Notices

References in this publication to IBM products, programs, or services do not imply that IBM intends to make these available in all countries in which IBM operates. Any reference to an IBM product, program, or service is not intended to state or imply that only IBM's product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any of IBM's intellectual property rights may be used instead of the IBM product, program, or service. Evaluation and verification of operation in conjunction with other products, except those expressly designated by IBM, is the user's responsibility.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to the IBM Director of Licensing, IBM Corporation, 500 Columbus Avenue, Thornwood, New York 10594, U.S.A.

European Union (EU) Statement

This product is in conformity with the protection requirements of EU Council Directive 89/336/EEC on the approximation of the laws of the Member States relating to electromagnetic compatibility. IBM can not accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the fitting of non-IBM option cards.

Year 2000 Statement

This product is Year 2000 ready. When used in accordance with its associated documentation, it is capable of correctly processing, providing, and/or receiving date data within and between the 20th and 21st centuries, provided all other products (for example, software, hardware, and firmware) used with the product properly exchange accurate date data with it.

For more information, refer to:

http://www.ibm.com/year2000

Electronic Emission Notices

Federal Communications Commission (FCC) Statement

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. IBM is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Industry Canada Compliance Statement

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Avis de conformité aux normes d'Industrie Canada

Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

Japanese Voluntary Control Council For Interference (VCCI) Statement

This equipment is in the 1st Class category (information equipment to be used in commercial and/or industrial areas) and conforms to the standards set by the Voluntary Control Council for Interference by Information Technology Equipment aimed at preventing radio interference in commercial and industrial areas.

Consequently, when used in a residential area or in an adjacent area thereto, radio interference may be caused to radios and TV receivers, and so on.

Read the instructions for correct handling.

Power Line Harmonics (JEIDA) Statement

The guidelines of power line harmonics required by JEIDA are satisfied.

Korean Communications Statement

Please note that this device has been approved for business purpose with regard to electromagnetic interference. If you find this is not suitable for your use, you may exchange it for a non-business one.

New Zealand Radiocommunications (Radio) Regulations

Attention: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Taiwanese Class A Warning Statement

This is a Class A product. In a domestic environment this product may cause radio interference in which case the user will be required to take adequate measures.

警告使用者：
這是甲類的資訊產品，在
居住的環境中使用時，可
能會造成射頻干擾，在這
種情況下，使用者會被要
求採取某些適當的對策。

Trademarks and Service Marks

The following terms, denoted by an asterisk (*), used in this publication, are trademarks or service marks of IBM Corporation in the United States or other countries:

Product Safety Information

General Safety

This product meets IBM safety standards.

Safety Notices

For *Safety Notices* refer to *IBM 3745 Communication Controller All Models*, *IBM 3746 Expansion Unit Model 900*, *IBM 3746 Nways Multiprotocol Controller Model 950*, *Safety Information*, GA33-0400

Safety Notices for United Kingdom

1. The IBM 3746 Expansion Unit Model 900 and IBM 3746 Nways Multiprotocol Controller Model 950 are manufactured according to the International Safety Standard EN 60950 and as such are approved in the UK under the General Approval Number NS/G/1234/J/100003 for indirect connection to the public telecommunication network.

2. The network adapter interfaces housed within the IBM 3746 Expansion Unit Model 900 and IBM 3746 Nways Multiprotocol Controller Model 950 are approved separately, each one having its own independent approval number. These interface adapters, supplied by IBM, do not use or contain excessive voltages. An excessive voltage is one that exceeds 42.4 V peak ac or 60 V dc. They interface with the IBM 3746 Expansion Unit Model 900 and IBM 3746 Nways Multiprotocol Controller Model 950 using Safety Extra Low Voltages (SELV) only. In order to maintain the separate (independent) approval of the IBM adapters, it is essential that other optional cards, not supplied by IBM, do not use mains voltages or any other excessive voltages. Seek advice from a competent engineer before installing other adapters not supplied by IBM.

Service Inspection Procedures

The Service Inspection Procedures help service personnel check whether the 3745/3746 conforms to IBM safety criteria. They have to be used each time the 3745/3746 safety is suspected. The *Service Inspection Procedures* section is located at the beginning of the:

- *3745 Communication Controller Models 210 to 61A Maintenance Information Procedures*, SY33-2054
- *3745 Communication Controller Models 130 to 17A Maintenance Information Procedures*, SY33-2070
- *3746-950 Service Guide*, SY33-2108.
- *3746-900 Service Guide*, SY33-2116.

The 3745/3746 areas and functions checked through service inspection procedures are:

1. External covers

2. Safety labels

3. Safety covers and shields

4. Grounding

5. Circuit breaker and protector rating

6. Input power voltage

7. Test of emergency power OFF/control power switch.

8. Power-ON indicator

About this Book

Who Should Use this Book

The IBM personnel using this book should be:

- Trained to service the Service Processor, IBM 3745 Communication Controller, 3746-900, and 3746-950.

- Familiar with the configuration of the 3745 Communication Controller, 3746-900, and 3746-950.

- Familiar with the SP and NNP service documentation.

How to Use this Book

This book provides procedures for installing and maintaining the microcode installed on a service processor and a network node processor.
To ensure the efficency of the procedures:

- Read the instructions carefully before attempting to do them,

- Complete each step before going to the next one,

- Go through the chapters sequentially.

How this Book is Organized

Chapter 1   Introduces the service processor configuration and gives general information to access the information.

Chapter 2   Presents the software maintenance procedures for the service processor.

Chapter 3   Presents the software maintenance procedures for the network node processor.

Appendix A   Service and customer documentation bibliography.

A **list of abbreviations**, and an **index** are provided at the end of this book.

Where to Find More Information

For a complete list of the Service Processor, 3745, 3746-900, and 3746-950 customer and service information manuals, see at the end of this manual. In this manual, references are made to the following publications:

Multiaccess Enclosure Installation and Maintenance Guide, SY33-2124

3746-950 Installation Guide, SY33-2107

3746-900 Installation Guide, SY33-2114

3745 Communication Controller Models 210 to 61A Maintenance Information Procedures, SY33-2054

3745 Communication Controller Models 130 to 17A Maintenance Information Procedures, SY33-2070

3746-950 Service Guide, SY33-2108

3746-900 Service Guide, SY33-2116

3745 Communication Controller Models A and 3746 Models 900 and 950: Planning Guide, GA33-0457

World Wide Web

You can access the latest news and information about IBM network products, customer service and support, and microcode upgrades via the Internet at the URL: http://www.lagaude.ibm.com/3746pe

Online Documentation from CD-ROM

Starting at EC F12380 (and above), with the service processor is shipped a CD which contains the LIC and a copy of the 3746 web site. You will find from this web page, marketing, PE, and all information about CCP products.

To access this page:

1. Insert the CD into the CD disk drive of the SP.

2. From the MOSS-E primary menu, click on **Information**

3. Double click on **CD-ROM documentation**

4. Then if you want to display the CCP documentation, click on **Documentation**

5. Click on **La Gaude Information Development: Communication Controllers Information**

Note: To have the very last version of the web site, connect to Internet at: http://w3.lagaude.ibm.com/ccp/3746.htm

Service Personnel Definitions

See the *3745 Communication Controller Models 210 to 61A Maintenance Information Procedures*, SY33-2054, *3745 Communication Controller Models 130 to 17A Maintenance Information Procedures*, SY33-2070, or the *3746-950 Service Guide*, SY33-2108.

Chapter 1. Introducing the Service Processor and the Network Node Processor

General Information

Help for Using Your Service Processor

There are **three** ways to access the **Help information** by clicking on:

1. The **Help** option of the **title bar** of the screen (example: see Figure 1-3 on page 1-3).
2. The **Help push button** (example: see Figure 1-7 on page 1-4).
3. An **input field** then pressing **F1** (example: input field "Search For" in Figure 1-7 on page 1-4).

MOSS-E View Primary Window

Figure 1-1 shows the configuration of two communication controllers:

1. A 3745 X1A with a 3746-900 frame and a NNP installed

2. A 3745 X1A.

Figure 1-2 represents the configuration of one 3746-950 with a network node processor installed.

From these screens, clicking on Program , Information, or Help, you will get all the information to manage your controller. The other options will help you find specific information (see Figure 1-4 on page 1-3, Figure 1-5 on page 1-3, and Figure 1-3 on page 1-3).

Figure 1-1. MOSS-E View Primary Window

Figure 1-2. One 3746-950

Figure 1-3. Help Pull Down Menu

Figure 1-4. Program Pull Down Menu

Figure 1-5. Information Pull Down Menu

Searching for Specific Information

1. From the Help pull down menu (see Figure 1-3 on page 1-3), select **Help for Help.**

2. Click on **Services** on the title bar of the MOSS-E help panel.

3. Click on **Search** on the title bar of the search window

4. Enter your search **argument** to get all the occurrences in all the available online information.

Figure   1-6. Services Pull Down Menu

Figure   1-7. Search Window

Displaying Your Machine Status

The first indication of the **machine status** is given by the **color** of the **3745 and the 3746-9x0 object icons**. To obtain the meaning of the colors do the following:

1. From the **Information pull down menu** click on **Legend** (see Figure 1-5 on page 1-3).

2. The meaning of the colors is now displayed in the MOSS-E legend window. **Scroll forward** to see the complete list of the colors.

At any time during IML, or while the system is operational you can display your machine status:

1. Click on the **3746-9x0** or **3745 object** icon using the **right button** of the mouse

2. Click on **status** pulldown option, the following screens are displayed (see Figure 1-8 for the 3746-9x0 and Figure 1-9 on page 1-6 or Figure 1-10 on page 1-6 for the 3745 X1A or 17A).

3746-9x0 Status Display

Figure 1-8. 3746-9x0 Status Display

3745 Status Display

Figure   1-9. 3745 Model X1A Status Display

Figure   1-10. 3745 Model 17A Status Display

Network Node Processor Status

The color of the network node processor icon gives the status of the nnp-a. This information can be obtained on-line from the information pulldown menu when selecting 'Legend'. Top to bottom the icon's color is: transparent, grey, blue, purple, white, and green.

Figure 1-11. Network Node Processor Status

Accessing the Functions

How to Get the Service Processor Maintenance Functions

1. Enter the **Service Processor Maintenance** password on the signon menu (default password: *IBM3745* or ask the customer if a specific password has been defined).

2. Double click on the **Service Processor object icon** , you will get the following screen:

Figure 1-12. Service Processor Maintenance Functions

3. Click on Configuration Management, Operation Management, Problem Management, or Change Management to get the list of all the functions available.

Figure 1-13. Service Processor Configuration Management Functions

Figure 1-14. Service Processor Problem Management Functions

Figure 1-15. Service Processor Operation Management Functions

Figure 1-16. Service Processor Change Management Functions

Figure 1-17. Service Processor PE Functions

How to Get the Network Node Processor Functions

1. Enter the **Service Processor Maintenance** password on the signon menu (default password: *IBM3745* or ask the customer if a specific password has been defined).

2. Double click on the **3746-900 or 3746-950 object icon** , you will get the following screen:

Figure   1-18. 3746-9x0 Maintenance Functions

3. Click on **Network Node Processor (NNP) Management**.

Figure   1-19. Network Node Processor Management Functions

How to Get the 3746-9x0 Controller Maintenance Functions

1. Enter the **Controller Maintenance** password on the signon menu (default password: *IBM3745* or ask the customer if a specific password has been defined).

2. Double click on the **Controller 3746-9x0** object icon you will get the following screen:

Figure 1-20. 3746-9x0 Maintenance Controller Functions

3. Click on **Configuration Management**, **Problem Management**, **Operation Management**, **Change Management**, **Performance Management**, or **Functions to Use Under PE Guidance** for details of the functions (see the following screens).

Figure 1-21. 3746-9x0 Change Management Functions

Chapter 2. Maintaining the Code Loaded on the Service Processor

---

Note

In this chapter there is no information about the multiaccess enclosure, If a MAE is installed, refer to *Multiaccess Enclosure Installation and Maintenance Guide*, SY33-2124 chapter 'Maintaining the Code on the MAE'.

Maintenance Service Procedures

> **Note**
>
> For any error related to the service processor, go to the **START** page of:
>
> - The *3745 Communication Controller Models 210 to 61A Maintenance Information Procedures*, SY33-2054 (**3745 Model X1A**)
> - The *3745 Communication Controller Models 130 to 17A Maintenance Information Procedures*, SY33-2070 (**3745 Model 17A**)
> - The *3746-900 Service Guide*, SY33-2116 (**3746-900**)
> - Or the *3746-950 Service Guide*, SY33-2108 (**3746-950**)

Displaying the Level of the Code Installed On the Hard Disk

1. ____ Double click on the **"Service Processor object icon"**

2. ____ Click on **"Change Management"**

3. ____ Double click on **"Manage Microcode Change"** (see Figure 1-12 on page 1-8).

4. ____ Click on the **"Browse Microcode Information"**

5. ____ Click on **"OK"** to validate your choice.

6. ____ Select the code to be displayed.

7. ____ Click on **"View"**.

8. ____ Select from the view pulldown menu the **Retrieved, Activated, or Accepted changes** option.

9. ____ Press the **"Esc"** key three times to exit from the function.

Shutting Down the Service Processor

> **Note**
>
> Before powering OFF or to reinitialize the Service Processor from a diskette or from the hard disk, use this procedure to properly close all the active functions.

1. ____ On the "MOSS-E view" window click on **"Program"** (see Figure 1-4 on page 1-3).

2. ____ Click on **"Shut down"**, then enter the Service Processor maintenance password (default is IBM3745) and click on **"OK"**.
   You are now able to power OFF or reboot the Service Processor.

Restoring Data on the SP Hard Disk from a CD-ROM

Notes

1. This function is **not disruptive** as it applies to the non-active version of the code loaded on the SP hard drive.
2. This function can be used to **restore a back level** of the code.
3. It restores **only the LIC**, if you want to restore the configuration files, use the function 'Manage Disks and Databases' and take the option 'Restore databases from diskette'.
4. If an **NNP** is installed, its code is also **restored automatically**.
---

1. ____ From the service processor menu, click on **Configuration Management**

Figure 2-1. SP Configuration Management Menu

2. ____ Insert the optical disk or CD-ROM in the appropriate SP disk drive, double click on **Restore SP (&NNP) LIC on non-active version**, then follow the prompts.

Figure 2-2. Service Processor Menu

3. ____ Then to activate the changes, use the function 'toggle to non-active version' to load and execute the new code in the processors (refer to "Changing the Active Code" on page 2-8).

Saving/Restoring Configuration on Diskette

> **Note**
>
> This **MOSS-E** function is used to:
>
> 1. **Define** the **frequency** and the time to **reorganize** the hard disk **database**.
> 2. **Save the configuration parameters** on diskette when the machine configuration has been upgraded.
> 3. **Restore the configuration parameters** from the diskette.

1. ____ If not already logged, enter the **Service Processor maintenance password** (default is IBM3745).

2. ____ Double click on the **"Service Processor icon"**.

3. ____ Click on **"Operation Management"**.

4. ____ Double click on **"Manage Disks and Databases"**

Figure 2-3. Operation Management Service Processor Menu

5. ____ Depending on the function you want to perform, use the radio buttons to select one of the options:

Figure 2-4. Disk and Databases Management

6. ____ Click on **"OK"** and follow the prompts.

7. ____ Click on **"Cancel"** to exit from the function.

Note: After restoring the configuration parameters, the Service Processor must be reinitialized to take in account these parameters, press **"Ctrl - Alt - Del"**.

Saving Configuration Parameters on the 374X Installation Parameters Diskette

> **Note**
>
> This **MOSS-E** function is used to:
>
> 1. **Build** a 3745 or 3746-9x0 installation parameters diskette when one of this diskette is damaged or lost. It is the operator responsibility to provide a new formatted diskette free of errors.
>
> 2. **Update** a 3745 or 3746-9x0 installation parameters diskette with the information recorded on the hard disk.
>
> 3. This function is available when the machine is already configured and recorded on the service processor hard disk.

1. ____ If not already logged, enter the **Service Processor maintenance password** (default is IBM3745).

2. ____ Double click on the **"Service Processor icon"**.

3. ____ Click on **"Configuration management"**.

4. ____ Double click on **"Manage 3745/3746-9x0 installation /removal"**.

5. ____ Click on line of the 3745 or 3746-9x0 that you want to save the configuration parameters, click on **"Save"**.

Figure 2-5. Controller Installation

6. ____ When prompted, insert the new diskette.

Saving/Deleting Engineering Data

Note

This **MOSS-E** function is used to:

1. **Save** the engineering data when the DL2 link is not available or in error.

2. **Delete** the engineering data when they have been successfully recorded on diskette, or transferred to a support center via DCAF.

---

1. ____ If not already logged, enter the **Service Processor maintenance password** (default is IBM3745).

2. ____ Double click on the **"Service Processor icon"**.

3. ____ Click on **"Operation Management"**.

4. ____ Double click on **"Manage Engineering Data"**, then follow the prompts.

Figure   2-6. Manage Engineering Data Menu

When this data is transferred or recorded properly on the disk, you can erase the file which contained it.

1. ____ Click on **"Delete from disk"**, then follow the prompts.

Installing a New Version of the LIC on a Service Processor

Changing the Active Code

> **Notes**
>
> 1. This function is **disruptive** and it is used to switch the non-active partition and the active partition. It reboots the SP and the NNPs (if any).
>
> 2. Use this function after a LIC upgrade or a LIC restore to load the processors with the new LIC.

1. _____ From the service processor menu, click on **Change Management**

Figure 2-7. Service Processor Change Management Menu

2. _____ Double click on **Switch to non-active version**, then follow the prompts.

Figure 2-8. Service Processor Menu

Reporting Problem to RETAIN

Note
This function is used to initiate the **first link** to **RETAIN** after a 3745 XXA or a 3746-9x0 **installation**.

Manually Reporting a Problem to RETAIN from a 3745 - XXA

1. ____ Double click on the **3745 object icon**.

2. ____ Click on **"Problem Management"**, then scroll forward.

3. ____ Double click on **"Report Problem using Remote Support Facility"**.

4. ____ Enter a **short description** of the problem then click on **"OK"**.

5. ____ Wait for the message "Call to RETAIN successful" indicating the normal end of the transmission.
   If you get the message "Call to RETAIN unsuccessful", record the Customer Problem Number (CPN) and go to:

   - The **START** page of the *3745 Communication Controller Models 210 to 61A Maintenance Information Procedures*, SY33-2054, if you are working on a **3745 Model X1A**.

   - Or go to the **START** page of the *3745 Communication Controller Models 130 to 17A Maintenance Information Procedures*, SY33-2070, if you are workingon a **3745 Model 17A**.

Figure 2-9. Link to RETAIN

Manually Reporting a Problem to RETAIN from a 3746-9x0

1. ____ Double click on the **"3746-9x0 object icon"**.

2. ____ Click on **"Problem management"**.

3. ____ Double click on **"Report Problem using Remote Support Facility"**.

4. ____ See Figure 2-9 on page 2-9, enter a **short description** of the problem then click on **"OK"**.

5. ____ Wait for the message "Call to RETAIN successful" indicating the normal end of the transmission.

   If you get the message "Call to RETAIN unsuccessful", record the Customer Problem Number(CPN) and go to:

   - The **START** page of the *3746-950 Service Guide*, SY33-2108, if you are working on a **3746 Model 950**.

   - Or go to the **START** page of the *3746-900 Service Guide*, SY33-2116, if you are working on a **3746 Model 900**.

Handling Microcode Fixes on the Licensed Internal Code

Applying Microcode Fixes on the Licensed Internal Code

Note

- This function is used to fix emergency problems on code and must be executed on Product Engineering recommendations.
---

1. ____ If you have received MCFs through VM, copy these MCFs on a diskette or optical disk (we recommend to use ALMCOPY to download these files in binary format).

2. ____ Install the diskette or the optical disk in the Service Processor diskette or disk drive.

3. ____ Enter the Service Processor maintenance password (default is IBM3745).

4. ____ Double click on the **"Service Processor object icon"**.

5. ____ Click on **"Change Management"**.

6. ____ Double click on **"Manage Microcode Fixes"** (see Figure 1-16 on page 1-9).

7. ____ Click on **"View"**, click on **"Change directory path"**

8. ____ Enter **A:*.*** to select the MCFs recorded on the diskette or **T:*.*** for optical disk, and click on **"OK"**.

   Note: The optical disk is **X** for the 400 Meg hard drive installed on a 9577.

9. ____ On the list displayed, click on the **fixes** to be applied.

10. ____ Click on **"File"**, click on **"Move"**

11. ____ when the change path is displayed, enter the directory path according to the information displayed on the following screen (in this example 'SR3_863D' MCFs are in J:\CM1) , then click on **"OK"**.

- **J:\CM1\ALL** for MCF concerning the 3746-9x0 number 1

- **J:\CM2\ALL** for MCF concerning the 3746-9x0 number 2

- **J:\MAE\ALL** for MCF concerning the MAE

- **J:\MCF\ALL** for all other MCFs.

```
Change Directory Path

Enter the full path of file or directory to be displayed following the format
(drive:\directory\filename.extension or *), or click on the OK push button
for default directory:

SERVICE PROCESSOR , PATH TO FIXES: J:\MCF\

SR3_863D, SN: 11-23456 , PATH TO FIXES: J:\CM1\

MAE BLPU, PATH TO FIXES: J:\MAE

[ LL                                                        ]

  OK    Cancel    Help
```

Figure 2-10. Manage Microcode Fixes

12. ____ Enter **"the directory path"** (see step 11) then click on **"OK"**.

```
Move Microcode Fix Files

Enter the new path specification following the format (drive:\directory):
UK4BS7, SN: 12-34567 , PATH TO FIXES: J:\CM1\
BS2, SN: 55-55555 , PATH TO FIXES: J:\CM2\

[                                                           ]

  OK    Cancel    Help
```

Figure 2-11. Manage Microcode Fixes

13. ____ Click on the lines of the MCFs to be applied (see example in the Figure 2-12 on page 2-13)

14. ____ Click on **"Options"** and from the **Options** pull down menu click on
    Activate microcode fix

```

Figure 2-12. Manage Microcode Fixes

15. ____ Remove the diskette or the optical disk from the drive.

16. ____ The service processor or the 3746-9x0 are now reinitialized depending on
    the MCFs type:

    • If the **MCFs** concern the **3746-900 code**, click on **"OK"** twice to re-IML the
      3746-900, verify the MCFs status it must be **"ACT"** and then go to **step 18**
      .

    • If the **MCFs** concern the **service processor code**, click on **"OK"** to
      shutdown the service processor, an automatic IPL of the service processor
      is performed and then go to **step 17** .

17. ____ Verify the MCFs status:

    a. ____ Enter the Service Processor maintenance password

    b. ____ Double click on the **"Service Processor object icon"**.

    c. ____ Click on **"Change Management"**.

    d. ____ Double click on **"Manage Microcode Fixes"**

    e. ____ Click on **"View"**, click on **"Change directory path"**

    f. ____ Enter the **"directory path"**: **J:\MCF**.

    g. ____ Click on **OK** and verify the MCFs status, it must be **"ACT"**.

18. ____ Click on the **"System Menu Icon"**, click on **"Close"** to exit from the
    function.

Removing Microcode Fixes on the Licensed Internal Code

> **── Note ──**
>
> If you have a **"backup"** service processor, perform the same procedures on this SP to remove the MCFs.

1. ____ Enter the Service Processor maintenance password (default is IBM3745).

2. ____ Double click on the **"Service Processor object icon"**.

3. ____ Click on **"Change Management"**.

4. ____ Double click on **"Manage Microcode Fixes"** (see Figure 1-16 on page 1-9).

5. ____ Click on **"View"**, click on **"Change directory path"**

6. ____ Enter the **"directory path"**:

   - **J:\CM1** for MCF concerning the 3746-900 number 1
   - **J:\CM2** for MCF concerning the 3746-900 number 2
   - **J:\MAE\ALL** for MCF concerning the MAE
   - **J:\MCF** for all other MCFs.

   Then click on **OK**.

7. ____ Click on the lines of the MCFs to be removed (see Figure 2-12 on page 2-13)

8. ____ Click on **"Options"** and from the **Options** pull down menu click on **"Deactivate microcode fix"**

   - If the **MCFs** concern the **3746-900 code**, click on **"OK"** twice to re-IML the 3746-900, verify the MCFs status, it must be **"DEACT"** and then go to **step 10** .
   - If the **MCFs** concern the **service processor code**, click on **"OK"** to shutdown the service processor, an automatic IPL of the service processor is performed and then go to **step 9** .

9. ____ Verify the MCFs status:

   a. ____ Enter the Service Processor maintenance password

   b. ____ Double click on the **"Service Processor object icon"**.

   c. ____ Click on **"Change Management"**.

   d. ____ Double click on **"Manage Microcode Fixes"**

   e. ____ Click on **"View"**, click on **"Change directory path"**

   f. ____ Enter the **"directory path"**: **J:\MCF**.

   g. ____ Click on **OK** and verify the MCFs status, it must be **"DEACT"**.

10. ____ Click on the **"System Menu Icon"**, click on **"Close"** to exit from the function.

3746-9x0 EEPROM Upgrade or Downgrade

Notes

1. This function will be used after a:

   - Microcode change fix (MCF)
   - EC installation
   - Processor replacement

2. While an EEPROM Upgrade/Downgrade is running, **Do not** power OFF or IML the 3746-9x0

3. Following an EEPROM upgrade/downgrade and if you have a SP backup it is recommended to apply the same procedure on the SP backup.

4. For any error code displayed on the 3746-9x0 panel go to the **START** page of the:

   - *3745 Communication Controller Models 210 to 61A Maintenance Information Procedures*, SY33-2054 (3746-900 attached to 3745-X1A)

   - *3745 Communication Controller Models 130 to 17A Maintenance Information Procedures*, SY33-2070 (3746-900 attached to 3745-17A)

   - *3746-950 Service Guide*, SY33-2108 (3746-950)

---

1. ____ On the "MOSS-E VIEW" window, double click on the **"3746-9x0 icon"** (see Note 1).

2. ____ On the "3746-9x0 Menu" window click on **"Change Management"**.

3. ____ Double click on the **"Upgrade/Downgrade EEPROM Code Level"**.
   A window is displayed with a message box saying that the service processor is searching the 3746-9x0 configuration.
   On "EEPROM Upgrade" window, the upgradable or downgradable processors are `highlighted` according to the preselected status of the options "Upgrade" or "Downgrade" on the top of the window (see Figure 2-13 on page 2-16).

```
          O Upgrade     O Downgrade  (Note 2)

   Processor        EEPROM level: PN - EC - MCL      Upgrade
                                                     Status

         │  OK  │      │  CANCEL  │      │ HELP │
         └──────┘      └──────────┘      └──────┘
```

Figure   2-13. Example of An EEPROM Upgrade Window

- ▪1 Gives the list of the 3746-9x0 processors in CDF-E with their status (available/disconnected/active).
- ▪2 Gives the current and new EEPROM level: PN/EC/Level of each processor.
- ▪3 Gives the status after the activation of the function.

4. ____ Select the **"Upgrade"** or **"Downgrade"** option on the top of the screen then click on "OK" according to the action that you want do do.
An "EEPROM Upgrade" window informs you that the EEPROM upgrade or downgrade is in progress with its time duration.
At the end, a status is displayed for each processor.

5. ____ Check the result of your EEPROM upgrade/downgrade operation with the following table and take the appropriate action:

EEPROM Status	Action
Complete	Upgrade done without error continue with the next step.
Start failed	Call your support
Failed	Call your support
Completion failed	Call your support

Note: If you have done the EEPROM Upgrade after exchanging a processor leave this procedure and return to the point, in the MAP where you come from. Otherwise continue with the next step.

6. ____ Return to the "3746-9x0 Menu" click on **"Operation Management"**.

7. ____ Double click on the **"Perform General IML"** with **"Diagnostics"**.
A Normal IML must be terminated by 00000000 displayed on the 3746-9x0 control panel.

Managing the Passwords

Changing the Service Processor and Controller Passwords

Different passwords are defined, the default password is **IBM3745**:

1. The Service Processor maintenance password
2. The Service Processor customer password
3. The Controller maintenance password
4. The Controller customer password
5. The password to access password management
6. The CCM/TELNET user user profiles management

Refer to the appendix of the *3745/17A-61A and 3746-900 Basic Operations Guide*, SA33-0177 or *3746 Nways Multiprotocol Controller Model 950 User's Guide*, SA33-0356 to obtain the list of the functions accessible to the user depending on the password.

Notes

1. If the password contains numeric digits, don't forget to enable the numeric keys by clicking on the numeric lock key (NumLk).

2. If you have a **backup** Service Processor do not forget to update your passwords on this Service Processor using the same procedure.

---

1. ____ Double click on the **"Service Processor object icon"**.

2. ____ Click on **"Operation Management"**

3. ____ Double click on **"Manage Passwords"** function (see Figure 1-12 on page 1-8)

4. ____ Ask the customer to obtain the **management password** reserved for this function (the default password is **IBM3745**).

5. ____ Enter the password and click on **"OK"**.

6. ____ Click on **"MOSS-E view passwords"**.

Figure 2-14. Management Password

7. ____ Click on **"OK"**

8. ____ On the following screen, enter or ask the customer to enter the **4 different passwords**.

Figure 2-15. MOSS-E View Password

9. ____ Click on **"Apply"**

10. ____ Select **Management password**

11. ____ Click on **"OK"**

12. ____ In the following screen, enter or ask the customer to enter the
Management password and modify the **attempt threshold** value if necessary.

Figure 2-16. Management Password

13. ____ Click on **"Apply"**

14. _____ Click on **"CCM/Telnet user profiles management"**, then click on **"help"** and enter the required parameters

Figure 2-17. CCM/Telnet Management Password

15. _____ Click on **"OK"**

16. _____ Click on **"Cancel"** to leave the function.

Changing the Password for DCAF

Note

If you have a **backup** Service Processor do not forget to update the DCAF password on this Service Processor using the same procedure.

---

1. _____ Double click on the **"Service Processor object icon"**.

2. _____ Click on **"Configuration management"**.

3. _____ Double click on the **"Customize DCAF Target Settings"** function (see Figure 1-12 on page 1-8)

4. _____ Click on **"Options"**, then click on **Password**.

Figure 2-18. DCAF Target

5. _____ Click on **"Enable password"** then enter the password in the **New password** and **Verify new password** input fields according to the value recorded by the customer on the parameter sheet.

Figure 2-19. DCAF Password

6. _____ Click on **"Change"**, click on **"OK"**, then press **"F3"** to close DCAF.

Restoring the Passwords to the Default Values

> **Notes**
>
> 1. This function is used when the customer has lost his passwords or when the number of unsuccessful logon attempts has reached the maximum number defined, or when reloading the hard disk.
>
> 2. If you have a **backup** Service Processor do not forget to restore the passwords on this Service Processor using the same procedure.

1. ____ If you are on the MOSS-E logon window, click on **"Cancel"**

2. ____ On the MOSS-E view window, click on **"Program"** (see Figure 1-4 on page 1-3).

3. ____ From the pull down menu, click on **"Restore password"**.

4. ____ When requested install the **Service Processor installation diskette 1** in the diskette drive, then follow the prompts.

The passwords are now restored to their default value (**IBM3745**), and the number of logon attempts is reset.

Chapter 3. Managing the Network Node Processor and the Control Point

---
Note

In this chapter there is no information about the multiaccess enclosure, If a MAE is installed, refer to *Multiaccess Enclosure Installation and Maintenance Guide*, SY33-2124 chapter 'Maintaining the Code on the MAE'.

Installing or Removing a Network Node Processor

1. ____ Double click on **Install/Remove/Change/Restore LIC/NNP**

Figure   3-1. NNP-A Licensed Internal Code Management

2. ____ Select the NNP (A or B) then click on **Install NNP** or **Remove NNP**

Figure   3-2. Installing or Removing a NNP-A

Installing a New Version of the LIC on a Network Node Processor

---

> **Important Note**
>
> The installation procedures depends on the level of the code and the hardware currently installed and the level of the code to be installed.
>
> Use the installation instructions shipped with the microcode to upgrade the LIC of the network node processor.
>
> A copy of the installation instructions can be obtained from the web site: **http://infodev1.lagaude.ibm.com**.

Restoring the LIC on a Network Node Processor

> **Note:** This function is **not disruptive** as it applies on the LIC loaded on the non-active partition. This function can be used to reload a back level of code.

1. ____ From the service processor menu, click on **Change Management**

Figure   3-3. SP Change Management Menu

2. ____ Insert the CD-ROM into the CD disk drive and the configuration diskette into the diskette drive. Double click on **Restore SP (&NNP) LIC on non-active version**, then follow the prompts.

Figure   3-4. Service Processor Menu

3. ____ Then to activate the changes, use the function 'toggle to non-active version' to load and execute the new code in the processors (refer to "Changing the Active LIC" on page 3-5).

> **Note:** If an NNP backup is installed, its code is also restored automatically.

Changing the Active LIC

Notes:

1. This function is **disruptive** and it is used to switch the non-active partition and the active partition. It reboots the SP and the NNPs (if any). Use this function after a LIC upgrade or a LIC reload to load the processors with the new LIC.

2. It applies only on SP/NNP running LIC EC **F12380 and above** (using CD drive).

1. ____ From the service processor menu, click on **Change Management**

Figure   3-5. SP Change Management Menu

2. ____ Double click on **Switch to non-active version**, then follow the prompts.

Figure   3-6. Service Processor Menu

Note: If an NNP backup is installed, its active code is also switched to the non-active version.

Modifying IP Parameters

1. ____ Double click on **Install/Remove/Change/Restore LIC/NNP**

Figure 3-7. NNP Licensed Internal Code Management

2. ____ Select the NNP (A or B) then click on **Modify IP Parameters...**

Figure 3-8. Modifying IP Parameters

3. ____ On this screen you can modify the IP address and Subnet mask parameters (press Help pushbutton for details).

Figure 3-9. IP Parameters

Managing the Control Point and the NNP

1. ____ Double click on **Manage Control Point on NNPs**

Figure 3-10. Manage Control Point on NNPs

2. ____ From this screen, select the NNP (A or B) then you are able to:

   a. Start, stop, or stop and restart a control point

   b. Activate a specific configuration

   c. Take a dump of a control point

   d. Shutdown and restart a NNP

   e. Manage NPM configuration.

   Note: Press help pushbutton to get details.

Figure 3-11. Managing the Control Point and NNPs

Importing a Configuration

CCM will be used mainly by the CE to import or export a configuration, for more details refer to *3745 Communication Controller Models A and 3746 Expansion Unit Model 900: Migration and Planning Guide*, SH11-3081.

1. _____ Double click on **Controller Configuration and Management (CCM)**

Figure   3-12. CCM

2. _____ Click on OK, click on file then double click on **Import a configuration**

Figure   3-13. Importing a Configuration

3. _____ Insert a diskette in drive A, then click on **OK**

Exporting a Configuration

1. _____ Double click on **CCM - Controller Configuration and Management**

Figure 3-14. CCM

2. _____ Click on **OK**, click on **file**, then click on **Open**

Figure 3-15. Selecting a Configuration

3. ____ Select the configuration to be exported, then click on **Export**

Configurations List

Appendix A. Bibliography

Customer Documentation for the 3746 Model 950

Table A-1 (Page 1 of 2). Customer Documentation for the 3746 Model 950		
This customer documentation has the following formats:		
Books	Online	Books and Diskettes
Finding Information		
		3745 Models A and 3746 Books Starting with engineering change (EC) F12380, all of the books in the 3745 Models A and 3746 library are available on the CD-ROM that contains the Licensed Internal Code (LIC) for this EC.
Preparing for Operation		
	GA33-0400	**IBM 3745 Communication Controller All Models**[1] **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Safety Information**[2] Provides general safety guidelines
Evaluating and Configuring		
	GA33-0180	**IBM 3745 Communication Controller Models A**[3] **IBM 3746 Nways Multiprotocol Controller** **Models 900 and 950** **Overview** Gives an overview of connectivity capabilities within SNA, APPN, and IP networking.
	GA33-0457	**IBM 3745 Communication Controller Models A**[2] **IBM 3746 Expansion Unit Model 900** **Models 900 and 950** **Planning Guide** Planning for: • Field upgrades • Service processor and alert management configuration • Network integration (NCP, APPN, and IP control) • Physical installation.

Table A-1 (Page 2 of 2). Customer Documentation for the 3746 Model 950		
Operating and Testing		
	SA33-0356	**IBM 3746 Nways Multiprotocol Controller Model 950** **User's Guide**[2] Explains how to: • Carry out daily routine operations on Nways controller • Install, test, and customize the Nways controller after installation • Configure user's workstations to remotely control the service processor using: – DCAF program – Telnet client program.
	On-line information	**Controller Configuration and Management Application** Provides a graphical user interface for configuring and managing a 3746 APPN/HPR network node and IP Router, and its resources. Is also available as a stand-alone application, using an OS/2 workstation. Defines and explains all the 3746 Network Node and IP Router configuration parameters through its on-line help.
	SH11-3081	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Controller Configuration and Management: User's Guide**[2] Explains how to use CCM and gives examples of the configuration process.
Managing Problems		
	On-line information	**Problem Analysis Guide** An on-line guide to analyze alarms, events, and control panel codes on: • IBM 3745 Communication Controller Models A[3] • IBM 3746 Nways Multiprotocol Controller Models 900 and 950.
	SA33-0175	**IBM 3745 Communication Controller Models A**[3] **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Alert Reference Guide** Provides information about events or errors reported by alerts for: • IBM 3745 Communication Controller Models A[3] • IBM 3746 Nways Multiprotocol Controller Models 900 and 950.
[1] Models 130 to 61A. [2] Documentation shipped with the 3746-950 [3] 3745 Models 17A to 61A.		

Service Documentation for the IBM 3746 Model 950

Table A-2 (Page 1 of 3). Service Documentation for the 3746 Model 950
This service documentation has the following formats:

Books

Books and CD-ROM

	SY33-2107	**IBM 3746 Nways Multiprotocol Controller Model 950** **Installation Guide[1]** Provides instructions for installing or relocating the Nways Controller.
	SY33-2108	**IBM 3746 Nways Multiprotocol Controller Model 950** **Service Guide[1]** Provides procedures for isolating and fixing the IBM 3746-950 problems.
	SY33-2115	**IBM 3745 Communication Controller Models A[2]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[3]** **(Based on the 7585, 3172, 9585, or 9577)** Provides information on installing and maintaining the service processor based on PS/2 Types 7585, 3172, 9585, or 9577. Can be for systems with microcode that has up to and including EC D46130 (any level) installed.
	SY33-2120	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[4]** **(Based on the 7585, 3172, or 9585)** Provides information on installing and maintaining the service processor based on PS/2 Types 7585, 3172, or 9585. Can be for systems with microcode EC F12380 or higher installed.
	SY33-2125	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[4]** **(Based on 6275)** Provides information on installing and maintaining the service processor based on PS/2 Type 6275. Can be for systems with microcode EC F12380 or higher installed.

Table A-2 (Page 2 of 3). Service Documentation for the 3746 Model 950

	SY33-2118	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Multiaccess Enclosure Installation and Maintenance[4]
		Provides information on installing and maintaining the Multiaccess Enclosure (MAE).

	SY33-2124	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Multiaccess Enclosure Installation and Maintenance[4] (Starting from EC F12430 and Above)
		Provides information on installing and maintaining the Multiaccess Enclosure (MAE). For systems with microcode EC F12430 or higher installed.

	SY33-2112	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Network Node Processor Installation and Maintenance[3] (Based on the 7585 or 3172)
		Provides information on installing and maintaining the network node processor based on the PS/2 Type 7585 or 3172.

	SY33-2126	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Network Node Processor Installation and Maintenance[3] (Based on 6275)
		Provides information on installing and maintaining the network node processor based on the PS/2 Type 6275.

	SY33-2127	**IBM 3745 Communication Controller Models A[3] IBM 3746 Expansion Unit Model 900 IBM 3746 Nways Multiprotocol Controller Model 950**
		Service Processor and Network Node Processor[4] Service User's Guide
		Provides information on installing and maintaining the operational code on service processor, or network node processor. Can be for systems with microcode EC F12380 or higher installed.

	SY33-2117	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		External Cable Reference[4]
		Provides references to console and line cables used for connecting the IBM 3746 Models 900 and 950.

	S135-2015	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Parts Catalog[4]
		Provides reference information for ordering parts for the IBM 3746 Models 900 and 950.

Table A-2 (Page 3 of 3). Service Documentation for the 3746 Model 950		
	S135-2014	**IBM Controller Expansion** **Parts Catalog** Provides reference information for ordering parts for the controller expansion attached to the IBM 3745 Models A², and 3746 Models 900 and 950.
CD-ROM Bibliography		
	ZK2T-8214	**IBM Networking** **Softcopy Collection Kit** Allows service manuals consulting via CD-ROM viewer. EMEA version.
	ZK2T-8187	**IBM Networking** **Softcopy Collection Kit** Allows service manuals consulting via CD-ROM viewer. US version.

¹ Documentation shipped with the 3746 Model 950
² 3745 Models 17A to 61A
³ Documentation shipped with the processor
⁴ Documentation shipped with the 3746 Models 900 and 950

Customer Documentation for the 3745 (Models 210, 310, 410, 610, 21A, 31A, 41A, and 61A), and 3746 (Model 900)

Table A-3 (Page 1 of 4). Customer Documentation for the 3745 Models X10 and X1A, and 3746 Model 900
This customer documentation has the following formats:
Books   Online   Books and Diskettes   Books and CD-ROM
Finding Information
3745 Models A and 3746 Books Starting with engineering change (EC) F12380, all of the books in the 3745 Models A and 3746 library are available on the CD-ROM that contains the Licensed Internal Code (LIC) for this EC. SA33-0172   **IBM 3745 Communication Controller Models 210 to 61A** **IBM 3746 Expansion Unit Model 900** **Customer Master Index[1]** Provides references for finding information in the customer documentation library.
Evaluating and Configuring
GA33-0092   **IBM 3745 Communication Controller Models 210, 310, 410, and 610** **Introduction** Gives an introduction of the IBM Models 210 to 610 capabilities. For Models A refer to the *Overview*, GA33-0180. GA33-0180   **IBM 3745 Communication Controller Models A[2]** **IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Overview** Gives an overview of connectivity capabilities within SNA, APPN, and IP networking.

	GA33-0457	**IBM 3745 Communication Controller Models A**[2] **IBM 3746 Expansion Unit Model 900** **Models 900 and 950** **Planning Guide** Planning for: • Field upgrades • Service processor and alert management configuration • Network integration (NCP, APPN, and IP control) • Physical installation.

Preparing Your Site

	GC22-7064	**IBM System/360, System/370, 4300 Processor** **Input/Output Equipment Installation Manual-Physical Planning** (Including Technical News Letter GN22-5490) Provides information for physical installation for the 3745 Models 130 to 610. For 3745 Models A and 3746 Model 900, refer to the *Planning Guide*, GA33-0457.
	GA33-0127	**IBM 3745 Communication Controller** **Models 210, 310, 410, and 610** **Preparing for Connection** Helps for preparing the 3745 Models 210 to 610 cable installation. For 3745 Models A refer to the *Connection and Integration Guide*, SA33-0129.

Preparing for Operation

	GA33-0400	**IBM 3745 Communication Controller All Models**[3] **IBM 3746 Nways Multiprotocol Controller** **Models 900 and 950** **Safety Information**[1] Provides general safety guidelines.
	SA33-0129	**IBM 3745 Communication Controller All Models**[3] **IBM 3746 Nways Multiprotocol Controller Model 900** **Connection and Integration Guide**[1] Contains information for connecting hardware and integrating network of the 3745 and 3746-900 after installation.
	SA33-0416	**Line Interface Coupler Type 5 and Type 6** **Portable Keypad Display** **Migration and Integration Guide** Contains information for moving and testing LIC types 5 and 6.

Table A-3 (Page 3 of 4). Customer Documentation for the 3745 Models X10 and X1A, and 3746 Model 900		

	SA33-0158	**IBM 3745 Communication Controller All Models[3]**
		IBM 3746 Nways Multiprotocol Controller Model 900
		
		Console Setup Guide[1]
		
		Provides information for:
		
		• Installing local, alternate, or remote consoles for 3745 Models 130 to 610
		• Configuring user workstations to remotely control the service processor for 3745 Models A and 3746 Model 900 using:
		    – DCAF program
		    – Telnet Client program.

Customizing Your Control Program		
	SA33-0178	**Guide to Timed IPL and Rename Load Module** Provides VTAM procedures for: • Scheduling an automatic reload of the 3745 • Getting 3745 load module changes transparent to the operations staff.
Operating and Testing		
	SA33-0098	**IBM 3745 Communication Controller** **All Models[4]** **Basic Operations Guide[1]** Provides instructions for daily routine operations on the 3745 Models 130 to 610.
	SA33-0177	**IBM 3745 Communication Controller Models A[2]** **IBM 3746 Nways Multiprotocol Controller Model 900** **Basic Operations Guide[1]** Provides instructions for daily routine operations on the 3745 Models 17A to 61A, and 3746 Model 900 operating as an SNA node (using NCP), APPN/HPR Network Node, and IP Router.
	SA33-0097	**IBM 3745 Communication Controller** **All Models[3]** **Advanced Operations Guide[1]** Provides instructions for advanced operations and testing, using the 3745 MOSS console.
	On-line Information	**Controller Configuration and Management Application** Provides a graphical user interface for configuring and managing a 3746 APPN/HPR Network Node and IP Router, and its resources. Is also available as a stand-alone application, using an OS/2 workstation. Defines and explains all the 3746 Network Node and IP Router configuration parameters through its online help.

Table A-3 (Page 4 of 4). Customer Documentation for the 3745 Models X10 and X1A, and 3746 Model 900		
	SH11-3081	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950**
		Controller Configuration and Management: User's Guide[5]
		Explains how to use CCM and gives examples of the configuration process.
Managing Problems		
	SA33-0096	**IBM 3745 Communication Controller All Models**[3]
		Problem Determination Guide[1]
		A guide to perform problem determination on the 3745 Models 130 to 61A.
	On-line Information	**Problem Analysis Guide**
		An online guide to analyze alarms, events, and control panel codes on:
		• IBM 3745 Communication Controller Models A[2] • IBM 3746 Nways Multiprotocol Controller Models 900 and 950.
	SA33-0175	**IBM 3745 Communication Controller Models A**[2] **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950**
		Alert Reference Guide
		Provides information about events or errors reported by alerts for:
		• IBM 3745 Communication Controller Models A[2] • IBM 3746 Nways Multiprotocol Controller Models 900 and 950.

[1] Documentation shipped with the 3745.
[2] 3745 Models 17A to 61A.
[3] 3745 Models 130 to 61A.
[4] Except 3745 Models A.
[5] Documentation shipped with the 3746-900.

Additional Customer Documentation for the 3745 Models 130, 150, 160, 170, and 17A

Table A-4. Additional Customer Documentation for the 3745 Models 130 to 17A
This customer documentation has the following format:
Books
Finding Information
SA33-0142   **IBM 3745 Communication Controller** **Models 130, 150, 160, 170, and 17A** **IBM 3746 Nways Multiprotocol Controller Model 900** **Customer Master Index**[1] Provides references for finding information in the customer documentation library.
Evaluating and Configuring
GA33-0138   **IBM 3745 Communication Controller** **Models 130, 150, and 170** **Introduction** Gives an introduction about the IBM Models 130 to 170 capabilities, including Model 160. For Model 17A refer to the *Overview*, GA33-0180.
Preparing Your Site
GA33-0140   **IBM 3745 Communication Controller** **Models 130, 150, 160, and 170** **Preparing for Connection** Helps for preparing the 3745 Models 130 to 170 cable installation. For 3745 Model 17A refer to the *Connection and Integration Guide*, SA33-0129.
[1] Documentation shipped with the 3745.

Service Documentation for the IBM 3745 (Models 210, 21A, 310, 31A, 410, 41A, 610, and 61A) and 3746 (Model 900)

Table A-5 (Page 1 of 4). Service Documentation for the 3745 Models x10 and x1A, and 3746 Model 900		
This service documentation has the following formats:		
Books	Online	Books and CD-ROM

3745 Models A and 3746 Books

Starting with engineering change (EC) F12380, all of the books in the 3745 Models A and 3746 library are available on the CD-ROM that contains the Licensed Internal Code (LIC) for this EC.

	SY33-2080	**IBM 3745 Communication Controller Models 210 to 61A** **Service Master Index**[1] Provides references for finding information in the IBM 3745 Models X10 and X1A shipping group documentation.
	SY33-2057	**IBM 3745 Communication Controller Models 210 to 61A** **Installation Guide**[1] Provides instructions for installing or relocating the IBM 3745 Models X10 and X1A.
	SY33-2114	**IBM 3746 Nways Multiprotocol Controller Model 900** **Installation Guide**[2] Provides instructions for installing or relocating a 3746-900.
	SY33-2116	**IBM 3746 Nways Multiprotocol Controller Model 900** **Service Guide**[2] Provides procedures for isolating and fixing the IBM 3746-900 problems.
	SY33-2055	**IBM 3745 Communication Controller Models 210, 310, 410, and 610** **IBM 3746 Expansion Units Models A11, A12, L13, L14, and L15** **Service Functions**[1] Describes MOSS functions using the IBM 3745 Models X10 and X1A consoles.

	SY33-2054	**IBM 3745 Communication Controller Models 210 to 61A** **Maintenance Information Procedures[1]** Provides procedures for isolating and fixing the IBM 3745 Models X10 and X1A problems.
	SY33-2115	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[4]** **(Based on the 7585, 3172, 9585, or 9577)** Provides information on installing and maintaining the service processor based on PS/2 Types 7585, 3172, 9585, or 9577. Can be for systems with microcode that has up to and including EC D46130 (any level) installed.
	SY33-2120	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[4]** **(Based on the 7585, 3172, or 9585)** Provides information on installing and maintaining the service processor based on PS/2 Types 7585, 3172, or 9585. Can be for systems with microcode EC F12380 or higher installed.
	SY33-2125	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor Installation and Maintenance[4]** **(Based on the 6275)** Provides information on installing and maintaining the service processor based on PS/2 Type 6275. Can be for systems with microcode EC F12380 or higher installed.
	SY33-2127	**IBM 3745 Communication Controller Models A[3]** **IBM 3746 Expansion Unit Model 900** **IBM 3746 Nways Multiprotocol Controller Model 950** **Service Processor and Network Node Processor[4]** **Service User's Guide** Provides information on installing and maintaining the operational code on service processor, or network node processor. Can be for systems with microcode EC F12380 or higher installed.

	SY33-2118	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Multiaccess Enclosure Installation and Maintenance[4]** Provides information on installing and maintaining the Multiaccess Enclosure (MAE).
	SY33-2124	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Multiaccess Enclosure Installation and Maintenance[4]** (Starting from EC F12430 and Above) Provides information on installing and maintaining the Multiaccess Enclosure (MAE). For systems with microcode EC F12430 or higher installed.
	SY33-2112	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Network Node Processor Installation and Maintenance[4]** **(Based on the 7585 or 3172)** Provides information on installing and maintaining the network node processor based on the PS/2 Type 7585 or 3172.
	SY33-2126	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **Network Node Processor Installation and Maintenance[4]** **(Based on 6275)** Provides information on installing and maintaining the network node processor based on the PS/2 Type 6275.
	SY33-2056	**IBM 3745 Communication Controller Models 210 to 61A** **Maintenance Information Reference[1]** Provides in-depth hardware reference information on the IBM 3745 Models X10 and X1A.
	SY33-2075	**IBM 3745 Communication Controller All Models[5]** **External Cable References[1]** Provides references to console and line cables used for connecting the IBM 3745 Models 130 to 61A.
	SY33-2117	**IBM 3746 Nways Multiprotocol Controller Models 900 and 950** **External Cable Reference[6]** Provides references to console and line cables used for connecting the IBM 3746 Models 900 and 950.

¹ Documentation shipped with the 3745.

Glossary

ac. alternating current

ACPW. AC power (box)

AFD. airflow detector

alarm. A message sent to the MOSS console. In case of an error a reference code identifies the nature of the error.

alert. A message sent to the host console. In case of an error a reference code identifies the nature of the error.

AMD. air moving device

APPN. advanced peer-to-peer networking

ARC. active remote connector

ARC1A1. ARC V.24 DCE attachment with 5 meter tethered cable

ARC1A2. ARC V.24 DCE attachment with 15 meter tethered cable

ARC1B. ARC V.24 DTE attachment with 15 meter tethered cable

ARC1C. ARC V.24 DCE 3745 interface with 5 meter tethered cable

ARC1D. ARC V.24 DTE 3745 interface with 5 meter tethered cable

ARC1E. ARC V.24 3174 AEA interface (1)

ARC1F. ARC V.24 3174 PCA EIA interface (1)

ARC2A. ARC V.25 autocall interface with 5 meter tethered cable

ARC2C. ARC V.25 autocall interface 3745 with 5 meter tethered cable

ARC3A1. ARC V.35 DCE attachment with 5 meter tethered cable

ARC3A2. ARC V.35 DCE attachment with 15 meter tethered cable

ARC3B. ARC V.35 DTE attachment with 15 meter tethered cable

ARC3C. ARC V.35 DCE 3745 interface with 5 meter tethered cable

ARC3D. ARC V.35 DTE 3745 interface with 5 meter tethered cable

ARC4A1. ARC X.21 DCE attachment with 5 meter tethered cable

ARC4A2. ARC X.21 DCE attachment with 15 meter tethered cable

ARC4B. ARC X.21 DTE attachment with 15 meter tethered cable

ARC4C. ARC V.21 DCE 3745 interface with 5 meter tethered cable

ARC4D. ARC V.21 DTE 3745 interface with 5 meter tethered cable

ARC5A. Reserved

ARC5B. Reserved

ARC5C. ARC RS-422 3708 interface (or RJ-11 connection) (1)

ARC5D. ARC RS-422 IBM Cabling System interface (1)

ARC6A. ARC V.25 autocall interface with 15 meter tethered cable

ARC6C. ARC V.25 autocall 3745 interface with 15 meter tethered   cable

BA. basic access

BAS. basic board

BATS. basic assurance tests

BER. box event record

BLPU. basic level packaging unit

BMI. bit multiplex interface

box event record (BER). Information about an event detected by the controller. It is recorded on the disk/diskette and can be displayed on the operator console for event analysis.

bps. bits per second

BSC. binary synchronous communication

BSI. bus synchronism interface

C. Celsius

C&SM. customer and service information

CA. channel adapter

cache. A high-speed buffer storage that contains frequently accessed instructions and data; it is used to reduce access time.

CB. circuit breaker

CBA. controller bus adapter

CBC. controller bus coupler

CBR. circuit burst request

CBSA. controller bus and service adapter (CBSP+CBC+TIC3)

CBSP. controller bus and service processor

CBTRA. controller bus and token-ring adapter (TRP+CBC+TIC3)

CBTRM. cable terminator (IOC and DMA buses)

CCITT. Comite Consultatif International Telephonique et telegraphique

CCU. central control unit

CDF. configuration data file (3745)

CDF-E. configuration data file extended (37CS)

CE. customer engineer

CEPT. Comite Europeen des Postes et Telecommunications

CLA. communication line adapter (CLP+LICnn)

CLDP. controller load/dump program

clear channel. Mode of data transmission where the data passes through the DCE and network, and arrives at the receiving communication controller (for example, the IBM 3745) unchanged from the data transmitted. The DCE or network can modify the data during transmission because of certain network restrictions, but must ensure the received data stream is the same as the transmitted data stream.

CLP. communication line processor

CMIP. common management interface protocol

CNM. communication network management

CP. 1.communication processor 2.control program 3.circuit protector 4.control point

CPLR. coupler

CPN. customer problem number

CPx. FRU name of circuit protector

CRC. cyclic redundancy check character

CS. connectivity switch

CSA. common subassembly

CSB. connectivity switch bus

CSC. connectivity switch cable

CSCE. connectivity switch cable extension

CSM. centralized support module

CSP. central service point

CSS. control subsystem (3745)

CTDA. configuration target device (processor) address

dc. direct current

DCAF. Distributed Console Access Facility (licensed program)

DCCS. DC to connectivity subsystem

DCE. data circuit-terminating equipment

DCDP. DC distribution and protection (box)

DCM. diagnostic control monitor

DCPW. DC power box

DICO. DMA IOC connection card

DM. distribution manager

DMA. direct memory access

DS. data storage

DSB. data storage bus

DSI. data storage interface

DSM. data storage manager

DSS. data storage interface for SBA

DSU. data service unit (DCE-like for high-speed communication lines)

DTE. data terminal equipment

EC. engineering change

EE. extended edition

EIA. Electronic Industries Association

EPO. emergency power-off

EPROM. eraseable PROM

ESCA. ESCON adapter

ESCC. ESCON coupler

ESCON*. Enterprise Systems Connection

ESCP. ESCON processor

ESD. electrostatic discharge

EXP. expansion enclosure

EXP1. first expansion enclosure

EXP2. second expansion enclosure

FCS. frame check sequence

FRU. field-replaceable unit

HCS. Hardware Central Service

HDLC. high-level data link control

hex. hexadecimal

host processor.   (1) A processor that controls all or part of a user application network. (2) In a network, the processing unit in which the access method for the network resides. (3) In an SNA network, the processing unit that contains a system services control point (SSCP). (4) A processing unit that executes the access method for attached communication controllers. Also called *host.*

HPPB. high-performance parallel bus

HSC. hardware support center

HSF. hardware service facility

Hz. Hertz

IBM service representative. An individual in IBM who performs maintenance services for IBM products or systems.

IEEE. Institute of Electrical and Electronics Engineers

IML. initial microcode load

initial microcode load (IML). The process of loading the microcode into a scanner or into MOSS.

initial program load (IPL). The initialization procedure that causes the 3745 control program to commence operation.

IO. input/output

IOC. input/output control

IOCB. input/output control bus

IPL. initial program load

IRAM. instruction random access memory

ISO. International Organization for Standardization

kbps. kilobits per second

LA. line adapter

LAN. local area network

LCB. line connection box

LED. light-emitting diode

LIC. line interface coupler

LICx. FRU name of line interface coupler type x (3745)

LLC. logical link control

LS. local storage

LSA. link service architecture

LSCT. LIM software configuration table

LSM. local storage manager

LSSD. level-sensitive scan design (total hardware latches chain collection)

LU. logical unit

MAC. medium access control

MAE. Multiaccess enclosure

MAP. maintenance analysis-procedure

MAU. multistation access unit

MB. megabyte; 1 048 576 bytes

MCF. microcode fix

MCL. microcode change level

MES. miscellaneous equipment specification

MG. motor generator

MI. maskable interrupt

microcode. A program, that is loaded in a processor (for example, the MOSS processor)

MLA. MOSS LAN adapter

MMIO. memory mapped input/output

maintenance and operator subsystem (MOSS). The part of the controller that provides operating and servicing facilities to the customer's operator and the IBM service representative.

MOSS. maintenance and operator subsystem (3745)

MOSS-E. maintenance and operator subsystem extended (37CS)

NA. network addressable

NCP. Network Control Program

NDM. netview distribution manager

NetView. An IBM licensed program used to monitor a network, manage it, and diagnose its problems.

Network Control Program (NCP). An IBM licensed program that provides communication controller support for single-domain, multiple-domain, and interconnected network capability.

NMI. non-maskable interrupt

NMVT. network management vector transport

NNP. network node processor

NODA. next origin device (processor) address

NPM. NetView performance monitor

NTDA. next target device (processor) address

OEMI. original equipment manufacturer's interface

OLT. online test

online tests. Testing of a remote data station concurrently with the execution of the user's programs (that is, with only minimal effect on the user's normal operation).

OSI. open system interconnect

PA. primary access

PBC. packet burst control

PBG. packet burst grant

PCR. 1.pico-processor command register 2.power check reset

PICA. process and intertask communication architecture

PMH. problem management hardware

PN. part number

PNL. control panel

POR. power-ON reset

PP. pico-processor

PPB. primary power box

PPC. PowerPC (system card of MAE)

PRC. processor

PRDA. packet request device (processor) address

PROM. programable read-only memory

PS. power supply

PSI. packet switch interface

PSN. public switched network

PTCE. product-trained CE

PTF. program temporary fix

PTT. Post, Telephone and Telegraph (agency)

PU. physical unit

RETAIN. Remote Technical Assistance Information Network

RNR. receiver not ready

RPL. remote program load

RPO. remote power-off

RSC. remote service center

RSF. remote support facility

RVX. stands for RS232, RS422, V.24-35, X.21-2x connections

SAC. switch adapter card

SATS. specific assurance tests

SBA. switch bus adapter

SBI. switch bus interface

SC. switch control

SDLC. synchronous data link control

SIE. switch interface extender

SL. service logic

SNA. Systems Network Architecture

SNMP. Simple network management protocol

SPD1. signal and power distribution type 1

SPD2. signal and power distribution type 2

SPDL. signal and power distribution card in LCB

SPS. service and power support

SQL. structured query language

SRC. system reference code

SSA. system service architecture

SSCP. system services control point

STCn. signal transfer card n

SSS. subsystem support service

Systems Network Architecture (SNA). The description of the logical structure, formats, protocols, and operational sequences for transmitting information through a user application network. The structure of SNA allows the users to be independent of specific telecommunication facilities.

TB. terminator block

TDM. time division multiplexing

TDR. technical data record

TERC. terminator card

TIC1. token-ring interface coupler type 1 (3745) running at speed of 4 Mbits

TIC2. token-ring interface coupler type 2 (3745) running at speed of 4 or 16 Mbits

TIC3. token-ring interface coupler type 3 (37CS) running at speed of 4 or 16 Mbits

time out. The time interval allotted for certain operations to occur.

TPS. two-processor switch

TR. token-ring

TRA. token-ring adapter (TRP+TIC3)

TRFM. transformer

TRP. token-ring processor

TRS. transmitter/receiver subassembly

UEPO. unit emergency power-off

URSF. universal remote support facility

UTP. Unshielded twisted pair cable

V. volt

V.24. CCITT V.24 recommendation

V.25. CCITT V.25 recommendation

V.28. CCITT V.28 recommendation

V.35. CCITT V.35 recommendation

VPD. vital product data

VTAM*. Virtual Telecommunications Access Method

VTL. vendor technology logic

W. watt

X.21. CCITT X.21 recommendation

X.25. CCITT X.25 recommendation

YZxxx. wiring diagram
