

# SESSION ABSTRACT

## **E54 Migrating from a Full Function Database to IMS V7 HALDB**

*Rick Long*

This session looks at migration from full function database to HALDB. It discusses the process and all the utilities involved. It provides practical advice on the migration process. It is aimed at the IMS DBA who is responsible for the planning and migration of application databases to HALDB in test and production environments. A helpful prerequisite for this session is E53, IMS V7 High Availability/Large Database Support.
