Banking

National Automated Clearing House Association (NACHA). With the Banking Content Pack, leverage a library of offerings to meet your unique business needs in: Core Banking, Payments, Customer Care and Integrated Risk Management. Utilize extensible Mortgage Refinancing and Corporate Payments solution scenarios that serve as starting points for Proofs of Concepts and solution implementations. The IBM Banking Content Pack is a core offering of the IBM Banking Industry Framework.

The IBM Banking Industry Framework helps you build a configurable, industry-specific software platform to deploy solutions faster and at lower cost and risk. This framework can help you migrate to a more strategic and flexible technology architecture that is aligned with the needs of your business, one project at a time. Increase your competitiveness by taking advantage of a structured approach that combines best-in-class banking software assets, repeatable software patterns and IBM Business Partner offerings to improve customer care and insight, integrate risk management and deliver efficient payments systems and core banking transformation.
