DEDICATION

To FRANK HEALEY, Esq.

Dear Sir,

You have, by so many masterpieces of Chess strategy, rendered your name, and thereby English Chess Problem Composition, famous all over the world, that we feel there is a peculiar fitness in availing ourselves of your kind permission to dedicate such a work as this to yourself. Without your support we should certainly not have undertaken the task, but we have received such ample and cordial help both from you and from others almost equally distinguished, that we feel sure that the work will be of great value, not only to living composers, but also to those who may come after, marking as it unmistakably does the character which the art has assumed at the present time. The most superficial student may see in what striking contrast it stands to the composition of previous periods, and without question this is due mainly to yourself, as the pioneer of new and suggestive ideas, as remarkable for their depth and beauty, as for their neat and elegant construction.

We are, Dear Sir,

Yours faithfully,

THE EDITORS.

February 1876.

PREFACE TO ELECTRONIC EDITION

The present edition of *English Chess Problems* follows the original edition, published by Longmans, Green & Co., London, in 1876, as closely as possible as far as contents is concerned. The layout has been modified to place six problems on a page instead of one, in order to reduce the number of pages required, and solutions have been translated into algebraic notation, using 'S' to indicate knights.

The only change to the solutions has been to change over-general statements (*e.g.* 'Q mates' or 'Anything') to specify the move or the piece in such cases where only one single move or piece was possible.

All problems have been checked with the help of computer programs. *Problemiste* by Matthieu Leschemelles was used for problems to 6 moves. For longer problems, *Fritz* 4.01 and *Crafty* with the Nalimov endgame databases were used for rough checking and exploration of the intended solution.

69 problems were found to be unsound. They have been indicated as follows:

[*] problem has more than one solution.
[†] problem has no solution.
[†*] author's solution is cooked, but with second solution(s).
[?] problem appears to be misprinted.
[!] problem with possible correction suggested in solution.
[*corr.*] problem has been corrected from the original edition.

In all cases, further details are given in the solution.

INTRODUCTION

The history of the progress of Chess problems has yet to be written. A work, giving, in a chronological order, the best specimens of successive periods would be highly interesting and instructive. The most compendious treatise of the kind is Alexandre's Collection, consisting of several thousand problems of all ages; but these are not arranged on any plan, and a large percentage of them are wrong. The next English work we know of is that published some fifteen years ago by Mr. J. A. Miles (himself a composer of considerable merit), called "Chess Gems." This collection is not restricted to the works of the English or any particular school, but contains the finest specimens, collected by the author from all times and countries. We think the time has now arrived, considering the rapid advance of Chess knowledge, and in particular the general interest taken in problems, that the results of the last twenty years should again be sifted, and the best preserved in a permanent form. If the idea carried out in the present work be followed up on the Continent and in America, we should have the groundwork or basis for a larger and more refined selection, derived from the masterpieces of the whole world, arranged in a proper historical or chronological form. The American Chess Nuts is, indeed, a magnificent contribution towards this object. The chief objection to this work is that the student has to skim the cream for himself; the object of the compilers apparently being to embrace as large a number of problems as they could gather together without any especial regard to their quality; and consequently the gems of the collection can be arrived at only after long labour and research. This fault we have endeavoured to avoid. We have, as a general rule, restricted the number of problems by each author to twelve. We have devoted a separate chapter to the works of authors recently deceased, and have thought it wise to include some of the more excellent stratagems of our English Chess Problem Fathers, Bolton and Bone, names which will always be regarded with esteem and admiration. For the selection of Bolton's masterpieces we are greatly indebted to the Rev. Mr. Gape, who very kindly placed all Mr. Bolton's MSS. at our disposal. As most of these problems represent the old school of composition, this chapter forms an admirable contrast between the remote and more modern styles, as it is immediately succeeded by a chapter of *novelties,* giving problems by the chief English composers, made especially for this book. It is to this chapter we fancy all Chess lovers will turn with the greatest pleasure and interest. If it had not been for the great kindness of Mr. H. J. C. Andrews, we should have hesitated considerably before resolving to add the labour of examining so many new productions to that of our other

editorial duties. Should this chapter, as we hope and believe is the fact, be without flaw as regards second solutions, and with only here and there a few unavoidable duals, the sole merit will be due to our esteemed contributor, whose kind and gratuitous labour we have great pleasure in publicly acknowledging.

On comparing ancient and modern problems as a whole (and, of course, excepting well-known and most able ancient productions), we think it will be found that problems at first were little better than ingenious end games. It was considered the highest art to give Black a most preponderating force and White an apparently hopeless position, out of which he is made to extricate himself by a series of sacrifices or successive checks. In general, Black's moves were all forced. With a better knowledge of the game, a more scientific style of composition gradually came into vogue. Instead of the old clumsy mates in so many hundred moves, or under such and such absurd conditions and restrictions, composers endeavoured to concentrate their powers on mates in three, four, and five moves. In these days the resemblance of the position to an end game is no longer considered necessary or desirable; the sole aim of the author now is to render his idea in the simplest and most compact form possible, using no superfluous piece or pawn. With a more subtle range of ideas and stratagems, a greater punctiliousness obtained to avoid dual methods of solution in reply to any particular form of defence; and, while richness or variety of play is always aimed at, a single line of attack in reply to each variation is deemed almost indispensable. To this æsthetic sense of fitness and purity may be attributed the excellency of modern problems over those of earlier date. Some, indeed, carry their sensitiveness to an absurd extent, and would trammel the genius of an author by a set of hard and fast grammatical rules; they would proclaim a problem faulty or imperfect because of some second way of solving it, or "dual," even in a minor variation, utterly oblivious of artistic exigencies or other merits, for the sake of which the duals may be allowed to exist. Of course, in consequence of the vast number of skilful composers now living and periodically contributing to the shoals of weekly Chess-columns appearing all over the world, a far larger number of clever solvers have simultaneously arisen. Many of these now occupy the first rank as analysts, and, although not necessarily composers themselves, from the skill and power of insight they have acquired by long practice in discriminating the merits of a position, they have gradually come to be regarded as the best critics on problems. The older stratagems were never subjected to half the fire of scrutiny and analysis the productions of our day have to undergo, and, consequently, there was nothing like the same accuracy or finish; to this may be added the intense rivalry which now exists, and is stimulated by the constant problem tourneys, international and local, which annually occur. This continual friction

and action of mind upon mind has produced the happiest results. The compositions of our best men are now as remarkable for their extreme elegance and accurate construction as they are for the grace and beauty of their conception. There is, however, we fancy, a danger that the practised solver may be inclined to condemn a problem too readily, to satisfy his insatiable delight in the search after duals. It would be well to lay down some broad general principles to govern composers and examiners as to the admission or exclusion of duals. As yet, however, there exists great diversity of opinion on the subject, although we believe the liberal views lately expressed will ultimately triumph over those of some American purists. A problem is a mixed work of science and art, and these elements are to a certain extent antagonistic. A flaw in the construction, duals in a minor variation, or weak defence, may readily be forgiven when they are necessary to secure the original idea intact, provided always their existence is not due to carelessness but simply from necessity; the necessity being judged chiefly from the artistic, and not only from the constructive point of view. We trust the study of this work, containing, as it undoubtedly does, some of the very finest specimens of modern art, will conduce to develope the growing genius of our future Andrews, Grimshaws, Healeys, &c., &c.

A few words, perhaps, are needed to explain why we have adopted the present arrangement of grouping the problems according to the number of moves. Although, by not having all the problems of each author kept together, one great advantage is, to a certain extent, sacrificed, viz., that of studying the special characteristics of each composer's style, yet we felt that such loss was more than compensated by the gain in variety arising out of the contrast of stratagems conceived by different minds. Such contrast is certainly very real and of great interest. For, extraordinary as it may seem, that, with such a limited mechanism at command as there is in Chess, there should be so many distinct conceptions realizable; it is still more wonderful that the productions of each author, and, in a wider sense, those of a nation, should have certain marked characteristics which may be found to vary from time to time in the same way as its art and literature. Hence the value of collections such as this, and it will not be without service, if, as we believe, it fairly reflects the genius of the best English composers, and thus generally of English Chess Problem composition during this century.*

* The Editors wish to note that in consequence of the sudden decease of their contributor, Mr. F. H. Deacon, his set should strictly be placed in Part II., but his death occurred when the work was too far advanced in the press to admit of alteration. They esteem themselves very fortunate in having a problem by Mr. Deacon composed quite recently, and expressly for this book, and this the more, as he had for some years given up problem composing.

SOME HINTS ON PROBLEM CONSTRUCTION

So much has been written lately on the above subject, and so many different views expressed, that it is difficult to ascertain the current in which the general opinion of composers runs. The few remarks we are about to offer have no authoritative value, but may be of some assistance towards bringing the several points at issue to some final judgment. But whatever rules may be laid down they will always be disregarded, and, to a certain extent, ignored by the leading composers of each country. In Chess, as in all other things, genius will not be bound by any fixed rule. It makes its own rules; and rightly so. In suggesting, therefore, the principles which should govern the attempts of youthful aspirants in the art of problem construction, it is necessary to deduce them from the works of recognised masters, such as Healey of England, Loyd of America, and Bayer of Germany. It would be the height of folly to attempt to dictate to such men; we must be content to learn what they teach, and to ascertain upon what common principles their chief works are constructed. First of all, then, we shall find in the problems of these three masters, and notably in those of Healey and Loyd, that there exists a certain affinity between the idea and its expression. The body or form in which the soul or thought is enshrined is just *the* one of all possible which is most appropriate, or which expresses it in the happiest and apparently least laboured manner. It is just this faculty or perception of fitness which is peculiar to those highly gifted with the genius of Chess art. Others may have equally fine or subtle ideas, but they are unable to give them their neatest expression; the labour and study is too apparent. The result may indeed be a *difficult* problem, but the form is artificial and laboured; in fact, they manufacture so ugly a body, that they give no pleasure or sense of beauty to the unhappy solver. The value of a problem may be measured by the pleasure it is capable of giving. "Ars est celare artem;" this is peculiarly true of Chess problems. In the most beautiful stratagems of Loyd, the positions are always most natural, and the *study* which they must have cost the composer is never visible, the idea and form being co-related in the fittest manner. The following principles should therefore obtain, first, not to give either side a greater force than is required to express fully the idea. Whilst it is good to give Black as great a defensive power as possible (so long as the unity of the idea is not obscured), it is the greatest mistake to aim at giving him a stronger force than White. Some youthful composers think it wise apparently to crush White by giving Black an overwhelming force. It is generally most difficult to solve those problems where Black has only his King, for the simple reason that the adversary has then so many possible methods of directing

his attack that it is not easy to detect the one way leading to success. Disparity of force then between the two sides is not to be regarded as a fault, whether it occur on one side or the other. The fault to be avoided in all problems is rather superfluity of force. It is not legitimate to insert a piece merely to mislead, but which otherwise has no bearing on the solution. Each piece on either side should be fully wanted, the power which it can exert should be utilised to the greatest extent possible. This principle has been aptly termed "*economy of force,*" and although the idea has been ridiculed lately by an editor of one of our leading Chess magazines, it is one which composers should faithfully observe. In fact, it is only by attending to this one golden rule, viz., the employment of the least force possible, that one can arrive at the fittest construction, and, if the fittest, in consequence, the most difficult concealment of the idea or stratagem. By its due observance, also, almost all the other evils incidental to problem construction will be found to vanish; namely, clumsy crowding together of pieces, unnatural and impossible positions, &c., &c.

This principle of "economy of force" is not necessarily inconsistent with the object of giving Black a varied and powerful defence. The defence must bear on the attack threatened, or the force in which the former consists must be reckoned superfluous or wasted. Variations are not to be introduced simply for the sake of rendering the problem more difficult, unless they are to some extent, at least, in harmony with the main idea. The composers who best illustrate the advantage of giving Black a rich and varied defence are Andrews of England, and Bayer of Germany; their problems are distinguished principally for the display of great and brilliant resources against a number of powerful and varied defences. They are like those beautiful sky-rockets, which, after their main strong flight is ended, and all seems over, suddenly scatter beautiful series of clustered stars, each of which afterwards breaks up into numberless and ever varied repetitions. This kind of problem forms quite a class of its own, and is, perhaps, the highest development of this branch of Chess strategy. Of course, in reply to so many lines of defence, it is not always possible to secure one method of solution, and this leads us to the discussion of the much-vexed question of "duals." We have never regarded "duals," or second ways in variations, as the evil of evils to be avoided in problems. Of course, they are to be guarded against, but as we have already stated our views pretty fully, in the Introduction, on this point, it is not necessary to repeat them here. Suffice it to say, that they become less objectionable the more remote the variation in which they occur lies from the main line of play or central idea of the problem. We would next say a few words on "strategy." Although the artifices resorted to are limited, and might easily be tabulated, still this does not constitute the virtue or essence of a problem, any more than the leaves which compose a flower represent the

flower. For, were this the case, not only would problem composition soon cease to be an art, but it would as soon cease to be cared for or practised. The artifice stands in the same relation to the strategy as the verse and metre of a poem stand in relation to the poem. There is a nameless something besides, in the structure or expression of an idea, an exquisite balancing of force against force, a manifestation of skill and tact in concealing the sacrifice, or the reserve of energy concentrated by some apparently aimless *coup,* which constitute the beauty and strength of a position. But to the beginner we may say a few words here, which may prove of service. First, then, avoid positions in which an idea is evolved by successive checks, as such, whatever the ingenuity, and however numerous the variations, are comparatively easy, and belong to a lower order of composition altogether. Again, composers are at first very fond of making the main idea consist in a series of sacrifices. Now, such problems are not of the highest rank at all, as reference to the problems by the best composers in this volume will amply demonstrate. We may especially cite J. B. of Bridport and Healey as exemplifying this. In our view, the finest conceptions are those where, by some move or set of moves difficult to see, either through their subtlety or the manifold resources in defence, a store of energy is laid up which breaks out at last and ensures defeat. Others may prefer conceptions of a different kind; but in all there must be concealment of design, not through over-crowding, but through what we can only define as naturalness of position and a range of choice of moves as extensive as possible. One word on two move problems. Such have been decried as too easy for any but tyros, and not worth the pains bestowed on their composition. This we consider is a great mistake. Of all problems, a good two mover is probably the most difficult to compose; for here, if anywhere, duals are to be avoided in reply to every move worthy the name of a defence; it is essential here, if anywhere, that the idea should be concealed, and this can only be done in general by allowing considerable freedom or scope on both sides with plenty of resources on the part of Black. These problems are *sui generis,* as in a two mover more than any other there is a balance of power, if we may so speak, which, if slightly disturbed by any move but the right one, destroys the harmony contemplated; hence the niceness and delicacy of the artifice; to ensure, amidst the clash of so many forces, a subtle but exact stroke, which suffices, in each case, to effect with some piece a mate next move. Sometimes accordingly the full beauty of a "coup de repos" is brought out; sometimes Black's own strokes here and there are used against himself; sometimes we have, on both sides, checks by discovery, like the quick crossing of swords in a duel.

Problems of three moves are and will probably remain the most popular and pleasing; because there is just enough difficulty about them without the intricacy and depth which belong to others in four or

five moves. At the same time, in the latter, there is a scope for manœuvre and design, serving to render many problems of this class profound studies, containing many beautiful variations.

In conclusion, young composers must learn to depend upon themselves, and upon their own sense of what is right. Excellency in the art will never come by mere drudgery or study of other men's works, unless accompanied by a love for Chess and a special and innate aptitude for it. We shall watch with interest the future development of this most beautiful and fascinating study—for of further development it is without question susceptible—in just the same way as of late years it has taken new forms of a distinct character, and may do so again.

There is no doubt that the study of Chess has much increased, among all classes. The number of Chess periodicals now in circulation, of good works recently published on the subject, and of new clubs constantly being formed all over the country, prove this. It is greatly to be desired that our working classes should learn more and more to share in the pure and intellectual enjoyment of the game, which would thus gradually be the means of weaning them from other debasing, if not vicious, pursuits or sources of recreation.

SOLUTIONS

The following symbols and conventions have been used in the solutions:

†	check
‡	mate
/	separates different destination squares by same piece. Thus 'Ke3/d3' indicates the two moves Ke2 and Kd3.
,	(in short solutions) separates moves by different pieces. Thus 'Ke2,d3' indicates the moves Ke2 and (P)d3.
~	indicates any of the legal moves by the specified piece.
?	indicates a move that does not solve the problem.

S is used to identify knights.

SOLUTIONS PART I

SECTION 1: TWO MOVE PROBLEMS

1. 1. Qf1
2. 1. Rd7
3. 1. Bg7
4. 1. Rb4
5. 1. Qc4
6. 1. Sg3
7. 1. Bd3
8. 1. Qb5
9. 1. Rf7
10. 1. Ba6
11. 1. Qc8
12. 1. Qd7

700 CHESS PROBLEMS

SELECTED FROM THE COMPOSITIONS OF

MRS. W. J. BAIRD

[1902]

An Electronic Edition
Anders Thulin, Malmö · 2002-11-18

PREFACE

The Chess Problems contained in this volume are the product of the labour and recreation of some fourteen years. I say "labour," because I am not such a Chess enthusiast as to believe that a collection such as this can be produced without persistent application partaking of the nature of work; and "recreation," because the work has been a pleasure—how great a pleasure only a composer can fully realize. Although a large number of the problems have been republished in numerous papers at home and abroad, only the name of the publication in which each originally appeared is given. Exclusive of the prize list, in about a dozen cases with a view to an improvement, they have been more or less reset since their first appearance. The six added to this collection in letterpress at the *end* of the Solutions are the last composed.

To the best of my belief there is not a single instance of a dual continuation, and not being an admirer of dual mates, they are very few and far between.

A list of prize problems will be found, but it must not be taken for granted that it contains the essence of the volume.

Solutions are given in *full* for the benefit of those who are not far advanced in the Problem Art. As will be seen, *red* represents the White, and *blue* the Black pieces.

Brighton
1st May, 1902

CONTENTS

List of Prize Problems	p. 9
Direct-Mate Problems:	
Two Moves	problem 1–286
Three Moves	287–601
Four Moves	602–625
Five Moves	626–630
Self-Mate Problems:	
Two Moves	631–669
Three Moves	670–687
Four Moves	688–694
Five Moves	695–698
Six Moves	699–700
Solutions	p. 211
Notes to Problems	p. 277

PREFACE TO THE ELECTRONIC EDITION

The original edition was published by Henry Sotheran & Co, London, 1902. As the original preface indicates, it was printed in red and blue.

In this edition, solutions have been converted from descriptive notation to algebraic, using the letter 'S' to indicate knights. The distinction between plain, double and discovered mates present in the original has not been retained, except as far as lines that were considered separate because of this distinction have also been kept separate in this edition. One example of this is the first and third line in the solution to problem 24.

Variations omitted from the original solutions, indicated by '&c.', have been added, in brackets.

An extra section, containing publishing information (with occasional corrections of problem source), and notes about the problems taken from Mrs. Baird's notebooks has been added after the solutions.

The dates given in the original proved to be the date of the award given. The present edition tries to make this clearer by printing them together with the award, rather than with the source, as in the original.

In the original several unnumbered problems were given in letterpress: these problems have been set in diagrams, and, if associated with another numbered problem, given the same number followed by A, B, C, etc. in brackets. The six diagrams appearing

last in the two-mover section were originally printed at the end of the solutions section.

All problems have been computer tested, using Matthieu Leschemelle's *Problemiste* v. 1.90, except for the last two problems which were checked with *Popeye*. Only four unsound problems were found: 307, 627, 643 and 697.

In those very few cases where computer testing showed the presence of moves or variations not completely covered in the original, these have been added to the solution in brackets, and set in italics.

Occasional errors in mating moves have been silently corrected.

Acknowledgements

I am very grateful to C. P. Ravilious, who generously made his notes on the original publishing dates as well as the history of some of the problems, taken from Mrs. Baird's own notebooks, available for this edition.

I also wish to thank the Library of the British Chess Problem Society for preserving Mrs. Baird's notebooks and for making them available for research and publication.

A. Thulin

PRIZE PROBLEMS, ETC.

In the following List, all were "Open Competitions" with the exception of the *Southern Counties' Chess Journal* and *Sussex Chess Journal,* which were limited to Sussex only.

Two Moves

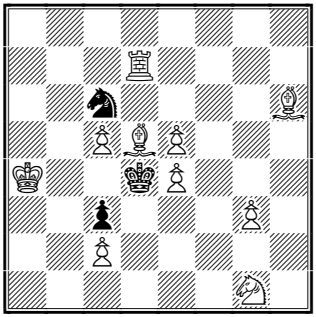
1st Prize (Self-mate), *Southern Counties' Chess Journal*	635
2nd Prize, *Sussex Chess Journal*	40
2nd Prize, *West Sussex Times and Standard*	68
2nd Prize, *Shoreditch Citizen*	118
2nd Prize, *Wallasey and Wirral Chronicle*	162
2nd Prize (Tie), *Southern Counties' Chess Journal*	170
2nd Prize *Manchester Weekly Times* (also 3rd for "Best Set" with No. 331)	179
2nd Tie, *Morning Post*	277
2nd Tie, with No. 545, 1st Prize in *Leisure Hour* (Ladies' Competition)	279
2nd Prize (Self-mate), *Hackney Mercury*	651
3rd Prize, *Sheffield Weekly Independent*	6
3rd Prize, *Brighton Society* (Informal Competition)	243
3rd Prize, *Southern Counties' Chess Journal*	257
Hon. Men., *Sheffield Weekly Independent*	164
Hon. Men., *East Central Times*	184
Hon. Men., *Hackney Mercury*	200
Hon. Men., "*Hackney Mercury* Tourney," conducted in *British Chess Magazine*	245
Hon. Men. (Self-mate), *Brighton Society* Problem in letterpress under Problem No. 666	666A

Three Moves

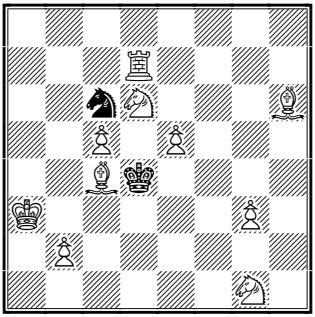
1st Prize, *Manchester Weekly Times* 287
1st Prize, *Hackney Mercury* 329
1st Prize, *Southern Counties' Chess Journal* 391
1st Prize, *Cricket and Football Field* (Half-yearly Competition) 422
1st Prize, *Southern Counties' Chess Journal* 430
1st Prize, *Sussex Chess Journal* 452
1st Prize, *British Chess Magazine* (Monthly Competition) 511
1st Prize, *Leisure Hour* (Ladies' Competition) 545
1st Prize, *Sussex Chess Journal* 561
1st Prize, *Kentish Mercury* 562
1st Prize, *Cricket and Football Field* (Half-yearly Competition) 591
2nd Best, *Leeds Mercury Weekly Supplement* 314
2nd Prize (Special), *Cricket and Football Field* (Half-yearly Competition) 483
3rd Prize, *East Central Times* 436
3rd Prize, *Sheffield Weekly Independent* 516
3rd Prize, *Southern Counties' Chess Journal* 583
Hon. Men., *Manchester Weekly Times* (also 3rd for "Best Set" with No. 179) 331
Hon. Men., *Bristol Mercury* 407
Hon. Men., *Hackney Mercury* 418
Hon. Men., *Bristol Mercury* 480
Hon. Men., "*Hackney Mercury* Tourney," conducted in *British Chess Magazine* 588
Hon. Men., *Bristol Times and Mirror,* 1902 (Since the selection of the Problems for this volume) 597

Two Mover.–2nd Prize, in "*Reading Observer* Topsy Turvey Competition," 1902. Conditions: To produce the best and nearest likeness to an original problem with only the full solution for guidance.

Full Solution.–Key: 1. Rc7, K×Pc5, 2. Be3‡; 1. ..., K×Pe5, 2. Bg7‡; . 1. ..., S×P, 2. Se2‡; 1. ..., Sd8/e7/b4/a5/a7/b8, 2. Sf3‡.



Original Problem



2nd Prize

Most "Successful"* Problems for difficulty in the Morning Post

Two Mover, for half-year ending June 30th, 1888	26
Three Mover (2nd) for half-year ending June 30th, 1900	337
Three Mover from the time the records were commenced in 1887 to 1896	342
Three Mover for half-year ending July 4th, 1891, and 2nd for the whole year (republished from *Bristol Mercury*)	407
Three Mover (tie) for half-year ending July 6th, 1889	565
Four Mover for half-year ending July 5th, 1890	607

No. 149 was the first problem to appear in the columns of the *Times Weekly Edition,* and in the half-year's account proved the most successful in the Two-Move series.

—«·»—

The fascination of composing has always been far greater to me than that of solving. However, I have now and then entered a solution tourney, with the result that I have been successful in winning a few prizes. Over the board play has its charm, but only twice

* The term "successful" indicates that the problems had the fewest number of solvers, and were therefore considered the most difficult.

have I engaged in serious competition. In 1897, I entered for the Ladies' Championship for Sussex, which I won without the loss of a game; and in 1900, in the Ladies' section of *Leisure Hour,* I tied for first prize.

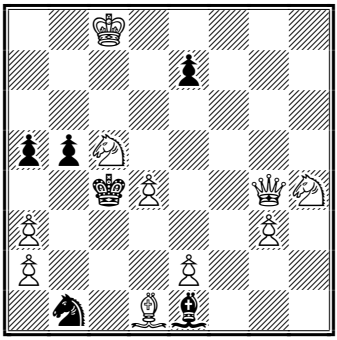
[561A.]



To a strict economist this might appear a still happier rendering of No. 561. It will be seen, [...], that a White Bishop has been removed, also a Black Knight, and that the Black Bishop introduced on K8 is the means of producing another pure mating position, viz.: 1. Se4 Sc3 2. Sd2† Bxd2 3. Bb3‡.

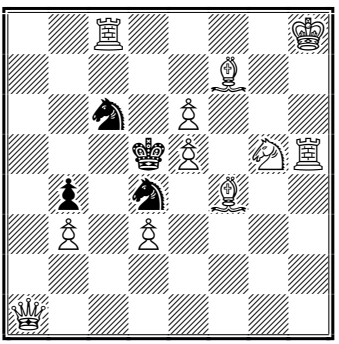
NOTES

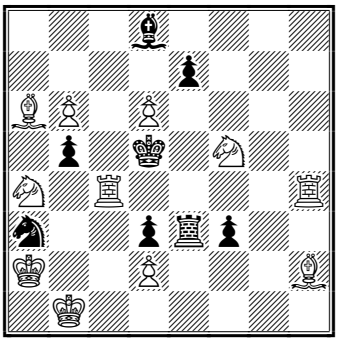
The following notes on sources and the composition of the problems were collected by C. P. Ravilious from the notebooks of Mrs. Baird in the Library of the British Chess Problem Society. All direct quotes and value judgements are taken from the notebooks.

1. *Illustrated Sporting and Dramatic News*, 28 January 1888.
2. *The Morning*, 15 May 1895.
3. *English Mechanic and World of Science*, 12 April 1889. The original *English Mechanic* position (see below) 'a little improved on'.

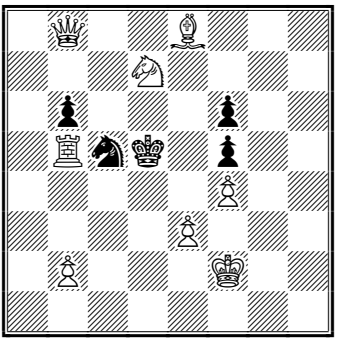


3. Mate in 2. Key: Be3.

4. *Vanity Fair*, 27 April 1889. In the original version there was a white pawn on g5 rather than h6. Mrs. Baird: 'This would be purer if white pawn on Kt5 (which prevents a cook) was placed on R6, still preventing the cook'.
5. *Illustrated London News*, 19 December 1891.
6. *Sheffield Weekly Independent*, 16 June 1888.
7. *British Chess Magazine*, January 1889.
8. *Art and Literature*, [February?] 1889.
9. *Pen and Pencil*, 30 June 1888.
10. *Chess-Monthly*, December 1888.
11. *Glasgow Weekly Herald*, 21 September 1889.
12. *Leeds Mercury Weekly Supplement*, 7 July 1888.
13. *Nottinghamshire Guardian*, 15 June 1889.
14. *Shoreditch Citizen*, 20 July 1889.
15. *Norwich Mercury*, 21 September 1889.
16. *Illustrated Sporting and Dramatic News*, 22 December 1888. Problem 16 is a better version of the problem published in the *Illustrated Sporting and Dramatic News*, which took the following form: (see next page).

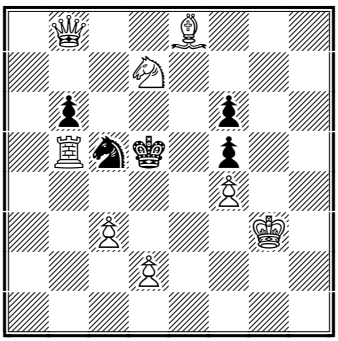


16. Mate in 2. Key: Rh6.



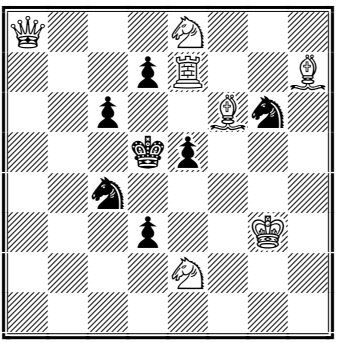
20:2. Mate in 2. Key: Qd8.

17. *Evening News and Post,* 14 September 1889.
18. *Field,* 25 October 1890.
19. *Bradford Observer Budget,* 4 August 1900. In *700 Chess Problems* sourced to the *Weekly Gazette* (Montreal).
20. *Kentish Express and Ashford News,* 24 November 1888. The version of this problem published in the *Kentish Express* (below) was subsequently improved on for purity as an apparently unpublished 2-mover: (see next column).



20:1. Mate in 2. Key: Qd8

This was further modified (by reversing the position and moving it one square to the left to give the queen more freedom) to become the version in *700 Chess Problems*.
21. *Pictorial World,* 30 January 1892.
22. *Hereford Times,* 7 December 1889.
23. *Cricket and Football Field,* [June?] 1892. [*Bolton Football Field* in MS.]
24. *Wit and Wisdom,* 18 August 1888.
25. *Illustrated London News,* 18 June 1892.
26. *Morning Post,* 28 May 1888.
27. *Manchester Weekly Times,* 24 August 1900. An earlier version appeared in the *Glasgow Weekly Herald,* 13 April 1889:

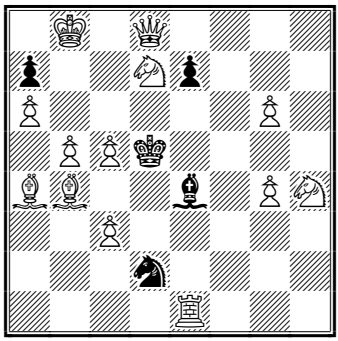


27. Mate in 2. Key: Qa4.

28. *Vanity Fair,* 2 March 1889.

29. *Illustrated Sporting and Dramatic News*, 29 September 1888.
30. *Leeds Mercury Weekly Supplement*, 27 July 1889.
31. *Field*, 3 November 1888.
32. *Western Magazine and Portfolio*, June 1891.
33. *Bradford Observer Budget*, 28 July 1900.
34. *East Central Times*, 19 July 1890.
34a. *East Central Times*, 8 March 1890. Originally published with a WP instead of a WB on e4, and with a WP on b5.
35. *Nottinghamshire Guardian*, 2 July 1892.
36. *Surrey Gazette*, [May?] 1892.
37. *British Chess Magazine*, October 1888.
38. *Rossendale Free Press*, 16 January 1892.
39. *Hereford Times*, 23 January 1892.
40. *Sussex Chess Journal*, June 1891.
41. *Hackney Mercury*, 7 March 1891.
42. *Kentish Mercury*, 27 September 1889.
43. *Illustrated London News*, 4 April 1891.
44. *Standard*, 10 January 1894.
45. *Hackney Mercury*, 23 July 1892. A manuscript note in Mrs. Baird's hand indicates that problem 45 was originally published in the *Stamford Mercury*, and that the *Hackney Mercury* version, which is also that in *700 Chess Problems*, is slightly revised.
46. *Leeds Mercury Weekly Supplement*, 16 July 1892.
47. *Weekly Gazette*, Montreal, 6 April 1893.
48. *Field*, 13 August 1892.
49. *Chess Review*, April 1893.
50. *Glasgow Weekly Herald*, 4 February 1893.
51. *Nottinghamshire Guardian*, 8 October 1892.
52. *Sunday Special*, 10 February 1901.
53. *New Zealand Mail*, [1893 or 1894].
54. *British Chess Magazine*, October 1892.
55. *Illustrated Sporting and Dramatic News*, 27 May 1893.
56. *Manchester Evening News*, 7 January 1893.
57. *Times Weekly Edition*, 3 November 1893.
58. *Leeds Mercury Weekly Supplement*, 21 January 1893.
59. *Standard*, 22 August 1892.
60. *Hereford Times*, 10 June 1893.
61. *Black and White*, 13 May 1893.
62. *Newcastle Weekly Courant*, 4 February 1893.
63. *Sussex Chess Journal*, May 1892. Originally published with a WP on h5 instead of a BP on g5, and stated by Mrs. Baird, in a manuscript note, to be equally sound in this version.
64. *Pen and Pencil*, 11 May 1889. In the original version all the pieces were one square to the right; additionally, the position included a WP on a5 and a BP on a6.
65. *Kentish Mercury*, [October 1891?].
66. *Field*, 4 March 1893.
67. *Daily News*, 22 May 1901.
68. *West Sussex Times and Standard*, 15 July 1893.
69. *Pictorial World*, 3 October 1891. Originally published with a WB on a4 instead of the WP on b5. Mrs. Baird: 'The Pawn is better'.
70. *Illustrated Sporting and Dramatic News*, 29 August 1891.
71. *British Chess Magazine*, September 1890.
72. *Brighton Society*, 8 September 1894.
73. *Cape Times Weekly Edition*, 7 February 1894.
74. *Hampstead and Highgate Express*, 18 November 1893.
75. *Nottinghamshire Guardian*, 24 February 1894.
76. *Cricket and Football Field*, 1 September 1894.
77. *Advertiser* (Natal), [September?] 1894.

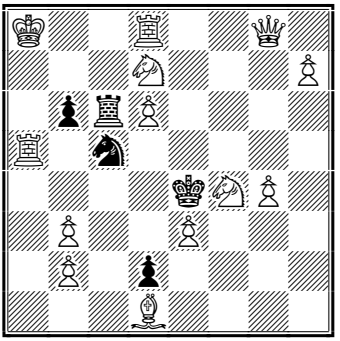
78. *Times Weekly Edition,* [September] 1894.
79. *Hackney Mercury,* 10 September 1892.
80. *Illustrated London News,* 2 June 1888.
81. *Oldham Standard,* 12 January 1895.
82.*Rossendale Free Press,* 12 April 1890. Originally published with a WB on f7 instead of g8. Mrs. Baird noted that the version in *700 Chess Problems* is nicer.
83. *Evening News and Post,* 6 September 1890.
84. *Daily Gleaner* (Jamaica), [before September 1893]. Slightly modified version published in *Hackney Mercury,* 2 September 1893 and in *700 Chess Problems.*
85. *Leeds Mercury Weekly Supplement,* 26 May 1900. In *700 Chess Problems* sourced to the *Illustrated Sporting and Dramatic News,* where an earlier version was published on 5 May 1888.
86. *Surrey Gazette,* [September 1891?].
87. *Manchester Weekly Times,* 4 January 1895.
88. *Bradford Observer Budget,* 1 July 1893.
89. *New Weekly,* 6 January 1894.
90. *Field,* 5 May 1888.
91. *Evening News and Post,* 26 October 1889.
92. *Brighton Society,* 15 June 1895.
93. *Brooklyn Daily Eagle,* 30 May 1895.
93a. *Brooklyn Daily Eagle,* 11 April 1895.
94. *Newcastle Weekly Chronicle,* 20 April 1895.
95. *Illustrated Sporting and Dramatic News,* 20 January 1893.
96. *Reading Observer,* 28 July 1900.
97. *British Chess Magazine,* February 1898.
98. *Daily News,* 1 August 1901.
99. *Womanhood,* May 1899.
99a. *Womanhood,* May 1899.
100. *Morning Post*, 23 July 1888. Problem 100 is an improved version of the problem published in the *Morning Post,* which took the form:



100. Mate in 2. Key: Sg2.

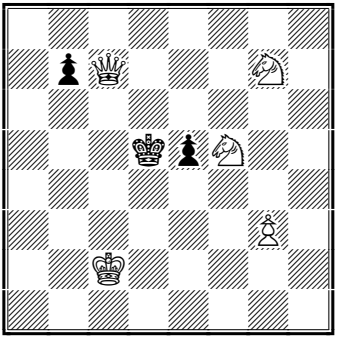
101. *New Zealand Mail,* 14 October 1897.
102. *Chess Review,* March 1893.
103. *Glasgow Weekly Herald,* 23 February 1895. An earlier version was published in *Clifton Chronicle,* 21 November 1888. Mrs. Baird regarded this as having been 'much improved on & without dual' in the *Glasgow Weekly Herald* version.
104. *Western Magazine,* December 1892.
105. *Leisure Hour,* 1 March 1900.
106. *Hereford Times,* 14 October 1893.
106a. *Hereford Times,* 19 October 1901.
107. *South Australian Chronicle,* 27 July 1895.
108. *Field,* 2 February 1895.
109. *Newcastle Weekly Courant,* 30 September 1893. Originally published with a WP on a2 and a BP on a3 instead of b3.
109a. *Newcastle Weekly Courant,* 14 January 1893.
110. *Brighton Society,* 17 April 1897.
111. *North London Echo,* 11 January 1895.
112. *Leeds Mercury Weekly Supplement,* 29 December 1900.

113. *Manchester Weekly Times,* 25 August 1893.
114. *Weekly Gazette,* Montreal, 19 November 1891.
115. *Glasgow Weekly Herald,* 20 September 1890. Modified version of the original *Glasgow Weekly Herald* problem:



115. Mate in 2. Key: Sg2.

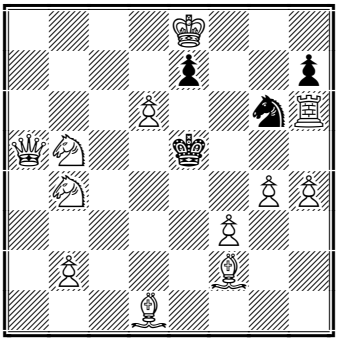
A manuscript note referring to the *700 Chess Problems* version reads: '*Glasgow Herald* problem with one pawn less, white king could be placed on QRsq, if preferred.'
116. *Illustrated Sporting and Dramatic News,* 13 July 1895.
117. *Lady's Pictorial,* 29 June 1895.
118. *Shoreditch Citizen,* 15 December 1888.
119. *Daily News,* 20 July 1901.
120. *British Chess Magazine,* December 1889. Originally published with a BP instead of a BB on c2. Mrs. Baird: 'A black bishop instead of the black pawn on bishop seventh would be an improvement'.
121. *Rossendale Free Press,* 12 January 1895.
122. *Nottinghamshire Guardian,* 12 September 1891.
123. *Standard,* 25 October 1893.
124. *Chess Review,* [September?] 1892.
125. *Cape Times,* 16 December 1893.
126. *Westminster Gazette,* 6 October 1900.
127. *Kentish Mercury,* [April/May] 1894. Originally published with a white B on a8 instead of b7. Mrs. Baird: 'I prefer this B on Kt7'.
128. *Brighton and Hove Society,* 22 December 1900.
129. *Field,* 26 November 1892.
130. *Hampstead and Highgate Express,* 19 May 1894.
131. *Southern Counties' Chess Journal,* April 1895.
132. *The Morning,* 5 December 1894. This was originally published in *The Morning*. A note in Mrs. Baird's handwriting indicates that it was subsequently republished in *Western Morning News* and *Birmingham Weekly Post*.
133. *Pen and Pencil,* 29 September 1888.
133a. *Pen and Pencil,* 11 August 1888.
134. *Leisure Hour,* January 1901.
135. *Standard,* 25 February 1895. Original version:



135. Mate in #2. Key: Qb6.

The version published in *700 Chess Problems* was preferred by Mrs. Baird as having a better key.
135a. *A1* (New Zealand), 6 July 1895.
136. *Newcastle Weekly Chronicle,* 9 March 1895
137. *Barnet Press,* 12 January 1895
138. *Times Weekly Edition,* 1 March 1895

139. *Illustrated Sporting and Dramatic News*, 28 October 1899
140. *Bradford Observer Budget*, 7 September 1895
141. *Cricket and Football Field*, [November?] 1892.
142. *Vanity Fair*, 5 January 1889. Problem 142 is a better version of the problem published in *Vanity Fair*, which took the form:



142. Mate in 2. Key: Qd8.

143. *Brighton Society*, 9 May 1896.
144. *Hackney Mercury*, 11 March 1893.
145. *Devon and Exeter Gazette*, 29 January 1901.
146. *Manchester Weekly Times*, 15 September 1893.
146a. *Manchester Weekly Times*, 13 December 1901.
147. *Hampstead and Highgate Express*, 26 January 1895.
148. *Newcastle Weekly Chronicle*, 5 December 1891.
149. *Times Weekly Edition*, 26 May 1893.

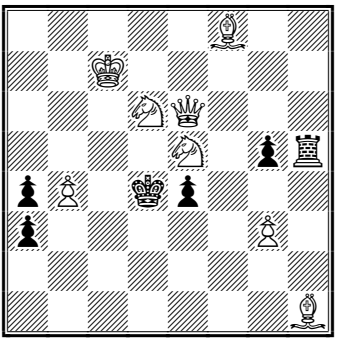
151. *Glasgow Weekly Herald*, 16 January 1892.
152. *Leeds Mercury Weekly Supplement*, 6 January 1894.
153. *Illustrated Sporting and Dramatic News*, 30 November 1889.
154. *Liverpool Mercury*, 2 March 1901.
154a. *Liverpool Mercury*, 6 July 1895.
155. *British Chess Magazine*, April 1890.
156. *Brighton Society*, 9 March 1895.
157. *Daily News*, 25 October 1900.
158. *Hereford Times*, 28 November 1891.
159. *Manchester Weekly Times*, 22 February 1895.
160. *Field*, 16 September 1893.
161. *Cape Times Weekly Edition*, 22 August 1894. Original version:



161. Mate in 2. Key: Qa2.

Mrs. Baird considered the version in *700 Chess Problems* to be better.
162. *Wallasey and Wirral Chronicle*, 2 June 1894.
163. *Kentish Mercury*, 20 November 1891.
164. *Sheffield Weekly Independent*, 23 February 1889.
165. *Standard*, 4 June 1894.
166. *Pictorial World*, 2 October 1890.
In the original version of this problem a WR was on e7 rather than g7, and a WB on h7 rather than g6. The key was Rg7. The changes were introduced to achieve a better key move.
167. *Glasgow Weekly Herald*, 20 May 1893.
168. *Manchester Weekly Times*, 3 August 1900.
169. *Daily Telegraph*, 25 August 1900.
170. *Southern Counties' Chess Journal*, August 1893.

171. *West Sussex Times and Standard.* Originally published without the WP on f3.
172. *Hereford Times,* 6 August 1892. Originally published with a WS on a4 instead of d3. Mrs. Baird: 'This problem would be equally sound with the white Kt on Q3 instead of R4, making the key better as it would give up the Kt'.
In this improved version the problem appeared in the *Pall Mall Gazette* of 12 February 1901.
173. *Chess Review,* October 1892.
174. *Illustrated Sporting and Dramatic News,* 3 November 1888.
175. *Brighton Society,* 27 July 1895.
176. *Womanhood,* 1 February 1901.
177. *Times Weekly Edition,* 30 March 1894.
178. *British Chess Magazine,* December 1891. In the original version the WQ was on c1, and there was an additonal WP on f2. The version in *700 Chess Problems* was judged to be better by the composer.
179. *Manchester Weekly Times,* 17 August 1894.

FAREWELL

My task is done; and like the bard of old,
My toils are over; and my tale is told;
Yet still I pause beneath the enchanter's spell–
Still hesitate to say the word "Farewell":
But howso we may linger o'er the past
The parting word must be pronounced at last.
So, critics all, I thank your kind attention
To these few pages of my poor invention;
Whether your verdict be for good or ill–
In praise or blame–yea–I would thank you still.
But should I one approving glance descry
My goal is numbered–or, in fact, if I
One smile–one joy–one pleasing look have won,
Then farewell all, my destined task is done.

CANADIAN CHESS PROBLEMS

PREFACE TO ELECTRONIC EDITION

This volume is an electronic edition of *Canadian Chess Problems,* published 1890 by C. F. Stubbs, St. John, N.B., Canada and printed by Ellis, Robertson & Co at the "Globe Press." It has been republished as an experiment in electronic publishing, and chosen partly because of its modest size, partly because of its relative scarcity.

The important change introduced in this edition is the translation of the solutions into algebraic form; the remaining changes are only editorial. The following printing errors in the original have been corrected:

Problem 38: White K on H7 changed to White Q.
Problem 202: Black to play, not White

All problems have been tested for serious errors, which have been indicated in the stipulation line as follows:

[†] A problem without a solution
[*] A problem with several solutions

Further details, and an occasional suggestion for correction, can be found in the solution section.

For the typographically inclined reader, the text has been produced using Adobe FrameMaker with the text of the book set in Utopia™ from Adobe, and the diagrams in Hastings Diagram from Alpine Electronics.

As far as I am concerned, this electronical edition is free, and may be used by anyone in any way whatsoever.

SEVENTY-FIVE
CHESS PROBLEMS

SEVENTY-FIVE CHESS PROBLEMS

by John Thursby,
Trinity Coll., Camb.,

[1883]

An Electronic Edition
Anders Thulin, Malmö · 2000-07-29

DEDICATED

to the Rev. W. Thursby

Jan., 1st, 1883

PREFACE

It seems to be custom to say a few words to the public, when offering a collection of Chess Problems, and this custom I shall shortly avail myself of. The stratagems contained in this book are a selection from the many Problems composed by me, and published during the last six years in all the leading journals and magazines at home and abroad.

I do not claim for my problems any especial or extraordinary profundity, nor do I intend to set myself up as a rival to other Chess authors; but I believe that any Chess-player who takes the trouble to look through my book, will find in it amusement and pleasure. I do not pretend to be able to give hints on construction, or to lay down dogmatic rules in Problem art.

In conclusion, I ought to state that I have always been treated with the greatest courtesy by every Chess Editor with whom I have corresponded, with, I regret to say, one notable exception.

PREFACE TO ELECTRONICAL EDITION

This is an electronical edition of John Thursby's Seventy-Five Chess Problems, published in 1883 by Jas. Wade, London. The main changes are: changing the layout from one diagram per page to four, and translating solutions from descriptive notation to algebraic.

All problems have been checked by computer: Matthieu Leschemelle's Problemiste was used for all problems up to and including 5 moves; Popeye was used for the remaining 6-mover.

Found problems have been indicated as follows:

[†] indicates a problem without a solution, and

[*] indicates a problem with several key moves.

In the solutions section, found problems are documented in square brackets, with an occasional suggestion for correction.
