# Information On Demand Strategy

## Unlocking the Business Value of Information for Competitive Advantage

Customer & Product Profitability    Financial Risk Insight    Workforce Optimization    Dynamic Supply Chain    Multi-Channel Marketing

**Business Optimization**

**Better Business Outcomes**

**COGNOS**

AN IBM COMPANY

*Plan, understand and optimize business performance*

*Establish and maintain an accurate, trusted view of information*

*Flexible Architecture for Leveraging Existing Investments*

*Manage data and content over its lifetime and as part of processes*

**Cognos.**  
software

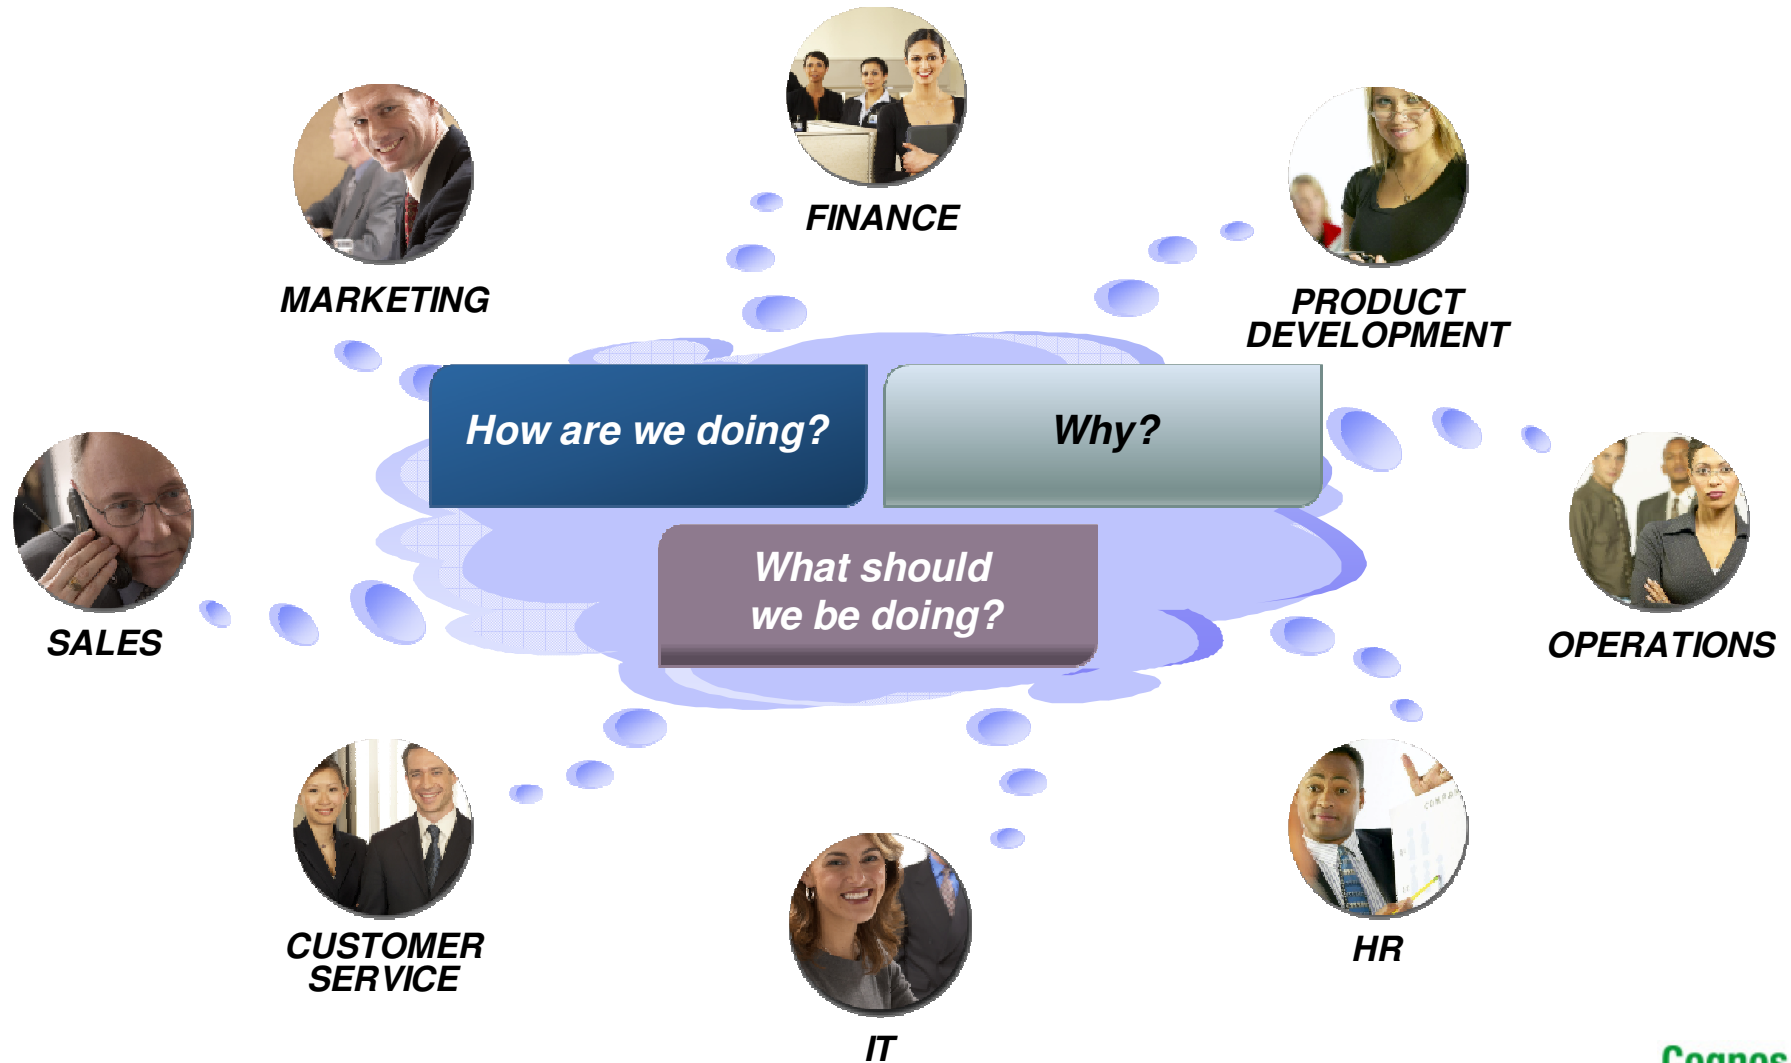

## *Three Questions that Drive Performance*

*How are we doing?*

*Why?*

*What should  
we be doing?*

# Three Questions that Drive Performance

**PRODUCT OVERVIEW**

# What is Cognos 8 Business Intelligence?

- All capabilities against any *combination* of data sources (OLAP or relational)
- Hides complexity from users and ensures complete view of information

## Introducing the Product Profitability Analytics Blueprint

- Developed with Breakaway Technologies, Inc., an IBM Business Partner
- Answers a critical need in the process of assessing profitability
- Powered by IBM Cognos TM1
- Features an intuitive user interface environment built over the IBM Cognos BI platform
- Provides views of product from the highest company level and to the lowest product SKU level
- Presents the effects of product level profitability on enterprise planning

Cognos.  
software

# Product Profitability Analytics Blueprint features and functions

- Profitability by product attributes
- Role-based analytical insight
- Product profitability and inventory analysis
- Direct Product Profitability (DPP) analysis
- Product-channel profitability analysis
- Heavy allocations
- Costing engine (including ABC) integration
- Tieback into enterprise planning processes

## *Dimension Management Needs in the Business*

Do any of these sound familiar?

- *“I wish the sales hierarchy reflected the latest re-organization.”*

Operations Manager

- *“When will the data warehouse reflect my new customer loyalty index?”*

Brand Manager

- *“I want to realign my cost centers so I have plan and actual views.”*

Financial Analyst

- *“I need my customer marketing hierarchy to be different from my shipping hierarchy.”*

Marketing Manager

## Three Common Questions

- HR Sales Org Analyst
  - Sales representative
    - Regional Manager
      - Senior VP of sales
      - Chief Executive Officer
- Business Analyst – Time Hierarchy
  - Fiscal and/or Calendar Quarter
    - Monthly
      - Weekly
      - Daily
- Product Manager
  - Camping Equipment
    - Tents
      - Highland
      - DuraTent
      - Weather Max Tent
    - Lanterns
      - Shine Bright
      - Long Lasting
    - Fishing Gear
      - CatchAll
    - Clothing
      - Boots
      - Pants
      - Shirts
- Financial Analyst
  - Asset Accounts
    - Petty Cash
  - Liability Accounts
    - Accounts Payable
  - Equity Accounts
    - Stated Capital
  - Revenue
    - Product #1 Sales
  - Cost of Goods Sold
    - Product #1 Cost
- Hierarchies to manage
  - Brand
  - Territory
  - Product
  - Financial
  - Customer
  - Employees
  - Supplier
  - Asset
  - Location
  - Etc.

1. How can we create and maintain the dimensions that domain experts are responsible for?
2. How can we maintain transparency across any changes made?
3. How can we ensure a common shared view across the organization?

## ***Business Problems To Address***

- Business users cannot manage their views of the business
- Domain experts cannot collaborate effectively in the dimension management process
- Changes to dimensional models can have significant downstream impacts (e.g. to existing reports)
- There is no consistent shared view of the hierarchical structures across the organization
- There is no accepted repository for future planned members and hierarchies for budgeting and forecasting

## Introducing IBM Cognos 8 Business Viewpoint

- Solution
  - For business users to **easily maintain, govern and share the hierarchies for use** ... and reuse ... across Business Intelligence and Performance Management solutions
- Result
  - Capture the business viewpoint on **how to organize information to drive business performance**
  - Save time spent on reconciling reports, plans, forecasts

## *Business Viewpoint Enables the Business*

### **Create and Maintain**

Enable the business to easily create their own perspectives with highly visual interface and fully flexible model

### **Govern and Collaborate**

Replace manual, error-prone efforts with fully transparent, automated and auditable processes

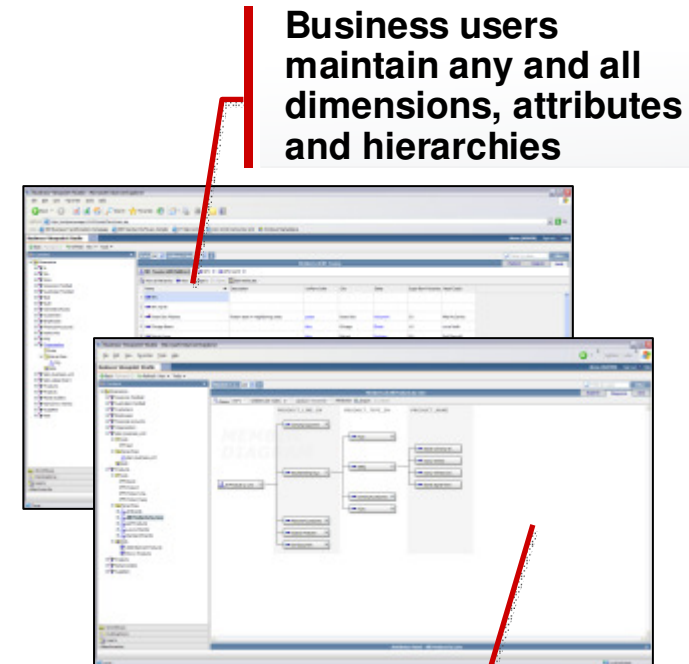

### **Share and Synchronize**

Deliver shared, approved viewpoints across Performance Management and provide bi-directional interfaces to external systems

## Create and Maintain

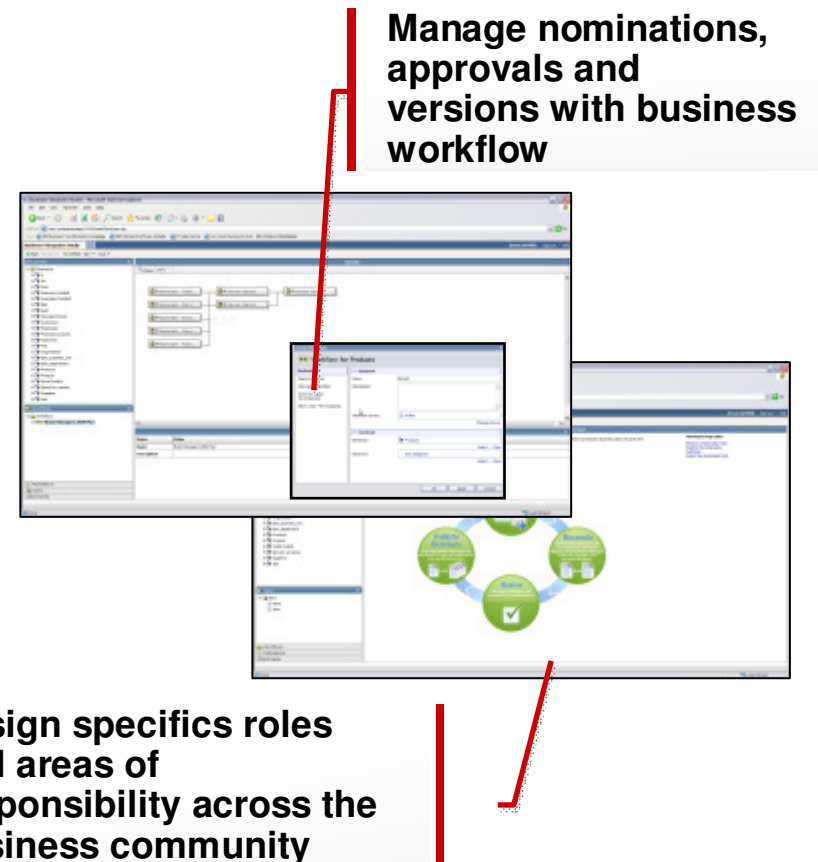

- Enable Business Definition of Common Dimensions
  - Create, edit, manage, compare, import
  - Address all dimensions required for PM (chart of accounts, cost center, product etc)
  - Assemble multiple hierarchies, views or versions to support the performance management process
  - Work within familiar tools such as Excel
  - Provide notifications by role as changes occur

Visualize create and relate dimensions and flexibly add any number of attributes

## *Govern and Collaborate*

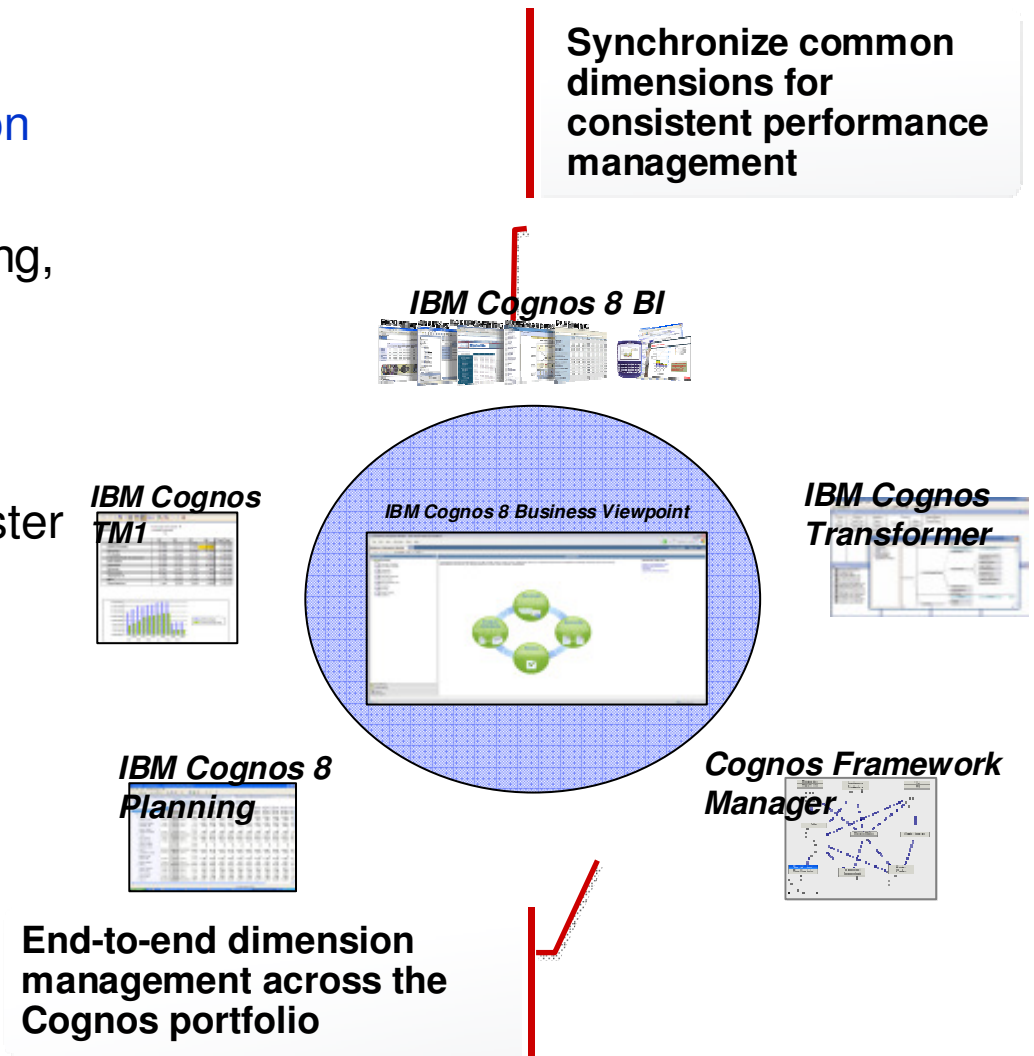

- Enable Governance of Common Dimensions
  - Facilitate workflow collaboration, multi user contribution
  - Audit who makes changes and what changes are made
  - Provide version control and roll back
  - Apply security for dimensions, users and user roles
  - Provide lineage of maintenance history back to the source
  - Store dimensions in central store

## Share and Synchronize

- Enable Consistent Use of Common Dimensions
  - Pre-built integration with Planning, TM1, BI, Transformer\*
  - Selectively publish changes to authorized applications
  - Subscribe and synchronize master dimensions
  - Impact analysis for downstream effects

Synchronize common dimensions for consistent performance management

End-to-end dimension management across the Cognos portfolio
