

# The IBM Network Management Family

The Nways® Campus Manager for HP-UX and Nways Manager for AIX® bring reliable, state-of-the-art management to your networking infrastructure. The Nways Workgroup Manager provides an SNMP management platform and a suite of graphical device management applications. The Nways RouteSwitch Network provides comprehensive configuration, monitoring, tracking and VLAN management. Three of the four products support Web-based device management using Java™ technology, allowing you to access any SNMP device in your network.
