### Electronic Communications by 'Insiders' are a Real Threat

**Email** is one of the largest culprits for the Information Explosion

#### "Accidental" Communication

- Multi-tasking can result in unintentional, noncompliant communications
- Fat fingering keys, entering wrong email addresses or "replying to all"

#### "Negligent" Communication

- Employees often don't realize the full extent of their actions
- Lack of communication, enforcement or training can lead to the inappropriate distribution of sensitive or non-compliant information

#### "Malicious" Communication

- There will always be employees that will attempt to benefit at the expense of the organization or intentionally do it harm
- Regulations still apply, whether the email was malicious or accidental

#### Each type of "insider threat" can:

- Negatively impact competitive position, brand image and long-term profitability
- Jeopardize Sensitive Information
- Breach Regulations

# How to Handle the Volume and Value of emails???

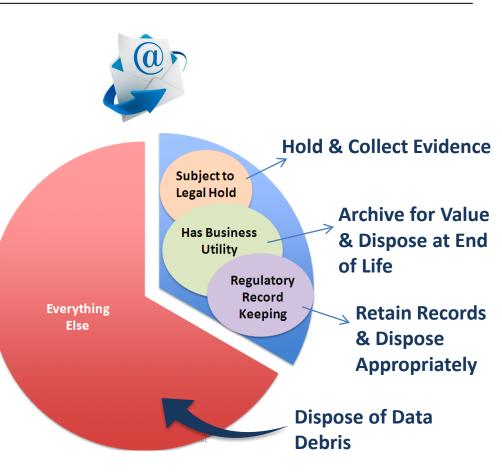

**Email Archiving** puts the brakes on unchecked growth by providing instrumentation that helps:

- Eliminate duplicate data
- Reduce over retention
- Lower storage costs
- Reduce risk

Identification and Classification of

**email** enables archiving and ensures compliance by providing:

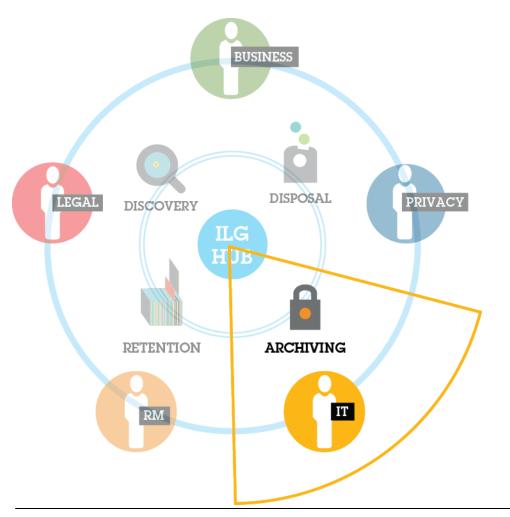

- Industry Leading Classification Rules for email
- A **Highly Efficient workflow** for email surveillance
- Application of appropriate retention periods
- Risk Mitigation of non-compliant emails

# IBM Information Lifecycle Governance – Value-based Archiving

Reduce risk, lower IT costs and increase efficiency with instrumentation for collecting and archiving

- IBM's ILG solutions enable execution of a Defensible Disposal program driven by the understanding of legal duties to maintain data, compliance obligations, and the business value of content
- Archive email, files, application data and social content based on their business value or obligation
- De-duplicate and compress data, tier storage to reduce space and cost
- Govern archives with unified policy management and automation
- Retain, hold and dispose of archived content efficiently, in place without further collection or processing

### Enable Value-based Archiving while Ensuring Compliance

- Manage the risk around 'Insider' communications and enforce Information Boundaries
- Prevent over retention and mitigate risks
- CA DataMinder helps meet regulatory email review mandates and quarantining, ensuring that:
  - Non-compliant emails are NOT sent and never archived
  - Messages are processed according to business value and obligation
  - Archived messages are managed with the right retention policies and are available for eDiscovery processing in place
  - Archived messages are defensibly disposed when appropriate to reduce risk and cost

### Class-leading Email Surveillance for IBM Value-based Archiving

- HIGHLY Accurate content classification identifies potential regulatory breaches in email
- Ensures reviewers and supervisors spend their time on actual violations worthy of their attention
- Full review, quarantine, audit and escalation capabilities to meet surveillance obligations
- Secure, role-based segregation of duties ensure only the right people have access to email events

Stops non-compliant activity before it occurs in email

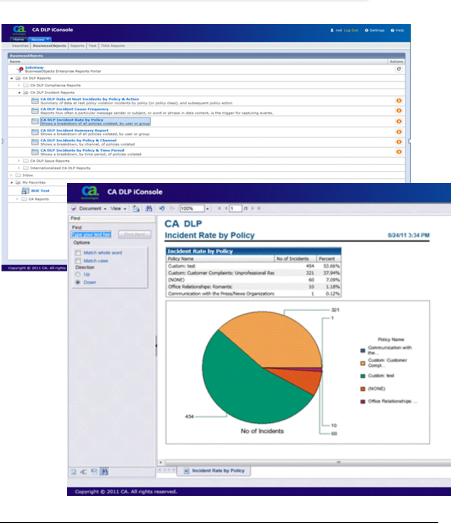

### **Class-leading Email Reporting for IBM Value-based Archiving**

### The DataMinder Supervision Interface provides Advanced Business Intelligence Reporting

- Reporting abstraction layer
- Increase the speed and efficiency of report development
- Sample reports include:
  - Compliance Reports
    - Compliance Audit Report
    - Employees Not Reviewed Report
    - Proof of Supervision Report
    - Repeat Offender Report
  - Incident Reports
    - Incident Rate By Policy Report
    - Data at Rest Incidents By Policy and Action Report
  - Personal Audit Report Dashboard

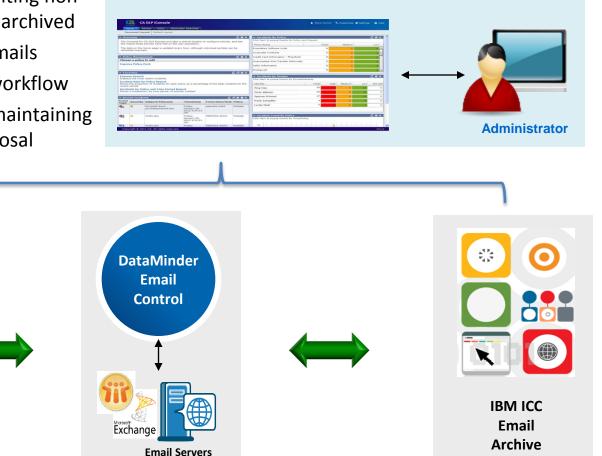

# CA DataMinder & IBM Content Collector

### Seamlessly integrated email surveillance, archiving & eDiscovery

- Mitigate audit risks by preventing noncompliant emails from being archived
- Accurately classify and tag emails
- Full regulatory surveillance workflow
- Securely store emails while maintaining eDiscovery & defensible disposal capabilities

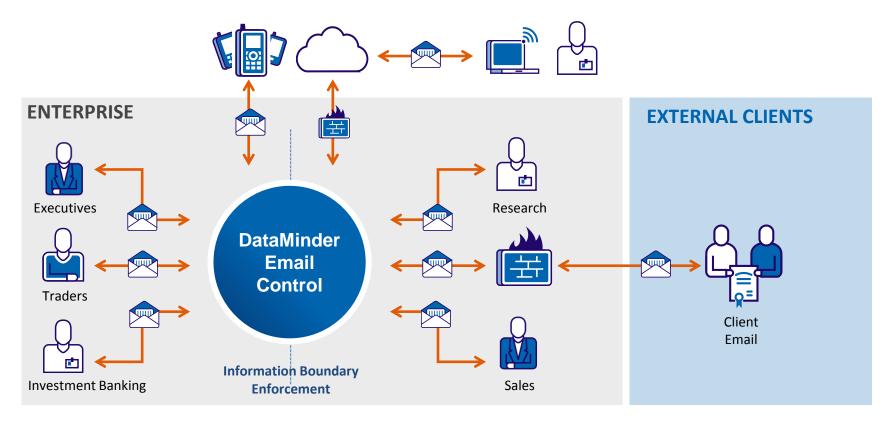

### **Class-leading Email Control for IBM Value-based Archiving**

How CA Technologies helps control non-compliant communications

### The DataMinder Difference

- Centrally monitors all email communications before archiving
- Classifies and applies appropriate rules to ensure compliance
- Provides full Compliance workflow interface to meet regulatory obligations
- Enables business continuity with informative interactive end-user alerts

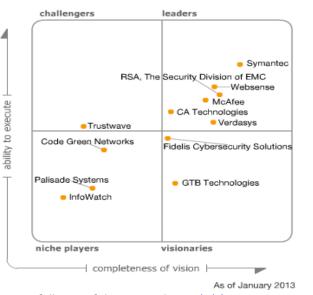

# **Analyst Validation**

### Gartner Magic Quadrant for Content-Aware DLP and ECM

#### **MQ for DLP**

For a full copy of the report please <u>click here</u>

- CA Technologies named a leader in Magic Quadrant for Content Aware Data Loss Prevention
- CA Technologies is a leader based on its ability to execute and completeness of vision

### MQ for ECM

For a full copy of the report please <u>click here</u>

- IBM is the leader across ECM vendors
- Cited for enterprise scalability and broad solution portfolio.

# The IBM + CA Partnership

### Best of breed archive, compliance, surveillance & defensible disposal

#### **Best-of-breed Enterprise Email Control & Surveillance**

- Highly accurate content classification
- Class-leading email surveillance solution
- Fully integrated with IBM ICC for a single source of record for email storage
- Differentiating Information protection capabilities
- Regulatory audit risk mitigation
- User Remediation for business continuity
- Full role-based segregation of duties for reviewers
- Comprehensive & flexible reporting

#### **Best-of-breed Value-based Archiving:**

- Collect, archive, manage and defensibly dispose of content based on value and obligation
- Unified archiving for both structured and unstructured data sources including email, File Systems, Microsoft Sharepoint and IBM Connections
- Efficiently and consistently comply with litigation and regulatory requirements
