

SESSION ABSTRACT

E52 IMS V7 System Enhancements

Rich Lewis

IMS Version 7 introduces many enhancements to IMS. This presentation explains the new system capabilities. The performance, usability, and availability enhancements which are presented include advances in IMS installation and upgrades, DBRC usability, RECON performance, ACBGEN processing, online change, logging, batch backout performance and performance monitoring. IMS V7 Database and Transaction Manager enhancements are covered in other presentations at this conference. This presentation will be of interest to both IMS TM and DBCTL users.
