

Have you considered internationally recognised Enterprise Architecture certification courses?

Help your organisation integrate business goals with IT strategies with IBM's EA certification courses.

Attain 'Certified Enterprise Architect (CEA)' and receive the designation and certificate from the International Enterprise Architecture Institute (IEAI).

Enterprise architecture enables business transformation, strategic alignment, and effective IT investment decisions. By creating views of your company's future state architecture that reflect the capabilities you need to meet tomorrow's challenges, you can successfully chart a course that will result in more effective decision making and greater agility across the enterprise.

Enterprise Architecture benefits

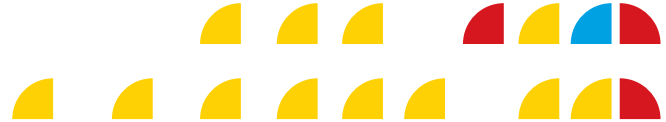

- Learn how organisations can become more agile and competitive
- Better align strategic goals, business activities and supporting technologies
- Understand how EA provides context for best practices with SOA, ITIL, COBIT,OO, and Cloud Computing
- Assess the management of a business and technology portfolio
- Better manage at the enterprise and systems levels
- Develop a framework for business/technology planning and decision-making
- Identify and develop new and enhanced capabilities to gain competitive advantage
- Refine the design and implementation of workflow, systems, and infrastructure
- Create reusable architectural building blocks that promote business transformation
- Attain improved compliance and more predictable project outcomes
- Improve the lifecycle of systems development, risk management and security

Enterprise Architecture student benefits

- Attain 'Certified Enterprise Architect (CEA)' and receive the designation and certificate from the International Enterprise Architecture Institute (IEAi)
