What's new in Version 5.0

iSeries AD, IBM Toronto

- WebFacing Tool enhancements for scalability, performance and ease of conversion
- Significantly enhanced support for iSeries file systems, projects, editing, compiling and debugging inside the Eclipse IDE
- Wizards generate robust Struts-based Web apps that can be easily extended using a new visual development environment
- Supports open standards such as J2EE, XML, SOAP, WebServices, WSDL and Struts
- Improved interfaces to integrate 3rd party tools to the new IDE
- New customizable views of tools and data to help organize your work.
- Concurrent support for WAS 3.5.6, WAS 4.0, WAS 5.0, WAS Express 5.0 and Tomcat
- Unit test environment for WAS 4.0, WAS 5.0 and WAS Express V5
- JDK 1.3, JSP 1.2, Servlet 2.3
- Web: Visually construct MVC-based Web applications
- Web services: Support for UDDI V2 and discovery via Web Service Inspection Language (WSIL)

▶ eclipse ... The base!

- ✓ eclipse is the IDE technology engine
 - fully open-source @ www.eclipse.org
 - created by IBM
 - huge interest: > 500,000 downloads
 - written in Java
 - easily extended by plugins

What is eclipse.org?

The eclipse.org Consortium was formed to deliver new-era application development tools. Industry leaders Borland, IBM, Merant, QNX Software Systems, Rational Software, RedHat, SuSE, TogetherSoft, and WebGain form the initial eclipse.org board of directors. These companies plan to release Eclipse Platform compatible product offerings.

In the Eclipse Platform, code access and use is controlled through the Common Public License¹, which allows individuals to create derivative works with worldwide re-distribution rights that are royalty free.

As with other open source communities, eclipse.org brings together the broad participation needed to establish, refine, and promote high-quality shared software technology. More than 1,200 individual developers from over 150 leading software tool suppliers in 63 countries have already participated in the eclipse.org community.

¹ Some components of eclipse.org downloads may be governed by license terms other than the CPL.

Board members

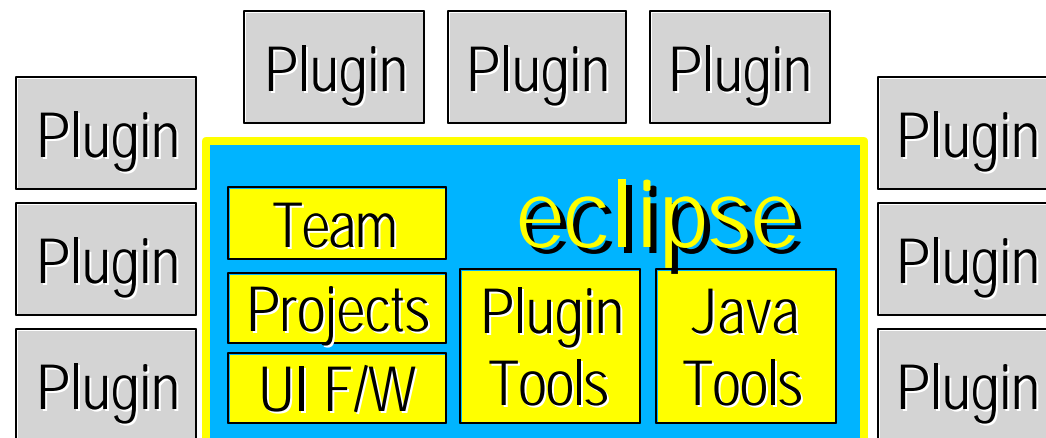

For more information about member organizations and their support for Eclipse.org, click the following links.

eclipse.org
consortium

- ✓ eclipse plus plugins = product
 - **although its a great Java IDE as is!**
- ✓ eclipse will be basis of many products
 - **from IBM, BPs, ISVs, anyone!**
- ✓ eclipse is a huge opportunity
 - **for writing + selling plugins**

eclipse

The screenshot shows the Eclipse IDE interface with several components highlighted:

- open perspectives**: A blue box with red arrows pointing to the perspective icons in the top-left corner.
- Java-unique views**: A blue box with a red arrow pointing to the 'Types' view in the top-left corner.
- Java editor**: A blue box pointing to the central code editor window.
- Content Assist**: A blue box pointing to the pop-up list of method suggestions in the code editor.
- Outline view**: A blue box pointing to the 'Outline' view in the top-right corner.
- Task view (error list)**: A blue box pointing to the 'Tasks' view at the bottom of the IDE.

The code editor displays the following Java code:

```
package phil.demo;

import java.math.*;
import com.ibm.connector.as400.ProgramCallRecord;
import com.ibm.connector.as400.ProgramCallStruct;

public class ProgramRecord_getdlvsts extends ProgramCall
{

    public Integer getRetCode()
    {
        return (Integer)getValue("getdlvsts_retCode");
    }
    public Integer getNbr...
    {
        return (Integer)get...
    }
    public String getDlvC...
    {
        return (String)getV...
    }
}
```

iSeries Projects

The screenshot shows the iSeries Projects - Development Studio Client interface. The main window is divided into several panes:

- iSeries Navigator:** A tree view showing a project structure. The selected item is `CALLPGM.rpgle (Local/Remote)`. Other items include `NEWFILE`, `NEWMBR`, `QDDSSRC (Local/Remote)`, `QRPGLSRC (Local/Remote)`, and various `TESTTYPES` and `GETDATA` files.
- Code Editor:** Displays the source code for the selected `CALLPGM.rpgle` file. The code includes comments like `Device+. Keywords+`, `Disk`, `like(CUSTNO)`, `extname(custom13:custom01)`, and `20`. It also shows a `custnii` variable and a `*INLR = *ON` statement.
- Property Sheet:** A table showing properties for the selected object. The table has a `Value` column and contains the following data:

Value
true
5/5/02 12:27 PM
CALLPGM.rpgle
/My Project/QRPGLSRC/CALLPGM.rpgle
1222

iSeries Project navigator:

- ▶ local files and members
Use Push popup menu action to copy from project to library
- ▶ Use Build to build project
- ▶ Use Team->Sync to copy to/from team repository
- ▶ remote objects, files and mbrs
Use Add to Project to copy from library to project

(Remote) => 

- ▶ only exists in associated library

(Local/Remote) => 

- ▶ exists locally and in associated lib

(Local/Remote) => 

- ▶ conflict between local and remote

otherwise => 

- ▶ only exists locally

Project, Source File, Mbr

or choose favorite editor

Remote Systems Explorer to work with objects in remote library

Property Sheet to show properties of selected local or remote object

iSeries Projects...

- Conflict Detection
 - ▶ Remote source changes are shown in the iSeries project with different file icon
 - ▶ User is warned before pushing local changes to remote system if remote source has changed
- Build Styles
 - ▶ Presupplied:
 - Command
 - CL Build Style
 - ▶ Integrated error feedback
- ISV Integration Support
 - ▶ APIs for ISVs to create and manipulate iSeries projects
 - ▶ ISVs can provide:
 - Additional pages to the new iSeries project creation wizard
 - Additional build styles
- Integration with RSE
 - ▶ Create projects from the RSE
 - ▶ Add members to existing projects
 - ▶ Program verifiers
 - ▶ Remote Systems LPEX Editor

Remote System Explorer...

- Editing
 - ▶ Remote Systems LPEX Editor
 - Syntax checking
 - Context sensitive help
 - Outline view
 - Code assist
 - Indentation view
 - Program verifiers
 - ▶ Ability to use any Workbench editor on any remote source
 - Remote Systems LPEX Editor, Java editor, XML editor, SQL editor
- Debug
 - ▶ iSeries remote debugging integrated into the Workbench
- Enhanced iSeries table view
 - ▶ More PDM like user interface and actions
- Drag and Drop support
 - ▶ Ability to copy members and files between different hosts and system types!
- Disconnected development support via iSeries projects
- User defined actions
 - ▶ More functionality and substitution variables

- Remote Searching
 - ▶ Search remote members for specific text strings
- More support for accessing remote Linux, Unix and Windows systems
 - ▶ Table view
 - ▶ User defined actions
- Much, much more
 - ▶ Save passwords, message file support, environment variables, ...

▶ BPs, ISVs, and eclipse ...
Great business opportunity for all!

- Extending the Workbench
 - ▶ "Plugins" provide a mechanism for IBM and other software tool vendors to add functions to the Eclipse Workbench and sell them as products
 - Ability to add new functions to the Workbench
 - XML Tools, WebFacing, Remote Systems Explorer
 - Ability to extend existing functions provided by other vendors
 - iSeries extensions to Web Tools
 - SCM providing VCM adapters for source change control
- Extension points
- Business partners can provide their own plugins for Eclipse
- Softlanding, Aldon to provide VCM adapters to integrate with their existing source change systems... Other are working on it too.
- We have provided extension points in our code (RSE) for business partners to extend what we are doing
- Huge opportunity for BP

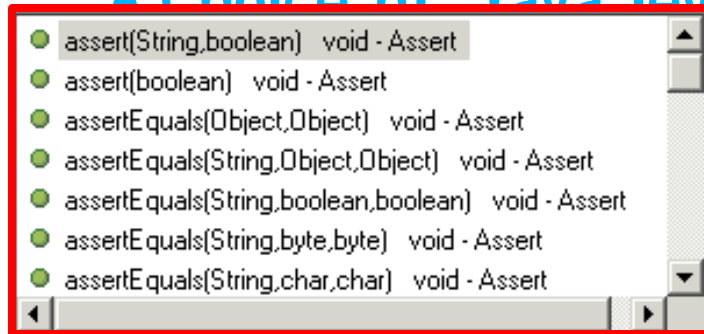

▶ Java Development Tools (JDT)

✓ Java Development Tools (JDT):

• Choice of Java level

in and offered as default

Java development

s

✓ Package view and Hierarchy view:

✓ Outline view: m

▶ Java Editor

✓ Content Assist: Ctrl+Space bar to get list of classes or methods

✓ JavaDoc shown as hover help

✓ F3 to open selected class

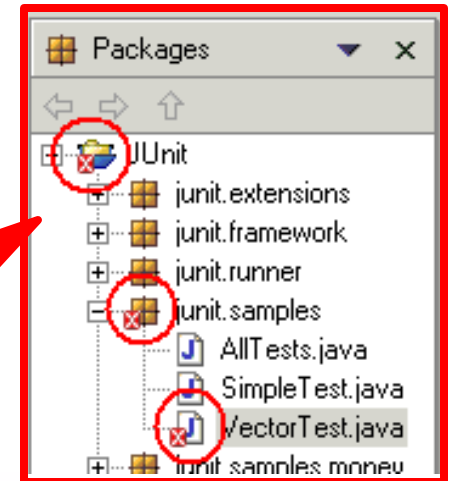

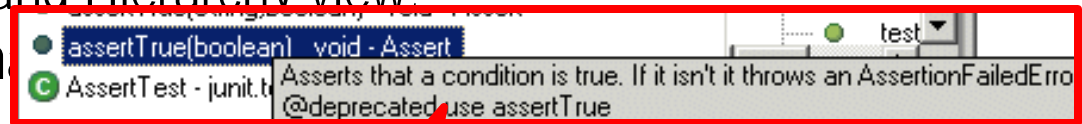

▶ Refactoring support

✓ Rename updates all references

▶ Incremental compile

✓ When Ctrl+S pressed in editor

✓ Or on demand via Build Project action

Java Tools Not There

- ✓ Not all VAJava function is available yet:
 - **Visual Composition Editor... coming soon**
 - **DataBase Beans**
 - ▶ Actually, there are replacements! Just no visual metaphor
 - ▶ See `com.ibm.db.beans: DBSelect, DBProcedureCall, DBModify`
 - ▶ Also a Database access wizard in Web Tools
 - **SQLJ support**
 - **Stored Procedure Builder**
- ✓ For VAJava migration...
 - ▶ **www.ibm.com/software/wsdd**
 - ✓ "VisualAge for Java coexistence with WebSphere Studio Application Developer"
 - ✓ http://www7b.boulder.ibm.com/wsdd/library/techarticles/0110_searle/searle.html

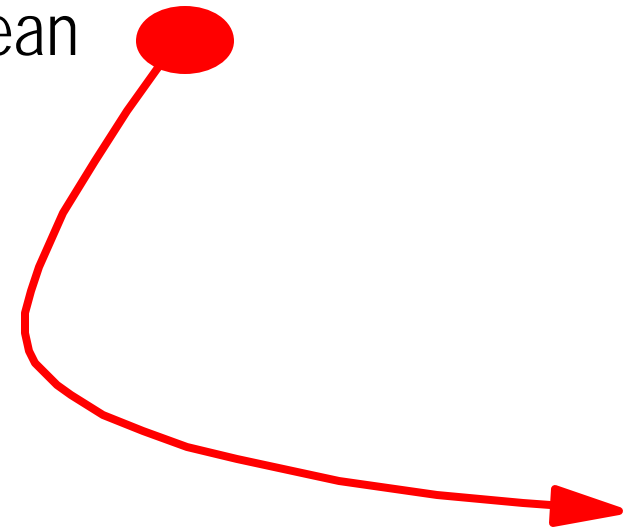

- ✓ iSeries extensions for Java
 - Import and export from/to remote system
 - Remote Compile and Run
 - Remote Debug
 - Program Call wizard
 - Toolbox for Java built-in
 - ▶ As an Eclipse Java project (ie: easy to add to classpath of your project!)
 - ▶ Integrated help
 - ▶ Runnable samples
 - Supplied Java-beans
 - ▶ Swing GUI beans (dspf-like functionality)
 - ▶ DFU beans (database access)
 - ▶ Object list beans (lib, obj, mbr, field, record lists)

✓ Program Call Wizard

- **Given signature of *PGM or *SRVPGM proc:**
 - ▶ Generate Java Bean to call it
- **Steps:**
 - ▶ 1. Select Java/Web/WebFacing project
 - ▶ 2. Select package
 - ▶ 3. Use File->New->Other...
 - ✓ ...iSeries Java Program Call Bean

Program Call Wizard

Create iSeries Program Call Java bean and PCML file
Specify the location where the Java bean and PCML file to be generated.

Folder: **Where to generate Java class**

Package:

PCML file name: **Where to generate PCML file**

Generate Java beans and a PCML file for:

Java application

Web services **Select Web Services to generate Java code optimized for use in the Web Services wizard**

These files will be generated by the wizard:

- MyProgram.pcmf
- MyProgram.mpcf
- MyProgramServices.java
- MyProgram.java

Summary of files that will be generated

The class path of the specified project will be automatically updated.

Generated Java beans require the following JAR files at compile time and run time:

- ECLIPSE_HOME/plugins/com.ibm.etools.iseries.toolbox/runtime/it400.jar
- ECLIPSE_HOME/plugins/com.ibm.etools.iseries.webtools/lib/wdt400rt.jar
- ECLIPSE_HOME/plugins/com.ibm.etools.websphere.runtime/lib/xerces.jar
- ECLIPSE_HOME/plugins/com.ibm.etools.websphere.runtime/lib/j2ee.jar

Runtime files you will need to deploy with your code

To change parameters later:

- Return to wizard
- Use Import PCML... button

Generated Java Bean

 - MyProgram
 - MyProgram()
 - getRetCode()
 - getNbrCodes()
 - getDlvCodes(int)
 - invoke()
 - setConnectionData(AS400)
 - setConnectionData(String, String, String)
 - getAS400Object()
 - setLibraryList(String[])
 - disconnect()
 - setTraceEnabled(boolean)

Adds
required
files to
project
classpath

Example
using
gen'd
bean

```

package customer.demo;

public class TestMyProgram

{

    public static void main(String[] args)
    {

        MyProgram test = new MyProgram();
        test.setConnectionData("MYSYSTEM", "MYUSERID", "MYPASSWORD");
        test.setLibraryList(new String[] {"PHILDEMO"});
        test.invoke();
        int nbrResults = test.getNbrCodes().intValue();
        System.out.println("Nbr Codes: " + nbrResults);
        for (int idx=0; idx<nbrResults; idx++)
        {
            System.out.println(" code " + idx + ": " +
                test.getDlvCodes(idx).trim());
        }
    }
}

```

- ▶ **setConnectionData(...)**
 - ▶ to identify signon info
- ▶ **setLibraryList(...)**
 - ▶ to set runtime library list
- ▶ **setXXX(...)**
 - ▶ to set input parameters
- ▶ **invoke()**
 - ▶ to run program
- ▶ **getXXX(...)**
 - ▶ to get output parameters

▶ Web Tools

✓ Web projects

- J2EE-defined folder structure for Web Apps
- Superset of Java projects (inherits Java Tools)
- Automatic creation/maintenance of web.xml file
- Editor support
 - ▶ Create/Edit/Validate/Debug JSP and HTML files
 - ▶ Images and animation
 - ▶ Cascading Style Sheets (CSS)
- Import/Export from/to a variety of sources
 - ▶ HTTP/FTP/WAR/EAR
- Link viewing and management
 - ▶ Converting links, flagging broken links, and fixing up links as linked resources are moved or renamed

✓ Java Bean Web Pages Wizard

- **Input: Java Bean**
- **Output:**
 - ▶ Input JSP page prompting for input properties
 - ▶ Output JSP page displaying output properties
 - ▶ Servlet that ties them together

✓ Database Web Pages Wizard

- **Input: SQL Query Statement (sub-wizard)**
- **Output:**
 - ▶ Input JSP page prompting for input parameters
 - ▶ Output JSP page displaying output data
 - ▶ Servlet that ties them together

Web Perspective

iSeries AD, IBM Toronto

The screenshot displays the IBM Web Development Studio Client interface. At the top is a menu bar with 'File', 'Edit', 'Perspective', 'Project', 'Window', and 'Help'. Below it is a toolbar with various icons for file operations and editing. The main workspace is divided into several panels:

- Navigator:** Shows a project tree for 'MyWebProject' with folders 'source' and 'webApplication'. The 'source' folder contains 'abc' and 'def' subfolders. The 'def' folder contains 'Customer.java', 'CustomerController.java', 'CustomerViewBean.java', and 'MyServlet.java'. The 'webApplication' folder contains 'theme', 'WEB-INF', 'CustomerInputForm.html', and 'CustomerResults.jsp'. The 'CustomerInputForm.html' file is selected.
- Code Editor:** Displays the source code for 'CustomerInputForm.html'. The code includes HTML tags for a table with an input field and hidden fields. The code is as follows:

```
52  
53<!--Input Fields-->  
54<TABLE border="0">  
55<TBODY>  
56  <TR>  
57    <TH>  
58      id:  
59    </TH>  
60    <TD>  
61      <INPUT NAME="id" TYPE="text" SIZE="20" MAXLENGTH="40" VALUE="">  
62    </TD>  
63  </TR>  
64</TBODY>  
65</TABLE>  
66  
67<!--Hidden Fields-->  
68
```
- Gallery:** Shows a gallery of resources for inclusion in the page, including 'Image', 'Wallpaper', 'Webart', 'Sound', 'Style Sheet', and 'Script'.
- Links view:** Shows a diagram of relationships between files. 'CustomerInputForm.html' is linked to 'Master.css', 'CustomerController', and 'javascript:submitForm()'. The 'javascript:submitForm()' link is marked with a red square.
- Design, Source, Preview:** A tabbed interface at the bottom of the code editor.
- Tasks, Properties, Links, Thumbnail, Styles, Colors:** A row of tabs at the bottom of the interface.

Miscellaneous tools

Page Designer:
Work in source mode, or WYSIWYG mode

IE built-in

Gallery of images for to include in your page

Links view shows relationships between files, including hypertext links

WDSsc: Run On Server

- ✓ Run On Server
 - Now this is **VERY COOL!**
- ✓ When ready to test your Web app
 - Right click on initial html or jsp file
 - ▶ or whole project, which implies the index.html file
 - Select "Run on Project"
 - Wait for the magic...
- ✓ Your Web application will run!
 - Opens Server perspective
 - ▶ Publishes it to built-in copy of WAS
 - ▶ Starts built-in copy of WAS
 - ▶ Brings up a Web Browser
 - ▶ **Runs your application!!**
 - ✓ Tip: you can set breakpoints in your Java code!

WDSsc: Run On Server

The screenshot displays the IBM WebSphere Development Studio Client interface. The main window shows a web browser displaying a page titled "Customer Details" with the following information:

- Customer ID:** 102201
- Customer Address:** Addr 102201
- Customer Name:** Name 102201

The console window at the bottom shows the following log output:

```
Group I SRVE0091I: [Servlet LOG]: InvokerServlet: init
oTransport A SRVE0171I: Transport http is listening on port 8,080.
ver A WSVR0023I: Server Default Server open for e-business
Group I SRVE0091I: [Servlet LOG]: CustomerController: init
```

The Navigator pane on the left shows a project structure including:

- My Project
- MyServerProject
- MyWebProject
 - source
 - webApplication
 - theme

The Server Configuration pane shows the following configuration:

- Server Instances
 - myServerInstanceAndConfig
 - WebSphere v4.0 Test Enviro
- Server Configurations
 - myServerInstanceAndConfig
 - WebSphere Administrative D

- ✓ Tools optimized for iSeries developers!
 - **Web Interaction wizard**
 - ▶ **Input:** *PGM or ILE proc parameter information
 - ▶ **Output:**
 - ✓ Input JSP page prompting for input properties
 - ✓ Output JSP page displaying output properties
 - ✓ Java Bean for calling the *PGM or ILE procedure
 - ✓ Servlet that ties them together
 - **Host Information wizard**
 - ▶ Set runtime information such as library list and sign-on information, to be used by glue generated by all Web Interaction wizards for this Web project
 - **Visual Custom Tags (Web GUI Widgets)**
 - ▶ Web GUI Widgets that support DSPF-like attributes such as error checking by datatype, and edit-code and edit-word

iSeries Web Interaction Wizard

No More DTCs !!!

onto

The screenshot displays the 'Web - Development Studio Client' interface. A large red 'X' is drawn across the entire scene. Two dialog boxes are open:

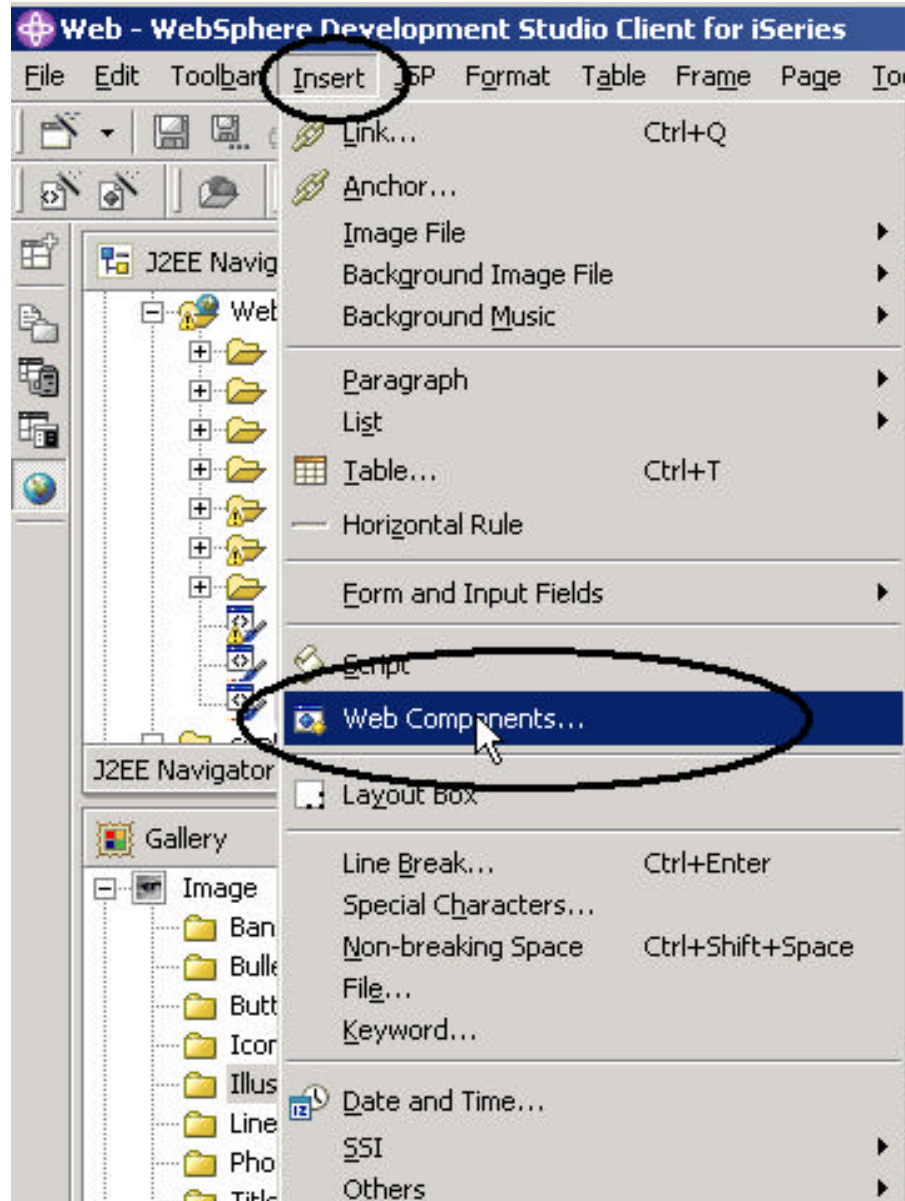

- AS/400 Entryfield DTC Properties:** This dialog has tabs for 'General', 'Color', 'Font', 'Events', and 'Run-time Attributes'. The 'General' tab is active, showing:
 - Field name: Entryfield400

- ▶ Web Services Tools
 - ▶ XML Tools
 - ▶ Database Tools

- ✓ Consume/Construct Web services:
 - **Discover**
 - ▶ Browse UDDI registry to locate existing services
 - ▶ Generate Java Bean Proxy for existing services
 - **Create/Transform**
 - ▶ Create new Web services from Java Beans, databases
 - ✓ Including Java Beans output from iSeries ProgramCall wizard
 - **Deploy**
 - ▶ Deploy Web service to WebSphere or Tomcat for testing
 - **Test**
 - ▶ Built-in test client allows for immediate testing of local/remote Web services
 - **Publish**
 - ▶ Publish Web services to UDDI registry

✓ XML Perspective and XML Tools

- **XML Editor**
 - ▶ For creating and viewing XML files
- **DTD Editor**
 - ▶ For creating/viewing Document Type Definitions
- **XML Schema Editor**
 - ▶ For creating, viewing and editing XML Schemas
- **XML to XML Mapping Editor**
 - ▶ To map one+ source XML files to a target XML file
- **XSL Trace Editor**
 - ▶ To visually step through an XSL transform
- **XML and SQL Query Wizard**
 - ▶ To create an XML file from an SQL query
- **RDB to XML Mapping Editor**
 - ▶ To map one+ relational tables to a target XML file

```

XML Schema Editor

The screenshot shows the XML Schema Editor interface. On the left, the Outline pane shows a tree structure with 'isbn' selected. A context menu is open over 'isbn', listing options: Add Annotation, Add Complex Type, Add Simple Type, Add Global Element, Add Global Attribute, Add Attribute Group, Add Group, Add Include, Add Import, Add Redefine, Add Notation, Undo, and Redo. The main editor area shows 'Element name: isbn' and 'Type information' with 'Built-in simple type' selected and 'string' chosen from a dropdown. At the bottom, the 'Design' mode tab is selected and circled in red. A blue box with the text 'Design mode' is overlaid on the bottom right of the editor area.

Design mode

XML Schema Editor

The screenshot shows the XML - Development Studio Client interface. The main window displays the XML Schema Editor for 'NewXMLSchema.xsd'. The editor is in 'Source' mode, as indicated by the 'Source' button being selected in the bottom toolbar. The XML code in the editor is as follows:

```

1<?xml version="1.0" encoding="UTF-8"?>
2<schema xmlns="http://www.w3.org/2001/XMLSchema"
3      targetNamespace="http://www.ibm.com"
4      xmlns:NewXMLSchema="http://www.ibm.com">
5
6      <element name="booklist" type="NewXMLSchema:booklist"></element>
7      <element name="book" type="NewXMLSchema:book"></element>
8      <element name="isbn" type="string"></element>
9      <element name="title" type="string"></element>
10     <element name="author" type="string"></element>
11
12     <complexType name="book">
13       <sequence>
14         <element ref="NewXMLSchema:author" minOccurs="1" maxOccurs="1"></element>
15         <element ref="NewXMLSchema:isbn" minOccurs="1" maxOccurs="1"></element>
16         <element ref="NewXMLSchema:title" minOccurs="1" maxOccurs="10"></element>
17       </sequence>
18     </complexType>
19
20     <complexType name="booklist">
21       <sequence minOccurs="1" maxOccurs="unbounded">
22         <element name="book" type="NewXMLSchema:book"></element>
23       </sequence>
24     </complexType>
25
26
27

```

The interface also includes an Outline view on the left showing the schema structure, a Navigator view at the bottom left showing the project files, and a toolbar at the top with various editing tools. The 'Source' button in the bottom toolbar is circled in red, and a blue box labeled 'Source mode' is overlaid on it.

✓ Database Tools:

● Relational Schema Center

- ▶ Provides views geared for DBAs to
 - ✓ Create Databases
 - ✓ Create Tables/Views/Indexes/Keys
 - ✓ Generate DDL
- ▶ Online and offline support for working with databases
 - ✓ Metadata generated as XMI

● SQL Query Builder

- ▶ Visually construct SQL statements
 - ✓ Insert, update, delete, select supported
 - ✓ Metadata generated as XMI

● SQL/XML mapping

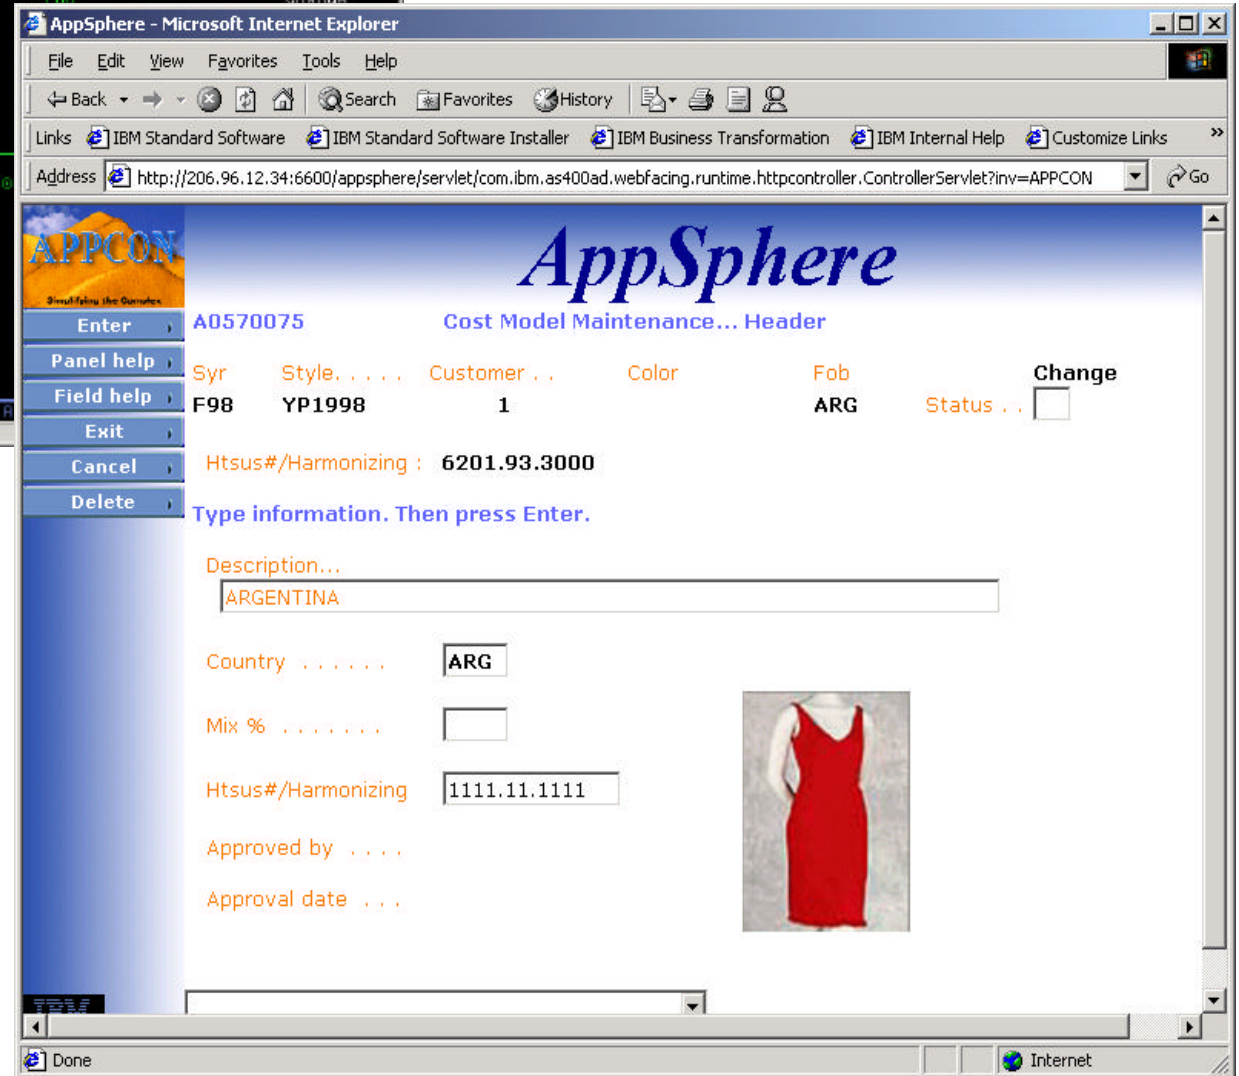

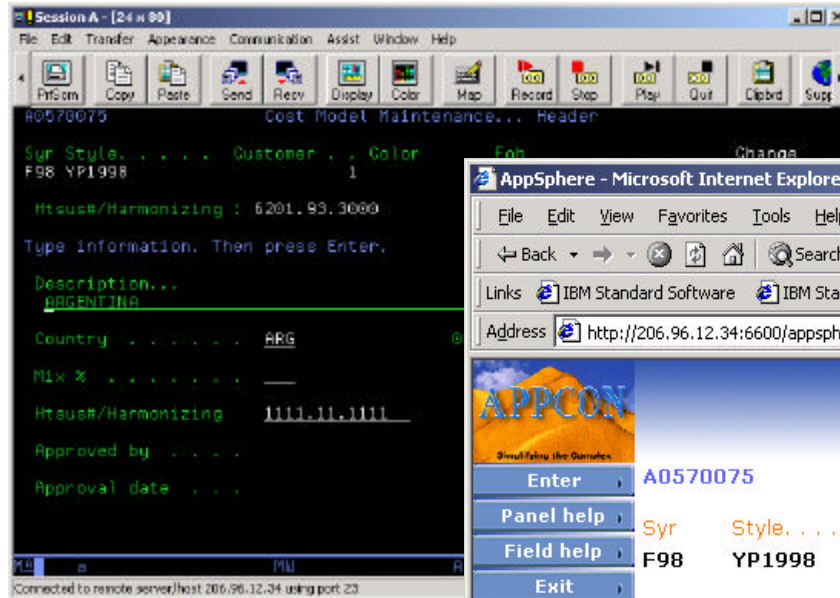

▶ WebFacing

WebFacing: Before/after

iSeries AD, IBM Toronto

✓ What it is:

- **Development Tool**

- ▶ Converts DSPFs to Web UI

- **Runtime Intercept**

- ▶ Redirect *PGM 5250 I/O to Web UI

✓ What is not:

- **5250 datastream converter!**

- ▶ No 5250 datastream ever created
- ▶ *PGM raw data buffers fed directly to Web UI
- ▶ Conversion hit at development time, not runtime

✓ Why:

- **For BPs/ISVs to quickly convert to Web**

- ▶ No limitation to customization of output
- ▶ No-cost runtime, ubiquitous tool

✓ WebFacing and Eclipse

- **V5R1:**

- ▶ first IBM tool based on Eclipse!
- ▶ "first edition" status

- **V4.0 WDS*c*:**

- ▶ "First edition" status is over!
- ▶ Inherits and leverages all Web and Java tooling
- ▶ Leverages built-in WebSphere Test Environment
- ▶ Optimized for 4.0 of WAS
- ▶ Many functional and performance enhancements

- **V5.0 WDS*c*:**

- ▶ "Second edition"
- ▶ More later . . .

WebFacing Phase 2...

- ✓ Major focus on client-side performance
 - **More efficient HTML and JavaScript**
 - ▶ Faster download and rendering time
- ✓ Major focus on client-side styling
 - **Web-site style and application-area style**
 - ▶ Easier to imbed WebFaced app in corporate style
 - ▶ Much better IBM-supplied styles for both
 - ▶ Better use of cascading style sheet
 - ✓ Much easier to do application-wide tailoring

The end of "First Edition" status.
WebFacing is rockin' now!

more...

your
handout

WebFacing Phase 2...

Some enhancements require Service Pack 1

- ✓ Major focus on function
 - All *common* keywords supported
 - Support for UIM help panels for F1 support
 - Support for function keys (being pressed)
 - Option to tie-in corporate logon page with single or repeated signon
- ✓ Major focus on co-existence
 - Support for
 - ▶ IBM WebSphere Edge Server and Work Load Management
 - ▶ Policy Directory (front ending WAS clusters)
 - Co-existence with other Web modules in same Web session

Not in your handout

What's new in WebFacing 5.0 ?

iSeries AD, IBM Toronto

- ▶ Ability to generate Struts based WebFacing applications
- ▶ Support Function keys displayed in DDS Window
- ▶ Conversion is faster based on the new RSE communication layer
- ▶ Automatic configuration for setting the WebFacing Web Application to use the unicode UTF8 encoding scheme for multi-lingual support
- ▶ Support for WRKSPLF
- ▶ Ability to override or add function keys ot support additional actions not defined in the RPG or COBOL application
- ▶ Enable DDS Conversion for supporting user written JSP Custom Tags
- ▶ New Styles view in the WebFacing perspective in the IDE

▶ What about RPG?

- 31 digit support
- Allow Char. Parm. for built-ins
- IFS Source File Support
- Lib qualified access to data areas
- PCML generation
- Short form operators
- I/O enhancements

Give me your vote . . .

iSeries AD, IBM Toronto

Total number of ballots: 176
Number of spoiled ballots: 1

Sorted by item number

item#	votes	%%	cost	description
1	6	3%	\$10	H-spec keyword EXTDEFS to use the internal format of ext fields.
2	52	29%	\$30	RANGE and VALUES keywords.
3	15	8%	\$25	SORTA arr1 { : arr2 ... } WITH key_arr1 { : key_arr2 ... }
4	25	14%	\$ 5	Extender on SORTA to reverse the order of sorting.
5	53	30%	\$ 5	DEBUG(*RETVAL) to allow debugging of procedure return value
6	24	13%	\$ 5	OPTIONS(*VARTYPE) to bypass type match of procedure parms
7	91	51%	\$10	New BIFs %TESTD, %TESTT, and %TESTZ.
8	35	19%	\$50	Allow dynamic resizing of arrays and multi-occurrence DS.
9	33	18%	\$ 5	Format change on a LIKE define for numerics.
10	24	13%	\$10	New keyword, RECPREFIX, to prefix record-format names.
11	11	6%	\$10	DIM(*FIT) with overlay field.
12	27	15%	\$50	Multiple-dimension arrays (expressions only).
13	5	2%	\$40	SPECIAL files to handle all I/O opcodes, including keyed c
14	29	16%	\$ 5	%OFFSET builtin function returns offset of subfield.
15	20	11%	\$20	Multiple array element initialization.
16	28	15%	\$10	Keyword EXTDESC, like EXTFILE, but used at compile time
17	12	6%	\$20	Dynamic specification of basing variable, ie "p->var".
18	21	11%	\$20	Option *ZEROFILL on %EDITC to include leading zeros.
19	12	6%	\$20	Option to edit negative numbers using parentheses.
20	18	10%	\$10	ALIAS name support for externally described data structure

■ The selected items are:

- Allow dynamic resizing of arrays and multi-occurrence DS.
- Conversion of date/time/tstamp to numeric using %INT, %DEC.
- Second parameter on %TRIMx - char to trim.
- Option to pass trimmed string as parameter.

■ If time permits, high priority:

- Allow EXTPGM to be coded without a parameter.
- LEAVE-WHEN & ITER-WHEN: single-statement conditional leave or it
- DEBUG(*RETVAL) to allow debugging of procedure return values

■ If time permits, lower priority:

- Procedure name overloading based on parm types.
- EVALC move corresponding from one data structure to another.

▶ Summary of WDSc

Why WDSsc ?

- ▶ iSeries to become a premier e-business server
- ▶ Deliver AD tool set to support the rapid expansion of e-business applications for iSeries
 - ▶ Web-enable existing 5250 applications
 - ▶ Build new e-business applications
 - ▶ Port existing e-business applications from other servers
- ▶ Integrate all of the iSeries application development tools, IBM and non-IBM to a common IDE
- ▶ Optimize and simplify J2EE application development
- ▶ One comprehensive intergrated iSeries host product

Why WDSc ?

- Consolidates all of the key iSeries AD tools into one pervasive, attractively-priced product
 - over 75 K copies of WDS shipped since 05/2001
- Leverages Eclipse to deliver an integration platform for all iSeries tools, both IBM and 3rd party
- iSeries extensions to make it easy to leverage and extend iSeries programs for Web, Web-services and Java development.
- WebFacing Tool is the easiest, quickest and most cost effective way to create a Web interface to 5250 apps
- WebSphere Development Studio Advanced Edition extends the WDS value proposition for creating sophisticated J2EE applications

Our Strategy . . .

- Continue to consolidate the iSeries AD tools to the Eclipse IDE
 - Consistent IDE for traditional and e-business development tools
 - Ease of learning, ease of use
 - Both IBM and 3rd party tools
- Leverage the advancement in the WebSphere Studio / Eclipse tools to deliver value to the iSeries development community
- Continue to enhance our tools to make it easier for iSeries developers to move to an e-business footing
 - leveraging and extending iSeries legacy assets to create complex Web services solutions and portal solutions
- Leverage Eclipse plug-ins to deliver value to all of the other development tools
 - Remote Systems Explorer delivers system access to all development tools that are eclipse enabled

Integrations and ISVs!

- All of the IBM iSeries application development tools are consolidated in WebSphere Development Studio for iSeries
- Continue to leverage other WebSphere tools for use for iSeries development
 - ▶ Host Access Transformation Server (HATS)
 - ▶ WebSphere Application Monitor
 - ▶ WebSphere Workload Simulator
- Key iSeries tools vendors (ISVs) are integrating to WebSphere Development Studio for iSeries
 - Source control management tool vendors
 - Aldon
 - MKS
 - SoftLanding
 - Impact analysis - AbStract Probe
 - Lansa
- Working with iSeries partners to deliver:
 - New Web-enabled iSeries solutions
 - Web-enabling services to partners and customers
 - e-learning for our e-business development tools

Build Community!

- ✓ Single IDE for the whole family!
 - iSeries and non-iSeries
 - Traditional RPG+COBOL
 - Modern e-business
 - Young and young-challenged

Build Excitement!

- ✓ Build/re-purpose awesome apps!
- ✓ Use awesome tools!

✓ Industry Standards Supported

- By WSSDa, WSAD and WDSa:

- ▶ EJB 1.1
- ▶ Servlet 2.2
- ▶ JSP 1.1
- ▶ JRE 1.3
- ▶ Web Services Definition Language (WSDL) 1.1
- ▶ Apache SOAP 2.1
- ▶ XML DTD 1.0 10/2000 Revision
- ▶ XML Namespaces 1/99 Version
- ▶ XML Schema 5/2001 Version
- ▶ HTML 4.01 (other levels should work)
- ▶ CSS2 (PageDesigner displays a subset)

▶ Quotes

▶ ASC Inc

▶ Chris Wilson, Director, Programming/Operation Tools

- ✓ "Eclipse is perhaps the single best idea we've seen out of IBM in years. By leveraging it's experience with Java, IBM has created a plugin shell that has a real chance of replacing Microsoft's Visual Studio as the standard IDE in the industry. Despite its youth, Eclipse is the most powerful Java IDE we have ever encountered."
- ✓ "WDSC combines an outstanding industry standard version control in CVS with tools like our ABSTRACT impact analysis to finally create a true graphical development environment for the iSeries platform."

▶ LANSA Inc

▶ Bill Benjamin, Vice President, Business Development

- ✓ "The goal of Eclipse to provide a seamless interface where developers can leverage tools from multiple vendors is a great idea and is something that will add value to our customers. Eclipse is a great way to make it easy for iSeries customers to integrate WebSphere and leading development tools like LANSA".

▶ SoftLanding Systems

▶ Mark Phippard, Director of Development

- ✓ "Finally, an IDE done right! SoftLanding is very excited about the new Eclipse-family of IDE's, including WDS*c*. We believe that these IDE's represent a major step forward for our customers and all iSeries customers and business partners. We are excited about the technology and are firmly committed to contributing plug-ins for our TurnOver change management product and to provide the best possible support for all Eclipse-based development."

▶ Republic Indemnity of America

▶ Bob Cancilla, IT Director. Also runs www.ignite400.org

- ✓ "I have never been so impressed with a product as I am with what I am seeing in here. This is one of the most totally incredible products I have ever seen in 30 years in the business."

▶ Mid-Comp International

▶ Robert A. Hare, WebSphere Team Development Manager

- ✓ "It is very important in the development of our web enablement projects to have all developers working from a common work bench. Using the WDSvc allows all areas of development to come together from RPG maintenance and modifications to java code generation. The WebFacing tools and wizards that generate Java allow legacy programmers to be far more efficient helping bring the WebApplication to the client faster."

▶ Aldon Computer Group

▶ Dan Magid, Vice President

- ✓ "Aldon Computer Group is pleased to be working in partnership with IBM to integrate Aldon Affiniti with the Eclipse open source workbench. Aldon Affiniti's integration with Eclipse provides an easy way for developers to combine the powerful, unified multi-platform change management system of Aldon Affiniti with the wide range of developer tools available through Eclipse."

your
handout

✓ Information Sources

1. www.ibm.com/software/ad/wds400
 - ▶ As of June 4th
2. www.eclipse.org
 - ▶ Eclipse and information about eclipse
3. www.ignite400.org
 - ▶ Introduction to eclipse article
4. **eServer iSeries magazine, July issue**
 - ▶ 3 articles on WDS*c*
5. www.ibm.com/websphere/developer
 - ▶ WebSphere Developer Domain
 - ▶ Many articles on eclipse and WSWB and WebSphere Studio configurations

Ordering WDS*c*

- ✓ If you don't have WDS / WDT:
 1. Have iSeries serial #? Order 5722-WDS
 2. No iSeries? Buy WDT client PID.
- ✓ If you have WDS and WDT:
 1. Order refresh feature of 5722-WDS:
 - ▶ 2655
 - ▶ Announced in June 4th RFA 36640
- ✓ If you have WDT client PID:
 1. You will get WDS*c* 4.0 automatically
 - ▶ Handled by Passport Advantage
