

U08

DB2 for Linux Update

DB2 Technical Conference - 2002

The logo features a horizontal green bar with rounded ends, containing the text "IBM Data Management Technical Conference" in a purple, serif font. The bar is surrounded by a decorative pattern of green circles of varying sizes, some solid and some with a white outline, creating a bubbly, organic effect.

IBM Data Management Technical Conference

Anaheim, CA

Sept 9 - 13, 2002

Agenda

- Introduction to Linux and DB2
- DB2 Technology Overview
- Scalability and Performance
- zSeries and DB2 Connect
- DB2 Application Development
- DB2 Infrastructure Support and Solutions
- DB2 vs. Competition
- Why DB2 for Linux

What is Linux?

- UNIX[®]-like operating system developed by Linus Torvalds
 - ▶ Version 2.4 available
 - 4-way SMP, 64-bit, Partitions, 1TB file size, Journaling...
- Developed / tested by the Open Source community
 - ▶ Highly Disciplined/Structured
 - ▶ High Quality
 - ▶ Secure
 - ▶ Stable
- Packaged and shipped by distributors
 - ▶ Red Hat
 - ▶ SuSE
 - ▶ Turbo Linux
 - ▶ Caldera
 - ▶ Others (Red Flag, Conectiva, Mandrake, etc...)

Linux is open and ready for business.

- Linux has become the fastest growing server operating system in the world

- Linux adoption moving into the next phase
- IBM is committed to Linux

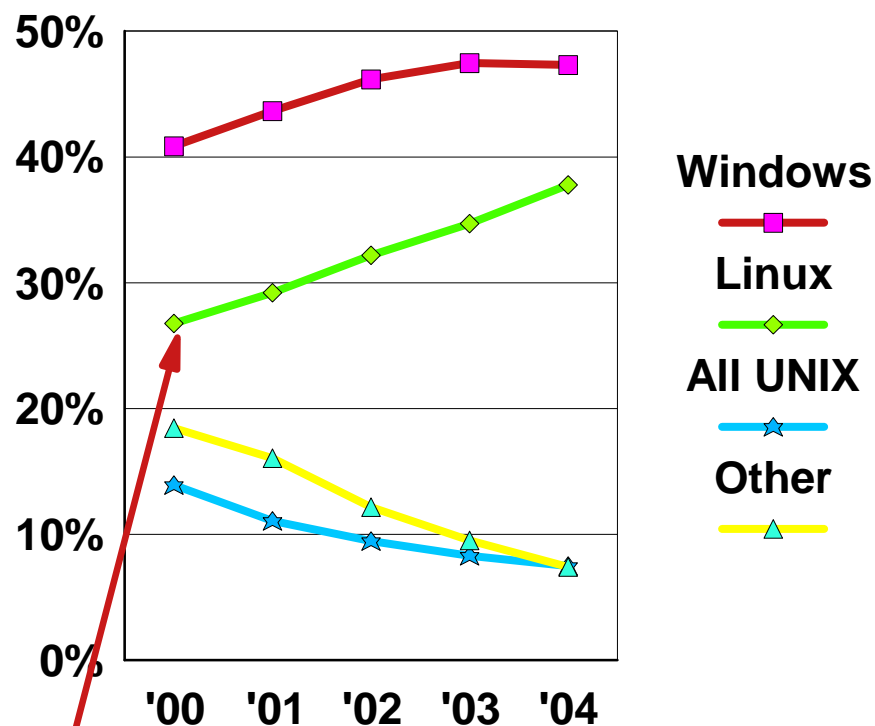

Fact: IBM has already invested over \$1 billion in Linux.

Linux Momentum

Customer demand is very high and growing fastest

- Linux will definitely have the fastest growth in 2002, at almost 50% over 2001
Gartner Group, December 2001
- Linux will have a "breakout year" in 2002. Now it seems clear that Linux has become a viable alternative for enterprise use.
IDC, January 2002
- **Exploring Linux - especially on the server side - should be part of an organization's IT investment portfolio. ...viewed as an insurance policy to hedge against future Microsoft incursions into your wallet.**
META Group, August 2001

WW New Server OS Share (units)

IDC, July 2001

**Linux
23.6% Growth**

Linux Distributors

Red Hat

- Strength - Mindshare & Marketshare Leader
- Relationship- Worldwide & IBMwide
 - ▶ IBM Software bundles agreement
 - ▶ IBM @server agreement
 - ▶ IBM products in Red Hat MarketPlace
- IBM Platforms:
 - ▶ Complete

TurboLinux

- Strength - Japan, China
- Relationship - Worldwide & IBMwide
 - ▶ IBM Software bundles agreement
 - ▶ IBM @server agreement
- IBM Platforms:
 - ▶ Complete

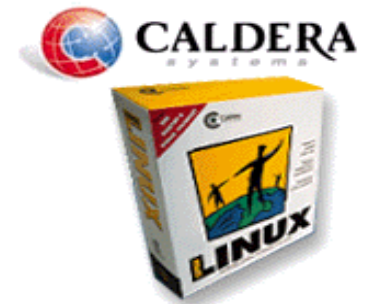

SuSE

- Strength - Europe
- Relationship - Worldwide & IBMwide
 - ▶ IBM Software bundles agreement
 - ▶ IBM @server agreement
- IBM Platforms:
 - ▶ Complete

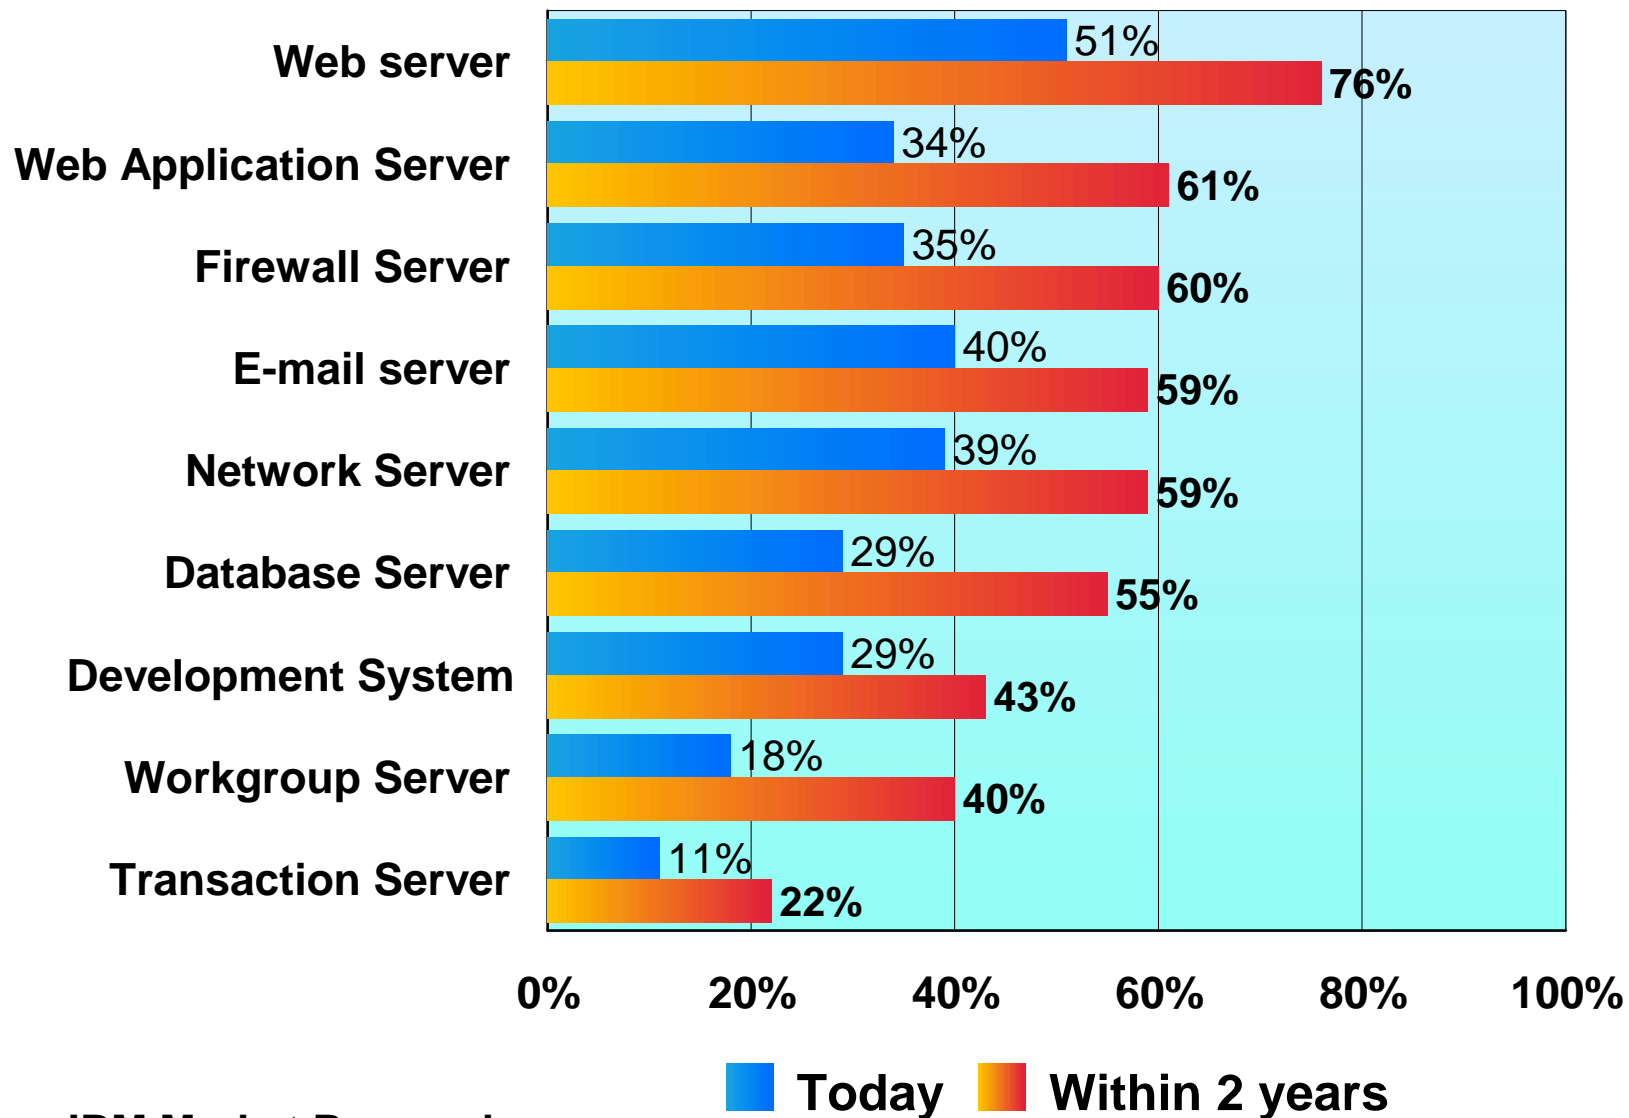

Caldera

- Strength - WW Channel Partner infrastructure
- Relationship - Worldwide
- IBM Platforms:
 - ▶ xSeries

Linux Application Deployment

IBM Market Research
February 2001

Linux and DB2 - a powerful combination

- DB2 for Linux - proven database technology
- A unique advantage: pure power at a low cost
- Plus, rock-solid stability, flexibility and manageability

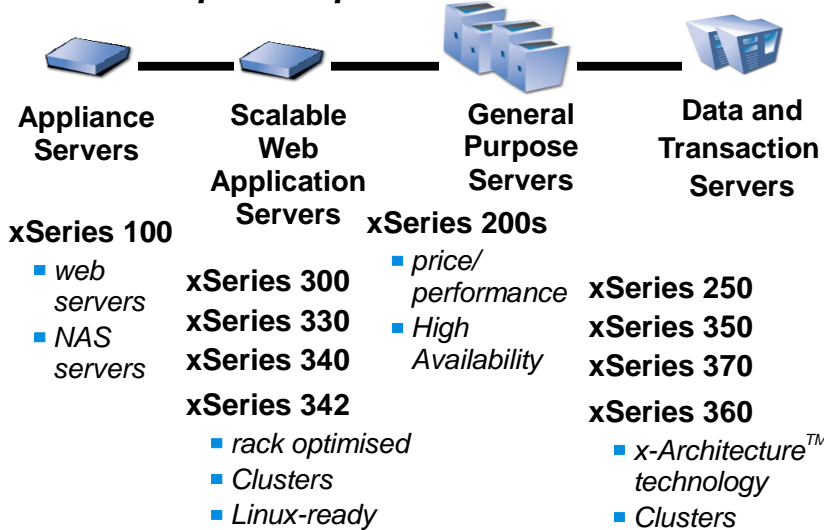

DB2 puts penguins on steroids.

Industry's Broadest Linux Server Line

Linux for xSeries and Netfinity®

The Point of Entry - Where Industry Standards Meet Enterprise Capabilities

Linux for pSeries & RS/6000®

The Point of Integration - Where Linux Meets UNIX

- Native Linux for RS/6000 (32-bit)
- Native Linux for pSeries (64-bit)
- Exploit Power3 / Power4 Floating Point, 64-Bit Performance, I/O Bandwidth and RAS
- AIX® Toolbox for Linux Applications in AIX 5L

Linux for iSeries

The Point of Coexistence - Where Linux Complements Integrated e-business Solutions

- Linux in a partition
- Integrates new ebusiness applications

Linux for zSeries and S/390®

The point of consolidation - Linux Ascends to the Mainframe

- True Linux
- Exploits zSeries HW
- Scalable, protected partitions
- Shared infrastructure
- Reduced cost of ownership

DB2 for Linux: From Palmtop to Teraflop

Embedded-to-enterprise industrial strength database solution.

Hosts

- DB2 Linux/390
- DB2 zOS
- DB2 VM/VSE
- DB2 OS/400

Enterprise & Extended

- Linux
- Linux 64-bit for IPF
- AIX
- Windows
- HP-UX
- Solaris
- Windows 64-bit for IPF

DB2 Connect

- Linux
- AIX
- Windows
- HP-UX
- Solaris

Workgroup

- Linux
- Windows
- AIX
- Solaris
- HP-UX

Personal

- Linux
- Windows

Everyplace

- Linux
- Windows
- PalmOS
- EPOC-32
- Neutrino

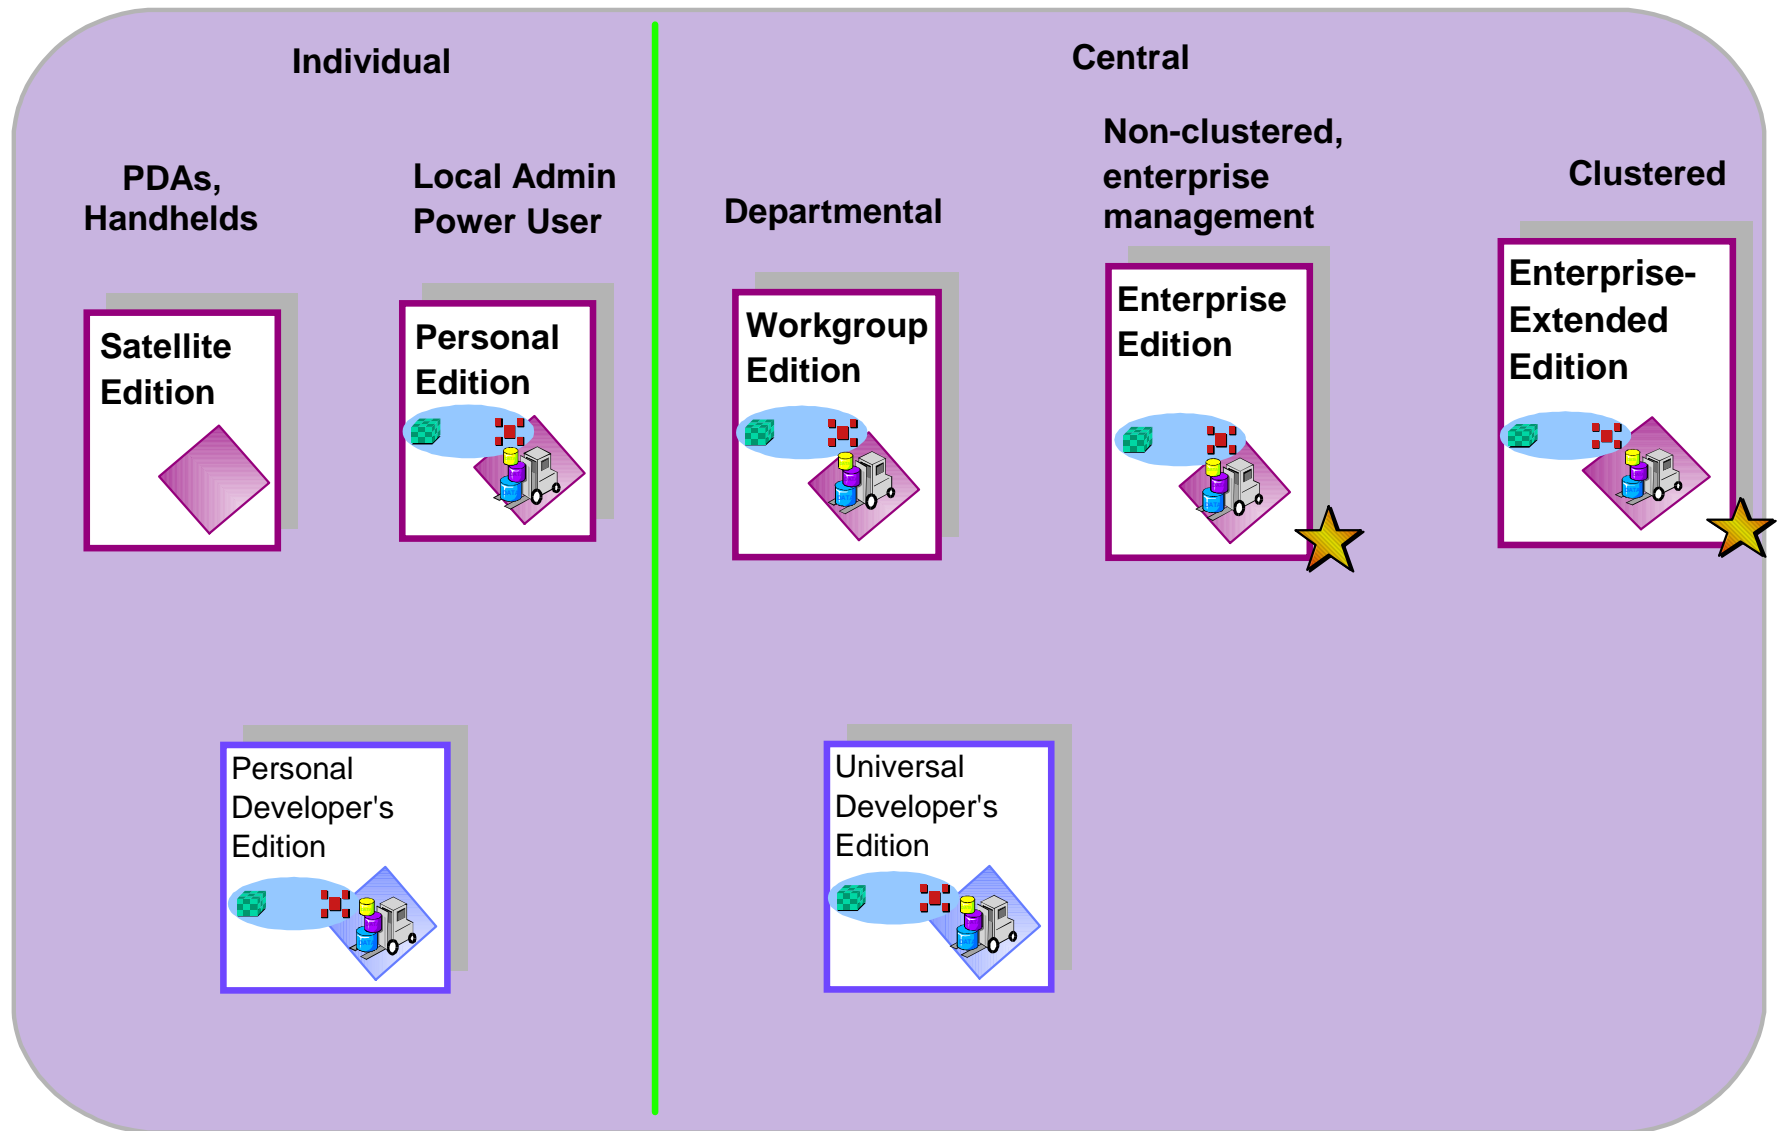

DB2 for Linux Availability:

- Intel and AMD 32-bit chips
- 64-bit Itanium Processor Family (SDK)
- IBM iSeries Linux (Technology Preview)
- IBM Linux/390 and zSeries Linux

Packaging Options

Technical Highlights

- SMP/MPP support, OLAP functions, Support for Binary Large Objects
- Leader in query optimization technology and performance
- Stored procedures, data encryption and globalization
- Heterogenous Federated supporting distributed joins between Oracle, DB2 Host Data, and DB2 Distributed DataDB2 Replication
- HA Failover support
- Backing for the InfiniBand I/O industry specification and DAT file format
- Exploits Linux 2.4 Kernel capabilities
 - ▶ Raw I/O Device support
 - ▶ Greater than 2GB tablespace containers and log file support

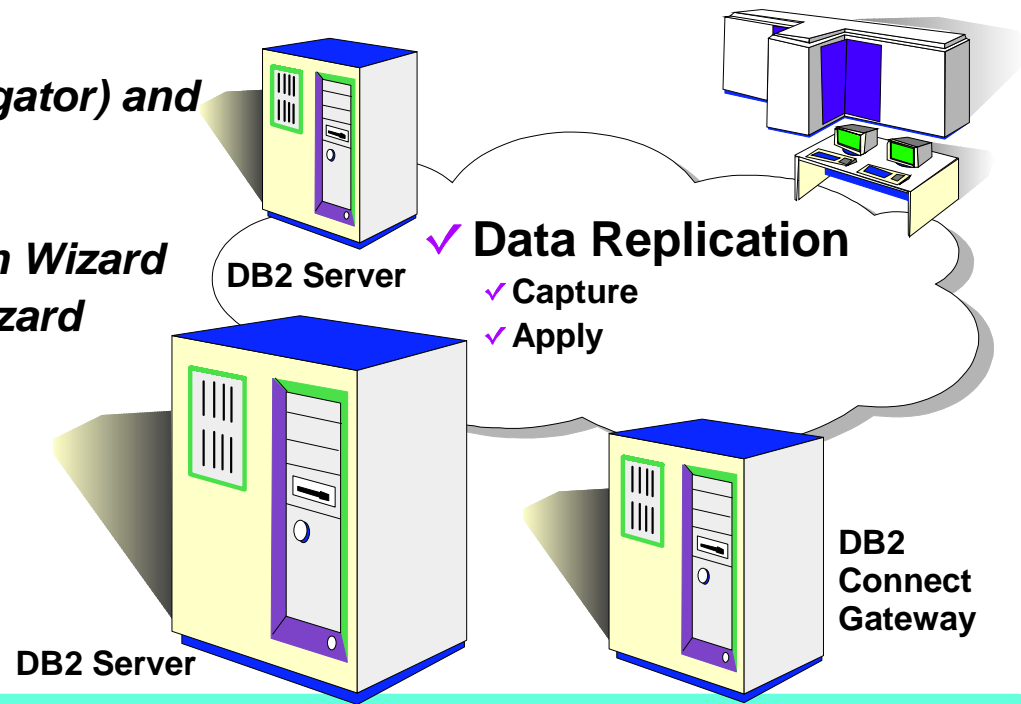

Technical Highlights

- Supports Java (J2EE, JDBC, SQLJ)
- Fully web enabled including support for PHP, Python and Perl
- XML Extender allows the storage and retrieval of XML documents using SQL APIs
- Net.Search Extenders enable in memory text search semantics for high speed text searching
- Web based and GUI interfaces to all DBA tasks
- Productivity tools for visual development and migration

Integrated Tools

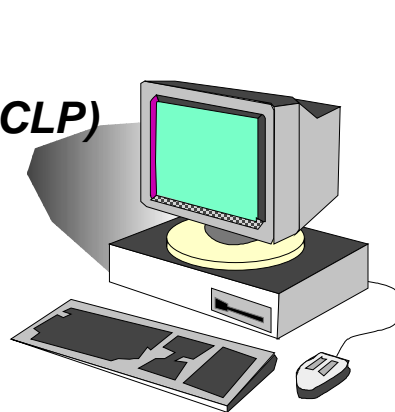

Administrator

- ✓ *Web Control Center (Navigator) and Utilities*
- ✓ *Performance Monitor*
- ✓ *Performance Configuration Wizard*
- ✓ *Network Configuration Wizard*
- ✓ *Parallel Load*
- ✓ *Job Scheduler*
- ✓ *Governor*
- ✓ *Data Reorg*

Developers

- ✓ *Command Center (GUI CLP)*
- ✓ *Visual Explain*
- ✓ *DB2 Extenders*

Users

- ✓ *Client Configuration Assistant*
- ✓ *DB2 Discovery*

DB2 UDB Clustering

IBM delivered the industry's first database support of Linux Clusters

- ▶ Start small & grow ... add extra capacity as needed
- ▶ Easy to add nodes to the cluster
- ▶ Investment in skill set maintained
- ▶ High-end clustering for web and data warehouse apps for low TCO
 - Commodity hardware
 - Not locked into a proprietary OS
- ▶ Leading benchmarks
- ▶ Terabyte Club
- ▶ Shared nothing architecture
 - Scale & performance
 - High availability
 - Management tools

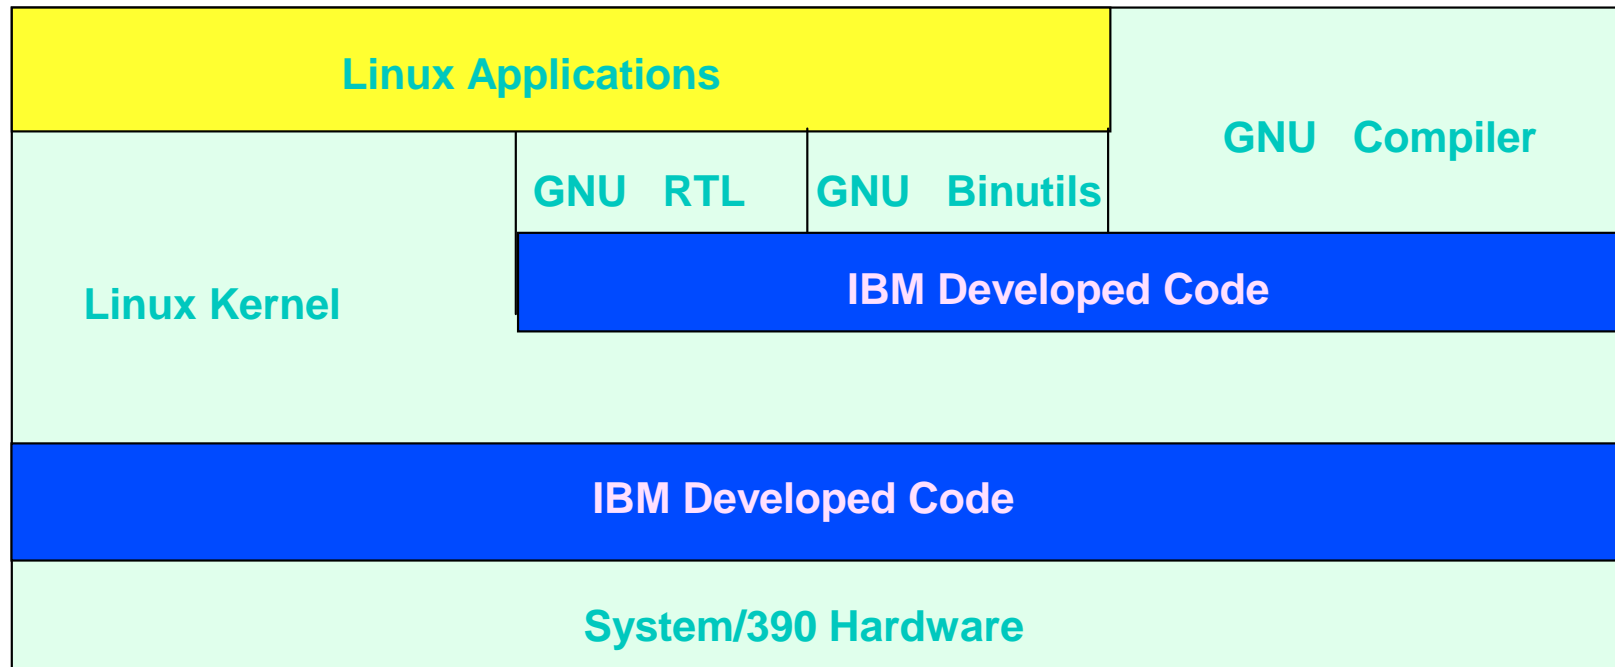

**Single database
image**

Near linear scaling

What is Linux for S/390 and zSeries?

Linux Applications

- Pure Linux, ASCII Environment.
- Not a unique version of Linux.
- Distributions available from SuSE, Redhat, TurboLinux
 - 2.2 and 2.4 kernels
 - 31 and 64 bit
- Exploits IBM S/390 Hardware, including IEEE floating point.
- No intention to replace z/OS or other S/390 operating systems.
- Runs native, in an LPAR, or on z/VM
 - Up to 15 LINUX instances run directly on the server (one or more engines); or many more with z/VM
- Integrated Facility for LINUX engine(s) isolates traditional z/OS Software costs

Linux for S/390 IT Trends Survey Data

S/390 customers interested in Linux on any platform

	All	< 400 Mips	> 400 Mips
- no interest	40.2%	42.8%	35.7%
- Considering	21.4%	20.1%	23.8%
- Evaluating	23.9%	23.5%	24.7%
- Implementing	3.9%	5.4%	1.3%
- In production	10.5%	8.2%	14.6%

On which architectures are you considering running Linux

	All	< 400 Mips	> 400 Mips
- Intel	65.3%	67.5%	61.9%
- RISC	27.4%	27.1%	27.8%
- AS/400 & Midrange	8.0%	10.1%	4.9%
- Mainframe	48.3%	48.7%	47.7%

Linux Deployment on S/390 IT Trends Survey

Data

Percentage of customers planning to consolidate Linux workload on a mainframe in the next 12 months?

All	< 400 Mips	> 400 Mips
17.3%	9.2%	29.7%

What applications are you considering running on Linux on a mainframe?

	All	< 400 Mips	> 400 Mips
ERP	9.4%	9.3%	9.6%
SCM	21.9%	19.5%	25.7%
CRM	30.4%	28.0%	34.3%
E-MAIL AND COLLAB	39.4%	36.5%	43.9%
BI	25.1%	33.4%	11.2%
S/T/E	26.2%	27.2%	24.7%
E-COMM	61.2%	53.1%	73.2%
WEB SERVING	59.2%	58.3%	60.5%
OLTP	31.4%	34.4%	26.9%
OTHER	14.0%	13.4%	15.0%

DB2 for Linux on zSeries or S/390

IBM delivered the industry's first database support of the mainframe running Linux

zSeries customers can extend and leverage their current investment in hardware

- 100s-1000s of Linux operating systems can coexist with other operating systems on a single zSeries under VM
- With VM, a customer can offer a complete Linux server environment to each of their application developers and host production systems all on the same zSeries machine
- The zSeries can be logically partitioned into 15 LPARs so a single zSeries could host zOS, VM and VSE, and Linux applications

Consolidation of Linux servers on zSeries reduces cost, improves reliability and manageability

- Hardware savings, skill leverage
- "5-9s" zSeries reliability

Customers can take advantage of the features specific to UNIX environments on DB2 UDB on Linux

- With DB2 UDB and DB2 Connect available on Linux for zSeries it is possible for vendor applications that are currently available for UNIX customers (that are not yet ported to zOS) to leverage the zSeries platform

Integrated Facility for Linux engines

Stage 1

Stage 2

Stage 3

- Business As Usual
 - ▶ Typical z/OS or OS/390 environment on a 3 way processor

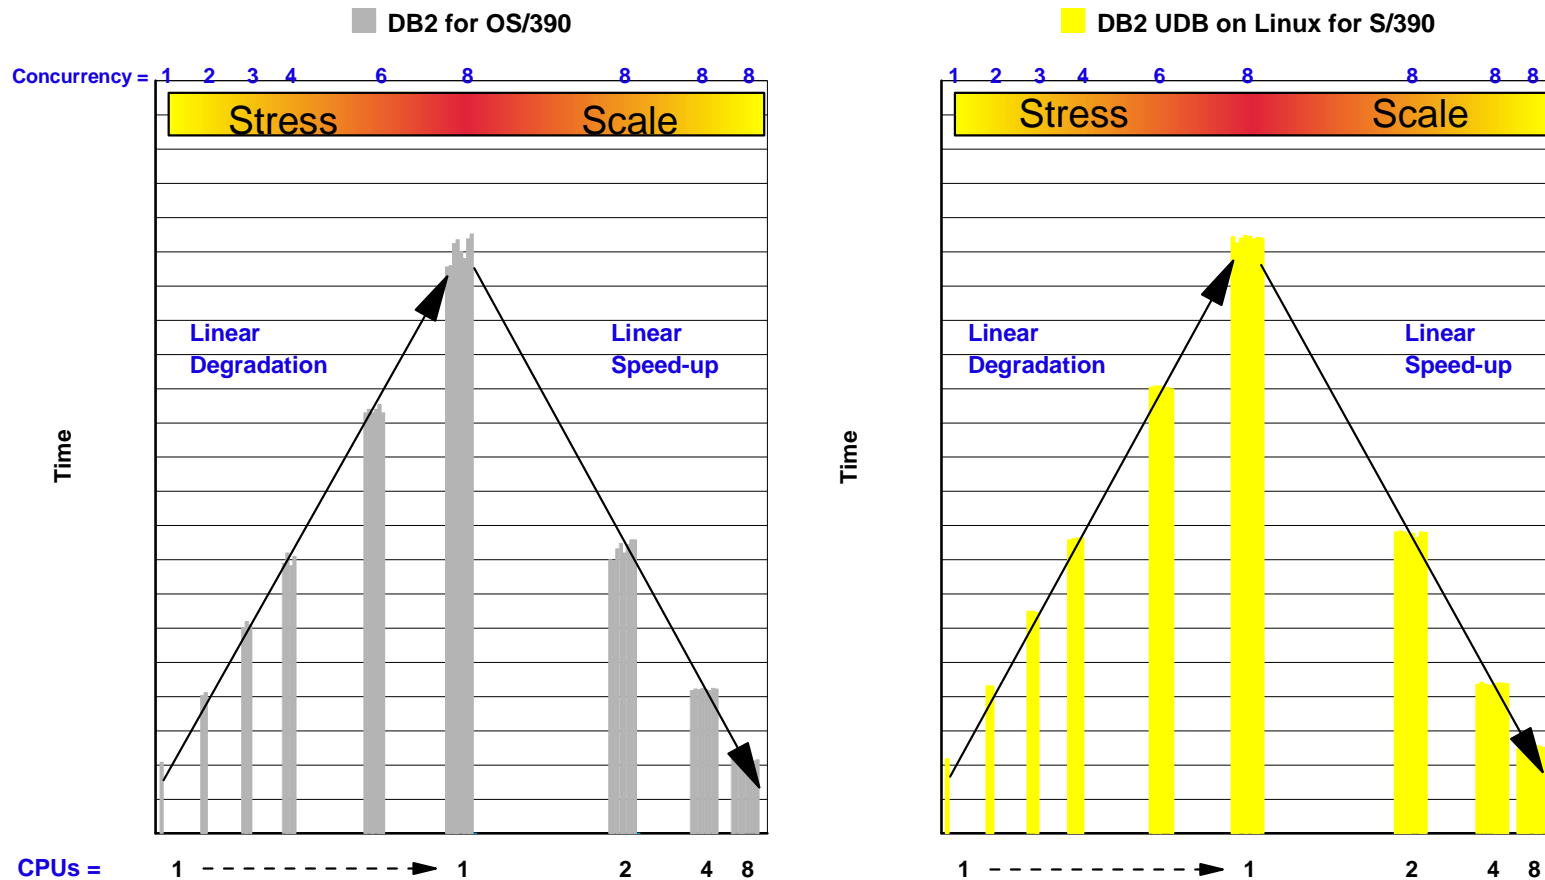

- Same as above with one IBM Integrated Facility for Linux engine added
 - ▶ Traditional environment price remains the same

- Same configuration as above with IBM middleware for Linux for zSeries added
 - ▶ Traditional environment price remains the same
 - ▶ Add cost of IBM middleware (i.e DB2 UDB and DB2 Connect)

- Add compute power for Linux workloads without increasing charges for traditional zSeries software from IBM and ISVs
- Available as a feature on Multiprise 3000, 9672 G5/G6 and zSeries systems
- Adding IFL processors has NO effect on existing software prices running on zSeries

DB2 Query Scalability

Source: e-Business Intelligence: Leveraging DB2 for Linux on S/390 - July, 2001
<http://www.redbooks.ibm.com/pubs/pdfs/redbooks/sg245687.pdf>

- Workload targets data mart applications
- Not applicable for data warehousing or OLTP applications

DB2 Connect -- Enterprise Integration with Linux

Middle tier of gateway servers was needed

Eliminate middle tier with DB2 Connect on zSeries

Web Development with DB2 for Linux

- DB2 Integrates seamlessly with Java and IBM Websphere family
- Net.Data provides quick access to DB2 data from web servers
- Integrates with Popular Open Souce Apps and Apache
 - ▶ Perl
 - DB2 interface is available for download provide by IBM
 - <http://www.ibm.com/software/data/db2/perl>
 - ▶ PHP
 - Works directly with CLI layer through something called unified-odbc in PHP
 - <http://www.php.net>
 - ▶ Python
 - DB2 driver available in open-source
 - <http://www.python.org>

Learn how to jumpstart your e-business application development for DB2 and Apache

- Install and configure DB2 for Linux, Apache, PHP, Perl and Python
- Identify and include DB2 specific drivers for each language database interface
- Connect to the DB2 database
- Create and execute SQL statements

www7b.boulder.ibm.com/dmdd/library/tutorials/db2linux/db2linux.html

DB2 UDB For Developers

- **Personal Developers Edition can be downloaded for free**
- **Try and Buy for 90 Days**
 - ▶ EE (Intel and zSeries), EEE (Intel)
<http://www.ibm.com/software/data/db2/udb/downloads.html>
- **No-charge Linux Software Evaluation Kit**
 - ▶ Contains IBM key middleware for Linux including the Universal Developer's Edition (UDE) for DB2 on Linux
<http://www.ibm.com/linux>

Partners and Solutions

- Business Solutions
 - ▶ ERP - SAP
 - ▶ Accounting - Accpac, Sage
 - ▶ Retail - Apropos, Marcole
 - ▶ Finance - Axiom, Eontec, Sanchez

- Business Intelligence
 - ▶ SAS
 - ▶ Dimensional Insight
 - ▶ MicroStrategy
 - ▶ Brio
 - ▶ Business Objects, Informatica

Infrastructure Partners

Partners on DB2 EE and EEE on Intel-based and mainframe servers

WITH

Borland®

 **LEGATO®**

- ▶ RAD Development Environment
- ▶ Kylix & Delphi

- ▶ HA/BAR
- ▶ LAAM and Networker

- ▶ HA
- ▶ LifeKeeper

- ▶ Systems Mgmt
- ▶ Quest Central for DB2

PUSH

✓ *Develop once with DB2 & Borland and deploy in multiple Linux/Windows environments*

✓ *Used by a major ERP vendor for their own Backup-and-Recovery*

✓ *DB2 and Steeleye advantages with Linux IA-32 clusters*

✓ *Wide range of monitors/tools to support DB2 in a variety of environments*

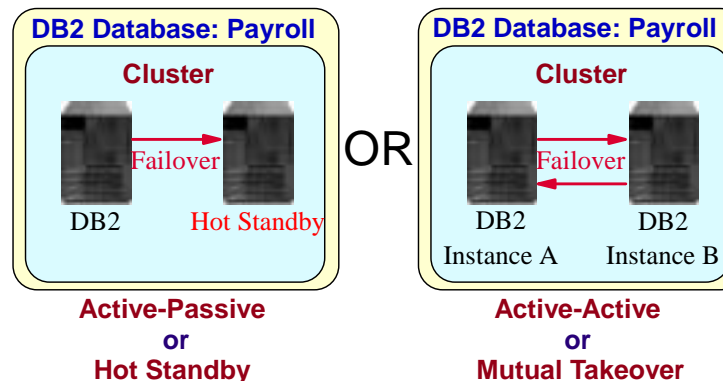

High Availability Fail-over Solutions

Be confident that your mission critical data is always accessible with high availability solutions for DB2!

- Similar functionality as HACMP on AIX, MSCS on Windows etc.
- Administration GUI Interface provided by all vendors
- All required scripts provided by vendors
- Available for Linux IA-32 today

Our Partners Include:

- ▶ LifeKeeper from SteelEye Technologies
 - Supports all clustering configurations
 - <http://www.steeleye.com>
- ▶ Legato Automated Availability Manager
 - Supports all clustering configurations
 - <http://www.legato.com>

DB2 for Linux vs. Other Databases: Open-Source

- ▶ is not ACID compliant
- ▶ lacks many of the business-required features such as triggers, stored procedures, views, or full support for transactions
- ▶ is great as a small data store but doesn't scale well as workloads and transactions increase

-
- ▶ Comparison of DB2 and open-source databases on Linux
 - ▶ "DB2 UDB for Linux provides ... lowest long-term total cost of ownership."
 - ▶ None of the open-source databases grow beyond entry-level business needs
 - ▶ Download from: http://www6.software.ibm.com/dl/db2_01/techguide-p

- ▶ lacks major management utilities and features
- ▶ unable to control degree of transaction rollback
- ▶ does not allow online backups while letting applications to remain connected and active

DB2 for Linux vs. Other Databases: Commercial

Oracle9i Database

- Oracle claims it embraces Linux - where are the references?
- IBM leads in database performance; Oracle has published no Linux benchmarks
- Total cost of ownership: IBM is the low-cost database leader
- Market growth: IBM continues to grow faster than the industry

- Does not run on Linux today
- Still can't scale as well as DB2
- Lags behind DB2 in benchmarks (TPC-H 100GB category)
- DB2 for Linux embraces more open standards than Microsoft and interfaces with a variety of platforms
- Microsoft states no future support for Java

Migrating from other DBMS on Linux

- Commercial Databases
 - ▶ Today Sybase and Oracle on Linux
 - ▶ MTK for Sybase and MTK for Oracle available on Linux today internally

- Most popular Open-source Databases
 - ▶ MySQL
 - Aiming for a migration tool for database and data by mid-year

 - ▶ PostgreSQL
 - Migration tool migrating database developed
 - Likely to be made available through open-source externally in the near future

- IBM Migration Team
 - ▶ Americas, AP, EMEA

Why DB2 UDB for Linux

Delivers Value

Less

- **Lowest Total Cost of Ownership**

- TCO consultant reports are available for viewing at:
<http://www-4.ibm.com/software/data/pubs/tech-consult.html>
- New pricing for DB2 for Linux on Intel: up to 1/2 off when purchased through Passport Advantage (Announcement Letter 202-004) -- TCO gets even better!!

- **Broad Platform Support**

- DB2 runs most popular UNIX and Intel Server platforms and the mainframe as well!
- DB2 supports all major industry standards relevant to distributed data
- DB2 can grow as your business needs grow but investment in skill set is maintained from entry to enterprise across platforms

- **Seamless Connectivity to Other Data**

- DB2 delivers the industries most advanced heterogeneous environment support
- Seamlessly access relational and non-relational data from a variety of data sources

Why DB2 UDB for Linux

Peace of Mind

- **World Wide 24x7 Service and Support**
 - Best of Breed in industry
- **IBM and ISV Application and Tool Enablement**
 - ERP, CRM, BI, Tools and other solutions are available from ISVs for DB2 on Linux
 - Extensive technical enablement and co-marketing programs to support business partner success with IBM technologies
- **24x7 Reliability, Scalability, Availability and High Performance**
 - Leader in query optimization technology and performance
 - DB2 is the performance leader on Linux .. see the recent TPC-H benchmark results (www.tpc.org)

Why DB2 UDB for Linux

Easy to Manage

- **GUI based central control point for Managing DB2 Servers**
 - Control Center presents a single GUI interface to all DBA tasks
- **DB2's Self Managing and Smart Database Technology Reduces the Complexity of Administration**
 - DB2 has the industries best SQL optimizer, eliminating the need for hand tuned queries, simplifying the job of the DBA and the application developer

Summary

Linux Adoption

Vendor Independence
Major system vendors
are adopting Linux
on their platforms

**Emerging SW vendors
developing on Linux**

Established ISV's porting to Linux

**Skills growing in Universities,
development organizations and
research labs**

**Unix Skills
Transferable**

Effects

**Flexibility &
Choice of
Deployment**

**Ability to
Consolidate on
Platform of
Choice**

**Lower Total
Cost of
Ownership**

**Application
availability &
new business
innovation**

**Larger pool of
skills available**

Benefits
