

Building the Education Mobility Revolution

Michael Knauth IT Systems Engineer St. Joseph's College 12/06/2013

- Who is 'Terrace'
- What were the challenges
- What is the solution
- OS Deployment
- Patch Management
- Power Management
- Mobile Devices

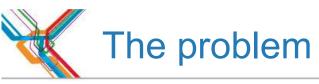

- Catholic boys school for years 5 12, founded in 1875
- Located on the fringe of Brisbane's CBD
- 4 campuses, 5 sites
- 1300 students
- 200 teaching and management staff
- 1600+ end user devices thin terminals, laptops, netbooks, iMacs, MacBooks, mobile devices
- 4 IT support personnel

- Multiple images to cater for:
 - Difference in hardware platforms;
 - Variance in software requirements.
- Multiple tools
 - Hard drive imaging software;
 - 'Home grown' post imaging tools.
- Growing network
- Excessive time to patch and manage
- Consistent requests for additional applications
- Patches for some software unmanageable
 - Adobe, Google, Mozilla, Oracle, Apple, Curriculum specific titles;
 - WSUS can only patch 35% of vulnerabilities;
 - 13 or more updating systems required to patch remaining 65%.
- Limited resources
- Introduction of mobile devices and the associated impacts

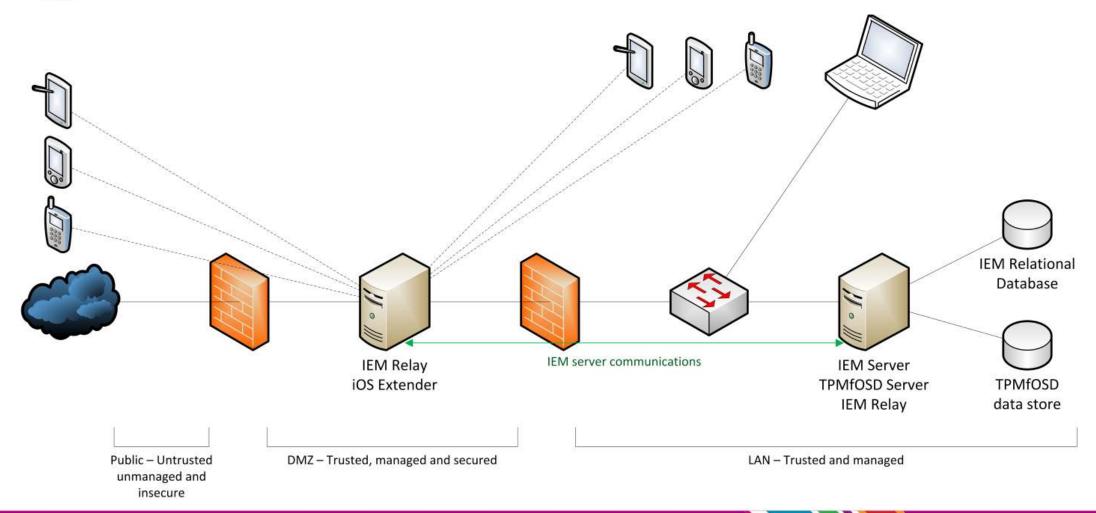

- Introduced:
 - Tivoli Provisioning Manager for OS Deployment, and;
 - IBM Endpoint Manager.
- Complete deployment and management solution of end points
- Single server
- Two days to install and configure
- Extremely flexible and extensible

- TPMfOSD
- Bare metal deployment
- Consolidated OS images from 10 down to 2
- Hardware independent
- Includes deployment of a hardened OS baseline and additional software modules
- Deployments are managed centrally, distributed remotely
- Image development time significantly reduced between 50% and 75%

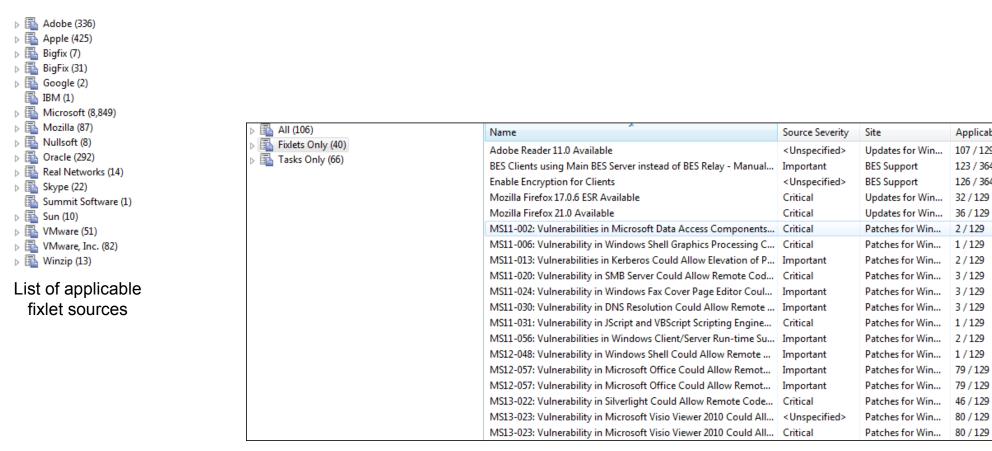

- Central patch management
- Patches (fixlets) created by IBM Content Delivery Team
- Supporting all major OS vendors and versions
- Updates, fixes and patches for major software vendors
- Eliminates the need to constantly maintain OS images
- Minimises the need for users to bring devices to IT support staff
- Cuts down costs associated with support
- Results in a consistent state of computing devices

Applicable fixlets for a selected device

80 / 129

- Devices are:
 - left on;
 - suffering insomnia;
 - experiencing damage as a result.
- Systems Lifecycle component provides Power Management
- Configure and deploy OS power profiles/schemes
- Metrics show power usage in contrast to device utilisation
- Scheduled shutdown of devices
- Wake on LAN

Pulse

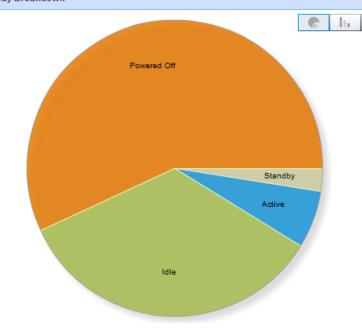

Average Day Breakdown

11 Pulse

| Power State | |
|-------------|---------------|
| Powered Off | 13.6 (56.9 %) |
| ldle | 8.2 (34.3 %) |
| Active | 1.5 (6.3 %) |
| Standby | .6 (2.5%) |
| | |

IBM. 👹

- Requirement for staff to fully leverage mobile devices on-site
- Deploy profiles for:
 - Security
 - -WiFi
 - Email
 - Apps
- Interaction with RADIUS and directory server to satisfy access requirement policies
- Distribute apps to devices
- Offer paid apps under volume purchase agreements
- Device security management options
