**Power Unit
Parts Catalog**

PREFACE

This Parts Catalog (PC) contains listing and illustrations of all replaceable assemblies, sub-assemblies and detail parts released on or before April 30, 1974.

Third Edition (May 1974)

This is a major revision of, and obsoletes S124-0127-1. Changes that affect this catalog are made periodically; any such changes will be reported in subsequent revisions or Technical Newsletters.

Requests for copies of IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

This manual has been prepared by the IBM System Products Division, Product Publications, Dept. K10, P. O. Box 6, Endicott, N. Y. 13760.

A form is provided at the back of this publication for reader's comments. If the form has been removed, comments may be sent to the above address. Comments become the property of IBM.

NUMERICAL INDEX	X-1

HOW TO USE THIS ILLUSTRATED PARTS CATALOG (IPC)

PART I

To find parts quickly, a general understanding of the structure of this catalog is necessary. The catalog is divided into three major sections:

- The Visual Index, containing overall views of the machine, with call-outs pointing to detailed figures.
- The Catalog Section, containing a pictorial breakdown of assemblies and subassemblies.
- The Numerical Index, which is a numerical list of all parts used in the machine, with cross-references to the figure on which the part is found.

VISUAL INDEX

The Visual Index, located before the Catalog Section, contains a reduced illustration of every figure in the Catalog Section. The reduced illustrations are tied together with flow arrows to form a natural progression from large assemblies to small assemblies and possibly subassemblies. In effect, a visual table of contents is formed by the Visual Index illustrations.

CATALOG SECTION

The Catalog Section contains the full-sized illustrations previously noted in the Visual Index. Index numbers on figures refer to corresponding entries in the Group Assembly Parts List accompanying each figure. Refer to part II for explanation of terms used in the Group Assembly Parts List.

NUMERICAL INDEX

The Numerical Index is located after the Catalog Section and contains a complete list, in numerical order, of all part numbers used on the machine. Listed with the part number is the index and figure number on which the part is illustrated. The numerical index makes it possible to locate a part when only the part number is known.

STACKED INDEX NUMBERS

Stacked Index numbers are used when showing a part and its attaching hardware. The sequence of a typical stack is shown at the right. The circled index number indicates the assembly is broken down within the figure.

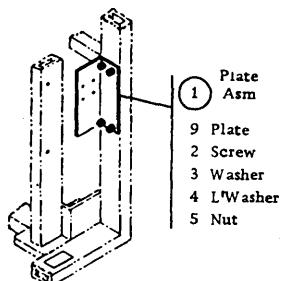

ILLUSTRATION NOTES

Cross-reference notes are directly on the illustration. The illustration's next higher assembly reference, normally located in the upper left corner of the page will read: "For Parts Not Shown See Figure X". If an assembly is referenced to a lower level figure, the note located next to the index number will read: "See Figure X."

DOUBLE LINED DETAIL BOX

The double lined box differentiates between parts shown on the basic model and parts related to a level and/or feature difference. An explanation of the level or feature difference is given in the double lined box.

FINDING A PART

The Visual Index is the starting point for locating a part. The illustrations in the Visual Index are reduced versions of all illustrations in the Catalog Section; therefore, the illustrations can be used to find the assembly containing the desired part. Use references to the detailed figure in the Catalog Section, or to another Visual Index illustration, to determine location of part number.

Once the detailed figure in the catalog section is determined, finding the part on the figure and referring to the listing for the part number and description is all that is required in most cases. If the first catalog section figure referenced shows the assembly containing the required part, the index number for the assembly will reference a lower-level figure where the assembly is broken down to its component parts. If the figure referenced by the Visual Index contains neither the part nor an assembly containing the part, it is then necessary to go to the next higher assembly figure. This figure should then contain the part or an assembly containing the part; if not, an even higher level figure must be used. Refer back to the Visual Index for some other figure that could show the desired part.

Note: Many detailed parts are unavailable, because they are part of an inseparable assembly (two or more parts welded or bonded together), or because they are part of an assembly purchased as a unit. If parts are found on a welded or bonded assembly, the following note follows the description of the assembly: "Assembly components are not replaceable!" If the part is found on a purchased assembly, and the detail parts of this assembly do not have IBM part numbers, the note following the assembly description will read: "Assembly components are not available." In either case, you need to obtain the part number of the assembly, rather than the detailed part.

EXAMPLE FOR ORDERING PARTS

			REF
4 -	5726422	FAN ASM-P/S ENCLOSURE FOR NEXT HIGHER ASSEMBLY SEE FIGURE 1-184 FOR ILLUSTRATION SEE FIGURE 4	
- 1	334921	. TERMINAL,RING- 18-22 AWG,.06 HOLE,INS	2
- 2	187854	. SHIELD,TERMINAL BLOCK- 2 POS	1
- 3	210984	. SCREW, RD HD MACH-6-32 X .250 LG	ATT PT
- 4	5357050	. FAN ASM-NO CONNECTOR	1
- 5	32042	. SCREW,MACH BIND. HD 10-32 X .375 LG	ATT PT
- 6	5357066	. BLADE	1
- 7	5357067	. MOTOR 208V/230V 60CY 220V 50CY	1
- 8	130434	. SCREW,MACH-SLOTTED HEX HD 10-32 X .375 LG ATT PT	2
- 9	56079	. WASHER,LOCK-EXT T .195ID .410 OD	ATT PT
- 10	5726436	. HEADER-POWER SUPPLY FAN	1

If the entire fan is required, part number 5726422 should be ordered (all one dot items will be received). If only the subassembly is required, part number 5357050 should be ordered (all two dot items will be received). Each part may be ordered individually.

HOW TO USE THIS ILLUSTRATED PARTS CATALOG (IPC)

PART II

(1) AR

As Required (AR) in the units per assembly column denotes that the quantity is used as required.

(2) ATT PT

Attaching Parts: These parts are used to attach a subassembly to an assembly. The attaching parts are listed immediately following the part to be attached.

(3) "COMM"

Commercial hardware: When this indication appears in the part number column, it denotes hardware procurable from normal commercial sources and not identified by an IBM part number.

(4) INDENTURE

The relationship of a part to its next higher assembly is indicated by indentures. For example:

1 2 3 4

Unit

- Assemblies and Detail Parts of Unit
- Attaching Parts for Assemblies & Detail Parts
- • Subassemblies
- • Attaching Parts for Subassemblies
- • • Detail Parts for Subassemblies, etc.

(5) NR

The entry NR in the part number column denotes the part is procurable but not recommended for field replacement, and that the next higher assembly should be ordered.

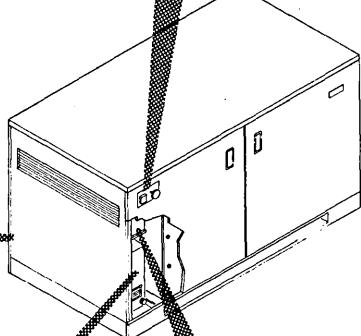

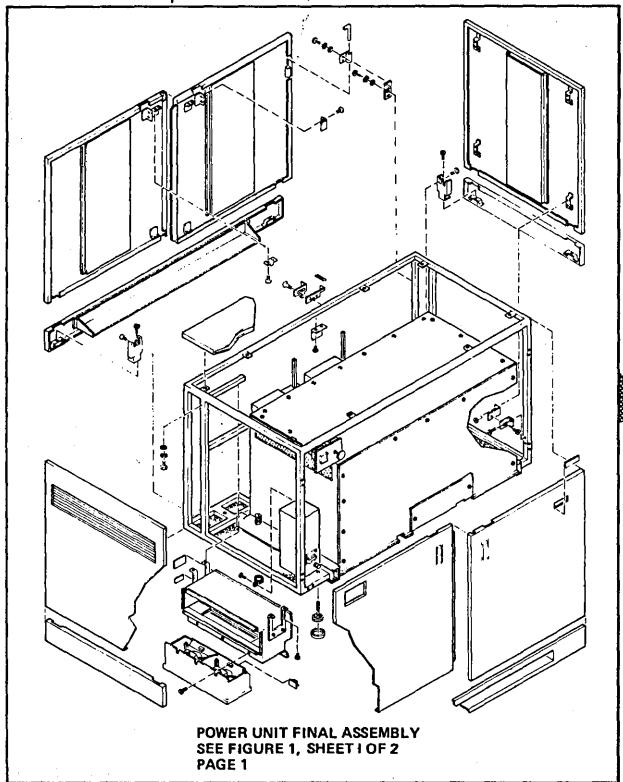

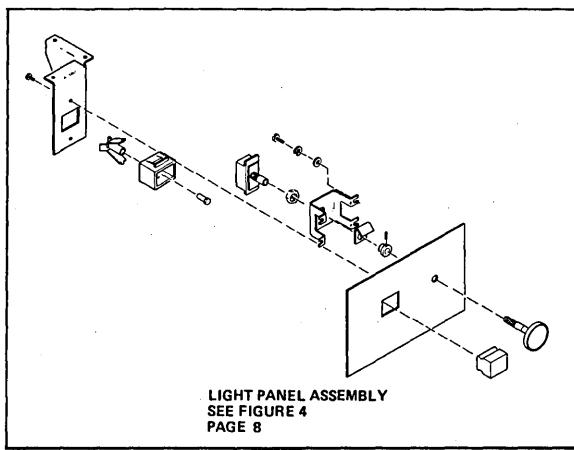

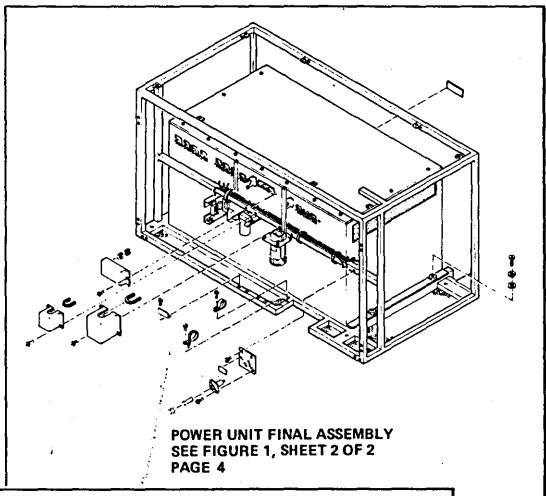

(6) NP

The entry NP in the part number column denotes the assembly is non-procurable and the detail parts should be ordered separately.

READER'S COMMENT FORM

3047 Power Unit

Order No. S124-0127-2

- Did you find the part you needed in the catalog?
- If you *did not* find the part in the catalog, how did you obtain the correct part number?
- What parts were you unable to find? (Include numbers if you were able to determine them by alternate means.)
- If you *did* find the part you needed in the catalog, but had unusual difficulty locating it, please send us the part number and page number. Include a description of your difficulty if you wish.

We would appreciate your comments. If you wish a reply, be sure to include your name and address.
