IBM's statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion.

Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision.

The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

日历视图

The screenshot shows the IBM Lotus iNotes calendar interface. The main calendar grid displays events for the week of September 10-14, 2012. Annotations in blue callouts provide instructions:

- A callout pointing to an empty space in the calendar grid says: "空白区可以双击创建一个新的日历项" (Blank area can be double-clicked to create a new calendar item).
- A callout pointing to a red vertical bar between Thursday and Friday says: "日历冲突标志" (Calendar conflict marker).
- A callout pointing to a yellow bar on the left side of the calendar grid says: "左边的彩条标识日历类型" (Color bar on the left identifies calendar type).

The interface includes a top navigation bar with icons for home, mail, calendar, and user profile. Below the navigation is a sidebar with the user's name "Paul Clemmons" and a calendar navigation pane showing the current date "September 11, 2012" and a monthly view of the calendar. The main calendar area has a toolbar with "New", "Forward", and "More" options. The calendar grid shows various events such as "Team Strategy Meeting", "All Day Training Event", "All Hands Meeting", "Customer Briefing", "Design Partner Demo", "Patent Review", "Dad's Birthday", "Reminder Team Lunch", "Reminder Prepare Demo", "Lotus iNotes Team Meeting", "Stakeholder Review Meeting", "Support Team Call", and "Invitation: Admin Training".

IBM Connections 4.0+ 集成

- 复制或者放置附件到 Connections Files
- 从 Connections Files 中插入附件
- 发送邮件时自动分享附件
- 提供打开 Connections 快捷按钮

IBM Docs 集成

- 直接通过 IBM Docs 查看附件
- 支持多种文件格式
 - 纯文本
 - 微软 Office 文档
 - PDF 文档
 - Open Document 格式
- Domino 管理员可以通过 notes.ini/ 策略限制可查看的文件类型
- 附件发给多个人时，只需要给 IBM Docs 发送一份副本实现查看
- 如果文件类型不支持时工具栏会变灰

谢谢！

Nothing contained in this publication is intended to, nor shall have the effect of, creating any warranties or representations from IBM or its suppliers or licensors, or altering the terms and conditions of the applicable license agreement governing the use of IBM software.

References in this presentation to IBM products, programs, or services do not imply that they will be available in all countries in which IBM operates. Product release dates and/or capabilities referenced in this presentation may change at any time at IBM's sole discretion based on market opportunities or other factors, and are not intended to be a commitment to future product or feature availability in any way. Nothing contained in these materials is intended to, nor shall have the effect of, stating or implying that any activities undertaken by you will result in any specific sales, revenue growth or other results.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.
