Accelerate with P8 – Program Guide
A Program Designed to Enable You to Take The Next Step Forward in Enterprise Content Management

As the world leader in enterprise content management (ECM) solutions, IBM FileNet is focused on bringing you technologies that align the value of your business content with the power of your business processes.

We offer you content control and flexibility across your entire enterprise to help you make better, faster decisions. IBM FileNet P8 is a highly scaleable business process and content management platform that allows you to better access, manage, share, and process unstructured content throughout its lifecycle.

As part of FileNet's commitment to bring you next generation technologies, FileNet P8 now delivers Content Federation Services (CFS). With out-of-the-box connectivity, CFS is designed to enhance your ability to access content stored on a mix of heterogeneous repositories. All of your enterprise's content can become an active and integral part of your business processes. Now your organization has an unprecedented ability to deliver optimal performance in key business areas: productivity, service, compliance, and collaboration. These are just some of the benefits FileNet P8 offers:

- **Controlled costs:** FileNet P8's open architecture allows you to rapidly deploy new applications and decrease your integration costs.
- **Greater choice:** FileNet P8's suite of highly integrated products offers you the flexibility to buy what you need when you need it, so you can address new content management needs as they arise.
- **Improved productivity:** FileNet P8 is the only ECM platform that leverages human-centric business process management (BPM) capabilities, such as simulation and analysis tools, throughout the entire product line, so you can control and enhance your processes.
