Top Enterprise Mobility Initiatives

Embrace Bring Your Own Device (BYOD)

Migrate from BlackBerry to multi-OS

Deploy public and enterprise apps

Provide access to work content

Protect sensitive corporate data

Embrace the **New Normal**

EMM is becoming **THE** IT platform

Go beyond enabling these new devices

- Mobile utilization of corporate network/resources
- Separation of corporate & personal apps/data
- App management & security (and app dev assist)
- Identity, context and more sophisticated policy

The logo for MaaS360 features a series of seven blue circles of varying sizes arranged in an upward-curving arc above the text. The text "MaaS360" is rendered in a sans-serif font, with "MaaS" in black and "360" in a blue-to-white gradient. A registered trademark symbol (®) is positioned to the upper right of the "0".

MaaS360®

BYOD remains the Main Disruptor

Continuing Needs

Blackberry Replacement

Mobile App Deployments

Bring-Your-Own-Device (BYOD)

Emerging Needs

Corporate Content & Collaboration

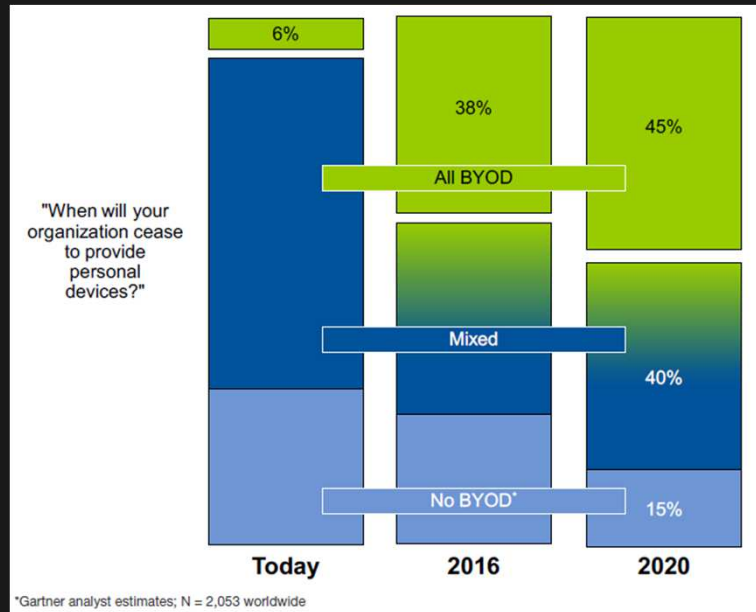

Intranet Apps & Access

Company-wide deployments

The BYOD Embrace

- **Corporate-liable** programs will become the exception soon
- **45%** of companies to stop providing devices to workers by 2020
- **15%** of companies will never provide any BYOD option
- **40%** of companies will offer both styles of programs

* Gartner, "Bring Your Own Device: The Facts & the Future", 2013

What Customers are Saying about MaaS360

“ We chose MaaS360 because we can run it across our full mobility network, whether a laptop, phone or tablet. I can provision access to all of those devices at once, knowing that each has a different graphical paradigm.”

EASTMAN

“ From evaluation to trial to production, we’ve had a very good overall experience. Our account manager is great to work with and Fiberlink’s wealth of videos, webinars & blog posts have proven invaluable as we were getting started with MDM.”

“ Within two hours of first visiting maas360.com, I signed up for a demo portal, logged in, enabled Active Directory authentication & started enrolling devices...I felt it couldn’t be that easy. But it was.”
