

### **Business Performance Management**

# Business Performance Management

Beth T. Smith Vice President, IBM Business Performance Management

# Agenda

- Business performance management market
- Business performance management from IBM
- Why IBM for business performance management

# Business performance management

Taking an holistic approach, companies align strategic and operational objectives with business activities to fully manage performance through smarter decisions and actions for greater success. Leveraging business intelligence, process management, business service management, activity monitoring and corporate performance management enables businesses to fully manage company-wide performance through insightful decisions that can help drive success

# Business performance management

IBM has put forward a bold and comprehensive vision for what business performance management could be, and offers an architecture and products to help companies achieve business performance management. Predictably, many players in this space will modify their products to ensure they are compatible with IBM's approach."

- Paul Harmon, BPTrends Newsletter, December 2004

### Worldwide market conditions

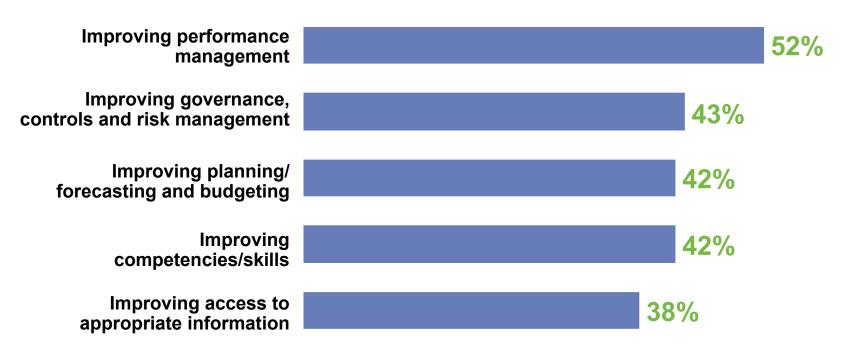

- Today, 80% of CEOs surveyed state growth is back on their corporate agendas
- More than 60% of CEOs agree that new products and services offer their companies the greatest opportunity for growth in the next three years
- Yet only 13% of CEOs surveyed rated their organizations' abilities to react to changing conditions and external forces as *very good*.
- Rapid, optimized response in a dynamic environment is key to becoming an On Demand Business
  - More responsive business processes
  - And a more responsive business model

# CFOs rank performance management as the #1 challenge they face in meeting today's business needs

### Top 5 challenges

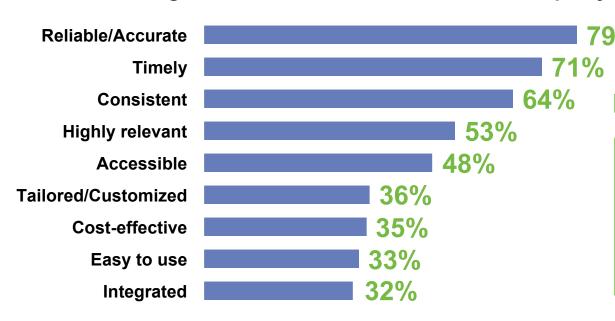

CFO Survey: Current state & future direction, IBM Business Consulting Services, September 2003

# CFOs need integrated and tailored information

CFOs recognize that managing information is critical to success, with 70% indicating that information is a major asset that requires significant investment

### Percent of organizations' views of information adequacy

While CFOs believe that the information they receive is timely, reliable and consistent, only one- third believe that the information is easy to use, tailored, cost- effective or integrated.

CFO Survey: Current state & future direction, IBM Business Consulting Services, September 2003

# Today's performance management: the reality

Complex, siloed organizations, processes, applications and infrastructure make it difficult for business decision makers to understand when — and how — to respond to market opportunities, competitors' moves and regulatory changes

#### Make more effective decisions:

Optimize decision making with real-time contextual insight

### Manage business operational disruptions effectively:

Better anticipate disruptions in day-to-day business operations and quickly take a direct, proactive approach to improve results

### Align objectives and priorities:

Drive consistent objectives and priorities across the business and take action based on aligned, measurable criteria

### **Deliver continuous innovation and improvements:**

Establish a flexible, readily adaptable business environment that provides ongoing performance enhancements and optimizations

# Business performance management from IBM

Business performance management solutions from IBM combine market-leading software, industry expertise and best practices to enable you to better monitor, manage, analyze and take action — so you can make smarter decisions, gain competitive advantage and achieve greater performance results.

# Business performance management solutions deliver continuous improvement and innovation by:

- Aligning strategy horizontally and vertically throughout your company
- Enabling proactive and directed action
- Providing real-time, contextual insight
- Delivering role-based visibility into business operations and metrics
- Improving team productivity and effectiveness
