

Multiprotocol Switched Services (MSS) Server: Read This First

The MSS Server Library

The CD-ROM shipped with the MSS Server contains MSS books for both Version 1.1 (V1.1) and Version 2.0 (V2.0) of the MSS Server. This section provides information on when to refer to the V2.0 books and when to refer to the V1.0 books.

The V1.1 books are included on the CD-ROM because the correct hardware information for the 8210 Nways Multiprotocol Switched Services (MSS) Server (8210) Model 001 and the 2-slot 8260 A-MSS Server Module, Feature Code (FC) 5300, is in the V1.1 books, while the correct microcode information is in the V2.0 books. For the 1-slot 8260/8265 A-MSS Server Module, FC 5400, the V2.0 books are accurate for both the hardware and the microcode.

Note: Some titles of the V2.0 MSS library are different from those of the V1.1 library. Therefore, V1.1 references to other books in the MSS Server library can be inaccurate. Table 1 lists the MSS books that have changed their titles between Version 1.1 and Version 2.0:

Table 1. MSS Server Library Name Changes from V1.1 to V2.0

Version 1.1 Name	V1.1 Document Number	Version 2.0 Name	V2.0 Document Number
MSS Server Command Line Interface Volume 1: User's Guide and Protocol Reference	SC30-3818-1	MSS Server Interface Configuration and Software User's Guide	SC30-3818-2
MSS Server Command Line Interface Volume 2: User's Guide and Protocol Reference	SC30-3819-1	MSS Server Configuring Protocols and Features	SC30-3819-2
MSS Server Module Setup and Problem Determination Guide	GA27-4141-0	MSS Server Module Installation and Initial Configuration Guide	GA27-4141-1
MSS Server Service Manual	GY27-0354-1	MSS Server Service and Maintenance Manual	GY27-0354-2

The following sections describe the correct books that apply to each device for hardware and software.

8210 Model 001 Library

If your device is the 8210 Model 001, use the following books:

Table 2. 8210 Model 001 Library

Hardware	Software
MSS Server Setup and Problem Determination Guide (V1.1), GA27-4140-1	Not Applicable
MSS Server Introduction and Planning Guide (V2.0), GC30-3820-2	Same
MSS Server Service and Maintenance Manual (V2.0), GY27-0354-2	Same
MSS Server Module Installation and Initial Configuration Guide (V2.0), GA27-4141-1	Same
Not Applicable	MSS Interface Configuration and Software User's Guide (V2.0), SC30-3818-2
Not Applicable	MSS Configuring Protocols and Features (V2.0), SC30-3819-2
Not Applicable	Configuration Program User's Guide for Nways Multiprotocol Access, Routing and Switched Services (V2.0), GC30-3830-3
Not Applicable	Event Logging System Messages Guide (V2.0), SC30-3682-6

A-MSS Server Module (FC 5300) Library

If your device is the 2-slot A-MSS Server Module (FC 5300), use the following books:

Table 3. A-MSS Server Module (FC 5300) Library

Hardware	Software
MSS Server Module Setup and Problem Determination Guide (V1.1), GA27-4141-0	MSS Server Module Installation and Initial Configuration Guide (V2.0), GA27-4141-1
MSS Server Introduction and Planning Guide (V1.1), GC30-3820-1	MSS Server Introduction and Planning Guide (V2.0), GC30-3820-2
MSS Server Service and Maintenance Manual (V1.1), GY27-0354-1	MSS Server Service and Maintenance Manual (V2.0), GY27-0354-2
Not Applicable	MSS Interface Configuration and Software User's Guide (V2.0), SC30-3818-2
Not Applicable	MSS Configuring Protocols and Features (V2.0), SC30-3819-2
Not Applicable	Configuration Program User's Guide for Nways Multiprotocol Access, Routing and Switched Services (V2.0), GC30-3830-3
Not Applicable	Event Logging System Messages Guide (V2.0), SC30-3682-6

A-MSS Server Module (FC 5400) Library

If your device is the 1-slot A-MSS Server Module (FC 5400), use the following books:

Table 4. A-MSS Server Module (FC 5400) Library

Hardware	Software
MSS Server Module Installation and Initial Configuration Guide (V2.0), GA27-4141-1	Same
MSS Server Introduction and Planning Guide (V2.0), GC30-3820-2	Same
MSS Server Service and Maintenance Manual (V2.0), GY27-0354-2	Same
Not Applicable	MSS Interface Configuration and Software User's Guide (V2.0), SC30-3818-2
Not Applicable	MSS Configuring Protocols and Features (V2.0), SC30-3819-2
Not Applicable	Configuration Program User's Guide for Nways Multiprotocol Access, Routing and Switched Services (V2.0), GC30-3830-3
Not Applicable	Event Logging System Messages Guide (V2.0), SC30-3682-6

A-CPSW Code Levels

If your device is the 2-slot A-MSS Server Module (FC 5300), the minimum required A-CPSW code level is **V2.2.0**.

If your device is the 1-slot A-MSS Server Module (FC 5400), the minimum required A-CPSW code level is **V2.5.2**.
