IBM Tivoli® Storage Software invites you to:

Next Generation
Data Protection Seminar

Sydney – 18th November
Melbourne – 20th November

AT THIS BRIEFING YOU WILL:

- learn how Fastback helps back up data using efficient **disk-based, block-level, progressive-incremental** technology, especially at remote and branch locations

- discover how to easily **retrieve individual Microsoft® Exchange objects** such as email messages and attachments, contact lists and calendars, individual folders or the entire mailbox fast and simply

- hear how FastBack's automated replication for **off-site data protection** has minimal impact on WANs and helps centralise and simplify data protection management

- see how Fastback will get up you up and running within minutes while full data recovery is performed **in the background**.

Sydney – 18th November
