16:00-16:45	Client Panel			
16:45-17:00	Thank you and close			

Please note agenda is subject to change

Current as at 28 June 2013

Keynote Sessions

9am – 10:45am

IBM® Keynote – Big Data, Real Solutions, Big Impact

“Big data” is a frequently heard buzzword...is it really new? There is real value to be found in the application of big data however, the associated hype can cause anxiety and even skepticism for some IT and business executives trying to decipher fact from chatter.

For those organisations wise enough to capitalise on big data, this abundance of information offers a major opportunity to gain competitive advantage. Big data and the powerful analytics solutions now being used to analyse it are fundamentally changing the way organisations manage their daily operations, where they direct new investments and even how they are structured.

This keynote will give you a real-world perspective on big data, and will explore:

- How Smarter Analytics can transform big data into big results
- The role of legacy Information Management systems in big data
- Integrating analytic insights from big data into day-to-day operations
- The advantages of being an analytics driven organisation
- Inhibitors to success given the veracity of today's data
- Data latency and timely access to your big dataThe strengthening partnership between CIO and CMO and the impact

Graham Kittle, Business Analytics and Optimisation Practice Lead, IBM Global Business Services

Guest Keynote – Stepping into their shoes: Understanding social and new media trends in context

This presentation will take the audience on a journey through the attitudes and behaviours of Australians to new media, and the social context for these. Weaving a series of key trends with anecdotes, examples and video quotes of Australian of all ages, you will be invited step into their shoes and see the world from their perspective. Trends covered include: Smart living and beating the system, our culture of immediacy, why not evolving is stagnating, why privacy and security are old fashioned paradigms and the drivers behind social media addiction.

Neer Korn, Social Trends Expert and Commentator

11:10am – 11:50am

Insight in Action for IT Professionals

Visualisation Tools to Make Analytics Consumable

Real-time data. Social data. Big data. The world produces more than 2.5 exabytes of data every day. Visualisation is key to unlocking insight and discovering answers from the overwhelming data available to us. With visualisation, we can easily spot the patterns in data, such as trends, gaps and outliers. This session will provide a glimpse into the visualisation technology, expertise and community assets IBM provides to help you visualise your data and discover answers. From intelligent discovery capabilities, such as Smart Metadata and Smart Visualisation that guide users to meaningful insights to the IBM Rapidly Adaptive Visualisation Engine and Many Eyes visualisation community to help the business easily and quickly grasp insights, you'll enable your entire organization to discover new insight into your business faster.

James Rowntree, Client Technical Manager - ANZ, IBM

Customer Understanding for Marketing Effectiveness

Harness the Power of Big Data for Improved Business Outcomes

Everyday, we create 2.5 quintillion bytes of data—so much that 90% of the data in the world today has been created in the last two years alone. This data comes from everywhere: from sensors used to gather climate information, posts to social media sites, digital pictures and videos posted online, transaction records of online purchases, and from cell phone GPS signals to name a few. This data is big data. Big data is more than a challenge; it is an opportunity to find insight in new and emerging types of data, to make your business more agile, and to answer questions that, in the past, were beyond reach. Until now, there was no practical way to harvest this opportunity. In this session learn how IBM's platform for big data opens the door to a world of possibilities, giving organisations a solution that is designed specifically with the needs of the enterprise in mind

Tim Young, GMU Big Data Executive, IBM

Big Data Analytics: Finding Opportunity in Chaos

Whether it's big data or social media data, businesses are expected to make more use of the opportunities this data holds - and the opportunities are there. From better targeting of new customers to more personalised experiences for existing customer, the ability to structure unstructured data from social media, and combine it with a brand's own data, to give meaningful insight offers huge potential to businesses. But realising this potential is not easy – understanding and structuring data from social media sources is complicated. How do you understand what people are really talking about? How do you isolate discussions about your brand, competitors or your market? As businesses feel the pressure to gain new insights from social media, they require the analytics expertise to transform this flood of information into actionable strategies. Learn how IBM solutions for social media analytics help organisations take control of this data so they can improve customer satisfaction, identify patterns and trends, and make smarter decisions regarding marketing campaigns.

Chris Howard, Big Data Architect IM, IBM

The Real World Use of Big Data

"Big Data" is more than just dealing with "lots of data". It represents an information management challenge beyond traditional solutions, and delivering outcomes in an effective and responsive time frame. When dealing with the volumes and varieties of content now available, turning information into insight requires a new level of capability. Decision makers are asking "how fast is the answer returned" as well as "how accurate is this answer?". IBM is unique in delivering a Big Data platform that is governable and consumable for analytics at rest and in motion. In this session we will look at the IBM Big Data platform, how it hangs together, and explore some practical use cases that are already delivering results to our clients.

Timothy Brown, and Aruna Kolluru, Big Data Specialists, IBM

Customer Understanding for Marketing Effectiveness

Investing in your greatest asset (customer data) to better understand customer behaviour and fuel growth

Suncorp is a diversified financial services group that offers general insurance, banking, life insurance and wealth management services. After a number of mergers and acquisitions over the past decade, their customer base increased by 200 percent. In order to avoid internal conflict of marketing campaigns between brands and prevent duplication of efforts, the company saw the need for a single, integrated view of its customers that would have a positive effect on the bottom line. This session will outline Suncorp's experience in developing a group customer infrastructure, the business objectives, development hurdles and the success achieved..

Stephen Goldsworthy, Executive Manager, Customer Data Strategy, Suncorp

Analytics for Business Decision-Making

A Roadmap to the Future: The Six Stages of Social Media Analysis Maturity

While social media itself is a recognised channel, social analytics is an emerging specialisation. This session proposes a social analytics maturity process that organisation goes through and share how a few organisations are being successful on this journey.

Dev Mookerjee, IBM Business Analytics

Delivering Trusted Information for Big Data and Business Analytics

Business leaders' confidence in data is decreasing as the volume, variety and velocity of information increases. Chief among their concerns is trustworthiness and whether their data are adequately protected. Today, one in three business leaders does not trust the information available to support decisions. Many organisations use analytics on big data to find breakthrough insights, but big data increases the risk of basing decisions on unreliable information. For business leaders to gain confidence in information to act upon it, data must be trusted and protected. Learn how leaders are leveraging integrated IBM Cognos and InfoSphere software to ensure they're armed with reliable, accurate information, to confidently address the vital questions that will drive their businesses forward.

The Empowered Marketer

Today's customers are empowered by technology and transparency. As a marketer, shouldn't you be too? Marketers are facing shifting marketplace conditions as well as a customer base that increasingly relies upon digital communication tools. Customers have heightened expectations for quality, service and corporate transparency, and marketing professionals not only need to respond proactively to these challenges but put the odds in our favour by using ALL available data to our advantage. Join us at this session to learn how IBM is empowering marketers and transforming the environment.
