

## **What Every IT Professional Needs to Know Driving Smarter Decisions**

What could promote smarter decisions across your organisation more effectively than answering the basic question, "Are we on or off track?" Discover how IBM Cognos 8 planning and analysis solutions can help your organisation to:

- Measure, monitor, plan and analyse business performance more effectively
- Simplify the data, process management and technical architecture associated with enterprise planning and forecasting
- Bring greater business and IT governance and efficiency to what has traditionally been a spreadsheet-based process.

You can see the solution in action with an in-depth demonstration that will help you evaluate the benefits of IBM Cognos 8 planning and analysis solutions for your organisation.
