

Gardening

From Appropedia

(Redirected from Garden)

Definition

Gardening means growing plants which are useful, ornamental or both. Gardening and horticulture imply small scale. But where agriculture and horticulture focus on commercial value, gardening usually implies small scale and often done by the same people who benefit from it (unless they employ a gardener).

Navigation

To browse Appropedia's information on gardening, view the "horticulture and gardening" category, below.

The agriculture category will be useful for specific crops and techniques:
