Q2 Business Agility in Action

Sydney: Thursday 2nd June

Canberra: Monday 6th June

Melbourne: Wednesday 8th June

Over 25 product and capability demonstrations!

Register at:
ibm.com/events/au/businessagility/june

Topics Covered
Achieve Business Agility with WebSphere software
Smarter process-driven businesses – Business Process Management
Easier Event-Driven Businesses - WebSphere Decision Server (Business Rules & Events)
Quicker Connectivity Appliances - WebSphere Connectivity Solutions
Optimise Web-Facing Applications – WebSphere Application Server
Simpler Private Cloud Deployment – WebSphere Cloud Solutions
Accelerate results – How to get started

Smarter systems for a smarter planet.

Business Agility in Action

The event series on BPM, SOA and Application Integration

Give your business the flexibility it needs to capitalise on change.

Business Agility

Colin Gniel - Business Integration Executive

What is “Business Agility” ?

- **Business agility** is the ability of a business to adapt rapidly and cost efficiently in response to changes in the business environment. ...
- **Agility** is a concept that incorporates the ideas of flexibility, balance, adaptability, and coordination under one umbrella. In a business context, agility typically refers to the ability of an organisation to rapidly adapt to market and environmental changes in productive and cost-effective ways

Driving Better Business Outcomes

By aligning the engines of agility

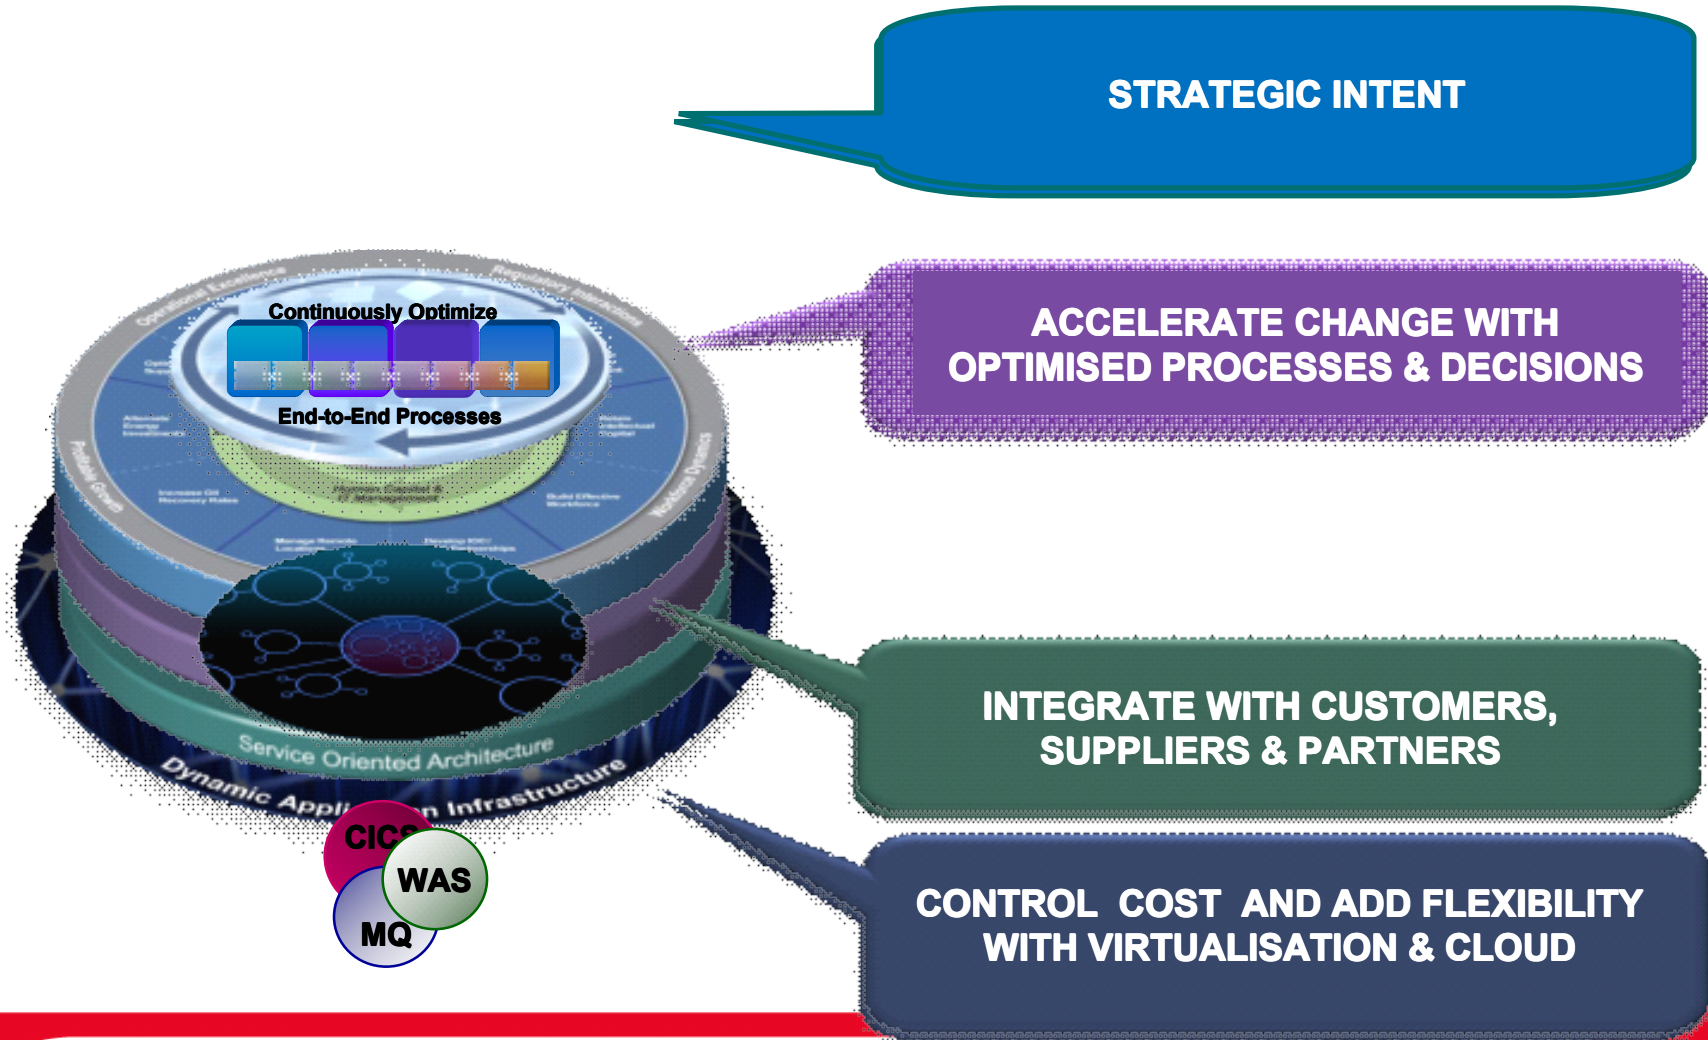

Agile businesses that actively converge business and technology have

- **7%** higher EPS growth
- **49%** higher ROI

than their industry peers

Accelerating Business Agility with WebSphere in the Cloud

Colin Gniel - Business Integration Executive

*SIMPLY EXPLAINED - PART 37:
AGILITY*

What is Cloud Computing?

A user experience and a business model

An emerging style of IT delivery in which applications, data, and IT resources are **rapidly provisioned** and provided as **standardised offerings** to users over the web in a **flexible pricing model**.

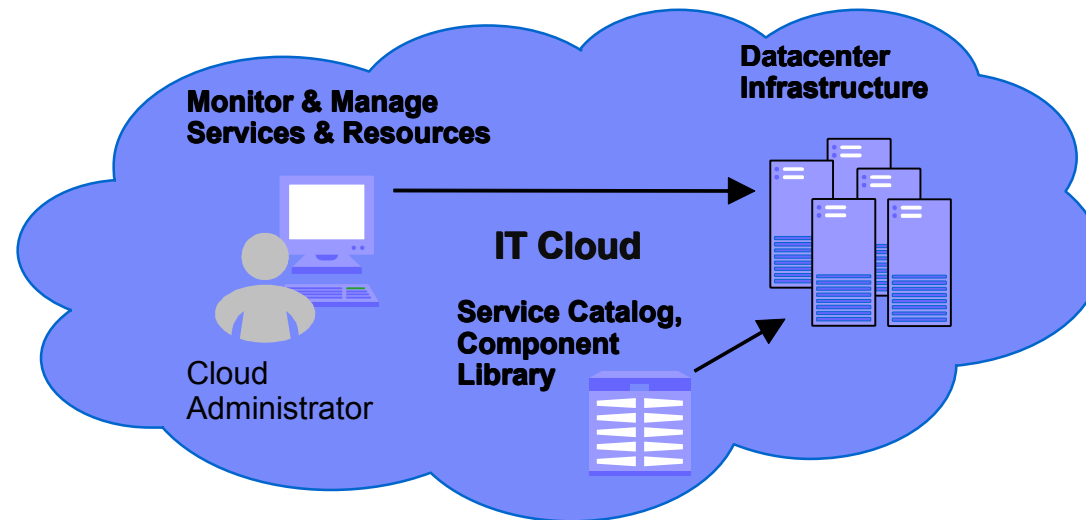

What is Cloud Computing?

An infrastructure management and IT services delivery model

A way of **managing** large numbers of highly **virtualised resources** such that, from a management perspective, they resemble a single large resource.

THE CLOUD THINGY

Cloud Computing Delivery Models

Flexible Delivery Models

Public ...

- Service provider owned and managed.
- Access by subscription.
- Delivers select set of standardised business process, application and/or infrastructure services on a flexible price per use basis.

Cloud Services

Cloud Computing Model

Private ...

- Privately owned and managed.
- Access limited to client and its partner network.
- Drives efficiency, standardisation and best practices while retaining greater customisation and control.

Hybrid ...

....Standardisation, capital preservation, flexibility and time to deploy

- Access to client, partner network, and third party resources

.... Customisation, efficiency, availability, resiliency, security and privacy

GOVERNANCE

Server Virtualisation: a foundation for the private cloud

Breakdown of Companies by Percentage of New Servers Virtualized in 2011

n = 180.

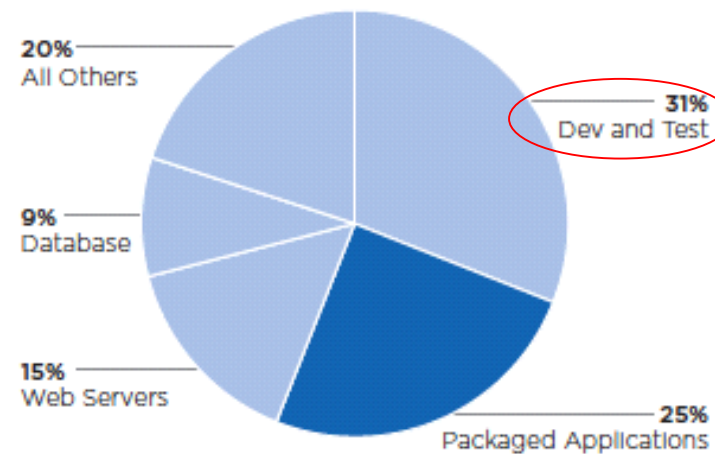

Note

Clients are *thinking* about cloud, but are **implementing** virtualisation

Note

Early opportunities often focus on dev and test scenarios

Current Breakdown of Virtual Servers by Host

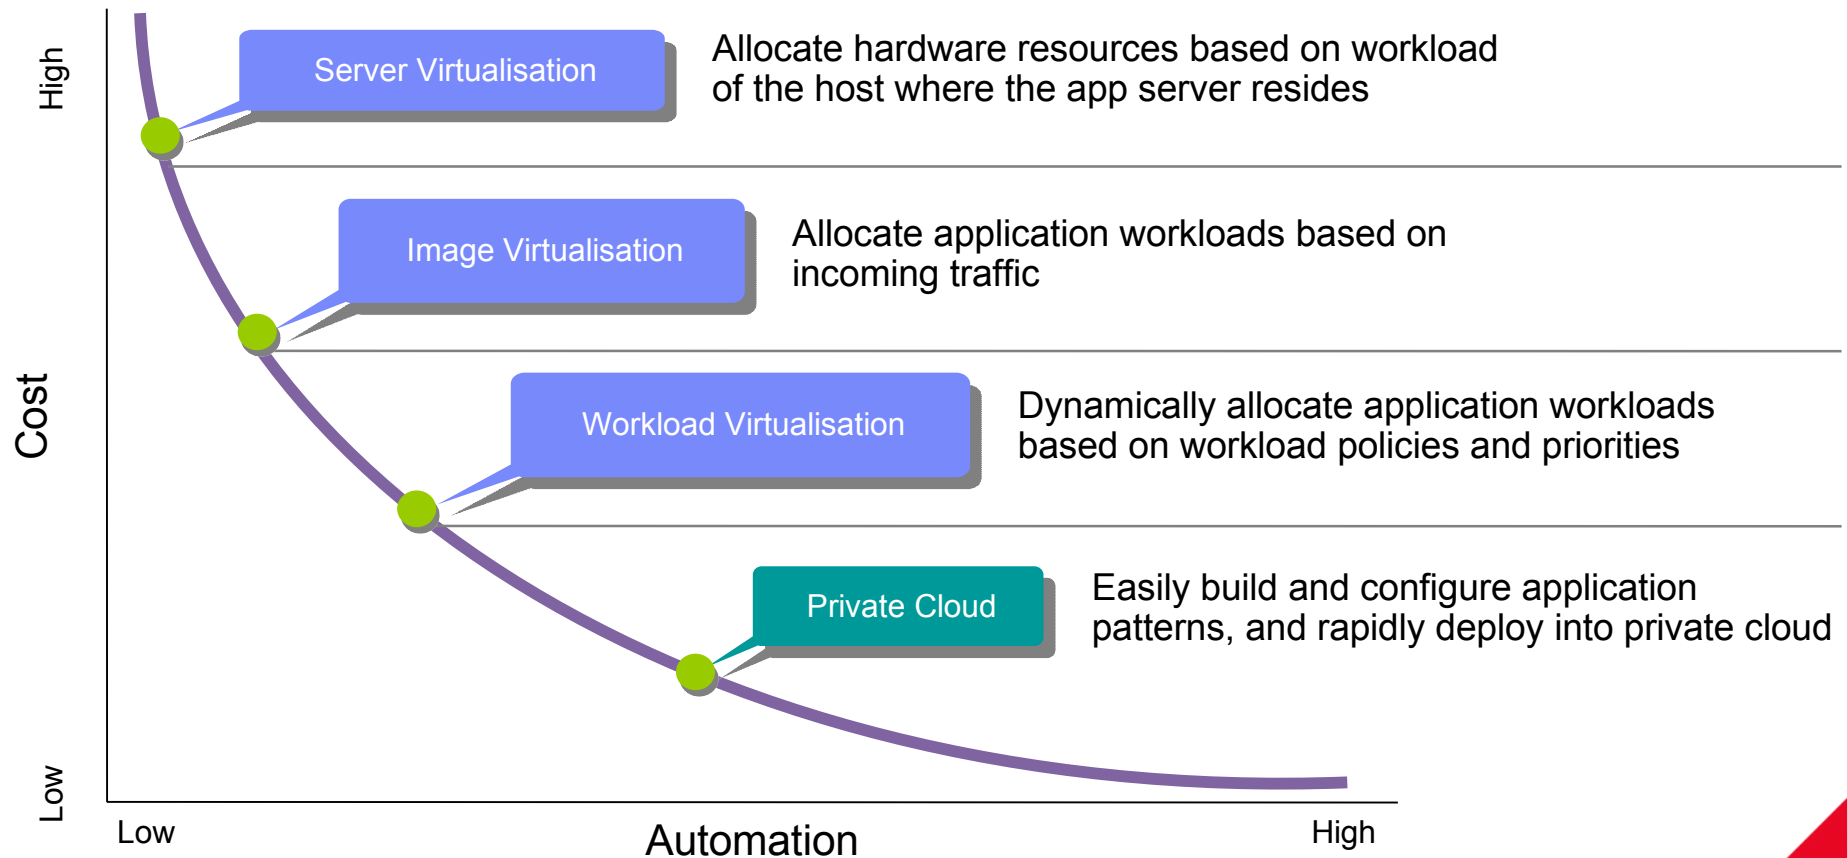

n = 253.

Virtualisation drives automation and cost optimisation

IBM uniquely delivers solutions across these technologies

Virtualisation in the Enterprise

1 Server Virtualisation

- Virtualisation of hardware resources in the data center
- Management of virtualised infrastructure

2 Image Virtualisation

- Virtualised infrastructure leads to creation of “virtual” software images
- Proliferation of virtual software images leads to management challenges

3 Workload Virtualisation

- Images are combined into patterns representing middleware workloads
- Workloads encapsulate well defined combinations of integrated middleware

Today's Agenda

10.15am - 10.30am	Morning tea	
	Stream 1	Stream 2
10.30am - 10.55am	Document Process Automation Case study example - using WebSphere Business Process Automation tools and Readsoft software.	Introduction to WebSphere Appliances - Use cases and examples
11.00am - 11.25am	Discover the power of WebSphere Lombardi Edition & ILOG Business Rules Management System	Simplify deployment into a private cloud using IBM WebSphere CloudBurst
11.30am - 11.55am	Kick-start your BPM Projects with IBM Blueworks Live	Discover how to rapidly connect your SaaS and on-premise applications with WebSphere Cast Iron Cloud Integration
12.00pm	Event concludes, lunch and networking	

Smarter systems for a smarter planet.
