

Hitech Systems, Inc.

SafetyNet Software Suite

Solution Description

Public safety agencies require an integrated system that allows seamless data sharing across multiple jurisdictions and agencies. Hitech Systems' SafetyNet Software Suite is an integrated solution that meets this need. Components of SafetyNet include:

SafetyNet CAD is a real-time, multi-agency, multi-jurisdictional Computer Aided Dispatch system for Law Enforcement, Fire, and EMS agencies. SafetyNet CAD demonstrates fast transaction times and is highly configurable and extensible.

SafetyNet RMS is an integrated records management system for Law Enforcement agencies. SafetyNet RMS provides reporting and analysis capabilities to assist with crime prevention, investigation and incident analysis. SafetyNet RMS also helps agencies meet state and federal reporting requirements by compiling data into reports for easy electronic transmission. SafetyNet RMS streamlines data entry efforts by providing a standard interface to all features.

SafetyNet FMS is a multi-agency, multi-jurisdictional, integrated records management system for Fire Departments and EMS agencies. SafetyNet FMS provides reporting and analysis capabilities to assist with event tracking and incident analysis. The product allows agencies to meet state and federal reporting requirements by compiling data into specified report formats for easy electronic transmission.

The SafetyNet CAD Web Interface provides access to SafetyNet CAD through the familiar environment of your Internet Web Browser, providing periodic snapshots of real-time displays of Active Calls, Active Units, Pending Calls, and Unit Status. The SafetyNet CAD Web Interface also links to detailed call information.

IBM Segment

- Data Management

Business Function

- Data Sharing Across Multiple Jurisdictions and Agencies

Target Industry

- Government

Features & Benefits

The SafetyNet Software Suite enables:

- Proven reliability: Hitech customers experience 99.9 percent availability for single-server configurations and 99.99 percent availability for redundant configurations
- Flexible architecture enables customization to meet each client's unique requirements
- Cost-effective systems integration
- Rapid deployments to meet aggressive schedules
- Optional modules and interfaces maximize customers' SafetyNet investment
