Enterprise Content Management

IBM Content Collector Discovery Analytics - DEMO (CCDA)

Servando Varela, IBM Marketing Manager
Robert Nonnenkamp, Executive IT Specialist

December 2, 2010

IBM Information Lifecycle Governance (ILG) Model

IBM Content Collector Discovery Analytics (CCDA)

A bundle that helps you to

- Intelligently collect and archive various types of content from
  multiple locations

- Search, cull, hold, and export that content for discovery or corporate audits and investigations; all through an easy-to-use, feature rich, Web-based user interface.

Available as a starter pack for projects with up to 1,400 users

Consists of:

1. IBM Content Collector for Email
2. IBM Content Collector for File Systems
3. IBM eDiscovery Manager
4. IBM eDiscovery Analyzer

Can run on and leverage the power of IBM Information Archive which is a universal, scalable, and secure storage repository for structured and unstructured information
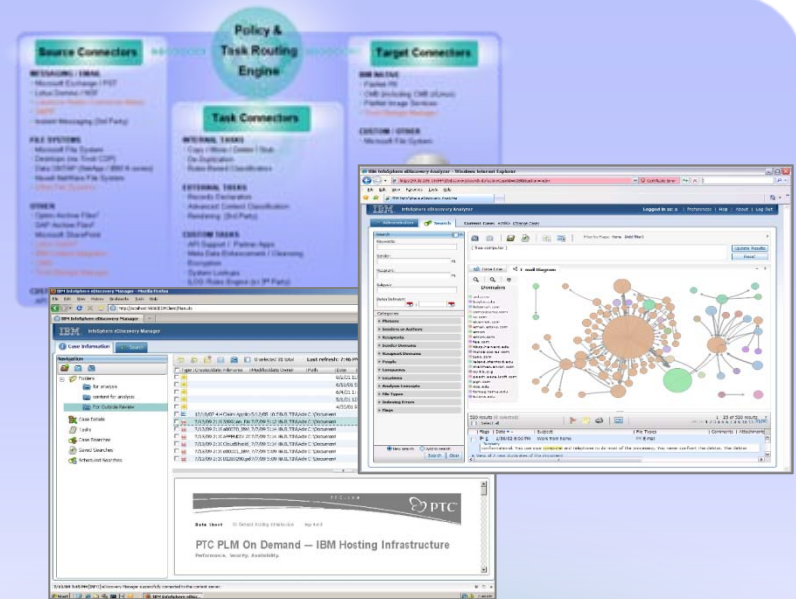

Starter Pack helps budget-conscious organizations kick off collection and eDiscovery projects for up to 1400 users

Start today, expand tomorrow

CCDA: Includes ICC for Email and ICC for Files

Content Collector Discovery Analytics includes archiving software for e-mail and file systems content. The archiving software is based on a modular, extensible architecture, and enables organizations to:

- Reduce storage costs
- Improve production system performance
- Reduce litigation costs and risks
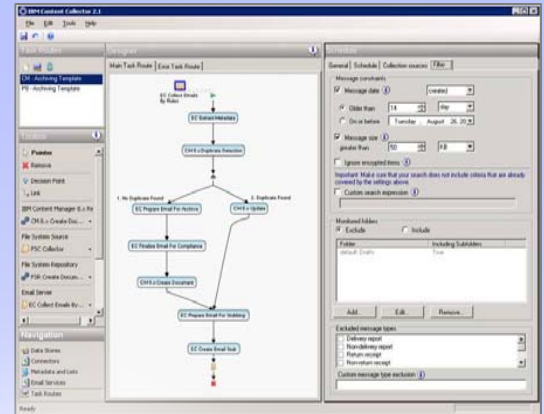

Includes:

IBM Content Collector for Email

IBM Content Collector for File Systems

More than email
Assess, monitor, identify, and **collect** virtually all content types from all locations including "content in the wild" and existing silo systems

More than archiving
Enhance by tasking, filtering, transforming, extracting meta data, customizing and more, including multiple classification options

More than an isolated solution
Manage content as part of ECM platform (not a silo) to activate content, establish trust and unlock value

Source Connectors

MESSAGING / EMAIL
- Microsoft Exchange / PST
- Lotus Domino / NSF
- LotusLive Notes / LotusLive iNotes
- SMTP
- Instant Messaging (3rd Party)

FILE SYSTEMS
- Microsoft File System
- Desktops (via Tivoli CDP)
- Data ONTAP (NetApp / IBM N series)
- Novell NetWare File System
- Other File Systems

OTHER
- Optim Archive Files[1]
- SAP Archive Files[2]
- Microsoft SharePoint
- Lotus Quickr[3]
- IBM Content Integrator
- CMIS
- Tivoli Storage Manager

CUSTOM SOURCES
- API Support with SDK

Policy & Task Routing Engine

Task Connectors

INTERNAL TASKS
- Copy / Move / Delete / Stub
- De-Duplication
- Rules-Based Classification

EXTERNAL TASKS
- Records Declaration
- Advanced Context Classification
- Rendering (3rd Party)

CUSTOM TASKS
- API Support / Partner Apps
- Meta Data Enhancement / Cleansing
- Encryption
- System Lookups
- ILOG Rules Engine (or 3rd Party)
- Policy Management

Target Connectors

IBM NATIVE
- FileNet P8
- CM8 (including CM8 z/Linux)
- FileNet Image Services
- Tivoli Storage Manager

CUSTOM / OTHER
- Microsoft File System

IBM Content Collector

CCDA: Includes IBM eDiscovery Manager
Integrated tool for managing ESI in an ECM environment

- IBM eDiscovery Manager – the cornerstone of eDiscovery response

- Tool for authorized IT users to help respond to discovery requests

- Provides key functions for IT response to eDiscovery:
  - Creating cases, assigning users to cases
  - Managing ESI in place for multiple cases
  - Searching and culling case relevant ESI
  - Holding and locking down the result set
  - Previewing for relevancy
  - Scheduling recurring searches for handling ongoing matters
  - Keeping change audit tracking, reporting authenticity and chain of custody
  - Exporting result set in native or EDRM XML format for detailed attorney / investigator / auditor review

- Built on and integrated with ECM platform to leverage proactive ESI management
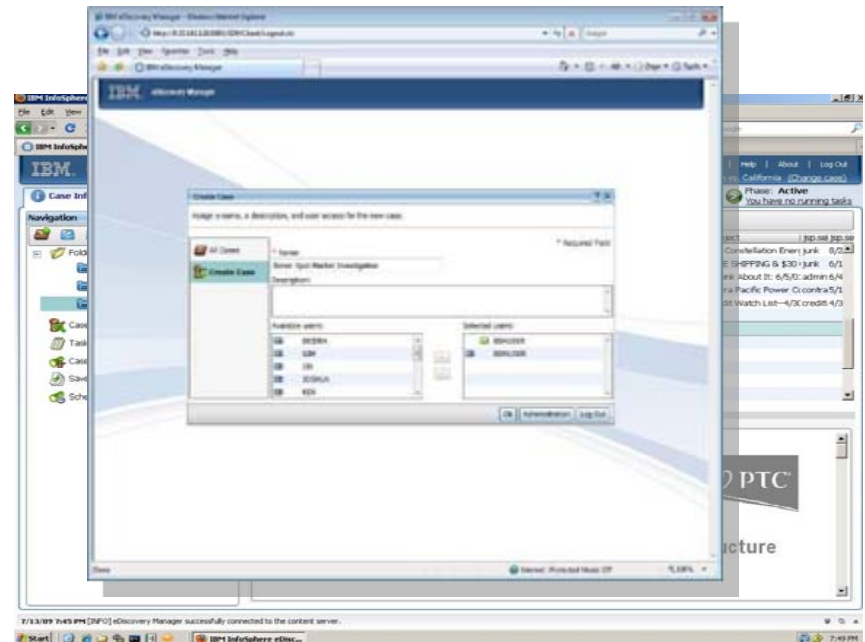

IBM eDiscovery Manager

CCDA: Includes IBM eDiscovery Analyzer
Breakthrough information insight for Agile eDiscovery

- IBM eDiscovery Analyzer – early case assessment & smart culling to increase agility and lower review cost

- Tool for attorneys, investigators, auditors and supporting specialists to:
  - Quickly reduce case matter to a much smaller and relevant data set
  - Gain early insight into a case, understand key facts, communication patterns and threads, locate key pieces of evidence, and form early case strategies
  - Flag, dynamically link related concepts, detect near-duplicates, organize and prioritize documents for review
  - Gain a clear view of available case matter, prepare query set reports with search result counts to effectively negotiate queries and terms during Meet & Confer
  - Preserve chain of custody to ensure security, auditability, and defensibility

- Integrates with and analyses cases created by eDiscovery Manager
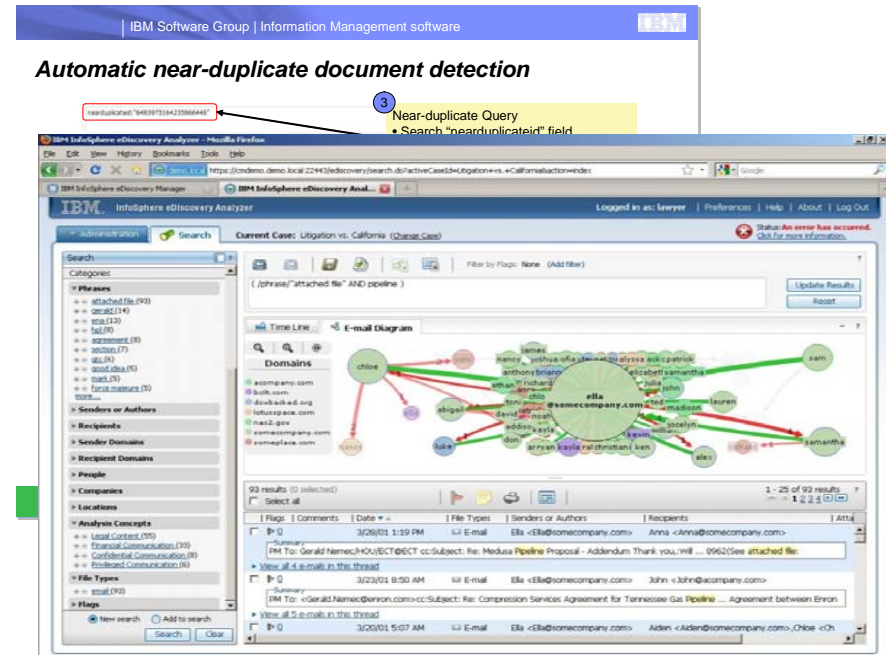

IBM eDiscovery Analyzer
