# Big Data Is All Data

**Volume**

A grid of 40 small, colorful, 3D cube-like shapes arranged in 4 rows and 10 columns, representing large-scale data.

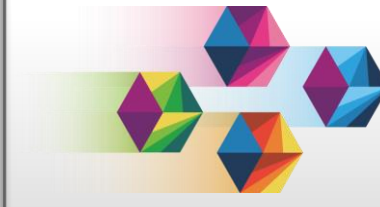

**Data at Scale**

**Variety**

A collection of various colorful geometric shapes including cubes, spheres, and polygons, representing data in many different forms.

**Data in Many Forms**

**Velocity**

A series of colorful geometric shapes moving from left to right, with motion blur effects, representing data in motion.

**Data in Motion**

**Veracity**

A collection of colorful geometric shapes, some of which are fragmented or broken, representing data uncertainty.

**Data Uncertainty**

# The Opportunities from Big Data & Analytics Are Infinite

# Three Key Imperatives for Big Data & Analytics Success

**Build a culture that infuses analytics everywhere**

**Imagine It.**

**Invest in a big data & analytics platform**

**Realize It.**

**Be proactive about privacy, security and governance**

**Trust It.**

# Imagine It. Start with your people.

# 20%

U.S. Department of  
Labor Forecasts\*

Skills

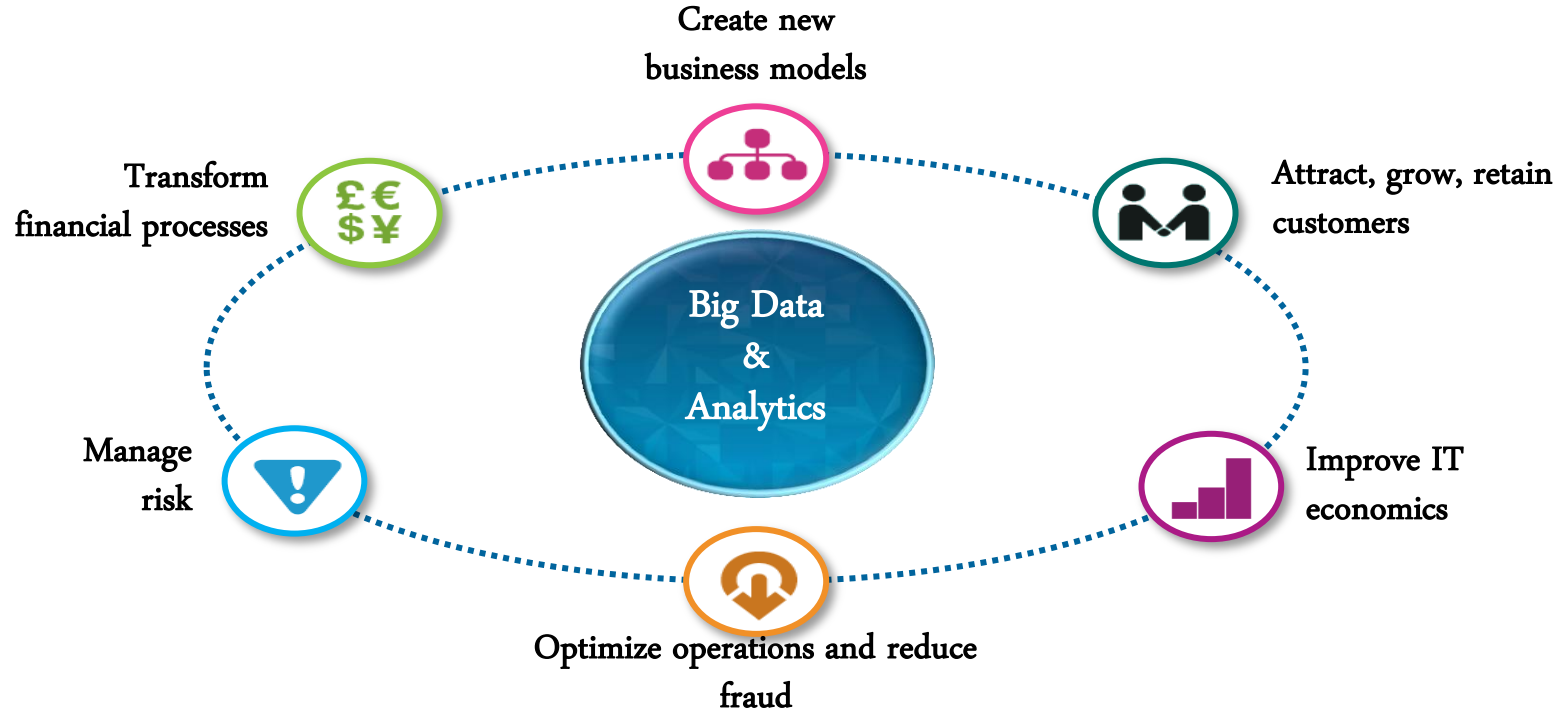

Roles

\*More than 20 percent increase in analytics-based jobs between now and 2018.

# Imagine It. Infuse analytics into key business processes.

Action	Impact on Churn	Impact on Customer Lifetime Value	Likelihood to respond positively
\$20 off this month's bill			
Deliver an apology — Issue with cell tower being fixed this weekend			
6 months free unlimited data plan			
Upgrade phone			

Ufone reduced churn and kept subscribers happy, helping ensure that campaigns are highly effective and timely

**Attract, grow,  
retain customers**

**Improving  
current  
processes and  
performance**

#### **Needs**

- To ensure that its marketing campaigns targeted the right customers, before they left the network
- To keep its higher usage customers happy with campaigns offering services and plans that were right for them

#### **Benefits**

- Predictive analytics is expected to improve the campaign response rate from about 25% to at least 50%
- CDRs can be analyzed within 30 seconds, instead of requiring at least a day
- Expected to reduce churn by approximately 15-20%

One of the largest Telco service provider in Egypt more than 32M subscribers ,  
Is using IBM's predictive analytics solutions to reduce customer churn.

**Attract, grow,  
retain customers**

**Reducing  
customer churn  
and increasing  
revenue.**

### **Needs**

- Did not have a clear understanding of customer churn, including exactly how many customers it was losing, why the customers were leaving and what the company could do to stop them.
- Needed a way to analyze the data, predict which customers were likely to switch providers and launch targeted marketing campaigns and products specifically designed to retain those individuals.

### **Benefits**

- Reduced the churn rate by 10 % overall by identifying and targeting high-risk customers with relevant offers.
- 23 % decrease in the rate of the increase in churn annually.
- Helped increase revenue and lower costs by keeping more customers from switching to competitors.

Reduce warranty claims for new cars by analyzing historical information and vehicle data using IBM Predictive Asset Optimization (PAO).

**Optimize  
operations**

**Improving  
current  
processes and  
performance**

#### **Customer Overview**

- German manufacturer of quality vehicles for worldwide markets
- Manufacturing plants in Germany and elsewhere
- Service / Warranty agencies worldwide

#### **Business Challenges**

- Needed to gain deeper insights into the causes and combinations of circumstances which led to warranty issues in each geography
- Needed to increase customer satisfaction through increased product quality and reduced warranty issues

#### **Solution Implemented**

- Implemented a data mining capability to gain actionable insights across a wide range of warranty issues
- Fed back issue findings into product design process for improvements and modified service patterns

# Does this sound familiar?

*Today we treat Aki like any other customer in her segment... ..but Aki is an individual*

By using only our limited segmentation, we treat Aki like anyone else

Aki holds a mortgage and a savings account

Action	Impact on Retention	Impact on Customer Lifetime Value	Likelihood to respond positively to action
Cash Management Acct.			
Set meeting with Private Banking and Wealth Mgt. Advisor for a Portfolio Review			
Equity Bank Line / Secured Line-of-Credit			
Preferred Gold Credit Card			

# Information helps us understand how Aki is different, but do we use it?

Aki holds a mortgage and a savings account with us

Last week Aki asked the Call Center about loan processing times

Aki has also posted property photos to Facebook asking friends to vote

This week, she checked mortgage rates on the Web Site three times

Aki's current credit score and profitability qualifies her for a preferred rate

And today she's tweeted a link to an article about buying a second home

# By using all the information we can make our service unique to Aki

Aki holds a mortgage and a savings account with...

Action	Impact on Retention	Impact on Customer Lifetime Value	Likelihood to respond positively to action
Cash Management Acct.			
Preferred Gold Credit Card			
Equity Bank Line / Secured Line-of-Credit			
Mortgage special rate discount 25 basis points			

**Optimize  
operations**

**Improving  
customer  
experience and  
providing real time  
responses.**

**Nedbank Limited**, a leading financial services provider throughout Southern Africa,

Is using IBM's predictive analytics solutions to improve the customer experience and provide more responsive real-time services.

#### **Needs**

- Bank recognizes the growing importance of social media as a marketing tool, actively reaching out to customers through Facebook, LinkedIn and Twitter, as well as through blogs and customer

#### **Benefits**

- **Saving of US\$105,000 per year** in social media monitoring costs
- **20% increase** of customer service productivity levels.

**Create new  
business models**

**Delivering new  
insights and  
new possibilities**

Uganda has selected IBM and  
Waterfund to benchmark water  
Infrastructure  
and provide a vital tool for attracting  
funding for national projects

## IBM Big Data & Analytics Infrastructure

# BD&A Infrastructure as part of the IBM BD&A Capability stack

IBM Big Data & Analytics Infrastructure

# IBM Systems portfolio and value for BD&A

## POWER – Analytics Platform Innovation to put data to work

## Storage – Set the Data AGENDA FlashSystem, XIV, GSS

## System z – Mission Critical Analytics Analytics in the right place

## Scale-out Infrastructure Linux on Power and x86

- **Optimized capabilities designed for big data and analytics workloads**
  - DB2 BLU on Power – **7-10X lower TCO**
  - Reference Architectures for Hadoop and Streams – **faster TTV**
  - IBM GPFS™ – worlds only proven **enterprise-grade** scale out file system
  - Platform Symphony – **record setting benchmark for Hadoop workloads**
- **Innovation in scale-out computing –x86**
  - x3650 M4 HD performance, flexibility, reliability & customer satisfaction that's **better than competitive offerings**

- **Storage Innovation for big data & analytics**
  - Real-time compression – 5X more data **no performance hit**
  - IBM MicroLatency™ - **100x performance improvement**
  - FlashSystem storage can **drive down costs by 50%**
- **Analytics closer to the data – System z**
  - **Much of the worlds transactional data sits on z** – integrate advanced analytics with IDAA; Enterprise Linux Server, SPSS/Cognos on z; enhanced Hadoop integration.

# Trust It. Be proactive about privacy, security and governance.

## Trust the facts

**Create foundation  
of trusted data**

## Ensure privacy and security

**Understand usage and  
monitor compliance**

## Make risk aware decisions

**Model exposure and  
understand variability**

# We have built the world's broadest and deepest portfolio in data and analytics.

**\$24 billion**

invested to date to build IBM's capabilities in Big Data and analytics, with \$7 billion in organic investment

**\$17 billion**

of gross spend for Big Data and analytics acquisitions, including more than 30 acquired companies

**15,000**

analytics consultants and 400 mathematicians

**40,000**

client engagements to date

**\$1 billion**

investment in Flash technology, providing industry-leading speed and efficiency to enable data to be real-time ready for analytics

**1,000**

university partnerships, and 2,215 IBM Business Partners

**500**

analytics patents generated each year

**2/3**

of IBM Research is focused on data, analytics and cognitive computing

- If the text contains performance statistics or references to benchmarks, insert the following language; otherwise delete:  
Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.
- If the text includes any customer examples, please confirm we have prior written approval from such customer and insert the following language; otherwise delete:  
All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.
- Please review text for proper trademark attribution of IBM products. At first use, each product name must be the full name and include appropriate trademark symbols (e.g., IBM Lotus® Sametime® Unyte™). Subsequent references can drop "IBM" but should include the proper branding (e.g., Lotus Sametime Gateway, or WebSphere Application Server). Please refer to <http://www.ibm.com/legal/copytrade.shtml> for guidance on which trademarks require the ® or ™ symbol. Do not use abbreviations for IBM product names in your presentation. All product names must be used as adjectives rather than nouns. Please list all of the trademarks that you use in your presentation as follows; delete any not included in your presentation. IBM, the IBM logo, Lotus, Lotus Notes, Notes, Domino, Quickr, Sametime, WebSphere, UC2, PartnerWorld and Lotusphere are trademarks of International Business Machines Corporation in the United States, other countries, or both. Unyte is a trademark of WebDialogs, Inc., in the United States, other countries, or both.
- If you reference Adobe® in the text, please mark the first use and include the following; otherwise delete:  
Adobe, the Adobe logo, PostScript, and the PostScript logo are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, and/or other countries.
- If you reference Java™ in the text, please mark the first use and include the following; otherwise delete:  
Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.
- If you reference Microsoft® and/or Windows® in the text, please mark the first use and include the following, as applicable; otherwise delete:  
Microsoft and Windows are trademarks of Microsoft Corporation in the United States, other countries, or both.
- If you reference Intel® and/or any of the following Intel products in the text, please mark the first use and include those that you use as follows; otherwise delete:  
Intel, Intel Centrino, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.
- If you reference UNIX® in the text, please mark the first use and include the following; otherwise delete:  
UNIX is a registered trademark of The Open Group in the United States and other countries.
- If you reference Linux® in your presentation, please mark the first use and include the following; otherwise delete:  
Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both. Other company, product, or service names may be trademarks or service marks of others.
- If the text/graphics include screenshots, no actual IBM employee names may be used (even your own), if your screenshots include fictitious company names (e.g., Renovations, Zeta Bank, Acme) please update and insert the following; otherwise delete: All references to [insert fictitious company name] refer to a fictitious company and are used for illustration purposes only.
