION GUIDE TO WRITING A TERMINAL MONITOR PROGRAM OR A COMMAND PROCESSOR (GC28-6764)

This manual is intended for people involved in program maintenance, and its distribution is limited to licensees doing maintenance work. Program logic information is not necessary to use the program.

Manual, 56 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3760

OS ASSEMBLER H, LIC PROG 5734-AS1, LOGIC

This publication describes the internal logic and operation of Assembler H running under the IBM System/360 Operating System. In addition to descriptive text, this publication contains detailed flowcharts, figures showing the formats of internal tables and data areas, a microfiche directory, and a number of appendixes containing related reference documentation.

Program Logic Manuals are intended for IBM Customer Engineers concerned with program maintenance or alteration, and system programmers concerned with system design.

The reader should be familiar with the IBM System/360 Operating System and with the functions of an assembler. Program Logic Manual, 320 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY26-3814

OS/VS LOADER LOGIC

This publication describes the internal logic and organization of the OS/VS Loader program. It is intended for persons involved in maintaining or modifying the loader. It is not required for normal use and operation of the program described.

Before using this publication, the reader must be familiar with OS/VS Linkage Editor and Loader, GC26-3813, and OS/VS and DOS/VS Assembler Language, GC33-4010.

Corequisite publications include OS/VS1 Storage Estimates, GC24-5094 and OS/VS1 System Data Areas, SY28-0605 or OS/VS2 System Data Areas, SY28-0606.

Manual, 167 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3815

OS/VS LINKAGE EDITOR LOGIC

This publication describes the internal organization and logic of the OS/VS linkage editor. The linkage editor, a processing program, combines and edits modules to produce a load module that can be loaded into virtual storage by the control program.

This publication is intended for persons involved in the maintenance and modification of the linkage editor; it is not required for the normal use and operation of the programs described.

The following publications are required for an

OS/VS1 Linkage Editor and Loader, GC26-3813

VS1 Data Management Macros, GC26-3872

MVS Data Management Macros, GC26-3873

VS1 Data Management Services Guide, GC26-3874

MVS Data Management Services Guide, GC26-3875

OS/VS JCL Reference, GT28-0618

OS/VS1 System Data Areas, SY28-0605, or OS/VS2 System Data Areas, SY28-0606, describes data areas used by the linkage editor.

Manual, 232 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3820

OS/VS2 MVS CHECKPOINT/RESTART LOGIC

This book describes the logic of the OS/VS2 routines that take a checkpoint and restart a job at a checkpoint. The major parts of this book and the information in them are as follows:

- o Introduction - describes the checkpoint/restart routines in general terms and briefly tells what they do.
- o Method of Operation - describes the operations performed by checkpoint/restart routines and the input to and output from those operation.
- o Program Organization - shows the flow of control between the modules of checkpoint/restart and describes the major operations performed by each module.
- o Data Areas - shows the data areas used by checkpoint/restart routines.
- o Diagnostic Aids - Lists the messages, message codes, and return codes generated by checkpoint/restart modules.
- o Modules Directory - lists each checkpoint/restart modules and refers to a figure in "Program Organization" or "Method of Operation" that describes each module.

This book is intended for use by programming systems representatives and system programmers maintaining checkpoint/restart routines.

A general understanding of how the user requests that a checkpoint be taken and restarts his job is prerequisite knowledge for understanding the information in this book. See OS/VS Checkpoint/Restart, GC26-3784, for this type of information.

Manual, 115 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3823

OS/VS2 INPUT/OUTPUT SUPERVISOR LOGIC

This book is intended as an aid in trouble shooting the OS/VS2 I/O supervisor, the component responsible for communicating with the system's I/O devices, and the OS/VS2 EXCP processor, the component responsible for transmitting the requests of some IBM access methods to the I/O supervisor. This book contains two paths to the microfiche listings: a tutorial path, to make the listings meaningful to the reader lacking a basic understanding of the I/O supervisor's or EXCP processor's function and design; and a diagnostic path, to get the knowledgeable reader from a dump, a message, or an error code as near the source of error as possible.

The chapters that make up the tutorial path for the I/O supervisor name and classify the callers of the I/O supervisor, tell how the callers ask for services, and describe how the I/O supervisor performs the services. The chapters that make up the diagnostic path divide the I/O supervisor into groups of services, each corresponding to a group of callers, and show how those services are performed.

The chapters that make up the tutorial path for the EXCP processor list the programs that qualify as access methods, describe the access method interface, and describe the function of EXCP as an interface between the access method and the I/O supervisor. The chapters that make up the diagnostic path divide the EXCP processor into services and show how those services are performed.

This book contains one appendix that gives an overview of the error recovery processing that is done following an I/O error.

Related Publication: OS/VS2 System Logic Library, SY28-0713 through SY28-0719.

Manual, 8 1/2 x 11 inches, 244 pages, 01/79

## SY26-3825

OS/VS2 MVS VIRTUAL STORAGE ACCESS METHOD (VSAM) LOGIC

This manual is intended for maintenance personnel and development programmers who require an in-depth knowledge of OS/VS2 VSAM/2 design, organization, and data areas. The Virtual Storage Access Method (VSAM) is an access method for use with OS/VS for data stored on direct-access storage devices.

The manual describes the internal logic of VSAM and contains module directories and diagnostic information. It should be used with the program listings and with the VSAM microfiche cross-reference tables that show which program modules reference the fields of data areas, which modules issue the macros used by VSAM, and how control flows between program procedures.

OS/VS Virtual Storage Access Method (VSAM) Programmer's Guide, GC26-3838, is a prerequisite.  
Manual, 300 pages

## SY26-3828

OS/VS2 DADSM LOGIC

This System Library Supplement provides replacement pages for OS/VS2 DADSM Logic (either SY26-3828-1 for Release 3.7, or SY26-3858-0 for Release 3.7 with VS2.03.808) to support the JES3 3850 MSS Selectable Unit (SU18).

Manual, 8 1/2 x 11 inches, 28 pgs, 3/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3831

OS/VS2 BDAM LOGIC

This book describes the internal logic of the Basic Direct Access Method (BDAM) for OS/VS2. It is intended as a reference book for IBM Programming Support Representatives and system programmers who maintain or alter BDAM routines.

A general knowledge of data management is required for understanding the information in this book. See VSI Data Management Services Guide, GC26-3874, and MVS Data Management Services Guide, GC26-3875, for background information.

Manual, 140 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3832

OS/VS2 SAM LOGIC

This manual contains a general description of the Get, Put, Write and associated modules for QSAM, BSAM, and BPAM. SAM executors and appendages are also described.

The manual is intended for use by persons involved in programming support and system programmers who are altering the program design.

The SAM routines used for optical character readers, and magnetic character readers are discussed in separate publications, in the IBM System/360 and System/370 Bibliography, GA22-6822. These are prerequisites for this publication:

- o VSI Data Management Services Guide, GC26-3874.
- o MVS Data Management Services Guide, GC26-3875.

Manual, 283 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3833

OS/VS2 ISAM LOGIC

This publication describes the program logic of the two index sequential access methods: the queue indexed sequential access method (QISAM) and the basic indexed sequential access method (BISAM). It also discusses the relationship of indexed sequential access method routines to other parts of the control program.

This publication is intended for personnel supporting or modifying ISAM.

These publications are prerequisite to this publication:

- o VSI Data Management Services Guide, GC26-3874.
- o MVS Data Management Services Guide, GC26-3875.
- o VSI Data Management Macro Instructions, GC26-3872
- o MVS Data Management Macro Instructions, GC26-3873

Manual, 288 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3834

OS/VS2 VIO LOGIC

This book describes what the VIO processor does and how it operates. It is intended for IBM programming support representatives and system programmers who are learning about, supporting, or modifying the VIO logic. They should be thoroughly familiar with the OS/VS2 environment and with channel programming.

VIO enables system-named temporary data sets to reside in external page storage and to be processed using paging I/O. VIO interprets regular I/O requests and simulates their execution by moving data between a user's buffer and the VIO buffer. VIO uses paging I/O to cause the pages in the VIO buffer to be intermittently paged in or out of main storage as required.

To thoroughly understand the logic involved in VIO processing, this book should be used with either listings, or microfiche of compiled VIO source code.

The following are prerequisite publications:

- o For information about ASM processing in support of VIO, see OS/VS2 Auxiliary Storage Management (ASM) Logic, SY35-0009
- o For an orientation to the OS/VS2 system, see OS/VS2 Planning Guide for Release 2, GC28-0667
- o For information about job management, task management, real storage management (RSM), virtual storage management (VSM), and recovery/termination management (RTM) and their support of VIO processing, see OS/VS2 Scheduler and Supervisor Logic, SY28-0621
- o For information about I/O appendages, see OS/VS2 System Programming Library: Data Management, GC26-3830.

Manual

SY26-3836

OS/VS1 BDAM LOGIC

This book describes the internal logic of the Basic Direct Access Method (BDAM). It is intended as a reference book for IBM programming support representatives and system programmers maintaining BDAM routines and for customer system programmers modifying BDAM routines.

A general knowledge of data management and OS/VS1 is required for understanding the information in this book. See OS/VS Data Management Services Guide, GC26-3783, for background information about data management and OS/VS1 Planning and Use Guide, GC24-5090, for information about OS/VS1.

Manual, 110 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3837

OS/VS1 DADSM LOGIC

This manual provides detailed information about the direct access device space management (DADSM) routines. The DADSM routines allocate and release space on a direct access volume by altering the volume table of contents. This publication describes how these routines operate and how they relate to each other and the the system control program OS/VS1; it also describes data set control blocks which make up the volume table of contents.

The intended audience is persons who support the DADSM routines and system programmers who wish to alter the design of these routines. Cross-references to module names and to labels within each module of the DADSM routines are provided, as are descriptions of data areas, and methods of diagnosing DADSM problems.

## Prerequisite publications:

VS1 JCL Services	GC24-5100
VS1 JCL Reference	GC24-5099
VS1 Data Management Services Guide	GC26-2874
MVS Data Management Services Guide	GC26-3875
VS1 Planning & Use Guide	GC24-5090
OS/VS System Management Facilities (SMF)	GC35-0004
OS/VS Utilities	GC35-0005

SY26-3838

OS/VS1 ISAM LOGIC

This publication describes the program logic of the two indexed sequential access methods: the queued indexed sequential access method (QISAM) and the basic indexed sequential access method (BISAM). It also discusses the relationship of indexed sequential access method routines to other parts of the control program.

This publication is intended for personnel supporting or modifying ISAM. These publications are prerequisite to this publication.

- o VS1 Data Management Macros, GC26-3872
- o MVS Data Management Macros, GC26-3873
- o VS1 Data Management Services Guide, GC26-3874
- o MVS Data Management Services Guide, GC26-3875

Manual, 288 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3839

OS/VS1 OPEN/CLOSE/EOV LOGIC

This publication describes the functions (units of processing) and modules (unit of code) of the Open/Close/End-of-Volume portion of the operating system. It also describes the relationship of Open/Close/EOV to the portions of the operating system that give control to and receive control from it. Open/Close/EOV modifies system control blocks, and mounts and verifies volumes so that I/O

operations can be performed. This publication is divided into seven sections: Introduction, Method of Operation, Program Organization, Module Directory, Data Areas, Diagnostic Aids, and Appendix.

This book uses DCB and ACB as interchangeable terms. Where it is necessary to refer to both control blocks, they are referred to as DCB/ACB or DCB or ACB. DCB is used as the prefix for all fields within these control blocks (for example, DCBMACRF). The ACB is used by the job entry subsystem (JES) and by the virtual storage access method (VSAM) to logically connect the system program or a user's program to a data set, in the same way that a DCB is used. Manual, 240 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3840

OS/VS1 SAM LOGIC

The information in this manual is intended for programming support customer engineers and programmers who require specific information about (QSAM) queued sequential access method, (BASAM) basic sequential access method, and (BPAM) basic partitioned access method routines.

A general understanding of data management is prerequisite knowledge for understanding the information in this book. See OS/VS Data Management Services Guide, GC26-3783, for background information on data management.

The manual is organized into six sections: Introduction, Method of Operation, Directory, Data Areas, Program Organization and Flow of Control, and Appendixes.

LY26-3850

DATABASE 2 DIAGNOSIS GUIDE

This publication is for users who must diagnose a program failure in DB2. It assumes they have already made an attempt to determine that the suspected failure is not a user error. It explains the keyword concept and identifies the DB2 or IRLM program number and release level to be used in the set of keywords. The different procedures for different types of program failures are explained. Also explained are how to locate and identify the name of the CSECT involved and how to locate and identify a variety of modifier keywords that precisely describe the problem. It also provides a procedure for using the set of keywords as an argument for a search of the data base.

Information in this edition was previously contained in SY26-3935, which now applies to Release 1.0 of DB2 only.

Manual, 8 1/2 x 11 inches, 120 pages, 03/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3851

OS/VS ANALYSIS PROGRAM-1 (AP-1) LOGIC

This publication is intended for maintenance personnel and system programmers who require an in-depth knowledge of AP-1 design, organization, and data areas. AP-1 is a program for use with the IBM 3344 and 3350 Direct-Access Storage Devices. The system programmer will need this manual to determine which drive test or data verification test detected an error on the 3344 or 3350.

This publication describes the internal logic of AP-1 and contains module directories and diagnostic information. It should be used with the program listings.

The prerequisite publication is OS/VS and DOS/VS Analysis Program-1 (AP-1) User's Guide, GC26-3855. Manual, 3/76

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY26-3855

OS/VS2 MVS SEQUENTIAL ACCESS METHOD-EXTENDED (SAM-E), LIC PROG 5740-AM3, LOGIC

The information in this manual is intended for programming support customer engineers and programmers who require specific information about Queued Sequential Access Method (QSAM), Basic Sequential Access Method (BSAM), and Basic Partitioned Access method (BPAM) routines that use the EXCPVR interface.

A general understanding of data management is prerequisite knowledge for understanding the information in this book. See VS1 Data Management Services Guide, GC26-3874, and MVS Data Management Services Guide, GC26-3875, for background information.

Manual, 8 1/2 x 11 inches, 40 pgs, 12/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY26-3860

OS/VS2 CVOL PROCESSOR LOGIC (COLLATED VERSION)

This book describes the internal logic of the CVOL Processor and provides diagnostic information. This information is directed to maintenance personnel and development programmers who require in-depth knowledge of the design organization and data areas. It is not required for effective use of the CVOL Processor. This publication also includes information about the OS/VS2 MVS Data Management Selectable Unit VS2.03.008.

Manual, 122 pages, 8/76

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY26-3862

DATABASE 2 DIAGNOSIS REFERENCE VOLUME 1

This publication is intended to help the field diagnostician faced with a suspected DB2 failure to communicate effectively with DB2 specialists to assist them in isolating the cause. The reader is assumed to be an experienced

programmer familiar with MVS and operating concepts and who has obtained diagnostic information for gathering the appropriate diagnostic information as outlined in this publication.

DATABASE 2 Diagnosis Guide, LY26-3850, is a prerequisite publication. Related DB2 publications are listed in the preface. Information in this edition was previously contained in SY26-3934, which now applies to Release 1.0 of DB2 only.

Manual, 8 1/2 x 11 inches, 300 pages, 06/87

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY26-3863

DB2 DIAGNOSIS REFERENCE VOLUME 2 DATA AREA DESCRIPTIONS

This publication contains descriptions of the externalized data areas used by DATABASE 2 (DB2).

Prerequisite, corequisite, and related publications are listed in the preface.

Information in this edition was previously contained in SY26-3934, which now applies to Release 1.0 of DB2 only.

Manual, 8 1/2 x 11 inches, 150 pages, 3/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3866

SUPPLEMENT FOR SU6: OS/VS1 OPEN/CLOSE/EOV, 5741-606

This supplement contains replacement pages for OPEN/CLOSE/EOV Logic (SY26-3839-3) to support Subsystem Attachment Support Selectable Unit.

Manual, 8 1/2 x 11 inches, 36 pages, 10/77

////5741-606

## SY26-3873

DOS/VS IEBIMAGE AND SETPRT LOGIC

This manual explains the logic of the two programs (IEBIMAGE, SETPRT) which together provide the data needed to control the IBM 3800 Printer. The purpose of this manual is to help the IBM programming service representative (PSR) to isolate a programming failure as quickly as possible. Although this manual is written primarily for the PSR, system programmers and others may also be interested in some of the information presented here.

Manual, 8 1/2 x 11 inches, 72 pgs, 11/77

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY26-3878

DATA FACILITY/DATA SET SERVICES, LIC PROG 5740-UT3, DIAGNOSIS GUIDE AND REFERENCE

This book tells the user how to diagnose possible failures in the program product. It assumes the user has already made a preliminary determination that the suspected failure is not a user error.

Manual, 8 1/2 x 11 inches, 96 pages, 10/80

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY26-3879

BASIC/VM, 5668-996, DIAGNOSIS GUIDE

This publication explains how to diagnose failures in BASIC/VM. It assumes the reader has already determined that the suspected failure is not a user error; that is, it was not caused by incorrect usage of BASIC/VM, or by an error in the logic of the application program. For more information on diagnosing usage errors, see BASIC Programming Guide, SC26-4027.

The information in this edition was previously contained in SY26-3905, which now applies to Release 1 only.

Manual, 8 1/2 x 11 inches, 36 pages, 2/86

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY26-3880

DATA FACILITY/DEVICE SUPPORT: DADSM AND COMMON VTOC ACCESS FACILITY DIAGNOSIS GUIDE, LIC PROG 5740-AM6, -AM7

This publication explains how to diagnose failures in the following components of Data Facility/Device Support:

- Direct Access Device Space Management (DADSM)
- Common VTOC Access Facility (CVAF)

To use this publication effectively, you should have a basic understanding of dump analysis and system control program diagnostic practices.

Prerequisite publications are:

- Data Facility/Device Support: User's Guide and Reference, SC26-3952
- OS/VS1 Data Management for System Programmers, GC26-3837
- OS/VS2 System Programming Library: Data Management, GC26-3830

Manual, 8 1/2 x 11 inches, 50 pages, 10/80

////5740-AM6,5740-AM7

## SY26-3881

DATA FACILITY/DEVICE SUPPORT: DADSM DIAGNOSIS REFERENCE, LIC PROG 5740-AM6, -AM7

This book is designed to assist the user in diagnosing possible program failures in the Direct Access Storage Management (DADSM) component of OS/VS1 and OS/VS2. Before using this publication, the user should first have analyzed the failure by following the diagnostic procedures in Data Facility/Device Support: DADSM and Common VTOC Access Facility Diagnosis Guide, SY26-3880. This book will assist in communicating with an IBM program specialist if further isolation of the problem is necessary.

Manual, 8 1/2 x 11 inches, 72 pages, 10/80

////5740-AM6,5740-AM7

## SY26-3882

DATA FACILITY/DEVICE SUPPORT: COMMON VTOC ACCESS FACILITY DIAGNOSIS REFERENCE, LIC PROG 5740-AM6, -AM7

This publication is designed to assist the user in diagnosing possible program failures in the Common VTOC Access Facility (CVAF) component of OS/VS1 and OS/VS2. Before using this publication, the user should first have analyzed the failure by following the diagnostic procedures in Data Facility/Device Support: DADSM and Common VTOC Access Facility Diagnosis Guide, SY26-3880. This publication will assist in communicating with an IBM program specialist if further isolation of the problem is necessary.

////5740-AM6,5740-AM7

## SY26-3883

DATA FACILITY DEVICE SUPPORT, 5740-AM6, OS/VS1 MEDIA MANAGER DIAGNOSIS GUIDE AND REFERENCE

This book explains how to diagnose failures in the OS/VS1 Media Manager. It assumes that you have already determined that the suspected failure is not a user error; that is, not caused by faulty usage of Media Manager.

The book describes "keywords" that indicate a suspected program failure and that identify the release level and maintenance level of the Media Manager. There is additional information to assist you in communicating with a program specialist when no correction for a failure is found and the failure is one you must continue working on.

Prerequisite knowledge for using this book is a basic understanding of dump analysis and diagnostic practices for system control programs. Prerequisite publication is Data Facility Device Support General Information, GC26-3954.

Manual, 8 1/2 x 11 inches, 60 pages, 3/81

////5740-AM6

## SY26-3884

DATA FACILITY/DEVICE SUPPORT: OS/VS2 MVS MEDIA MANAGER DIAGNOSIS GUIDE AND REFERENCE, LIC PROG 5740-AM7

This publication explains how to diagnose failures in the media manager. It assumes that you have already determined that the suspected failure is not a user error.

To use this publication effectively, you should have a basic understanding of dump analysis and system control program diagnostic practices. Prerequisite publications are:

- Data Facility/Device Support: General Information, GC26-3954
- OS/VS2 MVS SPL: Service Aids, GC28-0674
- OS/VS2 MVS Utilities, GC26-3902
- OS/VS2 System Programming Library: Debugging Handbook, Volume 1, GC28-0708; Volume 2, GC28-0709
- OS/VS2 System Messages, GC38-1015

Manual, 8 1/2 x 11 inches, 55 pages, 10/80

////5740-AM7

## LY26-3885

BASIC/MVS, 5665-948, DIAGNOSIS GUIDE

This publication explains how to diagnose failures in BASIC/MVS. It assumes the reader has already determined that the suspected failure is not a user error; that is, it was not caused by incorrect usage of BASIC/MVS, or by an error in the logic of the application program. For more information on diagnosing usage errors, see BASIC Programming Guide, SC26-4027.

Information in this edition was previously contained in SY26-3942, which now applies to Release 1 only.

Manual, 8 1/2 x 11 inches, 36 pages, 2/86

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY26-3886

DATA FACILITY EXTENDED FUNCTION CATALOG DIAGNOSIS REFERENCE

This book explains how to diagnose failures in the Integrated Catalog Facility of the Data Facility Extended Function program product. Information is also provided on the VSAM catalog management system for those installations having both ICF and VSAM catalogs. This manual helps a diagnostician to understand the design and organization of the ICF and the VSAM catalog management system. Note that this book is not intended to supply all the information needed for module maintenance.

The prerequisite is Data Facility Extended Function Diagnosis Guide, SY26-3887.

Manual, 8 1/2 x 11 inches, 200 pages, 2/81

////5740-XYQ

## SY26-3887

DATA FACILITY EXTENDED FUNCTION, LIC PROG 5740-XYQ, CATALOG DIAGNOSIS GUIDE

This book explains how to build a set of keywords that are used to describe a failure of the Integrated Catalog Facility. It assumes that you have already determined that the suspected failure is not a user error; that is, it was not caused by incorrect use of the Data Facility Extended Function program product.

Prerequisites are: Data Facility Extended Function: Access Method Services Administration and Services, SC26-3966, and Data Facility Extended Function: Access Method Services Reference, SC26-3967.

Manual, 8 1/2 x 11 inches, 40 pages, 2/81

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3890

MVS/XA CHECKPOINT/RESTART SUPERVISOR CALL LOGIC (CURRENT RELEASE)

This publication describes the logic of the MVS/Extended Architecture Supervisor Call (MVS/XA SVC) routines that take a checkpoint, and restart a job at a checkpoint.

It is intended for use by programming systems representatives and systems programmers maintaining checkpoint/restart routines.

Manual, 8 1/2 x 11 inches, 84 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3891

MVS/EXTENDED ARCHITECTURE (MVS/XA), 5665-284, SAM LOGIC W

The information in this manual is intended for programming support customer engineers and programmers who require specific information about queued sequential access method (QSAM), basic sequential access method (BSAM), and basic partitioned access method (BPAM) routines. A general understanding of data management is prerequisite knowledge for understanding the information in this book. See MVS/Extended Architecture Data Management Services, GC26-4013.

Manual, 8 1/2 x 11 inches, 308 pages, 1/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3892

MVS/EXTENDED ARCHITECTURE (MVS/XA), DATA FACILITY PRODUCT, 5665-284, OPEN/CLOSE/EOV LOGIC (CURRENT RELEASE)

This publication describes the internal logic of the open, close, and end-of-volume component of MVS/XA Data Facility Product. It is intended for people supporting this component who require detailed information about the functions performed, the data areas used, and the methods used to determine the nature and cause of problems encountered when executing the functions.

This manual describes the relationship between the O/C/EOV component and the rest of the operating system and lists the O/C/EOV object modules. There are diagrams that show the flow of control among the object modules. This manual also gives a list of the fields of key system control

SY26

blocks and presents a cross-reference table of the abend system codes and the internal codes associated with each system code. The Preface contains a list of the prerequisite publications.

Manual, 8 1/2 x 11 inches, 250 pages, 1/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3893

MVS/XA BDAM LOGIC

This publication describes the internal logic of the basic direct access method (BDAM) for Data Facility Product (DFP).

It is intended as a reference book for programming support representatives and for system programmers who maintain or alter BDAM routines.

A general knowledge of data management is required for understanding the information in this publication. MVS/Extended Architecture Data Administration Guide (GC26-4013 for Version 1 and GC26-4140 for Version 2), contains background information about data management. Manual, 8 1/2 x 11 inches, 16 pages, 02/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3894

LOGIC MVS/XA ISAM

This publication describes the program logic of the two indexed sequential access methods: queued indexed sequential access method (QISAM) and basic indexed sequential access method (BISAM). Before reading this book, the user should understand the material presented in: MVS/Extended Architecture Data Administration Guide (GC26-4013 for Version 1 and GC26-4140 for Version 2) and MVS/Extended Architecture Data Administration: Macro Instruction Reference (GC26-4014 for Version 1 and GC26-4141 for Version 2).

Manual, 8 1/2 x 11 inches, 282 pages, 1/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3895

MVS/XA CVOL PROCESSOR LOGIC

The reader should be familiar with general programming techniques, OS/VS2 concepts and use, general concepts of catalog management, and System/370. The prerequisite manuals are MVS/Extended Architecture Administration (GC26-4041 for Version 1 and GC26-4138 for Version 2). processor program and provides diagnostic information directed to personnel who require in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of the CVOL processor.

Manual, 8 1/2 x 11 inches, 140 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY26-3896

MVS/XA DADSM AND COMMON VTOC ACCESS FACILITY DIAGNOSIS GUIDE (CURRENT RELEASE)

This manual explains how to use keywords to describe failures in the direct access device space management (DADSM) and common VTOC access facility (CVAF) components. The reader will be guided in systematically selecting a set of keywords. If a solution to a failure is not found, follow the procedure given in submitting an APAR.

To use this publication effectively, it is necessary to have a basic understanding of dump analysis and system control program diagnostic practices.

Prerequisite publications are:

. MVS/Extended Architecture Catalog Administration

SY26

Guide, GC26-4041  
• MVS/Extended Architecture System-Data Administration, GC26-4010  
• MVS/Extended Architecture Diagnostic Techniques, LY28-1159  
Manual, 8 1/2 x 11 inches, 52 pages, 2/84

SY26-3897

MVS/XA CATALOG DIAGNOSIS REFERENCE (CURRENT RELEASE)  
This manual contains information on the integrated catalog facility (ICF) for DFP and on the VSAM catalog management system for those systems having both types of catalogs. It is used in conjunction with MVS/Extended Architecture Catalog Diagnosis Guide, SY26-3899, and is designed to help a diagnostician understand the design and organization of ICF and the VSAM catalog management system. It includes descriptions of the design of each major catalog function and lists the modules and their functions and callers. It also identifies and describes the catalog data areas.

The prerequisite manuals are MVS/Extended Architecture Catalog Administration Guide, GC26-4041 and MVS/Extended Architecture Integrated Catalog Administration: Access Method Services Reference, GC26-4019.  
Manual, 8 1/2 x 11 inches, 272 pages, 02/84  
//37//5665-284,5665-291,5740-XC6

SY26-3898

MVS/XA MEDIA MANAGER DIAGNOSIS GUIDE AND REFERENCE (CURRENT RELEASE)  
This publication explains how to diagnose failures in the media manager after it has been determined that the failure is not caused by a user error. It explains how to describe the media manager program failure using keywords, search the software support data base for similar known problems, gather information needed to discuss a new problem, and gather the documentation needed to prepare and submit an Authorized Program Analysis Report (APAR) on a new problem. Prerequisite knowledge for using this book is a basic understanding of dump analysis and diagnostic practices for system control programs.  
Manual, 8 1/2 x 11 inches, 56 pages, 1/83  
//37//5740-XC6,5665-284,5665-291

SY26-3899

MVS/XA CATALOG DIAGNOSIS GUIDE (CURRENT RELEASE)  
This publication explains how to systematically build a set of keywords that are used to describe a failure in the integrated catalog facility (ICF) of the Data Facility Product (DFP) program product. It assumes that the reader has already determined that the suspected failure is not a user error; that is, it was not caused by faulty usage of ICF.

The reader should be familiar with the integrated catalog facility (ICF) of Data Facility Product (DFP), and with virtual storage access method (VSAM) catalogs.  
Manual, 8 1/2 x 11 inches, 32 pages, 2/84  
//37//5665-284,5665-291,5740-XC6

LY26-3900

MVS/XA VIO LOGIC  
This publication is intended to enable programming systems representatives and system programmers to acquire a general understanding of VIO (virtual input/output) processing and to diagnose logic-level problems by identifying segments of code that are executed under given sets of circumstances. The user should be familiar with channel programming, paging I/O and in general, with the virtual storage environment.

SY26

This book is designed to be used in conjunction with assembled or compiled VIO processor source code. Prerequisite manual is MVS/Extended Architecture System Data Administration (GC26-4010 for Version 1 and GC26-4149 for Version 2).  
Manual, 8 1/2 x 11 inches, 128 pages, 1/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3901

MVS/XA LOADER LOGIC  
This publication describes the internal organization and logic of the loader. Other publications that will assist in the understanding of the loader are: MVS/Extended Architecture Linkage Editor and Loader (GC26-4011 for Version 1 and GC26-4143 for Version 2) and Assembler H Version 2 Application Programming: Language Reference, GC26-4037.  
The user should also refer to the following corequisite publication: MVS/Extended Architecture Debugging Handbook, Volumes 1 through 5, LBOF-1015.  
Manual, 8 1/2 x 11 inches, 140 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3902

MVS/EXTENDED ARCHITECTURE LINKAGE EDITOR, 5665-284, LOGIC  
This publication describes the internal organization and logic of the linkage editor. The linkage editor, a processing program, combines and edits modules to produce a load module that can be loaded into virtual storage by the control program.  
Other publications required for an understanding of the linkage editor are: MVS/Extended Architecture Data Administration Guide, GC26-4013; MVS/Extended Architecture Data Administration: Macro Instructions, GC26-4014; and MVS/Extended Architecture JCL, GC28-1148.  
The reader should also refer to the corequisite publications: MVS/Extended Architecture Linkage Editor and Loader User's Guide, GC26-4011, and MVS/Extended Architecture Debugging Handbook, Volumes 1 through 5, LBOF-1015.  
Manual, 8 1/2 x 11 inches, 228 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3903

MVS/EXTENDED ARCHITECTURE UTILITIES, 5665-284, LOGIC (CURRENT RELEASE)  
This publication is designed to help the reader to locate specific areas of the utility programs provided for MVS/Extended Architecture Data Facility Product (MVS/XA), and to relate those areas to the corresponding program listings. It is divided into three sections, corresponding to the three types of utility programs: system utilities, data set utilities, and independent utilities. The reader should be familiar with the following publications: MVS/Extended Architecture Data Administration: Utilities, GC26-4018; MVS/Extended Architecture Data Areas JES2, LYB8-1191, or MVS/Extended Architecture Data Areas JES3, LYB8-1195; MVS/Extended Architecture Data Administration Macro Instruction/Reference, GC26-4014; MVS/Extended Architecture Data Administration Guide, GC26-4013; MVS/Extended Architecture DADSM and Common VTO Access Facility Diagnosis Guide, SY26-3896; MVS/Extended Architecture DADSM Diagnosis Reference, SY26-3904; and MVS/Extended Architecture Supervisor Services and Macro Instructions, GC28-1154.  
Manual, 8 1/2 x 11 inches, 490 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26

SY26-3904

MVS/XA DADSM DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is designed to help the user diagnose program failures in the Direct Access Device Space Management (DADSM) component. Before using this publication, the user should analyze the program failure by using the diagnostic procedures in MVS/Extended Architecture DADSM and Common VTOC Access Facility Diagnosis Guide, SY26-3896.

This publication contains an overview of the major functions of DADSM and gives an external description of each function. It also contains a description of the interface to the controlling module, the system and DADSM data areas used, and a flowchart for each function or subfunction. This book has a module directory, and contains information on data area linkages and layouts and on DADSM return codes.

Manual, 8 1/2 x 11 inches, 75 pages, 2/84  
//30//5740-XC6,5665-284,5665-291

SY26-3905

BASIC, 5668-996, DIAGNOSIS GUIDE (CURRENT RELEASE)

This manual tells you how to diagnose failures in IBM BASIC. It assumes that you have already determined that the suspected failure is not a user error; that is, not caused by faulty usage of IBM BASIC or by an error in the logic of the application program. The book provides a procedure to investigate and ensure that the program failure is not caused by user error.

This publication also explains how to search a software support data base and how to prepare an APAR.  
Manual, 8 1/2 x 11 inches, 25 pages, 11/82  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3906

MVS/XA ISMF DIAGNOSIS GUIDE

This publication is for systems programmers responsible for identifying program problems. It describes procedures to use to diagnose ISMF failures.

Manual, 8 1/2 x 11 inches, 100 pages, 6/86

LY26-3907

MVS/XA VSAM, 5665-284, LOGIC (CURRENT RELEASE)

This manual describes the internal logic of VSAM and contains diagnostic information directed to personnel who need an in-depth knowledge of VSAM's design, organization, and data areas.

This manual describes how VSAM fits into the operating system and how it interacts with the operating system and the user's program. It gives the major components of VSAM and describes their functions. The manual lists the VSAM modules and describes the control blocks used by VSAM. The prerequisite manuals are MVS/Extended Architecture VSAM Administration Guide, GC26-4015, and MVS/Extended Architecture Administration: Macro Instruction Reference, GC26-4016.

Manual, 8 1/2 x 11 inches, 500 pages, 2/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3908

ASSEMBLER H VERSION 2, LIC PROG 5668-962, LOGIC

This publication is intended for customer engineers and system programmers concerned with maintenance of the Assembler H. The publication is a guide to the internal structure and operation of Assembler H and is intended for use in conjunction with program listings.

The user should be familiar with the basic concepts and facilities of the operating system as described in OS/VS1 Planning and User Guide, GC24-5090; OS/VS2 MVS Overview, GC28-0984; MVS/Extended Architecture Overview, GC28-1146; or

VM/SP Introduction, GC19-6200. The user should also have a good understanding of the assembler language as described in Assembler H Version 2 Application Programming: Language Reference, SC26-4037.

Manual, 8 1/2 x 11 inches, 314 pages, 1/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3909

MVS/EXTENDED ARCHITECTURE, 5665-284, ACCESS METHOD SERVICES LOGIC VOLUME 2

This publication describes the internal logic of DFP access method services routines and provides diagnostic information directed to support personnel and development programmers who need an in-depth knowledge of the program's design, organization, and data areas. The user should be familiar with VSAM and TSO concepts and use.

The topics contained in Volume 2 are data areas, diagnostic aids, EXPORT and EXPORTRA commands, and enciphered data sets created by the REPRO command.

The prerequisite MVS/XA publications are: AMS Logic Vol. 1 - LY26-3889, Integrated Catalog Administration: AMS Reference - GC26-4019, VSAM Catalog Administration: AMS Reference - GC26-4075, and Catalog Administration Guide - GC26-4041.

Manual, 8 1/2 x 11 inches, 475 pages, 10/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY26-3910

VS COBOL II, 5668-958, -940, DIAGNOSIS REFERENCE

This publication describes procedures for diagnosing failures in the VS COBOL II Compiler and Library. It helps the reader determine whether a correction for the defect has been previously documented in software support data base.

Manual, 8 1/2 x 11 inches, 12/84  
//5668-958,5668-940

SY26-3911

VS COBOL II DIAGNOSIS GUIDE, 5668-958, -940

This publication will help programmers communicate new VS COBOL II program problems in a precise way to a support center representative.

Manual, 8 1/2 x 11 inches, 12/84  
//5668-958,5668-940

LY26-3912

MVS/370, 5665-295, ACCESS METHOD SERVICES LOGIC VOLUME 1

This publication describes the internal logic of DFP access method services routines and provides diagnostic information directed to support personnel and development programmers who need an in-depth knowledge of the program's design, organization, and data areas. The user should be familiar with VSAM and TSO concepts and use.

The topics contained in Volume 1 are method of operation, program organization, and microfiche directory. The prerequisite MVS/370 publications are: AMS Logic Vol. 2, LY26-3930, Integrated Catalog Administration: AMS Reference, GC26-4051, VSAM Catalog Administration: AMS Reference, GC26-4059, and Catalog Administration Guide, GC26-4053.

Manual, 8 1/2 x 11 inches, 500 pages, 1/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3913

MVS/370 DATA FACILITY PRODUCT, 5665-295, BDAM LOGIC

This book describes the internal logic of the basic direct access method (BDAM) for DFP. It is intended as a reference book for IBM programming support representatives and system programmers who maintain or alter BDAM routines. There is a description of BDAM and of the records and macro

LY26

instructions associated with it. The BDAM modules are listed and the flow of control between BDAM modules is shown. This book shows the major data areas used by BDAM and lists the messages and codes issued by BDAM. It also describes channel programs for BDAM requests, and describes the concept of a "period" within a DASD extent. Manual, 8 1/2 x 11 inches, 150 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

5Y26-3915

MVS/370 CATALOG DIAGNOSIS REFERENCE, 5665-295  
This manual supports the diagnosing of failures in the integrated catalog facility (ICF) of the Data Facility Product (DFP) program product, and on the VSAM catalog management system for those installations having both types of catalog. This manual when used in conjunction with MVS/370 Catalog Diagnosis Guide, SY26-3914, is designed to help a diagnostician understand the design and organization of ICF and the VSAM catalog management system. It includes descriptions of the design of each major catalog function and lists the modules and their functions and callers. The manual also identifies and describes the catalog data areas. The prerequisite manuals are MVS/370 Catalog Users Guide, GC26-4053, and MVS/370 Access Method Services Reference for the Integrated Catalog Facility, GC26-4051. Manual, 8 1/2 x 11 inches, 230 pages, 4/83

LY26-3916

MVS/370 CHECKPOINT/RESTART SUPERVISOR CALL LOGIC, 5665-295  
This book describes the logic of the MVS/370 Data Facility Product Supervisor Call (MVS/370 DEP SVC) routines that take a checkpoint, and restart a job at a checkpoint. The routines that restart a job at a step are in OS/VS2 System Logic Library, Volume 1, SY28-0713, through Volume 7, SY28-0719.  
How a user requests that a checkpoint be taken and restarts a job is prerequisite knowledge for understanding the information in this book. This type of information is in MVS/370 Checkpoint/Restart, GC26-4054.  
Additional prerequisite knowledge is contained in MVS/370 VSAM Logic LY26-4928. This book is intended for use by programming systems representatives and system programmers maintaining checkpoint/restart routines. Manual, 8 1/2 x 11 inches, 80 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3917

MVS/370 DATA FACILITY PRODUCT, 5665-295, CVOL PROCESSOR LOGIC  
This publication describes the internal logic of the CVOL processor program and provides diagnostic information directed to maintenance personnel and development programmers who require indepth knowledge of the program's design, organization, and data areas. It is not required for effective use of the CVOL processor. Manual, 8 1/2 x 11 inches, 150 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3920

MVS/370, DATA FACILITY PRODUCT, 5665-295, ISAM LOGIC  
This publication describes the program logic of the two indexed sequential access methods: QISAM (queued indexed sequential access method) and BISAM (basic indexed sequential access method).  
Before reading this book, the user should understand the material presented in: MVS/370 Data Management Services, GC26-4058, particularly under "Processing an Indexed Sequential Data Set," and MVS/370 Data Management Macro Instructions, GC26-4057. Manual, 8 1/2 x 11 inches, 280 pages, 4/83

LY26

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3921

MVS/370 DATA FACILITY PRODUCT, 5665-295, LINKAGE EDITOR LOGIC  
This publication describes the internal organization and logic of the linkage editor. The linkage editor, a processing program, combines and edits modules to produce a load module that can be loaded into virtual storage by the control program. Other publications that are required for an understanding of the linkage editor are: MVS/370 Data Management Services, GC26-4058; MVS/370 Data Management Macro Instructions, GC26-4057, and OS/VS2 MVS JCL, GC28-0692. The reader should also refer to MVS/370 Linkage Editor and Loader, GC26-4061, and OS/VS2 System Programming Library: Debugging Handbook, Volumes 1 through 3, GC28-1047 through GC28-1049. Manual, 8 1/2 x 11 inches, 232 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3922

MVS/370 LOADER LOGIC, 5665-295  
This publication describes the internal organization and logic of the loader. Other publications that will assist in the understanding of the loader are: MVS/370 Linkage Editor and Loader, GC26-4061; OS/VS DOS/VSE VM/370 Assembler Language, GC33-4010; and Assembler H Version 2 Application Programming: Language Reference, GC26-4037. The user should also refer to the following corequisite publication: OS/VS2 System Programming Library: Debugging Handbook, Volumes 1 through 3, GC28-1047 through GC28-1049. Manual, 8 1/2 x 11 inches, 140 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3924

MVS/370 DATA FACILITY PRODUCT, 5665-295, OPEN/CLOSE/EOV LOGIC  
This publication describes the internal logic of the open, close and end-of-volume component of MVS/370 DFP. It is intended for people supporting this component who require detailed information about the functions performed, the data areas used, and the methods used to determine the nature and cause of problems encountered when executing the functions. This book describes the relationships between the O/C/EOV component and the rest of the operating system. Also described is the flow of control among the object modules. There is a list of the fields of key system control blocks modified by each object module. Also included is a cross-reference table of the Abend system codes, the internal codes associated with each system code, and the message associated with each system code. The prerequisite publications are listed in the preface. Manual, 8 1/2 x 11 inches, 275 pages, 4/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3925

MVS/370 DATA FACILITY PRODUCT, 5665-295, SAM LOGIC (CURRENT RELEASE)  
The information in this manual is intended for programming-support customer engineers and programmers who require specific information about queued sequential access method (QSAM), basic sequential access method (BSAM), and basic partitioned access method (BPAM) routines. A general understanding of data management is prerequisite knowledge for understanding the information in this book. See MVS/370 Data Management Services, GC26-4058, for background information on data management. For information about processing sequential and partitioned data sets, see MVS/370 Data Management Services, GC26-4058. Other related reading is listed in the preface. Before using this publication, the user should have analyzed the program failure by following the diagnostic procedures in MVS/370 DADSM and Common VTOC Access Facility Diagnosis Guide, SY26-3918.  
This book will assist in communicating with an IBM program specialist if further isolation of the failure is necessary.  
Manual, 8 1/2 x 11 inches, 108 pages, 4/83

SY26-3934

DATABASE 2, 5740-XYR, DIAGNOSIS REFERENCE, VOLUME 1  
This publication is intended to help the field diagnostician faced with a suspected DB2 failure to communicate effectively with DB2 specialists to assist them in isolating the cause. The reader is assumed to be an experienced programmer familiar with MVS and operating concepts and who has obtained diagnostic information through preliminary analysis of the program failure. DATABASE 2 Diagnosis Guide, SY26-3935, is a prerequisite publication. Related DB2 publications are listed in the preface.  
Manual, 8 1/2 x 11 inches, 300 pages, 7/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3935

DATABASE 2, 5740-XYR, DIAGNOSIS GUIDE

This publication is for users who must diagnose a program failure in DB2. It assumes that the user has already made an attempt to determine that the suspected failure is not a user error. It explains the keyword concept and identifies the DB2 or IRLM program number and release level to be used in the set of keywords. The different procedures for different types of program failures are explained. Also explained are how to locate and identify the name of the CSECT involved and how to locate and identify a variety of modifier keywords that precisely describe the problem. It provides a procedure for using the set of keywords as an argument for a search of the data base.

Manual, 8 1/2 x 11 inches, 120 pages, 5/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3936

DATA EXTRACT, 5668-973, DIALOGS DIAGNOSIS (CURRENT RELEASE)

This book is useful for diagnosing program failures caused by the Dialogs function of DXT. It assumes the user has already determined that the failure is not a user error. This book explains the keyword concept and procedures and how to use them in diagnosing problems. It also contains a detailed description of the organization of the Dialogs function and the environment in which it operates.

The reader must have an understanding of dump analysis; of MVS or VM diagnostic practices; and of TSO or CMS and ISPF diagnostic practices.

Manual, 8 1/2 x 11 inches, 150 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3937

DATA EXTRACT, 5668-973, DIAGNOSIS REFERENCE

This book is intended for people who are diagnosing program failures in DXT. It does not include failures related to the DXT Dialogs program product. This book contains a description of the internal environment that DXT establishes and gives a description of the product's subfunctions. There are lists of the major data areas used by each function and subfunction and of the modules in DXT. Also shown are how the data areas in DXT are linked and how to use the tools that provide information to help diagnose problems.

Manual, 8 1/2 x 11 inches, 350 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3938

DATA EXTRACT, 5668-973, DIAGNOSIS GUIDE

This book is useful for diagnosing program failures caused by DXT. It assumes that the determination of the failure is not a user error. This book explains the keyword concept and procedures and how to use them in diagnosing problems. The reader must have an understanding of dump analysis and MVS diagnostic practices.

Manual, 8 1/2 x 11 inches, 75 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3939

QUERY MANAGEMENT FACILITY FOR VM/SP, 5668-972, DIAGNOSIS REFERENCE (CURRENT RELEASE)

This book should be used with its companion, QMF Diagnosis Guide. It can be used in three ways: to gain a further understanding of QMF diagnostic tools, to help document an APAR, and to aid in a free-form diagnosis under an IBM support representative's direction. The book provides a program overview, describing QMF's dependencies on hardware and software, the functional units of AMF, and the flow-of-control through these functions for each command.

It also describes each of QMF's functions along with the data areas these functions use. One section, the "Module Directory" briefly describes the main purpose of each module and lists the modules it is called by and the modules it calls. In addition, the book shows data area linkages and explains QMF's message numbers and the modules issuing the messages.

Manual, 8 1/2 x 11 inches, 250 pages, 11/83  
//37//5668-972

SY26-3940

DIAGNOSIS GUIDE FOR MVS QMF (CURRENT RELEASE)

This book explains how to diagnose internal problems in QMF (when it is used under MVS) and how to report those problems to IBM. Some sections are easier to use if the reader has an understanding of dump analysis and MVS diagnostic practices. The book shows how to organize keywords into a keyword string and how to use such strings to search for similar problems (and their solutions) in an IBM software support data base. When similar problems are not found, keyword strings can be used to describe the problem to the IBM support center or in an APAR. This book need not be read from cover to cover: The reader is guided only to those sections relevant to problem at hand. Related publications are listed in the preface.

Manual, 8 1/2 x 11 inches, 75 pages, 11/83  
//37//5668-972

SY26-3942

BASIC/MVS DIAGNOSIS GUIDE

This book explains how to diagnose failures in IBM BASIC/MVS. It assumes that the suspected failure is not a user error; that is, it was not caused by incorrect usage of IBM BASIC/MVS, or by an error in the logic of the application program. (For more information on diagnosing usage errors, see IBM BASIC Application Programming: Guide). Related and required publications are listed in the preface.

Manual, 8 1/2 x 11 inches, 64 pages, 11/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3943

QUERY MANAGEMENT FACILITY FOR VM/SP, 5668-972, DIAGNOSIS GUIDE (CURRENT RELEASE)

This manual tells how to diagnose internal problems in the Query Management Facility (QMF), when used under VM/SP and how to report those problems. The book assumes the user is reasonably certain that the suspected problem is not caused by a user error. A basic understanding of dump analysis and of CMS/VM diagnostic practices will be helpful with some sections.

Manual, 8 1/2 x 11 inches, 64 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3944

VS FORTRAN INTERACTIVE DEBUG DIAGNOSIS, 5668-903

This manual is designed to assist in the diagnosing of failures in the VS FORTRAN Interactive Debug Program Product. Other manuals are listed in the preface.

Manual, 8 1/2 x 11 inches, 36 pages, 5/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3945

DATABASE 2, 5740-XYR, DIAGNOSIS REFERENCE, VOLUME 2: DATA AREA DESCRIPTIONS

This publication contains descriptions of the externalized data areas used by DATABASE 2 (DB2). Prerequisite, corequisite, and related publications are listed in the preface.

SY26

Manual, 8 1/2 x 11 inches, 350 pages, 7/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3946

OS/VS1 ACCESS METHOD SERVICES, 5652-VS1, LOGIC

This book describes the internal logic of the routines of Access Method Services and provides diagnostic information. This information is directed to maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of Access Method Services.

Manual, 8 1/2 x 11 inches, 692 pages, 10/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3947

OS/VS1/OPEN/CLOSE/EOV, 5652-VS1, LOGIC

This publication describes the functions (units of processing) and modules (unit of cost) of the Open/Close/End of Volume portion of the operating system. It also describes the relationship of Open/Close/EOV to the portions of the operating system that give control to and receive control from it. Open/Close/EOV modifies system control blocks, and mounts and verifies volumes so that I/O operations can be performed.

Manual, 8 1/2 x 11 inches, 250 pages, 10/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3948

OS/VS1 UTILITIES, 5652-VS1, LOGIC

This publication describes the internal logic of the utility programs provided for OS/VS1. It contains flowcharts of the programs, figures showing the formats of the major tables and records, and an appendix that lists the modules of the utility programs.

The manual is intended for persons involved in program maintenance. Program logic information is not necessary for the use and operation of the program.

Manual, 8 1/2 x 11 inches, 660 pages, 10/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3949

OS/VS1 SAM, 5652-VS1, LOGIC

The information in this manual is intended for programming support customer engineers and programmers who require specific information about (QSAM) queued sequential access method, (BSAM) basic sequential access method, and (BPAM) basic partitioned access method routines. A general understanding of data management is prerequisite knowledge for understanding the information in this book. See OS/VS1 Data Management Services Guide, 6C26-3874, for background information on data management.

Manual, 8 1/2 x 11 inches, 340 pages, 10/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3950

OS/VS1 VIRTUAL STORAGE ACCESS METHOD (VSAM), 5652-VS1, LOGIC

This book is intended for maintenance personnel and development programmers who require an in-depth knowledge of OS/VS1 VSAM's design, organization, data areas, and diagnostic information.

The book describes the internal logic of the OS/VS1 Virtual Storage Access Method (VSAM) and contains diagnostic information, data areas descriptions, and figures and tables that show the relationship between various parts of the program.

OS/VS Virtual Storage Access Method (VSAM) Programmer's Guide, 6C26-3838, and OS/VS1 Access Method Services,

LY26

6C26-3840, are prerequisite books.  
Manual, 8 1/2 x 11 inches, 668 pages, 10/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY26-3951

DFDSS, 5665-327, DIAGNOSIS GUIDE

This publication tells how to diagnose a Data Facility Data Set Services (DFDSS) failure. It assumes that the reader has already made a preliminary determination that the suspected failure is not a user error.

This publication applies to both system DFDSS and stand-alone DFDSS, and guides in the selection of a set of keywords to describe a DFDSS program failure. This set of keywords is then used by the Support Center (or the reader, if a search tool such as Info Access is available) to search the Software Support Facility (SSF) or the Early Warning System (EWS), to determine whether an Authorized Program Analysis Report (APAR) has already been recorded, and obtain information to aid in a fix or a bypass of the problem. References are made in this publication to Data Facility Data Set Services: User's Guide and Reference, SC26-4125.  
Manual, 8 1/2 x 11 inches, 52 pages, 5/85  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3952

DB2 DIAGNOSIS REFERENCE VOLUME 3 ADVANCED TECHNIQUES

This publication is designed to aid those responsible for diagnosis and resolving DATABASE 2 (DB2) problems. For information on diagnosing and resolving internal DB2 problems, see DATABASE 2 Diagnosis Guide, SY26-3935, DATABASE 2 Diagnosis Reference Volume 1, SY26-3934, DATABASE 2 Diagnostic Reference Volume 2: Data Area Descriptions, SY26-3945, and DATABASE 2 Messages and Codes, SC26-4113. Other related and prerequisite publications are listed in the preface.

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3953

MVS/XA VERSION 2 ACCESS METHOD SERVICES LOGIC VOLUME 1

This publication describes the internal logic of Data Facility Product access method services routines and provides diagnostic information directed to support personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of access method services. The user should be familiar with general programming techniques, VSAM concepts and use, and TSO concepts and use before reading. MVS/Extended Architecture Access Method Services Logic Volume 2, LY26-3997, complements this publication.

Manual, 8 1/2 x 11 inches, 539 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3955

MVS/XA VERSION 2 CATALOG DIAGNOSIS GUIDE

This publication is intended for users who must diagnose a program failure in the Integrated Catalog Facility (ICF) of the Data Facility Product (DFP) program product. It assumes the user has already determined that the suspected failure is not a user error; that is, it was not caused by faulty usage of ICF. This guide is designed to help develop sets of keywords with step-by-step procedures. The reader should be familiar with the Integrated Catalog Facility (ICF) of Data Facility Product (DFP).

Manual, 8 1/2 x 11 inches, 52 pages, 4/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3956

MVS/XA VERSION 2 CATALOG DIAGNOSIS REFERENCE

This publication contains information on the integrated catalog facility (ICF) for DFP and on the VSAM catalog management system for those systems having both types of catalog. It is used in conjunction with MVS/Extended Architecture Catalog Diagnosis Guide, LY26-3955, and is designed to help a diagnostician understand the design and organization of ICF and the VSAM catalog management system. It includes descriptions of the design of each major catalog function and lists the modules and their functions and callers. It also identifies and describes the catalog data areas.

The prerequisite publications are MVS/Extended Architecture Catalog Administration Guide, GC26-4138; MVS/Extended Architecture Integrated Catalog Administration: Access Method Services Reference, GC26-4135 and MVS/Extended Architecture VSAM Catalog Administration: Access Method Services Reference, GC26-4136.

Manual, 8 1/2 x 11 inches, 318 pages, 4/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3957

MVS/XA VERSION 2 CHECKPOINT/RESTART SUPERVISOR CALL LOGIC

This publication describes the logic of the MVS/Extended Architecture Supervisor Call (MVS/XA SVC) routines that take a checkpoint, and restart a job at a checkpoint. The routines that restart a job at a step are in MVS/Extended Architecture System Logic Library, Volume 1, SY28-1208, through Volume 16, LY28-1270.

How a user requests that a checkpoint be taken and restarts a job is prerequisite knowledge for understanding the information in this publication. This type of information is in MVS/Extended Architecture Checkpoint/Restart User's Guide, GC26-4139.

Additional prerequisite knowledge is contained in MVS/Extended Architecture VSAM Logic, LY26-3970.

Manual, 8 1/2 x 11 inches, 112 pages, 04/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3958

DIAGNOSIS REFERENCE MVS/XA COMMON VTOC ACCESS FACILITY V.2

This publication is designed to help the user diagnose program failures in the common volume table-of-contents access facility (CVAF) component. Before using this publication, the user should have analyzed the program failure by following the diagnostic procedures in MVS/Extended Architecture DADSM and Common VTOC Access Facility Diagnosis Guide, LY26-3960.

This publication will assist in communicating with a program specialist if further isolation of the failure is necessary.

Manual, 8 1/2 x 11 inches, 108 pages, 4/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3960

MVS/XA VERSION 2 DADSM AND CVAF DIAGNOSIS GUIDE

This publication explains how to use keywords to describe failures in the direct access device space management (DADSM) and common VTOC access facility (CVAF) components. The reader will be guided in systematically selecting a set of keywords. If a solution to a failure is not found, follow the procedure given in submitting an APAR.

To use this publication effectively, the user should have a basic understanding of dump analysis and system control program diagnostic practices.

Prerequisite publications are GC26-4138 - MVS/Extended Architecture Catalog Administration Guide, GC26-4149 - MVS/Extended Architecture System-Data Administration, and LY28-1199 - MVS/Extended Architecture Diagnostic Techniques.

Manual, 8 1/2 x 11 inches, 52 pages, 4/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3961

MVS/XA VERSION 2 DADSM DIAGNOSIS REFERENCE

This publication is designed to help the user diagnose program failures in the Direct Access Device Space Management (DADSM) component. Before using this publication, the user should analyze the program failure by using the diagnostic procedures in MVS/Extended Architecture DADSM and Common VTOC Access Facility Diagnosis Guide, LY26-3960.

This publication contains an overview of the major functions of DADSM and gives an external description of each function. It also contains a description of the interface to the controlling module, the system and DADSM data areas used, and a flowchart for each function or subfunction. It has a module directory, and contains information on data area linkages and layouts and on DADSM return codes.

Manual, 8 1/2 x 11 inches, 75 pages, 04/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3963

MVS/XA VERSION 2 LINKAGE EDITOR LOGIC

This publication describes the internal organization and logic of the linkage editor. The linkage editor, a processing program, combines and edits modules to produce a load module that can be loaded in to virtual storage by the control program.

Other publications required for an understanding of the linkage editor are: MVS/Extended Architecture Data Administration Guide, GC26-4140; MVS/Extended Architecture Data Administration: Macro Instruction Reference, GC26-4141; and MVS/Extended Architecture JCL, GC28-1148.

The reader should also refer to the corequisite publications MVS/Extended Architecture Linkage Editor and Loader User's Guide, GC26-4143 and MVS/Extended Architecture Debugging Handbook, Volumes 1 through 5, LBOF-1015.

Manual, 8 1/2 x 11 inches, 228 pages, 4/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3965

MVS/XA MEDIA MANAGER DIAGNOSIS REFERENCE

This publication explains how to diagnose failures in the media manager after it has been determined that the failure is not caused by a user error. It explains how to describe the media manager program failure using keywords, search the software support data base for similar known problems, gather information needed to discuss a new problem, and gather the documentation needed to prepare and submit an Authorized Program Analysis Report (APAR) on a new problem. Prerequisite knowledge for using this publication is a basic understanding of dump analysis and diagnostic practices for system control programs.

Manual, 8 1/2 x 11 inches, 64 pages, 04/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY26-3966

MVS/XA VERSION 2 OPEN/CLOSE/END-OF-VOLUME LOGIC

This publication describes the internal logic of the open, close and end-of-volume component of MVS/XA Data Facility Product. It is intended for people supporting this component who require detailed information about the functions performed, the data areas used, and the methods used to determine the nature and cause of problems encountered when executing the functions.

This publication describes the relationships between the O/C/EOV component and the rest of the operating system and lists the O/C/EOV object modules. There are diagrams that show the flow of control among the object modules. It also gives a list of the fields of key system control blocks and presents a cross-reference table of the abend system codes and the internal codes associated with each system code.

LY26

Manual, 8 1/2 x 11 inches, 275 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3967

MVS/XA VERSION 2 SEQUENTIAL ACCESS METHOD LOGIC

This publication is intended for programming-support customer engineers and programmers who require specific information about queued sequential access method (QSAM), basic sequential access method (BSAM), and basic partitioned access method (BPAM) routines.

A general understanding of data management is prerequisite knowledge for understanding the information in this publication. See MVS/Extended Architecture Data Administration Guide, GC26-4140.

Manual, 8 1/2 x 11 inches, 308 pages, 4/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3968

MVS/XA VERSION 2 UTILITIES LOGIC

This publication is designed to help the reader to locate specific areas of the utility programs provided for MVS/Extended Architecture Data Facility Product (MVS/XA), and to relate those areas to the corresponding program listings. Also, reader should be familiar with the following publications: MVS/Extended Architecture Data Administration: Utilities, GC26-4150; MVS/Extended Architecture Data Administration: Macro Instruction Reference, GC26-4141; and MVS/Extended Architecture Data Administration Guide, GC26-4140.

Manual, 8 1/2 x 11 inches, 500 pages, 4/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY26-3970

MVS/XA VERSION 2 VSAM LOGIC

This publication describes the internal logic of VSAM and contains diagnostic information directed to personnel who need an in-depth knowledge of VSAM's design, organization, and data areas. It describes how VSAM fits into the operating system and how it interacts with the operating system and the user's program. It gives the major components of VSAM and describes their functions. It also lists the VSAM modules and describes the control blocks used by VSAM.

Readers should have a basic understanding of VSAM concepts and VSAM macros.

The prerequisite publications are MVS/Extended Architecture VSAM Administration Guide, GC26-4151, and MVS/Extended Architecture VSAM Administration: Macro Instruction Reference, GC26-4152.

Manual, 8 1/2 x 11 inches, 500 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY26-3971

DFSORT, 5740-SM1, DIAGNOSIS GUIDE

This publication is for diagnosing a program failure that is caused by using DFSORT. The reader is expected to have an understanding of dump analysis. It contains details on excluding exit routines, invoking programs and the DFSORT installation as sources of errors. It explains how to select each of the keywords of the keyword string, and how to use the string in searching the software support data base. Also explained is how to resubmit a job to obtain messages and a dump.

The related publications are listed in the preface.  
Manual, 8 1/2 x 11 inches, 80 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26

SY26-3990

OS AND DOS PL/I OPTIMIZING COMPILERS, 5735-PL1, -LM4, -LM5, 5736-PL1, -LM4, -LM5 (CURRENT RELEASE)

This publication is designed to assist in problem determination and in the formulation of Software Search Facility (SSF) Search arguments. It will also assist the reader in determining if the problem is caused by the user. It is not, however, intended to help the reader fix a compiler or program problem. The result of following the procedure outlined in this publication will be the determination of a user problem, a fix or bypass from the Software Search Facility (SSF), or the submission of an APAR.

Manual, 8 1/2 x 11 inches, 3/85  
//29//5734-PL1,5734-LM4,5734-PLI,5734-LM5,5736-PL1, 5736-PLI,5736-LM4,5736-LM5

LY26-3991

IMS/VS, 5665-332, VERSION 2 DIAGNOSIS GUIDE

This publication provides information for the user to systematically select "keywords" that describe a suspected program failure in IMS/VS Version 2, Release 1. Keywords identify aspects of a program failure, such as the function that failed or the type of failure. Keywords should be used when completing an Authorized Program Activity Report (APAR). This publication contains Explanation of Keyword Concept, Component Identification Keyword, Type-of-Failure Keyword, Function-That-Failed Keyword, Subfunction-That-Failed Keyword, Search Argument Procedure, Search Argument Techniques, and APAR Preparation Procedure. Also, Message-to-Module Cross-Reference Table and Module-to-Function-to-Subfunction List.

Manual, 8 1/2 x 11 inches, 150 pages, 3/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3992

IMS/VS VERSION 2 FAILURE ANALYSIS STRUCTURE TABLES FOR DUMP ANALYSIS

This publication assists in definition of problems of IMS/VS abnormal terminations that may be encountered during system operation. It is intended for both IMS/VS users and Field Engineering programming support representatives who diagnose problems associated with IMS/VS operation.

IMS/VS Diagnosis Guide, LY26-3991, contains procedures that should be followed for problem determination before using Failure Analysis Structure Tables (FAST) for Dump Analysis. This publication contains an introduction, which explains how to use the failure analysis structure tables (FAST), the failure analysis structure tables themselves, and in Appendix A the IMODULE Macro.

Manual, 8 1/2 x 11 inches, 610 pages, 03/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3993

IMS/VS, 5665-332, VERSION 2 DIAGNOSIS REFERENCE

This publication describes the Information Management System/Virtual Storage (IMS/VS) functions and subfunctions to enable a diagnostician to associate problem symptoms with subsets of IMS/VS modules. Sufficient information is provided to lead the reader to a pertinent area of the code to be examined. It also supplies a basis for communication between a diagnostician and a program support representative in the process of examining a problem and attempting to locate the failing code. The structure of the publication follows the function/subfunction breakdown described in IMS/VS Version 2 Diagnosis Guide, LY26-3991.

Manual, 8 1/2 x 11 inches, 750 pages, 3/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3995

THE INFORMATION FACILITY DIAGNOSIS ON VM/CMS

This publication describes how to diagnose problems observed while using The Information Facility (TIF), under VM, by developing a keyword string from the symptoms of a problem. It describes, also, how to report those problems. To help in the diagnosis of major problems, a section on TIF service aids is included.

This publication is valuable for novices or more advanced TIF users.

Manual, 8 1/2 x 11 inches, 70 pages, 4/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3996

THE INFORMATION FACILITY DIAGNOSIS ON MVS/TSO

This publication describes how to diagnose problems observed while using The Information Facility (TIF) under MVS, by developing a keyword string from the symptoms of a problem and how to report those problems. To help in the diagnosis of major problems, a section on TIF service aids is included.

This publication is valuable for novices or more advanced TIF users.

Manual, 8 1/2 x 11 inches, 70 pages, 4/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY26-3997

MVS/XA VERSION 2 ACCESS METHOD SERVICES VOLUME 2 LOGIC

This publication describes the internal logic of Data Facility Product access method services routines and provides diagnostic information directed to support personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of access method services. The user should be familiar with general programming techniques, VSAM concepts and use, and TSO concepts and use before reading. MVS/Extended Architecture Access Method Services Logic Volume 1, LY26-3953, complements this publication.

Manual, 8 1/2 x 11 inches, 593 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY26-3998

VIRTUAL STORAGE FORTRAN, 5668-805, -806, VERSION 2 DIAGNOSIS GUIDE

This publication is designed to help programmers diagnose failures in VS FORTRAN Version 2 program products, using development of keyword strings. It is not designed to diagnose and debug problems in your application programs. It emphasizes program product identification numbers to use in keyword strings, different types of product failures, locating the problem and creating search arguments, preparing an APAR, service aids for debugging, keyword modifiers, and compile-time and execution-time options.

Manual, 8 1/2 x 11 inches, 30 pages, 2/86

GY27-7198

IBM SYSTEM/360 OPERATING SYSTEM: MACHINE-CHECK HANDLER FOR SYSTEM/370 MODELS 155 THRU 168 (LOGIC), P/N 360S-DN-539

This manual describes the internal operations of the Machine-Check Handler (MCH) for the IBM System/370 Models 155 and 165. MCH is a standard component of the MFT and MVT versions of System/360 Operating System when used with the Models 155 and 165.

This manual is written for persons who maintain the program or who are altering the program's design. Its primary purpose is to serve as a guide to the program listings.

Program Logic Manual, 192 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-7230

VIDEO/370 LOGIC MANUAL - PROGRAM NUMBERS 5734-RC5, 5736-RC3

This manual presents the logic of VIDEO/370, which allows direct data entry through the use of IBM 3270 display stations. It describes the functions of VIDEO/370, the routines that perform the functions, and the data areas used by the routines. Information for diagnosing problems with the VIDEO/370 sample program is also included.

This book is intended for use by IBM program service representatives, Field Engineering education, SDD product programmers, DPD system engineers, or customers performing similar functions.

Manual, 224 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

GY27-7237

IBM SYSTEM/360 OPERATING SYSTEM: MACHINE-CHECK HANDLER FOR SYSTEM/370 MODELS 135 AND 145 (LOGIC), P/N 360S-DN-539

This manual describes the internal operations of the Machine-Check Handler (MCH) for the IBM System/370 Models 135 and 145. MCH is a standard component of the MFT version of the System/360 Operating System when used with the Model 135 or the Model 145.

This manual is written for persons who maintain the program or who are altering the program's design. Its primary purpose is to serve as a guide to the program listings.

Program logic manual, 128 pages

SY27-7240

OS/VS GRAPHICS ACCESS METHOD LOGIC MANUAL

Describes the internal logic of the Graphics Access Method (GAM) for the IBM 2250 Display Unit, Models 1 and 3, and the IBM 2260 Display Station (Local Attachment). Areas of the program that perform specific functions are identified and related to the program listings.

GAM consists of input/output and control routines that are part of the graphic programming services for the 2250 display unit and the 2260 display station. The GAM routines perform three major functions:

- o Graphic data management (including buffer management)
- o Input/output control
- o Attention handling (both basic and express)

This program logic manual is directed to the IBM customer engineer, who maintains the program, and to the system programmer, who may wish to alter the program design. It should be used in conjunction with, and as a guide to, appropriate program listings. Program logic information is not necessary for program operation and use.

Manual, 104 pages

SY27-7241

OS/VS GRAPHICS PROBLEM-ORIENTED ROUTINES LOGIC

This manual describes the internal logic of the problem oriented routines (PORs) for the IBM 2250 Display Unit, Models 1 and 3. Areas of the program that perform specific functions are identified and related to the program listings.

PORs, which are part of the graphic programming services for the 2250 display unit, are generalized routines that generate graphic orders for displaying various images and alphanumeric information on the 2250 Display Unit. Each POR is described in detail to show its internal structure and logic.

This program logic manual is directed to the IBM customer engineer, who maintains the program, and to the

SY27

system programmer, who may wish to alter the program design. It should be used in conjunction with, and as a guide to, the appropriate program listings. Program logic information is not necessary for program operation and use.  
Manual, 52 pages

SY27-7242

OS/VS GRAPHIC SUBROUTINE PACKAGE (GSP) FOR FORTRAN IV, COBOL AND PL/I LOGIC

This manual describes the internal logic of the graphic subroutine package (GSP), a program that enables a FORTRAN, COBOL, or PL/I programmer to write graphic programs for the IBM 2250 Display Unit under the control of OS/VS. GSP may also be used in an assembler language program.

This program logic manual is directed to the IBM customer engineer, who maintains the program, and to the system programmer, who may wish to alter the program design. It should be used in conjunction with, and as a guide to, the appropriate program listings. Program logic information is not necessary for program operation and use.  
Manual, 136 pages

SY27-7246

OS/VS BTAM LOGIC

This publication describes the internal logic of the Basic Telecommunications Access Method (BTAM). It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the use and operation of the program; therefore, distribution of this publication is limited to those with maintenance and alteration requirements.

Manual, 339 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY27-7249

DOS/VS QTAM LOGIC MANUAL

This reference publication describes the internal logic of the Queued Telecommunications Access Method (QTAM) under DOS/VS (Disk Operating System with Virtual Storage).

It is intended for persons involved in program maintenance and by systems programmers who are altering the program design. Program logic information is not necessary for the operation of the program; therefore, the distribution of this publication is limited to those with maintenance and alteration requirements.

Manual, 369 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY27-7251

DOS/VS BTAM LOGIC MANUAL

This publication describes the internal logic of the Basic Telecommunications Access Method (BTAM) in DOS/VS (Disk Operating System with Virtual Storage). It is intended for persons involved in program maintenance and for systems programmers who are altering the program design. It can be used to help locate BTAM application program errors. This publication contains:

- o An overview of BTAM logic
- o A guide to specific BTAM routines by alphabetic name of the routine and by function
- o Routine descriptions and flowcharts

This information is designed to be used with the program listings.

The user should be familiar with how BTAM is used; this is described in the SRL publication DOS/VS BTAM, GC27-6989. Manual, 456 pages

OS/VS2 HASP II VERSION 4 LOGIC MANUAL - PROGRAM NUMBER 370H-TX-001

This manual describes the purpose and function of HASP and its relationship to OS/VS2 Release 1. It does not replace the program listings; it supplements them and makes the information in them more accessible.

This publication contains seven sections:

Section 1 Introduction - describes the general characteristics and functions of HASP II Version 4.

Section 2 Method of Operation - contains HIPO (Hierarchy plus Input-Process-Output) diagrams that describe the operation of HASP II Version 4. The diagrams are high level and are designed to guide the reader to a particular area of the program listing.

Section 3 Program Organization - describes the HASP general program organization and each of the HASP processors.

Section 4 Directory - provides cross-reference lists.

Section 5 Data Areas - contains descriptions of the interrelationship and content of HASP data areas and control blocks.

Section 6 Diagnostic Aids - contains information necessary for interpreting the program listing and diagnosing program failures.

Section 7 Appendix A HASP Programmer Macros - describes HASP macro instructions and their use.

Glossary - defines HASP terms.

Related OS/VS publications are listed in the IBM System/360 and System/370 Bibliography, GA22-6822.

5741-SCI-23 \* OPERATING SYSTEM/VIRTUAL STORAGE I\* VIRTUAL TELECOMMUNICATIONS ACCESS METHOD

This manual is the second part of a two-part description of the logic of the Virtual Telecommunications Access Method (VTAM) for OS/VS1. The first part is the Introduction to VTAM Logic, SY27-7256, which describes the high-level logic. The two manuals are intended primarily for IBM Programming Support Representatives, to enable them to quickly locate failures in the access method. Using OS/VS1 VTAM Logic, the PSR can determine the module that performs a particular function; pertinent information about each module is provided and control flow diagrams show how control passes between modules.

The data areas for OS/VS1 VTAM Logic are contained in a separate publication, VTAM Data Areas, SY27-7265.

Prerequisite publications: none

## SY27-8006

DEBUGGING GUIDE OS/VS ACF/VTAM  
 This publication describes an approach to debugging ACF/VTAM in OS/VS. It presents guidelines, tools, and other information that the reader can use as ACF/VTAM debugging aids to help determine the cause of an error or failure. It also summarizes serviceability aids described in other publications and directs the reader to detailed descriptions of these aids.  
 This manual is intended for IBM program support representatives and system programmers who maintain systems and application programs that use ACF/VTAM. Prerequisite publications for this manual are ACF/VTAM Concepts and Planning, GC38-0282, and ACF/VTAM System Programmer's Guide for OS/VS, SC38-0258.  
 Manual, 8 1/2 x 11 inches, 220 pages, 12/77

LY27-8012

ACF/VTAM EXECUTION SEQUENCES, SCP 5735-RC2 (OS/VS2 SVS)

This publication describes sample execution sequences of ACF/VTAM Modules involved in processing selected ACF/VTAM Macros and Network operator commands in a S/370 OS/VS2 SVS operating system.

Manual, 7/78

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY27-8013

LOGIC OS/VS DOS/VS ACF/VTAM TOLTEP

Manual describes the internal logic of the Teleprocessing Online Test Executive Program (TOLTEP). TOLTEP operates as a subtask of ACF/VTAM and is the interface between ACF/VTAM and the online test programs (OLTS) that test the hardware characteristics of various terminals supported by ACF/VTAM. This manual is intended for IBM personnel who are responsible for program maintenance.

Manual, 8 1/2 x 11 inches, 60 pages, 7/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY27-8014

INTRODUCTION TO ACF/VTAM LOGIC

PROG PROD 5746-RC3 (DOS/VS), 5735-RC2 (OS/VS)

This publication is one of a set that describes the logic of ACF/VTAM. This publication describes the high-level logic, which is similar in the DOS/VS and the OS/VS versions of ACF/VTAM. This publication should be read before reading the other logic manuals in the set to get a general understanding of ACF/VTAM logic. The ACF/VTAM logic manuals for DOS/VS and for OS/VS describes the lower-level, system-dependent logic. The intended audience is the IBM program support representative who maintain the access method.

This publication contains:

- o An overview of ACF/VTAM operations
- o A chapter describing the most important ACF/VTAM control blocks
- o A chapter for each ACF/VTAM component that describes the functions performed by the component
- o A list of abbreviations used in the publication

ACF/VTAM Concepts and Planning, GC38-0282, is a prerequisite publication.

Manual, 8 1/2 x 11 inches, 200 pgs, 7/77

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-8016

LOGIC OS/VS ACF/VTAM

This manual is the second part of a two-part description of the logic of the Advanced Communications Function of the Virtual Telecommunication Access Method (ACF/VTAM) for OS/VS Systems. The first part is the Introduction to ACF/VTAM Logic, which describes the high level logic of ACF/VTAM. This manual describes the lower-level logic, which includes system-dependent logic. This manual is intended primarily to help IBM program systems representatives to quickly

LY27

locate failures in the access method. The Introduction to ACF/VTAM Logic should be read first to get an understanding of the high-level logic, followed by this manual for more detailed information.

Included in this publication are HIPO diagrams that describe the Logic of ACF/VTAM components, control flow diagrams which show the flow of control between modules, and module synopsis information about each ACF/VTAM module. This information should enable the PSR to determine the module that performs a particular function and how control passes to and from that module.

Manual, 8 1/2 x 11 inches, 800 pgs, 12/77

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-8018

ACF/VTAM LOGIC, PROG PROD 5746-RC3 (DOS/VS)

This manual is the second part of a two-part description of the logic of the Advanced Communications Function of the Virtual Telecommunication Access Method (ACF/VTAM) for DOS/VS. The first part is the Introduction to ACF/VTAM Logic, which describes the high level logic of ACF/VTAM. This manual describes the lower-level logic, which includes system-dependent logic. This manual is intended primarily to help IBM program systems representatives to quickly locate failures in the access method. The introduction to ACF/VTAM Logic should be read first to get an understanding of the high-level logic, followed by this manual for more detailed information.

Included in this publication are HIPO diagrams that describe the logic of ACF/VTAM components, control flow diagrams which show the flow of control between modules, and module synopsis information about each ACF/VTAM module. This information should enable the PSR to determine the module that performs a particular function and how control passes to and from that module.

LOGIC OS/VS DOS/VS ACF/VTAM MSNF

MULTISYSTEM NETWORKING FACILITY LOGIC,

PROG PROD 5746-RC3 (DOS/VS), 5735-RC2 (OS/VS)

This manual describes the logic of the Multisystem Networking Facility, a feature for ACF/VTAM. This manual supplements ACF/VTAM Logic, LY27-8018 (for DOS/VS) and LY27-8016 (for OS/VS). This manual describes the logic that is unique for the Multisystem Networking Facility, not the logic of ACF/VTAM. This manual is intended primarily to help IBM program systems representatives to locate failures in the Multisystem Networking Facility code. The Introduction to ACF/VTAM Logic, LY27-8014, should be read first to get an understanding of the high-level logic.

This manual contains detailed information which relates the components of the Multisystem Networking Facility to the components of ACF/VTAM, describes the function of each of the Multisystem Networking Facility components, and gives module details which should enable the reader to identify a particular module that performs a certain function.

Manual, 8 1/2 x 11 inches, 148 pages, 7/77

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-8024

LOGIC ACF/VTAM ENCRYPT/DECRYPT MSNF FEATURE 6010

This manual describes the logic of the Encrypt/Decrypt feature of ACF/VTAM and is intended primarily to help programmers to locate failures.

Manual, 8 1/2 x 11 inches, 84 pages, 1/78

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-8026

NETWORK OPERATION SUPPORT PROGRAM (DOS/VS OS/VS),  
LIC PROG 5735-XX2, LOGIC

This manual explains the program logic of the Network Operation Support Program (NOSP). NOSP is a program product that provides an alternative to the system console as a means to controlling complex data communication networks.

This manual is intended for program support representatives and others who need to know the internal logic for NOSP and it is a supplement to the NOSP Program Listing.

Manual, 8 1/2 x 11 inches, 100 pgs, 7/77  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY27-8028

ACF/VTAM LOGIC: VTIOC AND TCAS PROGRAM PRODUCT

This manual describes the internal organization and logic of the ACF/VTAM terminal I/O coordinator (VTIOC) and the terminal control address space (TCAS). It is intended for people who are debugging or modifying VTIOC or TCAS.

Manual, 8 1/2 x 11 inches, 200 pages, 1/78  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-8030

BTAM-ES, 5746-RC5, LOGIC (CURRENT RELEASE)

This manual describes the internal logic of the Basic Telecommunications Access Method Extended Support (BTAM-ES) program product, which works with Disk Operating System/Virtual Storage Extended (DOS/VSE).

overview of BTAM-ES, a list of BTAM-ES routines by name, a list of BTAM-ES routines by function performed, and detailed flowcharts of the logic as well as descriptions of the contents of various control blocks.

Manual, 8 1/2 x 11 inches, 460 pages, 2/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY27-8032

ACF/VTAM: SUPPLEMENT FOR THE 3725 COMMUNICATION CONTROLLER  
5735-RC2, 5665-280, 5662-280, 5666-280

This manual supplements the ACF/VTAM Version 1 Release 3 and Version 2 libraries for the 3725 Communication Controller.

It adds information to ACF/VTAM Data Areas, and ACF/VTAM Diagnosis Reference.

The added information documents ACF/VTAM's support of the IBM 3725 Communication Controller running with the NCP Version 2 program product.

The audience of this manual is any ACF/VTAM Version 1 Release 3 (MVS only) customer and any ACF/VTAM Version 2 (OS/VS, MVS, VSE) customer using an IBM 3725 Communication Controller.

Users of this manual must have the base ACF/VTAM publications.

Manual, 8 1/2 x 11 inches, 9/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-8034

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM LOGIC (MVS ONLY)

This publication applies to the Advanced Communications Function for VTAM Version 2 Release 2, for MVS, and contains logic drawings for the VTAM Version 2 Release 2.

This manual is for system programmers who need to analyze a VTAM problem, classify the problem as a specific type of failure, and describe the failure to a Support Center.

Manual, 8 1/2 x 11 inches, 800 pages, 11/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY27-8041

VM/XA SYSTEMS FACILITY DATA AREAS AND CONTROL BLOCKS

This publication is intended for systems programmers who are responsible for maintaining and updating VM/XA Systems Facility. This is a reference tool that lists the data areas and control blocks used by the VM/XA Systems Facility Control Program (CP).

Manual, 8 1/2 x 11 inches, 730 pages, 06/87  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY27-8042

MVS/BULK DATA TRANSFER VERSION 2 LOGIC

This publication describes the logic of MVS/Bulk Data Transfer (BDT) Version 2. It presents an overview of BDT logic, shows module prologs, and provides a cross reference between the names of BDT macros and symbols and the names of modules that use them. It is intended for systems programmers.

Manual, 8 1/2 x 11 inches, 1000 pages, 7/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-8047

SMP/E DIAGNOSIS GUIDE

This publication is for anyone who experiences a suspected problem with System Modification Program Extended (SMP/E) or needs to report such a problem to the Support Center. It suggests ways to determine whether SMP/E is the cause of the problem, describes how to solve certain problems when calling the center and also provides procedures for reporting SMP/E problems.

Manual, 8 1/2 x 11 inches, 60 pages, 10/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-8048

MVS/BULK DATA TRANSFER VERSION 2 DIAGNOSIS REFERENCE

This publication is a reference for diagnosing problems with MVS/Bulk Data Transfer (BDT) Version 2. It explains how to request and read a BDT formatted dump, explains how to find and read BDT information in an MVS SVC dump, and shows the layouts of BDT data areas. It is intended for systems programmers.

Manual, 8 1/2 x 11 inches, 200 pages, 7/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-9502

DXT VERSION 2 FEATURES DIAGNOSIS GUIDE

This publication is useful for diagnosing program failures caused by the DXT features. It assumes the reader has already determined that the failure is not a user error. This publication also explains the keyword concept and procedures and how to use them in diagnosing problems. The reader must have an understanding of dump analysis and MVS diagnostic practices.

Manual, 8 1/2 x 11 inches, 70 pages, 07/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY27-9503

DXT VERSION 2 FEATURES DIAGNOSIS REFERENCE

This publication is intended for those who are diagnosing program failures in the DXT features. It does not include failures related to the DXT base product. It contains a description of the internal environment that DXT establishes and gives a description of the product's subfunctions.

Before using this publication, analyze the program failure by following the procedures outlined in the prerequisite publication, Data Extract Version 2: Features Diagnosis Guide.

Manual, 8 1/2 x 11 inches, 150 pages, 07/86

LY27

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9504

DXT VERSION 2 BASE PRODUCT DIAGNOSIS GUIDE AND REFERENCE

This publication is useful for diagnosing program failures caused by the DXT base product. It assumes the reader has already determined that the failure is not a user error. It explains the keyboard concept and procedures and how to use them in diagnosing problems. It also contains a detailed description of the organization of the DXT base product and the environment in which it operates.

The reader must have an understanding of dump analysis, of MVS or MV diagnostic practices and of TSO or CMS and ISPF diagnostic practices.

Manual, 8 1/2 x 11 inches, 200 pages, 07/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9506

MVS/370, 5665-295, CATALOG DIAGNOSIS GUIDE

This publication explains how to systematically build a set of keywords that are used to describe a failure in the Integrated Catalog Facility (ICF) of the Data Facility Product (DFP) program product. It assumes the user has already determined that the suspected failure is not a user error; that is, it was not caused by faulty usage of ICF.

Manual, 8 1/2 x 11 inches, 32 pages, 12/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9507

MVS/370, 5665-295, CATALOG DIAGNOSIS REFERENCE

This publication supports the diagnosing of failures in the integrated catalog facility (ICF) of the Data Facility Product (DFP) program product, and on the VSAM catalog management system for those installations having both types of catalog. When used in conjunction with MVS/370 Catalog Diagnosis Guide, LY27-9506, it is designed to help a diagnostician understand the design and organization of ICF and the VSAM catalog management system. It includes descriptions of the design of each major catalog function, and lists the modules and their functions and callers. It also identifies and describes the catalog data areas.

The prerequisite publications are MVS/370 Catalog Administration Guide, GC26-4053, and MVS/370 Integrated Catalog Administration Access Method Services Reference, GC26-4051.

Manual, 8 1/2 x 11 inches, 230 pages, 12/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY27-9508

MULTIPLE VIRTUAL STORAGE/370 COMMON VTOC DIAGNOSIS REFERENCE

For information about this publication, contact Controlling Party. Refer to Controlling Party listing in Publications Price List, ZZ20-0100.

Manual, 116 pages, 2/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9509

MVS/370 DADSM AND COMMON VTOC ACCESS FACILITY, 5665-295, DIAGNOSIS GUIDE

This publication explains how to use keywords to describe failures in the direct access device space management (DADSM) and common VTOC access facility (CVAF) components. The reader is guided in systematically selecting a set of keywords. If a solution to a failure is not found, follow the procedure given in submitting an APAR.

To use this publication effectively, the reader should have a basic understanding of dump analysis and system control program diagnostic practices.

LY27

Prerequisite publications are MVS/370 Catalog Administration Guide, GC26-4053, and MVS/370 System Data Administration, GC26-4056.

Manual, 8 1/2 x 11 inches, 52 pages, 12/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9510

MVS/370, 5665-295, DATA FACILITY PRODUCT DADSM DIAGNOSIS REFERENCE

This publication is designed to help diagnose program failures in the DADSM component. Before using this publication, analyze the program failure by following the diagnostic procedures in MVS/370 DADSM and Common VTOC Access Facility Diagnosis Guide, LY27-9509.

This publication contains basic information about DADSM and descriptions of its major functions. It also shows how the DADSM data areas are linked, and for each significant data area, contains the offsets, length, name, and description of each field. This publication contains an explanation of the return codes, which are listed by function.

Manual, 8 1/2 x 11 inches, 75 pages, 12/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9511

MVS/370, 5665-295, DATA FACILITY PRODUCT MEDIA MANAGER DIAGNOSIS GUIDE AND REFERENCE

This publication explains how to diagnose failures in the media manager and assumes that the failure is not caused by user error. It explains how to describe the program failure by using keywords; how to search the software support data base for similar known problems; and how to prepare an authorized program analysis report. It also describes the functions performed by the media manager and how they relate to each other. The reader is assumed to understand dump analysis and diagnostic practices for system control programs.

Manual, 8 1/2 x 11 inches, 50 pages, 12/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9516

VS FORTRAN VERSION 2 DIAGNOSIS GUIDE

This publication is designed to help programmers diagnose failures in VS FORTRAN Version 2 program products, using development of keyword strings. It is not designed to diagnose and debug problems. It emphasizes program product identification numbers to use in keyword strings, different types of product failures, locating the problem and creating search arguments, preparing APAR, service aids for debugging, keyword modifiers, compile-time and execution-time options. This publication was formerly known as SY26-3998. Form number SY26-3998 is the VS FORTRAN Version 2 Release 1.0 version. LY27-9516 applies to VS FORTRAN Version 2 Release 1.1.

Manual, 8 1/2 x 11 inches, 35 pages, 09/86

LY27-9519

OS/VS DB/DC DATA DICTIONARY DIAGNOSIS REFERENCE

This publication is intended for use in diagnosis of product failures in the DB/DC Data Dictionary. Before using this publication, the product failure should have been analyzed using the diagnostic procedures in the OS/VS DB/DC Data Dictionary Diagnosis Guide, LY27-9520, knowledge of which is prerequisite. Additional information to assist in isolation of failures is found in the publication.

Manual, 8 1/2 x 11 inches, 277 pages, 12/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9520

OS/VS DB/DC DATA DICTIONARY DIAGNOSIS GUIDE

This publication is intended for people diagnosing product failures in the DB/DC Data Dictionary. It provides information for systematic selection of "keywords" that identify aspects of a product failure, such as the function that failed or the type of failure.  
Manual, 8 1/2 x 11 inches, 93 pages, 12/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9522

VS COBOL II DIAGNOSIS REFERENCE

This publication will help programmers communicate VS COBOL II program problems that have not been previously documented in software support data base. It enables the programmer to report such problems in a precise way to a support center representative.  
Manual, 8 1/2 x 11 inches, 400 pages, 12/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY27-9523

VS COBOL II DIAGNOSIS GUIDE

This publication describes procedures for diagnosing failures in the VS COBOL II Compiler and Library. It helps the reader determine whether a correction for the defect has been previously documented in a software support data base.

This publication is organized to help systematically develop a set of keywords to describe a product failure.  
Manual, 8 1/2 x 11 inches, 48 pages, 12/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0605

OS/VS1 SYSTEM DATA AREAS

This publication describes the contents and format of the major control blocks used by more than one component of the OS/VS1 control program. This publication is to be used by IBM software support personnel and by system programmers who require information about the individual fields contained in the system's major control blocks.  
Manual, 600 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0612

OS/VS2 JES3 LOGIC

Describes the function and logic of the JES3 component of OS/VS2 MVS Release 3.7 and subsequent releases.

Contains the following six sections to be used by support representatives and system programmers who must service the JES3 system:

- Section 1 - Introduction
- Section 2 - Method of Operation
- Section 3 - Program Organization
- Section 4 - Directory
- Section 5 - Data areas
- Section 6 - Diagnostic Aids

Manual, 8 1/2 x 11 inches, 776 pages, 9/78  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0622

OS/VS2 JES2 LOGIC: VS2 REL 1.6 THROUGH 3.6

This manual describes the purpose and functions of JES2 and its relationship to OS/VS2 Release 2. It does not replace the program listings; it supplements them and makes the information in them more accessible. This publication contains the following sections:

- Section 1 Introduction - describes the general characteristics and functions of JES2.
- Section 2 Method of Operation - contains HIPO

(Hierarchy plus Input Process Output) diagrams that describe the operation of JES2.  
The diagrams are high level and are designed to guide the reader to a particular area of the program listings.  
Section 3 Program Organization - describes the JES2 general program organization and each of the JES2 processors.  
Section 4 Directory - provides cross-reference lists.  
Section 5 Data Areas - contains descriptions of the interrelationship and content of data areas and control blocks.

Section 6 Diagnostic Aids - contains information necessary for interpreting the program listing and diagnosing program failures.

Section 7 Appendixes:

- A - JES2 Programmer Macros - describes JES 2 macro and their use.
- B - MULTI-LEAVING\* - describes the basic principles of MULTI-LEAVING.
- C - Remote Terminal Bootstrap - describes the RTPBOOT bootstrap program.
- D - External Writer - describes the External Writer program which is used for producing SYSOUT data sets on magnetic tape or direct-access devices.

Manual, 828 pages

OS/VS2 SYSTEM INITIALIZATION LOGIC REL 2, 3, 3.6; WITH SN28-2617, REL 3.7

This publication describes the functions and internal logic of the system initialization process for the OS/VS2 Release 2 System. This publication is intended for the IBM programming systems representative who is involved in modifying system initialization programs.  
Systems publication, 260 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0635

OS/VS1 SERVICE AIDS LOGIC

This publication describes the functions and internal logic of eight service aid programs provided for use in servicing OS/VS1. These service aid programs are: Generalized Trace Facility, HMAPTFLE, HMASPZAP, HMBLIST, HMDPRDMP, HMDSADMP, IMCJOBQD, IMCOSJQD.

This publication is intended for the IBM Programming systems representative who is involved in maintaining service aid programs. This publication should be used in conjunction with OS/VS1 Service Aids, 6C28-0665.

SY28-0643

LOGIC OS/VS2 MVS GTF EREP SERVICE AIDS

This publication describes the functions and internal logic of the following programs provided for servicing OS/VS2 MVS:

- GTF Generalized Trace Facility - a program to trace selected system events.
- AMBLIST - a program to format and print object modules, load modules, and CSECT identification records; or map the Link Pack Area (LPA).
- AMDPRDMP - a program to format and print dump datasets.
- AMAPTFLE - a program to update an operating system by applying PTFs, or by generating JCL statements needed to apply PTFs or ICRs.
- DSADMP - a standalone program to produce a dump of real or virtual storage
- AMASPZAP - a program to verify or replace instructions or data in a load module.

SY28-0650

OS/VS2 TSO TERMINAL MONITOR PROGRAM AND SERVICE ROUTINES, 5752-807, -813, -858, LOGIC (CURRENT RELEASE)

This publication describes the internal logic of the TSO terminal monitor program (TMP) and the following service routines: STACK, GETLINE, PUTLINE, PUTGET, Command Scan, Parse, Dynamic Allocation Interface Routine (DAIR), Default, Catalog Information, and the DAIR/SVC99 Error Code Analyzer. This manual applies to OS/VS2 Release 3.7 and subsequent releases until otherwise indicated, and contains information that applies to the following selectable units:

Supervisor Performance #2 (VS2.03.807)

TSO/VTAM Level 1 (VS2.03.813)

TSO/VTAM Level 2 (5752-858)

The TMP accepts commands from the terminal and gives control to the TSO Command Processors named by the commands. The TSO service routines perform common functions needed by both the TMP and the command processors.

This publication is written for persons who maintain or modify TSO; it is not necessary for persons who use TSO to process programs or who write programs that are processed by TSO.

Manual, 8 1/2 x 11 inches, 116 pages, 6/78

SY28-0651

OS/VS2 TSO COMMAND PROCESSOR LOGIC VOLUME I: ACCOUNT

This publication describes the internal logic of the programs that handle the ACCOUNT command and its ADD, CHANGE, DELETE, LIST, and SYNC subcommands. It also describes the internal logic of the ACCOUNT subroutines and the ACCOUNT BROADCAST interface.

The command processors are described with method of operation diagrams and supporting text. Directories for routines are provided.

This manual is intended for persons involved in program debugging; it is not intended for normal use or operation of the programs described.

Manual, 144 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0652

OS/VS2 TSO COMMAND PROCESSOR LOGIC VOLUME 4, RELEASE 3 (CURRENT RELEASE)

This publication describes the internal logic of the programs that handle the following TSO commands:

ALLOCATE	LISTDS
ATTRIB	OPERATOR
CALL	OUTPUT
CANCEL/STATUS	PROFILE
DELETE	PROTECT
EXEC	RENAME
FREE	RUN
HELP	SEND
LINK/LOADGO	SUBMIT
LISTALC	TERMINAL
LISTBC	TIME

The manual is intended for persons involved in program debugging, or systems programmers who are altering the design; it is not necessary for normal use or operation of the programs described.

Manual, 380 pages

SY28-0660

OS/VS1 RES ACCOUNT FACILITY LOGIC

The OS/VS1 Remote Entry Services (RES) Account Facility provides background users the ability to update the user attribute data set (SYS1.UADS) and the broadcast data set (SYS1.BROADCAST) from a remote workstation other than a conversational terminal.

This publication describes the internal logic of the Account Facility whose routines establish and administer the background environment for batch, or non-interactive, users of the OS/VS1 RES ACCOUNT command processor. This publication is for people who maintain or modify routines in the Account Facility; it is not necessary to use the facility to update the UADS or Broadcast Data Set. For that type of explanatory information, refer to the OS/VS1 RES System Programmers' Guide.

Manual, 384 pages

SY28-0664

LOGIC OS/VS DOS/VS TOLTEP

This seven section program logic manual describes the internal logic of the Teleprocessing Online Test Executive Program (TOLTEP). TOLTEP operates as a subtask of VTAM and is the interface between VTAM and the online test programs (OLTS) that test the hardware characteristics of various terminals supported by VTAM that use the basic mode of data transfer. Information in this manual is intended for IBM representatives who are responsible for program maintenance.

Manual, 100 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0669

OS/VS1, SYS1.LOGREC ERROR RECORDING LOGIC

This publication describes the internal logic and organization of SYS1.LOGREC Error Recording under the OS/VS1 system control program. This publication is intended for the IBM programming systems representative and installation programmer involved in maintaining or using the SYS1.LOGREC data set.

This publication should be used in conjunction with OS/VS1 SYS1.LOGREC Error Recording, 6C28-0668, which tells how to use the IFCDIP00 and IFCEREPO service aid programs.

Publication, 148 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0676

OS/VS2 OLTEP LOGIC

This publication is intended for the IBM PSR who is responsible for program maintenance. It describes the internal logic of the Online Test Executive Program (OLTEP), a program that handles the testing of input/output devices under the control of VS2.

Manual, 8 1/2 x 11 inches, 142 pages, 1/82

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0678

OS/VS2 SYS1.LOGREC ERROR RECORDING LOGIC

This publication is intended for the IBM PSR, installation programmer, and others involved in maintaining or using the SYS1.LOGREC data set. The publication supplements the program listings and tries to make the information in the listings more accessible. The book describes the internal logic and organization of the IFCDIP00 service aid program and of the system recording routines which build and write the incident records on the SYS1.LOGREC data set.

Manual, 8 1/2 x 11 inches, 102 pages, 1/82

OS/VS2 SYSTEM LOGIC LIBRARY VOLUME 1, 5740-XYN, -XYS,  
(CURRENT RELEASE)

This volume is the first in a set of eleven volumes that comprise the System Logic Library. It contains a master table of contents and a master index for the remaining ten volumes. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 2 pages, 6/81

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0714

OS/VS2 SYSTEM LOGIC LIBRARY - VOLUME 2 OF 7

This publication is intended for system programmers to aid in learning, debugging or modifying the MVS control program. It contains introductions, control flow diagrams, control block overviews and method of operation diagrams for: communications task, command processing, region control task, started task control, and LOGON scheduling.

Manual, 8 1/2 x 11 inches, 612 pages, 12/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0715

OS/VS2 SYSTEM LOGIC LIBRARY - VOLUME 3 OF 7

This publication is intended for system programmers to aid in learning, debugging or modifying the MVS control program. It contains introductions, control flow diagrams, control block overviews and method of operation diagrams for: system resources manager, system activity measurement facility, and job scheduling.

Manual, 8 1/2 x 11 inches, 664 pages, 12/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0716

OS/VS2 SYSTEM LOGIC LIBRARY - VOLUME 4 OF 7

This publication is intended for system programmers to aid in learning, debugging or modifying the MVS control program. It contains introductions, control flow diagrams, control block overviews and method of operation diagrams for: timer supervision and supervisor control.

Manual, 8 1/2 x 11 inches, 244 pages, 12/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0717

OS/VS2 SYSTEM LOGIC LIBRARY - VOLUME 5 OF 7

This publication is intended for system programmers to aid in learning, debugging or modifying the MVS control program. It contains introductions, control flow diagrams, control block overviews and method of operation diagrams for: task management, program management, and recovery termination management.

Manual, 8 1/2 x 11 inches, 414 pages, 12/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY28-0718

OS/VS2 SYSTEM LOGIC LIBRARY - VOLUME 6 OF 7

This publication is intended for system programmers to aid in learning, debugging or modifying the MVS control program. It contains introductions, control flow diagrams, control block overviews and method of operation diagrams for: real storage management, virtual storage management, auxiliary storage management, machine check handler, power warning feature, channel check handler, dynamic device

LY28

reconfiguration, and missing interruption handler.

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-0730

OS/VS2 MVS, 5740-XXH, RESOURCE ACCESS CONTROL FACILITY,  
LOGIC (CURRENT RELEASE)

This publication describes the internal logic of the subject program product. This information is intended for the IBM program systems representative who is responsible for program maintenance or the installation systems programmer who is responsible for installation, and modification of RACF.

This publication, when used with the program listing, enables the user to understand the internal operation of RACF and to make corrections if necessary. The publication does not replace the program listings; it supplements them and makes the information in them more accessible.

Manual, 360 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-0913

OS/VS2 MVS TSO 3270 EXTENDED DISPLAY SUPPORT SESSION  
MANAGER LOGIC

This is the logic manual for the TSO Session Manager Program Product. It should enable IBM customers' system programmers or Field Engineering to obtain a conceptual level of understanding of the internal process of this program product. It will also identify the main processing functions to enable system programmers to identify associated modules. The system programmer will then be able to review the modules providing the function.

Manual, 8 1/2 x 11 inches, 120 pages, 7/77

LY28-0923

OS/VS2 MVS RESOURCE MEASUREMENT FACILITY (RMF)  
VERSION 2 LOGIC, PROG PROD 5740-XY4

This publication describes the internal logic of Version 2 of the subject program product. This information is intended for the IBM program systems representative who is responsible for program maintenance or the installation systems programmer who is responsible for the installation, modification, and maintenance of RMF.

This publication, when used with the program listings, enables the user to understand the internal operation of RMF Version 2. The publication does not replace the program listings; it supplements them and makes the information in them more accessible.

LY28-1063

OS/VS2 SYSTEM LOGIC LIBRARY, VOLUME 2 (ALC) FOR 5740-XYN, -XYS

This volume is the second in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of allocation/unallocation in the MVS control program. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for use by system programmers.

Manual, 8 1/2 x 11 inches, 268 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1067

LOGIC MVS/370 SYSTEM LIBRARY ASM CHK VOL. 3 (CURRENT RELEASE)

This volume is the third in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the following components in the MVS control program: auxiliary storage management and checkpoint/restart. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 442 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1071

LOGIC MVS/370 SYSTEM LIBRARY CMD VOL. 4 (CURRENT RELEASE)

This volume is the fourth in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the following components in the MVS control program: command processing, system log, region control task, system component address space initialization, and started task control. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 546 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1075

OS/VS2 SYSTEM LOGIC LIBRARY, VOLUME 5 (COM) FOR 5740-XYN, -XYS

This volume is the fifth in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the communications task in the MVS control program. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 286 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1079

OS/VS2 SYSTEM LOGIC LIBRARY, VOLUME 6 (CSV-PCA) FOR 5740-XYN, -XYS

This volume is the sixth in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the following components in the MVS control program: contents supervision, converter/interpreter, event notification facility, initiator/terminator, master subsystem/subsystem interface, PC/AUTH service routines. This book contains base information as well as new and updated information in

support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 400 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1083

LOGIC MVS/370 RSM RSP VOL. 7 (CURRENT RELEASE)

This volume is the seventh in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the following components in the MVS control program: real storage management and recovery management support. Recovery management support includes the following components: machine check handler, power warning feature, channel check handler, dynamic device reconfiguration, and missing interruption handler. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 332 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1087

SYSTEM LOGIC LIBRARY OS/VS2 VOL 8 (RTM) (CURRENT RELEASE)

This volume is the eighth in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of recovery termination management in the MVS control program. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 342 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1091

MVS/370, 5740-XYN, -XYS, SYSTEM LIBRARY SUPERVISOR CONTROL - SYSTEM MANAGEMENT FACILITY VOLUME 9 LOGIC (CURRENT RELEASE)

This volume is the ninth in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the supervisor control and system management facilities. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 322 pages, 6/81

## LY28-1095

OS/VS2 SYSTEM LOGIC LIBRARY, VOLUME 10 (SRM-VSM) FOR 5740-XYN, -XYS

This is the tenth volume in a set of eleven volumes that comprise the System Logic Library. Its purpose is to describe the logic of the following MVS components: system resource manager, task management, timer supervision, and virtual storage management. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program No. 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 350 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1099

LOGIC MVS/370 SYSTEM LIBRARY VOL. 11 (CURRENT RELEASE)

This volume is the eleventh in a set of eleven volumes that comprise the System Logic Library. Its purpose is to provide module descriptions for the modules in the System Logic Library. This book contains base information as well as new and updated information in support of the MVS/System Product, (Program Number 5740-XYN, -XYS).

This publication is intended for the use of system programmers.

Manual, 8 1/2 x 11 inches, 144 pages, 6/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1105

TSO/E IDTF LOGIC (CURRENT RELEASE)

This logic manual describes the internal operation of the TRANSMIT and RECEIVE commands for the Interactive Data Transmission Facility.

Manual, 8 1/2 x 11 inches, 350 pages, 11/81  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1110

SYSTEM MODIFICATION PROGRAM EXTENDED (SMP/E), 5668-949, LOGIC

This publication describes logic and control flow of SMP/E for Field Engineering and customer use.

Manual, 8 1/2 x 11 inches, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY28-1133

MVS/SYSTEM PRODUCT, 5740-XYN, -XYS, MVS DIAGNOSTIC TECHNIQUES (CURRENT RELEASE)

This publication describes diagnostic techniques and guidelines for isolating problems on MVS systems. It is intended for system programmers and analysts who understand MVS internal logic and who are involved in resolving MVS system problems. It applies to Version 1 Release 3 and subsequent releases of the MVS/System Products, Program Numbers 5740-XYN and 5740-XYS.

Manual, 8 1/2 x 11 inches, 780 pages, 12/81  
//37//5740-XYN,5740-XYS

## LY28-1137

MVS/XA TSO/E, 5665-285, TSO COMMAND PROCESSOR LOGIC VOLUME 3 TEST

The publication describes the internal logic of the TSO TEST command processor. The publication is written for people who maintain or modify TSO TEST. It is not required by those who use TSO TEST to process programs or who write programs that are processed by TSO TEST.

Manual, 8 1/2 x 11 inches, 292 pages, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1170

MVS/XA RESOURCE MEASUREMENT FACILITY (RMF), 5665-274, LOGIC VOLUME 1 PART 1

This publication describes the program logic of the MVS/XA RMF. It is intended for persons who are debugging or modifying RMF. The publication describes RMF control, Monitor I, Monitor II, and the RMF post processor, and describes the method of operation of RMF control, Monitor I, and Monitor II.

Manual, 8 1/2 x 11 inches, 516 pages 8/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28

SY28

LY28-1171

MVS/XA RESOURCE MEASUREMENT FACILITY (RMF), 5665-274, LOGIC VOLUME 1 PART 2

This publication describes the program logic of the MVS/XA RMF. It is intended for persons who are debugging or modifying RMF. The publication describes the method of operation of Monitor II and the RMF post processor, and describes the data areas, the module flow, and the diagnostic aids for RMF control Monitor I, Monitor II, and the RMF Post processor.

Manual, 8 1/2 x 11 inches, 354 pages, 8/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1172

MVS/EXTENDED ARCHITECTURE RESOURCE MEASUREMENT FACILITY (RMF), 5665-274, LOGIC VOLUME 2

This publication describes the program logic of the MVS/Extended Architecture (MVS/XA) Resource Measurement Facility (RMF). It is intended for persons who are debugging or modifying RMF. Volume 2 describes RMF Monitor III functions, the Monitor III data areas, the module flow for the Monitor III data gatherer and data reporter, and the method of operation of the various Monitor III modules.

Manual, 8 1/2 x 11 inches, 658 pages, 8/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1175

OS/VS2 MVS, 5740-XYN, -XYS, SERVICE AIDS LOGIC

This publication describes the components used to help users diagnose problems. The information is presented using HIPOs, delineation of data areas, and detailed explanations of the input, output, and processes involved in dumping data sets and/or records. It is used primarily by the field engineers and system programmers.

Manual, 8 1/2 x 11 inches, 4/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1184

MVS INTERACTIVE PROBLEM CONTROL SYSTEM LOGIC AND DIAGNOSIS FOR 5740-XYN, -XYS

This volume's purpose is to provide the user with the underlying logic for this online viewing and analyzing of machine readable dumps software facility. It contains detailed descriptions of the IPCS subcommands and the modules involved in processing the subcommands. This publication is intended for people who debug software problems.

Manual, 8 1/2 x 11 inches, 339 pages, 12/82  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1187

MVS/XA SYSYS1.LOGREC ERROR RECORDING LOGIC

This publication is for the IBM CE/PSR responsible for servicing and maintaining the system error recording routines for OBR/MDR records and SVC76 and SVC91; and also for the programs used to initialize and maintain the SYS1.LOGREC data set.

The publication supplements the program listings (microfiche). It describes the internal logic and organization of the IFCDIP00 service aid program and the internal logic and organization of the system recording programs which build and write incident records on SYS1.LOGREC data set.

Manual, 8 1/2 x 11 inches, 94 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY28-1188

MVS/XA OLTEP LOGIC

This publication provides customer engineers, PSRs, and other qualified personnel with the information on the internal logic of the Online Test Executive Program, (OLTEP) required for program maintenance. This seven section manual describes the internal logic of this program, containing method of operation diagrams depicting the major functions, diagrams of the program organization, directions to the OLTEP and SVC59 modules, formats and use of key data areas, and diagnostic aids.

Manual, 8 1/2 x 11 inches, 140 pages, 3/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1189

MVS/XA MVS/SP-JES3 VERSION 2 MVS/SP-JES2 VERSION 2 SERVICE AIDS LOGIC (CURRENT RELEASE)

This publication describes the internal logic and organization of the five IBM service aid programs provided for use in servicing MVS/XA. This publication is intended for IBM programming systems representatives who are involved in maintaining the service aid programs.

Manual, 8 1/2 x 11 inches, 536 pages, 5/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1199

MVS/XA DIAGNOSTIC TECHNIQUES (CURRENT RELEASE)

This publication describes diagnostic techniques and guidelines for isolating problems on MVS systems. It is intended for the use of system programmers and analysts who understand MVS internal logic and who are involved in resolving MVS system problems.

Manual, 8 1/2 x 11 inches, 380 pages, 01/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1200

MVS/XA MVS/SP-JES3 VERSION 2 MVS/SP-JES2 VERSION 2 SYSTEM INITIALIZATION LOGIC (CURRENT RELEASE)

This publication describes the internal logic and organization of the system initialization process. The publication is intended for persons involved in modifying or debugging system initialization programs.

Manual, 8 1/2 x 11 inches, 588 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1205

MVS/EXTENDED ARCHITECTURE VECTOR PROCESSING SUBSYSTEM, LIC PROG 5665-301, LOGIC

This publication describes the internal logic and organization of the Vector Processing Subsystem (VPSS). VPSS provides the programming support for the IBM 3838 Array Processor when the 3838 is attached to a host System/370-Extended Architecture (S/370-XA) under the control of MVS/Extended Architecture (MVS/XA). The manual is intended for IBM field engineering programming support representatives who provide program maintenance and who need information about the internal logic and organization of VPSS. The manual describes the functional flow of VPSS operations, the operation of various VPSS modules, and VPSS data areas.

Manual, 8 1/2 x 11 inches, 12/82  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY28-1208

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 1 (CURRENT RELEASE)

This volume is the first in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It provides a master table of contents, master figure list and a master

index for the System Logic Library in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 124 pages, 03/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1210

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 2

This volume is the second in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Address Space Services and Allocation/Unallocation components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 430 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1214

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 3 PART 1 (CURRENT RELEASE)

This volume is the third in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. Part 1 describes the programming logic of the Auxiliary Storage Management and Checkpoint/Restart components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1215

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 3 PART 2

This volume is the third in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. Part 2 describes the programming logic of the Availability Manager component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 96 pages, 03/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1218

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 4 PART 1 (CURRENT RELEASE)

This is the fourth volume in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Command Processing component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1219

MVS/XA SYSTEM LIBRARY LOGIC VOLUME 4 PART 2 (CURRENT RELEASE)

This publication describes the logic of most MVS control program functions that are performed after master scheduler initialization completes.

The volume is intended for people who debug or modify the MVS control program.

Manual, 8 1/2 x 11 inches, 4/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1222

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 5

This volume is the fifth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Communications Task component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1226

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 6 PART 1 (CURRENT RELEASE)

This volume is the sixth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. Part 1 describes the programming logic of the Contents Supervision and Converter/Interpreter components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1227

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 6 PART 2 (CURRENT RELEASE)

This volume is the sixth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. Part 2 describes the programming logic of the Dump Analysis and Elimination, Dispatcher, Dumping Services and Event Notification Facility components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1230

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 7 (CURRENT RELEASE)

This volume is the seventh in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Global Resource Serialization and Initiator/Terminator components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1234

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 8 PART 1 (CURRENT RELEASE)

This volume is the eighth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Input/Output Supervisor component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28

LY28

LY28-1235

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 8 PART 2 (CURRENT RELEASE)

This volume is the eighth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Input/Output Supervisor component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1238

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 9 (CURRENT RELEASE)

This volume is the ninth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the master Subsystem/Subsystem Interface, PCAUTH Service Routines and Recovery Management Support components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 416 pages, 04/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1242

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 10 PART 1 (CURRENT RELEASE)

This volume is the tenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Real Storage Manager component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 416 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1243

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 10 PART 2

This volume is the tenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Real Storage Manager component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1246

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 11 (CURRENT RELEASE)

This volume is the eleventh in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Recovery Termination Management component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1250

MVS/XA SYSTEM LIBRARY LOGIC VOLUME 12 (CURRENT RELEASE)

This is volume twelve in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product

Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the System Management Facilities and System Resource Manager components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1254

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 13

This volume is the thirteenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Supervisor Control component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1258

MVS/XA SYSTEM LIBRARY LOGIC VOLUME 14 (CURRENT RELEASE)

This is volume fourteen in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Task Management and Timer Supervision components in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1262

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 15

This volume is the fifteenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Trace component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1266

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 16 PART 1

This volume is the sixteenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Virtual Storage Management component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

Manual, 8 1/2 x 11 inches, 345 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1267

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 16 PART 2

This volume is the sixteenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It describes the programming logic of the Virtual Storage Management component in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.

LY28

Manual, 8 1/2 x 11 inches, 349 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1270

MVS/XA SYSTEM LOGIC LIBRARY VOLUME 17 (CURRENT RELEASE)  
This volume is the seventeenth in a set of seventeen volumes that comprise the System Logic Library for MVS/System Product Release 2 Version 1.0 through Version 1.7. It provides module descriptions for the System Logic Library in the MVS/Extended Architecture control program. It contains diagnostic information and is intended for persons who debug or modify the control program.  
Manual, 8 1/2 x 11 inches, 352 pages, 03/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1298

MVS/XA IPCS LOGIC AND DIAGNOSIS (CURRENT RELEASE)  
This volume's purpose is to provide the user with the underlying logic for this online viewing and analyzing of machine readable dumps software facility. It contains detailed descriptions of the IPCS subcommands and the modules involved in processing the subcommands. This publication is intended for people who debug software problems.  
Manual, 8 1/2 x 11 inches, 326 pages, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1308

MVS/XA TSO/E TERMINAL MONITOR PROGRAM AND SERVICE ROUTINES LOGIC (CURRENT RELEASE)  
This publication describes the internal logic and organization of the terminal monitor programs and the TSO service routines. It is intended for people who modify TSO and is not necessary for people who use TSO.  
Manual, 8 1/2 x 11 inches, 138 pages, 06/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1312

TSO EXTENSIONS SESSION MANAGER, 5665-285, LOGIC  
This manual describes the function and logic for the internal operation of the TSO Extensions (TSO/E) session manager. It contains the program structure and control flow, data flow, data areas, and provides some diagnostic aids. It is intended for system programmers responsible for modifying the TSO/E session manager.  
Manual, 8 1/2 x 11 inches  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1317

MVS/BULK DATA TRANSFER FACILITY: 5665-302 PROGRAM LOGIC MANUAL, VOLUME I  
This publication contains an overview of logic of MVS/BDT and offers general description of the design and operation of MVS/BDT program product.  
Its purpose is to educate system programmers, help system programmer diagnose and fix MVS/BDT problems and help system programmers write user exit routines.  
It is intended for systems programmers.  
Manual, 8 1/2 x 11 inches  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1318

MVS/BULK DATA TRANSFER FACILITY, 5665-302, PROGRAM LOGIC, VOLUME II  
This publication contains detailed descriptions and diagrams illustrating the processing logic of all MVS/BDT modules. Its purpose is to help system programmers help diagnose and fix MVS/BDT problems.

LY28

It is intended for system programmers.  
Manual, 8 1/2 x 11 inches  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1319

MVS/BULK DATA TRANSFER FACILITY, 5665-302, PROGRAM LOGIC VOLUME III  
This publication contains detailed descriptions and diagrams illustrating the processing logic of all MVS/BDT modules. Its purpose is to help system programmers help diagnose and fix MVS/BDT problems.  
It is intended for system programmers.  
Manual, 8 1/2 x 11 inches  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1320

MVS/BDT FACILITY, 5665-302, DIAGNOSIS REFERENCE  
This publication is intended for anyone who is responsible for debugging MVS/BDT. It explains how to read MVS/BDT dumps, describes the format of major MVS/BDT data areas, explains how to use the MVS/BDT trace, and how to use commands to collect debugging information.  
Manual, 8 1/2 x 11 inches, 8/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1330

VM/XA MIGRATION AID REMOTE 3270 DISPLAY OPTION LOGIC  
This publication describes the internal logic of the VM/XA Migration Aid Remote 3270 Display Option. Information in this publication applies only to the code added to or altered by the installation of the Remote 3270 Display Option on VM Pass-Through facility. It does not describe VM/Pass-Through facility logic. However, it does begin with a brief description of the VM/Pass-Through facility structure and operation.  
Manual, 8 1/2 x 11 inches, 164 pages, 06/87  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1383

MVS/370 I/O SUPERVISOR, 5740-XYN, 5740-XYX, 5665-295, LOGIC  
This publication contains detailed information describing the processing logic of MVS/370 I/O Supervisor, which communicates between I/O devices and the EXCP processor. It is intended to aid in debugging and diagnosing I/O Supervisor Logic. The intended audience is mainly system programmers.  
Manual, 280 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1502

TSO EXTENSIONS, 5665-285, SESSION MANAGER LOGIC MVS/EXTENDED ARCHITECTURE  
This publication describes the function and logic of the TSO/E session manager for MVS/XA. It contains program structure and control flow, data areas and provides some diagnostic aids. It is intended for system programmers responsible for modifying the session manager component of TSO Extensions (TSO/E) in an MVS/Extended Architecture (MVS/XA) environment.  
Manual, 8 1/2 x 11 inches  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1503

TSO EXTENSIONS COMMAND PROCESSOR LOGIC, 5665-285, VOLUME 1: ACCOUNT  
This publication describes the internal logic and organization of the ACCOUNT command processor. It is designed to help the programmer follow the internal

operation of a program and determine the location of a program malfunction.  
Manual, 8 1/2 x 11 inches, 158 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1504

TSO EXTENSIONS COMMAND PROCESSOR LOGIC, 5665-285, VOLUME II: EDIT  
This publication describes the internal logic and organization of the EDIT program. It helps the programmer follow the internal operation of a program and locate a malfunction.  
Manual, 8 1/2 x 11 inches, 116 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1506

MVS/XA TSO/E COMMAND PROCESSOR LOGIC VOLUME 4 (CURRENT RELEASE)  
This publication describes program internal logic and organization for TSO command processors. It is designed to help the programmer follow the internal operation of a command processor and determine the location of a command malfunction. It provides pointers for the specific functions; the programmer can use these pointers to access program listing information without having to scan the listings for the data needed. The commands are described through the use of Method of Operation Diagrams, a Directory, and a Data Area Usage chart. The Directory contains a module cross reference for all of the commands described in this publication. It cross references load module, object module, entry point, alias, and command name. The Data Area Usage chart is organized by the data area acronym. The macro name and common name are also listed. Under each data name is a list of modules, by command processor, that alter or create the data area.  
Manual, 8 1/2 x 11 inches, 264 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1507

JES3 LOGIC LIBRARY VOLUME 1: LOGIC OVERVIEW, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library introduces the user to the terminology, organization, functions, and features of Job Entry Subsystem 3 (JES3). The user need not be familiar with JES3 to read this book, but should have an introductory level background in the Multiple Virtual Storage (MVS) System.  
Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1509

JES3 LOGIC LIBRARY VOLUME 2: INITIALIZATION LOGIC, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 initialization. This involves the JES3 table build program that creates intermediate tables required by the mass storage system. The main section of JES3 initialization documentation explains JES3 start types and the four phases of initialization processing. This section also addresses the initialization of a functional subsystem. The third chapter describes the initialization of dynamic system interchange, which allows installations to specify a local processor to dynamically assume the role of the global processor.  
Manual, 8 1/2 x 11 inches, 12/84

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1511

JES3 LOGIC LIBRARY VOLUME 3: JOB INPUT AND MANAGEMENT LOGIC, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as it is related to job input and management.  
Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1513

JES3 LOGIC LIBRARY VOLUME 4: JOB RESOURCE MANAGEMENT LOGIC, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as it is related to the effective use of system resources. JES3 resource management, commonly referred to as "setup", ensures the operative use of non-sharable mountable volumes, avoids operator intervention during job execution, and performs data set serialization. It oversees specific types of pre-execution job setup and generally prepares all necessary resources to process the job. The main device scheduler routines use resource tables and allocation algorithms to satisfy a job's requirements through the allocation of volumes and devices, and, if necessary, the serialization of data sets.  
Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1515

JES3 LOGIC LIBRARY VOLUME 5: JOB SCHEDULING LOGIC, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. The volume of the logic library describes the logic of JES3 job processing as related to the group of routines that govern where and when MVS execution of a JES3 job occurs. Job scheduling controls the order and execution of jobs processing within the JES3 complex. This section of JES3 processing comprises the routines invoked by the MAIN DSPs, which are represented by the MAIN scheduler elements on the job control table entry and therefore constitute the focal point of the overall JES3 process. Through the job scheduling routines, the global processor communicates with all other processors.  
Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1517

JES3 LOGIC LIBRARY VOLUME 6: JOB OUTPUT AND TERMINATION LOGIC, 5740-XYN  
The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as related to the final phases of any JES3 job. Output service routines operate in various phases to process sysout data sets destined for print or punch devices, TSO users, internal readers, external writers, and writer functional subsystems. The three phases of output service run in different address spaces. Purge processing removes the job structure and records data.  
Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28

LY28-1519

JES3 LOGIC LIBRARY VOLUME 7: COMPLEX MANAGEMENT LOGIC, 5740-XYN

The JES3 logic library is intended primarily for those who maintain and modify the distributed JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern operator communication and various utility functions. Console service routines provide communication between the operator and JES3. JES3 inquiry/modify routines allow modification of parameters that effect one or more jobs and/or JES3 and the ability to obtain information about the processing status of a given job or JES3 function. Utilities handle many types of special operator services, or enhance the capabilities provided by inquiry functions. General routines provide services commonly used throughout JES3 processing. Abnormal termination and recovery routines govern JES3 processing in the event of an abnormal program interruption.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1521

JES3 LOGIC LIBRARY VOLUME 8: SPOOL DATA MANAGEMENT LOGIC, 5740-XYN

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern spool data management.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1523

JES3 LOGIC LIBRARY VOLUME 9: JES3 COMMUNICATION LOGIC, 5740-XYN

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern communication within JES3 and between JES3 and MVS. JES3 communication involves three aspects. The first two deal with MVS-JES3 communications. The third aspect deals with internal JES3 communications and examines the routines that provide transfer of information during processing between address spaces.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1525

JES3 LOGIC LIBRARY VOLUME 10: REMOTE PROCESSING LOGIC, 5740-XYN

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern all aspects of remote and networking processing within JES3. This section explains the topics of JES3 networking, and two remote system architectures. JES3 support for the interface to MVS/Bulk Data Transfer, a separate product, is also examined in publication.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28

LY28-1527

JES3 LOGIC LIBRARY VOLUME 11: LOGIC REFERENCE, 5740-XYN

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library offers reference material concerning JES3 logic.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1529

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, VOLUME 1 LOGIC OVERVIEW

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library introduces the user to the terminology, organization, functions, and features of Job Entry Subsystem 3 (JES3). The user need not be familiar with JES3 to read this book, but should have an introductory level background in the Multiple Virtual Storage (MVS) System.

Manual, 8 1/2 x 11 inches, 188 pages, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-1531

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, VOLUME 2 INITIALIZATION LOGIC (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 initialization. This involves the JES3 table build program that creates intermediate tables required by the mass storage system. The main section of JES3 initialization documentation explains JES3 start types and the four phases of initialization processing. This section also addresses the initialization of a functional subsystem. The third chapter describes the initialization of dynamic system interchange, which allows installations to specify a local processor to dynamically assume the role of the global processor.

Manual, 8 1/2 x 11 inches, 312 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1533

MVS/EXTENDED ARCHITECTURE JES3 LOGIC LIBRARY VOLUME 3: JOB INPUT AND MANAGEMENT LOGIC, 5665-291

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as it is related to job input and management.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-1535

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, JOB RESOURCE MANAGEMENT LOGIC LIBRARY VOLUME 4 (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as it is related to the effective use of system resources.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1537

MVS/EXTENDED ARCHITECTURE JES3 LOGIC LIBRARY VOLUME 5: JOB SCHEDULING LOGIC, 5665-291

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as related to the group of routines that govern where and when MVS execution of a JES3 job occurs. Job scheduling controls the order and execution of jobs processing within the JES3 complex. This section of JES3 processing comprises the routines invoked by the MAIN DSPs, which are represented by the MAIN scheduler elements on the job control table entry and therefore constitute the focal point of the overall JES3 process. Through the job scheduling routines, the global processor communicates with all other processors.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1539

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, JOB OUTPUT AND TERMINATION LOGIC LIBRARY VOLUME 6 (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 job processing as related to the final phases of any JES3 job. Output service routines operate in various phases to process sysout data sets destined for print or punch devices, TSO users, internal readers, external writers, and writer functional subsystems. The three phases of output service run in different address spaces. Purge processing removes the job structure and records data.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1541

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, LOGIC LIBRARY VOLUME 7 COMPLEX MANAGEMENT (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern operator communication and various utility functions.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1543

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, VOLUME 8 SPOOL DATA MANAGEMENT LOGIC (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern spool data management.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1545

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, VOLUME 9 JES3 COMMUNICATION LOGIC (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern communication within JES3 and between JES3 and MVS.

JES3 communication involves three aspects. The first two deal with MVS-JES3 communications. The third aspect deals with internal JES3 communications and examines the routines that provide transfer of information during processing between address spaces.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1547

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, VOLUME 10 REMOTE PROCESSING LOGIC (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library describes the logic of JES3 support processing as related to the group of routines that govern all aspects of remote and network processing within JES3. This section explains the topics of JES3 networking and two remote system architectures. JES3 support for the interface to MVS/Bulk Data Transfer, a separate product, is also examined in publication.

SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1549

MVS/EXTENDED ARCHITECTURE JES3, 5665-291, LOGIC VOLUME 2 REFERENCE (CURRENT RELEASE)

The JES3 logic library is intended primarily for those who maintain and modify the JES3 system in an installation using the MVS/XA system or the MVS/XA and MVS/370 systems. This volume of the logic library offers reference material concerning JES3 logic.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-1553

LOGIC TSO/E COMMAND PROCESSOR VOL 4

This publication describes program internal logic and organization. It is designed to help the programmer follow the internal operation of a program and determine the location of a program malfunction. It also provides pointers for specific functions; the programmer can use these pointers to access program listing information without having to scan the listings for the data he wants.

Manual, 8 1/2 x 11 inches, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-1555

MVS/XA TSO EXTENSIONS, 5665-285, TERMINAL MONITOR PROGRAM AND SERVICE ROUTINES LOGIC

This publication describes the internal logic and organization of the terminal monitor program (TMP) and the TSO service routines. This publication is for people who use TSO to process programs or who write programs that are processed by TSO.

Manual, 8 1/2 x 11 inches, 144 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GY28-2009

TIME SHARING SYSTEM, SYSTEM LOGIC SUMMARY

This publication describes the logic of the IBM Time Sharing System (TSS). The emphasis is on describing the interrelationship of system components in performing system functions. Where an individual component is described, only the highest level of logic is discussed. This program logic manual is directed to the person who is responsible for program maintenance. It can be used to determine the interrelationship among the various areas of the system, and it enables the reader to relate these areas to the

corresponding program listings.  
Systems Reference Library Manual, 311 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-6403

FORTRAN IV (H EXTENDED) COMPILER FOR OS AND VM/370 (CMS), LOGIC - PROG PROD 5734-FO3  
Describes the internal design of the FORTRAN IV (H Extended) compiler program. It is intended for use by personnel involved in program maintenance. Program logic information is not necessary for the use and operation of the FORTRAN IV (H Extended) compiler.  
Manual, 8 1/2 x 11 inches, 660 pgs  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6406

OS (TSO) COBOL PROMPTER LOGIC, PROG PROD 5734-CPI  
Describes the internal logic of the COBOL Prompter program product. It is intended for programmers who are responsible for program maintenance or by system programmers who must alter the program design. It is not needed for normal use or operation of the subject program product.  
Manual, 86 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6408

FORTRAN IV LIBRARY (MOD I) FOR OS & VM/370 (CMS): PROGRAM LOGIC MANUAL, PROGRAM NUMBER 5734-LM1  
This document describes the internal design of the IBM System/360 Operating System FORTRAN IV Library (Model I), a program product.  
The modules of the Model I library are designed to be combined as needed with the object code produced by the Code and Go FORTRAN or FORTRAN IV (61) compilers to form executable load modules.  
This document is intended for use by persons involved in program maintenance. Program logic information is not necessary for the use and operation of the Model I library.  
Distribution of this document is limited to licensees of the IBM program product it describes.  
Program Logic Manual, 154 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## LY28-6409

FORTRAN IV LIBRARY (MODEL II) FOR OS AND VM/370 (CMS) LIC PROG 5734-LM3, LOGIC (CURRENT RELEASE)  
Describes the internal design of the FORTRAN IV Library (Mod II), a program product. This manual is intended for OS and VM/370 personnel involved in program maintenance and for systems programmers who are altering program design. It is not necessary for the use and operation of the FORTRAN Mod II Library.  
Manual, 174 pgs  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6413

DOS FULL ANS COBOL SUBROUTINE LIBRARY VER 3, LOGIC, PROG PROD 5736-LM2  
Describes the object-time subroutine library used by the DOS Full American National Standard COBOL Compiler, Version 3. It is intended for use by persons involved in library maintenance and by system programmers involved in altering the library for installations requiring such alteration. This publication supplements the subroutine listings and their comments, but it is not a substitute for them.  
Effective use of this manual requires an understanding of IBM System/360 and System/370 operation and of the DOS service programs and macro instructions as well as the DOS Full American National Standard COBOL Compiler, Version 3.

Knowledge of both American National Standard COBOL and the IBM Assembler Language is a prerequisite. Reference publications for this information are listed in the Preface of this manual.  
Manual, 168 pgs  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6415

SYSTEM/360 OS FORTRAN IV (H EXTENDED PLUS) COMPILER AND LIBRARY, PRPG LOGIC SUPPLEMENT, PROG 5799-AAH  
Supplements the IBM FORTRAN IV (H Extended) Compiler for OS and VM/370 (CMS) Program Logic manual, Order No. LY28-6403. Together these publications provide OS and VM/370 personnel and other technical personnel with information describing the internal organization and operation of the FORTRAN IV (H Extended Plus) compiler. Program logic information is not necessary for the operation and use of the compiler.  
Manual, 108 pgs  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6419

OS FULL ANS COBOL SUBROUTINE LIBRARY VERSION 4, LIC PROG 5734-LM2, LOGIC  
Describes the internal design or logic of the subject program. This manual is intended for persons involved in program maintenance and for system programmers who are altering the program design. Program logic information is not necessary for the operation of the program.  
Manual, 252 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6422

VS BASIC, LIC PROG 5748-XX1, LOGIC (CURRENT RELEASE)  
This publication is intended for use by programming support representatives and system programmers with responsibility for maintaining the VS BASIC program product. Each module is described as are the control blocks. Functions are summarized visually in method of operation diagrams.  
Prerequisite to understanding the VS BASIC logic is a knowledge of the language and of the operating system. See VS BASIC Language, GC28-8303, and the appropriate terminal user's guide: VS BASIC TSO Terminal User's Guide, SC28-8304, VS BASIC CMS Terminal User's Guide, SC28-8306, VS BASIC for VSPC: Terminal User's Guide, and VS BASIC OS/VS and DOS/VS Programmer's Guide, SC28-8308.  
If VS BASIC is running interactively under TSO, CMS, or VSPC, the logic of the subsystem/program product should also be understood first.  
Manual, 187 pages, 3/76  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY28-6423

DOS/VS COBOL COMPILER AND LIBRARY, LIC PROG 5746-CB1, LOGIC (CURRENT RELEASE)  
This publication describes the internal design of the IBM DOS/VS COBOL Compiler. It is intended for use by persons involved in program support and by system programmers involved in altering the program design for installations requiring such alteration. This publication supplements the compiler listing and its comments, but is not a substitute for them.  
Effective use of this manual requires an understanding of the IBM Operating System and of the IBM DOS/VS service programs and macro instructions. Knowledge of both IBM DOS/VS COBOL and the IBM Assembler Language is a prerequisite. Reference publications for this information are listed in the preface of this manual.  
Manual, 542 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-6424

DOS/VS COBOL SUBROUTINE LIBRARY, LIC PROG 5746-LM4, LOGIC (CURRENT RELEASE)

This publication describes the object-time subroutine library used by the IBM DOS/VS COBOL Compiler. It is intended for use by persons involved in library maintenance and by system programmers involved in altering the library for installations requiring such alteration. This publication supplements the subroutine listings and their comments, but it is not a substitute for them.

Effective use of this manual requires an understanding of the IBM operating system and the DOS/VS Operating System service programs and macro instructions, as well as the IBM DOS/VS COBOL Compiler. Knowledge of both DOS/VS COBOL and IBM Assembler Language is a prerequisite. Reference publications for this information are listed in the preface of this manual.

Manual, 192 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-6425

OS/VS COBOL SUBROUTINE LIBRARY, LIC PROG 5740-LM1, LOGIC (CURRENT RELEASE)

Describes the internal design of the IBM OS/VS COBOL library. The manual is intended for use by persons involved in program support and by systems programmers involved in altering the program design for installations requiring such alteration. It supplements the library listing and its comments but is not a substitute for them.

Manual, 304 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-6486

OS/VS COBOL COMPILER LOGIC (CURRENT RELEASE)

This publication describes the IBM OS/VS COBOL Compiler. The internal design of the compiler and the object program it produces are discussed. This publication is intended for use by persons involved in program support and by system programmers involved in altering the compilers for installations requiring such alteration. It supplements the compiler listings and its comments, but it is not a substitute for them.

Effective use of this manual requires an understanding of the IBM operating system. Knowledge of both IBM OS/VS COBOL and the IBM Assembler Language is a prerequisite. Reference publications for this information are listed in the preface of this manual.

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-6766

OS/MVT & OS/VS2 TSO DATA UTILITIES: COPY, FORMAT, LIST, MERGE, LIC PROG 5734-UT1, LOGIC

The Program Logic Manual describes the internal design or logic of the subject program. This manual is intended for persons involved in program maintenance and for system programmers who are altering the program design. Program logic information is not necessary for the operation of the program; therefore, distribution of this publication is limited to persons with maintenance and alteration requirements.

Manual, 394 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY28-6846

CODE & GO FORTRAN PROCESSOR FOR OS & VM/370 (CMS), LIC PROG 5734-F01, LOGIC

Describes the internal logic of the Code and Go FORTRAN IV compiler.

Program Logic Manuals are intended for use by IBM OS and

VM/370 personnel involved in program maintenance, and by system programmers involved in altering the program design. Program logic information is not necessary for program operation and use.

Manual, 360 pgs

SY28-6849

OS/VS1 RES RTAM AND WORKSTATION SUPPORT LOGIC

This publication is written for customer engineers and others who require information regarding the internal operation of RTAM (Remote Terminal Access Method), which is the access method used by RES (Remote Entry Services); RTAM is the major component of RES. Other components of RES are described when such information is needed for understanding RES.

The functions are presented in diagram form (HIPO diagrams) at a relatively high level. The diagrams include reference to labels in the program listing, which is to be used in conjunction with this publication. It includes description of data areas used by more than one module.

Also included are module descriptions and such diagnostic aids as cross references of messages and modules, contents of control bytes for record compression and/or interleaving and the storage layout of RES components.

Manual, 240 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY28-6856

FORTRAN IV (G1) COMPILER FOR OS & VM/370 (CMS) LIC PROG 5734-F02, LOGIC (CURRENT RELEASE)

Describes the internal logic of the FORTRAN IV (G1) compiler.

This program logic manual is intended for use by persons involved in program maintenance. Program logic information is not necessary for the use and operation of the FORTRAN (G1) compiler.

GY30-3000

3735 PROGRAMMABLE BUFFERED TERMINAL FORM DESCRIPTION

MACRO INSTRUCTIONS & FORM DESCRIPTION UTILITY PROGRAM LOGIC MANUAL (OS, DOS & VS SYSTEMS)

This publication describes the internal logic of the OS and DOS programming support for the IBM 3735 Programmable Buffered Terminal. The 3735 programming support includes both Form Description (FD) macro instructions and Form Description utility programs to provide the operating environment for applications using preprinted (fixed-format) forms and batch processing.

This publication is intended for IBM programming systems representatives who maintain the 3735 programming support and for customer system programmers who modify that support.

To understand the logic of the 3735 programming support, the reader must have a general understanding of OS or DOS and of the macro language facility of the assembler.

LY30-3004

GENERATION AND LOGIC MANUAL FOR PROGRAMMING RPQ P85007 SPECIAL START-STOP LINE CONTROL FOR IBM 3704 & 3705 EMULATION PROGRAM, PROG. NO. 5799-AGK

This document contains information reflecting changes to the current version of the Emulation Program, VIM2, required for support of special start-stop devices.

Documentation is divided into three sections:

Section 1 - General description of the Special Stop Line Control PRPQ (P85007).

Section 2 - Information relating to areas of the Emulation Program Generation Manual, GC30-3002-1, that are affected by Special Start-Stop Line Control support.

Section 3 - Information relating to areas of the Emulation Program PLM, SY30-3001-0, that are affected by Special Start-Stop Line Control Support.

Manual, 30 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY30-3005

GENERATION AND LOGIC MANUAL FOR PROGRAMMING RPQ P85004, SIX BIT TRANSCODE FOR 3705 EMULATION

This document contains information reflecting changes to the current version of the Emulation Program, VIM2, required for support of Six Bit Transcode, PRPQ P85004. The document is intended for analysts and programmers responsible for the generation and maintenance of the Emulation Program, and for IBM system engineers and field engineers.

These changes affect only the method employed in converting transmitted or received data, rather than the actual functions performed by the Emulation Program.

Consequently, only a few changes to the EP PLM, SY30-3001, and EP Generation Manual, GC30-3002, are necessitated by this PRPQ. Only the areas affected by the changes are included in this document.

Documentation is divided into three sections:

Section 1. General description of the Six Bit Transcode PRPQ (P85004)

Section 2. Information relating to areas of the Emulation Program Generation Manual, GC30-3002, that are affected by Six Bit Transcode support.

Section 3. Information relating to areas of the Emulation Program PLM, SY30-3001, that are affected by Six Bit Transcode support.

Manual, 20 pages

SY30-3006

IBM 3705 EMULATION PROGRAM GENERATION AND LOGIC MANUAL FOR PROGRAM SUPPORT FOR HARDWARE RPQ M26099 SABRE LINE CONTROL

Contains information reflecting changes to the current version of the Emulation Program, VIM2, required for support of airlines (SABRE) line control PSHRPQ P85000. It is intended for analysts and programmers responsible for the generation and maintenance of the Emulation Program, and for IBM systems engineers and field engineers. It is assumed that the reader has a conceptual knowledge of the current Emulation Program and of the Airlines Line Control supported by RPQs for the 2703 Transmission Control Unit.

Documentation is divided into three sections:

Section 1 - General description of the Airlines Line Control (ALC) PSHRPQ P85000.

Section 2 - Information relating to areas of the Emulation Program Generation and Utilities Guide and Reference Manual, GC30-3002, that are affected by Airlines Line Control support.

Section 3 - Information relating to areas of the Emulation Program PLM, SY30-3001, that are affected by Airlines Program PLM, SY30-3001, that are affected by Airlines Line Control support.

## SY30-3014

3705 EMULATION PROGRAM GENERATION & LOGIC, RPQ 858663 PLOTTER ADAPTER, PSHRPQ P85008, LIC PROG 5799-WFA

This document contains information necessary to generate and use the Plotter Adapter Program (PSHRPQ P85008) for the IBM 3705 Emulation Program. This program, for use with RPQ 858663, provides for the attachment of IBM 1627 and/or

CALCOMP 500,600, and 700 series plotters to the 3705.

This manual is intended for analysis and programmers responsible for generation and maintenance of the Emulation Program and for IBM system engineers and IBM customer engineers.

This document is intended to be used with the IBM 3704 and 3705 Communication Controllers Emulation Program Generation and Utilities, Guide and Reference Manual (GC30-3002) and the IBM 3704 and 3705 Communications Controllers Emulation Program Generation and Utilities, Guide and Reference Manual (GC30-3002) and the IBM 3704 and 3705 Communications Controllers Emulation Program, Program Logic Manual (SY30-3001).

Manual, 30 pages

## LY30-3016

3705 EMULATION PROGRAM GENERATION AND LOGIC MANUAL FOR PROGRAMMING RPQ P85015, VIRTUAL 50 LINE SUPPORT

This document contains information reflecting changes to the IBM 3705 Emulation Program, version 2 modification 2, required for Virtual 50 Line Support, PRPQ P85015 (Program Number 5799-AKQ). This PRPQ allows the attachment of up to six high-speed Binary Synchronous Communication lines to the IBM 3705 Communications Controller.

This document is intended for analysts and programmers responsible for the generation and maintenance of the Emulation Program, and for IBM systems engineers and field engineers. The reader should have a conceptual knowledge of the current Emulation Program.

The document is divided into three sections:

- o Section 1 is a general description of Virtual 50 concepts.
- o Section 2 contains the information needed to generate the Virtual 50 PRPQ into the Emulation Program.
- o Section 3 describes the program logic of the Virtual 50 PRPQ.

Logic Manual, 20 pages

## LY30-3023

IBM 3704 AND 3705 EMULATION PROGRAM GENERATION AND LOGIC MANUAL FOR PROGRAMMING RPQ P85010, TELEGRAPH FULL - DUPLEX LINE CONTROL - PROG. NO. 5799-AGN

This document describes the Telegraph Full-Duplex Line Control Programming RPQ for the IBM 3704 and 3705 Communications Controllers Emulation Program. The PRPQ provides support of duplex line control for four telegraph terminals: The manual is intended for analysts and programmers responsible for generation and maintenance of the Emulation Program and for IBM system engineers and IBM customer engineers.

This document contains three types of information:

- o Information needed to generate the PRPQ into an Emulation Program.
- o Information about the internal logic of the PRPQ.
- o Information about the line control used for each of four terminal types supported by the PRPQ.

Prerequisites for this manual are:

IBM 3704 and 3705 Communications Controllers Emulation Program Generation and Utilities, Guide and Reference Manual (GC30-3002).

IBM 3704 and 3705 Communications Controllers Emulation Program, Program Logic Manual (SY30-3001).

Manual, 30 pages

## SY30-3024

3650 SUBSYSTEM PROGRAM PREPARATION SUPPORT TRANSFORMATION DEFINITION LANGUAGE TRANSLATOR LOGIC

This publication describes the logic of the Transformation

Definition Language (TDL) of the IBM 3650 Subsystem Program Preparation Support (SPPS). The translator is the code by which TDL statements are converted into formatted output records. At a later time, certain output records from the translator are transmitted to the IBM 3650 for use in operating keyboard/displays and line printers.

This publication is a supplement to the program listings of the TDL translator portion of the SPPS. As a logic manual, it can be used to diagnose and maintain the existing TDL translator; it is not designed to alter the translator to perform other functions. The programming support representative using this publication should have a basic knowledge of the IBM System/370 OS/VS and DOS/VS and use the SPPS Programmer's Guide.

There are six sections which are useful in retrieving specific kinds of information:

- o Section 1: An Overview of the TDL Translator Logic is an introduction to the translator and its input, internal logic, output, and additional services.
- o Section 2: Method of Operation uses charts to illustrate functional relationships in the translator.
- o Section 3: Program Organization consists of a series of figures relating the basic modules types and their calling sequences.
- o Section 4: Directory contains a list of translator modules, their function, and their inputs and outputs.
- o Section 5: Data Areas has two parts: the first illustrates how the translator uses tables and table entries, and the second gives a detailed layout of each table.
- o Section 6: Diagnostic Aids has three parts: the first suggests techniques for diagnosing troubles, the second illustrates dumps and how to read them, and the third contains a list of error messages and the modules which detect them.

In addition, each section can be cross-referenced to the other sections. As a result, you can use it in two ways: first, as a diagnostic aid in going from detail problem symptom up to the functional description, and second, as an aid to understanding internals by progressing from the introductory overview down to the details of modules and translated input text.

IBM 3705 ADVANCED COMMUNICATIONS FUNCTION FOR NETWORK CONTROL PROGRAM/VS, NCP VER 6, LIC PROG 5735-XX1, XX3, LOGIC  
This publication covers the internal logic of the IBM 3705 Communications Controller, Advanced Communications Function for Network Control Program/VS (ACF/NCP/VS), Version 6. Version 6 of the NCP operates under OS ACF/VTAM, DOS ACF/VTAM, and DOS ACF/TCAM. This PLM is designed to supplement the program listings for the NCP and to make access to the information in the listings easier.

The ACF/NCP/VS PLM is directed to the IBM support representatives and system engineers who provide program maintenance and who need information on the internal organization and logic of ACF/NCP.  
Manual, 8 1/2 x 11 inches, 812 pgs, 7/77  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY30-3031

3705 COMMUNICATIONS CONTROLLER EMULATION LOGIC (CURRENT RELEASE)

This publication describes the internal logic of the NEW BASE Emulation Program (EP), Version 3. Version 3 of the Emulation Program introduces support for the 3705 II with the type 4 channel adapter and the type 3 communication scanner. Additionally, software support of multiple type 4 channel adapters and multi-subchannel line access (MSLA) is provided. The EP modules that provide this support are called NEW BASE.

Previous releases of the Emulation Program support the 3705 I in a configuration which allows a single type 1 channel adapter and either a single type 1 communication scanner or up to four type 2 communications scanners. That configuration is supported by the old base Emulation Program modules (the type 1 channel adapter and the type 1 communication scanner are not supported by the NEW BASE). The EP System Generation selects either OLD BASE or NEW BASE modules depending upon the channel adapter and communication scanner defined. OLD BASE support is described in the IBM 3704 AND 3705 COMMUNICATIONS CONTROLLER EMULATION PROGRAM LOGIC MANUAL.

The EMULATION PROGRAM PLM is directed to the IBM program support representatives and system engineers who provide program maintenance and who need information on the internal organization and logic of the EP.

LY30-3043

ACF/NCP/VS NETWORK CONTROL PROGRAM, LIC PROG 5735-XX1, REFERENCE SUMMARY (CURRENT RELEASE)

This manual provides the system programmer and IBM program support representative with reference information about the Advanced Communications Function for Network Control Program/VS (ACF/NCP/VS), Release 2 and the Partitioned Emulation Programming (PEP) Extension. The Advanced Communications Function for the Network Control Program/VS controls the transmission of data between the host processor and the remote stations in the network connected to the IBM 3705 Communications Controller. Manual, 8 1/2 x 11 inches, 396 pages, 5/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY30-3039

ADVANCED COMMUNICATION FUNCTION FOR TCAM LOGIC

This publication is a reference manual for ACF/TCAM system control program base program feature number 9001, and multisystem networking facility feature number 6003. It is directed to the IBM program support representatives and the systems engineers who provide program maintenance and who need information on the internal organization and logic of ACF/TCAM. It is a licensed publication available only to holders of an ACF/TCAM license. This manual describes general ACF/TCAM concepts that should be understood before approaching the specifics of the internal logic. The internal logic documentation covers:

- Functional flow of ACF/TCAM operations
- Program organization and operation of ACF/TCAM
- Diagnostic aids
- Aids in the use and servicing of ACF/TCAM

Prerequisite publications for this manual are:

- ACF/TCAM, Version 2 General Information: Functional Description, GC30-3131, for general information
- ACF/TCAM, Version 2 Installation: Guide, SC30-3132, to learn how to construct and modify a TCAM MCP

LY30-5558

ACF FOR NCP VERSION 3 EMULATION PROGRAM FOR THE 3725 REFERENCE SUMMARY AND DATA AREAS (CURRENT RELEASE)

This program reference summary provides the system programmer and program support representative with reference information about the Advanced Communications Function for Network Control Program (Version 3), Emulation Program for the 3725 and Partitioned Emulation Programming (PEP) Extension. It provides quick access to often-used diagnostic and debug information. For a more comprehensive description of a subject, refer to the publications listed under "Prerequisite Publications". Prerequisite publications: LY30-5557, LY30-3055, LY30-5559, and 6A33-0013. Manual, 8 1/2 x 11 inches, 800 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5559

ADVANCED COMMUNICATIONS FUNCTION FOR NETWORK CONTROL PROGRAM, 5667-124, VERSION 3 FOR THE 3725 (CURRENT RELEASE)

This manual provides information for users who want to modify the Advanced Communications Function for Network Control Program (ACF/NCP), Version 3, for the 3725 Communication Controller. This manual is intended for programmers who are familiar with the internal logic of the NCP. Prerequisite publications for this manual are: Introduction to the 3725 Communication Controller, 6A33-0010; Advanced Communications Function for Network Control Program for the 3725: Reference Summary and Data Areas, LY30-5558-0. A corequisite publication is the Advanced Communications Function for Network Control Program, Version 3 Diagnosis Reference for the 3725, LY30-5557-0. Manual, 8 1/2 x 11 inches, 550 pages, 4/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5560

TCAM DIAGNOSIS REFERENCE (MVS)

This publication covers the internal logic of TCAM. It is directed to program support representatives and system engineers who provide program maintenance and need information on TCAM's internal logic and organization. Manual, 8 1/2 x 11 inches, 500 pages, 07/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30

LY30-5561

ACF FOR TCAM V3

This publication contains the data areas and linkage charts for TCAM Version 3. The audience of this publication is system programmers familiar with TCAM Version 3. Manual, 3 3/4 x 6 3/4 inches, 700 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5562

NETWORK COMMUNICATIONS CONTROL FACILITY (NCCF), 5668-947, 5665-316, 5666-285, DIAGNOSIS

This publication helps the user isolate and describe problems in the Network Communications Control Facility (NCCF) Version 2 Release 2 program product. It tells how to classify problems into specific categories, and it describes the information needed when reporting a problem to a support center. Manual, 8 1/2 x 11 inches, 400 pages, 12/84  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5564

ACF/SSP VERSION 3 DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication is directed to Program Support Representatives responsible for maintaining the Advanced Communications Function for System Support Programs (ACF/SSP), which is used with the ACF Network Control Program (ACF/NCP). The ACF/SSP includes an independent 3720 loader, dump utilities, a trace analysis program, a configuration report program, generation facilities, and assemblers. The generation facilities provided with ACF/SSP include the NCP/EP Definition Facility (NDF) and three assemblers. The assembler used will depend upon the operating system. Manual, 8 1/2 x 11 inches, 275 pages, 08/86  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5571

NETWORK CONTROL PROGRAM CUSTOMIZATION (CURRENT RELEASE)

This publication explains how to customize an NCP and how to use the MDF Standard attachment facility when generating an NCP.

Manual, 8 1/2 x 11 inches, 600 pages, 08/86

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5579

ADVANCED COMMUNICATION FUNCTION FOR VTAM VERSION 3 DATA AREAS (VSE)

This publication documents the data areas (control blocks) in VTAM V3 for VSE by giving a diagram and other information on each control block.

Manual, 8 1/2 x 11 inches, 985 pages, 12/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5580

ACF/VTAM VERSION 3 DATA AREAS (VM) (CURRENT RELEASE)

This publication contains diagrams and information about data areas used by ACF/VTAM running under the VM/SP operating system. This includes VTAM and VSCS control blocks, request/response units, parameter lists, tables and work areas.

Manual, 975 pages, 5/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5581

DATA AREAS ACF/VTAM V3

This publication contains data maps of all data areas used by VTAM in MVS. For each data area, there is a description, a diagram, a cross-reference list of all fields in the data area, and a listing of all constants (if any).

Manual, 1000 pages, 4/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY30-5582

ACF/VTAM VERSION 3 DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication provides reference information for use with the VTAM Diagnosis Guide. It contains high-level descriptions of the function and processing of VTAM components, VSCS, and TSO/VTAM.

Manual, 375 pages, 3/85

SLSS: ORDER NO. SUBSCRIPTION ONLY

LY30-5584

ACF FOR VTAM DATA AREAS (MVS)

This publication describes all the data areas used by VTAM. It is intended for programming service representatives and customer personnel diagnosing problems.

Manual, 06/86

LY30-5591

NCP AND SSP DIAGNOSIS GUIDE

This publication contains procedures for the customers that will guide them through the problem determination and problem definition processes. These procedures include how to determine if the customer's problem is with ACF/NCP, how to use relevant information to describe the problem, how to gather appropriate documentation about the problem, and how to report the problem to the Support Center.

The procedures described in this publication are those which are supported by ACF/NCP Version 3 and 4, and NCP/SSP Version 3.

Manual, 8 1/2 x 11 inches, 436 pages, 1/86

SY32-5044

3851 MASS STORAGE FACILITY THEORY OF OPERATIONS: DATA RECORDING CONTROL AND DATA RECORDING DEVICE

This publication is intended to give its reader a thorough understanding of the data recording control and data recording device portions of the 3851 Mass Storage Facility. It includes both introductory information and detailed

SY32

LY33

descriptions of these devices.

This manual is written for the customer engineer who maintains a 3851 Mass Storage Facility. Additional users of this publication are the program support representative and personnel in the 3850 Mass Storage System support center. It is expected that all users of this manual have a general understanding of the concepts and operations of the 3850 Mass Storage System and System/370.  
Manual, 8 1/2 x 11 inches, 240 pages, 3/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY32-5045

3851 MASS STORAGE FACILITY: REFERENCE

This publication is intended to give its readers concise information about the topics mentioned below, some of which are not available elsewhere. It should be treated as a companion manual to the maintenance documentation for the Mass Storage System. Although this publication is mainly concerned with the 3851 Mass Storage Facility, we have incorporated information about the Staging Adapter wherever circumstances made such inclusions necessary.

The primary audience is the IBM customer engineer who maintains the 3851 Mass Storage Facility. Additional users are the program support representative and personnel in the 3850 Mass Storage System support center. It is expected that the users of this publication have a general understanding of the concepts and operation of both the 3850 Mass Storage System and the System/370.  
Manual, 8 1/2 x 11 inches, 200 pages, 3/79

OS PL/I OPTIMIZING COMPILER LOGIC (CURRENT RELEASE)

The internal design of the OS PL/I Optimizing Compiler is described in this manual, which is written for use by programmers responsible for maintenance of the compiler. The manual is intended primarily as a guide to analysis of the program listings by people who are generally familiar with the compiler. However, overall and component descriptions are provided for use by readers who have no prior knowledge of the compiler design.  
Program Logic Manual, 752 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-6008

OS PL/I, 5734-LM4, RESIDENT LIBRARY LOGIC (CURRENT RELEASE)

The OS PL/I Resident Library consists of standard subroutines that are link-edited with object programs generated by the OS Optimizing Compiler. The library is used in program management, input/output, conversion, and interlanguage communication, and also includes many computational subroutines.

This publication is intended primarily for use by programmers concerned with the maintenance of the resident library. It summarizes, under functional headings, the internal logic of the library subroutines, and gives brief details of the relationships between them.  
Manual, 388 pages  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-6009

OS PL/I TRANSIENT LIBRARY, LIC PROG 5734-LM5, LOGIC (CURRENT RELEASE)

The OS PL/I Transient Library consists of standard subroutines that are loaded during execution of programs compiled by the OS PL/I Optimizing Compiler or the OS PL/I Checkout Compiler. These subroutines are used in error handling, program management, and input/output to provide storage dumps.

This publication is intended primarily for use by

programmers concerned with maintenance of the transient library. It summarizes, under functional headings, the internal logic of the library subroutines and gives brief details of the relationships between them.  
Manual, 328 pages

LY33-6028

CICS/VS, LIC PROG 5746-XX3, LOGIC

The IBM Customer Information Control System/Virtual Storage (CICS/VS) is a data base/data communication system that provides an interface between a System/370 operating system and user-written application programs. Applicable in most online environments, CICS/VS provides many of the facilities for standard applications: message switching, inquiry, data collection, order entry, and conversational and batched data

LY33

entry.

CICS/VS is available as two program products: CICS/DOS/VS, which executes under control of the Disk operating System/Virtual Storage (DOS/VS), and CICS/OS/VS, which executes under Operating System/Virtual Storage OS/VS1 or OS/VS2). Both program products consist of modular components from which a user installation can select and tailor a CICS/VS system to meet particular application processing needs. Because the CICS DOS/VS system is compatible with the CICS OS/VS system, it is possible to start with a small DOS/VS data base/data communication configuration and move up through DOS/VS into OS/VS. The information contained in this manual is of interest to persons servicing CICS DOS/VS.

## SY33-7008

1401/1440/1460 DOS EMULATOR ON SYSTEM/370: LOGIC, PROG. NOS. 370N-EU-490 (DOS), 5745-SC-EML (DOS/VS)

This publication describes the organization and logic of the program that emulates the 1401, 1440, and 1460 on the System/370 Models 135, 145, 155.

Manual, 342 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY33-7009

1410/7010 DOS EMULATOR ON SYSTEM/370 LOGIC, PROG. NOS. 370N-EU-490 (DOS), 5745-SC-EML (DOS/VS)

This publication describes the internal logic of the 1410/7010 Emulator Program for the System/370 Models 145 and 155, using the System/360 Disk Operating System. The emulator program is a problem program executed under control of the System/360 Disk Operating System. The emulator program and the appropriate compatibility feature (#4458 for Model 145, #3950 for Model 155) execute 1410/7010 programs on these System/370 models.

Major topics in this publication are the logic of the emulator program, the functions of the compatibility features, and the logic of the tape formatting programs used with the emulator.

The publication is written to meet the needs of the IBM customer engineer who must maintain the program.

Manual, 292 pages

## SY33-7011

1401/1440/1460 OS EMULATOR ON SYSTEM/370 LOGIC - PROGRAM NUMBERS 5744-AHI AND 360C-EU-735

This manual describes the internal logic of the IBM 1401/1440/1460 Emulator Program for the IBM System/370 Models 135/145/155/155-II/158. The emulator programs runs as a problem program under the OS/MFT, OS/MVT, OS/VS1, and OS/VS2 control programs, and executes object programs written for the IBM 1401, 1440, and 1460 Data Processing Compatibility Feature #4457; the Model 145 with IBM Compatibility Feature #4457 or #4458; the Model 155 with IBM Compatibility Feature #3950). Note that OS/MVT and OS/VS2 do not run on the Model 135. In addition, this manual describes the 1401/1440/1460 simulator, which enables programs to be executed on System/370 Models 135 through 168 under the control of OS/VS1 and OS/VS2, without the need for the compatibility feature (the functions of the compatibility feature are performed by simulator routines).

Described in this manual are the logic of the emulator program (including the simulator routines); the inter-relationships of the emulator program, the compatibility feature, and the operating system; and the logic of the tape and disk formatting programs used in conjunction with the emulator.

This manual is intended to be a reference manual for those responsible for emulator program maintenance. Assumed is familiarity with the IBM 1401/1440/1460 Data Processing Systems and with the appropriate OS control program.

Manual, 260 pages

DOS/VS SORT/MERGE, LIC PROG 5746-SM1, LOGIC

This manual aids Programming Systems representatives and system programmers involved in maintenance circumvent and/or fix faults in the DOS/VS Sort/Merge (5746-SM1). It describes the structure, logic and operation of the sort/merge by means of method-of-operation diagrams, module descriptions, data area descriptions, and various cross-reference tables.

Manual, 135 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY33-8039

DOS SORT/MERGE, LIC PROG 5743-SM1, LOGIC

This manual is a guide to the internal organization and logic of program no. 5743-SM1, intended for customer engineers. Describes program capabilities and system environment, techniques used by the program, and specific program components (using flowcharts). Also includes such aids as:

- o Microfiche directory
- o Table layouts
- o Register contents at entry to modules
- o Error-message module cross-reference tables
- o Control statement formats
- o Summary of program exits

The user should be familiar with the Disk Operating System service programs, assembler language, macro instructions, and sort/merge program specifications.

Manual, 316 pages

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY33-8041

OS/VS, VM/370 ASSEMBLER LOGIC

This program logic manual is written for customer engineers and programmers maintaining the OS/VS - VM/370 assembler. The manual describes the structure, logic, and operation of the assembler. Method of operation diagrams highlight the inputs, processing, and outputs of the assembler functions. The diagrams are accompanied by text describing the functions in more detail and cross-references to the program elements that perform the functions. Detailed charts show how the assembler phases use main storage and the flow of control and data between the assembler phases. The manual also contains layouts of data areas, information designed to be helpful in debugging and information about error message origin, macro and copy code usage, meta text flags, internal operation codes, entry points and EXTRN symbols, record formats, and the internal character set.

## Prerequisite Publications:

DOS/VS VM/SYSTEM PRODUCT SORT/MERGE VERSION 2, LIC PROG 5746-SM2, LOGIC (CURRENT RELEASE)  
For service personnel and development programmers who need to know about the design and organization of the DOS/VS Sort/Merge Version 2 Program Product (5746-SM2); describes its internal logic.  
Manual, 8 1/2 x 11 inches, 4/82  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## GY33-8533

INTRODUCTION TO DOS VERSION 4, LIC PROG 370N-CL-453, LOGIC  
This reference publication gives an overall view of the Disk Operating System (DOS), and it briefly describes the associated control and service programs.  
It is intended for persons who are involved in program maintenance and for system programmers who are altering the program design. Program logic information is not needed for normal use or operation of the system control program.  
This manual is designed to introduce and to cross-reference the six companion PLMs of the Disk Operating System. These associated PLMs are listed in the Preface of this manual.  
For titles and abstracts of other associated publications, see the IBM System/360 and System/370 Bibliography, GA22-6822.  
Manual, 52 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## GY33-8547

DOS VERSION 4 SYSTEM UTILITIES - PROGRAM NUMBER 370N-UT-491  
This publication describes the internal logic of the IBM DOS System Version 4 Utility programs. It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the program.  
Manual, 170 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY33-8548

OS/VS2 TSO COMMAND PROCESSOR LOGIC VOLUME II: EDIT  
This publication describes the internal logic of the TSO EDIT Command Processor program. Included in this manual are discussions of the organization and method of operation of the program, tables of data layouts.

The EDIT program processes the EDIT command and subcommands, which are a part of the TSO command language. The EDIT command and its subcommands create and modify data sets.

The subcommands are:

ALLOCATE	END	INSERT	RENUM	SUBMIT
BOTTOM	FIND	Insert/Replace/Delete	RUN	TABSET
CHANGE	FORMAT	LIST	SAVE	TOP
DELETE	HELP	MERGE	SCAN	UP
DOWN	INPUT	PROFILE	SEND	VERIFY

This manual is intended for use by persons debugging the EDIT Command Processor program, or by systems programmers who are altering the program design. It is not intended, nor is it needed for normal operation of the program.

Manual

## SY33-8551

DOS/VSE SUPERVISOR LOGIC

This reference publication describes the internal logic of the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE) Supervisor and the Attention Transients. It is for persons involved in program maintenance and for system programmers altering the program design. Program logic information is not needed for normal operation of these programs. This publication is a supplement to the program listing.  
Manual, 608 pages, 2/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY33-8552

DOS/VSE ERROR RECOVERY AND RECORDING TRANSIENTS LOGIC

This reference publication provides general information and detail flowcharts of the Recovery and Recording Transient Programs of the IBM Disk operation System/Virtual Storage Extended. The transient programs discussed handle the recovery from and recording of device errors, machine checks and channel checks. This publication, which is a supplement to the program listing, is intended for persons involved in program maintenance and for system programmers who are altering the program design. Program logic information is not needed for normal operation of these programs.

Manual, 8 1/2 x 11 inches, 364 pages, 2/79

SLSS: ORDER NO. SUBSCRIPTION ONLY

## SY33-8553

DOS/VSE LOGICAL TRANSIENTS AND DUMP PHASES LOGIC

This reference publication provides general logic information and detail flowcharts of the Logical Transient phases and the Dump routines of the IBM Disk Operating System Virtual Storage Extended (DOS/VSE). The transient phases discussed are: The Attention routines, the Terminator routines, the CRT Transients, the Checkpoint/Restart routines, and some special service programs.

This publication, which is a supplement to the program listing, is intended for persons involved in program service and for system programmers who are altering the program logic. Program logic information is not needed for normal operation of DOS/VSE.

Manual, 300 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8554

DOS/VSE SERVICEABILITY AIDS LOGIC

This manual describes the DOS/VSE Serviceability Aids (SDAID) programs. It is intended to help support personnel do problem determination in case of program errors. It contains the logic descriptions of the programs PDZAP, Parser, LSERV and Standalone Dump.  
Manual, 8 1/2 x 11 inches, 284 pages, 2/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8555

DOS/VSE INITIAL PROGRAM LOAD AND JOB CONTROL LOGIC

This reference publication describes the internal logic of the IBM Disk Operating System/Virtual Storage Extended, DOS/VSE, Initial program Load (IPL) and Job Control Programs. It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not needed for normal operation of the IPL and Job Control programs. It is designed to be used as a supplement to the program listing. Effective use of this manual requires an understanding of IBM System/370 and IBM 4300 Processor operations and of DOS/VSE control and service programs, macro instructions, and operating procedures.  
Manual, 8 1/2 x 11 inches, 392 pages, 2/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8556

DOS/VSE LINKAGE EDITOR LOGIC

This publication describes the internal logic of the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE) Linkage editor program. It is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not needed for normal operation of the linkage editor program. It is a supplement to the program listing. Effective use of this manual requires an understanding of IBM System/370 operation and of IBM DOS/VSE control and service programs, macro instructions, and operating procedures.  
Manual, 8 1/2 x 11 inches, 128 pages, 2/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8557

DOS/VSE LIBRARIAN LOGIC

This reference publication describes the internal logic of the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE) Librarian Organization, Maintenance, and Service Programs. Persons involved in program maintenance and system programmers should use this manual when altering the program design. Program logic information is not needed for normal operation of the librarian programs, but is to be used as a supplement to the program listing. Effective use of this manual requires an understanding of IBM System/370 operation and of IBM DOS/VSE control and service programs, macro instructions, and operating procedures.  
Manual, 8 1/2 x 11 inches, 256 pages, 2/79  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8559

DOS/VSE LIOCS VOLUME 1, GENERAL INFORMATION AND IMPERATIVE MACROS LOGIC

This reference publication is the first of four Logic Manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operating System/Virtual Storage. The four related Logic Manuals are:

Volume 1: General Information and Imperative Macros,  
SY33-8559

Volume 2: SAM, SY33-8560

Volume 3: DAM and ISAM, SY33-8561

Volume 4: VSAM, SY33-8562

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the programs described.

Effective use of this publication requires an understanding of IBM System/370 operation and the DOS/VS Assembler language and its associated macro definition language. Reference publications for this information are listed in the front of the manual.

For titles and abstracts of other related publications, refer to the IBM System/360 and System/370 Bibliography, GA22-6822, and the IBM System/370 Advanced Function Bibliography, GC20-1763.  
Manual, 256 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8560

DOS/VSE LIOCS VOLUME 2 SAM LOGIC

This reference publication is the second of four Logic Manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operating System/Virtual Storage. The four related Logic Manuals are:

Volume 1: General Information and Imperative Macros,  
SY33-8559

Volume 2: SAM, SY33-8560

Volume 3: DAM and ISAM, SY33-8561

Volume 4: VSAM, SY33-8562

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the program described.

Effective use of this publication requires an understanding of IBM System/370 operation and the DOS/VS Assembler language and its associated macro definition language. Reference publications for this information are listed in the front of the manual.

Manual, 436 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8561

DOS/VSE LIOCS VOLUME 3 DAM AND ISAM LOGIC

This reference publication is the third of four Logic Manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operating System/Virtual Storage. The four related Logic Manuals are:

Volume 1: General Information and Imperative Macros,  
SY33-8559

Volume 2: SAM, SY33-8560

Volume 3: DAM and ISAM, SY33-8561

Volume 4: VSAM, SY33-8562

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the programs described.

Effective use of this publication requires an understanding of IBM System/370 operation and the DOS/VS Assembler language and its associated macro definition language. Reference publications for this information are listed in the front of the manual.

Manual, 354 pages

SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8562

DOS/VS LIOCS VOLUME 4: VSAM LOGIC

descriptions of how DOS/VS open, close, and end of DOS/VS Virtual Storage Access Method (VSAM).

SY33

LY33

The intended audience is a person involved in program maintenance or a system programmer who is altering the program design. Logic information is not necessary for the operation of the programs described.

This manual and the listing documentation should be viewed as a maintenance set. The listings describe the internal logic of the modules, and the manual shows what the functions of DOS/VS VSAM are and how the modules work together to carry out those functions. Prerequisite publications:

- o DOS/VS Data Management Guide, GC33-5372, which describes DOS/VS VSAM data management.
- o DOS/VS Supervisor and I/O Macro Instructions, GC33-5373, which tells how to code DOS/VS VSAM macro instructions
- o DOS/VS LIOCS Volume 1: General Information and Imperative Macros Logic, SY33-8559 contains brief descriptions of how DOS/VS open, close, and end-of-volume routines interact with DOS/VS VSAM.

Manual, 8 1/2 x 11 inches, 720 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

maintenance and programmers who are altering the program design.

SY33-8572

HANDBOOK DOS/VS POWER/VS VOLUME 2

This manual is a supplement to the DOS/VS Handbook, SY33-8571. It contains information about POWER/VS and VTAM. Manual, 192 pages  
//20//5745-010

SY33-8576

DOS/VS POWER/VS, 5745-SC-PWR, LOGIC PART 1

This manual describes the internal design or logic of the subject program. These manuals are intended for persons involved in program maintenance and system programmers who are altering the program design. Program logic information is not necessary for the operation of the program; therefore, distribution of these publications should be limited to persons with maintenance and alteration requirements.

Manual, 8 1/2 x 11 inches, 275 pages, 11/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY33-9062

DOS/VS RPG II, LIC PROG 5746-RG1, LOGIC (CURRENT RELEASE)

The manual describes the logic of the DOS/VS RPG II compiler, the generated object program, the formatted dump program, the Auto Report, the DOS/VS RPG II Translator for batch DL/I DOS/VS requests, and the Interactive Source Entry Program.

The manual is intended primarily for persons who are concerned with program service activities for DOS/VS RPG II.

The manual is intended primarily for persons who are concerned with program service activities for DOS/VS RPG II. Manual, 8 1/2 x 11 inches, 540 pages, 4/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9063

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, SUPERVISOR LOGIC

The publication provides replacement and/or supplementary pages for the DOS/VS Supervisor Logic. These pages, when incorporated in the DOS/VS publication, document the use of the facilities available with Advanced Functions - DOS/VS. Manual, 8 1/2 x 11 inches, 190 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9064

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, LOGICAL TRANSIENTS LOGIC

The publication provides replacement and/or supplementary pages for the DOS/VS Logical Transients Logic. These pages, when incorporated in the DOS/VS publication, document the use of the facilities available with Advanced Functions - DOS/VS.

Manual, 8 1/2 x 11 inches, 56 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9065

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, SYSTEM SERVICEABILITY LOGIC

This supplement contains changed pages for DOS/VS Serviceability Aids Logic, SY33-8554-3 for Advanced Functions - DOS/VS, Release 34. It describes support for asynchronous operation communication and for up to seven partitions.

Manual, 8 1/2 x 11 inches, 50 pgs, 4/77

SY33-8564

DOS/VS ACCESS METHOD SERVICES LOGIC

This book describes the internal logic of the routines of Access Method Services and provides diagnostic information. This information is directed to maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of Access Method Services. Manual, 8 1/2 x 11 inches, 600 pages, 5/77  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8566

DOS/VS POWER RJE PROGRAM LOGIC

The Program Logic Manual describes the internal design or logic of the subject program. This manual is intended for persons involved in program maintenance and for system programmers who are altering the program design. Program logic information is not necessary for the operation of the program; therefore, distribution of this publication is limited to persons with maintenance and alteration requirements.

Manual, 230 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8567

DOS/VSE ASSEMBLER LOGIC

This manual aids Programming Systems Representatives and system programmers involved in maintenance circumvent and/or fix faults in the DOS/VS Assembler and the DOS/VS 3705 Assembler. It describes the structure, logic, and operation of the assembler. It provides information on how the assembler works functionally (this is illustrated through method-of-operation diagrams); how the program is divided into units; control and data flow between phases; allocation of main storage; detailed layouts of data areas; I/O activity and workfile layouts; register usage; debugging hints; and appendixes with related reference material.

The modifications made to certain phases of the DOS/VS Assembler in order to produce the DOS/VS 3705 Assembler are described in Appendix K.

Manual, 390 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY33-8568

DOS/VSE OLTEP LOGIC

This reference publication describes the internal logic of the IBM Disk Operation System, On-Line Test Executive Program (OLTEP). It is for persons involved in program

LY33-9066

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, 5746-E2-IPL, 5746-E2-JCL, IPL AND JOB CONTROL LANGUAGE LOGIC

This supplement contains changed pages for DOS/VS IPL and Job Control Logic, SY33-8555-3 for Advanced Functions - DOS/VS, Release 34. It describes support for up to seven partitions and Library Device Independence.

Manual, 8 1/2 x 11 inches, 38 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9067

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, 5746-E2-LNK, LINK EDIT LOGIC

This supplement contains changed pages for DOS/VS Linkage Editor Logic, SY33-8556-2 for Advanced Functions - DOS/VS, Release 34. It describes support for up to seven partitions, Library Device Independence, and Fast Linkage Editor.

Manual, 8 1/2 x 11 inches, 26 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9068

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, 5746-E2-LBR, LIBRARIAN LOGIC

This supplement contains changed pages for DOS/VS Library Logic, SY33-8557-3 for Advanced Functions - DOS/VS, Release 34. It describes support for up to seven partitions, Library Device Independence, and VM linkage enhancements.

Manual, 8 1/2 x 11 inches, 90 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9069

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2, 5746-E2-UTL, SYSTEM UTILITIES LOGIC

This supplement contains changed pages for DOS/VS System Utilities Logic, SY33-8558-1 for Advanced Functions - DOS/VS, Release 34. It describes the format of the Options table and the Hardcopy record for seven partitions.

Manual, 8 1/2 x 11 inches, 6 pgs, 4/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9070

SUPPLEMENT FOR AF TO DOS/VS, 5746-XE2

This manual is the first in a series of two volumes. The reference information contained in these two manuals is provided as a DOS/VS serviceability aid and is, therefore, a summary of other DOS/VS documentation. These manuals are intended for use by persons involved in program support. Contents include:

- Chapter I: System/370 General Information
- Chapter II: DOS/VS General Information
- Chapter III: DOS/VS IOCS (General, SAM, DAM, ISAM)
- Chapter IV: DOS/VS Supervisor Control Blocks and Areas
- Chapter V: DOS/VS Service Aids

Manual, 8 1/2 x 11 inches, 38 pgs, 6/77

LY33-9083

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, -XE9, DIAGNOSIS REFERENCE: LOGICAL TRANSIENTS AND \$IJB5XXX PHASES (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the component's code. It is designed to serve as a bridge into the component's program listings. This publication provides information needed for isolating errors, if any, in the component's code. It is designed to serve as a bridge into the component's program listings.

The publication gives an overview of th logical transients and SIJB5xxx phases documented in this manual. The publication also covers attention routines, terminator routines, various special service programs, and checkpoint/restart routines.

Manual, 8 1/2 x 11 inches, 328 pages, 7/80

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9084

VSE/ADVANCED FUNCTIONS DIAGNOSIS REFERENCE, LIC PROG 5746-XE8, -XE9, INITIAL PROGRAM LOAD AND JOB CONTROL (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the component's code. It is designed to serve as a bridge into the component's program listings. The publication presents the information in sections as follows:

- The first section is an INTRODUCTION to the IPL and Job control programs summarizing their functions and those of the service programs and phases related to them.
- The next two sections show for each program the function-to-phase relationship, a verbal description of their sequence of operation, control flow and I/O flow graphs, and the storage layout.
- Then follows PROGRAM ORGANIZATION showing overview charts for each phase, some in pseudocode form, and detailed flowcharts for some.
- The next section, DATA AREAS, shows the layout of those data areas which have more than just a phase-internal significance.
- The last section, DIAGNOSTICS, contains label lists, phase-to-module and error-message cross references, LISTIO examples, and error codes.

Manual, 8 1/2 x 11 inches, 430 pages, 10/77

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9085

VIRTUAL STORAGE EXTENDED/ADVANCED FUNCTIONS, 5746-XE8, LINKAGE EDITOR DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the component's code. It is designed to

LY33

serve as a bridge into the component's program listings. The publication presents the information in sections as follows:

- Introduction to the Linkage Editor.
- Method of Operation, describing the function, the flow of the data and of control within the program, the storage layout, and certain features.
- Program Organization, describing in general and detailed charts the logic flow of the linkage editor program. General charts are identified by two-digit numbers, flowcharts by letters.
- Data Areas which include the formats of library records used by the program and of entries in the control dictionary and in the linkage table and the formats of the phase BUILDLIST and of the LIFO module stack.
- Diagnostics which include label lists, a phase-to-module cross reference, and an error message list.

Manual, 8 1/2 x 11 inches, 112 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9086

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, -XE9, DIAGNOSIS REFERENCE: AIDS (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the component's code. It is designed to serve as a bridge into the component's program listings.

Effective use of this publication requires an understanding of the IBM serviceability aid programs provided with VSE/Advanced Functions. Reference publications are listed in the preface of the manual. Manual, 8 1/2 x 11 inches, 300 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE9 COMPONENT ID

LY33-9088

VSE/ADVANCED FUNCTIONS DIAGNOSIS REFERENCE, LIC PROG 5746-XE8, -XE9, SYSTEM UTILITIES (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the components code. It is designed to serve as a bridge into the components program listings. The publication presents the information as follows:

- One section for each utility program.
- Each section provides introductory information, such as the purpose and function of the program, its organization, its storage requirements and environmental characteristics. The method of operation is described by HIPO diagrams (any of A through Z) which also serve as page number prefixes. These diagrams together with the extended descriptions contain the information that supplements the program listings.
- Appendix A. Phase and Module Cross Reference List
- Appendix B. List of Referenced Labels
- Appendix C. Message Cross Reference List.

Manual, 8 1/2 x 11 inches, 650 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9089

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, DIAGNOSIS REFERENCE MAINTAIN SYSTEM HISTORY PROGRAM (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the VSE/Advanced Functions Maintain System History Program. It is designed as a bridge into the components program listings.

Manual, 8 1/2 x 11 inches, 500 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33

LY33-9090

VSE FAST COPY DATA SET, 5746-AM4, DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication describes the logic of VSE/Fast Copy Data Set program and is directed to persons involved in problem determination and program development. Manual, 8 1/2 x 11 inches, 94 pages, 3/83  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9091

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, COMPONENT IDS 5745-SC-SUP, -AII, -DKE, DIAGNOSIS REFERENCE SUPERVISOR (CURRENT RELEASE)

This logic manual is one of three detailed guides to the logic of the VSE/Advanced Functions Supervisor. It supplements the program listings by providing descriptive text and charts describing the organization of the supervisor area in real storage, the internal logic of the nucleus routines, the physical input/output control system, and the internal logic of the physical attention transient routines.

Titles and abstracts of other related publications are listed in the System/370 Bibliography, 6C20-0001. Manual, 8 1/2 x 11 inches, 668 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9092

VSE/ADVANCED FUNCTIONS, LIC PROG 5746-XE8, -XE9, DIAGNOSIS REFERENCE: ERROR RECOVERY AND RECORDING TRANSIENTS (CURRENT RELEASE)

This publication provides information needed for isolating errors, if any, in the components code. It is designed to serve as a bridge into the components program listings. The publication presents the information in sections as follows:

- Introduction - this section gives an overview of the physical transients documented in this manual.
- Device-dependent error recovery procedures - this section covers the transients that respond to device-dependent error situations.
- Machine check and channel check handling - this section covers the transients that respond to machine check interrupts.
- Recovery management support recorder - this section covers the transients that write records of environmental data on the recorder file for analysis.
- Charts - this section documents the organization and the functions of the various transients on a structural level by using flowcharts as a documentation method.
- Appendixes - this section provides supplementary information for the previous sections, such as label list and cross references.

Manual, 8 1/2 x 11 inches, 360 pages, 10/79  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9094

VSE/POWER HANDBOOK

This publication is intended primarily for use by personnel responsible for servicing the program. It describes the internal logic for VSE/POWER and should be used with the program listing for this component. Manual, 95 x 172 millimeters, 231 pages, 6/86  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9095

VSE/IPCS HANDBOOK RELEASE 1, LIC PROG 5746-SA1

This publication provides a summary of VSE/IPCS information for persons involved in program service activities. It contains, among others, a summary of the VSE/IPCS operator commands and explanations of problem definitions and dump types.

LY33

SY35

Manual, 24 pages, 7/79

LY33-9096

VSE/ICCF, LIC PROG 5746-TS1, HANDBOOK

This publication provides a summary of VSE/Interactive Computing and Control Facility information for persons involved in program service activities. It contains, among others: a summary of commands, statements, procedures, and macros accepted by the product; control blocks and areas used by the product; and an overview of available service aids.

Manual, 3 3/4 x 6 3/4 inches, 80 pages, 2/81  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9097

VIRTUAL STORAGE EXTENDED/OPERATOR COMMUNICATION CONTROL FACILITY, 5746-XC5, DIAGNOSIS REFERENCE (CURRENT RELEASE)

This publication contains information on the design and organization of the VSE/Operator Communication Control Facility (VSE/OCCF); it supplements the program listings.

An overview discusses the VSE/OCCF functions and their relationship, shows the partition layout, and outlines the requirements for operation.

The design information gives an internal view of VSE/OCCF. It describes the communication between the various parts of the program and the interfaces to other programs; it explains in detail the functions of the VSE/OCCF modules, register and data area usage, and flow of control.

Organization information provides, for quick reference, a module-to-function cross-reference list. The publication includes various lists and tables, such as a message-to-module cross-reference, to aid in problem tracing. A detailed description of the VSE/OCCF internal macros is included.

Manual, 8 1/2 x 11 inches, 80 pages, 7/80  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9098

VIRTUAL STORAGE EXTENDED/INTERACTIVE COMPUTING AND CONTROL FACILITY, 5746-TS1 (CURRENT RELEASE)

This publication is intended for use by persons who have to do service or maintenance on the licensed program VSE/Interactive Computing and Control Facility (ICCF). The manual is basically a description of ICCF's program logic.

Program logic information is not needed for normal operation of ICCF; it is a supplement to the program listings.

This Diagnosis Reference manual expands on the information given in VSE/ICCF Diagnosis Guide, SC33-6119.  
 Manual, 8 1/2 x 11 inches, 400 pages, 7/80  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9099

DOWNSTREAM LOAD UTILITY, 5668-006, DIAGNOSIS REFERENCE

This publication contains information on the design and organization of the Downstream Load Utility; it supplements the program listings.

The design information gives an internal view of the Downstream Load Utility. It explains in detail the functions of the DSLU modules, register and data area usage, and flow of control.

Manual, 8 1/2 x 11 inches, 28 pages, 3/81

LY33-9100

OS/VS RPG II ADDENDUM TO DOS/VS RPG II LOGIC, 5740-R61

For persons doing program service for the product, the publication documents how the logic of OS/VS RPG II differs from the logic of DOS/VS RPG II. This publication is a companion manual of DOS/VS RPG II Logic, LY33-9062.

Manual, 80 pages, 12/80  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9101

VSE/ADVANCED FUNCTION LIC PROG 5746-XE8, HANDBOOK (CURRENT RELEASE)

This manual is provided as a VSE/Advanced Function Release 2 serviceability aid and is a summary of other VSE/Advanced Function Release 2 documentation.

Manual, 3 5/8 x 6 3/4 inches, 426 pages, 7/80  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY33-9105

VIRTUAL STORAGE EXTENDED/ONLINE TEST EXECUTIVE PROGRAM DIAGNOSIS, 5656-092, REFERENCE (CURRENT RELEASE)

This publication describes the internal logic of the VSE/Online Test Executive Program (VSE/OLTEP), which is required for servicing the input/output devices of a VSE controlled computer system. The publication is intended for persons involved in servicing the program or in altering its design.

Manual, 8 1/2 x 11 inches, 154 pages, 6/83  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

LY33-9121

VSE/ADVANCED FUNCTIONS HANDBOOK

This publication is intended primarily for use by personnel responsible for servicing the program. It describes the internal logic or VSE/Advanced Functions, and should be used with the program listings for this component.

Manual, 524 pages, 8/85  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY33-9122

VSE/ICCF, 5666-302, HANDBOOK

This publication is provided as a VSE/ICCF, Version 2 Release 1, serviceability aid and is a summary of other VSE/ICCF documentation.

Manual, 75 x 172 millimeters, 120 pages, 8/85  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

GY34-0019

DISTRIBUTED INTELLIGENCE SYSTEM OS/VS1 LOGIC

The manual contains the logic of the Distributed Intelligence System program. This program controls System/7s that are satellite-connected to a host System/370. This network of systems permits mutual sharing of System/370 resources and System/7 sensor-based control capabilities. The manual is written for program support personnel who have a working knowledge of MSP/7 and OS/VS1 control programs.

Manual, 850 pages  
 SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0003

OS/VS1 CATALOG MANAGEMENT LOGIC

This publication describes the internal logic of the catalog management routines in OS/VS. This information is directed to maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of catalog management facilities.

SY35

LY35

The reader should be familiar with general programming techniques, OS/VS concepts, and the IBM System/370 before reading this book.

SY35-0004

OS/VS2 TSO COMMAND PROCESSOR LOGIC VOLUME III: TEST REL 2, 3, 3.6; WITH SN28-2629, REL 3.7

This publication describes the internal logic of the OS/VS2 TSO TEST command processor. The TEST command processor allows a terminal user to test an assembly language problem program.

This publication contains text introductions, method-operation diagrams, flowcharts, data area layouts, program organization descriptions, and a module directory.

This publication is written for persons who maintain or modify TSO; it is not required by persons who use TSO to process programs or who write programs that are processed by TSO.

Manual, 232 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0005

OS/VS UTILITIES LOGIC

This publication describes the internal logic of the utility programs provided for OS/VS. It contains flowcharts of the programs, figures showing the formats of the major tables and records, and an appendix that lists the modules of the utility programs.

The manual is intended for persons involved in program maintenance, and system programmers who are altering the program design. Program logic information is not necessary for the use and operation of the program.

Manual  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0008

OS/VS1 ACCESS METHOD SERVICES LOGIC

This book describes the internal logic of the routines of Access Method Services and provides diagnostic information. This information is directed to maintenance personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of Access Method Services.

You should be familiar with general programming techniques, OS/VS VSAM concepts and use, and System/370 before turning to this publication.

SY35-0010

OS/VS2 ACCESS METHOD SERVICES LOGIC

This book describes the internal logic of OS/VS2 Access Method Services routines and provides diagnostic information. This information is directed to support personnel and development programmers who require an in-depth knowledge of the program's design, organization, and data areas. The book is not required for effective use of Access Method Services.

Manual, 486 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0012

OS/VS1 MASS STORAGE SYSTEM COMMUNICATOR (MSSC) LOGIC

This book describes the logic of OS/VS1 Mass Storage System Communicator (MSSC) routines and provides diagnostic information. This information is for support personnel who require an in-depth knowledge of MSSC's design, organization

and data areas.

Manual, 215 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0013

OS/VS2 MASS STORAGE SYSTEM COMMUNICATOR (MSSC) LOGIC

This book describes the logic of OS/VS2 Mass Storage System Communicator (MSSC) routines and provides diagnostic information. This information is for support personnel who require an in-depth knowledge of MSSC's design, organization, and data areas.

Manual, 234 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0014

OS/VS MASS STORAGE CONTROL (MSC) TRACE REPORTS LOGIC

This book describes the internal logic of the Trace Report Programs and provides diagnostic information. This information is directed to Maintenance Personnel and Development Programmers who require an in-depth knowledge of the Program's Design, Organization, and Data Areas. It is not required for effective use of the Trace Reports Program. Pre-requisite Publications are:

OS/VS Mass Storage System (MSS) Services for Space Management, GC35-0012.  
IBM 3850 Mass Storage System (MSS) Installation Guide.  
Manual  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0015

OS/VS MASS STORAGE SYSTEM (MSS) SERVICES LOGIC

This book describes the internal logic of the function support routines (FSRs) that support the mass storage system and provides diagnostic information.

This information is directed at support personnel and development programmers who need an in-depth knowledge of the function support routines (FSRs) design, organization, and data areas.

Manual  
SLSS: ORDER NO. SUBSCRIPTION ONLY

SY35-0016

OS/VS MASS STORAGE CONTROL (MSC) TABLE CREATE LOGIC

This book describes the internal logic of the Mass Storage Control Table Create Program. The information in the book is directed to Maintenance Personnel and Development programmers who require an in-depth knowledge of the program's design, organization, and data areas. It is not required for effective use of the Table Create Program.

Prerequisite Publication is:  
OS/VS Mass Storage Control Table Create, GC35-0013.  
Manual, 34 pages  
SLSS: ORDER NO. SUBSCRIPTION ONLY

LY35-0026

OS/VS2 MVS HIERARCHICAL STORAGE MANAGER, LIC PROG 5740-XRB, LOGIC (CURRENT RELEASE)

This publication describes the logic of the Hierarchical Storage Manager (a Program Product). The Hierarchical Storage Manager is a tool to help manage online storage in an OS/VS2 MVS environment. The audience for this publication is support personnel who require an in-depth knowledge of the Hierarchical Storage Manager's design, organization, and data areas.

Manual, 8 1/2 x 11 inches, 400 pages, 1/78  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY35-0028

IMS/VS DATA BASE RECOVERY CONTROL FEATURE, LIC PROG 5740-XX2 LOGIC (CURRENT RELEASE)

This book describes the logic of the programs that comprise the IMS/VS Data Base Recovery Control Feature. The book is intended to be used as a reference book by customer system programmers and IBM programming support personnel who are responsible for maintenance of the feature.

Manual, 8 1/2 x 11 inches

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY35-0029

OS/VS MSS DATA ANALYZER LOGIC

The System Data Analyzer Program uses the SYS1 logic Data Set Information as input and generates statistical Data about Mass Storage System errors. The statistical data is in the form of reports.

This Manual contains program logic.

LY38-3010

LOGIC NCCF (CURRENT RELEASE)  
This manual describes the program logic of the Network Communications Control Facility, an IBM program product. Users should have a basic knowledge of OS/VS or DOS/VSE, VSAM, and VTAM or TCAM.  
The manual describes the basic structures and functions of NCCF, method-of-operation, NCCF modules, major NCCF control blocks, and diagnostic aids. Three appendices discuss the NCCF macros, NCCF files, and logic differences for NCCF in DOS/VSE.  
This manual is intended for IBM personnel who are responsible for program maintenance. System programmers may be interested in parts of the manual.  
Manual, 8 1/2 x 11 inches, 280 pages, 9/80  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

SY38-3012

DIAGNOSTIC TECHNIQUES ACF/VTAME (CURRENT RELEASE)  
This publication describes approaches to debugging with an ACF/VTAME data communication system. It presents the guidelines, tools, and information needed to diagnose and correct problems in application programs and data communication networks that use ACF/VTAME. The publication provides information about ACF/VTAME diagnostic aids and summarizes some service aids that are described in other products' publications. Information useful for debugging I/O problems also is included. Appendixes contain additional information about correlated network component publications, summarize PIU formats, list states found in control-block finite state machines, and summarize the procedure for submitting an APAR. The final appendix contains an easily removed control block overview.  
This publication is intended for use by anyone who needs to isolate, diagnose, and fix a problem in an ACF/VTAME

domain.

Manual, 8 1/2 x 11 inches, 312 pages, 9/79  
 ///5746-RC7

## LY38-3013

LOGIC ACF/VTAME OVERVIEW (CURRENT RELEASE)

This manual is intended for maintenance personnel to obtain an overview of ACF/VTAME Logic for purposes of maintaining the program product at an operation level.

Manual, 8 1/2 x 11 inches, 125 pages, 6/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3014

LOGIC ACF/VTAME (CURRENT RELEASE)

This manual is the second part of a two-part description of the logic of the Advanced Communications Function for VTAM Entry. The first part is the ACF/VTAME Logic Overview, which describes the high level logic of ACF/VTAME. This manual describes the lower level logic, including system-dependent logic. This manual is primarily intended to help IBM program systems representatives quickly locate failures in the access method.

Included in this publication are HIPO diagrams that describe the logic of ACF/VTAME components, control flow diagrams which show the relationship between modules, and a synopsis of each ACF/VTAME module. With this information, a PSR can determine what module performs a particular function and how control passes to and from that module.

Manual, 8 1/2 x 11 inches, 7/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3016

ACF/VTAME DATA AREAS (CURRENT RELEASE)

This manual describes the data areas used by ACF/VTAME. It is intended for IBM program system representatives and customer personnel who diagnose problems with ACF/VTAME. This publication contains data maps of all data areas used by ACF/VTAME.

Manual, 8 1/2 x 11 inches, 7/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3018

NETWORK TERMINAL OPTION, 5735-XX7, DIAGNOSIS AND LOGIC (CURRENT RELEASE)

This manual describes the logic of the Network Terminal Option (NTO) Program Product. This program product resides in the ACF/NCP and is used to allow selected START/STOP terminals to look like SNA devices (PU Type 1/LU Type 1) to the rest of the network. This manual is to be used by PSRs and Customer System Programmers to locate and fix NTO problems.

Manual, 8 1/2 x 11 inches, 300 pages, 3/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY38-3020

DIAGNOSTIC TECHNIQUES ACF/VTAM (CURRENT RELEASE)

This manual contains diagrams and other information about data areas, control blocks, parameter lists and work areas used by ACF/VTAM under OS/VS. This information is designed to be used with ACF/VTAM logic manuals, debugging guides, and microfiche listings to assist in diagnosing program malfunctions.

Manual, 8 1/2 x 11 inches, 800 pages, 9/79  
 ///5746-RC3

## LY38-3021

LOGIC OS ACF/VTAM OVERVIEW (CURRENT RELEASE)

This manual is intended for maintenance personnel to obtain an overview of ACF/VTAM Logic for purposes of maintaining the program product at an operation level.

Manual, 8 1/2 x 11 inches, 125 pages, 3/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3022

DIAGNOSIS REFERENCE ACF/VTAM (CURRENT RELEASE)

For ACF/VTAM Release 3, this manual replaces the following manuals: ACF/VTAM Logic: Base System, Volume 1 (LY38-3022-0); ACF/VTAM Logic: Base System, Volume 2 (LY38-3024-0); ACF/VTAM Logic Overview (LY38-3021-1): ACF/VTAM Control Block Overview.

This manual contains a description of ACF/VTAM logic, control blocks, and components. It also contains control flows and method-of-operation diagrams (HIPOs and module flow diagrams).

A system programmer should use this manual in conjunction with the ACF/VTAM Diagnosis Guide to determine the failing function and module of the access method. The Diagnosis Reference does not support problem determination below the module level.

Manual, 8 1/2 x 11 inches, 1200 pages, 1/81  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3023

LOGIC ACF/VTAM MSNF RELEASE 3

This manual describes the logic of the Multisystem Networking Facility, an optional feature of ACF/VTAM. It should be used in conjunction with ACF/VTAM Diagnosis Reference, LY38-3022 (VSE) or LY38-3027 (OS/VS), which describe the high-level logic of ACF/VTAM. This manual is intended to help IBM Program Support Representatives and customer system programmers to quickly locate failures in this feature of ACF/VTAM. Included in this publication are diagrams that describe the logic of components of this feature, the flow of control between modules, and module synopses.

Manual, 8 1/2 x 11 inches, 160 pages, 10/80  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3024

ACF/VTAM, LIC PROG 5746-RC3, LOGIC VOLUME 2: PROGRAM ORGANIZATION AND MODULE DIRECTORY (CURRENT RELEASE)

This manual is the third part of a three part description of the logic of ACF/VTAM for DOS/VSE. The first part is the manual ACF/VTAM Logic: Overview and the second part is the manual ACF/VTAM Logic: Base System Volume 1, Method of Operation. The three manuals are intended primarily to help IBM program systems representatives quickly locate failures in the access method. This manual contains program organization information consisting of control flow diagrams and module synopses and module directory, that is a cross reference table that lists every ACF/VTAM Module, its phase name, entry point, and the numbers of the MO diagrams in which it appears.

Manual, 8 1/2 x 11 inches, 4/79  
 SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3025

ACF/VTAM MSNF ENCRYPT/DECRYPT FEATURE RELEASE 2

This manual describes the logic of the Encrypt/Decrypt Feature of the Advanced Communications Function for the Virtual Telecommunications Access Method (ACF/VTAM). This feature can be used in the OS/VS1 and OS/VS2 MVS versions of ACF/VTAM and can be used with or without the Multisystem Networking Facility of ACF/VTAM.

This manual supplements ACF/VTAM Diagnosis Reference

(OS), LY38-3027, which is a prerequisite to this manual.

This manual is intended primarily to help IBM program support representatives to locate failures in the Encrypt/Decrypt Feature code.

Manual, 8 1/2 x 11 inches, 80 pages, 9/80

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3026

ACF/VTAM DATA AREAS (CURRENT RELEASE)

This manual is intended for maintenance personnel to diagnose or maintain ACF/VTAM Release 2 installed on a DOS/VSE operating system. The control blocks described are used to map areas of ACF/VTAM Release 2. This manual should be used in conjunction with the Logic Overview and Base System Logic manuals for the appropriate operating system (DOS/VSE).

Manual, 8 1/2 x 11 inches, 550 pages, 3/79

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3027

DIAGNOSIS REFERENCE ACF/VTAM MSNF ENCRYPT/DECRYPT FEATURE (CURRENT RELEASE)

For ACF/VTAM Release 3, this manual replaces the following manuals: ACF/VTAM Logic: Base System, Volume 1 (LT78-3027-0); ACF/VTAM Logic: Base System, Volume 2 (LY38-3032-0); ACF/VTAM Logic Overview (LT78-3021-1); ACF/VTAM Control Block Overview (LX27-0013-0).

The manual contains a description of ACF/VTAM logic, control blocks, and components. It also contains control flows and method-of-operation diagrams (HIPOs and module flow diagrams).

A program systems representative should use this manual in conjunction with the Diagnosis Guide to determine the failing function and module of the access method. The Diagnosis Reference does not support problem determination below the module level.

Manual, 8 1/2 x 11 inches, 1200 pages, 9/80

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## SY38-3029

DIAGNOSTIC TECHNIQUES ACF/VTAM MSNF ENCRYPT/DECRYPT FEATURE

This publication describes an approach to diagnosing ACF/VTAM problems and presents guidelines, tools, and information needed by program support representatives and system programmers to maintain system and application programs that use ACF/VTAM. The primary purposes of this publication are to:

- Provide information to enable the reader to use ACF/VTAM diagnostic facilities
- Summarize operating system serviceability aids described in other publications

Prerequisite publications for this manual are ACF/VTAM General Information: Concepts, and ACF/VTAM Installation.

Manual, 8 1/2 x 11 inches, 512 pages, 10/82

////5735-RC2

## LY38-3030

ACF/VTAM, LIC PROG 5735-RC2, DATA AREAS

This manual contains diagrams and information about data areas used by ACF/VTAM under OS/VS. A prerequisite publication is ACF/VTAM General Information Concepts, GC27-0463.

Manual, 8 1/2 x 11 inches, 800 pages, 9/80

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3032

LOGIC ACF/VTAM BASE SYSTEM VOLUME 2 PROGRAM ORGANIZATION AND MODULE DIRECTORY RELEASE 2

This manual is the third part of a three part description of

the logic of ACF/VTAM for OS/VS1 and OS/VS2 MVS. Part one is the manual ACF/VTAM Logic: Overview and part two is the manual ACF/VTAM Logic: Base System Volume 1, method of Operations.

The manuals are intended to help IBM program systems representatives locate failures in the access method. This manual contains descriptions of the modules, control flow diagrams, and a list of the modules, description names, and their load of object modules.

Manual, 8 1/2 x 11 inches, 512 pages, 9/79

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3033

LOGIC VM/VTAM VM/VCNA

This manual describes the internal logic of the Virtual Machine VTAM Communications Network Application program product. It is intended for IBM program support representatives and customer personnel who diagnose VM/VCNA problems. This publication includes six sections: a logic overview, module flows showing flow of control and explanation of processing, module synopsis. A module directory data areas, and diagnostic techniques.

Manual, 8 1/2 x 11 inches, 380 pages, 2/82

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3051

SUPPLEMENT TO OS/VS BTAM LOGIC FOR THE BTAM/SYSTEM PRODUCT, LIC PROG 5665-279

The Supplement to OS/VS BTAM Logic for the BTAM/System Product describes changes made to the internal structure of OS/VS BTAM for BTAM/SP.

The manual, intended primarily for OS/VS BTAM users who have encountered problems after migrating to BTAM/SP, includes logic charts for each changed OS/VS BTAM routine and briefly describes BTAM/SP concepts and operating environments. In addition, it explains how to use the supplement in conjunction with the OS/VS BTAM Logic manual and the OS/VS2 BTAM Charts manual for OS/VS2 Release 3.8.

Manual, 8 1/2 x 11 inches, 100 pages, 5/82

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3053

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM VERSION 2 DIAGNOSIS REFERENCE, 5665-280, LOGIC

This publication describes the logic of the Advanced Communications Function for the Virtual Telecommunications Access Method (VTAM) Version 2, Release 1. It is intended for systems programmers who need to analyze a VTAM problem, classify it as a specific type of failure, and describe this failure to a Support Center. It also describes how to classify it as a specific type of failure, and describe this failure to a Support Center.

Manual, 8 1/2 x 11 inches, 1650 pages, 6/85

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

## LY38-3054

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM DATA AREAS, 5665-280(MVS), 5662-280(OS/VS1), VERSION 2, LOGIC

This publication describes the data areas used by ACF/VTAM Version 2, Release 2, for program number 5665-280 (MVS). for program support representatives and customer customer personnel who are diagnosing problems with ACF/VTAM. This publication contains data maps of all data areas used by ACF/VTAM. The data maps are divided into four parts for each ACF/VTAM data area.

Manual, 8 1/2 x 11 inches, 756 pages, 1/84

SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY38-3055

ADVANCED COMMUNICATION FUNCTION FOR VTAM,  
5662-280, 5665-280, LOGIC ENCRYPT/DECRYPT FEATURE

This publication should be read by systems programmers and field engineers who perform diagnosis tasks involving VTAM with the Encrypt/Decrypt Feature. The publication contains sections on Overview of the Encrypt/Decrypt Feature, Module Flow Diagrams, Module Synopses, and Module Directory. Manual, 8 1/2 x 11 inches, 43 pages, 7/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY38-3058

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM VERSION 2 VSE  
DIAGNOSIS REFERENCE

This publication applies to the Advanced Communication Functions for VTAM (VTAM) Version 2, operating under the VSE operating system, 5666-280. It is intended for a system programmer who needs to analyze a VTAM problem, classify the problem as a specific type of failure, and describe the failure to a Support Center. It describes the logic of the Advanced Communications Function for the Virtual Telecommunications Access Method (VTAM) Version 2, Release 1. Manual, 8 1/2 x 11 inches, 1600 pages, 10/85  
SLSS: IBM INTERNAL SUBSCRIPTION ONLY

LY38-3059

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM VERSION DATA  
AREAS (CURRENT RELEASE)

This manual contains maps of the data areas used by ACF/VTAM in the VSE operating system. It is intended to help IBM program support representatives and customer personnel read dumps when diagnosing problems with ACF/VTAM.

The maps contain four parts. The first is a header that describes the data area, indicates its location, and lists any imbedded data areas. Second is a table that shows the offset of each field and briefly describes its function. Third is a cross-reference, which lists all the fields in alphanumeric order and their hexadecimal displacements. Fourth is a list of constant values, if any, for fields in the data area. Manual, 8 1/2 x 11 inches, 650 pages, 12/82

G120-1816

IBM SYSTEM LIBRARY SUBSCRIPTION SERVICE - FORM

This form is used to subscribe to the System Library Subscription Service (SLSS) for automatic delivery of IBM publications directly to a customer's mailing address (or addresses).

The form has places to indicate the exact type of service required, the major system, and whether communications (teleprocessing) is involved, subjects of interest, program numbers, and machine components. An initial library will be received or not, depending on an indication made on the form.

For aid in determining the kinds of publications available under SLSS (mainly, those required to plan for, program, install, operate and maintain an IBM data processing or information system), consult the bibliography for the system of interest. The order number for that system bibliography can be found in the IBM Marketing Publications KWIC Index, 6320-1621.

Subscription to SLSS can be made by interest profile or by specific order numbers, or both. In either case, the update service is automatic. In the case of subscription by profile, new manuals are auto-shipped.

Bibliographies for systems marketed by DPD show the SLSS profile for each manual, as used in the profile matching process.

For IBM internal subscriptions, publications with Z or L use keys are also shipped. For customer subscriptions, such items are not made available under SLSS.

For a further description of SLSS and the use of this form, see "Entering an SLSS Subscription", 6320-1561. Customer authorization for this optional service, billing, etc., are detailed in the Branch Office Manual, page 16-0501 and following pages.

## G320-0362

CACHE RMF REPORTER, 5798-DQD, RELEASE NOTICE

The Cache RMF Reporter is an automatic data collection and batch reporting tool. It consists of a user exit to the Resource Measurement Facility (RMF) and a Post Processor Report Program.  
 The reports provide 3880 Models 11, 13, 21 and 23 statistics which are useful in system tuning.

With this program, installed cache users may monitor cache performance and relate it to other system events. By accessing the subsystem counters in the cache control units, it provides, through a batch reporting program, hit ratios and read-to-write ratios. This information, in conjunction with RMF data about other devices in the I/O subsystem, provides a means of tuning the cache data set placement and balancing the overall subsystem.

IUP 5796-PBD - NOTICE

This notice is intended to inform the potential user about the program and that it has been released. The 3270 Formatting Feature is an expansion of the Batch Terminal Simulator IUP (5796-PBD); which is described in Availability Notice 6320-1523. BTS allows IMS batch, batch message and message processing programs to be tested without having teleprocessing hardware installed. The addition of the 3270 Formatting Feature provides the ability to test applications using the IMS Message Formatting Service (MFS) without the use of 3270 hardware. This means that development of new online applications, or conversion of batch programs for online use, can proceed while still in the batch only test/development mode.

TEST DATA GENERATOR FOR S/370, IUP 5796-PBP, NOTICE

This notice is designed to inform potential users about the program and that it has been released.

Test Data Generator constructs data used in testing an application program. The user describes the characteristics of the data and supplies the "seed" for a random number generator; the program constructs test files containing randomly generated data and optionally gives the user a data for testing the logic of application programs should provide savings by not having to prepare test data manually, thus reducing programming time and eliminating the heavy volume of keypunching normally required to establish test files. It should also provide less biased data for the actual test. Frequently, it can eliminate or postpone the writing and testing of data file load programs.

Release Notice, 16 pages  
 ///5796-PBP

6320-1535

DB PROTOTYPE/VS - IUP 5796-PCX, RELEASE NOTICE

DBPROTOTYPE/VS is a design evaluation tool which enables the IMS/VS user to create model data bases and skeletal application programs to run against these data bases. By analyzing the performance data obtained from successive runs utilizing different design parameters, the user can select the system design best suited to his needs.

The value of this prototype approach to design is that it enables the user to study the effects of various design alternatives prior to expending resources in implementation. Programming for new or changing applications and data bases can follow with a higher level of confidence for success without costly rework caused by poor design.

DBPROTOTYPE/VS operates with IMS/VS. It extends the capabilities of DBPROTOTYPE (IUP 5796-PBB) to support IMS/VS features and incorporates improvements in the existing functions of DBPROTOTYPE. DBPROTOTYPE is prerequisite for DBPROTOTYPE/VS.

6320-1538

IMSMAP/VS - IUP 5796-PCY, RELEASE NOTICE

The Installed User Program IMSMAP/VS is a documentation aid which produces pictorial representations of data base structures. These maps, which are produced on a line printer, graphically represent the many characteristics of an IMS/VS data base. In addition to producing maps, IMSMAP/VS can

print a detailed report describing the characteristics of each data description (DBD).

IMSMAP/VS is an extension of the currently available IUP, IMSMAP (5796-PBC). IMSMAP is a prerequisite for IMSMAP/VS. IMSMAP/VS provides both support for IMS/VS data bases and additional features not available in the original IMSMAP IUP.

INTERACTIVE QUERY & REPORT PROCESSOR (IQRP), IUP 5796-PDG, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

The Interactive Query and Report Processor (IQRP) enables the end user to interact, from a terminal, directly with files of interest to him using a free form set of commands which can be easy to learn. IBM experience with predecessor systems indicates that providing this type of query and reporting facility to the end user potentially constitutes a significant productivity enhancement and can permit a wide variety of applications to be implemented without traditional programming.

The key to IQRP's value in permitting the end user to generate interactively his own applications is a simple, flexible, non-procedural, powerful set of commands. Use of IQRP predecessor systems within IBM has demonstrated that clerks, managers, administrative personnel, technical staff and production workers can quickly learn to use the IQRP query terms.

MARKETING PUBLICATIONS KWIC INDEX (USA)

This catalog indexes the titles and lists the prices of customer publications, including all those for system libraries and many other marketing publications, such as application briefs, educational and promotional literature, cassettes, videotapes, periodicals and photographs.

All titles are KWIC (keyword in context) titles. KWIC is an abbreviating retrieval system in which titles are expressed in no more than 30 characters and each such title is indexed under each practical keyword.

Among such keywords is #SUP, which creates a numerically sorted listing of all System Library Supplements (applying to Selectable Units and certain licensed programs) released before the edition date.

Conversely, Supplements applying to a given base number and edition may be found under that base number, where it appears in the title index as a keyword.

Similarly, those requiring the pseudonumbers for specific back editions (supporting prior releases of programs) will find them listed in the title index under the actual base order number.

Materials for the maintenance of IBM products are in the Customer Engineering KWIC Index, 6Y20-0073. Index, 388 pages, 2/83

AUTOMATED UNIT TEST, IUP 5796-PEB, 5796-PEC, NOTICE  
This document contains information about use of Automated Unit Test (AUT), a productivity aid which can be used by a programmer to drive test cases through a unit of code for internal interface testing, monitor execution of the test cases, verify whether the tests were successful, and provide diagnostic information about discrepancies. Because it also provides the capability to simulate uncoded or uncompleted units of code or entire modules while driving the test cases, AUT promotes the use of top-down design or development - a technique used by many to help improve the quality and reliability of code.  
Release notice, 8 pages, 9/75

6320-5539

VS/REPACK, IUP 5796-PDZ, NOTICE  
This document contains information about use of the VS/REPACK Installed User Program (5796-PDZ), a tool to help in improving the performance of individual user programs running in a virtual storage environment. In particular, VS/REPACK provides facilities for recording, displaying, and analyzing virtual storage reference data which can enable the user to reduce program working set size in order to decrease overall system paging. The VS/REPACK developers have used these facilities to reduce the paging rate of specific applications in their installation in the range of one-half to two-thirds. The improvements that can be obtained using VS/REPACK may vary widely depending upon the nature of the application and the system environment.  
HIGHLIGHTS

The VS/REPACK system can assist the programmer in:

- o Reordering the CSECTs for improved program performance
- o Reducing the wasted space
- o Interactive testing of assumptions without recording, relinking or rerunning
- o Graphically displaying program activity
- o Debugging program logic errors related to abnormal sequencing of storage references
- o Confining a program's address space references to fewer pages for extended periods of time

## SYSTEM DESCRIPTION

The VS/REPACK Installed User Program (5796-PDZ) is a program developed and structuring aid used for analysis of a program's execution in a virtual storage environment. The use of VS/REPACK involves two separate procedures that are used in conjunction with each other to analyze how to improve performance: The Trace session and The Analysis session.  
Release notice, 4 pages, 1/76

6320-5541

ASSEMBLER H/CMS INTERFACE, IUP 5796-PEJ, NOTICE  
This document contains information about use of the Assembler H/CMS Interface Installed User Program, which

enables VM/370 users to install and execute OS Assembler H under CMS. After installation is completed, a simple command, HASM, is used to invoke Assembler H to assemble user specified files. A set of options available with the HASM command provides the CMS user with the same options as Assembler H under OS.

## HIGHLIGHTS

- o Provides an interface to OS Assembler H under VM/370.
- o Enables VM/370 CMS users to benefit from Assembler H performance improvement and language extensions.
- o Uses a simple CMS command to invoke Assembler H.
- o Provides for assembly time options with the CMS command.
- o Enables source program input from CMS files, OS data sets, or OS partitioned data sets.
- o Permits programs written for Assembler F and the OS/VS Assembler to be assembled with Assembler H.  
Release Notice, 4 pages, 10/75

6320-5542

RCA TDOS ASSEMBLER TO OS/VS ASSEMBLER CONVERSION AID, IUP 5796-PEX, NOTICE

This document informs potential customers about the use of the RCA TDOS Assembler to OS/VS Assembler Conversion Aid. This aid converts RCA TDOS Assembler programs to OS/VS executable modules with a minimum of source statement changes. The conversion aid uses RCA assembler language source code as input and, with nominal additions directly produces an executable OS/VS assembler program eliminating many errors resulting from manual changes. It minimizes the amount of application knowledge required of the conversion programmer. An auxiliary module, included with the aid, is required until future conversion to native OS/VS mode.

The conversion aid consists of two assembler language programs and a macro library. One of these programs is for correcting minor syntactical differences between the two assembler languages. The other program is an auxiliary module with multiple entry points that works in conjunction with the expansion of the macros included in the conversion aid. The macro library consists of macros that were written to accept the RCA/DOS syntactical format and expand either to their direct OS MACRO equivalent or to a branch and link to the auxiliary routine necessary to provide the RCA/TDOS function.

ISAM TO DL/I COBOL TRANSLATOR, IUP 5796-PFB, -PFC, NOTICE  
This document contains information on use of the ISAM-to-DL/I COBOL Program Translator Installed User Program, which assists the user in his conversion from ISAM files to integrated data-base management under DL/I. The Translator converts COBOL source programs that use ISAM into exactly equivalent COBOL programs that use DL/I to access the same data. At the same time the Translator detects and diagnoses unusual programming techniques (if any) that may require revision to operate in an integrated data base environment. The Translator provides a complete audit listing of this conversion, or, if the user chooses, an exceptions-only listing at either of two levels of detail.

6320-5653

TSO/CODES UPDATE SYSTEM, IUP 5796-PFR NOTICE

This document contains information on use of the TSO/Codes Update System Installed User Program, a productivity aid which can be used by a TSO System Administrator to automatically create unique passwords for TSO users. It can eliminate manual updating of the passwords and help increase the security and manageability of the TSO password facilities. Because the TSO/Codes Update System uses both the Julian date and the time of day as input to its randomizing routines, the same series of passwords should not be reproduced within a 100-year cycle, and likely will never be reproduced.

The TSO/Codes Update System is designed to be used with "snap-out" form-type mailers, which are readily available from various forms vendors. The program prints the new password, name and address, and any user message on the cover sheet of the special form. This cover sheet is removed and held as the master listing and is used for the auditing process. The new password and message are printed only on the cover sheet and on the inside part of the form. This is accomplished by the arrangement of carbons within the mailer envelope. The new password is visible only when it is separated from the envelope portion of the multipart form. The use of these forms can reduce the amount of handling, helping to increase security, and, potentially, decreasing maintenance costs.

Release Notice, 6 pages, 1/76

6320-5660

DL/I HDAM DATA BASE TUNING AID, IUP 5796-AKF, NOTICE

This document contains information on use of the HDAM Reorganization Utility for DL/I DOS/VIS.

The DL/I DOS/VIS user generally has the choice of two access methods, HIDAM and HDAM, for implementing online and performance-oriented systems. The potential performance advantages of HDAM make it an attractive alternative to HIDAM. If the application requirements can be met by HDAM, the user should consider it over HIDAM when selecting an access method. The HDAM Reorganization Utility was developed at General Reinsurance Corporation in order to use HDAM more effectively. Its purpose is to predict and tune HDAM performance during systems design, and to maintain that performance with an optimum reorganization procedure after implementation. Highlights:

- o Analyzes HDAM performance during system design
- o Calculates average number of I/Os to access root segments randomly
- o Requires only one control card to specify randomizer name and DBDGEN performance parameters
- o Provides a reorganization procedure that enhances performance by loading synonyms last
- o Eases conversion to HDAM from HISAM and HIDAM

Release Notice, 4 pages, 1/76

////5796-PGB

6320-5675

GTF SUPERVISOR SERVICES ANALYZER, IUP 5796-PGE, NOTICE

This document describes for potential customers use of the GTF Supervisor Services Analyzer Program, (GTFSSVC).

This internally developed program is designed to aid the systems programmer in analyzing and improving the performance of the computer system. The GTFSSVC Program can prove valuable as a tool for identifying performance bottlenecks in the key jobs of an installation. These jobs are frequently the online DB/DC system or critical-path batch production work where performance is essential.

The objective of the GTFSSVC program is to identify those jobs and program modules that are the heaviest users of supervisor services (for example, EXCP, GETMAIN, Overlay Supervision). The execution of many of these system-provided services is both time-consuming and serial creating bottlenecks with resultant performance degradation.

The Generalized Trace Facility (GTF) component of the user's system control program provides detailed data on a variety of events occurring in a system, including supervisor calls. The GTFSSVC program accomplishes its objective by extracting and summarizing GTF trace records into a useful and manageable format.

DOS/VS PERFORMANCE TOOL, IUP 5796-PGK, NOTICE

DOS/VSPT is a software monitor that measures the performance of an existing IBM system operating under DOS/VS. It uses both statistical sampling and event tracing to record system status on an output data file. This data is used later to produce a series of reports on both hardware and software performance during selected time intervals.

HIGHLIGHTS

- o Reporting includes:
  - CPU utilization
  - Real main storage occupancy and paging
  - Channel utilization and overlap with the CPU
  - Device utilization and queueing
  - DASD seek analysis
- o Analysis by partition includes:
  - Deactivation
  - Real main storage occupancy
  - DASD seek analysis

VS1 PERFORMANCE TOOL, IUP 5796-PGL, RELEASE NOTICE

VS1PT is a software monitor that measures the performance of a system running OS/VS1. It uses periodic statistical sampling, dynamic event tracing and event counting to record selected system status information. At requested intervals, the accumulated information is placed in a monitor output data set which can be DASD or magnetic tape. A database utility is also provided to allow the user to select and combine monitor output. Subsequently, plots, detailed report, seek analysis, and load module usage reports can be generated from the monitor or database utility files. These reports can be used to evaluate overall performance or to analyze in detail specific areas of concern.

DISKETTE SORT PROGRAM, IUP 5796-PGJ, NOTICE

This document contains information on use of the Diskette Sort Installed User Program which enables users of the IBM DOS/VS Sort/Merge Program, 5746-SM1, to sort diskette files without first having to copy them onto tape or disk.

Highlights:

- o It provides a generalized Sort/Merge E15 exit routine to DOS/VS diskette users.
- o It provides improved performance to those sort users that need to sort diskette files, since the copying pass from diskette to tape or disk is no longer required.
- o It will dynamically determine the record length of the diskette records to be sorted.
- o The programming symbolic unit number used in conjunction with this program is determined at installation time and can be chosen such that no conflicts occur with the particular installation's standards.

Release Notice, 4 pages, 5/76

BATCH TERMINAL SIMULATOR II, IUP 5796-PGT, NOTICE

This document contains information on use of Batch Terminal Simulator II (BTS II), a Productivity Aid for Application Program Testing under IMS/VS Version 1.1.1 and subsequent releases. BTS II is a terminal simulator that allows online IMS/VS application programs to be tested in an IMS/VS batch environment without the use of teleprocessing hardware. Extensive debugging facilities enable the BTS II user to

test batch applications as well as those intended to run in a teleprocessing environment. BTS II supplies information about each transaction or message as it progresses through the IMS/VS system. It provides IMS/VS users with a comprehensive means of checking and debugging:

- o application program logic
- o IMS/VS interfaces
- o teleprocessing activity
- o 3270 format control blocks
- o data base activity

BTS II is a new product based upon BTS/VS with the 3270 Formatting Feature and released with an extended support period and significant enhancements. It is fully upward-compatible with BTS/VS and the 3270 Formatting Feature. Release Notice, 6 pages, 5/76

## G320-5714

SMF JOB DATA COMPRESSION AID IUP 5796-PHN, STORAGE DEVICE MIGRATION AID IUP 5796-PHP, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

The Job Data Compression Aid (JDCA) IUP (5796-PPN) and its companion, the Storage Device Migration Aid (SDMA) IUP, (5796-PHP) are tools designed to help OS or OS/VS installations manage their tape, DASD, and Mass Storage System (MSS) configurations.

JDCA produces a base file of edited and reduced System Management Facilities (SMF) data. This base file can be used by SDMA. Consequently, JDCA is a prerequisite for SDMA. But, the JDCA base file data can also be rearranged by sorting and including in detailed or summary reports by IBM personnel using IBM Marketing Aid 1 (MA/1) or by user written applications. In this latter case, JDCA can simplify the task of processing SMF's variable length records.

JDCA provides a number of useful options for controlling the data included in the base file. It also provides Summary reports for estimating the validity of the SMF data processed. JDCA can process SMF data from up to 9 OS or OS/VS systems.

The Storage Device Migration Aid (SDMA) IUP generates a series of reports from the base file created by the Job Data Compression Aid (JDCA) IUP (5796-PHN). These reports include information about data sets and jobs. The information in the reports can be custom tailored by use of one or more filters. The filters enable the installation to study the specific data sets and jobs of interest.

JDCA and SDMA are designed to simplify migration to a new I/O configuration but they can also be used for other purposes. They can help you and your customer:

- o Detect the need for I/O configuration upgrades
- o Determine the changes to be made
- o Plan migration to the new configuration
- o Monitor the progress of migration
- o Estimate the date of the next I/O configuration upgrade
- o Monitor compliance with installation standards
- o Improve system performance by optimizing data set

placement and characteristics  
 JDCA and SDMA, if used together, provide the customer with many of the functions supported by IBM Marketing Aid 1 (MA/1). In addition, new reports are included that simplify detailed migration planning.

Users of these IUPs will be able to keep all of the reports produced and use them freely for their own purposes. These IUPs will enable your customer to get involved with I/O configuration studies at an early date and assume the primary responsibility for processing the data and analyzing results.

## G320-5727

GIS & GIS/VS LIBRARY MAINTENANCE PROGRAM, LIC PROG 5796-ANG, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

The GIS and GIS/VS Library Maintenance Program Installed User Program 5796-ANG, aids an installation in the management of its GIS library data sets.

Many GIS and GIS/VS users have found that maintenance of their GIS.LIB data set presents difficulties. The directory of this partitioned data set often gets filled or an excessive number of members use the space allocated to the data set thus causing systems termination. Many of the members and directory entries are unnecessary, because GIS.LIB modules from multi-step jobs remain on the library when an earlier step fails to complete. Others were once intentionally saved but were not deleted when their counterpart GIS.ILS members were deleted.

The job of cleaning up this PDS is further compounded by the problem of identifying from whom or for what reason the members have been kept. The purpose of this self-scheduling IUP is to automate the determination and deletion of GIS

library and directory entries which are no longer valid. The program prepares a listing indicating which members of GIS.LIB are to be retained and which members are marked for deletion. This provides an audit trail prior to the execution of IEBCOPY to reorganize and to compress GIS.LIB. Release notice, 4 pgs, 3/77  
 ///5796-ANG

6320-5729

FORTRAN INTERACTIVE SUBROUTINE LIBRARY, IUP 5796-PHT, NOTICE  
 The FORTRAN Interactive Subroutine LIBRARY (FISLIB) consists of a set of FORTRAN callable subroutines which can be used by a FORTRAN programmer to give more flexibility to interactive FORTRAN programs. FISLIB is used where the interaction of human decision making ability with the computer program is essential to permit users to choose between alternatives at key points during program execution. The interactive program produced can be run under: VM/CMS; any of the TSO options - OS/MVT, OS/SVS or OS/MVS; VS/PC FORTRAN; or DOS FORTRAN F utilizing the operating console.

The subroutines written in FORTRAN are designed to be system independent. They provide a simplified method of allowing the terminal program user to: specify program functions to be executed; specify parameters to be varied, reset or incremented; use a comprehensive desk calculator mode for intermediate computations; create procedures, a series of commands, executable by procedure name. Release notice, 4 pgs, 2/77

6320-5742

MASS STORAGE CONTROL TABLE MAINTENANCE, IUP 5796-PHY, NOTICE  
 Proper operation of the IBM 3850 MSS is possible only if data in the MSC's Table Data Sets is valid. The purpose of the Mass Storage Control Table Maintenance Installed User Program is to help the system programmers maintain this important data set. The program provides an interactive conversational approach for maintenance of the MSC Table Data Sets. It can substantially reduce the time required to perform system programmer and operator functions including queries regarding operational status, problem diagnosis and performance of corrective actions.

The Mass Storage Control Table Maintenance Program executes under TSO or with a TCAM interface. It can be used from the operators console to query status of the system via MSC table analysis. It can also be used in a Display Only mode or for Display and Update. All actions taken and associated output are logged to provide an audit trail. Flyer, 8 1/2 x 11 inches, 4 pgs, 3/77  
 ///5796-PHY

6320-5746

TSO/MSS ARCHIVER, 5796-AJK, NOTICE  
 TSO users tend to need more and more space for storing their permanent data as time progresses. On the other hand, at any particular point in time, they are working with a relatively small subset of this data. In other words, the data falls into one of two categories: active or inactive. These categories may be thought of as hierarchies of storage: Level 1 (active) and Level 2 (inactive).

When specifying the media for storing these two hierarchies, a TSO user has traditionally used real DASD for both levels. Some have used tape for Level 2 but waiting for tapes to be retrieved and mounted is non-productive and costly. Furthermore, no systematic way of transferring data between the levels was supported by IBM.

IBM's new 3850 Mass Storage System has created an opportunity to significantly reduce the time needed to retrieve and mount tape data sets. And, the TSO/MSS Archiver IUP bridges the gap between TSO and the MSS by providing the TSO user with a systematic way of keeping his

inactive Level 2 data on MSS cartridges and retrieving that data from Level 2 with minimal delays. The TSO user and his installation, therefore, benefit from the lower storage costs inherent in the 3850 MSS. The installation savings can help justify 3850 MSS. Release Notice

6320-5754

DBPROTOTYPEII RELEASE II, IUP 5796-PJK, NOTICE  
 The DBPROTOTYPEII Release 2 IUP provides a powerful and flexible tool for IMS/VS data base design and evaluation. The analytic tools of DBPROTOTYPE II estimate the disk space, CPU time, and I/O time required by an IMS/VS application program. The simulation tools enable the data base designer to create model data bases of skeletal application programs to run against these data bases. Major enhancements for release 2 include an analytical tool, DBCAP, for estimating the CPU time and I/O time required by DL/I calls of an IMS/VS application program.

This IUP was written using PL/I and uses the standard features of the operating system OS/VS1 or OS/VS2 and of the IMS/VS data base system. It is designed to operate with IMS/VS version 1.0.1, 1.1.1, 1.1.2, 1.1.3, or 1.1.4. It is offered with extended support. Release notice, 8 1/2 x 11 inches, 12 pgs, 5/77

6320-5762

DISPLAY ORIENTED EDITING SYSTEM: IUP 5796-PJP, NOTICE  
 The Display Oriented Editing System IUP is a full-screen editing system for Virtual Machine/Conversational Monitor System (VM/CMS) files, designed to utilize the features of display terminals on either a local or remote basis. In addition to a comprehensive array of cursor and command oriented data manipulation functions, this editing system has direct usability in a wide range of user applications.

This IUP was written for assembly by the Assembler H Language Program Product (5734-ASI) and is designed to operate with Virtual Machine Facility/370 Conversational Monitor System (VM/370 CMS). It was developed under VM/370 CMS release 3 and is not expected to be release dependent. Release Notice, 8 1/2 x 11 inches, 6 pgs, 9/77

OS/VS1 NETWORKING NODE TO MVS SVS AND VS1 - HOST NODE REMOTE ENTRY SYSTEM, IUP 5796-PJY, NOTICE (CURRENT RELEASE)

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This document announces release of the Host Remote Node Entry System, Installed User Program (5796-PJY), which provides the capability of making a VS1 system a remote job entry station to any OS/VS2 MVS/JES2 or SVS/HASP system or another OS/VS1 system. (In an OS/VS1 to OS/VS1 configuration, HRNES could be installed on both CPUs, but is not required.) This program, running in a VS1 partition will do the following; automatically sign on to MVS/JES2 or SVS/HASP, SCAN the specified VS1 input queues and send all jobs found there to MVS/JES2 or SVS/HASP for execution, receive all output from MVS/JES2 or SVS/HASP and will disperse it to the originator at either a local printer/punch or to an RJE printer/punch, provide all MVS/JES2 RJE commands to the VS1 operator, allow sign-off from the VS1 console.

Release Notice, 8 1/2 x 11 inches, 4 pages, 1/78

LIBRARY PRINT PROGRAM FOR VSPC, LIC PROG 5785-EAA, NOTICE

The VSPC Library Print Program, Installed User Program 5785-EAA, provides the VSPC chief administrator with an easy aid to list all enrolled users and their profiles, and to list all file profiles currently in the VSPC library. These are read from either the VSPC directory (SYSLDIR) on disk or a backup tape created by the VSPC Service Program. Output consists of four reports:

- . List of users and their profile attributes
- . List of users' files and their attributes
- . List of users' accumulated accounting information
- . List of System, Foreground Processor, and Auxiliary Processor profiles

Release Notice, 8 1/2 x 11 inches, 6 pages, 1/78

IMS/VS ONLINE DATA MANAGEMENT UTILITY, IUP 5796-AQZ, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This document announces release of the IMS/VS Online Data Management Utility, developed by Blue Cross Hospital Service of Missouri, Inc., an IMS/VS transaction which provides the facility for catalog and DASD management. The terminal user may display catalog, Volume Table of Contents (VTOC) and directory information for a data set; catalog, uncatalog, and scratch datasets; display, rename, or scratch a Partitioned Data Set (PDS) member; rename a DASD data set; send messages to the OS/VS console; and maintain OS/VS catalog indexes. This aid provides a productivity tool for application development programmers and system programmers with interactive facilities not previously available under IMS/VS. It has proven to be useful to operations personnel when restarting systems which have failed.

Release Notice, 8 1/2 x 11 inches, 4 pages, 1/78

G320-5823

3741 REPORT GENERATOR, IUP 5796-ARC, NOTICE

The 3741 Report Generator, Installed User Program 5796-ARC, developed by American Can Company of Greenwich, Connecticut, provides a high level language capable of generating reports on the 3741 model 2 and 4. Present data stored on diskettes can be summarized, totaled, or abstracted. The 3741 user now is able to quickly and easily create meaningful reports in response to management requests. The 3741 Report Generator, was developed by American Can Company to provide 3741 locations the ability to utilize existing data and resources in a more productive manner.

The 3741 Report Generator improves the utilization of the 3741 by providing a language which does not require detailed data processing knowledge. The fill-in-the-form approach to programming simplifies report creation. Once a report is created the 3741 Report Generator saves it in a library of programs. Programs thus stored may be executed at any time without recompiling.

Release Notice, 8 1/2 x 11 inches, 4 pages, 1/78  
////5796-ARC

G320-5824

GENERAL CROSS ASSEMBLER GENERATOR, IUP 5796-PKD, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This document announces release of the Cross Assembler Generator, a system of programs designed to dramatically reduce the time and cost to create basic program assemblers for a wide variety of computer architecture. The entire system is implemented in APL.

A cross-assembler which runs on one computer to assemble code for another computer. The first computer is called the "host computer", and the second is called the "target computer." The Cross Assembler Generator takes advantage of the fact that only 25-30% of an assembler is dependent on the design of the target computer. If the host computer is held constant, then only target computer dependencies need be changed to vary from one assembler to another. Furthermore, the portion of the assembler that is changed has a high degree of regularity and usually can be generated from only one or two pages of descriptive material.

Systems integrators will find this particularly attractive since they can debug machine language programs for hardware before they actually take delivery. This will

reduce dependence on the supplier's delivery schedule. Colleges and universities can use the Cross Assembler Generator in both practical laboratory work and in classrooms as a teaching tool.

The manufacturers can use the Cross Assembler Generator for preliminary programming and thus reduce cost and time in programming support. In addition, these manufacturers can also more cheaply support experimental process or design.

Time sharing vendors and in-house time sharing systems will find this of use to existing users as well as a means of attracting smaller hardware integration to their time sharing services.

#### Highlights

- Provides end users capability to rapidly define computer assembler
  - Can run in any VSAPL, APLSV environment
  - Users need not know APL
- Prompting module to lead user through assembler definition
- Core patching capability

Release Notice, 8 1/2 x 11 inches, 6 pages, 1/78

##### DALLAS SYSTEMS CENTER TECHNICAL BULLETIN - ADVANCED COMMUNICATIONS FUNCTION (ACF) NETWORK CONTROL PROGRAM (NCP) USER CODE

An attachment facility for user coding is provided in ACF/NCP/VS Release 2 and later releases. The NCP user facility allows separate program products, such as the Network Terminal Option (NTO), Network Expansion Facility (NEF), and the X.25 NCP Packet Switching Interface to be coresident in an NCP.

Manual, 8 1/2 x 11 inches, 80 pages, 2/82

#### G320-5855

##### DALLAS SYSTEMS CENTER RUNNING JOB ENTRY SUB-SYSTEM 2/NETWORK JOB ENTRY (JES2/NJE) ON AN ADVANCED COMMUNICATIONS FUNCTION/VIRTUAL TELECOMMUNICATIONS ACCESS METHOD (ACF/VTAM) NETWORK

Advanced Communications Function/Virtual Telecommunications Access Method (ACF/VTAM), a communication network, provides several advantages over a Bisync/Channel-to-Channel (BSC/CTC) network when running Job Entry Sub-System/Network Job Entry (JES/NJE), a batch networking application that transmits data within a Central Processing Unit (CPU) and between several CPUs. This report describes how several problems, such as excess use of CPU time, were alleviated by converting from BSC/CTC to ACF/VTAM.

Although the report centers on JES2/NJE, and its use at IBM's Santa Teresa Laboratory, in San Jose, the ideas discussed can be applied to other applications that require transfer of data between CPUs. The author assumes the reader has some knowledge of JES2/NJE. The appendix provides "how to" information for installing the communication function between JES2/NJE and ACF/VTAM. This information will be particularly useful to readers running JES2/NJE for networking.

##### NATIONAL SYSTEMS CENTER: ADF USAGE GUIDELINES

The purpose of this bulletin is to make comments and recommendations on the use of ADF on development projects, to examine the characteristics of development projects that used ADF successfully, to identify and appraise areas that are of importance when ADF is chosen as the application generator, and to document Application Development Facility (ADF) project experiences of many IBM Data Processing (DP) personnel.

It is not the intent of this bulletin to produce an absolute predictor or formula for the specific use or non-use of ADF on a particular project. The objective of using ADF is to reduce the time, cost, and risk when developing and maintaining Information Management System/Virtual Storage applications. It is assumed that the reader is familiar with the ADF product, at least at the General Information Manual level (GB21-9869).

NSC: CICS/VIS DIRECTION AND STRATEGY

This article describes the characteristics of CICS/VIS in the current product environment and in relation to industry trends in data processing. The part played by these considerations in determining the future strategic direction for the product is discussed and exemplified by an examination of its evolution during recent years. The requirements for further enhancement of the product, as defined by its users, are summarized. The article concludes with an example of the product's key role in relation to the customer application requirements of the next decade.

DALLAS SYSTEM CENTER: SAMPLE CUSTOMER INFORMATION CONTROL  
SYSTEM/VIRTUAL STORAGE (CICS/VIS) TUTORIAL PRESENTATION

This bulletin has been prepared to assist those who may be called upon to give short overview presentations on the subject of CICS/VIS to a group audience with limited knowledge of CICS/VIS. This type of presentation has been given at every SHARE user group major meeting for the last four years. At SHARE there are frequently people who are prospective users of CICS/VIS, or are from installations

which use CICS/VIS but are not directly involved, or have a general curiosity regarding CICS/VIS.

This presentation makes no attempt to get to low levels of detail or function. The intent is not to "sell" someone on the idea of CICS/VIS but merely to offer enough information so that the attendee can gain a perspective regarding CICS/VIS and be somewhat conversant on the subject.

This is a component of GBOF-2205.

Manual, 52 pages, 11/81

386X MODEM AND NPDA TUTORIAL  
This publication is intended to give customers an update on the 386X modems. An explanation of the functions these products provide, how the functions are implemented, and some installation considerations will be discussed. An additional topic will cover the NPDA interface with the modems and the information provided as a result. This presentation is based on ACF/VTAM, ACF/NCP, NCCF Release 2, and NPDA Version 2. It deals primarily with SDLC links, but it will provide additional information on BSC links. The audience of this publication should be systems programmers or communications technicians. DALLAS SUPPORT CENTER: COMMUNICATING DISPLAYWRITER RECORDS TO AND FROM HOST COMPUTERS  
This paper discusses considerations for designing a host file to be communicated to or from and processed by Displaywriter. This includes Displaywriter file concepts and function, communication characteristics for various protocols, and cookbook type examples. This paper is intended for a programmer who will be defining host files for processing on the Displaywriter. This discussion is in general terms and applies to all 370 host systems. The terms may differ for smaller systems, but the concepts will apply. This paper also assumes the reader has knowledge about the operation of Displaywriter in the Textpack, Reportpack, and communication environments. Manual, 36 pages, 2/83

DALLAS NATIONAL MARKET SUPPORT CENTER: QUESTIONS AND ANSWERS ABOUT DL/I DOS/VS

This publication addresses release 1.6 of the IBM program Data Language/I Disk Operating System/Virtual Storage, 5746-XX1. Some of the most commonly asked question about DL/I have been compiled into this publication. The questions and answers in this manual were collected from the Information/VM-VSE data base of Information/System and other internal IBM sources. These questions and answers were then consolidated and reviewed for accuracy against DL/I Release 1.6.

INFORMATION MANAGEMENT SYSTEM/VIRTUAL STORAGE/MULTIPLE VIRTUAL STORAGE (IMS/VS/MVS) PERFORMANCE AND TUNING GUIDE

This publication is a guide and a reference source for the person responsible for performance monitoring and tuning of an IMS/VS/MVS DB/DC system. It has not been submitted to any formal test. Potential users should evaluate its usefulness in their own environment prior to any implementation.

This new version is a major update of the version written in 1980. The update of this bulletin is intended to include examples of the latest release of IMS/VS, Version 1 Release 3, the latest release of MVS (System Product Release 2.1, MVS/XA), and the current available performance oriented Program Offerings for IMS/VS and MVS.

This new version is a major update of the version written in 1980. G320-6023

PALO ALTO SYSTEMS CENTER TECHNICAL BULLETIN SNA 3274/3276 INSTALLATION GUIDE

This installation guide is intended to supplement existing product documentation by providing examples of the various parameters and options that must be specified to accomplish the installation process. The parameters and options in this guide are not optimum for any specific environment and should only be used as guidelines. Each installation must be evaluated individually. These examples are, generally, extracted from an operational system, but have not been submitted to any formal test.

The guide is organized in three parts:

- Part 1 contains general installation planning information.
- Part 2 shows examples of an installation consisting of ACF level access methods, IMS/VS Version 1 Release 1.5 and CICS/VS Release 1.4.
- Part 3 shows examples of an installation consisting of a VTAM-II environment with IMS/VS Version 1 Release 1.4 and CICS/VS Release 1.3.

This manual is a major revision of G320-6023-0. The previous release was based primarily on lab experience. This release has been updated based on current field experiences. The format of this release of the guide is similar to the previous release, but a large number of seemingly minor changes have been made. Initial readers need not be concerned, but readers that have been using the previous release of this guide are cautioned to be alert for these changes. While minor in appearance, the effect of these changes may be far reaching. A simple change of a mode table name or entry name, for example, may require corresponding changes to the network definition and DB/DC product generations. Or a USSTAB change may alter the operating procedures.

In addition, two new chapters have been added; Problem Determination Aids and CICS/VS Considerations.

OS/V51 PRIORITY QUEUE AGING PROCESSOR, IUP 5796-ARG, RELEASE NOTICE

The Priority Queue Aging Processor for S/370 OS/V51 is designed to ensure a consistent level of service for all jobs processed in a system. Under the V51 Priority Queue Aging Processor all jobs are periodically aged or advanced in priority within the input queue. Thus, low priority jobs will eventually reach the highest dispatching priority and be executed in a timely fashion.

Highlights:

- Variable, time initiated processing of the job queue
- Ages both centrally submitted (local) and RJE (remote) jobs
- Operator query and modification of the scan time period
- Executes in a normal batch partition
- Employs standard interfaces to the OS/V51 operating system

QUERY BY EXAMPLE, IUP 5796-PKT, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

The Query-by-Example Installed User Program is a high-level interactive language facility which provides easy access to data by end users not necessarily skilled in data processing techniques. The usability features of Query-by-Example significantly enhance and extend the value of computer resident business information. These features include:

- User perception of data as two-dimensional tables, with rows and columns
- Interactive, display-oriented end user support
- Powerful data definition, selection, and manipulation features
- Simple yet flexible language syntax
- Data extraction capabilities from IMS data bases

During an interactive session with Query-by-Example, operations may be performed on an entire table, an entire row, an entire column, or on one or more table data elements. Such operations include retrieval, insertion, deletion, and update as well as new table creation. These operations are called queries. Query-by-Example is written in OS/V5 Assembler Language and PL/I Transient Library Program PProduct 5734-LM4 is required for execution. The IUP executes under control of the IBM Virtual Machine Facility/370 using facilities of the control program (CP) and the Conversational Monitor System (CMS).

ACF DEFINITION AID, IUP 5796-PKY, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This IUP assists the ACF/VTAM Multi-System Networking Feature (MSNF) user in defining and maintaining the network. The program generates the resource definitions required in multi-host communication. Additionally it can generate some of the definitions for the Network Operation Support Program (NOSP). These facilities improve the efficiency of the system programmer in the initial definition and in making updates to the network.

G320-6070

IMS/V5 EMERGENCY LOG TERMINATOR IUP 5796-ATN

The IMS/V5 Emergency Log Terminator program is to be used when an IMS/V5 System Log Tape cannot be otherwise closed through normal programs and procedures. This typically occurs following a catastrophic failure such as a power failure.

Expeditious closing of the IMS/V5 System Log Tape is required in order to attempt IMS/V5 Emergency Restart as soon as possible after a system failure. This is frequently successfully done by the existing IMS/V5 System Log Termination Utility Program (DFSIFLTO). When DFSIFLTO is not successful, such as when the system dump is not available, due to a power failure, the log must be closed in some other way before an Emergency Restart can be attempted. In both on-line and batch IMS/V5 environments, the properly closed log is also needed to effect data base recovery. To insure the integrity this requires, use of the IMS Write Ahead Log feature is a prerequisite for this IUP.

Flyer, 4 pages, 9/78

////5796-ATN

G320-6071

IMS/V5 MESSAGE REQUEUER, IUP 5796-ATP, NOTICE

IMS/V5 Message Requeuer permits an installation to reinsert input and output messages back into an IMS/V5 system from IMS/V5 log tapes after IMS/V5 has normally or abnormally terminated. The messages are reinserted with their original timestamp and are inserted in original time sequence. An audit trail is produced recording messages that could not be reinserted because of changes in the IMS/V5 environment, such as the elimination of transaction codes or logical terminal names. IMS/V5 Message Requeuer is designed to be used for the following purposes:

- To carry unprocessed messages across an IMS/V5 System.
- To recover messages if IMS/V5 Emergency Restart or Normal Restart fails.
- To extract specific transactions (up to 100 codes) from log tapes to be processed correctly by an application program previously in error.
- To stress test or regression test an IMS/V5 System.

This IUP is offered with extended support. The significance of offering an IUP with extended support is explained in the sales manual.

2260 COMPATIBILITY FOR CICS/VS USINGVTAM/TCAM IUP 5796-ATM, NOTICE

The 2260 Compatibility for CICS/VS using VTAM/TCAM, Installed User Program 5796-ATM, developed by the Public Service Company of Colorado, provides code and procedures which enable most CICS application programs written for the 2260/2741 to be easily converted to run in an SNA environment with either VTAM or TCAM. The IUP requires a 3270 with a 1920 character screen or greater and is designed to reduce the time needed to migrate existing 2260/2741 CICS/VS applications to VTAM or TCAM by replacing the DFHTC macro with a new PSCTC macro.

Flyer, 4 pages, 1/79

////5796-ATM

G320-6083

GLOBAL SHARED ACCESS METHOD (GSAM), IUP 5796-ATX, NOTICE

Global Shared Access Method Installed User Program 5796-ATX, developed by Yale University, New Haven, Connecticut, is a set of programs designed to provide safe and easy access to VSAM data from multiple jobs running concurrently under MVS. It provides record-level integrity, thus permitting simultaneous updating of records located in the same Control Area or Control Interval. There is no modification to MVS; instead Global Shared Access Method supplies a simple interface to an existing set of VSAM I/O request options. File access control can be tailored to the needs of many users and particular databases, yet data integrity and security are maintained across the system.

Flyer, 4 pages, 2/79

IMS-CMS DATA LINK FOR VM/370 IUP 5796-PLA, NOTICE

This program links the power of APL or CMS data manipulation with the data storage capabilities of IMS. An APL or CMS user may submit IMS transactions and, upon completion, of IMS processing, have IMS output available in the user's APL or CMS address space. After processing the data, the user may store results in the IMS system. This publication describes the program functions as well as programming, configuration, installation, maintenance, and ordering information.

Flyer, 4 pages, 1.79

G320-6100

HIGH SPEED SEQUENTIAL RETRIEVAL FOR IMS/VS, IUP 5787-LAA, NOTICE

With HSSR, an installation may:

- Reduce the time required for batch processing
- Find that new batch applications are now feasible
- Run online for a longer period of time.

This International Field Program was developed by, and is running at the Swiss Bank Corporation, Basel, Switzerland.

High-Speed Sequential Retrieval (HSSR) was designed to reduce the CPU time required for sequential retrieval of large physical IMS data bases.

The HSSR functions can be substituted for basic DL/I retrieval calls in IMS batch programs. An application program using HSSR issues the DL/I calls to HSSR instead of DL/I. The structure of the application program from HSSR are the same as if the call had been handled by DL/I. HSSR has an option to have all data base calls handled by both HSSR and DL/I. Segment and feedback information returned

are compared by the HSSR compare option.

When the application program gets control, Program Control Block (PCB) parameters are passed to it. Some PCBs are normal DL/I PCBs and may be used to issue normal DL/I calls. Others are HSSR PCBs. They have the same layout as DL/I PCBs and may be used to issue, through the HSSR language interface, those GU and GN calls that are supported by HSSR.

VSE PERFORMANCE TOOL (VSE/PT), 5796-PLQ

VSE/PT is a software tool that monitors the performance of a processor running VSE/Advanced Functions. It uses both dynamic event tracing and periodic statistical sampling to record system status on an output tape or DASD data set. Subsequently, a series of reports can be produced to evaluate system performance during either the entire monitoring period or any portion thereof.

This publication describes the capabilities of VSE/PT and provides the information necessary to install and use the programs.

Subsequently, a series of reports can be produced to evaluate system performance during either the entire monitoring period or any portion thereof.

This publication describes the capabilities of VSE/PT and provides the information necessary to install and use the programs.

cannot adequately evaluate machine/system performance. The VSE/PT Installed User Program is a software tool that provides the ability to measure and report many performance-related factors of such a system.

It uses dynamic event tracing and/or periodic statistical sampling to record system status on an output data file. Subsequently, a series of reports can be produced to aid in the evaluation of software and hardware performance during the entire monitoring period or any portion thereof.

Used on a regular basis, VSE/PT can help answer some key performance questions. It can measure the changing environment to aid in an understanding of the system's internal operations. The measurement detail can be used to identify where changes to the system may produce an improvement in overall performance. Subsequent analysis can verify that the changes produced the desired result.

Finally, an analysis of the VSE/PT reports can assist in determining which resources are available for the future growth of the system.

DATA EXTRACTION, PROCESSING AND RESTRUCTURING SYSTEM, IUP 5796-PLH, NOTICE

XPRS-OS is a generalized data restructuring and extraction program. It takes sequential files and/or DL/I data bases, and restructures them or extracts information from them, to form new sequential files or different DL/I data bases. During the process, validity checking and data translation are performed.

The program consists of three components; a reader, a restructurer, and a writer. The reader reads in the source file records, and checks the values and formats of the items (fields). The restructurer provides the following functions:

- Selection of items or sub-hierarchy from the source record to form new record
- Selection of record by value of an item
- Creation of flat record from hierarchical record, and vice versa
- Creation of new flat or hierarchical record by combining two or more records
- Addition and deletion of items
- Elimination of duplicate records
- File sort
- Merging of files

Finally, the writer outputs the new record to the target file on the specified medium.

XPRS-OS is written in PL/I and Assembler languages. It generates customized PL/I programs and requires PL/I compiler and libraries for execution. It operates under OS/VS1, SVS, and MVS.

PASCAL/VS, 5796-PNQ, RELEASE NOTICE  
Pascal/VS is a Pascal compiler operating in VS1, MVS and VM/CMS. Originally designed as a high level programming language to teach computer programming by Professor Niklaus Wirth (circa 1968), Pascal has emerged as an influential and well accepted user language in today's data processing environment. Pascal provides the user with the ability to produce very reliable code by performing many error detection checks automatically.  
The compiler adheres to the current ANSI and ISO (Level 0) standard (with minor deviations) and includes many important extensions. The language extensions include: separate compilation, dynamic character strings, and extended I/O capabilities. The implementation features include: fast compilation, optimization and a symbolic terminal oriented debugger that allows the user to debug a program quickly and efficiently.

NETWORK MONITOR, IUP 5796-PFB, AVAILABILITY NOTICE  
Network Monitor provides 3270 Display Station users with a single interface to application subsystems available on a network.

The 3270 Display Stations users are presented with an installation defined logo on the screen, and enter the name of the application with which a session is desired. Network Monitor then checks the status of the application and, if the application is active and accepting logons, passes control of the terminal to that application. If the application is not active, or is active but not accepting logons, the user is given an appropriate message.

Network Monitor operates as a VTAM application program, and will operate with VTAM II, and all releases of ACF/VTAM,

6320

in a VS1 or MVS environment. It supports, in Model 2 mode, all models of the 3270 Display Station. Flyer, 8 1/2 x 11 inches, 4 pages, 6/81

INFORMATION PROTECTION SYSTEM CRYPTOGRAPHIC PROGRAMS FOR VM/CMS (IPS/CMS), IUP 5796-PPK, NOTICE

IPS/CMS offers VM/CMS users the ability to protect their data from unauthorized disclosure through encipherment. IPS/CMS allows a user to encipher or decipher data interactively or as part of application programs. IPS/CMS produces ciphertext that can be deciphered by other IBM Cryptographic products which run in OS/VS1 and OS/VS2 MVS. Subroutines are provided for Assembler, FORTRAN, and PL/I. IPS/CMS will also encipher and decipher PROFS files. English scale: 1/4" = 1". Flyer, 8 1/2 x 11 inches

CICS ON-LINE TEST/DEBUG FOR CICS/OSS, CICS/DOSS & CICS/DOSE: CON EDISON, IUP 5796-AEF NOTICE

CICS On-Line Test/Debug provides the programmer with the facilities to test and debug application programs or user files while CICS is operating by entering command statements via a 3270 Information Display System. The features include the ability to display and location in main memory of the machine, alter any location within the CICS job step boundaries, stop the execution of a specific CICS task at a specific address within an application program, display and alter storage records on any data set available to the CICS job step, immediately update changes made to storage records on file, and open or close files on-line. In effect, this program provides a programmer with access to a 3270 the ability to "console debug" programs without interrupting the normal operation of your installation.

G320-8089

CICS/COBOL CALL INTERFACE FOR CICS/OSS CICS/DOSS & CICS/DOSE: NATIONAL BANK OF DETROIT, IUP 5796-AEG NOTICE

Current users of the Customer Information Control System (CICS) who are writing application programs in ANS COBOL usually write Assembler Language macros in their application programs. This procedure requires the use of the CICS Preprocessor Program and two compilations of the program, one for the Assembler Language macros and one for the COBOL.

This program provides a COBOL/CICS interface technique which eliminates the use of the CICS Preprocessor Program and makes the writing and debugging of ANS COBOL/CICS application programs considerably easier. The system

G320

consists of 12 modules, one for each of the CICS management functions, and a Resident Interface Module. When the COBOL application programmer requires a CICS service, rather than write an Assembler Language macro, he simply codes a predefined COBOL CALL statement passing a list of parameters depending upon the service requested. The tested CICS macro is then issued in the subsequently called CICS Service Handler and control is returned to the requesting COBOL program upon completion of the CICS service.

2927 DUAL PRINTER UTILITY PROGRAM, IUP 5796-AFK, NOTICE

This IUP supports two IBM 1403 NI printers connected to the IBM 2927 Tape to Printer RPQ. The RPQ with this IUP provides for high volume production printing for direct mail addressing, labeling, letter writing and premium notice printing at low cost. Each printer is operated independently of the other. Tapes are prepared in previous operations in the desired format. Two volumes of a multi-volume file or two separate jobs operate simultaneously. This program will not run on the IBM 2927 single printer model. FDP 5798-AKH as described in 6B21-0610 provides comparable support for the single printer model.

3525 GENERAL PURPOSE UTILITIES, IUP

5796-AGE, NOTICE

This document describes for potential customers use of 3525 General Purpose Utilities for System/370.

This IUP consists of four programs:

1. A program for interpreting anywhere on a card. Control cards specify print location and source data location.
2. A program that prints up to 64 characters from a source to a data card. Data cards can be punched or blank.
3. A program by which data is posted from a detail card to a specified location on a master card. For example, employee hours worked could be posted weekly to an employee year-to-date card. The program assumes that the master card immediately follows the detail card. A master-detail card pair is defined by equal information in a specified control field in both cards. The program is able to ignore an incomplete pair or halt on an incomplete pair.
4. A multi-phase program to reproduce cards, interpret cards, gangpunch into cards, and/or insert sequence numbers. Multiple operations, for reproduce, gangpunch, and insert sequence numbers, can be done in a single run. For this, program control cards are submitted for each function requested, and repro requests will override gangpunch request for conflicting field definitions. An additional feature of this program is the ability to gangpunch a specified number of cards.

VM/370 SYSTEM FOR ONLINE TAPE & DISK LIBRARIES, IUP 5796-AGN, NOTICE

The VM/370 System for Tape and Disk Libraries is an IUP for the control of user tape and disk libraries. It works online under CMS with commands to control the assignment and accounting for user volumes. The system operator can add, delete, and modify a record associated with a particular mountable volume. It can make a large pool of tapes and disks accessible to a large number of time sharing users by providing the storage location and accounting information available online. The benefits are improved data security, quicker location of volumes, quicker response to mount commands, automatic bookkeeping and improved system control.

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

Release Notice

G320-8124

DOS TO OS CONVERSION SYSTEM, IUP 5796-AFZ, NOTICE

The DOS to OS Conversion System IUP automates the conversion process for JCL, COBOL, RPG, SORT and some utility programs. DOS JCL and DOS programs are displayed side by side with their OS equivalents. The OS equivalents are punched with JCL ready for compilation and cataloging for testing. COBOL D programs are processed by the Language Conversion Program to bring them to the ANS COBOL level before conversion. COBOL programs with End of page indicators are modified for handling of the carriage control tape. ALL CALL subroutines are identified for further resolution. DOS RPG FILENAMES are converted to OS RPG DDNAMES through the use of cards provided during the conversion process. All SORT Control Cards are handled automatically. A management report is provided as part of the process which shows the status of the conversion on a dynamic basis.

The Envirotech Corporation converted 1,200 routines to OS/VS from four geographically separated divisions while consolidating their operations at Salt Lake City, Utah. They did this with one system programmer and three part-time clerical personnel in six months through the use of the Conversion System. They estimate that two-thirds of all time and effort were saved over manual alternatives.

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

G320-8138

EXTENDED COBOL SORT, IUP 5796-AGZ, NOTICE

This document contains information on use of the Extended COBOL Sort which provides the COBOL installation with sorting and merging power never before available. It increases sort capacity to either 16 or 32 times normal. Thus the programmer need no longer be concerned about the hardware availability or the volume of data to be expected during actual production.

The Extended COBOL Sort Merge Simulation feature simplifies the merging of files in a COBOL program. The programmer uses a language compatible with the proposed ANS standard MERGE statement, and a true merge can be executed in a COBOL program.

DATA ENTRY CONTROL AND AUDIT SYSTEM, IUP 5796-AKC, NOTICE

This document describes for potential customers use of the Data Entry Control and Audit System, which provides:

- o Visibility into content of cards, tapes and diskettes
- o Labeling of all input records
- o Journal of input data transactions
- o Media-independent input to application programs via "Include" feature of POWER/VS
- o Extraction of selected records from journal with a choice of media
- o Economical storage of historical data
- o Ability to back out faulty batches of data
- o Establishment and recomputation of transaction counts

The system was developed to meet four goals: (1) facilitate transition to and operation of the diskette data entry media, (2) provide an input control system to support multiple remote input operation, (3) provide an auditing and backup system, and (4) provide an archival system for economical storage of historical data.

Release notice, 4 pages, 4/76

G320-8159

DOSMAP-DL/I, IUP 5796-PCW, NOTICE

This document contains information on use of DOSMAP-DL/I, a logical approach to better documentation and communication related to DL/I DOS/VS data bases. DOSMAP DL/I builds and prints a pictorial layout of the data base descriptions (DBDs) and program specification blocks (PSBs) of the DL/I DOS/VS data bases. DOSMAP-DL/I should be used each time a DL/I DOS/VS data base is created or changed. The printouts can serve as a handy reference to assist in visualizing logical and physical relationships within the data base. They can act as visual aids for training, and as a recording medium to retain the historical and current status of the DL/I DOS/VS data bases. The maps can also be used as a reference when the data base requirements of current and proposed applications are compared and evaluated.

HIERARCHICAL STORAGE MANAGER, 5796-BDY, MAINTENANCE/RECOVERY UTILITIES RELEASE NOTICE  
The HSM Maintenance/Recovery Utilities (5796-BDY) program offering is a set of programs which provide several enhanced functions for users of the Data Facility Hierarchical Storage Manager (DFHSM) (5665-329, and Hierarchical Storage Manager (HSM), 5740-XRB, program products. These enhancements include: Automation of routine maintenance: cleanup of migration volumes and option to automatically delete old backup version after the primary data set has been deleted; Cleanup and recovery of the migration and backup control data sets.  
The use of the Maintenance/Recovery Utilities offers the potential to reduce the systems programming effort required to support an active DFHSM installation. DFHSM can be active and performing concurrent recall processing when the Maintenance/Recovery Utilities are run. All of the programs have the ability to run in a test mode with listings produced but no actions taken. This feature allows evaluation of maintenance and recovery functions prior to actual data modification or deletion.

EXTENDED EXPONENT RANGE, 5796-PKR, FOR FORTRAN USERS RELEASE NOTICE  
The Extended Exponent Range for FORTRAN Users (XEXP) is a feature of the FORTRAN H Extended Optimization Enhancement extended support Program Offering. The XEXP feature removes the exponent range restriction imposed by S/370, 43XX and 30XX hardware by providing a range of numbers from 7.0x10 to 5.5x10 for extended precision calculations. This extended range far surpasses the IEEE standard and most engineering/scientific application requirements. An additional user library allows FORTRAN users to develop their own FORTRAN or Assembler arithmetic routines. This permits user coding of arithmetic functions not supplied with FORTRAN IV H Extended. Examples of user-written functions include alternate arithmetics, such as interval or IEEE arithmetic or the use of specialized rounding algorithms.

MVS RESOURCE UTILIZATION TOOL, 5798-DRF, RELEASE NOTICE

The MVS Resource Utilization tool captures and reports the use of resources serialized through the ENQ and RESERVE interfaces in MVS/SP or MVS/XA. The basic elements presented using this tool include the name of the resource, identification of its users, active time of request, and scope of serialization. This tool is intended to assist those users planning the implementation of multiple system global resource serialization (GRS) environments. The information generated from the MVS Resource Utilization tool can greatly assist the development of the resource name lists (RNLs) which are required to effectively operate the multiple system GRS environments. Once the multiple system GRS environment has been established, this tool can be used periodically, or after a major software installation, to identify any changes regarding system resource utilization characteristics.

VSE/NETWORK MANAGEMENT PRODUCTIVITY FACILITY NOTICE

VSE/Network Management Productivity Facility R1.1 is a set of job streams, programs, and data sets, which can help Network Systems and Operations personnel learn and productively use many systems and network management products, (NCCF, NPDA, NLDM, VSE/OCCF and others). It supports an environment with VSE/AF Version 2 and ACF/VTAM V2 or V3.

VSE/NMPF R1.1 contains tutorials, HELP facilities, operational scenarios, sample data bases and procedures that demonstrate the effective use of products to manage a network. VSE/NMPF R1.1 is built on NCCF and uses standard Command List (CLIST), Command Processor and User Exit facilities.

When VSE/NMPF R1.1 is used in conjunction with NCCF, VSE/OCCF and Terminal Access Feature (TAF) of NCCF, many automated system operation functions can be implemented. CLISTs which provide error recovery or event driven tasks can be started from system generated messages. Making use of the VAE VSE/AF facility, two NCCFs can be started to fully automate the Network and System Operation.

AUTOMATED SOFTWARE TEST FACILITY RELEASE NOTICE  
The Automated Software Test Facility Program Offering is a productivity tool which enables online software developers to enhance their functional and regression testing. The Program Offering runs on VM/SP, Release 3, in conjunction with the VM/Pass-Through Facility, and can be used to automatically test online programs running under various environments, such as CICS, IMS, ISPF, MVS/TSO, VM/CMS, and DOS/VSE. Automated testing can increase the productivity of software developers by performing routine and time-consuming tasks faster and more accurately than manual testing.

G321-5084

VM/370 - A STUDY OF MULTIPLICITY AND USEFULNESS  
This paper is an overview of IBM's Virtual Machine Facility/370. It describes the virtual machine concept and its capabilities and implementation in VM/370. Two components of VM/370 are discussed - the control program and the Conversational Monitor System. The usefulness of VM/370 in multiple and diverse environments is covered. New developments in VM/370 from hardware assists to system extensions, networking, and handshaking are briefly described as an introduction to the rest of the papers in this issue.  
Journal reprint, 7 x 10 inches, 15 pages, 2/79

G321-5085

THE CHANGING VIRTUAL MACHINE ENVIRONMENT: INTERFACES TO REAL HARDWARE, VIRTUAL HARDWARE, AND OTHER VIRTUAL MACHINES  
This paper is a survey of changes to virtual machine interfaces, implementation, architecture, and simulation techniques as they affect IBM System/370 and 303X (3031, 3032, 3033) processors, the system control program to which virtual machines interface, and other Virtual Machines executing on the same real computing system or elsewhere. The paper seeks to summarize such changes and provide a perspective on the virtual machine environment. New uses of virtual machine subsystems are discussed as they relate to inter-virtual communication.  
Journal reprint, 7 x 10 inches, 29 pages, 2/79

G321-5104

AUTOMATIC PROGRAMMING FOR ENERGY MANAGEMENT USING SENSOR BASED COMPUTERS  
An automatic programming approach has been developed for the use of sensor based computers (IBM System/7 and Series/1) for energy management in buildings. The purpose is to aid the facilities engineer who is unfamiliar with programming and who requires a system that can be defined by a sequence of questions and answers. Programmers can add or modify application source programs to extend the system to other

6544

user-defined functions.

## S544-3015

INSTALLING THE 6670

This book is intended for persons who are responsible for installing an IBM 6670 Information Distributor. It contains information about the installation process and explains what responsibilities are involved.

Manual, 8 1/2 x 11 inches, 26 pages, 6/83  
//08/6670/

## S544-3016

SETTING UP COMMUNICATION STORED FORMATS IN A BSC ENVIRONMENT

When an IBM 6670 Information Distributor is installed, the IBM customer support representative (CSR) loads two communication stored formats (from magnetic cards that are shipped with the machine). After the communication network is tested, the customer may determine that these stored formats need to be modified so that data can be sent successfully to and from the IBM 6670.

This book is directed to anyone who is responsible for deciding what to specify in communication stored formats. It contains information about the stored formats that are used for receiving and sending data in a binary synchronous communication (BSC) environment and should be used in conjunctions with IBM 6670 Information Distributor OCL Reference for a BSC Environment, S544-3041.

This book is part of a series that can go in an optional binder called IBM 6670 Information Distributor Installation Guides, S544-3046, the optional BSC tabs for this binder can be ordered by S544-3047.

Manual, 4/83

S544-3025

6670 INFORMATION DISTRIBUTOR: SOLVING FORMATTING PROBLEMS USING A LINE-MONITOR OPERATION IN A BSC ENVIRONMENT

This book is intended for those who solve formatting problems while using an IBM 6670 Information Distributor in a binary synchronous communication (BSC) environment. It describes how to use a Line-monitor trace to solve a formatting problem, which may involve the communications activity, the job data, or both.  
Manual, 8 1/2 x 11 inches, 30 pages, 6/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

S544-3028

6670 INFORMATION DISTRIBUTOR FORMATTING DOCUMENTS IN AN IBM RJE ENVIRONMENT

This book is written for those responsible for creating and formatting documents to be printed on the IBM 6670. Developing or modifying your data-processing applications to take advantage of the printing and formatting capabilities of the IBM 6670 I/D.  
Manual, 8 1/2 x 11 inches  
SLSS: ORDER NO. SUBSCRIPTION ONLY

S544-3029

6670 SOLVING FORMATTING PROBLEMS USING A LINE-MONITOR OPERATION IN AN SNA ENVIRONMENT

This book is for those who solve formatting problems while using the 6670 Information Distributor in a System network Architecture (SNA) environment. This book tells how to use a line monitor trace to solve a formatting problem.  
Manual, 34 pages, 6/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

S544-3032

PRINTING A DOCUMENT IN AN RJE ENVIRONMENT

This book is directed to anyone who is responsible for monitoring an IBM 6670 Information Distributor while it is receiving and printing documents that have been submitted from a terminal in a remote-job-entry (RJE) environment, including what can be seen on the IBM 6670's control panel while it is receiving documents.

This book is part of a series that can go in an optional binder called 6670 Information Distributor Printing and Copying Guides, S544-3048; the optional BSC tabs S544-3049 or SNA tabs S544-3070 can also be included.  
Manual, 4/83  
//38/6670/

S544-3033

6670 INFORMATION DISTRIBUTOR MAKING COPIES

This book is for users of the IBM 6670 Information Distributor who want to make copies. It will be especially helpful if the book is read while the user is at the machine.  
Manual 8 1/2 x 11 inches, 24 pages, 6/83

S544-3040

6670 INFORMATION DISTRIBUTOR OCL REFERENCE FOR AN SNA ENVIRONMENT

This manual contains a description of each command and instruction in the operator control language (OCL) for the 6670 Information Distributor. It is to be used as a source of information during and after 6670 training. Each command and instruction is presented as it is used in a systems network architecture (SNA) environment by describing its function, operands, and general use, as well as the impact when it is used with other commands and instructions.  
Manual, 8 1/2 x 11 inches  
//30/6670/

S544-3041

6670 INFORMATION DISTRIBUTOR OCL REFERENCE FOR A BSC ENVIRONMENT

This manual contains a description of each command and instruction in the operator control language (OCL) for the 6670 Information Distributor. It is to be used as a source of information during and after 6670 training. Each command and instruction is presented as it is used in a binary synchronous communications (BSC) environment by describing its function, operands, and general use, as well as the impact when it is used with other commands and instructions.  
Manual, 8 1/2 x 11 inches  
//30/6670/

S544-3042

6670 INFORMATION DISTRIBUTOR SYSTEM PROGRAMMING REFERENCE

This publication contains reference information for host-system support for the 6670 Information Distributor. It is directed to system programmers and application programmers who are responsible for the installation and operation of the 6670 in a host-system environment. It replaces and obsoletes the Programmer's Guide for Communicating with the 6670 Information Distributor (BSC) Environment, G544-1007, and the Programmer's Guide for Communicating with the 6670 Information Distributor (SNA Environment), G544-1008 by consolidating and reorganizing the information contained in Chapter 4 and Chapter 3 from each publication.  
Manual, 8 1/2 x 11 inches  
//36/6670/

S544-3064

6670 INFORMATION DISTRIBUTOR: OVERVIEW OF SNA PROTOCOL

This book is used as an overview of the 6670. It is also a backup for those already trained on the 6670.  
Manual, 8 1/2 x 11 inches, 80 pages, 5/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

S544-3065

6670 INFORMATION DISTRIBUTOR: OVERVIEW OF BSC PROTOCOL

This book is an overview and reference for binary synchronous communications (BSC). It is a backup source of information during and after training on the 6670. It describes various line controls and sequences.

Manual, 8 1/2 x 11 inches, 42 pages, 5/83  
SLSS: ORDER NO. SUBSCRIPTION ONLY

6544-3181

PAGE PRINTER FORMATTING AID USER'S GUIDE AND REFERENCE

This publication explains the use of the Page Printer Formatting Aid (PPFA) licensed program in the VSE, MVS and VM environments. It describes the use of the PPFA to create control objects, called page definitions and form definitions. The control objects are used in batch mode to format printed output for Page Printers without requiring significant changes to the user programs. PPFA runs on the 3820 Page Printer and on the 3800 Printing Subsystem, Model 3 and Model 8. The publication is intended for use by document administrators, Advanced Function Printing (AFP) programmers, system programmers and end users.
