

eTutor Offerings

Highlights

- ***Extend technical knowledge and skill sets without leaving the office***
- ***Learn about best practices from others and leverage them within your information integration projects***
- ***Shorten time to benefit with faster development and deployment cycles with reduced risks and errors***

Unlock the value of enterprise data

Organizations face an information challenge. Where is it? How do I get it when I need it in the form I need? What does it mean? What insight can I gain from it? Can I trust it? How do I control it? The list goes on, and the challenges grow unceasingly if organizations cannot ensure they have access to authoritative, consistent, timely and complete information.

Services from IBM Information Integration Solutions complement the IBM WebSphere® Information Integration platform, which integrates and transforms any data and content to deliver information clients can trust for their critical business initiatives. Designed to ensure customer success with IBM solutions, IBM information integration services range from technical support to education to professional services.

eTutor offerings

By offering select courses through the eTutor technology, IBM Learning Services can reach more users in a cost-effective manner. eTutor course offerings are typically 2-4 hours in length, and are delivered to the learner via CD. This type of course delivery enables the user to determine when, where and what pace is best. Included in the delivery is a CD with the recorded presentation, course manual and exercises.

The following courses are in the active customer eTutor library:

IBM WebSphere DataStage® 6.x/
IBM WebSphere MetaStage® 6.x
Upgrade Course

- *This course teaches the learner the functional enhancements in the rev 6.x product. Covering the IBM WebSphere DataStage and IBM WebSphere MetaStage products.*
- *This 1-2 hour course is complete with exercises to reinforce the learned concepts.*
- *Tuition = \$300 for one; \$500 for two*

IBM WebSphere DataStage BASIC Concepts

- *This is an in-depth course for the IBM WebSphere DataStage analyst / consultant / developer who have a strong need for the ability to create custom functions and routines within the IBM WebSphere DataStage environment.*
- *This 4–5 hour course emphasizes the practical issues of IBM WebSphere DataStage BASIC concepts and has a large "hands-on" component.*
- *Tuition = \$600 for one; \$1,000 for two*
