Data Warehouse Performance Optimization for Data Loading Package Activity Sheet

---

Package Deliverables

- *Performance Optimization Requirements Checklist*

- *Presentation for Client Executive Team*

- *Recommendations and Findings Report*

- *Performance Optimization Completed Checklist*

What is a Package Offering?
Information Management Implementation Packages are fixed scope, fixed-priced services to help IBM clients ensure that they have a technically sound and functional system framework necessary for successful development, deployment and management of their Information Management solution.

This **Performance Optimization Package** provides the expert resources to respond to a specific performance problem associated with loading data into a DB2 Data Warehouse and provides systematic data gathering, in-depth analysis, and recommendations for system performance optimization.

The scope of this package is limited to the analysis of Data Load processing for a DB2 Data Warehouse and specifically how to optimize that process taking into account the existing infrastructural and architectural constraints. The amount of effort is time-boxed, not to exceed the analysis of three representatives load sources so that both you and IBM can focus on that selection of load sources currently presenting the most substantial performance challenges. This package does not include travel and living expenses.

Tasks Involved
T1. Kickoff Meeting
- Review the Performance Optimization Requirements Checklist
  Note: The Performance Optimization Requirements Checklist must be complete prior to T2 Gathering of Information
- Review Services Description
- Define/Review Project Plan
- Review and Agree with Performance Challenge Scope

T2. Gather the Information and Conduct the Interviews

T3. Perform Analysis
- Review the environment and perform the analysis (time boxed to 10 days)
- Review with Customer Database Administrator

T4. Presentation to Customer Executive Team

T5. Recommendations & Findings Report Finalized

T6. Provide a completed Performance Optimization Checklist

Education Assessment
An Education Assessment is included to complement this service in order to help you validate your team's skills and knowledge and identify any potential skill gaps that may pose risks to your ongoing projects. For more information on our training plans, visit: **ibm.com**/software/data/education/plans.html

Education Enrollment
For course descriptions and instructions on how to enroll, visit **ibm.com**/software/data/education.
Note: In the interests of quality education, IBM reserves the right to update training courses at any time.

For More Information
For specific details on delivery and deliverables, please see the appropriate Service Description. To obtain contacts and more information regarding any of our services offerings and packages, please visit **ibm.com**/software/data/services
