

Content Manager V8.2 Common Criteria ReadMe

October 25, 2004

IBM(R) Content Manager for Multiplatforms Version 8.2
(Program Number 5724-B19)

IBM(R) Content Manager Client for Windows Version 8.2

1. About this readme file

This readme contains information in support of Content Manager Version 8.2 for Common Criteria.

The latest version of this readme document is available at this Web site:
ftp://ftp.software.ibm.com/ps/products/content_manager/

1.1. Introduction

This fix pack contains an update to the online help file to include the following password guidelines:

Following are the recommendations for a good password policy:

- Passwords should be at least six characters
- Each password should contain at least two alphabetic characters and at least one numeric or special character.
- The 72 valid alphanumeric characters include:
 - 52 alphabetic characters (upper and lowercase)
 - Ten numerals
 - Ten special characters (!, @, #, \$, %, ^, &, *, (,))
- Each password should differ from the user's user ID and any reverse or circular shift of that user ID.
- New passwords should differ from the old password by at least three characters.

Avoid using consecutive sequences, dictionary words, or other easily guessed passwords. Never write down or share your passwords.

The following books were updated with the password recommendations:

- *System Administration Guide* (SC18-9319-00)
- *Planning and Installing your Content Management System* (GC18-9318-00)

- *Planning and Installing your Content Management System on z/OS (GC18-9470-00).*

1.2. Customer technical support: WBTS - Support web site

For any questions, concerns, or problems related to Content Manager for Multiplatforms, visit this web site:

www.ibm.com/software/data/cm/cmgr/mp/support.html

For any questions, concerns, or problems related to Enterprise Information Portal, visit this web site:

www.ibm.com/software/data/eip/support.html

There you will be able to browse or search many technical documents, including Frequently Asked Questions (FAQs), Hints and Tips, defects (APARs), and other important information.

2. Installation information

This update is available for English only.

To install:

1. Download the ICMClientHelpENU.chm file from the ftp site to a temporary directory.
2. Locate the current directory location of the file. If you used the default installation directory, the directory path will be:
C:\Program Files\IBM\CM82\Client
3. Replace the existing ICMClientHelpENU.chm file with the version you downloaded in step 1.

To verify the installation:

1. You can verify the installation by launching the Client for Windows.
2. On the login screen, click the Help button.
3. Select the Index tab.
4. Use the search facility and enter 'passwords' as the search criteria. The updated online help contains the password guideline as described in section 1 above.
