# InfoSphere™ software

# Information Management Software Services
*Data Stage Administration, Management & Production Automation Services Offering*

## HIGHLIGHTS

- *Inventory, review and capture existing customer production infrastructure and standards*

- *Accelerate integration of IBM® InfoSphere® DataStage® software into existing production infrastructure*

- *Review IBM production infrastructure and change management methodology and toolkit*

- *Reduce initial and ongoing maintenance costs through repeatable, documented support procedures*

- *Leverage standard practices for InfoSphere DataStage administration and production automation*

## Administration, management and production automation

The Administration, Management and Production Automation workshop provides customers with a set of proven standard practices for integrating InfoSphere DataStage into a production infrastructure (monitoring, scheduling, auditing and change management). The workshop also provides instruction for administering, managing and operating InfoSphere DataStage environments on UNIX®, Linux® and tightly coupled USDesign USS platforms.

## Leveraging IBM expertise

Led by experienced IBM technical architects, the Administration, Management and Production Automation workshop begins with a review of standard practices for InfoSphere DataStage administration and management. After introducing the IBM production infrastructure and change management methodology and toolkit, the toolkit is then customized and integrated into the client environment.

## Realizing the results

The workshop results in a customized production infrastructure toolkit using:

- *Preinstalled and configured production infrastructure components on the InfoSphere DataStage server*

- *Preinstalled and configured version control repository*

- *Preinstalled and configured InfoSphere DataStage (formerly InfoSphere DataStage Enterprise Edition) environment*

- *One InfoSphere DataStage development project*

- *Sample job sequence of two levels of depth, consisting of 10 or fewer jobs*

## Information Management Software Services

IBM offers a broad set of services offerings designed to maximize success with the InfoSphere product suite through standard practices developed across numerous successful deployments. Intended to establish a foundation of product knowledge and guidelines, these strategic workshops and offerings are customized to the customer's existing environments, standards, and methodologies.

IBM's objective is to provide the most cost effective and expedient means of achieving project goals through the utilization of the IBM InfoSphere product suite, repeatable processes, and consistent deliverables. To achieve these goals and ensure the continued success of our initiatives, IBM leverages standard methodologies, proven consulting expertise and experience refined throughout hundreds of successful client engagements.
