Helping you keep your IT secure

New security framework guides IBM's approach to security in 2012

To help you address emerging security issues such as cloud and mobile computing, IBM's new Security Systems division has updated the IBM® Security Framework. This new framework will guide our approach in 2012. [Learn more.](#)

Your security role is changing

Organisations worldwide are making data security a corporate priority. As a result, the role of Chief Information Security Officer (CISO) is evolving. [Read more](#) about the CISO's changing responsibilities.

Combat insider threats

With a growing number of insider threats to security, it has become more important – but more difficult – to secure critical information and related assets. Read the white paper [Stay ahead of insider threats with predictive, intelligent security](#) to learn how your organisation can develop more intelligent security to predict, identify and react to threats from within.

Seven questions to answer before rolling out mobile capabilities

Business use of personal mobile devices has risen dramatically over the past few years. This may have significant consequences for your business and IT operations. Here are [seven questions](#) to consider as you address the

challenges presented by mobile computing devices.

Assess the security of your IT environment

In less than two days, our security experts can assess your security environment and provide an overview of your security risks. We then advise on how you can enhance your security in line with industry best practice.

[Register for an assessment](#) or call Jason Burn on 132 426 (Australia) or 0800 426 431 (New Zealand) to book or find out more.

Save the date for Pulse ANZ 2012!
