Breaking Bad

Within an enterprise, point solutions and corporate silo culture directly contribute to fraud risk

The challenges:

- Narrow observation space
- Isolated Data
- Reactive versus Proactive
- Accepted cost of doing business
- Departmental band-aides

IBM Counter Fraud Management offers distinctive capabilities to proactively manage fraud

1. Ability to **ingest information** from many disparate sources to develop rich profiles and create **real time risk weightings**.
2. **Optimum layering of analytic techniques** to model behaviors and identify anomalies using accumulated context, relating new data to previous insights, for improved accuracy & knowledge of suspicious activity
3. Extensive **Forensic Analysis capabilities** to speed validation of suspicious activity
4. **Repeatable framework** that enables flexible extension and leverages existing capabilities, without a rip and replace.
5. **End-to-end out-of-the-box integration** of best of breed capabilities from *Detection* to *Response* to *Investigation*, reduces the cost and risk of tying together traditional point solutions.
