Algo Credit Reporting	2.4.0	November 19, 2012

The Algo Credit products have been superseded by IBM Algo Credit Manager. IBM continues to invest in the IBM Algo Credit Manager products and we are committed to ensuring that you are successful with your deployment.

To continue our focus on enhancing these solutions and to provide excellent technical support to you and other users, the end of maintenance (EOM) date for the above-referenced Algo Credit products and versions will be June 30, 2016. IBM will continue to provide fixes, patches and code corrections where necessary with respect to these products if you are a supported and entitled customer until the above EOM date. Following this date, to continue receiving maintenance, you are required to be operating IBM Algo Credit Manager Version 5.2.0 (or a more recently available version) in production. Maintenance will no longer be provided for the above-referenced Algo Credit product versions after this date. IBM will continue to attempt to answer questions, triage problems and suggest possible workarounds, provided that no code modifications are required (Usage Support) with respect to these product versions in accordance with the terms and conditions of your current agreement. Extended Maintenance is available after the EOM date to provide fixes to you for these Algo Credit product versions. If you enter into an Extended Maintenance contract with IBM prior to September 30, 2015, IBM will extend the EOM date to December 31, 2016. Please contact your IBM sales representative or business partner to discuss terms and conditions of Extended Maintenance.

To assist you with migration questions and issues, IBM can provide you with further information on functional

and technical aspects of IBM Algo Credit Manager.

This notification is written notice of the above End of Maintenance date of the above Algo Credit product versions. We recommend that our customers upgrade their Algo Credit products to the latest maintained IBM releases. IBM provides a variety of services to assist you with product upgrades. Should you require assistance, please contact your IBM sales representative or business partner to discuss your upgrade plans.

For product information outlining the benefits, visit

Release notes and product documentation are included in the product download from our [Passport Advantage Online site](#). Further information on support for products may be obtained via the [IBM Algorithmics Customer site](#).

Thank you for your continued support of our business. Should you have any questions, please do not hesitate to contact IBM at AlgoAssist@ca.ibm.com.

Thank you for choosing IBM.
