The new era of cognitive computing will transform our future

Tabulating Systems Era

Programmable Systems Era

Cognitive Systems Era

Cognitive systems expand the problems we can address

Programmatic Systems

- Leverage traditional data sources
- Follow pre-defined rules (programs)
- Provide the same output to all users

Cognitive Systems

- Are taught, not programmed.
- Learn and improve based on experience
- Interpret sensory and non-traditional data
- Relate to each of us as individuals
- Allow us to expand and scale our own thinking

Watson: A cognitive learning system that enhances our abilities to perceive, reason and relate

Perceiving:

Watson understands the world as we do: it interprets sensory input beyond traditional data

Reasoning:

Watson thinks through complex problems: it deepens our analysis and inspires creativity

Relating:

Watson understands how we communicate, and personalizes its interactions with each of us

Learning:

Watson learns from every interaction, scaling our ability to build experience

Cognitive computing – Perceiving

Watson understands the world as we do

A collage of three visualizations demonstrating cognitive computing capabilities. The top image shows a grayscale photograph of a tree with colored lines and numbers overlaid, representing object recognition and tracking. The middle image is a circular chart titled "Values" and "Needs" with segments for "Conservation (36%)", "Hedonism (40%)", "Self-Transcend (42%)", "Social Basic", "Self-Expression", and "Needs (Ideal (high))". The bottom image is a 3D scene with labels for "Person", "Person", "Bus", "Car", and "Person" overlaid on a street scene, representing scene understanding.

Cognitive computing – Reasoning

Simplifies complex thinking and inspires creativity

Initial work with expert oncology sub-specialists at Memorial Sloan Kettering Cancer Center

Fueled by Information:

Watson reads through 5M pages of medical literature to evaluate each case

Initial projects with Healthcare Providers underway

Watson Oncology help physicians transform patient care

Quality & Consistency of Care

Promote adoption of evidence based practices

Clinical Efficiency

Rapidly identify best treatments with evidence based reasoning

Optimize clinical trial matching

System identifies clinical trials available for patient case

Physician-patient engagement

ABOUT

It wouldn't be out of line to equate the eastern coast of the Dominican Republic as a sort of sea and sun Disneyland — after all, it is here where the megalomaniacal all-inclusive resorts snatch up broad swaths of cinematic beaches faster than the real estate agents can get the sun-soaked sands on the market. Its beaches rival those anywhere else in the Caribbean, both in terms of their soft, white texture and their warm aquamarine waters.

SOURCE: FROMMER'S - ACTIVE PURSUITS IN PUNTA CANA<http://frommers.info/destinations/punta-cana/725833>**Active Pursuits**

One of the Caribbean's great beaches stretches along the so-called Costa del Coco, or Coconut Coast, covering more than 32km (20 miles) of brilliant white sand -- so there's room for everyone. Flanked by the all-inclusives, the major beaches here include Playa Macao, Playa Cortecito, Playa Bávaro, Playa Punta Cana, and Playa Punta Juanillo. The upmarket all-inclusives have staked out the best beachfront properties, so everything is done for you here, including unlimited access to food and drinks and watersports concessions at each hotel. For facilities, bars, and restaurants, you can use the hotel at which you are a guest.

Activities abound, not only scuba diving but snorkeling, windsurfing, kayaking, water biking, sailing, beach volleyball or soccer, even water polo, along with aqua aerobics and tons of children's activities. Despite the visual beauty of the sands and the swaying palms, there isn't any particularly fabulous snorkeling at Punta Cana. There aren't enough offshore reefs nearby -- the kinds that shelter rich deposits of marine life -- so if you happen to sign up for a snorkeling or scuba adventure at Punta Cana, chances are high that you'll be escorted to any of several offshore wrecks whose rusting hulks provide the shelter that underwater critters crave.

The beaches at Punta Cana are wide, they're gorgeous, and it's safe to swim offshore throughout the year. An improvised series of barricades runs parallel to some stretches of the coastal road, prohibiting access to the various beaches fronting the hotels. Entrances guarded by security forces prevent nonguests from entering, since once inside you're entitled to unlimited food and drink. We noted that fewer and fewer of the all-inclusives are selling day passes or evening passes to nonresidents. The policy seems to be viewed with increasing disfavor. When such day passes are available, they can cost anywhere from US\$40 to US\$75 per person, and are strictly defined as day passes (allowing access from around 9am to around 6pm) and night passes (from around 6pm till around 1am). The idea, frankly, never caught on, and we estimate that only around 25% of the resorts now offer them. Even then, it's complicated and sometimes unpleasant to talk your way past the security guards at the entrance, even if you're willing to pay.

How to Spend a Day Outside the All-Inclusive Hotels

The answer for the adventurous would involve a trek to the center of Cortecito Village, where you

What is the local currency?

WATSON

The local currency is the Dominican Peso. Its value fluctuates between 30-40 pesos per US dollar and 48-53 pesos per Euro. Although any currency can be changed into pesos, it should be noted that in some situations it may be difficult to exchange pesos back into your original currency. We recommend exchanging only small amounts of money at a time to avoid any inconveniences.
