IBM Gold Consultant Briefing

Introducing DB2 Data Warehouse Edition 9.1.1

December 15, 2006

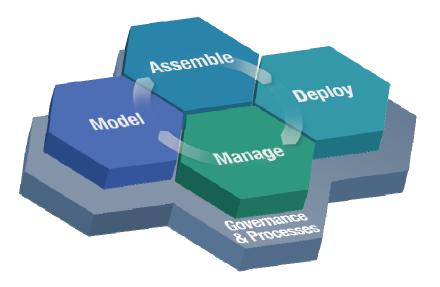

Pat Bates (jpbates@us.ibm.com) Product Manager DWE Analytics

© 2006 IBM Corporation

Agenda – What's New in DB2 DWE 9.1.1

DB2 DWE The Integrated Warehouse Platform

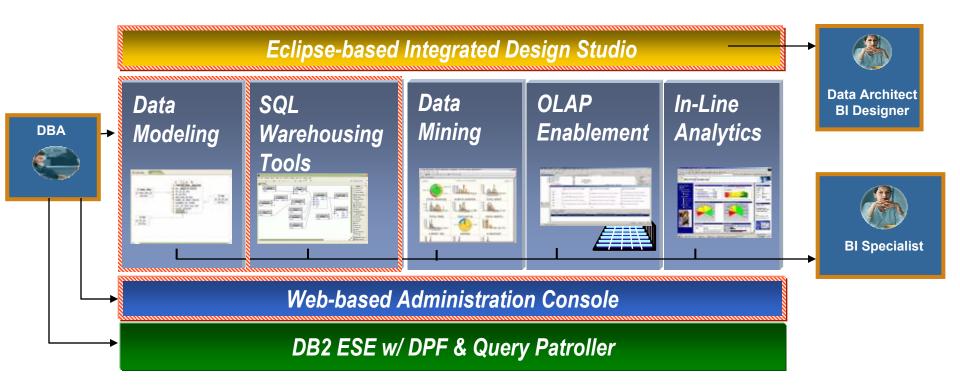

New Features Summary

New in DB2 Viper (DB2 9.1)

New in DB2 DWE 9.1.1

The Integrated Data Warehouse DB2 Data Warehouse Edition v 9.1

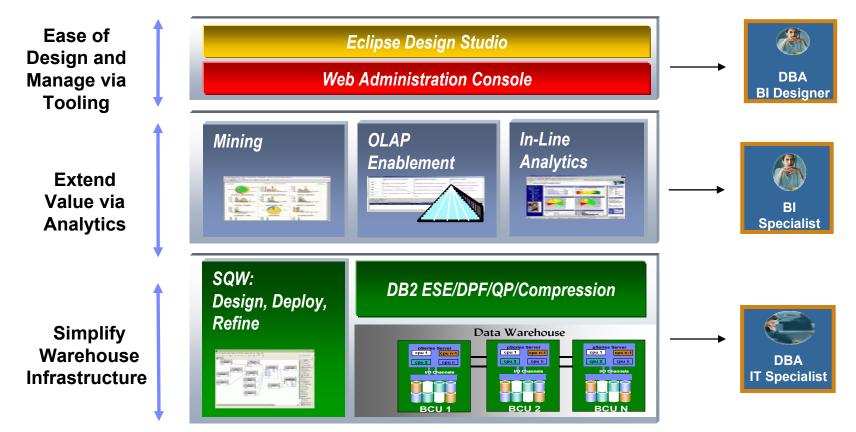

Ν

3

New or dramatically enhanced capability.

The Integrated Warehousing Platform DB2 Data Warehouse Edition 9.1.1

- An integrated platform for DB2 warehouse & warehouse-based analytics
- All the infrastructure and tools to build the warehouse and its analytic structures for Mining and OLAP, and to develop embedded analytics in portal

DB2 Data Warehouse Edition 9.1.1

New Release

- Announced: 10/17/2006
- General Availability: 12/1/2006
- Test Drive available now on Windows

Includes DB2 9.1

- Table Partitioning
- Storage Optimization Feature
- Still supports DB2 8.2
- Intelligent Miner Blox
- Solaris 9

- Firefox browser support on Windows
- DB2 DWE Developer Addition
- Fix Pack Items
 - Usability Enhancements

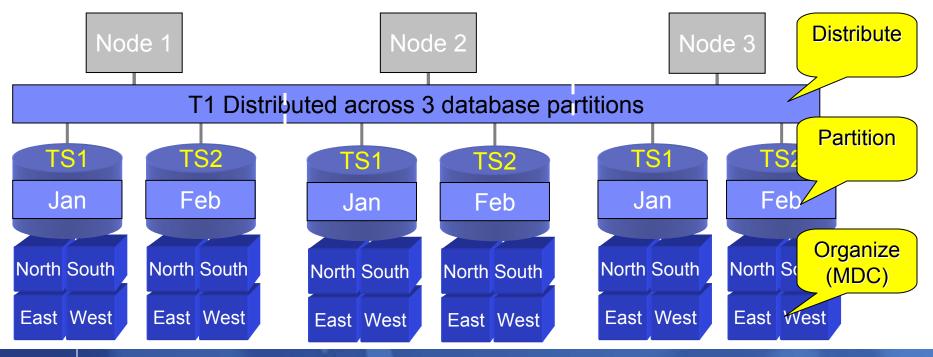

DB2 9.1 Enhancement for Warehousing

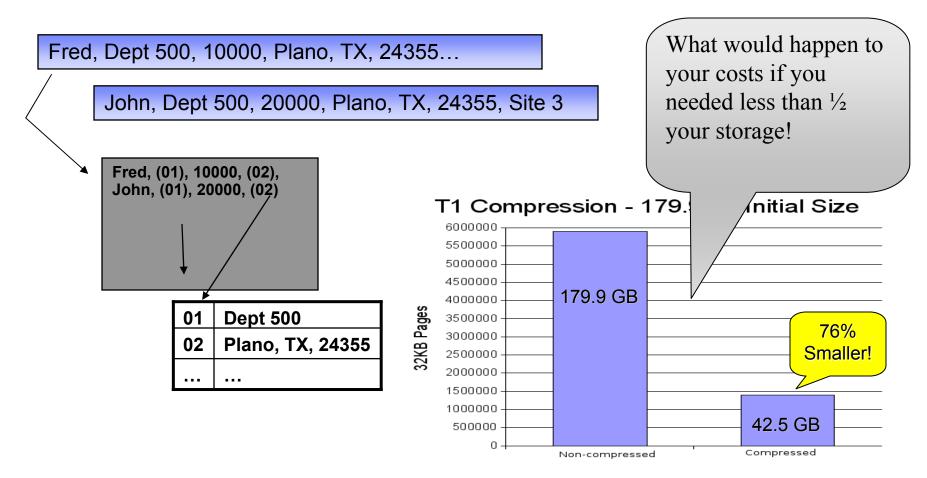

Spread the Data for Performance in DB2

- 3 ways to spread data, and you can mix and match!
 - DISTRIBUTE BY HASH for scale-out
 - PARTITION BY RANGE for concurrency and roll-in/roll-out of data
 - ORGANIZE BY DIMENSIONS for fast access and efficient I/O

Row Compression in DB2 9.1

Dictionary contains repeated information from the rows.

Compression Ratio – Major Financial Services Co Data

Table	Non-compressed (pages)	Compressed (pages)	% Pages Saved
ASSET_MAPPING	167 A vers	age Saving	63%
POSITION			60%
POSITION_EFFECT	8920		55%
RECEIVABLE_ASSE	1088	484	56%
TRADE_LEG	10624	3412	68%
TRADE_LEG_ADDEND UM_ET2	992	332	67%
TRADE_STRUCTURE_I TEM	5280	1504	72%

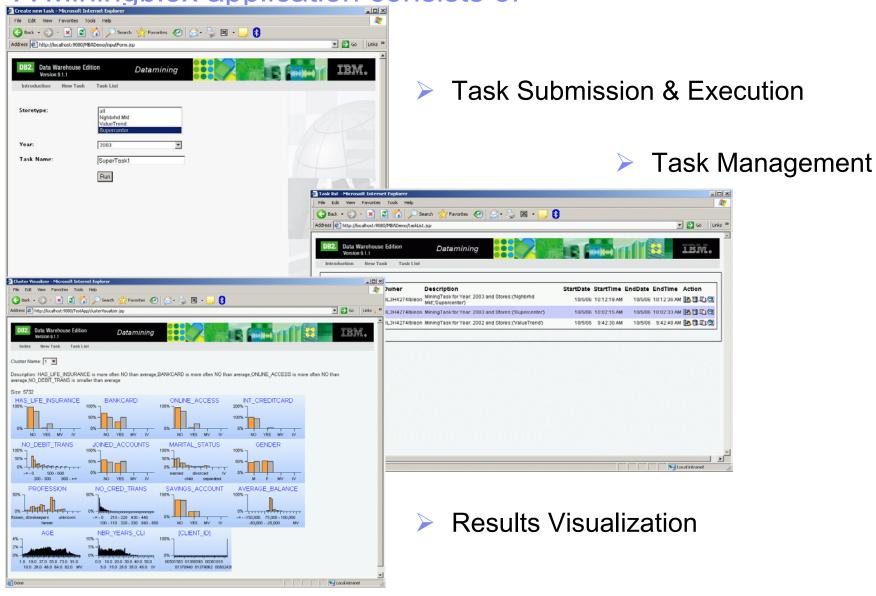

DB2 DWE 9.1.1 Enhancements

Intelligent Miner Blox

- New Mining blox and custom tag library for viewing mining results in Alphablox
 - Generate template Miningblox application for Data Warehouse applications with Design Studio wizard.
 - Simplify Web deployment of IM Visualization applets (rich graphical mining results like associations visualizer) (rendered as applets)
 - Leverage Alphablox UI chart components for simpler charts and build mining blox reusing the Alphablox infrastructure (DHTML rendering)
 - Leverage Alphablox Grid and Report components for tabular mining results
 - Association and sequence rules
 - Deviations
 - Clusters/segments
 - Numeric predictions (Regression)

A Miningblox application consists of

DB2 DWE Developer Edition

- Reduces the cost for supporting the development system
- License for DWE for development environment only
- Priced by named user
- Contains all components of the Enterprise Edition

DB2 DWE 9.1.1 Enhancements / Highlights

Install Enhancements

- DWE upgrade install
- New hotfix utility
- Improved configuration tool
- New DPF install features

Admin Console Enhancements

- Improved application deployment
- Improved log / trace
- Design Studio
 - RDA 3.2 upgrade

DB2 DWE 9.1.1 Enhancements / Highlights (continued)

SQL Warehousing Tool

- Stored procedure operator
- Variable Compare operator
- Flat file format discovery
- Generate Period Table operator
- Enhanced JDBC support for non-DB2 sources/targets
- DPF support in data flow operators
- DB2 RUNSTATS and REORG control flow operators
- Improved incremental COMMIT
- Improved log / trace framework
- Improved variable support
- Range partitioning support

DB2 DWE 9.1.1 Enhancements / Highlights (continued)

Additional Enhancements to Data Mining

- New Naïve Bayes classification
- Cost handling in rules mode
- Rules in Post Filter
- Logistic regression

DB2 Data Warehouse 9 (v9.1.1 Components)

DB2 Data Warehouse 9 (v9.1.1) Product Offerings

Base Edition Standard Features: - DB2 Enterprise 9 - DW Cube Views - DW Design Studio (modeling & CV only) - DW Integrated Installer Add-on Features: - DB2 Data Partitioning Feature (Additional \$8K per processor) - DB2 Storage Optimization Feature (Additional \$11K per processor) - DB2 Performance Optimization

 DB2 Performance Optimization Feature (Additional \$11K per processor)

Includes:

- -DB2 Query Patroller
- -Performance Expert

Enterprise Edition

Standard Features:

- DB2 Enterprise 9
- DW Cube Views
- DW Design Studio (complete edition)
- DW Integrated Installer
- Data Partitioning Feature
- DB2 Query Patroller
- DW SQL Warehousing Tool
- DW Admin Console
- DW Intelligent Miner
- Alphablox
- DB2 Storage Optimization Feature

Software Group

IBM BCU for AIX v2.1 Solution Offering Components

SOFTWARE

- AIX 5L
- DB2 Data Warehouse 9 (v9.1.1)
- (Enterprise Edition or Base Edition*)

+

-Tivoli System Automation

SERVER

- IBM System p5 575

STORAGE

–IBM System Storage DS4800

SERVICES

+

- DB2 Lab Services
- GTS Information Warehouse

SUPPORT

-IBM Solution Support

Note:

Key changes for the refresh are as follows:

- 1.) p5-575 → upgrading to POWER5+ processors 2.) DS4500 → DS4800, DS8100
- 3.) New DB2 Data Warehouse 9 (v9.1.1)

***NOTE:** DB2 Data Warehouse Edition - Base v9.1.1 requires the additional purchase of *DB2 Data Partitioning Feature* and the additional purchase of *DB2 Performance Optimization Feature* is strongly recommended

IBM BCU for AIX v2.1 Reference Configurations

	IBM BCU for AIX v2.1 2TB	IBM BCU for AIX v2.1 6TB	IBM BCU for AIX v2.1 12TB
Software Enterprise Edition (v9.1.1)	DB2 Data Warehouse 9 10 licenses	DB2 Data Warehouse 9 26 licenses	DB2 Data Warehouse 9 50 licenses
Server with POWER5+	Series p5 575 1 Data BCU (8way 2.2GHz) 1 Admin BCU (2way 1.9GHz)	Series p5 575 3 Data BCU (8way 2.2GHz) 1 Admin BCU (2way 1.9GHz)	Series p5 575 6 Data BCU (8way 2.2GHz) 1 Admin BCU (2way 1.9GHz)
Storage	System Storage DS4800 2TB Configuration Model 82	System Storage DS4800 6TB Configuration Model 82	System Storage DS4800 12TB Configuration Model 82

Supported Languages

- English (International)
- French
- Korean
- Chinese (Traditional and Simplified)
- Spanish
- Portuguese (Brazilian)
- German
- Japanese
- Italian

DWE 9.1.1 Supported Platforms

- Data Warehouse Server and Application Server
 - AIX 5L (5.2, 5.3) on Power
 - 64-bit recommended
 - 32-bit only supported with DB2 8.2
 - RHEL V3 on Pentium Compatible 32-bit
 - Only supported for DB2 8.2
 - RHEL V4, SLES 9
 - Pentium Compatible 32-bit
 - X86-64 (AMD64, EM64T) 64-bit
 - Solaris 9 on UltraSparc 64-bit
 - Windows 2003 on Pentium compatible 32-bit

Client Computer

- Windows 2000 and XP on Pentium compatible 32-bit

Q & A

Thank You!
