Administration Application Installation Instructions

The administration application for IBM® SPSS® Statistics Server is the IBM® SPSS® Statistics Administration Console, which uses the framework for the IBM® SPSS® Collaboration and Deployment Services Deployment Manager.

System Requirements

The minimum hardware and software requirements for the administration application are as follows:

Operating System

■ Microsoft Windows XP, Windows Vista, or Windows 2003/2008 Server (including advanced and 64-bit versions)

Configuration

■ Pentium or Pentium-class processor

■ 512 MB or more of random-access memory (RAM)

■ A hard disk with at least 125 MB of available disk space

■ DVD drive

■ For connecting with SPSS Inc. server products, a network adaptor running the TCP/IP network protocol

Installing the Administration Application

► Log on to the computer using an account with administrator privileges.

► Insert the IBM® SPSS® Statistics Server DVD into the DVD drive.

► The AutoPlay feature will present a menu. To run the Setup program, choose Install IBM® SPSS® Statistics Administration Console, and then follow the instructions that appear on the screen. If you are installing on a computer where IBM® SPSS® Collaboration and Deployment Services Deployment Manager is already installed, see the topic Installing on a Computer Where IBM SPSS Collaboration and Deployment Services Deployment Manager Is Already Installed on p. 2 .

Note: If you are running Windows Vista, you must run the setup as administrator. Close the AutoPlay that automatically appears. Go to the *Windows* subfolder. Right-click *setup.exe* and choose Run As Administrator.

Administration Application Installation Instructions

Installing on a Computer Where IBM SPSS Collaboration and Deployment Services Deployment Manager Is Already Installed

If IBM® SPSS® Collaboration and Deployment Services Deployment Manager is already installed on the computer, you can install IBM® SPSS® Statistics Administration Console in the same directory without any additional steps. However, if you choose to install SPSS Statistics Administration Console in a different directory from that in which Deployment Manager is installed, you must perform the following steps after installation.

▶ Go to the directory in which you installed SPSS Statistics Administration Console.

▶ Go to the *configuration* subdirectory.

▶ Open *config.ini* in a text editor.

▶ Change the osgi.configuration.area, osgi.instance.area, and osgi.user.area lines to point to different locations. An example is shown below.

Figure 1-1
Before Change

```
osgi.configuration.area=@user.home/Application Data/SPSSInc/Deployment Manager/configuration
osgi.instance.area=@user.home/Application Data/SPSSInc/Deployment Manager/workspace
osgi.user.area=@user.home/Application Data/SPSSInc/Deployment Manager/user
```

Figure 1-2
After Change

```
osgi.configuration.area=@user.home/Application Data/SPSSInc/IBM SPSS Statistics/configuration
osgi.instance.area=@user.home/Application Data/SPSSInc/IBM SPSS Statistics/workspace
osgi.user.area=@user.home/Application Data/SPSSInc/IBM SPSS Statistics/user
```

▶ Save the file.

Uninstalling the Administration Application

▶ Use the Windows Control Panel to remove IBM® SPSS® Statistics Administration Console.
