

A Business Partner Solution for the Cross Industry Sector

Convert and Share Documents

Informative Graphics Corporation

Net-It®

Technology Description

Net-It® Enterprise from Informative Graphics Corporation (IGC) is a scalable Web services application that makes it easy to convert document files for distribution and sharing. The tool automatically detects new or updated documents, images, engineering drawings and creates new renditions for populating to the enterprise content management (ECM) application or for publishing.

Net-It provides an easy, automated way to convert nearly any type of document, even CAD drawings, to PDF, TIFF, or secure Content Sealed Format (CSF). Net-It also allows users to split, merge, rotate or mirror TIFF files. Net-It users can automatically burn-in markups or annotations. For any output (TIFF, PDF or CSF), users can apply banners, watermarks and raster stamps at publish time, as well as generate thumbnail images. Conversion can be on a file-by-file basis, via Web services (HTTP) commands, or Net-It can monitor a specified directory for new files to process.

Easy to use, install and deploy, Net-It is a great solution for providing an enhancement for document conversion.

Features & Benefits

- Automatic file conversion from over 150 formats to TIFF, PDF or secure CSF.
- Easily create document thumbnails for use in user-friendly applications.
- Burn-in watermarks, ISO banners, and annotations.
- File conversion to secure CSF lets users add password protection; restrict print, copy, layer views and more; and time-expire the file so it becomes unreadable.
- Easy invocation via HTTP commands; parameter driven.
- TIFF file manipulation lets users split a multi-page TIFF file into multiple files, merge two TIFF files into a single file, rotate a TIFF image (or specific page/pages) by a specified number of degrees, or mirror the image on the x or y axis and specify which pages to output for multi-page documents.

IBM Segment

- Enterprise Content Management

Business Function

- Transformation

Target Industry

- Cross Industry

Value Proposition

The perfect tool for enabling broad options for document reformatting, Net-It provides developers with a flexible tool that can be invoked from nearly any application or workflow. More than 150 file formats are supported with this tool. Based on proven technologies widely marketed by Informative Graphics to OEMs and systems integrators, Informative Graphics brings this technology for the first time to the IBM solution ecosystem.

Company Description

Informative Graphics Corp. (IGC) is a leading developer of viewing, annotation, redaction, and publishing software. Since 1990, IGC has helped companies securely share electronic content across the extended enterprise. Over the years our technology has evolved, but our passion remains the same—deliver easy, responsive, proven solutions to our customers.
