

Connectivity & Application Integration

Colin Gniel
WebSphere Software
IBM Software Group
Australia/New Zealand

SOA in Action

Get smart about SOA.

Session 1
9:15am to 9:55am

**Getting started with SOA
- the complete guide**

Designed for those who want to understand the key concepts of SOA as an enabler of business flexibility, innovation, integration and agility.

Session 2
10:10am to 10:50am

**Connectivity and
Application Integration**

Intended for those who want to learn how to connect any application to virtually any other IT system with extreme reliability, scalability and flexibility.

Session 3
10:55am to 11:35am

**Business Process
Management enabled by
SOA**

Designed for those who want to understand how to continuously optimise business processes and adapt them to their rapidly changing business needs.

SOA in Action

Get smart about SOA.

The Planet is Getting Smarter...

Smarter Planet

- instrumented
- interconnected
- intelligent
- people
- companies, institutions, industries
- man-made systems
- nature's systems

Get smart about SOA.

The Pace of Business Must be Met

98%

Of CEOs plan business model changes

3X

Increase in gap between expected change and ability to handle change

In a Time of Turbulent Change

SOA in Action

Get smart about SOA.

Aligning IT to Business is Critical

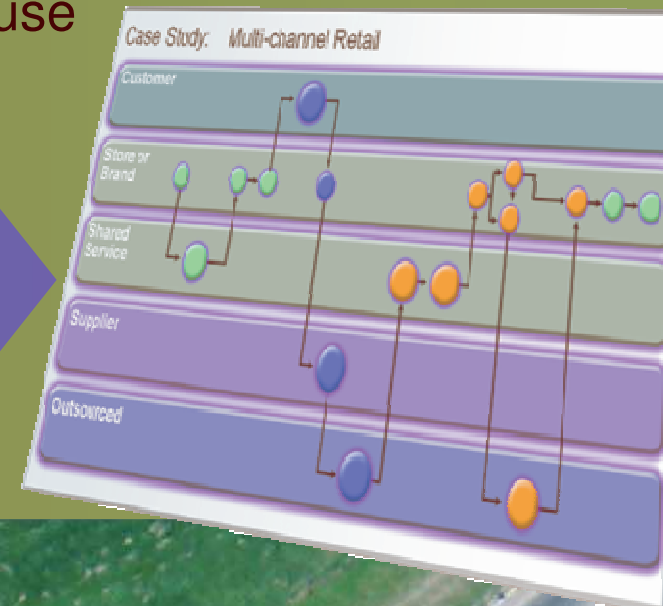

- Today's Business-focused IT requires:
 - **Faster** response from IT to enable business to address changing market conditions
 - Increased portion of IT budget to be spend on **new innovation** rather than maintenance
 - **Reduced IT complexity** for better security and management as well as reuse

IT
Reality

IT Needs
to Be

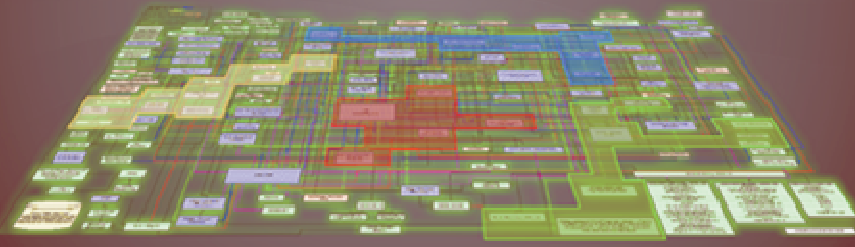

SOA in Action
Get smart about SOA.

Why go down this path?

What is SOA?
Extracting services from applications

 Services:
Business
Technical
Information

- Optimise reuse of existing assets
- Quickly shift direction to reflect economic realities
- Flexibly connect information and application

Unlock the value of your own...

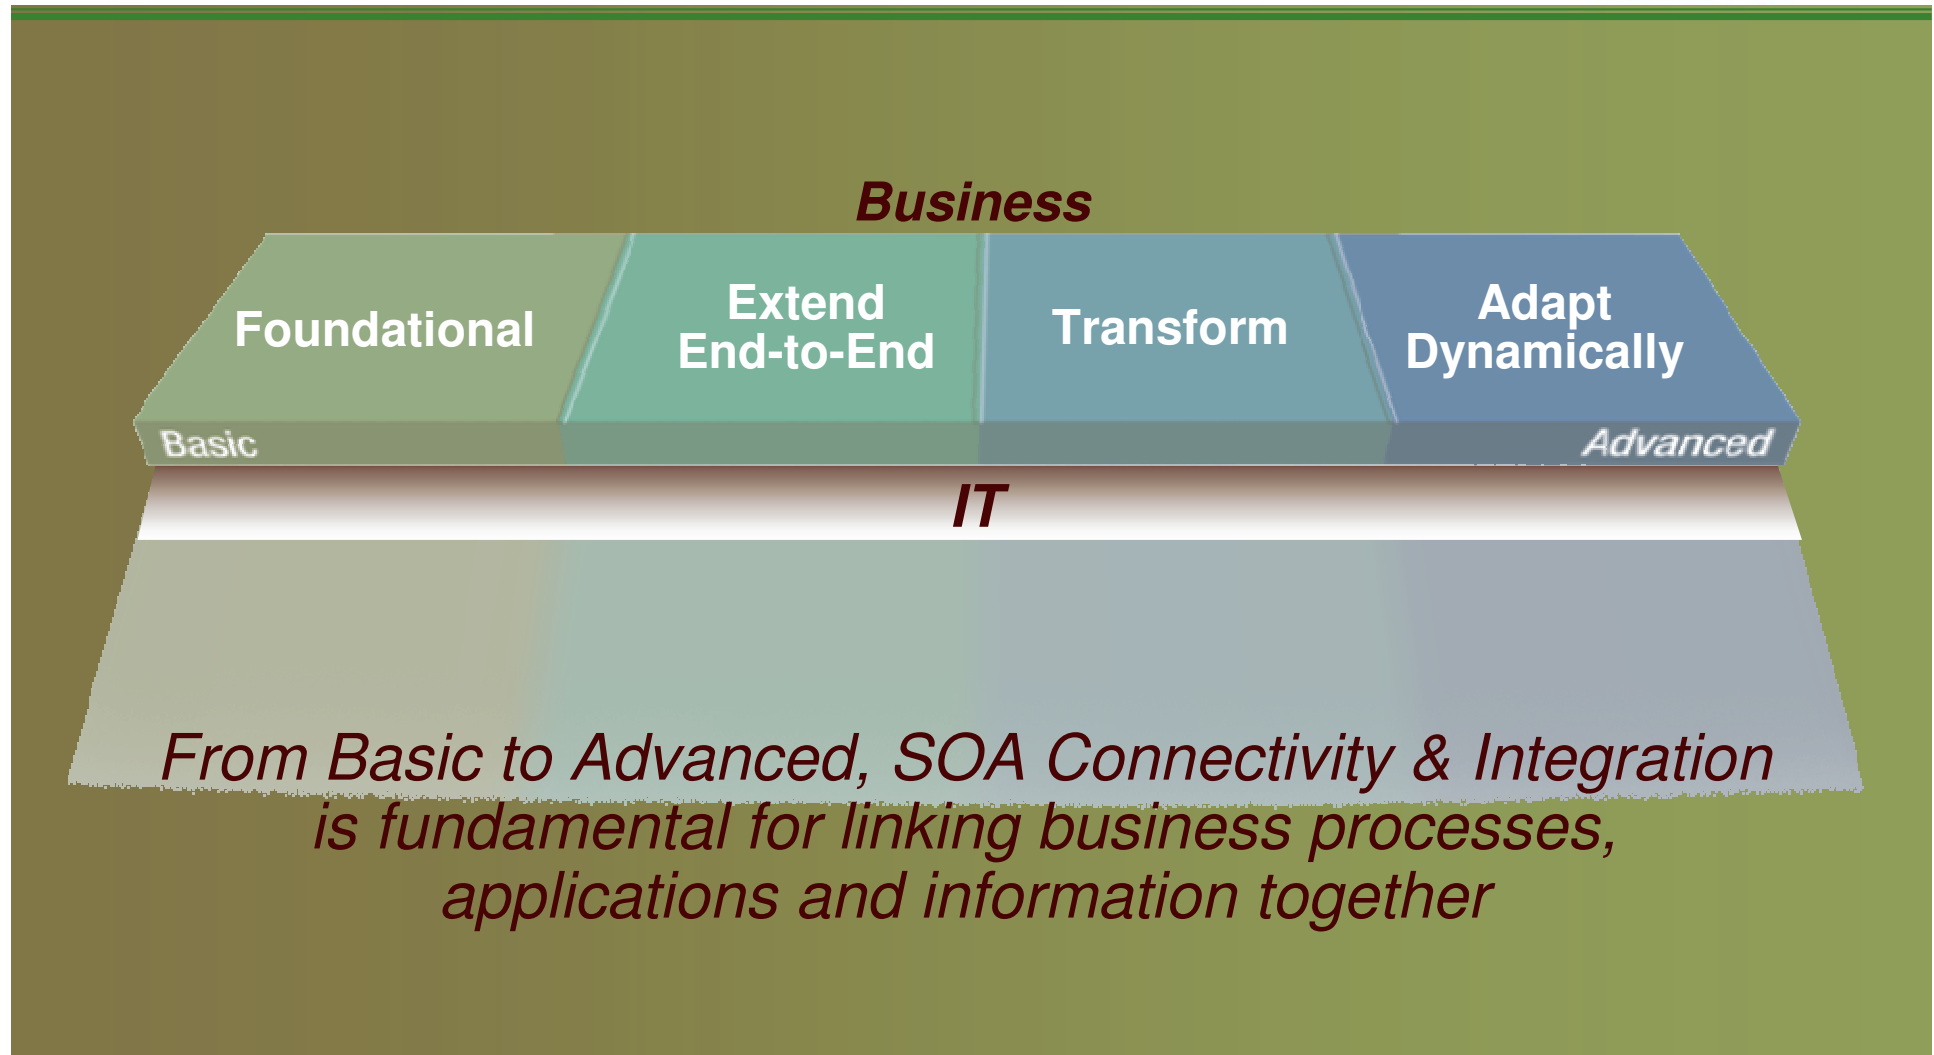

*Business Resources
Application Resources
Infrastructure Resources*

IBM's Smart SOA

Powers Smarter Business Outcomes Across a Continuum

SOA in Action

Get smart about SOA.

Organisations Leverage SOA Connectivity & Integration to Address Critical Business Needs

Business Needs

Common Adoption Patterns

“Fast, flexible & reliable access to business information”

ESB Messaging & Enrichment

“Trust, management & security for business applications”

Service Visibility & Governance

“Make it easy for the Organisation’s customers, partners & suppliers to conduct business”

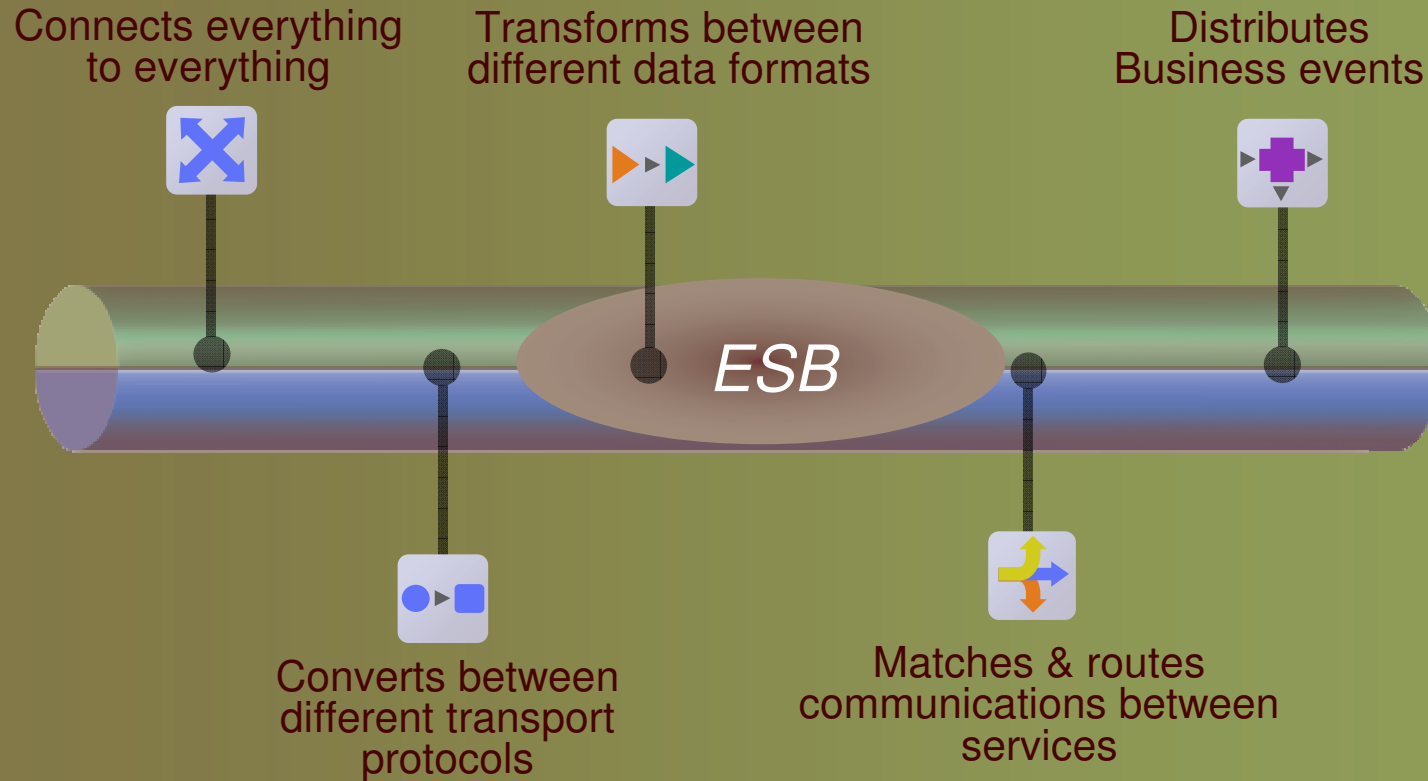

Extend Connectivity to Partners & Customers

SOA in Action

Get smart about SOA.

Agile Connectivity Begins with Integration

The Enterprise Service Bus (ESB)

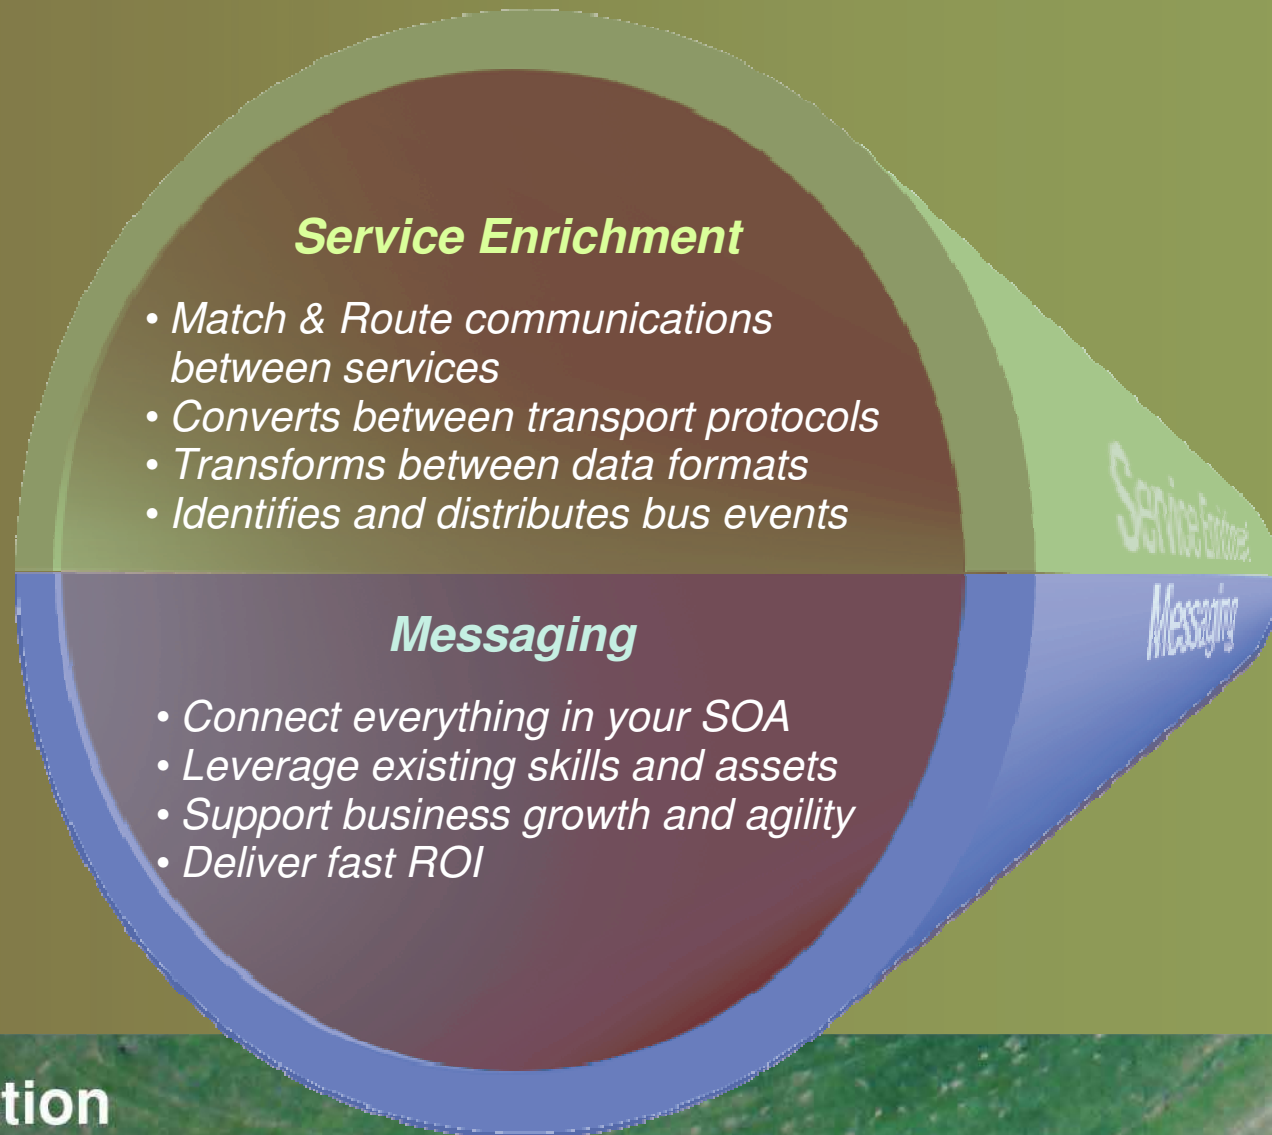

An ESB enables flexible SOA connectivity for integrating business applications, services and processes

SOA in Action

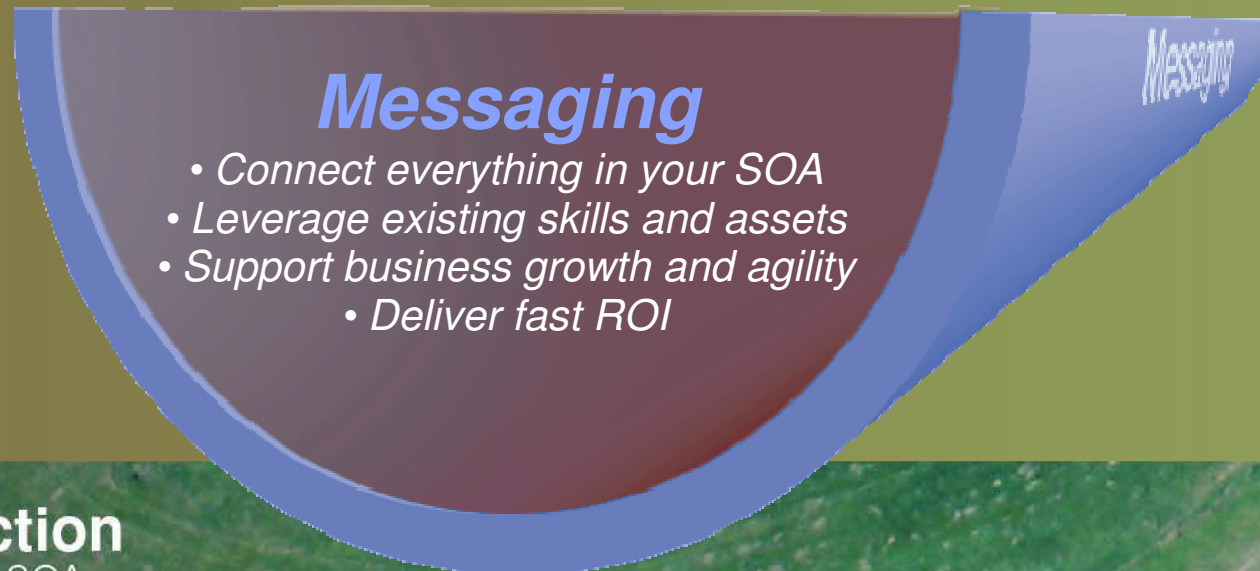

Get smart about SOA.

A Closer Look at the ESB

SOA in Action
Get smart about SOA.

A Closer Look at the ESB *Messaging*

SOA in Action
Get smart about SOA.

The Power of Messaging

Confirmed
Flight
Booking

Lower process disruptions with reliable data movement

Real-time
System
Updates

Execute **timely business decisions** by distributing events

Web-based
Bank
Transfer

Create **new, low-cost** Web 2.0 applications leveraging existing IT systems

Auditable
Stock
Trades

Meet compliance goals by preserving data integrity

SOA in Action

Get smart about SOA.

Proven & Trusted Messaging

Relied On By Over 10,000 Companies Globally

Financial Markets

- Delivering \$1 trillion transactions per day
- Exchanging £400B+ in messages

Government

- Agency sends 675m messages per day
- ~ 7,500 agency users & 50,000 citizen transactions daily

Banking

- \$7-\$35 trillion messaging traffic per day
- 213+ million messages daily

“ We needed a single integration platform that would allow all our applications to access and share information and enable them to collaboratively process transactions based on common business rules.”

Chief Architect,
Health Insurance

IBM – 15 years of customer experience totaling 10's of billions of messages every day

SOA in Action

Get smart about SOA.

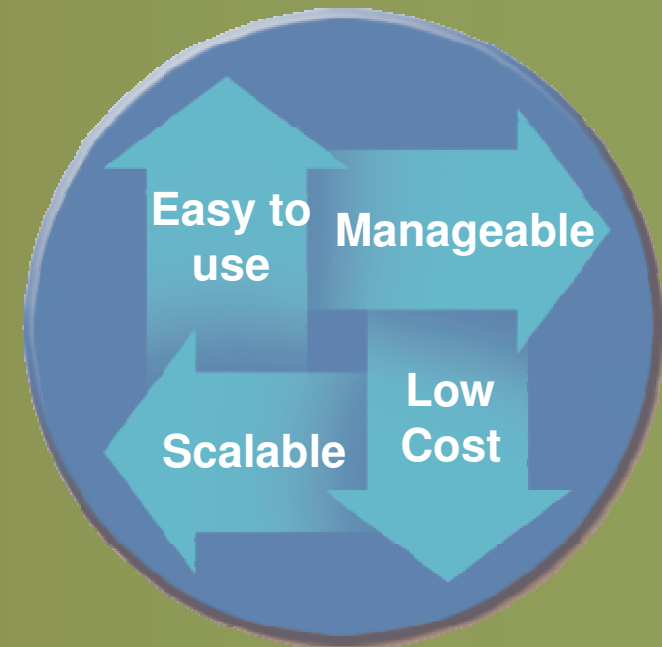

Managed File Transfer – Audited & Secure

- Most data moves from application to application using file transfers
- Provide the visibility & manageability to move important business data reliably & securely

WebSphere MQ FTE

- Builds upon WebSphere MQ's proven transport backbone
- Delivers robust solution for Managed File Transfer
- Designed to integrate with IBM's SOA portfolio

SOA in Action

Get smart about SOA.

A Closer Look at the ESB

Enrichment

Enrichment

- *Match & Route communications between services*
- *Converts between transport protocols*
- *Transforms between data formats*
- *Identifies and distributes bus events*

Service Bus

SOA in Action

Get smart about SOA.

The Power of Enrichment

Telephony
Hub

Save time and money centralising service interfaces

Routing
Bank
Transactions

Execute business requirements faster by quickly integrating applications and services

Central
Airport
Checkpoint

Create new revenue-generating services from current core business applications

SOA in Action
Get smart about SOA.

Delivering True ESB Enrichment Value

Insurance

- 95% of the top global insurances firms use ESB enrichment
- Single firm improved transactional elapsed time by over 39%

Retail

- One store reduced SAP development by 60%
- Global retailer moved to real-time inventory, reduced stock-outs to zero

Banking

- 80% of the top 8 banks in USA use ESB enrichment
- Bank replaced point-to-point interfaces to meet capacity of 1.2M messages per month

Business Flexibility

“ Our business is changing very fast, and the ESB enables us to support upcoming business opportunities immediately by connecting new market places and new dealing systems to our existing system landscape. ESB mediations and service enrichment accelerates the adoption of new business processes and the launch of new products and services.”

Chief Architect,
Health Insurance

Enhancing SOA Through Service Visibility & Governance

- Publish & find Your Services to extend business applications
- Manage & govern your ESB messaging & services
- Ensure consistent policy enforcement

SOA in Action
Get smart about SOA.

Service Visibility and Governance

Comprehensive, Scalable and Extensible

Provision services to all SOA consumers

- **Enrich SOA Connectivity**

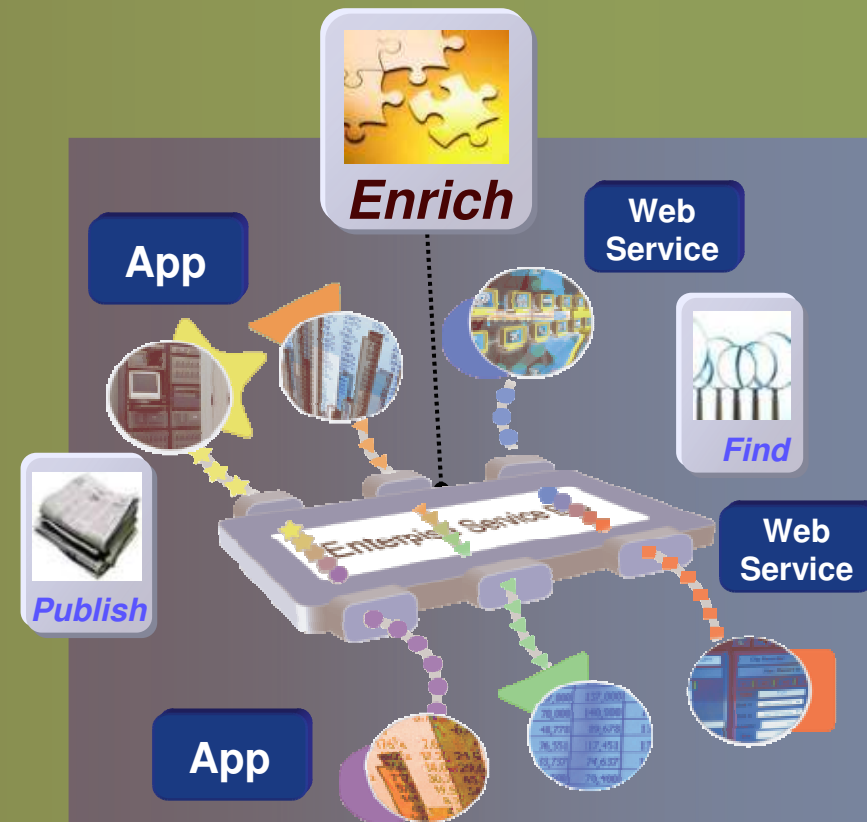

- Enable dynamic and efficient interactions between services at runtime
- New Mediation capabilities allows dynamic endpoint lookup and selection

- **Help optimise service performance**

- Enable enforcement of policies, Impact analysis

- **Federated service lifecycle support across the enterprise**

- Integration and federation with other standard registries and repositories providing one reliable authoritative service reference

Encourage Reuse, Enhance Connectivity and Enable Governance with WebSphere ESB and WebSphere Message Broker, extended with WebSphere Service Registry and Repository

SOA in Action

Get smart about SOA.

Extend Connectivity to Partners & Customers

- Quickly create new business services
- Easily adapt to changing industry standards
- Improve ROI by quickly leveraging existing systems for multi-enterprise collaboration

Optimise the value of your SOA connectivity by extending to customers and partners

SOA in Action

Architect for Advanced SOA Connectivity

Federated SOA Domains

Today's Globally Integrated, Agile Businesses Requires End-to-end Transaction Integrity; Unified Governance; and Security

A Federated ESB is an enterprise-spanning connectivity infrastructure of multiple ESBs working together to extend service reuse across as well as within domains.

SOA in Action
Get smart about SOA.

Analyst Views – the Future is Federated

ESB Adoption Trends - Forrester

“Some of Forrester's most **advanced clients** got on the ESB bandwagon years ago and today **find that they have** an embarrassment of riches, with **multiple ESBs**. This outcome is almost inevitable for larger enterprises; no single ESB today can satisfy all requirements equally well across the whole of a large enterprise.”

– Larry Fulton, Forrester, “*Shaping Your Middleware Strategy to Benefit from ESBs*”, May 2007

ESB Adoption Trends - Gartner

“80% of large companies will have **ESBs** or similar SOA infrastructure **products from three or more vendors** in 2009. (0.7 probability)”

“...half of all large companies will apply a systematic, **federated approach to managing their disparate SOA domains and ESBs** in 2009. (0.7 probability)”

– Roy Schulte, Gartner, “*Succeeding With Multiple SOA Service Domains and Disparate ESBs*”, May 2007

SOA in Action
Get smart about SOA.

What is Driving the Reality of Multiple ESBs?

Both historical reasons and explicit choices contribute

Mergers and acquisitions have resulted in multiple ESBs

Distributed geographic locations

Best practice requirement to isolate critical environments

Department ESBs need to be decoupled to allow asynchronous development and deployment

Business or funding models are distributed – multiple business units each with own P&L

Departments have differing ESB requirements which are best met by different products

Distributed governance

Architectural choices – decision for corporate shared service ESB

Legacy RYO ESB exists

ESB offerings from IBM WebSphere

An ESB without limits to enable SOA and BPM solutions

Service Registry

WebSphere Services Registry and Repository

Service Orchestration and BPM

WebSphere Process Server

SOA Connectivity – Integration Across Your Business

Building and Governing Your ESB

WebSphere DataPower

- New appliances for B2B and LLM
- QuickStart – Low-cost, low-risk start for your SOA implementation

WSRR 6.2 and WSRR ALE

- Publish and Find Your Services to extend business applications
- Manage & Govern your SOA
- Ensure consistent enforcement of policies

WebSphere ESB

- Leading Web services standard support
- Delivers Policy-driven connectivity

WebSphere Message Broker

- Endless Integration to virtually anything
- Handles complex Messaging

WebSphere MQ and MQ File Transfer Edition

- Leading SOA messaging backbone capabilities
- File transfer scheduling, automation, auditing and triggering

Extend Package Applications

WebSphere Adapters

Adapters for IBM WebSphere are pre-built integration components available from both IBM & IBM business partners built to run directly on IBM integration and application servers and to integrate with IBM tooling

- Reduce integration effort
- Improve reliability and manageability
- Ensure maintainability and reusability
- Discover and enable services
